Mr. PADGETT. This is for powder and high explosives. It is for projectiles and shells.

Mr. MANN. We have already had an item for projectiles and shells.

Mr. PADGETT. Some of them, but this is to provide for the new ships that are not cared for under these other appropriations. The other appropriation the gentleman means was for experiment and for target practice and for reserve.

Mr. MANN. Well, I should think it is very queer if we carried an item of $5,800,000 in the bill for shells and projectiles in one place and $1,150,000 for powder in another place, and then carried an item when neither one was mentioned for $3,850,000 in another place and covered the same thing. I think that can not be possible.

Mr. PADGETT. We carried $1,150,000 for the powder, and then in this place we carried——

Mr. MANN. Nearly $4,000,000.

Mr. PADGETT (continuing). Three million eight hundred and fifty thousand dollars, as it has been carried for a good many years, and it is for the reserve and for the supply of the new ships that come in as they are authorized and go into commission.

Mr. MANN. Well, now, if it is for powder, why is it any more necessary to make it any more available until expended than it is in these other two items, where it is not available until expended?

Mr. PADGETT. It is to be made available because it takes more than two years often to use the money, for the reason they have a year in which to obligate; they have a year in which to pay out the obligation. Admiral Twining states in his hearings that he has turned into the Treasury the amount not used and went to the Appropriations Committee for a deficiency to pay for the shells and ammunition which he contracted for, and turned the money back into the Treasury before they were delivered.

Mr. SISSON. As the law required him to do.

Mr. MANN. If it requires two years on this item, why does not it require two years on the $5,800,000 item for the same purpose?

Mr. PADGETT. To which item does the gentleman refer?

Mr. MANN. The one for ordnance and ordnance stores, shells and projectiles.

Mr. PADGETT. That pays for the labor and material and the purchasing of various items——

Mr. MANN. Oh, it pays for the same, in procuring, producing, preserving, and handling ordnance material, and then specifically names shells and projectiles and handling ammunition for issue, and so forth. It is the same thing.

Mr. PADGETT. For furniture at naval magazine, torpedo station, and proving grounds, maintenance of proving grounds and powder factory, and for target-practice, for pay——

Mr. MANN. But that is only a small item.

Mr. PADGETT. For pay of clerks, messenger, and the labor. It is an enormous sum. There are $400,000 added into that appropriation this year; $100,000 of it is for the increase in the wages of laborers at the gun factory, $300,000 of it is for the increase of target practice.

Mr. MANN. Why does that only require a one year's appropriation and the other two years'?

Mr. PADGETT. Because we use it during the current year. They do not have to make contracts. Wherever a person is to manufacture and deliver they do not pay for it until delivery is made, but here it is to pay for current work and operations under that appropriation.

Mr. MANN. Do I understand the gentleman that when you are providing shells for a ship you contract for those, but if you are getting shells for target practice the Government makes them?

Mr. PADGETT. No.

Mr. MANN. I should think whichever you do it would be the same; those you practice with and those you put on shipboard.

Mr. PADGETT. The shells used on shipboard are made of the hardest and finest steel——

Mr. MANN. Are they made by contract?

Mr. PADGETT (continuing). And cost three or four times——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I would ask that the gentleman from Mississippi really have five minutes and then I will not interrupt him.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. PADGETT. Let me finish my statement. The shells that are produced for use on shipboard are of the finest material and the hardest steel, and they cost more than five times as much as the shells that are used in target practice. Target-practice shells are made out of cheap material simply for the purpose of practice and are lost. The shell for target practice, as I remember, cost $50; the one that is used on board ship costs $350 to $500.

Mr. SISSON. I will state to the gentleman I read the hearings as closely as I could of this particular item and I did not find in the hearings any specific explanation why you should desire that it be made available until expended, and for that reason, Mr. Chairman, I make the point of order on that portion of the paragraph, on page 16, beginning in line 6 on the words "to be available until expended."

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

For new and improved machinery and tools for torpedo factory, $15,000.

Mr. SISSON. I notice you have inserted here the words "and improved." Was it necessary to add that?

Mr. PADGETT. We did not want simply new machinery, but we wanted to acquire improved machinery if we found some that was better than we had.

Mr. SISSON. I do not object to the "new," except it seemed to me that the words "new machinery" as purchased by these experts would certainly mean improved machinery.

Mr. PADGETT. It would.

Mr. SISSON. I thought possibly the committee had some reason for it. Have you been buying bad machinery?

Mr. PADGETT. No; but the development of the torpedo is very rapidly taking place. Two years ago the limit of the torpedo was 4,000 yards; to-day it is 10,000 yards, and machinery that was purchased two or three years ago is not available now. It is very expensive to use that, and it would be very injudicious to attempt to use it, and not economical at all when we can get so much better machinery.

Mr. SISSON. I have no objection to the language, except I wanted to know whether there was any reason for it or not.

The Clerk read as follows:

Experiments, Bureau of Ordnance: For experimental work in the development of armor-piercing and other projectiles, fuses, powders, and high explosives, in connection with problems of the attack of armor with direct and inclined fire at various ranges, including the purchase of armor, powder, projectiles, and fuses for the above purposes, and of all necessary material and labor in connection therewith; and for other experimental work under the cognizance of the Bureau of Ordnance in connection with the development of ordnance material for the Navy, $200,000.

Mr FOWLER. Mr. Chairman, I move to strike out the paragraph.

Mr. PADGETT. That is the most important paragraph in the bill.

Mr. FOWLER. There was $100,000 appropriated, Mr. Chairman, last year for this same purpose. I desire to ask the honorable chairman of this committee why this amount is doubled?

Mr. PADGETT. Simply because this experimental work is one of the most important functions in the Navy. They wanted much more, but we did not feel authorized to increase it more than $100,000.

Mr. FOWLER. How much did they want?

Mr. PADGETT. I believe they wanted $400,000.

Mr. FOWLER. I supposed it was $1,000,000.

Mr. PADGETT. No, sir. The experiments form the most important work that is done in keeping abreast of affairs in testing, trying, developing, and finding out what is the most improved projectile, what is the best powder, and all of that. And there is nothing in the bill that is more vital to the efficiency of the Navy than these experiments.

Mr. FOWLER. Did your hearings show that there was any shortage in making these tests on the $100,000 appropriation last year?

Mr. PADGETT. They wanted to enlarge the tests. They could make $100,000 worth of tests, or, if they had only $50,000, they could have made only $50,000 worth of tests.

Mr. FOWLER. What was the unexpended balance?

Mr. PADGETT. There was not any, as I understand. They used it all up and wanted more, and, perhaps, used from some other funds that were available for that purpose. Of that I am not sure.

Mr. FOWLER. Did your hearings show that there was any deficient armor plate furnished the Government that was easily pierced by these strong projectiles?

Mr. PADGETT. I can not say any deficient armor. They had a test down here, and they pierced the armor at about 10,000 yards, I believe.

Mr. FOWLER. How thick was the armor which was pierced?

Mr. PADGETT. Ten inches, I think it was.

Mr. FOWLER. I believe they pierced the two old vessels, also, that were sunk a short time ago, did they not?

Mr. PADGETT. I believe so.

Mr. FOWLER. Was that above or below the water line?

Mr. PADGETT. It was above. It was in the thick part of the armor.

Mr. FOWLER. Mr. Chairman, I am well aware of the necessity for making these experiments if we are to have a great Navy. I know the great circle is to make extravagant appropriations and pay extravagant prices to the Steel Trust for armor plate with which to build these dreadnoughts. We have paid to Andrew Carnegie about $500,000,000 profit. And we are still pursuing the same course to give to him or to his successors an opportunity to sell to the Government armor plate at extravagant prices. And, then, we are running mad to find some projectile that will pierce that armor plate, and still running mad to place upon the high seas the greatest Navy in the world; yet, Mr. Chairman, nature has given us the greatest defense that can be had, and man, with all of his ingenuity and munitions of war, will never get in sight of the wonderful defense which nature has given to America.

Mr. PADGETT. Mr. Chairman, may I ask the gentleman a question just at this point?

Mr. FOWLER. Mr. Chairman, I yield to the distinguished chairman of the committee.

Mr. PADGETT. The gentleman stated that we had paid to Andrew Carnegie $500,000,000 as profits. Inasmuch as we have paid only about two hundred and some odd million dollars, all told, for the ships of the new Navy since 1885, I would like to know how the gentleman gets $500,000,000 of profits out of the armament?

Mr. FOWLER. Mr. Chairman, there has been expended more than $500,000,000 for the Navy and these great war vessels, and Andrew Carnegie's steel plant has furnished the greater portion of the material. If his steel plant individually has not furnished it, he has had such an interlocking system that it has received the benefits thereof. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOWLER. Mr. Chairman, I desire to have my time extended for three minutes.

The CHAIRMAN. The gentleman from Illinois asks for an extension of three minutes. Is there objection?

There was no objection.

Mr. PADGETT. Now, will the gentleman permit me, just at this point?

Mr. FOWLER. One moment. I may have been a little extravagant in my statement that Andrew Carnegie had received $500,000,000. These committees are so in the habit of dealing with millions that I dream in millions. It was a figure of speech, Mr. Chairman, to emphasize the exorbitant profits which he has received from the Government, which, from my best information, reaches several millions. It has been revealed that this armor plate can be furnished at from $75 to $125 per ton.

Mr. CURLEY. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. And yet Mr. Carnegie's plant has received more than $500 per ton for this armor plate.

Mr. CURLEY. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Will the gentleman yield?

The CHAIRMAN. To whom does the gentleman yield?

Mr. FOWLER. I will yield to the gentleman from Tennessee [Mr. PADGETT].

Mr. PADGETT. I want to state to the gentleman that, beginning with our first battleship and ending with the *Utah*, the total amount paid out for battleships is $202,125,607.83.

Mr. FOWLER. I have the figures here in my hand, showing that the cost of the Navy is around $500,000,000.

Mr. PADGETT. I am calling the gentleman's attention to the official statement. And for the armored cruisers the total amount paid out is $66,877,284.40, making in all $268,000,000.

Mr. FOWLER. Mr. Chairman, I did not yield for a speech.

Mr. CURLEY. Mr. Chairman, will the gentleman yield for a question?

Mr. FOWLER. Yes; I yield to the gentleman from Massachusetts for a question.

Mr. CURLEY. I was going to ask this: If the gentleman considers a misstatement of two or three hundred million dollars as only a little extravagant, what would he consider as very extravagant?

Mr. FOWLER. Mr. Chairman, in answer to the question of the gentleman from Massachusetts, I desire to say he belongs to the jingo type, and I call the jingo policy extravagant. [Laughter.] I could not use language which would be extravagant to his imagination of what we ought to have furnished to make a Navy for the United States. You jingo fellows will have to answer to your constituents before you get back to Congress again.

Mr. CURLEY. We all shall.

Mr. FOWLER. Those who have gone mad in following the direction of the heads of departments of this Government will rue the votes you have cast here during this session long before the ides of November. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. CURLEY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts [Mr. CURLEY] moves to strike out the last word.

Mr. PADGETT. Wait one moment. What about the motion of the gentleman from Illinois [Mr. FOWLER] to strike out the paragraph?

The CHAIRMAN. Did the gentleman from Illinois make any motion?

Mr. PADGETT. He made a motion to strike out the paragraph.

Mr. FARR. Let him withdraw it.

Mr. CURLEY. Mr. Chairman, I suppose that the most amusing vaudeville show that has taken place in Washington for many years is the one that has been conducted here this afternoon. One gentleman arises and refers to the great injury that is being visited upon the country by the Powder Trust, and refers to their imaginary filching of the American people, and desires that the manufacture of powder be confined solely and exclusively to those establishments that are under the control of the Government, binding the Government to a policy from which there can be no escape regardless even of war. Another gentleman arises and, despite the fact that since the new Navy of steel-armored ships has been authorized the expenditures for armor plate upon those ships has been but about $300,000,000, refers to a profit of $500,000,000 that has been made by Andrew Carnegie from the United States Government, and literally from the American people. Carnegie may be a wonderful character. He may be the wonderful magician or necromancer that my friend from Illinois [Mr. FOWLER] terms him, but I believe he would have to be born again before he could extract $500,000,000 of profits from $300,000,000 of sales.

And so it has gone on, Mr. Chairman; and the most singular and amusing feature of the entire vaudeville show that has been conducted here is the fact that it has had as its chief admirers and those in charge of the heartiest applause gentlemen of the opposite political party; and those who have protested most loudly against expenditures of money for naval purposes are men who under no condition would vote for any appropriation for national defense. The men who protest most loudly against naval appropriations are the men who would not vote for even one battleship. They are satisfied to depend upon the God of nature and His divine blessings to the American people to serve as a national defense in the hour of the Nation's trial. I believe, Mr. Chairman, that every man on this side of the House who has given any thought to the conduct of this business this afternoon——

Mr. FOWLER. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Illinois?

Mr. CURLEY. No, Mr. Chairman. I realize that there is much truth in what the gentleman from Illinois [Mr. FOWLER] said at the close of his remarks. If we do not exercise care, there will be vacant seats here in the next Congress. I want to say, as one who realizes that the Democratic President who will take his seat on the 4th of March is a minority candidate by more than a million votes, that it is about time that the Democrats of this body realize the responsibility that rests on them and cease their criticism of committees, a majority of whom are members of their own party, unless it is their wish that in the next Congress their party be the minority party. If criticism is to be visited on a committee for a weakness or for a mistake, let it be done by the men on that side of the House who are not only competent but eager to vent that criticism whenever the opportunity arises. [Applause.] I believe it is about time for us to start a constructive policy for the best interests of the Democratic Party, and I believe it is about time for those men who desire to air their experiences or their ability as vaudeville performers to be first accepted by some committee competent to pass upon their ability to do a turn for the edification of the Republicans on that side of the House and for the disgust of Democrats on this side. [Applause and laughter.]

Mr. FOWLER. Mr. Chairman, I desire to oppose the amendment offered by the gentleman.

The CHAIRMAN. The amendment offered by the gentleman from Illinois is still pending.

Mr. FOWLER. No; I mean the amendment to the amendment offered by the gentleman from Massachusetts.

Mr. CURLEY. Mr. Chairman, my amendment was for the privilege of talking for five minutes. It was not a contribution to the vaudeville performance.

The CHAIRMAN. The gentleman from Massachusetts withdraws the pro forma amendment.

Mr. FOWLER. Mr. Chairman, I move to strike out the words "two hundred thousand" and insert in lieu thereof the words "one hundred thousand."

The CHAIRMAN. The pending question is on the motion of the gentleman from Illinois to strike out the paragraph.

Mr. CURLEY. Mr. Chairman, a parliamentary inquiry. I should like to ask how many amendments are at the present time pending, offered by the gentleman from Illinois? There are two that I know of. I should like to know just how many more it is parliamentary and proper for a Member to make.

The CHAIRMAN. The Chair does not recognize the gentleman to offer the second amendment until the first amendment is disposed of.

Mr. PADGETT. I call for a vote on the first amendment.

Mr. FOWLER. I desire to withdraw the pro forma amendment to strike out the paragraph.

The CHAIRMAN. The motion to strike out a paragraph is not a pro forma amendment.

Mr. FOWLER. I desire to withdraw that amendment.

The CHAIRMAN. The gentleman may ask unanimous consent to withdraw that amendment.

Mr. MANN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman from Illinois will state it.

Mr. MANN. Pending a motion to strike out, has not my colleague a right to offer a motion to perfect the paragraph?

The CHAIRMAN. That is in order.

Mr. MANN. That is the motion my colleague makes.

Mr. FOWLER. Mr. Chairman, has the Chair recognized my right to perfect the paragraph?

The CHAIRMAN. The gentleman may make his motion, and the Chair will then rule on it.

Mr. FOWLER. Then, Mr. Chairman, I move to strike out "$200,000," in line 3, page 17, and insert in lieu thereof "$150,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 17, line 3, by striking out "$200,000" and inserting in lieu thereof "$150,000."

Mr. FOWLER. Mr. Chairman, I desire to say that if $100,000 was enough to make this test last year, the country certainly has not doubled itself in requirements since that time, and $50,000 would be a large increase and ample, in my opinion, for the purpose of making the proper tests of armor plate and experimenting for new projectiles.

Mr. Chairman, I have no disposition to be other than perfectly fair to this committee. The gentleman from Massachusetts, I understand, is in sympathy with an enlarged Navy and a monstrous appropriation, because in his section of the country there are certain interests of the War and Navy Department which will receive a large portion of the benefits of these appropriations. I know that men can not free themselves altogether from the wants of their constituents, and I know that that which is intended for a Member's own district is hard for him to vote against.

Mr. EDWARDS. Will the gentleman yield?

Mr. FOWLER. I can not yield, I am sorry, at this time.

Mr. EDWARDS. It is just for a question.

Mr. FOWLER. No; I yielded to the distinguished gentleman from Massachusetts [Mr. CURLEY] a while ago, and when I made the same request of him I got the point blank "no" thrown back in my face as straight as ever a sweetheart put it in the face of her lover. [Laughter.] And so I have learned a lesson to-night not to yield.

Now, Mr. Chairman, the gentleman from Massachusetts was exceedingly oratorical about certain committees having confidence enough in men to put them on these committees in order that the appropriations might be hewn down. I want to say to him and to such Members of his kind as have undertaken to school the Members of Congress to follow a committee right or wrong, that you have put yourselves in the cloakrooms here and whenever an amendment has been offered to cut out an unwarranted appropriation in an appropriation bill you have run out of the cloakrooms like bees out of the hive in order to sustain the contention of the committee. To purgatory with the committee when it is wrong, and to heaven with the committee when it is right.

Now, Mr. Chairman, I have been criticized by the distinguished link in the jingo chain from Massachusetts [Mr. CURLEY]. I said that Andrew Carnegie had profited by virtue of contracts that he had received to furnish armor plate for this country, and I repeat that he has. He was convicted of having defrauded the United States of hundreds of thousands of dollars and was forced to make a settlement in which he paid back $160,000.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. FOWLER].

The question was taken; and on a division (demanded by Mr. FOWLER and Mr. MANN) there were—8 ayes and 75 noes.

So the amendment was lost.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Illinois [Mr. FOWLER] to strike out the paragraph.

The question was taken, and the amendment was lost.

The Clerk read as follows:

Arming and equipping Naval Militia: For arms, accouterments, ammunition, medical outfits, fuel, water for steaming purposes, and clothing, and the printing or purchase of necessary books of instruction, expenses in connection with the organizing and training of the Naval Militia of the various States, Territories, and the District of Columbia, under such regulations as the Secretary of the Navy may prescribe, $125,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word for the purpose of asking the distinguished chairman if there is any possibility of the Naval Militia bill being passed at this Congress?

Mr. PADGETT. The Senate has passed it and the committee has reported it to make it conform to the House bill, and it is here on the Calendar.

Mr. MANN. If the gentleman will persuade the Speaker to recognize the gentleman to move to suspend the rules——

Mr. PADGETT. The Speaker has promised to recognize me, and I think there are only five or six ahead of me on the list.

Mr. MANN. I would suggest to the gentleman that the important question in dealing with the Speaker on the question of recognition is when he will recognize the gentleman.

Mr. PADGETT. Mr. Chairman, I hope to get recognition within the next few days, after we get rid of this bill. [Laughter.]

Mr. MANN. I would say to my distinguished friend that will be too late. A few days after we pass this bill Congress will have adjourned.

Mr. PADGETT. I hope not.

The Clerk read as follows:

BUREAU OF EQUIPMENT.

Equipment of Vessels: For hemp, wire, iron, and other materials for the manufacture of cordage, anchors, cables, galleys, and chains; specifications for purchase thereof shall be so prepared as shall give fair and free competition; canvas for the manufacture of sails, awnings, hammocks, and other work; stationery for chaplains and for commanding and navigating officers of ships, equipment officers on shore and afloat, and for the use of courts-martial on board ship; purchase, repair, and exchange of typewriters for ships; the removal and transportation of ashes from ships of war; interior appliances and tools for equipment buildings in navy yards and naval stations; supplies for seamen's quarters; aviation outfits; and for the purchase of all other articles of equipment at home and abroad, and for the payment of labor in equipping vessels and manufacture of equipment articles in the several navy yards; all pilotage and towage of ships of war; canal tolls, wharfage, dock and port charges, and other necessary incidental expenses of a similar nature; services and materials in repairing, correcting, adjusting, and testing compasses on shore and on board ship; nautical and astronomical instruments and repairs to same; libraries for ships of war, professional books and papers, and drawings and engravings for signal books; naval signals and apparatus, namely, signals, lights, lanterns, rockets, and running lights; compass fittings, including binnacles, tripods, and other appendages of ship's compasses; logs and other appliances for measuring the ship's way, and leads and other appliances for sounding; lanterns and lamps and their appendages for general use on board ship for illuminating purposes, and oil and candles used in connection therewith; service and supplies for coast signal service, including the purchase of land as necessary for sites for radio shore stations; instruments and apparatus, supplies, and technical books and periodicals required to carry on experimental and research work in radiotelegraphy at the naval radio laboratory; bunting and other materials for making and repairing flags of all kinds; photographs, photographic instruments, and materials; musical instruments and music; installing, maintaining, and repairing interior and exterior signal communications and all electrical appliances of whatsoever nature on board naval vessels, except range finders, battle order and range transmitters and indicators, and motors and their controlling apparatus used to operate machinery belonging to other bureaus, $4,000,000: *Provided*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, and messenger service at the several navy yards, naval stations, and coaling stations for the fiscal year ending June 30, 1914, shall not exceed $260,000: *Provided further*, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $50,000: *Provided further*, That the total expenditures under this appropriation at the naval radio laboratory shall not exceed $5,000.

Mr. MANN. Mr. Chairman, I reserve the point of order.

Mr. FOSTER. Mr. Chairman, I reserve the point of order.

Mr. MOORE of Pennsylvania. Mr. Speaker, I desire to offer an amendment, which I send to the desk and ask to have read.

Mr. MANN. Mr. Chairman, may I ask the gentleman from Tennessee whether it is intended to purchase radio sites out of this appropriation; and if so, where?

Mr. PADGETT. No such intention has been made known to the committee.

Mr. MANN. Then I make the point of order on the language toward the top of page 19, lines 2 and 3:

Including the purchase of land as necessary for sites for radio shore stations.

Mr. FOSTER. What about the proviso?

Mr. MANN. I do not know whether that is subject to a point of order.

Mr. ROBERTS of Massachusetts. Last year there was land needed at San Francisco.

Mr. MANN. That can be purchased out of the current law. I do not think you ought to carry an item in the bill every year providing for the purchase of land unless we know where it is going to be purchased.

Mr. PADGETT. It is not indicated, whatever, and I have no objection to striking that language out of the bill.

The CHAIRMAN. The point of order is made to the language in lines 2 and 3, on page 19, to wit:

Including the purchase of land as necessary for sites for radio shore stations.

The point of order is sustained.

Mr. MANN. Mr. Chairman, I move to strike out the proviso commencing with line 21, page 19.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out, page 19, line 21, the language:
"*Provided further*, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $50,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. FOSTER. Mr. Chairman, I move to strike out, in line 15, page 19, the figures "$4,600,000," and insert in lieu thereof the figures "$4,550,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 19, line 15, by striking out "$4,600,000" and inserting "$4,550,000."

Mr. FOSTER. Mr. Chairman, I will state that this simply reduces the amount $50,000, which I suppose the committee figured they could get along without, because they have provided $50,000 shall be paid for the purchase of sites for radio stations.

Mr. PADGETT. May I interrupt the gentleman a moment?

Mr. FOSTER. Under that arrangement I see no use in carrying the extra $50,000.

Mr. BATHRICK. But we have not stricken it out.

Mr. PADGETT. There was nothing expected to be expended for that.

Mr. FOSTER. Then why did the committee put it in the bill?

Mr. PADGETT. Allow me to explain. There have been deficiencies in this amount for several years. In order to prevent a deficiency last year the department placed a number of the vessels in reserve, and they asked for an increase of $1,367,000. We granted them an increase of $760,000, or just a little more than half of what was needed. When the appropriation was fixed at that amount heretofore, we had in the Navy 216 vessels. We have now 277 vessels, or 61 vessels more to be provided for and cared for out of this appropriation than heretofore, and the large increase had been in large ships, an increase of battleships that are expensive, and also in torpedo boats and submarines which are expensive in their equipments, and it is to provide for the equipment of these vessels that this increase was asked. As I stated, the department submitted estimates and earnestly insisted that we should allow $1,367,000.

But for the purposes of economy the committee only increased it $760,000, and no part of it contemplates the purchase of any land whatever.

Mr. FOSTER. Well, it seems to me very strange——

Mr. PADGETT. Let me go a little further for a moment. The renewing of the batteries of a submarine costs $40,000, and with the number of submarines for which we have to renew batteries and with the large ships the equipment of which has to be maintained and renewed, we have already cut them down much below what the department say they really need.

Mr. FOSTER. I think that would leave them still an increase of $710,000 over last year's appropriation, and if they got through last year with $3,843,300 I judge this year they could get through with $4,550,000, and I think if the bill means anything, as we are led to believe from these items we find here in the bill, I see no reason why this $50,000 should not be stricken out if we are giving them the power to appropriate $50,000 for that purpose. And if it does not mean anything, why it seems to me strange indeed we should be led to believe that they need $50,000 additional for that purpose, and so I think it is well to strike this out this year; and if they find that they have to have this amount another year, then it can be given to them.

Mr. MURRAY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURRAY. Even if the amendment suggested by the gentleman from Illinois carries, would the figures in line 21 remain at $260,000?

The CHAIRMAN. Yes. The question is on agreeing to the amendment offered by the gentleman from Illinois.

Mr. GREGG of Texas. Mr. Chairman, I think the motion made by the gentleman from Illinois [Mr. FOSTER] should prevail. Notwithstanding the explanation made by our chairman, nobody can read this provision without understanding that $50,000 of this $460,000 was intended to buy the sites. That is the provision in this paragraph. It says it is for buying sites. Then the committee fixed the amount and said that not to exceed $50,000 shall be used for buying sites. Now——

Mr. PADGETT. Will the gentleman yield for a question?

Mr. GREGG of Texas. Yes.

Mr. PADGETT. Does not the gentleman know that no estimates were submitted for land, and that the estimates did not embrace or contemplate the purchase of any land, but the increase was $1,367,000 to equip those vessels?

Mr. GREGG of Texas. There was no special estimate made for these sites, but there was an estimate made for this gross provision, and we thought that $4,600,000 was enough. Now, because $50,000 has gone out our committee wants to boast we are economizing considerably, but wants still to keep in this $50,000 that we were economizing on when we prepared the bill. Now, I think the amendment should prevail. There is no reason in the world for keeping in the $50,000, because the committee thought that the $4,600,000 was enough for all the purposes, including the $50,000 for the sites; and therefore I favor the amendment offered by the gentleman from Illinois.

Mr. SISSON. Mr. Chairman——

The CHAIRMAN. Debate on the amendment is exhausted.

Mr. SISSON. I move to strike out the last word. Now, Mr. Chairman, the Army bill carries an appropriation for the establishment of these stations, and I recall the discussion at that time that it was not necessary to have on land experiments along this line for more than one department of the Government, and it is for that reason I believe that the land item ought to be stricken out. Now, I presume that the department, in preparing this bill, knew what they were doing, and that is that this land was necessary for the purpose of establishing these stations. I agree very thoroughly with the gentleman from Illinois that the item ought to be reduced $50,000, and especially in view of the fact that the Army is now making expenditures for this purpose.

Mr. HOBSON. Mr. Chairman——

The CHAIRMAN. Debate on the amendment has been exhausted.

Mr. HOBSON. Mr. Chairman, I move to strike out the last two words. The department has now in contemplation general extension of the radio system, and yet it has not proceeded definitely in that extension because of certain factors that are not yet determined.

Mr. GREGG of Texas. Will the gentleman yield to a question?

Mr. HOBSON. Yes.

Mr. GREGG of Texas. Does not the gentleman know this provision has in it to-day, with that world-wide——

Mr. HOBSON. I know it has not. When that world-wide system is established any establishment of these will be affected also; and the only point here is that this authorization would have allowed them to proceed if they found it necessary. The chairman is perfectly correct about the deep cuts that have been made in the general estimates for the equipment of our vessels, and while you might cut down more, and they would get no appropriations, we have already cut to the bone, and the mere prevention of their developing the radio system further on these sites has but meager bearing upon the great need for efficiency and upkeep of the Navy and its increase in size by this increase in the appropriation. I do not think, just because we do not allow them to put out some money in this appropriation for buying sites, that it means they do not need, and need badly, this full amount.

The CHAIRMAN. The question is on the amendment of the gentleman from Illinois [Mr. FOSTER].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. ROBERTS of Massachusetts and Mr. FOSTER demanded a division.

The committee divided; and there were—ayes 50, noes 40.

So the amendment was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have offered an amendment which is at the Clerk's desk.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, page 20, line 2, after the figures "$5,000," by inserting the following:
"*Provided further*, That no part of the appropriation herein provided for the equipment of vessels shall be available for the purchase of materials made by foreign labor, except such materials as can not be obtained in the United States."

Mr. MOORE of Pennsylvania. Mr. Chairman, it is not generally known throughout the country that on the 12th of August last was approved the Panama Canal act containing an out-and-out free-trade paragraph with regard to the construction and equipment of our ships. That paragraph provided that hereafter materials entering into the construction of equipment of vessels built in the United States might enter the United States free of duty. The materials referred to in that act have been interpreted by the Treasury Department in a decision recently rendered, and that interpretation includes in the matter of equipment the product of the mills and the factories, as well as of the raw materials that are produced on the farm and in

the cities. Amongst the materials that may now be entered free of duty into the United States, provided they enter into the equipment of vessels built here, are anchors, chains, cables, tackle, bolts, repair parts, and life-saving apparatus, wireless-telegraph apparatus, nautical instruments, searchlights, signal lights, lamps, furniture, carpets, table linen, bed linen, and also articles to be used in renewal or replacement of articles originally devoted to equipment.

Mr. Chairman, the Democratic Party did just what it was expected it would do when it passed the Panama Canal act. It overrode the right of this House to originate legislation affecting revenue, and it wrote into a bill for the operation and management of the Panama Canal a provision that upset all the protective laws of the United States. In our various districts to-day are produced commodities that you have provided shall enter this country free of duty, though made by foreign labor, if they enter into the construction or equipment of ships. In every rural district this question arises, as well as in every city district. There is not a mill that produces carpet or glassware or upholstery or that produces anything that enters into the equipment or construction of a ship that is not affected. American high-priced labor has been brought by this act into direct competition with the cheap labor of foreign countries, and the Navy Department is expected to compete with private shipbuilders in this country under that law. I do not believe that the Navy Department should have the privilege, or even private shipbuilders in the United States, of bringing in, duty free, in competition with American labor, those products made abroad which are necessary for the construction or equipment of ships in the United States if we can produce such materials in this country. It is a vital proposition which sooner or later will come home to plague every man who voted for this provision in the Panama Canal act and who votes against the amendment I submit now, for the protection of the labor of the United States against the cheap labor of foreign countries.

Mr. BURNETT. Mr. Chairman, it comes with poor grace for the gentleman from Pennsylvania [Mr. MOORE] to talk about bringing goods free into this country made by foreign labor when for the last 12 months he has been, in season and out of season, whenever opportunity presented itself, arguing and working day and night for the purpose of aiding in importing foreign labor itself that comes into competition with American labor. [Applause on the Democratic side.]

I am glad that he is beginning, in his old age [laughter], to wake up, at least to the importance of the rights of the American laboring men. The gentleman is in favor, Mr. Chairman, of bringing the cheap labor of Europe to this country for the purpose, in his own State, of beating down the standard of the wages received by the men who toil; and then he stands here contending for higher prices for that which the laboring man has to buy. Why, Mr. Chairman, it is sickening to me to hear him assert that he stands for the welfare of the laboring man, when I remember that he has fought, as he has for months, in the effort to break down the price of labor in America by contending for the admission of the low-priced labor of Europe; and then to see him come here and gather his sanctimonious garments about him and cry, "Unclean, unclean!" against any Democratic measure that is brought forward here in behalf of the people. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Chairman, in reply to the statement of the gentleman from Alabama [Mr. BURNETT], I would assure him that I stand for the maintenance in the United States of an American standard of wages, whether it is paid to the man who comes from abroad or to the native American. We maintain that wage standard in the United States despite immigration, and that is a complete answer to the argument that the gentleman from Alabama has made.

I am sorry that he is disappointed over the failure of his efforts to pass effectively that bill for the restriction of immigration, upon which he labored for six years. I regret exceedingly for his sake that he has been denied the opportunity of returning in triumph to his district, where the bands would be playing and the flags flying in honor of his approach.

But I am happy, indeed, that the worthy poor who have knocked at our doors and begged for the opportunity to work at an American wage and to get away from the conditions that surrounded them abroad have not been denied. I am glad, indeed, that we are able to let them come here and enjoy for themselves a higher standard of living than they enjoyed in their native countries. [Applause.]

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. MOORE of Pennsylvania. I will.

Mr. MANN. The gentleman from Alabama [Mr. BURNETT] stated a moment ago that the gentleman from Pennsylvania was desiring to keep up the high prices on those things which the poor laboring man consumed. I would like to ask my friend from Pennsylvania how many battle compasses the ordinary poor laboring man does consume? [Laughter.] That is the item under consideration.

Mr. MOORE of Pennsylvania. I know that we make them in this country, and the men who make them here get three times as much wages as are paid to the men who make them in any other country.

Mr. PADGETT. Mr. Chairman, I hope the amendment will not be agreed to.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. MOORE of Pennsylvania. A division, Mr. Chairman.

The committee divided; and there were—ayes 38, noes 69.

So the amendment was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The Clerk read as follows:

On page 20, line 2, at the end of the line, insert the following: "*Provided*, That no part of any sum herein appropriated shall be expended for the purchase of any material of any kind entering into the equipment of any vessel if foreign labor employed in the production and manufacture thereof shall have been employed thereon in excess of eight hours a day."

Mr. MOORE of Pennsylvania. Now, Mr. Chairman, I appeal to the friends of the downtrodden workingman to support this amendment, and I appeal particularly to those champions of the eight-hour law, who have been so vociferous in their demands for justice to the workingman, to support this amendment. I ask those who claim to speak for the toilers in the mines and for the workers in the mills to say what they are going to do with respect to this proposition to enforce the eight-hour law, which holds throughout the United States, as it applies to that foreign labor to which my friend from Alabama [Mr. BURNETT] referred so touchingly a moment ago.

Here is an opportunity for all the friends of the downtrodden, all the friends of the workingman, all the friends of the common "peepul," to come forward and do some little mite of justice to those who toil and labor for a living in the United States. Will my friends upon the other side, who have been advancing eight-hour legislation and urging it upon the country, after the Republican Party instituted it, stand up for this amendment now, and protect the eight-hour workers of the United States against that downtrodden labor on the other side, about which our friends are so much concerned?

Mr. BATHRICK. Will the gentleman yield?

Mr. MOORE of Pennsylvania. If the gentleman will vote with me.

Mr. BATHRICK. Does not the gentleman think the general eight-hour law covers this?

Mr. MOORE of Pennsylvania. I think we should stop goods coming into this country which compete with eight-hour labor in the United States, when the competitors are employed 13 hours in foreign countries, at one-half and one-third the wages paid in the United States.

Mr. MADDEN. One-fifth.

Mr. MOORE of Pennsylvania. And if the question of sincerity is to be raised, as it was raised by my friend from Alabama [Mr. BURNETT], let us see now whether he will vote in favor of the American workingman on the eight-hour plan, or whether he prefers to give the advantage to the man who works 13 hours on the other side in competition with the American, and getting for it one-half or one-third the pay.

Mr. MADDEN. One-fifth.

Mr. BURNETT. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. BURNETT. Do not some of the steel plants in your own State work that foreign labor and others 12 hours a day 7 days in the week?

Mr. MOORE of Pennsylvania. Oh, I think not. There have been so many lumps of $500,000,000 taken out of the pockets of the poor by Andrew Carnegie that it has come to be a nightmare to the gentlemen on the other side.

Mr. BURNETT. They work night and day under the night-shift management.

Mr. MOORE of Pennsylvania. If they do, they get paid for it, and they get paid a little better for it than certain other workers in this country, to whom I will make no reference just now. Will you tell me whether the eight-hour law is applied on the plantation or in the cotton field? Will you tell me whether you pay there on the eight-hour wage scale? My friend from Alabama [Mr. BURNETT] is most interesting and patriotic at

home, and here he makes most excellent speeches in favor of the downtrodden. Will he and my friends of the Democratic Party join hands with me to-night and say, "We want to be fair with the American workingman, we want to stand with the leaders of labor, we want to keep foreign labor up to an eight-hour basis when it comes into competition with the union labor of the United States"?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MANN. I ask that the gentleman have one minute more.

Mr. MOORE of Pennsylvania. I am satisfied to leave this question to the fairness of the other side.

Mr. MANN. I ask unanimous consent that the gentleman have one minute more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Pennsylvania have one minute more. Is there objection?

There was no objection.

Mr. MANN. I should like to ask the gentleman if he believes in the eight-hour law?

Mr. MOORE of Pennsylvania. I do.

Mr. MANN. Does he believe it ought to be applied here now in this House?

Mr. MOORE of Pennsylvania. I think it ought to be applied to all Congressmen. I am entirely in favor of an amendment to this bill to effect it.

Mr. BUCHANAN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to the expert in labor matters, the gentleman from Illinois [Mr. BUCHANAN], and I am very glad to have him ask me a question. If he is in favor of the eight-hour law in the United States, he will be in favor of the enforcement of the eight-hour law abroad when it comes in competition with the eight-hour law here.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUCHANAN. Mr. Chairman, I should like to ask the gentleman if he does not know——

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Pennsylvania.

The question being taken, on a division (demanded by Mr. MOORE of Pennsylvania) there were—ayes 37, noes 62.

Accordingly the amendment was rejected.

Mr. BUTLER. Mr. Chairman, may I ask the gentleman from Tennessee whether we have not worked long enough? We have been here 12 hours, nearly?

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee determined to rise; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28812, the naval appropriation bill, and had come to no resolution thereon.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock p. m.) the House adjourned until to-morrow, Tuesday, February 25, at 10.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Superintendent of the United States Capitol Building and Grounds, transmitting report on refrigeration of Capitol and House and Senate Office Buildings (H. Doc. No. 1419); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury calling attention to the legislative appropriation bill for the next fiscal year and submitting a deficiency estimate of appropriation to correct same (H. Doc. No. 1420); to the Committee on Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named as follows:

Mr. GOEKE, from the Committee on Expenditures in the Treasury Department, submitted a report (No. 1569) relating to the deposits of Government funds in banks and the surplus working capital in the general fund of the Treasury, which was referred to the House Calendar.

Mr. SIMS, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 28810) to authorize the Virginia & Carolina Southern Railroad Co. to construct a bridge across the Lumber River at or near the town of Lumberton, N. C., reported the same with amendment, accompanied by a report (No. 1571), which said bill and report were referred to the House Calendar.

Mr. McCOY, from the Committee on Expenditures in the Post Office Department, submitted a report (No. 1570) on canceling machines, etc., under H. Res. 109, which report was referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LA FOLLETTE: A bill (H. R. 28846) to authorize the town of Okanogan, Wash., to construct and maintain a footbridge across the Okanogan River; to the Committee on Interstate and Foreign Commerce.

By Mr. MOORE of Pennsylvania: Resolution (H. Res. 868) to authorize the fumigation and cleansing of fixtures and furnishings of the House of Representatives and committee rooms; to the Committee on Accounts.

By the SPEAKER (by request): Memorial of the Legislature of the State of Nevada, favoring the passage of H. R. 25518, for the construction of a practical fishway in the Derby Dam in the Truckee River, Washoe County, Nev.; to the Committee on Rivers and Harbors.

Also (by request), memorial of the Legislature of the State of Oregon, favoring the passage of H. R. 2981, to create Saddle Mountain National Park; to the Committee on the Public Lands.

Also (by request), memorial of the Legislature of the State of Wyoming, favoring laws to protect migratory game birds; to the Committee on Agriculture.

By Mr. ALLEN: Memorial of the Ohio Legislature, relative to a system of national highways; to the Committee on Agriculture.

By Mr. ANSBERRY: A joint resolution of the Legislature of Ohio, relative to a system of national highways; to the Committee on Agriculture.

By Mr. PETERS: A memorial of the General Court of the Commonwealth of Massachusetts, relative to an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

By Mr. POST: A joint resolution of the Legislature of the State of Ohio, memorializing Congress relative to a system of national highways; to the Committee on Agriculture.

By Mr. WILLIS: A memorial of the General Assembly of the State of Ohio, urging the construction and maintenance of a system of national highways; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BORLAND: A bill (H. R. 28847) for the relief of the heirs of Thomas Smith, deceased; to the Committee on War Claims.

By Mr. O'SHAUNESSY: A bill (H. R. 28848) for the relief of Walter A. Hill; to the Committee on Claims.

By Mr. SLOAN: A bill (H. R. 28849) granting an increase of pension to Martin L. Pembleton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28850) granting an increase of pension to Edgar W. Thornton; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Colorado: A bill (H. R. 28851) granting an increase of pension to Tamma A. Lloyd; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Federation of Citizens' Associations of the District of Columbia, favoring the passage of the amendment to the District of Columbia appropriation bill providing for the erection of a public-utilities commission; to the Committee on the District of Columbia.

By Mr. ALLEN: Petition of Radabaugh Bros. and other citizens of West Milton, Ohio, favoring the passage of House bill 27567, for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. BURKE of South Dakota: Petition of sundry citizens of the United States, favoring the passage of legislation for the investigation of the prosecution of the editors of the Appeal to

Reason by the Government; to the Committee on Expenditures in the Post Office Department.

By Mr. CARY: Petition of W. H. Law, Detroit, Mich., favoring the passage of legislation for the relief of the family of Capt. Ocha, of the Life-Saving Service, deceased; to the Committee on Pensions.

By Mr. CURLEY: Petition of the Massachusetts Peace Society, Boston, Mass., favoring the repeal of the clause in the Panama Canal act making discriminations in the Panama Canal tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of the New England Water Works Association, protesting against the passage of any legislation tending to destroy the present national system of forest conservation; to the Committee on Agriculture.

By Mr. HILL: Petition of the Danbury Christian Endeavor Union, Danbury, Conn., protesting against the passage of legislation for the return of alcoholic liquors to the canteens of the Army; to the Committee on Military Affairs.

By Mr. LINDSAY: Petition of owners of grain elevators, Buffalo, N. Y., protesting against the passage of House bill 28180, with reference to securing a channel from the outer harbor to connect with the Buffalo River and for the enlargement of the anchorage basin in the outer harbor; to the Committee on Rivers and Harbors.

Also, petition of citizens of the borough of Brooklyn, N. Y., favoring an amendment to the naval appropriation bill providing for the building of one of the two new battleships in a Government navy yard; to the Committee on Naval Affairs.

By Mr. PETERS: Petition of the Massachusetts Peace Society, Boston, Mass., favoring the passage of legislation for submitting to arbitration the clause in the Panama Canal act discriminating against ships in Panama Canal tolls; to the Committee on Interstate and Foreign Commerce.

By Mr. POST: Petition of Radabaugh Bros., West Milton, Ohio, favoring the passage of the Weeks bill (H. R. 27567) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. J. M. C. SMITH: Petition of Ann Arbor Branch of Collegiate Alumnæ, favoring the passage of legislation for the eight-hour law for women in the District of Columbia; to the Committee on the District of Columbia.

By Mr. TILSON: Petition of the New England Water Works Association, Boston, Mass., protesting against the passage of any legislation tending to destroy the present national system of forest conservation; to the Committee on Agriculture.

By Mr. UNDERHILL: Petition of owners of grain elevators, Buffalo, N. Y., protesting against the passage of House bill 28180, with reference to securing a channel from the outer harbor to connect with the Buffalo River and for the enlargement of the anchorage basin in the outer harbor; to the Committee on Rivers and Harbors.

By Mr. WILSON of New York: Petition of owners of grain elevators, Buffalo, N. Y., protesting against the passage of House bill 28180, with reference to securing a channel from the outer harbor to connect with the Buffalo River and for the enlargement of the anchorage basin in the outer harbor; to the Committee on Rivers and Harbors.

SENATE.

TUESDAY, *February 25, 1913.*

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

ESTIMATE OF APPROPRIATION.

The PRESIDENT pro tempore (Mr. GALLINGER) laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of the Interior submitting an estimate of $334,435 for the installation of a sanitary sewerage and storm-water drainage system in the city of Hot Springs, Ark., abutting the Hot Springs Reservation, which, with the accompanying papers, was referred to the Committee on Appropriations.

SERVICE PENSION LAW.

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the commander in chief of the Grand Army of the Republic, transmitting resolutions, which will be read.

The Secretary read as follows:

HEADQUARTERS GRAND ARMY OF THE REPUBLIC,
OFFICE OF COMMANDER IN CHIEF,
Bridgeport, Conn., February 24, 1913.

To the PRESIDENT PRO TEMPORE
OF THE SENATE OF THE UNITED STATES,
Washington, D. C.

SIR: In accordance with the vote of the Forty-sixth National Encampment of the Grand Army of the Republic, held at Los Angeles, Cal., September 12–13, 1912, we have the honor to transmit herewith resolutions unanimously adopted by said encampment and directed to be presented to the Senate of the Congress of the United States in appreciation of its passage of the pension bill, approved May 11, 1912.

Very respectfully, yours,

ALFRED B. BEERS,
Commander in Chief.
HENRY J. SEELEY,
Adjutant General.

HEADQUARTERS GRAND ARMY OF THE REPUBLIC,
Bridgeport, Conn., January 30, 1913.

To the Senate of the Congress of the United States:

We hereby certify that at the Forty-sixth Annual Encampment of the Grand Army of the Republic held at Los Angeles, Cal., September 12–13, 1912, the following resolutions were unanimously adopted:

Resolved: First. That the thanks of the Grand Army of the Republic and of those whom it represents be, and are hereby, extended to the President of the United States, the Hon. William Howard Taft; to the Congress of the United States in both its branches, and especially our comrade, Gen. ISAAC R. SHERWOOD, chairman of the Committee on Invalid Pensions of the House of Representatives, and to the Hon. PORTER J. MCCUMBER, chairman of the Senate Committee on Pensions, for their efficient cooperation and tactful leadership in securing the enactment of the law of May 11, 1912; and also to Senator HENRY E. BURNHAM, and Representative JOHN A. M. ADAIR, for their invaluable services in reaching an agreement on the part of the conferees of the two Houses of Congress.

Second. That the thanks of the encampment be, and are hereby, tendered to each member of the pension committee of the Grand Army of the Republic and to the comrades who aided the committee in this work, and in particular to Comrade Ell Torrance, past commander in chief and chairman of said pension committee, and to Commander in Chief Harvey M. Trimble, for their great and successful work in behalf of the surviving veteran Union soldiers of the Civil War.

Third. That the incoming commander in chief is hereby directed to have prepared and engrossed copies of these resolutions to be presented to the respective parties herein named.

[SEAL.] ALFRED B. BEERS,
Commander in Chief.

Official:

HENRY J. SEELEY,
Adjutant General.

The PRESIDENT pro tempore. The communication and accompanying resolutions will be referred to the Committee on Pensions.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented House joint memorial No. 3, adopted by the Legislature of the State of Wyoming, which was ordered to lie on the table and to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss.:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following copy of house joint memorial No. 3, adopted by the Legislature of the State of Wyoming, has been carefully compared with the original, filed in this office on the 18th day of February, A. D. 1913, and is a full, true, and correct copy thereof:

House joint memorial No. 3.

Whereas there have been introduced in Congress three bills (H. R. 36, H. R. 4428, S. 2367) to afford Federal protection to migratory game birds; and

Whereas there is a very general sentiment in this State in favor of such protection, and an urgent request for the enactment of such a law has been made, as appears by the numerous petitions received: Now therefore

Resolved (the senate concurring), That Congress be, and hereby is, requested to enact a law giving ample protection to migratory game birds.

Resolved, That the legislatures of all other States of the United States, now in session or when next convened, be, and they are hereby, respectfully requested to join in this request by the adoption of this or an equivalent resolution.

Resolved further, That the secretary of state be, and he hereby is, directed to transmit copies of this resolution to the Senate and the House of Representatives of the United States, and to the several Members of said body representing this State therein; also to transmit copies hereof to the legislatures of all other States of the United States.

MARTIN L. PRATT,
Speaker of the House.
BIRNEY H. SAGE,
President of the Senate.

Approved February 17, 1913.

JOSEPH M. CAREY, *Governor.*

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 18th day of February, A. D. 1913.

[SEAL.] FRANK L. HOUX, *Secretary of State.*
By F. H. WESCOTT, *Deputy.*

Mr. CULLOM presented a memorial of the Building Trades Council of Quincy, Ill., remonstrating against the enactment of legislation providing Federal pay for members of the National Guard, which was referred to the Committee on Military Affairs.

He also presented a petition of William McKinley Camp, No. 12, Department of Illinois, United Spanish War Veterans, of Chicago, Ill., praying for the enactment of legislation granting pensions to the widows and orphans of the Spanish-American War, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Mulberry Grove, Ill., praying for the enactment of legislation providing Federal aid in the construction of public highways, which was referred to the Committee on Agriculture and Forestry.

Mr. CHAMBERLAIN. I present a joint memorial adopted by the Legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Patents.

There being no objection, the joint memorial was referred to the Committee on Patents and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, Ben W. Olcott, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 4 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 15th day of February, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon. Done at the capitol at Salem, Oreg., this 17th day of February, A. D. 1913.

[SEAL.]

BEN W. OLCOTT,
Secretary of State.

House joint memorial 4.

Whereas the people of the State of Oregon and of these United States are viewing with alarm the rapid and enormous increase in the cost of living, caused, as we believe, by the monopoly made possible by the existence of the patent-right laws; and

Whereas the cost of educating our children and otherwise advancing civilization is more than doubled by the monopoly made possible by the existence of the copyright laws; and

Whereas every article of trade and commerce as well as education and civilization are closed by the throttling of competition; and

Whereas cooperation is the only key with which the closed door of opportunity may be opened: Now therefore be it

Resolved by the house (the senate concurring), That our Representatives and Senators in Congress be, and are hereby, memorialized and requested to introduce, if necessary, to vote for, and use their best endeavors to pass a law amending all patent-right and copyright laws and offering and allowing to all inventors a royalty of 5 per cent, or a graduated royalty, as the case may be, to be paid by anyone who cares to manufacture any article or commodity now covered by such patent right or copyright.

Your memorialists further believe and urge that the repeal of such patent-right and copyright laws will at once inaugurate competition, resulting in a lower cost of living.

That the copyright privilege on schoolbooks alone costs the people more than double the necessary cost of such schoolbooks, and is therefore an inexcusable barrier in the way of education and general enlightenment.

That the leasing system of labor-saving patents, with a refusal to sell the same, is as pernicious as it is monopolistic, and that by this practice the prices of all products of such labor-saving machinery may be and are generally under the absolute control of the owner thereof.

We believe these laws to contain one of the hidden secrets whereby the great combination of wealth throttles competition and thus place the American common people helpless at their feet.

Adopted by the house January 28, 1913.

C. N. MCARTHUR,
Speaker of the House.

Concurred in by the Senate February 13, 1913.

DAN J. MALARKEY,
President of the Senate,

Indorsed: House joint memorial No. 4.

W. F. DRAGER, *Chief Clerk.*

Filed February 15, 1913, at 4.10 o'clock p. m.

BEN W. OLCOTT,
Secretary of State.

Mr. CHAMBERLAIN. I present a joint memorial adopted by the Legislature of the State of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Immigration.

There being no objection, the joint memorial was referred to the Committee on Immigration, and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, Ben W. Olcott, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 10 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 15th day of February, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 17th day of February, A. D. 1913.

[SEAL.]

BEN W. OLCOTT,
Secretary of State.

House joint memorial 10.

To the Senate and House of Representatives of the United States in Congress assembled:

We, your memorialists, the Legislative Assembly of the State of Oregon, hereby indorse the provisions of the Asiatic exclusion act, H. R. 13500, now pending in Congress, as the same is of great benefit to the laboring men of the United States, and we urge the passage of said bill.

Adopted by the House February 11, 1913.

C. N. MCARTHUR,
Speaker of the House.

Concurred in by the Senate February 13, 1913.

DAN J. MALARKEY,
President of the Senate.

Indorsed: House joint memorial No. 10.

W. F. DRAGER, *Chief Clerk.*

Filed February 15, 1913, at 4.10 o'clock p. m.

BEN W. OLCOTT,
Secretary of State.

Mr. HITCHCOCK. I present a resolution of the House of Representatives of the Nebraska Legislature, in favor of the McLean bill, for the protection of bird life and cooperation between the Federal Government and the States in the protection of game birds and song birds. I ask that the resolution lie on the table and be printed in the RECORD.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

The Nebraska House of Representatives has, this 20th day of February, 1913, upon recommendation of the standing committee on fish culture and game, adopted the following resolution:

Be it resolved, That this house desires to go on record as favoring the widest possible cooperation between the States and the Federal Government to protect both game birds and song birds, and we do hereby request our Senators and Representatives in Congress to vote and work for the passage of the McLean bill, and for all other legislation designed to prevent the destruction of American bird life.

HENRY W. RICHMOND,
Chief Clerk.

HOUSE OF REPRESENTATIVES,
Lincoln, Nebr., February 20, 1913.

Mr. HITCHCOCK. I present a resolution of the State Senate of Nebraska in favor of a Federal appropriation of $25,000 for reclamation and surveys in that State. I ask that the resolution be printed in the RECORD and referred to the Committee on Irrigation and Reclamation of Arid Lands.

There being no objection, the resolution was referred to the Committee on Irrigation and Reclamation of Arid Lands and ordered to be printed in the RECORD, as follows:

Whereas the Government of the United States has and is expending immense sums of money to protect the low lands of the Missouri and Mississippi Valleys from the floods and overflow waters due to the melting of the snows in the headwaters of these rivers, and that such moneys have been expended in the past mostly for temporary relief in the building of dikes, dams, and levees; and

Whereas a few years ago the United States Government appropriated and expended the sum of $75,000,000 for experimental work in the construction of large dams and reservoirs in the headwaters of the large rivers in the arid regions of the West, for the purpose of reclaiming the agricultural lands in the various arid Western States by irrigation, and by this means have diverted the overflow and flood waters to irrigation and have added countless millions of dollars to the wealth of these Western States; and

Whereas expenditure of these moneys in the headwaters of our rivers, if continued, will solve the problem of the Federal Government in protecting its low lands in the lower Mississippi Valley and make unnecessary the expenditure of vast sums of money in the future in the erection of dams, embankments, dikes, and levees; and

Whereas we believe there are many thousands of acres of arid and semi-arid lands in western and central Nebraska that could be reclaimed and made very productive by irrigation, and that there are sufficient flood waters going to waste in the rivers and larger streams of this State sufficient to irrigate all of these arid lands; and

Whereas it is of benefit to the Federal Government to have the flood waters of these streams corralled, as it is of benefit to the citizens of our State to have the waters diverted to our agricultural lands, that the Government ought to do the experimental work of surveying and ascertaining what points there are within the State where it is practicable to impound the waters from our streams for irrigation purposes: Therefore be it

Resolved by the Senate of the State of Nebraska, That this senate requests that the Members of the United States Senate and House of Representatives from Nebraska introduce and support a bill in Congress appropriating the sum of $25,000 for the purpose of having the Federal Government make a survey of the rivers and larger streams in western and central Nebraska for the purpose of ascertaining where dams can be erected at feasible points, and where it is feasible and practicable to construct reservoirs for the purpose of impounding water for the purpose of irrigation; that our people may know by the reports from the Federal Government where they may successfully carry on such irrigation projects; that the appropriation of $25,000 be placed with and used by the Reclamation Service; and that the complete report of said surveys, with the recommendations attached, be made by the engineers of the Reclamation Service or the proper officers of the Federal Government; and be it further

Resolved, That the secretary of the senate is instructed to transmit a copy of this resolution to all of the Nebraska Senators and Representatives at Washington, D. C.

W. V. HOAGLAND,
J. M. GRACE.

Mr. HITCHCOCK presented memorials of sundry citizens of College View, Lincoln, Crawford, Broken Bow, York, and Lincoln, all in the State of Nebraska, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

He also presented a memorial of members of the Woman's Club of Falls City, Nebr., remonstrating against the transfer of the control of the national forests to the several States,

which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a memorial of the Farmers' Educational and Cooperative Union, of Hooper, Nebr., remonstrating against the adoption of the so-called Aldrich currency system, which was referred to the Committee on Finance.

He also presented resolutions adopted by local posts, Grand Army of the Republic, Department of Nebraska, of Omaha and South Omaha, Nebr., remonstrating against the proposed transfer of the Pacific Branch of the National Home for Volunteer Soldiers to the War Department, which were referred to the Committee on Military Affairs.

Mr. GRONNA presented resolutions adopted by the Retail Hardware Association of North Dakota, favoring the adoption of certain amendments to the parcel-post law, which were referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of New Home, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. CRANE presented resolutions adopted by members of the Massachusetts Peace Society, favoring the repeal of the clause in the Panama Canal act exempting American coastwise shipping from the payment of tolls through the Panama Canal, which were ordered to lie on the table.

He also presented resolutions adopted by the General Court of the Commonwealth of Massachusetts, favoring the adoption of an amendment to the Constitution giving Congress the power to regulate the hours of labor, which were referred to the Committee on the Judiciary.

Mr. PITTMAN. I present a joint resolution passed by the Legislature of the State of Nevada, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the resolution was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

Senate and assembly joint resolution memorializing Congress.

Whereas there is pending in Congress, a House of Representatives bill known as H. R. 25518, which provides for the construction of an efficient and practical fishway in the Derby Dam, which is owned and controlled by the United States Reclamation Service, and in the Truckee River, Washoe County, and appropriating money for the construction thereof, and introduced by Mr. RAKER on June 27, 1912: Therefore be it

Resolved, The people of this State, through their representatives in this the twenty-sixth session of the legislature, most heartily recommend the passage of the bill, to the end that effective provision may be had for the passage of the trout of this stream, and those of Pyramid Lake, during their spawning season, to enable them to reach their spawning beds in the upper stretches of the Truckee River, for the purpose of reprodnction: And be it further

Resolved, That the secretary of state is instructed to at once forward copies of this memorial to the President of the United States, the President of the Senate, and Speaker of the House of Representatives, and to our United States Senators and Representatives in Congress.

Approved, February 17, 1913.

STATE OF NEVADA,
DEPARTMENT OF STATE.

I, George Brodigan, the duly elected, qualified, and acting secretary of state of the State of Nevada, do hereby certify that the foregoing is a true, full, and correct copy of the original senate and assembly joint resolution, approved February 17, 1913, now on file and of record in this office.

In witness whereof I have hereunto set my hand and affixed the great seal of State at my office, in Carson City, Nev., this 18th day of February, A. D. 1913.

[SEAL.]

GEO. BRODIGAN,
Secretary of State,
By J. W. LEGATE, *Deputy.*

Mr. PITTMAN. I present a memorial of the Legislature of the State of Nevada, which I ask may be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the memorial was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Assembly joint and concurrent resolution 1.

Whereas the Secretary of the Treasury has reported to Congress the desirability of abolishing certain United States mints and assay offices—among them the mint at Carson City—urging economy and uselessness as a reason therefor; and the House of Representatives, through its Committee on Appropriations, has accepted these recommendations, with the result that the House has failed to include any appropriation for these assay offices for the next fiscal year; and that notwithstanding this the Senate, recognizing the needs of the western miners, has inserted appropriations for these offices in the bill: Now therefore be it.

Resolved, by the Assembly of the State of Nevada (the Senate concurring), That we respectfully urge, in the name of the miners of the West, and especially those of Nevada—a State which furnished to our Government in time of dire distress the means from her mineral wealth by which this Government and the Union of States was perpetuated—that Congress do not take away from the producers of bullion the means for its prompt disposal at its full value, by abolishing these assay offices and forcing the miners to dispose of their product to private refineries: And be it further

Resolved, That our Senators and Representative be furnished with a copy of these resolutions immediately that they may bring the same to the attention of their respective Houses that the desires of the citizens of Nevada may be fully understood.

Approved, February 19, 1913.

STATE OF NEVADA,
DEPARTMENT OF STATE.

I, George Brodigan, the duly elected, qualified, and acting secretary of state of the State of Nevada, do hereby certify that the foregoing is a true, full, and correct copy of the original assembly joint and concurrent resolution No. 1, introduced by Mr. Holmes, approved February 19, 1913, now on file and of record in this office.

In witness whereof I have hereunto set my hand and affixed the great seal of State at my office, in Carson City, Nev., this 20th day of February, A. D. 1913.

[SEAL.]

GEO. BRODIGAN,
Secretary of State,
By J. W. LEGATE, *Deputy.*

Mr. BRANDEGEE presented a petition of Local Grange, Patrons of Husbandry, of Kent, Conn., and a petition of Housatonic Grange, Patrons of Husbandry, of Stratford, Conn., praying for the passage of the so-called agricultural extension bill, which were ordered to lie on the table.

Mr. ROOT presented memorials of sundry citizens of Watertown, Onondaga, Ellicottville, Adams Center, White Plains, North Castle, New York City, Lockport, and Vienna, and of the congregation of the Seventh-day Adventist Church of Wellsville, all in the State of New York, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. CLARK of Wyoming. I present a joint memorial of the Legislature of the State of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

There being no objection, the memorial was referred to the Committee on Public Lands, and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING:
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following and hereto-attached copy of enrolled joint memorial No. 2, Senate, State of Wyoming, has been carefully compared with the original filed in this office on the 21st day of February, A. D. 1913, and is a full, true, and correct copy of the same and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 22d day of February, A. D. 1913.

[SEAL.]

FRANK L. HOUX,
Secretary of State,
By F. H. WESCOTT,
Deputy.

Original senate joint memorial 6. Twelfth Legislature of the State of Wyoming.

Enrolled joint memorial 2, Senate, State of Wyoming.

Memorial to the honorable Secretary of the Interior of the United States of America, relative to restoring to entry lands now withdrawn in Wyoming under the North Platte project of the United States Reclamation Service.

Be it resolved by the Senate of the State of Wyoming (the House of Representatives concurring), That—

Whereas there has been withdrawn for a number of years 150,000 acres of land, more or less, in townships 21, 22, 23, 24, and 25 north of ranges 60, 61, 62, 63, 64, and 65 west of the sixth principal meridian, all located in the State of Wyoming, under the North Platte or Nebraska-Wyoming reclamation project, and said land now remains idle and under most favorable conditions could not be reclaimed and settled up within a period of 15 years; and

Whereas the demand for homes is increasing at a rapid rate and settlers are knocking at our doors; and

Whereas the greater part of tillable land surrounding the land withdrawn and now idle under the foregoing project has been entered under the public-land laws of the United States; and

Whereas if said withdrawn areas are restored to entry it can be, and doubtless will be, all settled up within a very few years; and

Whereas the primary object of the Federal land laws is to promote the passage of land into private ownership with as little delay as possible: And be it

Resolved, That the honorable Secretary of the Interior of the United States be memorialized to restore all of said land to entry during the spring of the year 1913, in order that the State of Wyoming may secure the benefits of the annual immigration to the West; be it further

Resolved, That a copy of this memorial be sent to Hon. FRANCIS E. WARREN, Hon. CLARENCE D. CLARK, and Hon. FRANK W. MONDELL, representatives in Congress from the State of Wyoming.

BIRNEY H. SAGE,
President of the Senate.
MARTIN L. PRATT,
Speaker of the House.

Approved February 21, 1913, at 2.45 p. m.

JOSEPH M. CAREY, *Governor.*

Mr. CLARK of Wyoming. I present a joint memorial of the Legislature of the State of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

There being no objection, the memorial was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the annexed copy of enrolled joint memorial No. 5, House of Representatives, State of Wyoming, has been carefully compared with the original, filed in this office on the 21st day of February, A. D. 1913, and is a full, true, and correct copy of the same and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 22d day of February, A. D. 1913.

[SEAL.]

FRANK L. HOUX,
Secretary of State,
By F. H. WESCOTT,
Deputy.

Original house joint memorial 7. Twelfth Legislature of the State of Wyoming.

Enrolled joint memorial 5, House of Representatives, State of Wyoming.

House joint memorial to the Congress of the United States.

Be it resolved by the House of Representatives of the State Legislature of the State of Wyoming (the Senate concurring), That—

Whereas when the original thirteen States of the Union established their independence of the British Government and established the Government of the United States each State became the owner of the vacant and unappropriated lands within its borders; and

Whereas when new States were formed out of the territory of such original States and admitted into the Union such new States became entitled to the vacant and unappropriated lands within their borders; and

Whereas the ownership of the United States lands within the limits of the original States of the Union is based upon cessions made to the Government of the United States by those respective States; and

Whereas subsequently, when foreign governments at divers times ceded territory to the Government of the United States, the vacant and unappropriated lands within such ceded territory passed to the Government of the United States; and

Whereas when new States were formed out of such ceded territory those States were denied title to the vacant and unappropriated lands within their borders, we believe that an unwise, unjust, and detrimental public-land policy was established by the Federal Government, and one which has uniformly and powerfully operated to the retarding of the general welfare of the citizenship and prevention of the development of the resources of every character within the borders of those new States, which have struggled under the blighting influence and effect of that selfish, short-sighted, and ruinous public-land policy:

Therefore we, the Senate and House of Representatives of the State of Wyoming, hereby memorialize the Congress of the United States to enact such legislation as will cause the cessions by the Government of the United States to the States comprising said Government of all vacant and unappropriated lands title to which is held by the Federal Government to the States respectively within whose borders they lie.

The paramount reasons for this memorial must be transparent to the Congress of the United States if acceptance is given to the primary purpose of the creation.

The Federal Government, so far as internal affairs are concerned, viz, the promotion of the general welfare and the establishment of justice throughout the Nation; the economic reasons and public policies which should operate upon the Congress of the United States in doing justice to and promoting the general welfare and accelerating the industrial development of the so-called arid-land States of the Union, within whose borders the vastly larger part of the vacant and unappropriated lands title to which are held by the United States Government lie, are so patent and powerful and numerous that they need not be recapitulated in this memorial.

We believe that the prayer of this joint memorial will be voiced by all the States affected by the present public-land policy of the United States Government.

BIRNEY H. SAGE,
President of the Senate.
MARTIN L. PRATT,
Speaker of the House.

Approved February 21, 1913, at 12 m.

JOSEPH M. CAREY, *Governor.*

Mr. CLARK of Wyoming. I present a joint memorial of the Legislature of the State of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

[SEAL.]

FRANK L. HOUX,
Secretary of State,
By F. H. WESCOTT,
Deputy.

Original house joint memorial 8. Twelfth Legislature of the State of Wyoming.

Enrolled joint memorial 6, House of Representatives, State of Wyoming.

Memorial to the Senate and House of Representatives of the United States requesting Congress to set aside certain lands for grazing purposes for the aid, protection, and relief of homesteaders and residents of the Old Fort Bridger Military Reservation, and those adjacent thereto.

Be it resolved by the House of Representatives of the State of Wyoming (the senate concurring), That the Congress of the United States be memorialized as follows:

Whereas it appears that the unoccupied portion of the hereinafter-described territory in the county of Uinta, in the State of Wyoming, is best adapted for range and grazing purposes and stock raising; and

Whereas it appears that the rights of the homesteaders and residents of the aforesaid section have been infringed and intruded upon by nomadic bands and flocks of stock and other stock driven thereon by nonresidents of this section; and

Whereas the homesteaders and residents have been made to suffer and the principal industry of the aforesaid people has been greatly affected and retarded thereby; and

Whereas it appears necessary that some protection be given these people in the way of classification of range for sheep and cattle against such nomadic bands and flocks and the encroachment and imposition of those living at a distance from this section, and in other States, that life and property may be preserved and the agricultural and stock industries may be encouraged and improved;

Whereas it is necessary for the said farmers and ranchmen to feed the greater part of their produce to stock on account of the long distance from markets and railroads, and inasmuch as the said ranches and farms are small and no forest reserve accessible, whereby protection on the range can be secured: Therefore be it

Resolved by the house of representatives (the senate concurring), That we do hereby memorialize Congress that the following-described territory not now occupied or which may not hereafter become occupied under the general land laws of the United States, be set aside or leased by the Government to the aforesaid homesteaders and ranchmen of this section, for the exclusive use of the residents therein or adjacent thereto: Beginning at the northeast corner of the original Fort Bridger Military Reservation; thence westerly along the north line of the said Fort Bridger Military Reserve to the northwest corner of said reserve; thence southerly along the line of the said reserve to the southwest corner of said reserve; thence easterly along the south line of the said original reserve to its intersection with the east line of range 116 west of the sixth principal meridian; thence south on the range line between ranges 116 and 115 west of the sixth principal meridian to its intersection with the south line of the State of Wyoming; thence east along the south boundary of the State of Wyoming to its intersection with the east line of Uinta County; thence north along the east line of Uinta County to its intersection with the north line of township 14 north; thence west along the north line of township 14 north to its intersection with the east line of aforesaid original Fort Bridger Military Reserve; thence northerly along the east line of the said reserve to the northeast corner of the said reserve to place of beginning.

Resolved, That certified copies of this memorial be sent to the Senators and Representatives in Congress from the State of Wyoming.

BIRNEY H. SAGE,
President of the Senate.
MARTIN L. PRATT,
Speaker of the House.

Approved, February 21, 1913, at 12 m.

JOSEPH M. CAREY, *Governor.*

Mr. CLARK of Wyoming. I present a joint memorial of the Legislature of the State of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

By F. H. WESTCOTT,
Deputy.

Original senate joint memorial 4. Twelfth Legislature of the State of Wyoming.

Enrolled joint memorial 3, Senate, State of Wyoming.

Memorial to the Senate and House of Representatives of the United States of America in Congress assembled, regarding damage done Cody municipal water supply by the construction of certain public works.

Be it resolved by the Senate of the State of Wyoming (the House of Representatives concurring), That—

Whereas on evidence duly presented to the Legislature of the State of Wyoming it appears to this body that the Reclamation Service of the Department of the Interior has, in its operations under the Shoshone project in this State, by the construction of the Cody dam in the Shoshone River above the town of Cody, destroyed the efficiency of the supply of water of the said town of Cody, county of Park, State of Wyoming, by polluting the source of supply of the said town, rendering the water so inefficient in quantity and impure in quality as to be detrimental to the health of the citizens of the said town of Cody and in such condition as to be unfit for any domestic use: Therefore be it

Resolved, That the Congress of the United States be memorialized to direct the Secretary of the Interior to investigate the conditions of the

water supply of the town of Cody and to take such measures as will place the water supply of the town of Cody in as good condition as it was before the construction of the Cody dam by taking said supply around said works. Be it further

Resolved, That a copy of this memorial be sent to the Hon. FRANCIS E. WARREN, the Hon. CLARENCE D. CLARK, and the Hon. FRANK W. MONDELL, Representatives in Congress from the State of Wyoming.

REPORTS OF COMMITTEES.

Mr. MARTIN of Virginia, from the Committee on Commerce, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

S. 8565. A bill to authorize the Virginia & Carolina Southern Railroad Co. to construct a bridge across the Lumber River at or near the town of Lumberton, N. C. (Rept. No. 1311); and

S. 8443. A bill to authorize the St. Louis-Kansas City Electric Railway Co. to construct a bridge across the Missouri River at or near the town of Weldon Springs Landing, Mo. (Rept. No. 1312).

He also, from the same committee, to which was referred the bill (S. 8310) to authorize the construction of a bridge across the Pend Oreille River opposite the town of Newport, Wash., reported it with amendments and submitted a report (No. 1313) thereon.

Mr. WILLIAMS, from the Committee on Military Affairs, to which was referred the bill (S. 7158) to remove the charge of desertion from the military record of Porter Loumis, submitted an adverse report (No. 1314) thereon, which was agreed to, and the bill was postponed indefinitely.

Mr. CLAPP, from the Committee on Privileges and Elections, reported an amendment proposing to pay G. B. Spaulding $500, F. A. Johnson $500, and J. A. Preston $370 for services rendered to the Committee on Privileges and Elections making investigation of the amount of money paid to national and congressional campaign committees of all political parties, etc., intended to be proposed to the general deficiency appropriation bill, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

Mr. BRANDEGEE, from the Committee on the Judiciary, to which was referred the bill (S. 2890) for the establishment of a probation system in the United States courts, except in the District of Columbia, reported it with an amendment and submitted a report (No. 1316) thereon.

He also, from the same committee, to which was referred the bill (H. R. 25780) to amend section 3186 of the Revised Statutes of the United States, reported it with amendments and submitted a report (No. 1315) thereon.

Mr. DIXON, from the Committee on Military Affairs, to which was referred the bill (S. 7854) for the relief of John H. Fesenmeyer, alias John Wills, reported it without amendment and submitted a report (No. 1318) thereon.

PENSION APPROPRIATION BILL.

Mr. McCUMBER. From the Committee on Pensions I report back favorably with an amendment the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, and I submit a report (No. 1310) thereon. I ask for the present consideration of the bill.

Mr. BRISTOW. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Kansas suggests the absence of a quorum. The roll will be called.

The Secretary called the roll and the following Senators answered to their names:

Ashurst	Crawford	Kenyon	Pittman
Borah	Cullom	Lea	Sheppard
Bradley	Curtis	McCumber	Smith, Ga.
Brady	Dillingham	Martin, Va.	Smith, Mich.
Bristow	Fletcher	Martine, N. J.	Smoot
Brown	Foster	Myers	Stone
Bryan	Gallinger	Nelson	Swanson
Burnham	Gamble	Newlands	Thornton
Burton	Gardner	Oliver	Watson
Catron	Johnston, Ala.	Page	Wetmore
Chamberlain	Jones	Percy	
Clapp	Kavanaugh	Perkins	

Mr. JONES. I wish to state that the Senator from Michigan [Mr. TOWNSEND] is detained from the Chamber by a committee meeting.

The PRESIDENT pro tempore. Forty-six Senators have answered to their names—not a quorum. The roll of the absentees will be called.

The Secretary proceeded to call the names of absent Senators, when Mr. BANKHEAD, Mr. SMITH of South Carolina, Mr. WILLIAMS, Mr. CLARK of Wyoming, Mr. SUTHERLAND, Mr. FALL, Mr. TILLMAN, Mr. HITCHCOCK, Mr. LODGE, and Mr. CUMMINS entered the Chamber and answered to their names.

The PRESIDENT pro tempore. Fifty-six Senators have answered to their names. A quorum of the Senate is present. The Senator from North Dakota reports from the Committee on Pensions a bill, for which he asks present consideration. The bill will be read for the information of the Senate.

The Secretary read the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, as follows:

Be it enacted, etc., That the following sums be, and the same are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the payment of pensions for the fiscal year ending June 30, 1914, and for other purposes, namely:

For Army and Navy pensions, as follows: For invalids, widows, minor children, and dependent relatives, Army nurses, and all other pensioners who are now borne on the rolls, or who may hereafter be placed thereon, under the provisions of any and all acts of Congress, $180,000,000: *Provided*, That the appropriation aforesaid for Navy pensions shall be paid from the income of the Navy pension fund, so far as the same shall be sufficient for that purpose: *Provided further*, That the amount expended under each of the above items shall be accounted for separately.

For fees and expenses of examining surgons, pensions, for services rendered within the fiscal year 1914, $300,000.

That $12,000, or so much thereof as may be necessary, out of the appropriation for clerk hire and other services contained in the act making appropriations for invalid and other pensions for the fiscal year ending June 30, 1913, is made available for postage on foreign mail, purchase and repair of furniture, filing cabinets, adding machines, addressing machines, typewriters, check signing machines, and other labor-saving devices for the use of the disbursing office, Bureau of Pensions.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill? The Chair hears none, and it is before the Senate as in Committee of the Whole.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment of the Committee on Pensions was to add at the end of the bill the following:

The unexpended balance of $8,182.55, or so much thereof as may be necessary, of the appropriation for clerk hire and other services, pension agencies, made in the act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1912, and for other purposes, is hereby reappropriated and made available for the payment of traveling and other expenses incident to the transfer of clerks of the various pension agencies to Washington, D. C.

The PRESIDENT pro tempore. Without objection——

Mr. BRYAN. Mr. President, I have no objection to the bill without the amendment. If the chairman of the committee will allow it to be passed in that shape, I shall urge no objection. If he insists upon the amendment, I do object.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. BRYAN. I object to the present consideration of the bill, if the Senator from North Dakota insists upon that amendment.

The PRESIDENT pro tempore. Unanimous consent has already been given for the consideration of the bill.

Mr. BRYAN. I was standing on the floor to object unless the chairman of the committee would limit it simply to the bill as it passed the House, without the amendment, which is designed to pay the traveling expenses of men to come to Washington to get a position. I have no disposition to object to the appropriation bill itself.

Mr. McCUMBER. Mr. President, let me explain to the Senator from Florida that we appropriated last year for certain clerk hire. There is a balance of something like $8,000 of that appropriation that will be left over because not used.

We also abolished the agencies. In abolishing the agencies it was necessary to bring some of the clerks to Washington. They are Government clerks. It has always been customary in transferring a clerk from another section of the country to one of the departments here that the traveling expenses of the person transferred be paid by the Government, because the Government sends the clerk from one place to another. They are clerks under the civil service, and, no appropriation having been made, the department has recommended that the $8,000 be used, which will be sufficient, and more than sufficient, for that purpose. The amendment was put in for the purpose of making that transfer.

Mr. BRYAN. I desire to ask the chairman of the committee if it is not true that this amendment was put on by the committee? In other words, is it not a fact that the provision did not come from the House and we are proposing to amend the bill as it passed the House?

Mr. McCUMBER. Yes; I incorrectly stated that it had been put on by the House.

Mr. BRYAN. And it is to provide for the pay of clerks to come to Washington to get a position.

Mr. McCUMBER. No; the Senator is mistaken.

Mr. BRYAN. They have been legislated out of the service at these agencies.

I will say to the Senator I will not object to the passage of the appropriation bill, but I do object to tacking on that bill an appropriation to pay the expenses of men to come here to get positions. It is not material to me whether it is customary or not.

Mr. McCUMBER. Mr. President, the case is not that of persons coming here to obtain positions, but they are clerks already in the department who have been holding their clerkships for years. They were transferred, pursuant to a law which we passed last year, from the various pension agencies to the city of Washington, upon the abolition of the pension agencies. It is always customary for the Government to pay all the expenses of traveling for clerks in being transferred, just the same as though the department would send a clerk from the General Land Office to a local land office in a State. In such cases the traveling expenses are paid by the Government. The amount appropriated is only about $8,000, and I presume that less than half of that amount will be necessary.

Mr. STONE. Mr. President, I should like to make a brief observation in this connection. I dislike always very much to differ with my friend from Florida [Mr. BRYAN], and I rarely do, but I think the position taken by the Senator from North Dakota [Mr. McCUMBER] is more nearly correct as a matter of absolute right. Let me give an illustration to my friend from Florida. Recently the Treasury Department here issued an order transferring a certain number of clerks who had been employed in the different subtreasuries in distribution work, which is, of course, in a large sense the most important work done by the subtreasuries. It was thought best to concentrate that work at the Treasury Department here. I happen to know that at the subtreasury of St. Louis—and I desire the attention of my friend from Florida on this, because he is a fair man, and I am sure he has not any mere pride of opinion about a thing where absolute justice is involved; I am asking his attention to a statement of fact—I know that in the city of St. Louis at the subtreasury and at some other subtreasuries, a number of clerks, some four or five, from the St. Louis subtreasury were ordered to report at Washington to take up here, in the Treasury Building or the department itself, the line of work they were doing there, that work having been withdrawn from the subtreasuries and concentrated here at Washington. These clerks are drawing salaries of from $1,000 to $1,400 per annum. I happen to know two of them, who have recently conferred with me respecting this matter, when I was in St. Louis. One has a family, a wife, I think, and three or four children; the other a family of a wife and a less number of children. To transfer those workmen, receiving this low rate of compensation, from twelve to fourteen hundred dollars per annum, to Washington, and incurring necessarily the expense of transporting their families and all expenses incident to breaking up and removing their families, and not to pay the bare traveling expenses of the clerk himself, to relieve his embarrassment to that extent, it seems to me would be to work an injustice on those men. I think those expenses ought to be paid.

Mr. LODGE. Mr. President, on that point——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Massachusetts?

Mr. BRYAN. Certainly.

Mr. LODGE. The pension agencies have been abandoned in the various cities. There was one in the city of Boston, which has been abandoned, as have others in various cities of the country. These clerks are not coming here seeking positions; they had their positions, and had them under the civil service. Many of them have been in those agencies for years. They are now compelled by the Government to give up their homes, their establishments, wherever they may happen to be—in Concord, or Boston, or Chicago—and they are ordered here. It is through no fault of theirs, and, as I have said, they are not coming here to get the benefit of positions; they are obliged to come here by the Government; and it seems to me a very small thing for these men who, as the Senator from Missouri [Mr. STONE] has stated, have in many cases families to support, who have been receiving low pay, and are now compelled to break up their homes and come here, making all the changes and incurring all the expenses incident to such removal, not to be allowed their traveling expenses when they are coming here on Government business. It seems to me it is a very small matter.

Mr. BRYAN. I asked the Senator from Massachusetts the question, because I have not understood that all these people are under the civil service.

Mr. LODGE. They all are under the civil service in the Boston office. I know that.

Mr. BRYAN. I do not think they are.

Mr. CURTIS. Mr. President——

Mr. BRYAN. Just one moment. I understand that these men were employed at the agencies. There were men here to take those places in the department, but those 18 agencies having been abolished, it was decided to allow preference here at the bureau to the civil-service employees in the agencies. If they are in the civil service and would remain in the civil service, regardless of the repeal of the law allowing the existence of these useless pension agencies, I would not object; but, as I understand, they are in the same condition as a man who starts out to seek Government employment, and certainly——

Mr. LODGE. Not at all.

Mr. BRYAN. Certainly they do not ask to have their way paid to Washington. They are very glad to come here; they find the way easy, and not very distant.

Mr. LODGE. Mr. President, those clerks have been under the civil service for years, and I do not think——

Mr. BRYAN. If the Senator from Massachusetts will say all of them are under the civil service——

Mr. LODGE. Every one is, so far as I know.

Mr. BRYAN. Or will limit the amendment to those in the civil service——

Mr. LODGE. They were covered into the civil service years ago. There is not a place in that office, unless it may be that of a laborer, which is not under the civil service now—not one. They could not be brought here and placed in the Pension Office, unless they were in the civil service.

Mr. STONE. I will say to my friend that I know that, so far as the people in the subtreasuries are concerned——

Mr. LODGE. They were covered into the civil service years ago. There is not a place in that office, unless it may be that of a laborer, which is not under the civil service. As I have said, they could not be brought here and assigned to duty unless they were.

Mr. STONE. I will say to my friend that I know that, so far as the employees in the subtreasuries are concerned, they are not involved here.

Mr. LODGE. We are not discussing the subtreasury employees.

Mr. STONE. But they are, I know, under the civil service.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Kansas?

Mr. BRYAN. Yes, sir.

Mr. CURTIS. I want to say to the Senator from Florida that all of these employees are under the civil service. I know that fact, because 32 of them come from the city of Topeka, and I had occasion to investigate the subject. More than that, they draw a salary on an average of only $900 a year, while the clerks in the department in this city draw a salary of $1,200 a year. Money is saved by bringing those clerks here.

Mr. BRYAN. I am glad to hear the Senator say that, because he argued a year ago that money would be saved by allowing these 17 agencies to be continued.

Mr. CURTIS. I said so because those men were drawing $900 on an average, where they were employed as clerks, whilst the clerks here were drawing salaries on an average of $1,200 a year. So I still maintain that money would have been saved if the various agencies had been permitted to continue in existence.

Mr. BRYAN. So it has developed that by the abolishment of these agencies there has been an increase of salary of about $300 a year in each case, and in addition to that we pay the traveling expenses of the clerks transferred to Washington.

But, Mr. President, I can not resist the appeal from so many friends, and I realize that the Senate will pass this bill in any event whenever it gets to a vote on it. While I am not opposed to the bill, I think we have made increases in the appropriations by independent acts, and it is the duty of Congress to make the appropriations. I had hoped that the bill would be limited simply to appropriations for the payment of pensions, and that amendments designed to increase salaries and to pay expenses of men to come to Washington to get a job would not be placed upon the bill. In view, however, of the appeals that have been made to me, I withdraw the objection.

The PRESIDENT pro tempore. The question is on the amendment——

Mr. SMITH of Georgia. Mr. President, I desire to ask the chairman of the committee if he will not explain to us just how much this bill carries and what it is for before it is disposed of. It is very difficult to grasp it by simply listening to the reading of the bill, and if the Senator from North Dakota will explain it before we vote upon it some of us would feel under obligation to him, I am sure.

Mr. McCUMBER. The bill is very simple. The appropriation carried by it is $180,000,000, to cover all pensions of every character. The appropriation of a year ago was, as the Senator will remember, about $164,000,000. The last estimate of the department we had for this year was about $185,000,000; but after they had made their estimate the Government provided for 300 additional clerks, to hurry the settlement of claims under the act of May 11, 1912. The result of that was that the cases have been adjudicated very much more rapidly, which has made a considerable additional amount necessary for this year. It made, I would say, really about $15,000,000 more for the year ending June 30, 1913; but that $15,000,000 is carried in the deficiency bill. So this bill calls for $5,000,000 less than the estimate made by the department.

Again, it is proper to state that the estimate of the department was based upon the assumption that 71.6 per cent of the soldiers who would be entitled to the benefits of the act of May 11, 1912, had served one year or over, while the tabulations so far, on the settlement of over 250,000 cases, bring that 71.6 per cent up to something over 74 per cent as the number who served more than one year. That will increase to a small extent the estimate of the department; but the main increase above the estimate for the two years is due to the fact that we have expedited the consideration of the claims under the act of May 11, 1912, furnishing the 300 extra clerks for that purpose, so that a great many more claims were acted on during the year 1913 than it was expected would be considered.

Mr. LODGE. The bill carries $180,000,000?

Mr. McCUMBER. $180,000,000.

Mr. BRYAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Florida?

Mr. McCUMBER. Certainly.

Mr. BRYAN. Of course, the Senator understands that if the Crago bill should be enacted it would increase the appropriation for 1914 more than $7,000,000 over the $180,000,000 carried by this bill?

Mr. McCUMBER. That would be true if that bill should be passed.

Mr. SMITH of Georgia. Mr. President, I should like to ask the Senator whether the $15,000,000 that are to be carried in an additional bill will be added to the $180,000,000, making the appropriation $195,000,000?

Mr. McCUMBER. No; the $15,000,000 to be carried in the deficiency bill is for the year ending June 30, 1913, while the $180,000,000 appropriation is for the year ending June 30, 1914. There is, I think, a deficiency of about $13,000,000.

Mr. SMITH of Georgia. It will, therefore, make the average about $180,000,000?

Mr. McCUMBER. Well, it is $180,000,000 for the year ending June 30, 1914. We will have to add $15,000,000 to the $164,000,000 appropriated for the current fiscal year, which will make about $175,000,000 for the year ending June 30, 1913.

Mr. SMITH of Georgia. One hundred and seventy-nine million dollars.

Mr. BRYAN. Add $15,000,000 to $164,500,000, and it makes $179,500,000.

Mr. McCUMBER. Yes.

Mr. SMITH of Georgia. Then, Mr. President, will the Senator give the Senate about what is the increase of the pension-roll payment as the result of the legislation passed at the last session? That was the exact fact I was anxious to bring out.

Mr. McCUMBER. From $152,500,000 to about $180,000,000.

Mr. SMITH of Georgia. About $27,500,000, then, was the increase?

Mr. McCUMBER. Yes.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PRINTING OF TARIFF HEARINGS.

Mr. SMOOT. From the Committee on Printing I report back favorably, with an amendment, House concurrent resolution 71, providing for printing 2,500 copies of the tariff hearings before the Committee on Ways and Means of the House of Representatives since the 6th day of January last, and I ask for its immediate consideration.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution.

The amendment was, in line 2, after the word "bound," to insert the words "in buckram," so as to make the concurrent resolution read:

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound in buckram 2,500 copies of tariff hearings before the Committee on Ways and Means of the House of Representatives since the 6th day of January last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

The amendment was agreed to.

The concurrent resolution as amended was agreed to.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MARTINE of New Jersey:

A bill (S. 8578) providing that certain professors at the United States Naval Academy shall be commissioned as professors of mathematics with the rank of lieutenant commander (with accompanying papers); to the Committee on Naval Affairs.

By Mr. SMITH of Michigan:

A bill (S. 8579) granting a pension to Margaret A. Wiles; and

A bill (S. 8580) granting a pension to Mary A. Solter (with accompanying paper); to the Committee on Pensions.

By Mr. BURTON:

A joint resolution (S. J. Res. 163) amending and extending the operation of the act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes; to the Committee on Foreign Relations.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. STONE submitted an amendment proposing to appropriate $47,550 for one additional mail lift and one combination freight and passenger elevator, and for additions to mail apparatus and other improvements at the new city post office at St. Louis, Mo., intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. JACKSON submitted an amendment authorizing the President to appoint Worthington Goldsborough upon the retired list of the Navy, with the grade of rear admiral of the lower number, from October 9, 1899, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

Mr. BANKHEAD submitted an amendment proposing to appropriate $3,653.05 to pay Rittenhouse Moore, being the amount stated and claimed by him for overwidth dredging in the Potomac River below Washington, D. C., intended to be proposed by him to the sundry civil appropriation bill, which, with the accompanying paper, was referred to the Committee on Appropriations.

Mr. WATSON submitted an amendment proposing to appropriate $50,000 for a United States post-office building at Keyser, W. Va., intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. CLAPP submitted an amendment authorizing the Auditor for the Navy Department to credit to the account of Pay Director John N. Speel, United States Navy, $263.54, on account of an advance made by him to Paymaster's Clerk Edward V. Lee, United States Navy, etc., intended to be proposed by him to the naval appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Naval Affairs.

Mr. SHEPPARD submitted an amendment proposing to appropriate $6,850 for expenses of delegates to be designated by the President to the Fourteenth International Congress on Alcoholism at Milan, Italy, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Education and Labor and ordered to be printed.

Mr. GALLINGER submitted an amendment proposing to increase the number of topographic and hydrographic draftsmen at $2,400 each in the Coast and Geodetic Survey from two to three, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

CHICKASAW AND CHOCTAW INDIAN CLAIMS.

Mr. GORE submitted the following resolution (S. Res. 476), which was read, considered by unanimous consent, and agreed to:

Resolved, That the President be requested, if not incompatible with the public interest, to cause to be transmitted to the Senate copies of all letters, telegrams, reports, opinions, and other documents on file in either the Department of the Interior or the Department of Justice

in relation to any contract or claims for fees or compensation on the part of the firm of Mansfield, McMurray & Cornish, or any member thereof, against the Chickasaw and Choctaw Tribes of Indians, which claims are alleged to be due and unpaid and are now pending before the President or any department of the Government; and,

Second. To transmit like copies of all such letters, telegrams, reports, opinions, and other documents in relation to any claim on the part of the Chickasaw and Choctaw Tribes of Indians against the firm of Mansfield, McMurray & Cornish, or any member thereof.

Resolved further, That the President be requested to withhold action on any and all said claims until further action by the Congress or by the courts.

PROPOSED FINANCIAL INVESTIGATION.

Mr. PENROSE submitted the following resolution (S. Res. 477), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Finance be, and they are hereby, authorized and directed, by subcommittee or otherwise, to make investigations into internal revenue, customs, currency, and coinage matters, and to compile and prepare statistics and documents relating thereto as directed from time to time by the Senate and as may be necessary, and to report from time to time to the Senate the result thereof; and for this purpose they are authorized to sit, by subcommittee or otherwise, during the recess or sessions of the Senate during the Sixty-third Congress at such times and places as they may deem advisable, to send for persons and papers, to administer oaths, and to employ such stenographic, clerical, and other assistance as may be necessary, the expense of such investigation to be paid from the contingent fund of the Senate; and the committee is authorized to order such printing and binding as may be necessary for its use.

EXPENSE OF DISTRIBUTION OF SEEDS.

Mr. SMOOT. Mr. President, on February 19 the President of the Senate handed down a letter from the Secretary of Agriculture transmitting, in response to a resolution of the 18th instant, a statement showing the estimated cost of the purchase and distribution of seeds and plants for congressional distribution for the four years from 1909 to 1913, inclusive, and it was ordered printed. The Secretary of Agriculture inclosed a copy of a recent publication and made it a part of his report. While that publication is already in print, and has a great many illustrations, I have spoken to the Senator from Iowa [Mr. KENYON] in relation to it, and he does not feel that it is necessary to publish it. I therefore ask that it be eliminated from the report of the Secretary which was ordered printed.

Mr. KENYON. I do not care about the publication at all. The figures sent by the Secretary of Agriculture are what I should like to have printed.

Mr. SMOOT. Yes; we will print them, with the exception of the bulletin from the Agriculture Department.

The PRESIDENT pro tempore. Without objection, it is so ordered.

POST OFFICE AT BRISTOL, VA.

Mr. SMOOT. Mr. President, there has been presented to the Senate a letter from the Postmaster General transmitting, in response to a resolution of the 19th instant, information relative to the establishment of the post office at Bristol, Va., and in the transmission of that letter the Postmaster General submitted a map. I ask that an order be made that the map be printed in connection with the letter of transmittal.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

On February 25, 1913:

S. 4681. An act to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes;

S. 8089. An act permitting the building of a railroad bridge across the Yellowstone River, from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north, of range 104 west, of the fifth principal meridian, in McKenzie County, N. Dak.;

S. 8090. An act permitting the building of a railroad bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak. to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west, of the fifth principal meridian; and

S. 1589. An act to authorize the exchange of conveyances between the Florida East Coast Railway Co. and the United States.

REFERENCE OF TREATIES.

Mr. CULLOM. I desire to make a motion as in executive session for the reference of a treaty that has been sent to the Senate. I ask that it be referred to the Committee on Foreign Relations and printed in confidence.

The PRESIDENT pro tempore. Without objection, that order will be made.

Mr. LODGE. I ask, as in executive session, that the treaty which has just come in with a message from the President may be referred to the Committee on Foreign Relations.

The PRESIDENT pro tempore. Without objection, the treaty will be so referred.

COL. WILLIAM C. GORGAS AND OTHERS.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives disagreeing to the amendment of the Senate to the joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. DU PONT. I move that the Senate insist upon its amendment, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. DU PONT, Mr. DIXON, and Mr. JOHNSTON of Alabama conferees on the part of the Senate.

MISSISSIPPI RIVER BRIDGE AT KEOKUK, IOWA.

Mr. CULLOM. I ask unanimous consent for the present consideration of Order of Business 1020, Senate bill 8182, granting to the Inter City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River.

The PRESIDENT pro tempore. The Senator from Illinois asks unanimous consent for the present consideration of a bill which will be read for the information of the Senate.

The Secretary read the bill.

Mr. CULLOM. I offer an amendment which the Senator from Iowa [Mr. CUMMINS] presented, and which I accept.

Mr. BURTON. I should like to inquire what that is.

Mr. CULLOM. It is a bridge bill.

Mr. BURTON. Is it of a general nature, or does it pertain to one bridge only?

Mr. CULLOM. It pertains to one bridge only.

Mr. BURTON. What is the locality of it?

Mr. CULLOM. The locality of it is the locality of the dam on the Mississippi River. If the Senator will permit the amendment to be read, he will know what it is.

Mr. CUMMINS. I have an amendment which I desire to propose to the bill when it is before the Senate.

Mr. CULLOM. I offered the amendment which was presented by the Senator from Iowa.

The PRESIDENT pro tempore. The Senator from Illinois offers an amendment to the bill, which will be stated.

The SECRETARY. At the end of section 1, it is proposed to insert the following:

Provided, That this act shall not become effective until there is filed with the Secretary of War an agreement between the Inter-City Bridge Co. and the Mississippi River Power Co. showing the consent of the latter for use of the dam for bridge purposes, the terms upon which such use is permitted, and relieving the United States from all responsibility on account of such use: *And provided further*, That this act shall not be construed to change in any respect the control of the United States over said dam and its right to regulate the operation thereof, and the charges for power generated thereby.

Mr. SMITH of Georgia. Mr. President, before unanimous consent is given, I should like to hear the bill read.

The PRESIDENT pro tempore. The bill will be again read.

The Secretary again read the bill.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The PRESIDENT pro tempore. The question is upon the amendment submitted by the Senator from Illinois.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DEPARTMENT OF LABOR.

Mr. BORAH. Mr. President, it seems that possibly there has been an error in the print on the face of the calendar with reference to the unanimous-consent agreement in regard to the bill providing for a department of labor. I call attention to it at

this time in order that we may not have a misunderstanding about it during the day.

The calendar says:

It is agreed by unanimous consent that on Tuesday, February 25, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (H. R. 22913) to create a department of labor, and that at not later than 3 o'clock p. m. on that day the Senate will proceed, without further debate, to vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill—through the regular parliamentary stages—to its final disposition; such consideration, however, not to interfere with the consideration of appropriation bills or conference reports.

I think, so far as fixing the hour is concerned, that is an error.

The PRESIDENT pro tempore. The Chair is informed that that is an error, and it will be stricken from the agreement.

Mr. BORAH. It should be changed to read "during the calendar day."

Mr. WARREN. The Senator will be willing to have it come up later in the day?

Mr. BORAH. Certainly. I call attention to the matter at this time, so as not to lose my right to go on with it after 3 o'clock.

Mr. GRONNA. Was it not also the agreement that the bill should not displace appropriation bills?

Mr. BORAH. It was.

INDIAN APPROPRIATION BILL.

Mr. GAMBLE. Mr. President, I move that the Senate proceed to the consideration of Order of Business 1071, House bill 26874, making appropriations for the current and contingent expenses of the Bureau of Indian Affairs for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GAMBLE. I ask unanimous consent that the formal reading of the bill be dispensed with; that it be read for amendments; and that the committee amendments be first considered.

The PRESIDENT pro tempore. The Senator from South Dakota moves that the formal reading of the bill be dispensed with; that it be read for amendments; and that the committee amendments be first considered.

The motion was agreed to.

INTERLOCUTORY INJUNCTIONS.

Mr. CRAWFORD. Mr. President, I do not wish to interfere with the consideration of this appropriation bill, but I had hoped that I might get unanimous consent to consider a bill that I do not think will provoke any discussion, and concerning which the legislature of my State has memorialized Congress.

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to his colleague?

Mr. GAMBLE. I will yield, but only for this bill, and on condition that it will not provoke any discussion, in which event I should have to object.

Mr. CRAWFORD. Certainly; I will not insist on its consideration if it provokes discussion. It is Order of Business No. 1160, Senate bill 8439, the bill reported by the Senator from New York [Mr. ROOT] restraining the issuance of interlocutory injunctions.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill (S. 8439) restricting the issuance of interlocutory injunctions to suspend the enforcement of the statute of a State or an order made by an administrative board or commission created by and acting under the statute of a State.

The bill had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert:

That section 266 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, is hereby amended by inserting in line 4, after the words "in the enforcement or execution of such statute," the words "or in the enforcement or execution of an order made by an administrative board or commission acting under and pursuant to the statutes of such State."

At the end of section 266, as so amended, add the following:

"It is further provided that if before the final hearing of such application a suit shall have been brought in a court of the State having jurisdiction thereof under the laws of such State to enforce such statute or order, accompanied by a stay in such State court, of proceedings under such statute or order pending the determination of such suit by such State court, all proceedings in any court of the United States to restrain the execution of such statute or order shall be stayed pending the final determination of such suit in the courts of the State. Such stay may be vacated upon proof made after hearing and notice of 10 days served upon the attorney general of the State that the suit in the State courts is not being prosecuted with diligence and good faith."

So that section 266 as amended shall read as follows:

"SEC. 266. No interlocutory injunction suspending or restraining the enforcement, operation, or execution of any statute of a State by restraining the action of any officer of such State in the enforcement or execution of such statute, or in the enforcement or execution of an order made by an administrative board or commission acting under and pursuant to the statutes of such State, shall be issued or granted by any justice of the Supreme Court, or by any district court of the United States, or by any judge thereof, or by any circuit judge acting as district judge, upon the ground of the unconstitutionality of such statute, unless the application for the same shall be presented to a justice of the Supreme Court of the United States, or to a circuit or district judge, and shall be heard and determined by three judges, of whom at least one shall be a justice of the Supreme Court or a circuit judge, and the other two may be either circuit or district judges, and unless a majority of said three judges shall concur in granting such application. Whenever such application as aforesaid is presented to a justice of the Supreme Court, or to a judge, he shall immediately call to his assistance to hear and determine the application two other judges: *Provided, however*, That one of such three judges shall be a justice of the Supreme Court, or a circuit judge. Said application shall not be heard or determined before at least five days' notice of the hearing has been given to the governor and to the attorney general of the State, and to such other persons as may be defendants in the suit: *Provided*, That if of opinion that irreparable loss or damage would result to the complainant unless a temporary restraining order is granted, any justice of the Supreme Court, or any circuit or district judge, may grant such temporary restraining order at any time before such hearing and determination of the application for an interlocutory injunction, but such temporary restraining order shall remain in force only until the hearing and determination of the application for an interlocutory injunction upon notice as aforesaid. The hearing upon such application for an interlocutory injunction shall be given precedence and shall be in every way expedited and be assigned for a hearing at the earliest practicable day after the expiration of the notice hereinbefore provided for. An appeal may be taken direct to the Supreme Court of the United States from the order granting or denying, after notice and hearing, an interlocutory injunction in such case. It is further provided that if before the final hearing of such application a suit shall have been brought in a court of the State having jurisdiction thereof under the laws of such State, to enforce such statute or order, accompanied by a stay in such State court of proceedings under such statute or order pending the determination of such suit by such State court, all proceedings in any court of the United States to restrain the execution of such statute or order shall be stayed pending the final determination of such suit in the courts of the State. Such stay may be vacated upon proof made after hearing and notice of 10 days served upon the attorney general of the State that the suit in the State courts is not being prosecuted with diligence and good faith."

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill? The Chair hears none.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The PRESIDENT pro tempore. The question is upon the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from Mississippi?

Mr. GAMBLE. For what purpose?

Mr. WILLIAMS. I wish to ask unanimous consent for the consideration of House bill——

Mr. GAMBLE. Ordinarily, I should be very glad to yield; but I gave notice that I could yield only for the one matter presented by my colleague. We must proceed with the bill.

The PRESIDENT pro tempore. The reading of the bill will be proceeded with.

Mr. POMERENE. Will the Senator object to taking up a bill about which I think there will be no contest or debate?

Mr. GAMBLE. I can not, Mr. President.

The PRESIDENT pro tempore. The reading will be proceeded with.

INDIAN APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 26874) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914, which had been reported from the Committee on Indian Affairs with amendments.

The first amendment of the Committee on Indian Affairs was, on page 2, line 13, after the word "law," to strike out "$200,000" and insert "$250,000," so as to make the clause read:

For the survey, resurvey, classification, appraisement, and allotment of lands in severalty under the provisions of the act of February 8, 1887, entitled "An act to provide for the allotment of lands in severalty to Indians," and under any other act or acts providing for the survey and allotment of lands in severalty to Indians; and for the survey and subdivision of Indian reservations and lands to be allotted to Indians under authority of law, $250,000, to be repaid proportionately out of any Indian moneys held in trust or otherwise by the United States and available by law for such reimbursable purpose and to remain available until expended.

The amendment was agreed to.

The next amendment was, on page 2, line 22, after the word "floods," to strike out "$325,000" and insert "$349,300," so as to read:

For the construction, repair, and maintenance of ditches, reservoirs, and dams, purchase and use of irrigation tools and appliances, water rights, ditches, lands necessary for canals, pipe lines, and reservoirs for

Indian reservations and allotments, and for drainage and protection of irrigable lands from damage by floods, $349,300, to remain available until expended.

The amendment was agreed to.

The next amendment was, in the item of appropriation for the construction, repair, and maintenance of ditches, reservoirs, and dams, etc., on page 3, line 23, after the words "in all," to strike out "$335,700" and insert "$360,000," so as to make the proviso read:

Provided further, That nothing herein contained shall be construed to prohibit reasonable expenditures from the appropriation for preliminary surveys and investigations to determine the feasibility and estimated cost of new projects, for investigations and surveys for power and reservoir sites on Indian reservations in accordance with the provisions of section 13 of the act of June 25, 1910, or to prevent the Bureau of Indian Affairs from having the benefit of consultation with engineers in other branches of the public service or carrying out existing agreements with the Reclamation Service; for pay of 1 chief inspector of irrigation, who shall be a skilled irrigation engineer, $4,000; 1 assistant inspector of irrigation, who shall be a skilled irrigation engineer, $2,500; for traveling expenses of 2 inspectors of irrigation, at $3 per diem when actually employed on duty in the field, exclusive of transportation and sleeping-car fare, in lieu of all other expenses authorized by law, and for incidental expenses of negotiation, inspection, and investigation, including telegraphing and expense of going to and from the seat of government and while remaining there under orders, $4,200; in all, $360,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 2, to strike out:

For the suppression of the traffic in intoxicating liquors among Indians, $75,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 4, to insert:

For the suppression of the traffic in intoxicating liquors and deleterious drugs, herbs, or plants among Indians, $125,000.

The amendment was agreed to.

The next amendment was, on page 4, line 12, after the word "vaccination," to insert "and for correction of sanitary defects in Indian homes," and in line 13, after the word "homes," to strike out "$90,000" and insert "$200,000," so as to make the clause read:

To relieve distress among Indians and to provide for their care and for the prevention and treatment of tuberculosis, trachoma, smallpox, and other contagious and infectious diseases, including the purchase of vaccine and expense of vaccination, and for correction of sanitary defects in Indian homes, $200,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 13, to insert:

For the construction and equipment of hospitals for the treatment of Indians suffering from tuberculosis, trachoma, and other diseases, at such places as may be designated by the Secretary of the Interior, the sum of $300,000, to be immediately available and to remain available until expended.

The amendment was agreed to.

The next amendment was, on page 4, line 21, after the word "therewith," to strike out "$1,420,000" and insert "$1,500,000," so as to read:

For support of Indian day and industrial schools not otherwise provided for and for other educational and industrial purposes in connection therewith, $1,500,000.

The amendment was agreed to.

The next amendment was, on page 5, line 7, after the word "plants," to strike out "$300,000" and insert "$480,000, to remain available until expended: *Provided*, That the Commissioner of Indian Affairs is hereby authorized to allow employees in the Indian service who are furnished quarters necessary heat and light for such quarters without charge, such heat and light to be paid for out of the fund chargeable with the cost of heating and lighting other buildings at the same place: *Provided further*, That the amount so expended for agency purposes shall not be included in the maximum amounts for compensation of employees prescribed by section 1, act of August 24, 1912," so as to make the clause read:

For construction, lease, purchase, repairs, and improvements of school and agency buildings, and for sewerage, water supply, and lighting plants, $480,000, to remain available until expended: *Provided*, That the Commissioner of Indian Affairs is hereby authorized to allow employees in the Indian service who are furnished quarters necessary heat and light for such quarters without charge, such heat and light to be paid for out of the fund chargeable with the cost of heating and lighting other buildings at the same place: *Provided further*, That the amount so expended for agency purposes shall not be included in the maximum amounts for compensation of employees prescribed by section 1, act of August 24, 1912.

The amendment was agreed to.

The next amendment was, on page 5, line 24, after the word "training," to strike out "$70,000" and insert "$82,000: *Provided*, That not to exceed $5,000 of this amount may be used in the transportation and placing of Indian youths in positions where a remunerative employment may be found for them in industrial pursuits," so as to make the clause read:

For collection and transportation of pupils to and from Indian schools, and for the transportation of Indian pupils from any and all Indian schools and placing them, with the consent of their parents, under the care and control of white families, qualified to give such pupils moral, industrial, and educational training, $82,000: *Provided*, That not to exceed $5,000 of this amount may be used in the transportation and placing of Indian youths in positions where a remunerative employment may be found for them in industrial pursuits. The provisions of this section shall also apply to native pupils of school age under 21 years of age brought from Alaska.

The amendment was agreed to.

The next amendment was, on page 6, line 19, after the word "equipments," to insert "and supplies," and in line 23, after the word "Indians," to strike out "$300,000" and insert "and for obtaining remunerative employment for Indians, including salaries and traveling expenses of employees engaged in the work, transportation of Indians to their place of employment and returning them to their homes when necessary, and other necessary expenses of conducting this work, under such regulations as the Commissioner of Indian Affairs may prescribe, $425,000," so as to read:

To conduct experiments on Indian school or agency farms designed to test the possibilities of soil and climate in the cultivation of trees, grains, vegetables, and fruits, for the purposes of preserving living and growing timber on Indian reservations and allotments, and to advise the Indians as to the proper care of forests: *Provided*, That this shall not, as to timber, apply to the Menominee Indian Reservation in Wisconsin; for the employment of suitable persons as matrons to teach Indian women housekeeping and other household duties, and for furnishing necessary equipments and supplies and renting quarters for them where necessary; for the employment of practical farmers and stockmen, in addition to the agency and school farmers now employed; and to superintend and direct farming and stock raising among Indians, and for obtaining remunerative employment for Indians, including salaries and traveling expenses of employees engaged in the work, transportation of Indians to their place of employment and returning them to their homes when necessary, and other necessary expenses of conducting this work, under such regulations as the Commissioner of Indian Affairs may prescribe, $425,000: *Provided further*, That not to exceed $5,000 of the amount herein appropriated may be used to conduct experiments on Indian school or agency farms to test the possibilities of soil and climate in the cultivation of trees, grains, vegetables, and fruits: *Provided also*, That the amounts paid to matrons, farmers, and stockmen herein provided for shall not be included within the limitation on salaries and compensation of employees contained in the act of June 7, 1897.

The amendment was agreed to.

The next amendment was, on page 7, line 18, after the word "supplies," to strike out "$285,000" and insert "$325,000: *Provided also*, That all wagon transportation from the point where delivery is made by the last common carrier to the agency, school or elsewhere, and between points on the reservation or elsewhere, shall hereafter be paid from the funds appropriated or otherwise available for the support of the school, agency, or other project for which the supplies to be transported are purchased," so as to make the clause read:

For the purchase of goods and supplies for the Indian service, including inspection, pay of necessary employees, and all other expenses connected therewith, including advertising, storage, and transportation of Indian goods and supplies, $325,000: *Provided also*, That all wagon transportation from the point where delivery is made by the last common carrier to the agency, school or elsewhere, and between points on the reservation or elsewhere, shall hereafter be paid from the funds appropriated or otherwise available for the support of the school, agency, or other project for which the supplies to be transported are purchased.

The amendment was agreed to.

The next amendment was, on page 8, line 11, after the words "Indian Commissioners," to strike out "$4,000" and insert "$10,000," so as to make the clause read:

For expenses of the Board of Indian Commissioners, $10,000, including not to exceed $300 for office rent.

The amendment was agreed to.

The next amendment was, on page 8, line 19, after the word "exist," to strike out "$8,000" and insert "$10,000," so as to make the clause read:

For compensation of judges of Indian courts where tribal relations now exist, $10,000.

Mr. KENYON. I should like to make an inquiry of the Senator having the bill in charge as to the appropriation for Indian police and for the compensation of judges of Indian courts. This is a committee amendment as to compensation of judges of Indian courts. What is the purpose of the Indian court? Has it anything to do? Has it any jurisdiction now?

Mr. GAMBLE. Yes, sir; I will say to the Senator that many minor differences and offenses are taken in charge by the Indian courts, and they are there adjusted and settled. The judges of the Indian courts are paid a nominal compensation, and it relieves the county from a good deal of burden in the different courts. So it is a matter of economy. This appropriation of $10,000 is recommended by the department, and it has been the uniform amount that has been appropriated for a long number of years.

Mr. KENYON. Will the Senator state what is the necessity for the Indian police? All the Indian reservations are broken up, I understand, and they are within organized States and counties and subject to the police jurisdiction thereof, and the Indian policeman has no jurisdiction whatever except as a mischief maker.

Mr. GAMBLE. The State officers have no jurisdiction whatever on most of the reservations, and on the reservations Indian police are provided for.

Mr. KENYON. I had in mind an instance in my own State, where an Indian policeman arrested an Indian and took him before an Indian court and to an Indian jail. As I remember the case, it went through the courts and the final decision was that both the policeman and the Indian court were entirely without jurisdiction. I wondered if the policemen do subserve any useful purpose.

Mr. GAMBLE. They do; they keep order. They are most valuable agents in keeping order on almost all the reservations, and on many reservations, as I stated, the local courts have no jurisdiction whatever. They are a great aid in keeping order and in helping the superintendents at the different agencies.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 9, line 4, after the word "available," to strike out "$80,960" and insert "$125,000; $25,000 to be immediately available: *Provided*, That the Commissioner of Indian Affairs may expend not to exceed $1,000 of this appropriation in purchasing law books for official use in the Indian Bureau," so as to make the clause read:

For pay of special agents at $2,000 per annum; for traveling and incidental expenses of such special agents, including sleeping-car fare, and a per diem of $3 in lieu of subsistence when actually employed on duty in the field or ordered to the seat of government; for transportation and incidental expenses of officers and clerks of the Office of Indian Affairs when traveling on official duty; for pay of employees not otherwise provided for; and for other necessary expenses of the Indian service for which no other appropriation is available, $125,000; $25,000 to be immediately available: *Provided*, That the Commissioner of Indian Affairs may expend not to exceed $1,000 of this appropriation in purchasing law books for official use in the Indian Bureau.

The amendment was agreed to.

The next amendment was, on page 9, after line 7, to strike out:

For the purpose of conducting hearings and taking evidence to determine the heirs of deceased Indian allottees, pursuant to the act of June 25, 1910 (36 Stat. L., pp. 855–866), and the regulations thereunder prescribed by the Secretary of the Interior, $25,000.

And to insert:

For the purpose of conducting hearings and taking evidence to determine the heirs of deceased Indian allottees, pursuant to the act of June 25, 1910 (36 Stat. L., pp. 855–866), and the regulations thereunder prescribed by the Secretary of the Interior, $100,000: *Provided*, That $10,000 of this amount may be used for clerk hire in the Indian Bureau.

The amendment was agreed to.

The next amendment was, on page 10, after line 2, to insert:

For the purpose of encouraging industry among the Indians and to aid them in the culture of fruits, grains, and other crops, $250,000, or so much thereof as may be necessary, to be immediately available, which sum may be used for the purchase of animals, machinery, tools, implements, and other equipment necessary to enable Indians to become self-supporting: *Provided*, That said sum shall be expended under conditions to be prescribed by the Secretary of the Interior for its repayment to the United States on or before June 30, 1925, and all repayments to this fund made on or before June 30, 1924, are hereby reappropriated for the same purpose as the original fund, and the entire fund, including such repayments, shall remain available until June 30, 1924, and all repayments to the fund hereby created which shall be made subsequent to June 30, 1924, shall be covered into the Treasury and shall not be withdrawn or applied except in consequence of a subsequent appropriation made by law: *Provided further*, That the Secretary of the Interior shall submit to Congress annually on the first Monday in December a detailed report of the use of this fund.

The amendment was agreed to.

The next amendment was, on page 11, after line 4, to insert:

To pay to Frederick H. Abbott the difference between the compensation allowed by law for the Commissioner of Indian Affairs and the compensation allowed by law for the Assistant Commissioner of Indian Affairs, for services as Acting Commissioner of Indian Affairs from September 13, 1912, when the office of Commissioner of Indian Affairs was vacated, and continuing as long as the duties and responsibilities of said office of Commissioner of Indian Affairs shall devolve upon said Frederick H. Abbott as Acting Commissioner of Indian Affairs, such an amount as may be necessary, to be paid from the $5,000 appropriated for salary of the Commissioner of Indian Affairs by the act of August 23, 1912. (37 Stat. L., p. 396.)

The amendment was agreed to.

The next amendment was, under the head of "Arizona and New Mexico," on page 11, line 26, after the word "improvements," to strike out "$3,300" and insert "$3,800," and in the same line, after the words "in all," to strike out "$38,400" and insert "$38,900," so as to make the clause read:

For support and education of 200 Indian pupils at the Indian school at Fort Mojave, and for pay of superintendent, $35,100; for general repairs and improvements, $3,800; in all, $38,900.

The amendment was agreed to.

The next amendment was, on page 12, line 3, after "$119,400" to insert "for industrial building for girls, $15,000," in line 5, after the word "tanks," to strike out "$12,000" and insert "$15,000," and in the same line after the words "in all," to strike out "$131,400" and insert "$149,400," so as to make the paragraph read:

For support and education of 700 Indian pupils at the Indian school at Phoenix, Ariz., and for pay of superintendent, $119,400; for industrial building for girls, $15,000; for general repairs and improvements, including two steel water tanks, $15,000; in all, $149,400: *Provided*, That $500 of this appropriation, or so much thereof as may be necessary, shall be used in making survey and an estimate of the cost of connecting the sewer system of the Phoenix Indian School with the sewer system of the city of Phoenix, Ariz., and submit a report thereon to Congress on the first Monday in December, 1913.

The amendment was agreed to.

The next amendment was, on page 12, line 15, after the word "superintendent," to strike out "$18,200" and insert "$20,100," and in line 16, after the words "in all," to strike out "$21,200," and insert "$23,100," so as to read:

For support and education of 100 pupils at the Indian school at Truxton Canyon, Ariz., and for pay of superintendent, $20,100; for general repairs and improvements, $3,000; in all, $23,100.

The amendment was agreed to.

The next amendment was, on page 12, after line 16, to strike out:

For maintenance, care, and protection of machinery and irrigation wells already completed, in connection with the irrigation of the lands of the Pima Indians in the vicinity of Sacaton, in the Gila River Indian Reservation, $5,000.

And to insert:

For maintenance, including purchase of electricity for irrigation wells already completed, and the completion of the lateral irrigating ditches thereunder in connection with the irrigation of the lands of the Pima Indians in the vicinity of Sacaton, in the Gila River Indian Reservation, $15,000.

The amendment was agreed to.

The next amendment was, on page 13, line 3, after the word "Arizona," to strike out "$5,000" and insert "$10,000," so as to read:

For the development of a water supply for domestic and stock purposes and for irrigation for nomadic Papago Indians in Pima County, Ariz., $10,000.

The amendment was agreed to.

The next amendment was, on page 14, line 18, after "$65,300," to strike out "with interest thereon at the rate of 3 per cent per annum," and in line 24, after the word "full," to strike out ", principal and interest," so as to read:

For the construction of a bridge across the Gila River on the San Carlos Apache Indian Reservation, Ariz., $45,500; and for the construction of a bridge across the San Carlos River on said reservation in said State, $19,800, to be immediately available, said bridges to be constructed across said streams in the places and manner recommended by the Secretary of the Interior in House Document No. 1013, Sixty-second Congress, third session; in all, $65,300, which said sum of $65,300 shall be reimbursed to the United States by the Apache Indians having tribal rights on the Fort Apache and San Carlos Indian Reservations, and shall be and remain a charge and lien upon the lands, property, and funds belonging to said Apache Indians until paid in full.

The amendment was agreed to.

The next amendment was, at the top of page 15, to insert:

For the construction of a bridge across the Colorado River from School Hill, on the Yuma Indian Reservation, in the State of California, to Penitentiary Hill, in the town of Yuma, in the State of Arizona, to be expended under the direction of the Secretary of the Interior, not to exceed the sum of $25,000, in the construction of a bridge, as recommended by the Secretary of the Interior in House Document No. 1020, Sixty-second Congress, third session: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the State of Arizona and the State of California satisfactory guaranties of the payment by the said States, or by the county of Yuma, in the State of Arizona, and the county of Imperial, in the State of California, of at least two-thirds of the cost of said bridge; and that the proper authorities of the said States assume full responsibility for and will at all times maintain and repair said bridge and the approaches thereto: *And provided further*, That the bridge shall be built in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

Mr. CURTIS. Mr. President, I make a point of order on that amendment that it is general legislation and not proper on the appropriation bill.

Mr. ASHURST. Mr. President, before the point of order is ruled upon I should like to be heard for a few moments.

The PRESIDENT pro tempore. The Senator from Arizona will be recognized for that purpose.

Mr. ASHURST. Mr. President, this item has been estimated for, and it is not general legislation. On the Indian appropriation bill which passed the last Congress, approved August 24, 1912, the sum of $1,000 was appropriated for the purpose of authorizing the Secretary of the Interior to make an investigation as to the suitability and the necessity for this bridge. Acting upon that authorization by Congress, the Secretary of the Interior proceeded to cause an investigation to be made as to the necessity and suitability of the bridge, and a very elaborate and comprehensive report disclosing the necessity for such a

bridge was submitted to Congress within the time prescribed by law. That report has been printed, and is Document No. 1020.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Kansas?

Mr. ASHURST. Cheerfully.

Mr. CURTIS. Is this the only way the Indians can get off or on their reservation without traveling up and down the river for many miles, as was stated?

Mr. GAMBLE. I think it is so stated in the report of the Secretary of the Interior. It comes recommended by the department.

Mr. CURTIS. I withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn. Without objection, the amendment is agreed to.

The next amendment was, on page 15, after line 23, to insert:

For the purpose of enabling the Secretary of the Interior to carry into effect the provisions of the sixth article of the treaty of June 8, 1868, between the United States and the Navajo Nation or Tribe of Indians, proclaimed August 12, 1868, whereby the United States agrees to provide school facilities for the children of the Navajo Tribe of Indians, the sum of $150,000, or so much thereof as may be necessary, is hereby appropriated, out of any funds in the Treasury not otherwise appropriated. In carrying out the authority hereby conferred the said Secretary may expend said funds, in his discretion, in establishing day schools or industrial schools, tribal habits and climatic conditions being considered, suitable for the education of said Indians.

The amendment was agreed to.

The next amendment was, on page 16, after line 12, to insert:

For enlarging the irrigation system for the protection and irrigation of Indian lands within the Camp McDowell Indian Reservation, Ariz., $50,000, to be immediately available and to remain available until expended.

The amendment was agreed to.

The next amendment was, on page 16, after line 16, to insert:

For the development of a water supply for the Navajo Indians, $100,000, to be immediately available and to remain available until expended.

The amendment was agreed to.

The next amendment was, under the head of "California," on page 16, line 25, after the word "California," to strike out "$57,000" and insert "$60,000," so as to make the clause read:

For support and civilization of Indians in California, including pay of employees, and for the purchase of small tracts of land situated adjacent to lands heretofore purchased, and for improvements on lands for the use and occupancy of Indians in California, $60,000.

The amendment was agreed to.

The next amendment was, on page 17, line 1, after the words "education of," to strike out "five hundred and fifty" and insert "seven hundred"; in line 3, after the word "superintendent," to strike out "$94,350" and insert "$130,000"; and in line 14, after the words "in all," to strike out "$104,350" and insert "$140,000," so as to make the clause read:

For support and education of 700 Indian pupils at the Sherman Institute, Riverside, Cal., and for pay of superintendent, $130,000; for general repairs and improvements, $10,000; in all, $140,000.

The amendment was agreed to.

The next amendment was, on page 17, after line 10, to insert:

For support and education of 125 Indian pupils at the Fort Bidwell Indian School, Cal., and for repairs and improvements, $20,000.

The amendment was agreed to.

The next amendment was, on page 17, after line 13, to insert:

For support and education of 100 Indian pupils at the Greenville Indian School, Cal., and for repairs and improvements, $20,000; new buildings, $10,000; in all, $30,000.

The amendment was agreed to.

The next amendment was, on page 17, after line 17, to insert:

The Secretary of the Treasury is hereby authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, the sum of $5,000 to Mrs. May Stanley, widow of Will H. Stanley, late superintendent of the Soboba Indian School in California, who lost his life in the discharge of his duty. Also to pay for medical and other necessary expenses, including funeral and administration expenses incurred in connection with the death of said Will H. Stanley and the shooting of Selso Serrano, Indian policeman, $1,000, or so much thereof as may be necessary.

Mr. CURTIS. I do not intend to make a point of order against the amendment, although it is clearly subject to it, but I wish to call the attention of the Senator having the bill in charge to the difference between the item in this bill and the allowances heretofore made.

There was a man from Kansas killed on the Panama Canal a very short time after he had arrived there, and he was killed by the fault of a Government employee. Under a law that was passed four or five years ago that man's widow was allowed only $1,200. Another man working in the War Department was injured for life, and he was allowed his salary for one year.

I do not believe it is fair to make these distinctions; I think this sum is small enough. I wished simply to make that statement to show that there are these differences, and they ought not to exist.

Mr. KENYON. Will not the Senator from Kansas explain the circumstances of this case so that we may be able to judge of it?

Mr. CURTIS. I was not at the committee meeting when this item was put into the bill and therefore I can not explain it. I am simply calling attention to the difference in treatment between people provided for in this bill and some others I happen to know about; that is all. The chairman of the committee can explain the item.

Mr. GAMBLE. This man was killed by an Indian when he was engaged in the discharge of his duties as an officer of the Government. He leaves a wife and two minor children practically without any means whatever. It was felt by the committee that some recognition should be given to this employee of the Government, and they thought that $5,000, under the circumstances, was little enough. It was estimated for by the department.

The amendment was agreed to.

The next amendment was, under the head of "Kansas," on page 19, after line 20, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to D. C. Tillotson, of Topeka, Kans., the sum of $4,010.75, said amount being in payment for work done and expenses incurred by said Tillotson in carrying out the provisions of the treaty with the Pottawatomie Indians proclaimed April 19, 1862, and under the act of Congress approved March 3, 1909, under contract with the Secretary of the Interior, said sum to be paid on proper certificate from the Secretary of the Interior.

The amendment was agreed to.

The next amendment was, under the head of "Michigan," on page 20, line 7, before the word "Indian," to strike out "three hundred and twenty-five" and insert "three hundred and fifty"; in line 10, after the word "superintendent," to strike out "$56,275" and insert "$59,700"; in line 11, after the word "improvements," to insert "including equipments of two lavatories"; and in line 12, after the words "in all," to strike out "$61,275" and insert "$64,700," so as to read:

For support and education of 350 Indian pupils at the Indian school, Mount Pleasant, Mich., and for pay of superintendent, $59,700; for general repairs and improvements, including equipment of two lavatories, $5,000; in all, $64,700.

Mr. GAMBLE. Under the head of "Michigan," I move to strike out from line 7 to line 12, inclusive, and to insert in lieu thereof what I send to the desk. There is an error in the print, and I submit a substitute as a committee amendment.

The PRESIDENT pro tempore. The committee amendment to the amendment will be stated.

The SECRETARY. On page 20, strike out lines 7 to 12, inclusive, and insert in lieu thereof the following:

SEC. 8. For support and education of 350 Indian pupils at the Indian school, Mount Pleasant, Mich., and for pay of superintendent, $59,700; for general repairs and improvements, including equipment of two lavatories and for changing and improving heating system, including purchase of new 100-horsepower steam boiler, $15,000; for the construction of a gymnasium and manual training building, with equipment, $25,000; in all, $99,700.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the head of "Minnesota," on page 21, line 3, after the words "the sum of," to strike out "$165,000" and insert "$180,000," so as to read:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $180,000, or so much thereof as may be necessary, of the principal sum on deposit to the credit of the Chippewa Indians in the State of Minnesota, arising under section 7 of the act of January 14, 1889, entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," and to use the same for the purpose of promoting civilization and self-support among the said Indians in manner and for purposes provided for in said act.

The amendment was agreed to.

The next amendment was, on page 21, line 22, before the word "available," to insert "immediately," so as to make the clause read:

That the unexpended balance of the appropriation for the completion of the drainage survey of ceded Indian lands made by the act of April 30, 1908, is hereby reappropriated and made immediately available for an extension of the drainage survey, together with an estimate of the cost of the project, to cover the Red Lake Diminished Reservation in Minnesota.

The amendment was agreed to.

The next amendment was, on page 22, after line 3, to insert:

That upon the passage of this act the senior judge of the United States District Court for the District of Minnesota shall appoint a commission consisting of two persons, one of whom shall be selected by the Department of Justice and the other shall be a citizen of the State of Minnesota, who shall proceed forthwith, under the direction of the said United States district court, to make a roll of the Chippewa Indians allotted within the White Earth Reservation in the State of Minnesota. The commission shall qualify by taking an oath of office and by giving a bond to the United States in the sum of $5,000 conditioned upon the faithful performance of their duties. Should a vacancy in said commission occur, from any cause, the court shall appoint some suitable person to fill such vacancy: *Provided*, That the said commission shall always be constituted as above set forth.

That the roll herein provided for shall be made in triplicate and shall show the allotment number or numbers, together with the description of the property allotted, and the name, age, sex, and quantum of Chippewa Indian blood of the allottees as near as it reasonably can be ascertained. The roll shall also state whether the person named is living or dead, and, if dead, the approximate date of death shall be stated, when it can be ascertained, together with the age of such person at death as near as practicable. No allotment nor the allottee thereof shall be enrolled where there is a suit now pending, or hereafter commences prior to the completion of such roll, to cancel any conveyance of such allotment until such suit has been finally determined.

That from time to time copies of such roll, as far as then prepared by the commission, shall be posted in the agency offices at White Earth and at Pine Point, and in the post offices at Beaulieu, Mahnomen, Waubun, Ogema, and Callaway, on the White Earth Reservation, and a copy thereof shall be transmitted to the Secretary of the Interior. At the same time, if the commission so desires, notice may be given, in the manner hereinafter provided for, of the intention of the commission to apply to the said United States district court for its approval of that portion of the roll so prepared and posted. Any person having an interest therein shall be entitled to be heard touching the status of any person named on said roll. The portion of the roll, when so approved, shall be filed, one copy with the clerk of the said United States district court, one copy at the agency office at White Earth, and one copy with the Secretary of the Interior. When the roll so made is completed, it shall be presented to the said district court for final approval. If the commissioners disagree as to the proper status of any allottee, they shall submit the question to the court for determination, upon such final presentation of the roll. At least three weeks prior to presenting the same for final approval the commission shall cause notice of the time and place of presenting the same to be published in three newspapers of general circulation upon and around the White Earth Reservation and in one daily newspaper in each of the cities of St. Paul, Minneapolis, and Duluth, and shall cause copies of such notice to be posted in the agency offices at White Earth and Pine Point, and in the post offices at Beaulieu, Mahnomen, Ogema, and Callaway, on the White Earth Reservation, and shall transmit a copy thereof to the Secretary of the Interior. Any person interested therein may be heard upon such final application touching the status of any person named upon such roll whose status has not already been passed upon by the court. The court shall receive and consider all evidence submitted touching disputed cases and shall fix the status of every such person in accordance with the facts as the court may find them to be. When the commission has completed the roll and all disputed cases have been determined by the court an order or decree of final approval shall be made and engrossed upon the roll. The roll so made and finally approved by the court, as aforesaid, shall be filed, one copy with the clerk of said court, one copy at the agency office at White Earth, and one copy with the Secretary of the Interior. The copy of the roll filed at the agency office at White Earth shall at all times be open to public inspection, and copies thereof may be made and filed for record with the registers of deeds of the various counties in which the lands described therein are situated, and such roll, when so made, approved, and filed, shall be final and conclusive as to the facts stated therein, and shall be deemed a record of the United States District Court for the District of Minnesota, and entitled to be received in evidence as such: *Provided, however,* That appeals as in other cases of final decrees in equity in said court may be taken by any party in interest: *And provided further,* That the determination of status, as provided herein, shall not, in the case of any allottee upon the roll so made, be taken to be a determination of the right of such allottee to have or to have had an allotment on the said reservation, or to be enrolled on the tribal rolls thereof.

That the commission is hereby empowered to employ such clerical and other assistance and to incur such expense, including traveling expenses, as may be required in connection with the work of enrollment, and the said district court shall fix the compensation to be received by the commissioners and such persons as they may employ. The sum of $5,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the purpose of carrying this act into effect.

Mr. CURTIS. I make the point of order against that amendment that it is in violation of Rule XVI, paragraph 3, it being general legislation on an appropriation bill. If the Senator in charge of the bill or the Senator from Minnesota desires to make any explanation, with the permission of the Senate, I will withhold the point of order.

Mr. CLAPP. Mr. President, in 1906, I think it was, the restrictions were removed from the mixed bloods upon the White Earth Reservation. At that time it was understood that a roll would be made by the department showing who were, according to the findings of the department, mixed bloods. That was not done, however, although two or three purported rolls, I believe, have since been made. Suits were brought to set aside conveyances made by those alleged mixed bloods, and a great many of those suits are now pending. The suits, so I am advised by the attorney who brought them, nowhere allege any fraud, but evidently rest upon the theory that the allottees who conveyed to private parties were not mixed bloods or were not, under the law, exempt from the restrictions. Of course, that question has got to be tried out. This provision is to take the case, where suits are not now pending, and obtain a judicial decree as to the status of the allottees with reference to the amount of white blood which they have, if any.

The measure does not go as far as I wish it might; but, so far as it goes, it provides an expeditious, inexpensive, and yet a very safe and carefully guarded proceeding, in the nature of a judicial determination of the question of the blood status of those allottees. It could not, of course, cover pending cases, because it is in the same court, and the court would not entertain them; but, to avoid any possible question on that score, it provides that this proceeding shall not apply to any pending cases; and so far as it is carried out, all the time under the control of the court, appeals being allowable from the decision of that court, it will expedite the ascertainment of the question of the status of the blood of these allottees.

I might add, Mr. President, that a bill covering the same matter has been favorably reported upon by the committee in the other House, and the report of the Indian Committee of that House shows that it has the approval of the Department of Justice. Of course, when these suits were brought the matter was transferred to the Department of Justice. That is why the provision is that that department shall name one of the commissioners and the court shall name the other.

I trust, under this explanation, the Senator from Kansas will withdraw his point of order.

Mr. CURTIS. Mr. President, I should like to know the necessity of having this legislation on an Indian appropriation bill. It is clearly legislation. It seems to me that it should come in here as a separate bill. I would withdraw the point of order if conditions were such up there that this legislation were necessary at this time to help settle the conditions on that reservation, and if the amendment is desired by either the Department of the Interior or the Department of Justice having charge of those suits.

Mr. CLAPP. Mr. President, it is necessary, as it would dispose in a more expeditious manner of the cases which otherwise would be brought to determine this very question of the status, an expensive proceeding. The question has got to be determined by the same court. I repeat: This simply provides an expeditious and inexpensive manner in the court itself, under the direction and jurisdiction and subject to the determination of the court, of the very question which has got to be decided day after day in these matters if it is not done in some other manner.

Mr. CURTIS. Mr. President, I withdraw the point of order.

Mr. KERN. Mr. President, I renew the point of order.

The PRESIDENT pro tempore. The Senator from Indiana renews the point of order.

Mr. KERN. I do so on account of the opposition to this legislation by the members of the White Earth Band of Minnesota Chippewas.

Mr. CLAPP. Mr. President, I trust that the Senator from Indiana will not take that position. I understand that some of the opposition comes from the fact that those Indians feel that they should have the appointment of one of the commissioners to be named. I would gladly accord that if I could, but this amendment is in their interest. Their matters are taken before the court, and this amendment provides that each and every one of them, if he is not satisfied with the manner in which his case is being investigated, can appear before the court in person or by counsel.

I really hope the Senator will not press his point of order. This is a matter within our State. It is a matter that we have had to deal with. It is a matter for which I am responsible if a mistake is being made by this legislation. These Indians are constituents of mine. I take the responsibility, and will have to do so, of meeting all objections. I do not believe the Senator, if there was a matter pending in Indiana with which he was thoroughly conversant and the responsibility rested upon him for the solution of that question, would feel that I had a right or that any other Senator had a right to take ex parte statements from constituents of his and seek to oppose and defeat legislation for which he, coming from that State, was responsible to the very men whose interests were being affected by the legislation and which, in view of all the circumstances and conditions surrounding the case, he felt was the best and only thing that he could do. I appeal to the Senator to recognize that situation.

Mr. TOWNSEND. Mr. President, will the Senator from Indiana yield to me?

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Michigan?

Mr. KERN. Certainly.

Mr. TOWNSEND. I desire to state that I am somewhat familiar with the position of the Department of Justice in reference to this situation. As is known by every Senator, I presume, the White Earth Reservation has been the subject of a great deal of investigation and a great deal of work by the Department of Justice. One of the very difficult problems which the Government meets in dealing with the land rights of Indians is the one which involves the question of blood. Has the Indian such a quantum of Indian blood as to include him among those who are to receive the full benefits of allotments? Has he sufficient "white" blood to permit him to alienate his land? To determine these a full examination must be made and a complete enrollment effected. I am satisfied this amendment has the approval of those officials of the de-

partment who have been adjusting matters on the White Earth Reservation. I hope that this provision will be permitted to remain in the bill.

Mr. KERN. Mr. President, I am glad to have a little information in regard to this amendment. Of course, I would be the last man to interfere with the prerogatives of the Senator from Minnesota or to offend him in any way. I should like to hear what he has to say with reference to the reasons for the opposition to this amendment which have been urged upon me. First, that this band of Indians are the most progressive in education and general enlightment of all the American Indians, having among them educated members who are successful attorneys at law, ministers of the gospel, editors and owners of newspapers, and men competent to fill any position.

This amendment is further objectionable because the tribe has had no opportunity to consider it, and if legislation of this character is to be had, they ask that it be given a full hearing in committee where opportunity may be afforded them to be heard.

The further objection is urged that this amendment proposes that the senior judge of the United States district court of Minnesota shall appoint two persons as a commission to make a roll of the Chippewa Indians upon the White Earth Reservation in Minnesota to ascertain who are mixed bloods and who are full bloods, and if they have any white blood, to ascertain the quantum thereof, one of the commissioners to be a representative of the Department of Justice and the other a citizen of the State of Minnesota.

A further provision is that any allottee whose allotment is involved in any of the lis pendens suits commenced by Burch and his subordinates shall not under the terms of the bill be classified upon the rolls.

The object of the proposed enactment is apparent to the progressive Indians, and this is to have continued in office indefinitely the men, who as special employees of the Department of Justice were detailed more than three years ago to investigate whether full-blood Indians upon the White Earth Reservation had disposed of their allotments contrary to existing law.

These men have done nothing except to file about twelve hundred lis pendens notices in the office of the register of deeds in the counties within which the White Earth Reservation is located. If there is an honest intention to settle the question in controversy upon the White Earth Reservation, the President of the United States should be the proper official, according to the general custom of the Government, to appoint the proposed commission. Furthermore, the most interested persons in regard to the enrollment are the Indians themselves who are to be enrolled, and for this reason they should have a representative on the proposed commission as well as the Department of Justice.

The Indian owners and persons whose rights and property are to be dealt with are not in favor of this amendment to classify White Earth allottees, but would prefer one drawn on entirely different lines than the amendment in the Indian appropriation bill—one which will give the President the authority to appoint a commission instead of the judge of the United States district court.

It is upon that statement that I have renewed the point of order against the amendment.

Mr. CLAPP. Mr. President, I am very glad the Senator has asked the question. In the first place, I agree with him that, taking them collectively, there probably is no group of Indians in this country so far advanced as are the White Earth Indians. That reservation is one upon which the Indians did not live, but to which they moved as they relinquished other occupations and their lands connected therewith. Many of them are educated, many of them are to-day following professional pursuits. The bill was passed in 1906, I think—I am speaking now from memory as to the date—removing these restrictions. If there had been a roll made of the mixed bloods, made with care that no man on that roll by any possibility was not a mixed blood, no man would have dared to have bought land of an Indian whose name was not on that roll. But instead of making that roll, the matter ran along against our protests until finally men were sent up there to make what they called rolls. They have put the matter in interminable confusion.

I agree that it would be very desirable that the Indians might have a man on this commission; but this legislation has got to be wrought out in view of the attitude of Congress and in view of the attitude of the Department of Justice.

While it would have been desirable to have had the Indians have a representative on this commission, it could not be done at this time; but the Indian is not precluded. This provision is carefully drawn, so that if an Indian objects to the manner in which the question of the status of his blood is being determined, he can go into the court himself and there fight out his battles.

The idea of the President doing this is a fallacious idea, for this reason: In the first place, the law removed these restrictions. Now, some people up there insist that we should pass a law ordering the Secretary of the Interior to grant patents in fee. We passed such a law in 1906; but there is no way of making the Secretary issue those patents. The act of the President would not be conclusive. It would still leave the subject open to litigation at the hands of the Department of Justice or anyone else. We have got either to have an officer who will execute the law or to make the law just as far as possible self-executing, automatic.

In this bill we get a judicial decree that stands of record there and is a notice to everyone as to whether or not the allottee has a right to convey his land. A presidential intervention would not do that. The law to-day, entitling them to a patent in fee and declaring their trust patent a patent in fee, does not do it, because there is no judicial proceeding connected with it. This is a judicial proceeding, only instead of taking each of these cases by itself and having it drag its weary length through the delays of the law it provides a means whereby their cases are brought directly to the attention of the court, and then the court determines whether or not and to what extent they have white blood in their veins.

As I say, it does not go as far as I wish it did; but it is all we could get, and will relieve the situation and expedite the settling of a question that has got to be settled at some time by judicial decree, as to the amount of white blood these allottees have.

The PRESIDENT pro tempore. The Chair is ready to rule, if the point of order is insisted upon.

Mr. KERN. Mr. President, the Senator's explanation is more or less satisfactory, but it is not on account of his explanation that I will withdraw the point of order. It is on account of his personal appeal, and upon the theory that a Senator from one State ought not to press such a point of order against the judgment of a Senator from another State in whom he has the confidence that I have in the Senator from Minnesota.

The PRESIDENT pro tempore. The point of order is withdrawn, and, without objection, the amendment will be agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, at the top of page 26, to insert:

> The sum of $4,000 is hereby appropriated out of any funds in the United States Treasury to the credit of the Chippewa Indians in the State of Minnesota, to be expended pursuant to article 4 of the treaty of February 22, 1855, between the Chippewas of the Mississippi and Pillager Bands, for the higher education of 10 Chippewa Indian boys, members of the said bands of Chippewa Indians in the State of Minnesota, under the direction of the Indian education board of White Earth Reservation, in the said State. Created by act of council of the White Earth Bands of Chippewa Indians, held at White Earth, March 25, 1911.

The PRESIDENT pro tempore. The Chair will call the attention of the Senator from South Dakota to the word "created," in line 10.

Mr. GAMBLE. I suggest that on line 10, page 26, after the word "State," a comma be inserted and a small "c" substituted for the large one in the word "Created."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, under the head of "Montana," on page 26, line 17, after the word "employees," to strike out "$20,000" and insert "$25,000," so as to make the clause read:

> For support and civilization of the Indians at Fort Belknap Agency, Mont., including pay of employees, $25,000.

The amendment was agreed to.

The next amendment was, on page 26, line 19, after the word "employees," to strike out "$9,000" and insert "$15,000," so as to make the clause read:

> For support and civilization of Indians at Flathead Agency, Mont., including pay of employees, $15,000.

The amendment was agreed to.

The next amendment was, on page 26, after line 22, to insert:

> For support and civilization of Indians at Blackfeet Agency, Mont., including pay of employees, $20,000.

The amendment was agreed to.

The next amendment was, on page 27, line 8, after the word "estimates," to strike out "$150,000" and insert "$400,000, to be immediately available," so as to make the clause read:

> For continuing the construction of irrigation systems to irrigate the allotted lands of the Indians of the Flathead Reservation, in Montana,

and the unallotted irrigable lands to be disposed of under authority of law, including the necessary surveys, plans, and estimates, $409,000, to be immediately available, reimbursable in accordance with the provisions of the act of April 4, 1910.

The amendment was agreed to.

The next amendment was, on page 27, after line 11, to insert:

There is hereby appropriated the sum of $50,000, to be immediately available and to remain available until expended, and the Secretary of the Interior is authorized to use this money, or so much thereof as may be necessary, under such regulations as he may prescribe, for the promotion of civilization and self-support among the Indians residing and having tribal rights on the Fort Peck Indian Reservation, Mont. The said sum to be expended in the purchase of seed, live stock, vehicles, harness, machinery, tools, implements, and other agricultural equipment; for the construction of houses for said Indians, and for such other purposes as the Secretary of the Interior may deem proper in promoting their civilization and self-support: *Provided*, That said sum shall be expended under conditions to be prescribed by the Secretary of the Interior for its repayment to the United States on or before June 30, 1925, and all repayments to this fund made on or before June 30, 1924, are hereby reappropriated for the same purpose as the original fund, and the entire fund, including such repayments, shall remain available until June 30, 1924; and all repayments to the fund hereby created which shall be made subsequent to June 30, 1924, shall be covered into the Treasury and shall not be withdrawn or applied except in consequence of a subsequent appropriation made by law.

The amendment was agreed to.

Mr. CURTIS. Mr. President, I ask unanimous consent to return to page 9, lines 21 and 22. I move to strike out the proviso, as follows:

Provided, That $10,000 of this amount may be used for clerk hire in the Indian Bureau.

I do that because an item is pending in the legislative bill that will not be acted upon unless that item is taken out of this bill.

Mr. OVERMAN. We gave five clerks in the legislative bill, and I was asked to look after this bill and see that the provision was not adopted here for five extra clerks.

The PRESIDENT pro tempore. Without objection, the vote by which the amendment was agreed to will be reconsidered. The Senator from Kansas moves to amend by striking out the proviso found in lines 21 and 22, on page 9.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 28, after line 11, to insert:

There is hereby appropriated the sum of $50,000, out of any moneys in the Treasury not otherwise appropriated, or so much thereof as may be necessary, to be immediately available, for the purpose of purchasing cattle for the benefit of the Northern Cheyenne Indians: *Provided*, That said sum shall be expended under conditions to be prescribed by the Secretary of the Interior for its repayment to the United States on or before June 30, 1925, and all repayments to this fund made on or before June 30, 1924, are hereby reappropriated for the same purpose as the original fund, and the entire fund, including such repayments, shall remain available until June 30, 1924; and all repayments to the fund hereby created which shall be made subsequent to June 30, 1924, shall be covered into the Treasury and shall not be withdrawn or applied except in consequence of a subsequent appropriation made by law.

The amendment was agreed to.

The next amendment was, on page 29, line 9, after the word "estimates," to strike out "$100,000" and insert "$175,000," so as to make the clause read:

For continuing the construction of irrigation systems to irrigate the allotted lands of the Indians of the Blackfeet Indian Reservation, in Montana, and the unallotted irrigable lands to be disposed of under authority of law, including the necessary surveys, plans, and estimates, $175,000, reimbursable in accordance with the provisions of the act of March 1, 1907.

The amendment was agreed to.

The next amendment was, on page 29, line 15, after the word "estimates," to strike out "$100,000" and insert "$175,000," so as to make the clause read:

For continuing construction of irrigation systems to irrigate allotted lands of the Indians of the Fort Peck Indian Reservation, in Montana, including necessary surveys, plans, and estimates, $175,000, the same to be reimbursable.

The amendment was agreed to.

The next amendment was, on page 30, after line 6, to insert:

For the purpose of surveying the land within the Tongue River, or Northern Cheyenne Indian Reservation, Mont., for completing the survey of the lands within the Fort Belknap Indian Reservation, Mont., and for making a meander survey around Flathead Lake so as to identify the lands embraced within the power-site withdrawal of 100 linear feet around that lake back from the high-water mark for the year 1909, together with other necessary survey work on Indian reservations not herein provided for, $20,000, $5,000 to be immediately available.

The amendment was agreed to.

The next amendment was, on page 30, after line 17, to insert:

The unexpended balance of moneys heretofore appropriated for the settling of Chief Rocky Boy's band of Chippewa Indians is hereby made available for expenditure for the support and civilization of said Indians and shall remain available until expended.

The amendment was agreed to.

The next amendment was, on page 30, after line 22, to insert:

The Secretary of the Interior is hereby authorized to pay to Omer D. Lewis, lease clerk of the Flathead Indian Agency, Mont., the sum of $2,573.25, for the purpose of reimbursing him for expenses incurred for hospital and doctor's fees paid and serious personal injuries received while aiding Federal officers engaged in suppressing the sale of liquor to Indians, the same to be immediately available.

The amendment was agreed to.

The next amendment was, under the head of "Nebraska," on page 31, line 23, before the words "in all," to insert "for cottage for superintendent, $5,500," and in the same line, after the words "in all," to strike out "$66,800" and insert "$72,300," so as to make the clause read:

For support and education of 375 Indian pupils at the Indian school at Genoa, Nebr., and for pay of superintendent, $62,300; for general repairs and improvements, $4,500; for cottage for superintendent, $5,500; in all, $72,300.

The amendment was agreed to.

The next amendment was, at the top of page 32, to insert:

For repairing the Government bridge across the Niobrara River in Knox County, Nebr., for the use of the Santee and Ponca Indians, $1,200.

The amendment was agreed to.

Mr. THOMAS. Mr. President, I gave notice of an amendment, to be inserted immediately after the third line, on page 32, which I will ask to have read.

The PRESIDENT pro tempore. The Chair will ask whether that is an amendment to the amendment of the committee?

Mr. THOMAS. It is an amendment by the addition of a certain provision after the figures "$1,200."

The PRESIDENT pro tempore. The Chair will suggest to the Senator from Colorado that the agreement was that the committee amendments should first be acted upon. The Senator will please withhold his amendment until that time.

Mr. THOMAS. Then it is not in order at the present time?

The PRESIDENT pro tempore. It is not in order at this time.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, under the head of "Nevada," on page 32, line 9, after the word "superintendent," to strike out "$50,100" and insert "$67,400," and in line 10, after the words "in all," to strike out "$56,100" and insert "$73,400," so as to make the clause read:

For support and education of 300 Indian pupils at the Indian school at Carson City, Nev., and for pay of superintendent, $67,400; for general repairs and improvements, $6,000; in all, $73,400.

The amendment was agreed to.

The next amendment was, under the head of "New Mexico," on page 32, line 20, before the words "in all," to insert "for girls' dormitory, $18,000"; and in the same line, after the words "in all," to strike out "$57,500" and insert "$75,500," so as to make the clause read:

For support and education of 300 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $51,900; for general repairs and improvements, $4,600; for water supply, $1,000; for girls' dormitory, $18,000; in all, $75,500.

Mr. CATRON. Mr. President, I gave notice that I have an amendment to that section down to that point. I should like to inquire whether it will be in order after all the committee amendments are disposed of?

The PRESIDENT pro tempore. It will be in order.

Mr. CATRON. I make this statement because this clause contains an amendment; and I do not want to be cut off by the fact that my amendment will apply to the same clause.

Mr. GAMBLE. I suggest to the Senator that his amendment may be deferred until later.

Mr. CATRON. I am perfectly willing, but I do not want to have it cut off.

The PRESIDENT pro tempore. It will be in order at any time. The question is on the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 32, line 23, after "$16,500," to strike out "which said sum of $16,500, with interest thereon at the rate of 3 per cent per annum, shall be reimbursed to the United States by the Navajo Indians, and shall be and remain a charge and lien upon the lands, property, and funds belonging to said Navajo Indians until paid in full, principal and interest," so as to make the clause read:

For the construction of a bridge across the San Juan River at Shiprock, N. Mex., on the Navajo Indian Reservation, to be immediately available, $16,500.

The amendment was agreed to.

The next amendment was, under the head of "North Dakota," on page 34, line 9, after "$2,000," to strike out "in all, $20,200," and insert "for dairy cows, poultry, and other live stock,

$1,000; for new equipment, $2,000; in all, $23,200," so as to make the clause read:

For support and education of 100 Indian pupils at the Indian school, Bismarck, N. Dak., and for pay of superintendent, $18,200; for general repairs and improvements, $2,000; for dairy cows, poultry, and other live stock $1,000; for new equipment, $2,000; in all, $23,200.

The amendment was agreed to.

The next amendment was, on page 34, after line 18, to strike out:

For support and education of 150 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $26,500; for general repairs and improvements, $3,000; in all, $29,500.

The amendment was agreed to.

The next amendment was, on page 34, after line 22, to insert:

For support and education of 200 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $35,200; for general repairs and improvements, $3,000; for beautifying and improving school grounds, $1,000; for gymnasium and playground equipment, $1,500; for cement walks, $1,000; for addition to barn, $4,000; for dairy cows, $1,000; for school building, $30,000; in all, $76,700. Of the above amount all shall be immediately available except the amount appropriated for education and support of pupils and for general repairs and improvements.

The amendment was agreed to.

The next amendment was, on page 35, after line 7, to insert:

To assist members of Turtle Mountain Tribe of Indians in making settlement upon their nonreservation allotments, $100,000.

The amendment was agreed to.

Mr. GRONNA. Do I understand that we are now considering committee amendments only, and that it will be in order to offer further amendments after they are disposed of?

The PRESIDENT pro tempore. The committee amendments are now being considered, and other amendments will be in order later on.

The reading of the bill was continued to line 15, on page 35.

Mr. KENYON. I wish to make a general inquiry of the Senator in charge of the bill at this point. There is set apart for support and civilization of these Indians, the Wichitas and affiliated bands, $5,000. I note, on page 34, "For support and civilization of Indians at Fort Berthold Agency, in North Dakota, including pay of employees"; and the next item, "for support and civilization of Turtle Mountain Band of Chippewas, North Dakota," does not include pay of employees. I wish to ask the Senator from South Dakota if it is not true that these appropriations are for the support and civilization of Indians and not for the pay of employees? Is not the pay of employees carried in the general legislative, executive, and judicial appropriation bill?

Mr. GAMBLE. No. If the Senator will take the appropriation on page 35, lines 8, 9, and 10, he will observe that this $100,000 is "to assist members of the Turtle Mountain Tribe of Indians in making settlement upon their nonreservation allotments." Some years since, an agreement was entered into between these Indians and the Government. There were no lands left in the reservation for which allotments could be taken, so it was necessary to put the Indians on Government land. They are without means whatever, and it is necessary to give them some help, so that they can make themselves self-supporting.

Mr. KENYON. Take the item at the bottom of page 33, "For support and civilization of the Sioux of Devils Lake, N. Dak., $5,000." Could any part of that be devoted to the pay of employees? The point I am making is that, I understand, the pay of employees is carried in another appropriation bill, and in many of these instances the fund which should be used for the support and civilization of the Indians is used to pay a number of useless employees.

Mr. CURTIS. Mr. President, the employees in the Indian Office doing field work, and who report to the department, are provided for in the legislative appropriation bill. The item for support and civilization is where the agency is in charge of an agent or a superintendent and the fund for the support and civilization is used for the payment of employees as well as for support and civilization.

I think the reason why in the Wichita item a provision for payment of employees was left out is because the tribe is affiliated with other tribes, and they are all at one agency.

Mr. KENYON. Is it not true that a very small part of the appropriation for the Wichitas has been used for their support?

Mr. CURTIS. Quite a good deal of it is used for the support of the old and infirm members of the tribe.

Mr. KENYON. I think a large part of it goes to maintaining employees.

Mr. CURTIS. In some agencies a very large amount of money is for employees. There is no question about that. But the Indian Office thinks it is necessary in order to do the work and to keep enough people there to look after the Government property and the interest of the Indians.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, under the head of "Oklahoma," on page 36, line 20, before the words "in all," to insert "for new buildings, $17,500"; and in the same line, after the words "in all," to strike out "$90,500" and insert "$108,000," so as to read:

For support and education of 500 Indian pupils at the Indian school at Chilocco, Okla., and for pay of superintendent, $83,500; for general repairs and improvements, $7,000; for new buildings, $17,500; in all, $108,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 7, to insert:

That the Secretary of the Interior, under rules and regulations to be prescribed by him, is hereby authorized to expend, out of any funds in the Treasury belonging to the Choctaw Tribe of Indians of Oklahoma not otherwise appropriated, the sum of $10,000, for the use and benefit of the Old Goodland Indian Industrial School, near Hugo, Okla., this appropriaton being made to carry out the purposes of the act of the General Council of the Choctaw Nation passed October 30, 1911, appropriating the sum of $10,000 of the funds of the Choctaw Nation to be expended for the benefit of the Old Goodland Indian Mission and Industrial School, which has been incorporated and is now known as Old Goodland Indian Industrial School, which act of the council was approved by the President on June 24, 1912: *Provided* That the amount herein appropriated shall be immediately available and remain available until expended.

The amendment was agreed to.

The next amendment was, on page 38, after line 19, to insert:

For continuing the relief and settlement of the Apache Indians now confined as prisoners of war at Fort Sill Military Reservation, Okla., on lands to be selected for them by the Secretary of the Interior and the Secretary of War, $100,000, to be expended under such rules and regulations as the Secretary of the Interior and the Secretary of War may prescribe, and to be immediately available and to remain available until expended: *Provided*, That allotments may be purchased in Oklahoma for the widow of George Wrattan, interpreter for the Fort Sill prisoners of war, Martin Grab, and Edward Welch.

Mr. CURTIS. I desire to make a point of order against the proviso. It is general legislation on an appropriation bill, providing for an allotment to people not entitled to it under any act of Congress.

The PRESIDENT pro tempore. Does the Senator from South Dakota desire to say a word in reference to the point of order?

Mr. GAMBLE. I do not know that I can resist the point of order. Of course it is recommended by the department. These employees have been with these Indians and practically a part of them ever since they have been confined. They are old and really helpless. One of them has been injured and is a cripple. It appealed to the committee as a matter of sympathy to do justice by these people who had sacrificed so much in behalf of these particular Indians.

Mr. CURTIS. In view of the statement of the Senator from South Dakota, I withdraw the point of order. I wish to say that very much trouble has come from allotting to people who are not members of Indian tribes, as Senators will well remember. It is a very bad practice indeed, in my judgment; but, in view of the statement made by the chairman of the committee, I will not insist on the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn, and, without objection, the amendment is agreed to.

The next amendment was, on page 39, after line 5, to insert:

That the Secretary of the Interior is hereby authorized to pay, out of any moneys in the Treasury not otherwise appropriated, the sum of $5,000 to Mrs. Robert Leo Bowman, widow of Robert Leo Bowman, late deputy special officer for the suppressing of the liquor traffic among Indians, who was killed while in the performance of his duty.

The amendment was agreed to.

The next amendment was, under the subhead "Five Civilized Tribes," on page 39, line 20, before the word "*Provided*," to strike out "For expenses of administration of the affairs of the Five Civilized Tribes, Oklahoma, and the compensation of employees, $150,000" and insert "For expenses of administration of the affairs of the Five Civilized Tribes, Oklahoma, and the compensation of employees, including such attorneys as the Secretary of the Interior may, in his discretion, employ in connection with probate matters affecting individual allottees of the Five Civilized Tribes, $250,000," so as to read:

For expenses of administration of the affairs of the Five Civilized Tribes, Oklahoma, and the compensation of employees, including such attorneys as the Secretary of the Interior may, in his discretion, employ in connection with probate matters affecting individual allottees of the Five Civilized Tribes, $250,000.

The amendment was agreed to.

The next amendment was, on page 40, line 6, after the words "fiscal year," to insert "at salaries not exceeding those for the last fiscal year," and, in line 8, after the word "President," to insert "which are now in force," so as to make the proviso read:

Provided, That during the fiscal year ending June 30, 1914, no moneys shall be expended from the tribal funds belonging to the Five Civilized Tribes without specific appropriation by Congress, except as follows: Equalization of allotments per capita and other payments authorized by law to individual members of the respective tribes, tribal

and other Indian schools for the current fiscal year under existing law, salaries and contingent expenses of governors, chiefs, assistant chiefs, secretaries, interpreters, and mining trustees of the tribes for the current fiscal year, at salaries not exceeding those for the last fiscal year; and attorneys for said tribes employed under contract approved by the President, which are now in force, under existing law, for the current fiscal year: *Provided further*, That the Secretary of the Interior is hereby authorized to continue the tribal schools of the Choctaw and Chickasaw Nations for the current fiscal year.

The amendment was agreed to.

The next amendment was, on page 40, after line 12, to insert:

That the act of Congress, approved February 19, 1912 (37 Stat. L., p. 67), being "An act to provide for the sale of the surface of the coal and asphalt lands of the Choctaw and Chickasaw Nations, and for other purposes," be, and the same is hereby, amended to provide that the classification and appraisement of such lands shall be completed not later than December 1, 1913.

The amendment was agreed to.

The next amendment was, on page 40, after line 20, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the administrator of the estate of John W. West, deceased, out of any money in the Treasury of the United States standing to the credit of the Cherokee Nation of Indians, the sum of $5,000, in full payment of the award made by the commission appointed pursuant to the authority contained in the seventh article of the treaty with the Cherokees of August 6, 1846, and which award was approved by the Secretary of the Interior August 29, 1883, reaffirmed by decision dated September 16, 1884, and again reaffirmed by decision dated April 26, 1886; said appropriation to be immediately available.

Mr. GORE. Mr. President, I raise the point of order against that item.

The PRESIDENT pro tempore. The Senator from Oklahoma makes a point of order. On what ground?

Mr. GORE. That it does not properly belong in this appropriation bill.

The PRESIDENT pro tempore. The Chair will further ask on what point? For what reason?

Mr. GORE. I do not think it properly belongs in this general Indian appropriation bill. It is a specific item for a specific claim. It has not been adjudicated in the Court of Claims. It is a matter that has been pending here for years. It has been brought in time and time again.

The PRESIDENT pro tempore. The Senator from Oklahoma makes the point of order, then, that it is a private claim on this appropriation bill?

Mr. GORE. Yes, sir; it is a private claim.

The PRESIDENT pro tempore. The Chair will read on that point clause 4 of Rule XVI:

No amendment, the object of which is to provide for a private claim, shall be received to any general appropriation bill, unless it be to carry out the provisions of an existing law or a treaty stipulation, which shall be cited on the face of the amendment.

The reading of the amendment indicates that this is to carry out the provision of a treaty.

Mr. GORE. No, sir; it is not to carry out the provisions of a treaty. There was a treaty entered into which authorized a certain commission to adjudicate claims against the Cherokee Tribe of Indians on the part of the Western Cherokees. John W. West was an Eastern Cherokee. Bluford West was a Western Cherokee. But in disregard of that provision of the treaty limiting the authority of the commission to the Western Cherokees, this award was made. In my judgment, if it is to be adjudicated at all it ought to be referred to the Court of Claims and not settled in this way.

Mr. McCUMBER. Mr. President, I desire to call the attention of the Chair to the fact that this appropriation is not to be paid out of Government funds, but out of funds of the Cherokee Nation. There seems to be a difference of opinion between the Senator from Oklahoma and the department. A treaty was made under which the Cherokee Nation settled their claims against the United States. That treaty required the United States to pay a certain sum of money to the Cherokee Nation. Upon an investigation it has been shown to the satisfaction of the department that John W. West was a member of that tribe and that he has never had his proportionate share. He has since died, and this is a claim on the part of the representatives of John W. West.

The claim is based, first, upon a treaty made with the United States, and, second, the claim is against the Cherokee Nation itself. The Cherokee Nation received, I think, over $4,000,000 from the United States for the benefit of all their members. It has been established that John W. West was a member of that nation and entitled to consideration.

So, I think, Mr. President, under the two points the amendment is not subject to the point of order.

The PRESIDENT pro tempore. The Chair observes that the language of the amendment is "in full payment of the award made by the commission appointed pursuant to the authority contained in the seventh article of the treaty with the Cherokees of August 6, 1846," and, furthermore, takes note of the point the Senator from North Dakota has made that this payment is to be made out of the Indian funds and not out of the funds in the Treasury. Previous presiding officers have on more than one occasion decided that that fact takes it out of the provisions of the rule. For those two reasons the Chair overrules the point of order.

Mr. GORE. Mr. President, this claim does not come within and this party does not come within the Indians who are entitled to be paid from the $4,000,000 appropriation. This is an award for a salt springs which arose in 1841. The springs belonged to Bluford West. Representatives of the Government were sent to appraise the property taken from Bluford West, and the claim was settled in full, I think, during the forties, Bluford West being a Western Cherokee. The treaty between the Cherokees and the Government authorized the commission to adjudicate the claims on the part of the Western Cherokees against the Government. John W. West was an Eastern Cherokee, and, as I remember, did not file this claim during his lifetime, although he lived, I think, until 1868. Now his descendants have trumped up this claim against the Cherokee Tribe, notwithstanding the property taken was paid for in full long ago.

It is simply one of those ancient, stale, undeserving claims, in my judgment, which the Senate is frequently called on to pay, and it ought not in good conscience and in justice to permit this claim to go through at this time. I had hoped that this practice had reached its end, and I hope that it is approaching its end.

I ask the Senate to reject the amendment and strike this claim from the bill.

Mr. CURTIS. Mr. President, I hope the first suggestion made by the Senator will be agreed to, to send this claim to the Court of Claims. I think that should be done.

I wish to state that this claim, as has been suggested by the Senator from Oklahoma and the Senator from North Dakota, has been pending a long while. It was investigated by a subcommittee very thoroughly, all sides were heard, and a favorable report was made. I was chairman of the subcommittee and came to the conclusion that the heirs of these people were entitled to be paid.

The Senator from Oklahoma made a statement in reference to the claim. I thought perhaps all the information had not been secured by the subcommittee of which I was chairman, and I asked that the bill be referred to another subcommittee. That subcommittee, after careful investigation and, I understand, without following the report that had been made by the subcommittee of which I was chairman, found that this was a just claim.

But in view of the controversy and in view of the fact that the attorney for the Cherokees still contends that this is not a lawful claim, and in view of the contention made by the Senator from Oklahoma, I think the best course to take with this claim would be to send it to the Court of Claims, and then it could be properly settled and there would be no question about the matter when it was settled by the Court of Claims.

Mr. McCUMBER. Let me ask the Senator a question: Has not that very question been investigated by a commission specially appointed to ascertain the facts, and was not their report made showing that the heirs of John W. West are entitled to this payment?

Mr. CURTIS. The claim was, as I recollect it, investigated, and it was the conclusion reached by both the subcommittees that the heirs of John W. West were entitled to the payment, but the records also show, it is my recollection, as stated by the Senator from Oklahoma, that another party was paid, and he was supposed to be paid in full, but that party was not an heir of John W. West.

Mr. STONE. Did he get paid?

Mr. CURTIS. The heirs of John W. West have not been paid, if he is entitled to the payment. That is why I say, in view of what has been stated by the Senator from Oklahoma and the contention made by the attorney for the Cherokees, I think this question should go to the Court of Claims and let them settle it and see whether or not this payment should be made.

Mr. STONE. I understand there are two Wests here, one from the West and the other from the East, and that the western West was paid. Is that correct?

Mr. CURTIS. The records, as I recollect it, although it has been some time since I investigated the case, show that these Wests were brothers—or, anyway, they were relatives—and they were partners in this property, but a settlement was made on the basis that they were not partners, and the heirs of the other West were paid but not of this one. That is my recollection. It has been some years since I examined this claim, and I may be mistaken about that.

Mr. STONE. The western West was paid?

Mr. CURTIS. I think this was also a western West.

Mr. STONE. Was he paid in full, and now the eastern West comes in and says he is entitled to be paid? Has the Senator from Kansas any information as to whether there is a southern West or a northern West?

Mr. CURTIS. No; but I think this man was a western West instead of an eastern West. I think the record will bear out that statement.

The PRESIDENT pro tempore. In announcing his decision on the point of order the Chair meant to add the fact that the amendment recites that this award has three times been approved by the Secretary of the Interior. The award was approved, it was reaffirmed, and again reaffirmed. The Chair overrules the point of order, and the question is upon agreeing to the amendment.

Mr. McCUMBER. I wish to to ask the Senator from Kansas if the Dawes Commission did not investigate this question and make its report to the Secretary of the Interior? The report here shows that a commission passed upon it, and I ask if that was the Dawes Commission?

Mr. CURTIS. I do not think so. I think that was a commission appointed by the Secretary of the Interior before the Dawes Commission was created. As I said a moment ago, it has been so long since I examined the papers in the case that I have really forgotten the exact dates.

Mr. GORE. The commission that investigated this claim was some years prior to the Dawes Commission—I think perhaps 10 years.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. McCUMBER. Mr. President, before we have a vote upon the amendment I wish to say that I can not understand what the real objection to this claim is. The claim is based upon an assumption on the part of Senators that certain facts exist. That question has been investigated, as is already shown in the argument, three times—once by a commission and twice by subcommittees appointed by the Committee on Indian Affairs. Each time the report has been that the heirs of John W. West were entitled to be recognized as having a claim to their proportionate sum of that obtained by the Cherokee Nation from the United States.

It was first investigated, as the Senator from Oklahoma says, about 10 years prior to the creation of the Dawes Commission. It was investigated, then, at a time when the facts were fresh in the minds of those who knew about the case.

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Oklahoma?

Mr. McCUMBER. I yield.

Mr. GORE. I should like to set the Senator straight on that point. I think this claim accrued in 1841 or 1842. Bluford West was, I think, settled with about 1845 or 1846. John West, I think, died in 1868, and it is my recollection that he never presented any claim for payment and had never pretended to be entitled to any claim for payment. That was in 1868. This commission, as I remember, was appointed in 1882 or 1883, about 40 years after the claim accrued, if it did accrue, and about 36 years after this treaty was made.

The Senator from North Dakota seems to be under a misapprehension. This has no relation on earth to the claims that were to be liquidated by the $4,000,000 appropriation. Certain salt springs were taken in 1841 or 1842. The springs were owned by Bluford West. Representatives of the Government were sent to the property immediately after Bluford West's death. A detailed report was made setting out the particulars of the various forms of property owned by Bluford West, and on that report Bluford West was settled with.

I wish to impress this fact on the mind of the Senator: The treaty of 1846 provided for the creation of a commission to consider claims on the part of the Western Cherokees, expressly stating Western Cherokees. The commission had no authority to consider claims on the part of Eastern Cherokees.

It is true that John West and Bluford West were brothers. Senators unfamiliar with the history of the Indians there may wonder why one was an Eastern and one a Western Cherokee. That point turned on the date of their removal to the old Indian Territory. Those who went prior to a certain date were Western Cherokees and those who went subsequent to that date were Eastern Cherokees. Bluford West went prior to that date and became impressed with the character of a Western Cherokee. John W. West went subsequent to that date and therefore became an Eastern Cherokee.

This matter slumbered for some 30 or 40 years before it was resurrected and pressed as a righteous claim against the Government. I have been just informed by the Senator from West Virginia that when the report, the last report, I think, was made, no recommendation was made as to whether it should be paid or not. In my judgment it ought not to be paid. Certainly it ought not to be paid until passed on by the Court of Claims. I hope it will be rejected.

Mr. McCUMBER. About how many commissions does the Senator want to pass on these claims? It has been investigated five or six different times and every investigation has brought forth the same result.

Why send it to the Committee on Claims? Will it receive any better investigation before that committee? The department has investigated it. A commission has been sent out to investigate it. The department would not have recommended that it should be paid out of the tribal fund, out of the fund that was realized by the Western Cherokees, unless the department had been satisfied that it was a claim justly chargeable to that account.

We can, of course, strike this item out of the Indian appropriation bill. We can send it still to another committee to investigate, but when is the investigation to be stopped? It is properly a claim against Indian property, if it is a claim at all. It is therefore a claim that should be under the jurisdiction of the Interior Department and not a claim that should go to the Committee on Claims.

Mr. LODGE. The Court of Claims?

Mr. McCUMBER. These Indian claims are never referred to that committee or to the Court of Claims. I do not care whether it is the Committee on Claims or the Court of Claims, it has been decided by committees that have investigated it over and over again. The department has investigated it and the department has declared, through the Secretary of the Interior, every time it has been written to, that this is a just claim and that this is the form of an amendment that ought to be drawn to pay the claim. The fact that it has been delayed by Congress for 40 years or 80 years ought not to make any difference. If it is a just claim it ought to be paid.

The Senator from Oklahoma gives his opinion that the claim of John W. West is not a proper claim. There is then the opinion of the Senator from Oklahoma as against the opinion of at least four separate investigations upon the same subject and the conclusion to the contrary. If the simple statement of a Senator that he thinks a claim of this kind ought not to be paid should override every commission's report and the careful investigation made by the Secretary of the Interior, of course, we would get nothing upon these Indian bills whatever.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The Secretary continued the reading of the bill.

The next amendment was, on page 40, after line 10, to strike out:

The sum of $300,000, to be expended in the discretion of the Secretary of the Interior, under rules and regulations to be prescribed by him, in aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations in Oklahoma, during the fiscal year ending June 30, 1914: *Provided*, That this appropriation shall not be subject to the limitation in section 1 of this act limiting the expenditure of money to educate children of less than one-fourth Indian blood.

The amendment was agreed to.

The next amendment was, on page 41, after line 19, to insert:

For the support, continuance, and maintenance of the Cherokee Orphan Training School, near Tahlequah, Okla., for the orphan Indian children of the Five Civilized Tribes belonging to the restricted class, to be conducted as an industrial school under the direction of the Secretary of the Interior, $25,000; and the principal chief of the Cherokee Nation is authorized to sell and convey said property, including the 40 acres of land appurtenant thereto and all buildings thereon, to the United States for the sum of $5,000, and the additional sum of $5,000 is hereby appropriated for said purchase.

The amendment was agreed to.

The next amendment was, on page 42, after line 5, to insert:

The sum of $300,000, to be expended in the discretion of the Secretary of the Interior, under rules and regulations to be prescribed by him, in aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations in Oklahoma, during the fiscal year ending June 30, 1914: *Provided*, That this appropriation shall not be subject to the limitation in section 1 of this act limiting the expenditure of money to educate children of less than one-fourth Indian blood.

The amendment was agreed to.

The next amendment was, on page 42, after line 14, to insert:

That the Secretary of the Interior be, and he is hereby, authorized and directed to forthwith make a per capita payment of $200 from the tribal trust funds of the Seminole Indians to each individual officially enrolled as a member of the said tribe, to relieve the distressed condition at present existing among the allottees of that tribe, said payment to be made at Wewoka, Okla.: *Provided*, That amounts of all delinquent taxes and penalties properly assessed against the lands of each Seminole allottee under the laws of the State of Oklahoma and remain-

ing unpaid shall be ascertained and paid under the direction of the Secretary of the Interior in each and every case out of the distributive share to be paid to each enrolled member of the tribe under the provisions of this act.

The amendment was agreed to.

The next amendment was, on page 43, after line 3, to insert:

That the Secretary of the Interior is hereby authorized to make a per capita payment to the Choctaws and Chickasaws entitled thereto of $100 each, and to the Cherokees of $15 each, out of the tribal funds now on hand.

Mr. LODGE. Mr. President, I desire to make a point of order against that amendment. It proposes to change existing law. The acts of Congress and agreements with the Indians provide that the moneys belonging to the Choctaws and Chickasaws shall be distributed to the members of the tribes or their heirs when the rolls are completed and all allotments made and surplus lands sold. (Sec. 14, act of July 1, 1902, 32 Stats., 642.)

The amendment provides for a payment of $100 per capita to each Choctaw and Chickasaw now enrolled and $15 to each Cherokee now enrolled.

Our rule, of course, is not the rule of the other House in regard to the changing of any existing law, and the change of existing law which this amendment proposes to make fixes its character as general legislation. I do not care to delay the bill or the Senate. I might go on further to show that it would also eventuate in a charge on the Treasury, but that is not necessary. It is clearly, I think, general legislation.

Mr. OWEN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Massachusetts yield to the Senator from Oklahoma?

Mr. LODGE. I do.

Mr. OWEN. Will the Senator from Massachusetts read the terms of the existing law?

Mr. LODGE. The acts of Congress and agreements with the Indian tribes provides that the moneys belonging to the Choctaws and Chickasaws shall be distributed to the members of the tribes or their heirs when the rolls are completed and all allotments made and surplus lands sold. The amendment provides for the payment of $100 per capita to each Choctaw and Chickasaw now enrolled, and $15 to each Cherokee now enrolled.

In the case of the Seminoles, which we have just passed, the roll was complete. This roll is admittedly not completed. Therefore, it seems to me, the amendment clearly proposes general legislation.

Mr. OWEN. I should like to ask the Senator from Massachusetts a question. Upon what authority does he state that these rolls are not completed?

Mr. LODGE. I state that on the authority of the report of the Secretary of the Interior. There are now upon the rolls of the Choctaws and Chickasaws 27,021 persons, exclusive of freedmen, entitled to participate in the property of the tribes. The payment proposed would aggregate $2,702,100, and there is now to the credit of the two tribes and available $4,444,297. So that the proposed payment would take one-half of the available funds now in the Treasury to the credit of these two tribes.

In a letter of the Secretary of the Interior, dated April 22, 1912, addressed to the Senate Committee on Indian Affairs, it is stated that there are off the rolls of the Choctaws and Chickasaws four classes of persons whose cases should be considered before the affairs of those two tribes are closed up, which classes are as follows:

1. Noncompetent cases, one person to a case, 800.

This class includes full-blood Indians, minor orphans, insane, and so forth.

2. Delinquent cases, due to administrative delay, 52.

3. Ten Mississippi Choctaw cases.

4. One thousand seven hundred and twenty-four cases, averaging three persons to a case, that were imperfectly adjudicated.

There are now approximately 5,000 Indians recognized by the department to have equitable claim to share in the property of the Choctaws and Chickasaws.

That letter of the Secretary of the Interior is my authority for saying that the rolls are not complete.

Mr. OWEN. I will state, Mr. President, that the Secretary of the Interior has not made any such declaration.

Mr. LODGE. That letter was addressed——

Mr. OWEN. I challenge the Senator to put it in the RECORD.

Mr. LODGE. The letter of the Secretary of the Interior is dated April 22, 1912, and addressed to the Senate Committee on Indian Affairs.

Mr. OWEN. These rolls, Mr. President, were closed by an act of Congress five years ago. It has now been 20 long years since Henry L. Dawes, previously a Senator from Massachusetts, was sent to Oklahoma for the purpose of winding up the affairs of the Five Civilized Tribes. In 1896, three years after the Dawes Commission went to Oklahoma, Congress directed these rolls to be made. The rolls were made. Individuals who were on the tribal rolls were recognized, but there were thousands of people remotely of Indian blood who, because they were part Indian, some of them having only a thirty-second part Indian blood, some having only a sixty-fourth part Indian blood, some of them having only the pretense of Indian blood, set up a claim to be admitted into the Choctaw and Chickasaw Tribes, where citizenship is worth approximately $10,000—being variously estimated from $6,000 to $10,000.

The Dawes Commission struggled with that problem during 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, and 1906, year after year allowing appeal upon top of appeal, until, finally, Congress, seeming weary of that everlasting contention that anybody who could claim to have remotely a trace of Indian blood had a right to a distributive share in this estate, by act of Congress closed these rolls on the 4th of March, 1907. They had spent 11 long and tedious years on this problem. The Interior Department has only directly recommended that 52 persons be put on the roll. A clerk named Howell, of the department, has suggested various classes who might be considered, and has recommended that they should be given a new hearing, a rehearing.

The PRESIDENT pro tempore. Will the Senator read the terms to which he alludes in the statute of 1907?

Mr. OWEN. I will read that into the RECORD at the proper moment.

It therefore is a roll concluded by act of Congress. The Interior Department has resisted reopening those rolls ever since that act of Congress was passed, but has suggested that this small number of 52 persons should be put upon the roll. There are probably two or three hundred Indians who ought to be put on that roll who were left off by inadvertence; but the Choctaw and Chickasaw estate, by the estimate of the Choctaw and Chickasaw Tribes, was put at a value of $60,000,000. Mr. George Wright, the United States Commissioner to the Five Civilized Tribes, put that tribal property of the Choctaws and Chickasaws yet undistributed at approximately $36,000,000. The passage of this item will in nowise affect the claim of any of the people who might have any possibility of asserting a claim.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Kansas?

Mr. OWEN. I do.

Mr. CURTIS. Does the Senator from Oklahoma mean that the proceeds from the sale of the surplus of the coal lands, of the coal rights, and of the reserved timber lands would be ample to meet all the claims against the Government and pay each individual his share?

Mr. OWEN. Oh, yes; they will yield more than a sufficient amount. Even the attorney representing these claimants came before the Committee on Indian Affairs and stated that a payment of a hundred dollars per capita would not in any way affect his clients; and yet he now comes and makes this appeal through the Senator from Massachusetts, I suppose, urging a point of order against this amendment simply in order to show his activity and his zeal in behalf of his clients, interfering with the rights of these people, the Choctaws and the Chickasaws, who promptly agreed with the United States Government in 1897, 15 years ago. The Choctaw and Chickasaw authorities agreed with the United States as humble wards of the Government, yielding to the superior power of the United States, and made an agreement to divide their lands, with the explicit pledge in the faith of that agreement that the lands which were not allotted should be sold and the proceeds distributed to them.

Those people since that time have died by thousands. In the ordinary process of nature, 15 years is a long time for a large community. Within 15 years the annual death rate of 20 to the thousand on 30,000 people would make 1,500 people a year, and in 10 years would amount to 15,000 people. Those people have died and never received the fulfillment of the promise of the Government of the United States. Now here, after all these long years, an attempt is made to appeal to a point of order to prevent the partial carrying out of this honorable obligation of the United States to the Choctaws and the Chickasaws. I hope the Senator will not persist in the point of order.

Mr. LODGE. Mr. President, the department recognizes by the list I have just read—and it is found in the report of the Department of the Interior—that there are now approximately 5,000 Indians who are entitled to claim a share of the property of the Choctaws and Chickasaws. It is quite true that the department could not put those people on the rolls because the jurisdiction of the department terminated by operation of law

on March 4, 1907, but prior to that time the department recommended an extension of the time in which to wind up the affairs of those tribes. The Senator from Minnesota [Mr. CLAPP], at that time chairman of the Committee on Indian Affairs, endeavored to secure that extension. The estimate of the commissioner to the Five Civilized Tribes is that there are only $23,500,000 yet to be received from the sale of the tribal property, and the estimate of the Senator from Oklahoma of the value of their share is much larger than I had supposed it was.

Mr. OWEN. I will suggest to the Senator from Massachusetts that he has omitted the coal and asphalt lands from the estimate of $23,500,000.

Mr. LODGE. But it is valued at $5,000 or less, and it would involve, on the amount reported by the commissioners, a charge upon the Treasury in addition. It seems to me, Mr. President, that the amendment clearly proposes to change existing law. I do not wish to delay the bill any further. I make the point of order.

Mr. TOWNSEND. Mr. President, I can not throw any light on the point of order particularly, but I am interested in this matter, because it is a type of conditions that exist in more than one of the Indian tribes. I understand, of course, that when these rolls were closed, as has been suggested, there were certain Indians and their very active counsel who were necessarily interested in having the enrollment as small as possible, because, by lessening the number, the amount that each Indian would receive would be greater. I am satisfied, from much correspondence that has come to me and from some little investigation I myself have made, that there are thousands of the Indian wards of this Government who have not been enrolled, but to whom the Government is quite as much indebted and quite as much under obligation for their care and support and the fair treatment which should be accorded them as it is to those Indians who have been enrolled.

I think that we can well afford now to stop and consider just exactly what the true situation is, because I here predict that if this Government shall distribute the money and property which belong to the Indians among less than the whole number there will hereafter be presented claims against the Government for those who are left off the rolls, and the United States will be obliged to pay them. I am also confident that some of the same attorneys who have greatly profited by successful efforts to close rolls in the past, and who are now anxious to distribute Indian funds among those enrolled, will enlist their efforts to recover against the United States, and for those Indians who are not now included in the enrollment, the money which can be easily proven to be theirs. There will be no escaping its obligations in the case, no matter if we have closed the rolls and have left them out, because this property belongs to them.

I am greatly interested in the matter, for while I am loath to make charges, I think there has been fraud practiced on our Indian wards, and if the point of order is not sustained, as I hope it will be, I shall feel obliged to vote against the amendment, because I do not believe it is just or right. If we have no regard for our duties to the Indians, we should regard the interests of the United States and protect them against damages hereafter.

Mr. LODGE. Mr. President, I have sent for and obtained the report of the Department of the Interior, and merely to show the view of the department as to increasing the roll I will read:

It is not claimed—

Referring to their inability to act under the law of 1907—

It is not claimed that the action of the department in refusing to consider such cases was erroneous but that the law was unfair and unjust and that, in the administration of this law, further injustice resulted because (1) the tribal rolls were, according to the reports of the Commissioner to the Five Civilized Tribes, incomplete and otherwise defective; (2) the commission did not index and consult all rolls in its possession; and (3) certain rolls were not transmitted to the commission or its successor until after the time fixed by law for the termination of the enrollment work.

That is, the department holds that the rolls have never been completed, and to pay the amounts proposed without completing them would involve a change of existing law.

Mr. OWEN. The reference there is to the particular cases which did not reach the department in time, and they comprise the 52 cases to which I have referred. They are the only ones that really were not properly enrolled.

Mr. LODGE. The department says that their estimate of those who are not properly enrolled, deducting the 51 cases, is 2,675.

Mr. OWEN. If the Senator will read the latter part of the letter he will find that the department declines to make any recommendation with regard to opening these rolls. The department has opposed the opening of these rolls for five years. It has said the 52 names, to which I have referred, should go on the rolls and has thought that those reported by Mr. Pollock ought to go on, but it has not sent as yet to the Congress the direct recommendation that they should be put on, so far as I am informed.

The PRESIDENT pro tempore. It must be manifest to the Senate that in a controversy of this kind, with conflicting statements, it is quite impossible for the Chair to determine the exact status of this case. For that reason the Chair, under the privilege accorded to the Chair by the rules, will submit the question to the Senate. Is the amendment in order?

Mr. CURTIS. I think, Mr. President, unless the Chair desires to submit the question to the Senate, that the point of order should be sustained, for the reason that the property has not been disposed of, as shown by the debate, and this settlement is not to be made until the property of the tribe is disposed of. It is admitted that, under the law, there remain four hundred and some odd thousand acres of coal lands undisposed of and large tracts of timber lands undisposed of; and, of course, this is a distribution before it is authorized under existing laws. I will say to the Senate, however, that I think this small payment would not at all affect the rights of others claiming rights, because these Indians have such a large and valuable property.

The PRESIDENT pro tempore. The question will be submitted to the Senate.

Mr. OWEN. Mr. President, before the matter is submitted to the Senate I wish to call the attention of the Senate—or perhaps it will be well to let the matter be submitted to the Senate, and then I will make the comment—explaining the letter which has apparently misled the Senator from Massachusetts.

Mr. KENYON. I suggest the absence of a quorum, Mr. President.

The PRESIDENT pro tempore. The Senator from Iowa suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bacon	Cullom	Lea	Root
Borah	Cummins	Lippitt	Sheppard
Bourne	Curtis	Lodge	Smith, Ariz.
Bradley	Dixon	McCumber	Smith, Mich.
Brady	du Pont	Myers	Smith, S. C.
Brandegee	Fall	Nelson	Smoot
Briggs	Fletcher	Newlands	Sutherland
Bryan	Gallinger	O'Gorman	Swanson
Burnham	Gamble	Oliver	Thomas
Burton	Gronna	Owen	Thornton
Catron	Johnson, Me.	Page	Tillman
Chamberlain	Johnston, Ala.	Penrose	Townsend
Clapp	Jones	Percy	Watson
Clark, Wyo.	Kavanaugh	Perkins	Webb
Crane	Kenyon	Pittman	Williams
Crawford	La Follette	Richardson	Works

Mr. SMOOT. I desire to state that the senior Senator from Rhode Island [Mr. WETMORE] is detained from the Senate in the Appropriations Committee.

The PRESIDENT pro tempore. On the call of the roll 64 Senators have answered to their names. A quorum of the Senate is present.

Mr. OWEN. Mr. President, the Chair has submitted to the Senate a point of order made by the Senator from Massachusetts [Mr. LODGE] against the per capita payment to the Choctaws and Chickasaws of $100 and $15 per capita to the Cherokees, on the ground that the rolls have not been completed and that there are approximately several thousand citizens who have not yet been enrolled whose rights might be put in jeopardy. The answer to that is that, even if it were true, their rights would not be put in jeopardy, on the ground that there is an undistributed property of approximately $36,000,000 available to the Choctaws and Chickasaws, which would leave a great abundance, amounting to about a thousand dollars per capita to all the citizens, and the payment of a hundred dollars per capita would not preclude any citizen who might be added afterwards, if any there should be.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Oklahoma how would this affect, or would it affect at all, the Mississippi Choctaws?

Mr. OWEN. The Mississippi Choctaws have been enrolled.

Mr. WILLIAMS. Not all of them. A lot of them are now seeking to be enrolled, and a bill is pending in the other House for that purpose. There were many of them in Mississippi who seemed to think it was some white man's scheme, which they did not understand, and so they failed to come up to be enrolled.

Mr. OWEN. The undistributed property of the Choctaw and Chickasaw Nations would be abundantly sufficient to provide for any claimants who have any possibility of being put on the rolls.

Mr. WILLIAMS. The Senator does not think this would affect them?

Mr. OWEN. It could not affect them injuriously in any way.

The Senator from Massachusetts has been impressed with the letter of the Secretary of the Interior of April 22, 1912, and he has said that there were 2,675 citizens, as set forth on page 12 of the document from which the Senator read, left off of the rolls. I asked his authority for stating that they were left off the rolls, and the Senator read that letter. I call his attention now to the fact that the Secretary does not say that they ought to be on the rolls; he does not say they were wrongfully left off the rolls. What he does say is, that there were that number of people in four different classes of claimants. That is all he does say, and in closing his letter——

Mr. LODGE. If the Senator will excuse me, the Secretary says that they "appear by reason of their descent and other facts to have been prima facie entitled to enrollment."

Mr. OWEN. From what page is the Senator reading?

Mr. LODGE. Page 12.

Mr. OWEN. I call the attention of the Senator from Massachusetts to this particularly, reading from that same paragraph:

> The total number of cases of this class where the applicants may appear by reason of their descent and other facts to have been prima facie entitled to enrollment can be ascertained from the "census cards" in the office of the Commissioner to the Five Civilized Tribes, and will probably not exceed 140.

Is that the paragraph from which the Senator read?

Mr. LODGE. Yes; that is true.

Mr. OWEN. That is a very different proposition.

Mr. LODGE. Then it goes on——

Mr. OWEN. Then it goes on to enumerate the individuals who might be found, under four classes of claimants, not entitled. At the close of the letter the Assistant Secretary says this—I call the attention of the Senator to the last 8 or 10 lines on page 13:

> The transmission of a copy of this informal paper at this time is not to be taken as a recommendation by the department that legislation be enacted in that form or at all. The purpose of this communication is simply to supply you with such information as the files of the department contain on the subject. It may not be inappropriate to call your attention to the fact that substantially all the information herein has been furnished heretofore, except perhaps that the estimates of the number of cases falling within the several classes are now somewhat more definite.

In other words, the Secretary does not say that these people have been improperly left off. Prima facie there are 140 of them. I call the attention of the Senator to the small number which I thought ought to go on; so these are the only claimants. This whole volume has been printed at the expense of the committee and, as far as I know, without any order of the committee itself. I do not know how it came to be printed. I should like to ask by what authority it was printed?

Mr. GAMBLE. Mr. President, in reply to the interrogation made by the Senator from Oklahoma I will state that the publication referred to was printed at the request of the senior Senator from North Dakota.

Mr. OWEN. It is a very large volume, and a very expensive volume, and I think a large part of it is quite unnecessary for public purposes.

Mr. GAMBLE. It was printed, as I understand, in connection with the bill introduced by the senior Senator from North Dakota.

Mr. OWEN. I should like now to read into the RECORD the act of Congress which I failed to read in the first instance, closing the roll. It is an act passed in 1906, found in volume 34 of the Statutes at Large, part 1, at page 138:

> *Provided*, That the rolls of the tribes affected by this act shall be fully completed on or before the 4th day of March, 1907, and the Secretary of the Interior shall have no jurisdiction to approve the enrollment of any person after said date.

That act was passed on April 26, 1906, giving nearly a full year's notice of the closing of these rolls, after they had been under consideration for 11 years.

The PRESIDENT pro tempore. The question is, Is the amendment in order on the pending bill? [Putting the question.] By the sound the noes appear to have it.

Mr. OWEN. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As he is absent from the Chamber, I will withhold my vote.

Mr. WILLIAMS (when his name was called). Transferring my general pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Maryland [Mr. SMITH], I desire to vote. I vote "yea."

The roll call was concluded.

Mr. BRADLEY (after having voted in the negative). I ask whether the Senator from Indiana [Mr. KERN] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. BRADLEY. I withdraw my vote.

Mr. JONES. I desire to announce that my colleague [Mr. POINDEXTER] is detained from the Chamber on important business.

Mr. BRADLEY. I transfer my pair with the Senator from Indiana [Mr. KERN] to the Senator from Wisconsin [Mr. STEPHENSON] and vote. I vote "nay."

The result was announced—yeas 34, nays 37, as follows:

YEAS—34.

Bacon	Johnson, Me.	Percy	Swanson
Chamberlain	Kavanaugh	Pittman	Thomas
Clark, Wyo.	Lea	Pomerene	Thornton
Clarke, Ark.	McCumber	Sheppard	Tillman
Dixon	Martin, Va.	Shively	Watson
Fall	Myers	Smith, Ariz.	Webb
Foster	O'Gorman	Smith, Ga.	Williams
Gore	Overman	Smith, S. C.	
Gronna	Owen	Stone	

NAYS—37.

Borah	Crane	Kenyon	Root
Bourne	Cullom	La Follette	Smoot
Bradley	Cummins	Lippitt	Sutherland
Brandegee	Curtis	Lodge	Townsend
Briggs	Dillingham	Nelson	Warren
Bristow	Gallinger	Oliver	Wetmore
Brown	Gamble	Page	Works
Burnham	Guggenheim	Penrose	
Burton	Jackson	Perkins	
Catron	Jones	Richardson	

NOT VOTING—24.

Ashurst	Crawford	Johnston, Ala.	Poindexter
Bankhead	Culberson	Kern	Reed
Brady	du Pont	McLean	Simmons
Bryan	Fletcher	Martine, N. J.	Smith, Md.
Chilton	Gardner	Newlands	Smith, Mich.
Clapp	Hitchcock	Paynter	Stephenson

The PRESIDENT pro tempore. It is declared that the amendment is not in order, and the point of order is sustained.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 43, after line 7, to insert:

> For expenses incident to and in connection with collection of rents of unallotted lands and tribal buildings, such amount as may be necessary: *Provided*, That such expenditures shall not exceed in the aggregate 10 per cent of the amount collected.

Mr. CLARK of Wyoming. Mr. President, I hardly understand what that language means. I should like to have the chairman of the committee tell us.

Mr. GAMBLE. There is quite a good deal of land unallotted, and in connection with the leases there is quite a good deal of disbursing to be done. It is proposed, in the leasing of the allotments, to create in this way an administrative fund for the conduct of that particular business. It is recommended by the department.

Mr. CLARK of Wyoming. Mr. President, at the present time these leases are prepared through the Department of the Interior, by the authorized agents and employees of that department. It occurs to me that this is an indirect way of making an additional appropriation for the working force of the Indian Bureau.

Mr. GAMBLE. No; I think the Senator is mistaken in that, because the money is collected from these particular leases and is paid to the administrative officers who have to do particularly with this matter.

Mr. CLARK of Wyoming. Are they not already on the pay roll of the Government?

Mr. GAMBLE. No; I think not.

Mr. CLARK of Wyoming. Then who executes these leases on the part of the Government and the Indians? By whom is this work of collection done for which it is sought to charge 10 per cent of the amount collected?

Mr. GAMBLE. It is done by the superintendent, and the leases are executed by the Commissioner of the Five Civilized Tribes.

Mr. CLARK of Wyoming. That is it exactly. The collection is made by the superintendent, who is a salaried officer of the United States. The leases are made by the Commissioner of the Five Civilized Tribes, who is also an officer of the United States and paid by the United States. Now it is sought to charge these very lands of these Indian tribes with a 10 per cent collection fee for his services, as I understand.

Mr. GAMBLE. As I understand, Mr. President, these lessees are at times far removed from the superintendent's office. It is necessary that employees go out, at some expense, to look after the details of the leases. This amendment simply provides for expenses incident to and in connection with the collection of the rents. It is not to create any particular fund. It is only to pay for the actual disbursements in connection with that particular business.

Mr. CLARK of Wyoming. As it reads, Mr. President, this is an absolute charge for the collection of lease money, for the collection of rents. They certainly do not have to go out to the residences of the lessees in order to collect the rents. There must be a provision somewhere that these rents shall be paid; and it seems to me that even if there were not, 10 per cent is an exorbitant commission to pay for the collection of lease money. I am asking for information.

Mr. GAMBLE. This 10 per cent is simply a limitation. Of course, they are to be charged only for the actual expenses. If the Senator feels disposed to object to it——

Mr. CLARK of Wyoming. I do not wish to object to it, but I want some information about it.

Mr. GAMBLE. There was a full hearing before the committee, and it was recommended by the department, and was especially recommended by the Committee on Indian Affairs. I will read the substance of the recommendation.

Mr. CLARK of Wyoming. I can understand that it was recommended by the department, but I want to say to the Senator that I do not always follow the recommendation of a department or a bureau of a department as to the expenses that are to be incurred and charged.

Mr. OWEN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wyoming yield to the Senator from Oklahoma?

Mr. CLARK of Wyoming. I do. I think perhaps the Senator from Oklahoma can give the information I want.

Mr. OWEN. I think I can give the Senator the information he desires. If it were not for this provision, the expense of collecting these rentals would come out of the Federal Treasury. The Federal Government agreed to allot the lands, but did not feel bound to pay out of the Federal Treasury the expenses outside of the allotting of the lands. In the handling of the unallotted lands the Government did not feel charged with the duty of taking the expenses involved out of the Federal Treasury. For that reason this provision permits the expense of collecting these rents to come out of the rents themselves. That is the purpose of it.

Mr. CLARK of Wyoming. That is a better explanation. I wanted to understand about it, because it seemed to me a rather extortionate fee for the Government as a real-estate agent to charge these Indians.

Mr. TOWNSEND. Mr. President, may I ask the Senator from Oklahoma if he is quite clear that the language used there necessarily makes this a payment out of the Indian fund?

Mr. OWEN. The language is:

For expenses incident to and in connection with collection of rents of unallotted lands and tribal buildings, such amount as may be necessary: *Provided*, That such expenditures shall not exceed in the aggregate 10 per cent of the amount collected.

It is intended by the department—that is their practice—to take it out of the rents collected, so as not to charge it on the Federal Treasury, but to charge it against the lands themselves.

Mr. TOWNSEND. I submit that the language used does not say that. We are making appropriations out of the Federal Treasury, unless it is explicitly stated that the money shall come out of the Indian fund. We say that for meeting those expenses an amount not exceeding a certain limit, which is 10 per cent, shall be collected.

Mr. OWEN. But there is no money at all appropriated here. It only provides such an amount as may be necessary out of the amount collected. I do not think it could bear any other construction than that it should be a part of the amount collected. If the Senator thinks so, however, he might suggest an amendment which will perfect it in that respect.

Mr. TOWNSEND. I will do that later, if I may have permission.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 43, after line 12, to insert:

That where any cemetery now exists within the lands of the Five Civilized Tribes, said land within said cemetery, together with the land adjoining the same, where necessary, not exceeding 20 acres in the aggregate to any one cemetery, shall be transferred by the Secretary of the Interior to the proper party, association, or corporation, or to the county commissioners of the State of Oklahoma, for cemetery purposes only, under such terms, conditions, and regulations as he may prescribe: *Provided*, That application to purchase the same for such purpose is made within 60 days from the date of the approval of this act.

Mr. GAMBLE. Mr. President, I move to strike out the proviso after the word "prescribe" in line 21—lines 21, 22, and 23.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 43, in lines 21, 22, and 23, it is proposed to strike out the proviso, which reads as follows:

Provided, That application to purchase the same for such purpose is made within 60 days from the date of the approval of this act.

Mr. GAMBLE. After the word "prescribe" there should be a period.

The PRESIDENT pro tempore. Certainly.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. TOWNSEND. Mr. President, I wish to offer an amendment to the amendment of the committee, in line 10, page 43, after the word "necessary" and before the colon, to insert "which amount shall be paid out of the tribal fund."

The PRESIDENT pro tempore. Without objection, the vote whereby the amendment was agreed to will be reconsidered. The Senator from Michigan offers an amendment to the amendment, which will be stated.

The SECRETARY. On page 43, after the word "necessary" and before the colon, it is proposed to insert a comma and the following:

Which amount shall be paid out of the tribal fund.

Mr. TOWNSEND. It has been suggested that that should come after the word "collected," in line 12.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 43, line 12, after the word "collected" and before the period, it is proposed to insert a comma and the following:

Which amount shall be paid out of the tribal fund.

Mr. OWEN. I suggest that if it were worded "out of such tribal fund," it would keep it within the regular practice.

Mr. TOWNSEND. Very well; I accept that change.

The amendment, as modified, to the amendment of the committee was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 43, after line 23, to insert:

For payment of salaries of employees and other expenses of advertisement and sale in connection with the disposition of the unallotted lands and other tribal property belonging to any of the Five Civilized Tribes, to be paid from the proceeds of such sales when authorized by the Secretary of the Interior, as provided by the act approved March 3, 1911, not exceeding $40,000, reimbursable from proceeds of sale.

The amendment was agreed to.

Mr. GAMBLE. Mr. President, I move to strike out lines 7 to 14, inclusive, on page 44. It is a duplication in the printing of the bill that has already been passed upon.

The PRESIDENT pro tempore. The Senator from South Dakota moves to disagree to the amendment on page 44, lines 7 to 14, both inclusive.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 45, after line 9, to insert:

For settling land suits in eastern Oklahoma, $10,000, reimbursable from fees which may be imposed by the Secretary of the Interior in relation thereto: *Provided*, That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to validate by approval any instrument purporting to be a deed of conveyance or contract for title of allotted lands of the Five Civilized Tribes made prior to the removal of restrictions and before January 1, 1912, in the following cases, to wit:

First. When the purchase or contract was made in good faith, and no fraud was practiced, and the Indian allottee was actually paid the reasonable value of the land.

Second. When the purchase or contract was made in good faith and no fraud was practiced, but when the consideration paid was not sufficient to cover the reasonable value of the land conveyed: *Provided*, That in this class of cases the settlement can only be made upon the condition that the Secretary of the Interior be paid for the benefit of the allottee a sum sufficient to make up the reasonable value of such lands: *Provided further*, That the settlement in either case shall be made upon such terms of settlement as the Secretary may deem just, proper, and equitable, and under such rules and regulations as he may prescribe, and upon such settlement suit, if any, instituted at the request of the Secretary of the Interior, shall be dismissed without cost to the defendant.

Mr. LODGE. I make the point of order on that amendment that it is clearly general legislation and contains an appropriation not estimated for.

The PRESIDENT pro tempore. The point of order is sustained.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 46, after line 9, to insert:

That the Secretary of the Interior is hereby authorized to permit the sale or exchange of the restricted land of any Indian of any tribe in Oklahoma and invest all or part of the proceeds of any sale which has been or may be made for the benefit of said Indian and his heirs or legal representatives, the property so secured to be held for the use and benefit of such Indian, subject to the same conditions, limitations, and

restrictions as imposed by law upon the original lands sold or exchanged by such Indian or Indians. Title to the land secured by purchase or exchange shall be taken and held in the name of such Indian: *Provided*, That the provisions of this act shall apply also to the investment of funds of Indians of the class subject to restriction, but who have not been allotted lands and have or may hereafter have moneys in the custody of the United States to their credit.

Mr. KENYON. I make the point of order that this is general legislation attached to an appropriation bill.

The PRESIDENT pro tempore. The point of order is sustained.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, at the top of page 47, to insert:

That hereafter the Commissioner of Indian Affairs is authorized, in his discretion, to withhold any annuities or other payments due to Osage Indian minors, above 6 years of age, whose parents fail, neglect, or refuse to place such minors in some established school for a reasonable portion of each year and to keep such children in regular attendance thereof. The Commissioner of Indian Affairs is authorized to make such rules and regulations as may be necessary to put this provision into force and effect.

The amendment was agreed to.

The next amendment was, on page 47, after line 9, to insert:

That the Secretary of the Interior is hereby authorized to pay out of any funds of the Creek, Cherokee, Choctaw, Chickasaw, and Seminole Nations on deposit in the Treasury of the United States the proportionate cost of street paving and construction of sidewalks abutting on unsold lots belonging to any of said tribes and as may be properly chargeable against said town lots, said payments to be made upon submission of proof to said Secretary of the Interior showing the entire cost of the said street paving and sidewalk construction and that said improvement was duly authorized and undertaken in accordance with law: *Provided*, That the Secretary of the Interior shall be satisfied that the charges made are reasonable and that the lots belonging to the above-mentioned tribes against which the charges were made have been enhanced in value by said improvements to not less than the amount of said charges.

The amendment was agreed to.

The next amendment was, on page 47, after line 24, to insert:

That the Secretary of the Interior be, and he is hereby, authorized to use so much of the funds of the Muskogee or Creek Tribe or Nation of Indians now in the custody of the United States or which may hereafter come into possession of the Government, not otherwise appropriated, as may be necessary for payment to each enrolled member of said tribe or nation who has received an allotment less than $800 in value of such sum as will, together with the amount representing the value of said allotment according to the appraisement thereof by the Commission to the Five Civilized Tribes for purposes of classification and allotment, aggregate $800 in amount; and said payment shall be made by the Secretary of the Interior under such rules and regulations as he may prescribe to the persons entitled thereto or their lawful heirs, and there is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated belonging to the Creek Tribe of Indians, the sum of $10,000, or so much thereof as may be necessary, for the purpose of defraying the expenses of making the payment herein authorized: *Provided*, That the Secretary of the Interior may, in his discretion, withhold the amount due any minor until he shall become of age: *Provided further*, That money due restricted Indians in lieu of allotments shall be subject to supervision and disposition as in the case of funds arising from the sale of lands allotted to Indians of the same class.

Mr. CURTIS. Mr. President, I make a point of order against that amendment on the ground that it is in violation of Rule XVI, paragraph 3, being general legislation. It repeals the act of March 3, 1909, which, if the Chair desires, or if it is contested, I will gladly read.

The act referred to provides that—

The Secretary of the Interior is directed, immediately after July 1, 1909, and prior to December 1, 1909, to pay allottees out of the funds of the Creek Nation the amounts severally due for the equalization of their allotment. In making such payment for the equalization of the Creek allotments $800 shall be taken as the standard value of an allotment: *Provided*, That the payment of such funds for the equalization of allotments shall be a final and conclusive settlement of all claims for the equalization of allotments in the Creek Nation: *And provided further*, That as a condition precedent to any such payment the Creek National Council shall pass an act, in form approved by the Secretary of the Interior, discharging the United States from all claim and demand on this account.

This amendment merely repeals that act.

Mr. GORE. Mr. President, I think the pending amendment is objectionable on other grounds as well, but I should like to ask the Senator from Kansas whether as an amendment to the amendment it would be satisfactory to him, instead of saying "enrolled members" to say "agreement members"? If this is passed, it will involve the Indians in further litigation. I think if we would change that word it would not change the existing status of these Indians.

Mr. CURTIS. I can not agree with the Senator. I think any payment would involve the Government and might make a liability for which the Government is not responsible. I therefore object to any amendment.

The PRESIDENT pro tempore. The point of order is sustained.

The next amendment was, at the top of page 49, to insert:

That the Secretary of the Interior be, and he is hereby, authorized to approve an order for the removal of restrictions upon alienation from the southwest quarter of the southeast quarter of section 17, township 25 north, range 24 east, of the Indian meridian, Oklahoma, the homestead allotment of R. S. Kariho (or Service Kaytahoo), Seneca allottee No. 53, such removal of restrictions to become effective only and simultaneously with the execution of a deed by said allottee to the purchaser after said land has been sold in compliance with the directions of the Secretary of the Interior.

Mr. CURTIS. I make the point of order against this amendment on the ground that it is general legislation on an appropriation bill. I know nothing about the facts in this case; I was not present when the item was put in the bill; but I hope Congress will not return to the old practice of removing restrictions in an appropriation bill.

Mr. GAMBLE. I do not know that I care to make any comments in regard to the objection raised by the Senator from Kansas. This case peculiarly appealed to the Committee on Indian Affairs. It appears that this man is ill, suffering with tubercular trouble. His allotment is in a locality where it is impossible for him to live, and if an exchange could be made and he could go into a milder climate, under the direction of the Secretary of the Interior, his life might be saved. He seems to be a very intelligent, capable man. He was in the Spanish-American War. He is an educated Indian.

Mr. CURTIS. I will ask the chairman of the committee if the amendment is recommended by the department?

Mr. GAMBLE. Yes; it is recommended by the Interior Department. The amendment was submitted by the chairman of the committee at the request of the department.

Mr. CURTIS. In view of the statement of the chairman, I will withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn.

Mr. CURTIS. But I wish to state that I pointed out in 1907 where the restriction had been removed in 14 cases, and in 13 out of the 14 the Indians had been robbed of their rights. I hope, as I said a moment ago, that Congress will not return to the plan of removing restrictions in an appropriation bill. If this is to be looked after by the Secretary of the Interior, I have no objection to the removal of the restriction in this one case.

The amendment was agreed to.

The next amendment was, on page 49, after line 11, to insert:

All contracts, written or verbal, purporting or intended to authorize any person or persons, directly or indirectly, to represent the Creek Nation or any member or members thereof in respect to the payment, distribution, or any other disposition of money or other property of the said nation held by or under the supervision of the United States, shall be absolutely void and incapable of ratification or confirmation unless the consent of the Secretary of the Interior and approval of Congress shall have previously been given in writing to the person claiming thereunder to negotiate such contract, and unless such contract shall be approved as required by section 2103 of the Revised Statutes of the United States, and any person who shall secure or attempt to secure any such contract without the consent of the Secretary of the Interior, or demand or attempt to collect or receive any money payment or any other consideration under any such contract not approved as herein required, shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by fine of not less than $500 or imprisonment for not more than six months, or by both such fine and imprisonment, at the discretion of the court.

Mr. KENYON. I make the point of order that this amendment is general legislation on an appropriation bill.

Mr. GORE. Mr. President, undoubtedly the point of order raised by the Senator from Iowa would be sustained, but I hope the Senator will withdraw it. This simply throws about these Indian tribes and about the individual members of the tribes a protection to which they are entitled. The failure to enact this legislation at this time would expose them to the wiles of certain designing attorneys.

I think this amendment would afford them protection if adopted now. If it should go over until another session, perhaps contracts that may be embarrassing hereafter may be entered into by these Indians.

I feel sure that the amendment is in harmony with the general views entertained by the Senator from Iowa and that it would further the objects which he would desire to accomplish.

Mr. KENYON. My purpose has been along the line of trying to protect the Indian. I have such great confidence in the Senator from Oklahoma that I accept what he says as to this amendment, and I will withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn.

Mr. GORE. I move to amend the amendment by striking out the words "Creek Nation" and inserting "any of the Five Civilized Tribes."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 49, line 14, strike out "Creek Nation" and insert "any of the Five Civilized Tribes."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 50, after line 8, to insert:

That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to approve the assessments, together with maps showing right of way and definite location of proposed drainage ditches and levees made under the laws of the State of Oklahoma upon the allotments of restricted allottees of the Creek Nation in the Verdigris drainage district No. 1, in Wagoner County, Okla.

Mr. LODGE. I think the next two amendments are both a part of this amendment. If I am not mistaken, they ought to go as one amendment. I have no objection to them that I know of, but I think it is all one amendment.

Mr. GAMBLE. It is all one amendment, Mr. President.

The PRESIDENT pro tempore. The next two paragraphs will be read.

The SECRETARY. The committee also report to insert, on page 50, after line 15, the following:

That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to pay amounts assessed against each of said allotments: *Provided*, That said assessment shall not exceed $5 per acre on any allotment or portion thereof, and there is appropriated for said purposes, out of any money in the Treasury not otherwise appropriated, the sum of $20,000, to be immediately available, said sum to be reimbursable from rentals from said allotments, not to exceed 25 per cent of the amount of rents received annually, or from any funds belonging to said allottees, in the discretion of the Secretary of the Interior.

That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to approve such deeds for right of way from said allottees or their heirs as may be necessary to permit the construction and maintenance of said drainage ditches and levees upon the payment of adequate damages therefor.

The amendment was agreed to.

Mr. GAMBLE. I submit the following amendment, to come in after line 10, on page 51. I call the attention of the Senator from North Dakota [Mr. MCCUMBER] to it. It is the loyal Creek claim. There was a misapprehension, if I may be justified in saying so, on the part of the senior Senator from North Dakota as to whether it was made an amendment in the consideration by the Committee on Indian Affairs of the Senate, and, rather than do him any injustice or any discourtesy, I suggested to him that I would myself offer the amendment. It has provoked some discussion on the floor of the Senate heretofore.

The PRESIDENT pro tempore. The amendment submitted by the Senator from South Dakota will be read.

The SECRETARY. On page 51, after line 10, insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $600,000, to be immediately available, the same to be paid and disbursed as herein provided; said amount being the balance and final payment due the loyal Creek Indians on the award made by the Senate on the 16th day of February, 1903, said award being made in pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muskogee, or Creek, Tribe of Indians, and for other purposes, approved March 1, 1901; such payment to be made in accordance with the terms and provisions of said award as the same appears on page 2252 of the CONGRESSIONAL RECORD, volume 36, part 3, Fifty-seventh Congress, second session. The Secretary of the Treasury being hereby authorized and directed to pay, under the direction of the Secretary of the Interior, to the loyal Creek Indians and freedmen named in articles 3 and 4 of the treaty with the Creek Nation of Indians of June 14, 1866, the said sum of $600,000 to be paid to such Indians and freedmen only whose names appear on the list of awards made in their behalf by W. B. Hazen and F. A. Field, as commissioners on behalf of the United States to ascertain the losses of said Indians and freedmen as provided in said articles 3 and 4; and such payments shall be made in proportion of the awards as set out in said list: *Provided*, That said sum shall be accepted by said Indians in full payment and satisfaction of all claim and demand growing out of said loyal Creek claims, and the payment thereof shall be a full release of the Government from any such claim or claims: *Provided, however*, That if any of said loyal Creek Indians or freedmen whose names are on said lists of awards shall have died, then the amount or amounts due such person or persons, respectively, shall be paid to their heirs or legal representatives: *And provided further*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to first withhold from the amount herein appropriated and pay to S. W. Peel, of Fayetteville, Ark., the attorney of said loyal Creeks and freedmen, a sum equal to 10 per cent of the amount herein appropriated, as provided for by written contract between the said S. W. Peel and the claimants herein, the same to be payment in full for all legal and other services rendered by him, as provided for by said contract, or those employed by him, and for all disbursements and other expenditures had by him in behalf of said claimants, in pursuance of said contract: *And provided further*, That said Secretary is authorized and directed to pay to David M. Hodge, a Creek Indian, of Tulsa, in the Creek Nation, a sum equal to 5 per cent of the amount herein appropriated, which payment shall be in full for all claims of every kind made by said David M. Hodge, or by those claiming under him, by reason of any engagement, agreement, or understanding had between him and said loyal Creek Indians.

Mr. CURTIS. I make the point of order against this amendment on two grounds: First, it is general legislation on an appropriation bill, and, second, it is a claim. In pursuance of the provision of section 26 of an act to ratify and confirm the agreement with the Muskogee or Creek Tribe of Indians, and for other purposes, passed March 1, 1901, this claim was allowed in the sum of $600,000, and the act provides "and the same is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and made immediately available," with this further condition:

That said sum shall be accepted by said Indians in full payment and satisfaction of all claims and payment growing out of said loyal Creek claim, and the payment thereof shall be a full release of the Government from any such claim or claims.

Under that act of Congress $600,000 was paid. This amendment repeals that act of Congress, and is clearly general legislation upon an appropriation bill.

Mr. MCCUMBER. Mr. President, this matter has been submitted to me for investigation once or twice, and I have reported upon it as a subcommittee of the Committee on Indian Affairs. I wish it was possible to get the real consideration of the Senate upon this question once, consideration not only of its merits, but consideration of the point that is raised. It is impossible to present to the Chair my views as to the point of order without to some extent going into the claim itself. I will be, however, extremely brief in that matter to show that the point of order does not and can not lie to this amendment.

We will have to go back to the treaty of 1866, made between the United States and the loyal Creeks. Under that treaty 3,250 acres of land was transferred from the loyal Creeks to the United States. It was transferred for a consideration of about 30 cents an acre. Then, as a part of the consideration of that treaty—and this is the point that I also desire to make with the Chair—as a part of that treaty and as a part of the consideration the treaty further provides that immediately after the ratification thereof the United States should ascertain the amount due the respective soldiers who enlisted in the Federal Army, loyal refugee Indians, and freedmen in proportion to their losses and pay the amount awarded each; also that the Indian agent should prepare a roll of such Indians and freedmen; that the superintendent of Indian affairs for the southern superintendency and the Indian agent should investigate and determine from such roll the amounts due the respective Indians and transmit such awards to the Secretary of the Interior for his approval.

Pursuant to the terms of the treaty Brig. Gen. W. B. Hazen, superintendent of Indian affairs for the southern superintendency, and Capt. F. A. Field, Indian agent to the Creek Nation, and both Regular Army officers, were appointed July 21, 1869, as commissioners to make up the roll of said loyal Creek Indians, ascertain their losses, and make the awards due on their respective claims.

It is unnecessary, Mr. President, for me to go back and show the suffering of these loyal Creeks, who were loyal to the northern cause during the war, and the destruction of their property by the Confederacy, and what they suffered because of their loyalty.

The report of the commission, made February 14, 1870, shows claims presented in the amount of $5,090,808, approximately $5,000,000. Awards were made by them in the amount of $1,836,830. Now, remember that the claim was $5,000,000. It was investigated by the Army officers, and they cut the claim down to $1,836,830. The total award thus made was approved by the Commissioner of Indian Affairs, and on the 5th day of September, 1870, the Secretary of the Interior approved the same, but only to the extent of $100,000.

Mr. President, I want the Senate to understand that this was a claim of $5,000,000; that it was investigated by a commission appointed for that purpose; that the commission found nearly $2,000,000 to be their just dues—that is, $1,836,830. September 27, 1897, the Commission to the Five Civilized Tribes concluded an agreement with the Creek Nation, which provided, among other things, that the loyal Creek claim should be submitted to the Senate as a board of arbitration, whose finding should be final, and that any money found to be due the Creek Nation, or any individual thereof, should be paid at once.

They had waited all the years, from 1868 until 1897, in order to secure the payment of what the Government declared in its treaty it would pay, and upon an investigation of that subject by a commission appointed by the Government to determine what the losses should be.

It is one of the cases which clearly shows what little opportunity these Indians seem to have to get their claims through Congress after they have been determined and adjudicated. The pages of the history of our dealings with the Indian tribes of the country from beginning to end are black pages in which we have failed, knowingly and willfully failed, to fulfill our agreements with the Indians. Whenever Congress has felt that it was appropriating too much and wanted to cut down and save on appropriation, we have been in the habit of taking it out of the Indian appropriation bill and refusing to carry out our honest obligations made with the Indians—made with the wards of our own country.

Although this agreement was ratified and confirmed by the act of Congress approved June 27, 1898, nothing was done by the United States to carry out its terms. Under the date of March 8, 1900, the Commission to the Five Civilized Tribes concluded another agreement with the Indians, which was ratified by an act of Congress approved March 1, 1901. With reference to the loyal Creek claim, section 26 of the latter agreement is in its terms almost identical with the terms of the prior agreement. These are the terms, Mr. President:

All claims of whatsoever nature, including the "loyal Creek claims," under article 4 of the treaty of 1866, etc., shall be submitted to the Senate of the United States for determination; and within two years from the ratification of this agreement the Senate shall make final determination thereof; and in the event that any sums are awarded the said tribe, or any citizen thereof, provision shall be made for immediate payment of the same.

Early in the first session of the Fifty-seventh Congress a memorial praying the Senate to act in conformity with section 26 of the agreement of March 8, 1900, was presented to the Senate and was duly referred to the Committee on Indian Affairs for investigation.

Remember that we had made an agreement that we would submit the question of what we should pay of the award that had already been made to the Senate of the United States as a court of arbitration to determine that question, not to the Congress of the United States to determine what should be appropriated, but to the Senate of the United States to determine what ought to be appropriated by the Congress of the United States.

The committee examined the treaties and records, heard testimony, arguments were made, briefs were submitted by counsel, and finally the committee reported in the Fifty-seventh Congress its findings to the Senate in an amendment to the appropriation act, which I shall read.

Mr. President, remember that first we made the agreement that we would pay them their losses. We then, in conformity with that agreement, appointed commissioners, and the commissioners found their losses to be $1,800,000. We delayed acting on that for years. Then they proceeded again and asked us to act under the provisions of that treaty. We then made another agreement with them that we would reconsider the matter by the Senate, and the Senate should determine whether or not we should keep an agreement that we had made with them some 40 years before.

This is the reported amendment, and I ask the Chair and the Senate to understand what that amendment was by the Committee on Indian Affairs, to which this application was presented, to have the Senate of the United States act as a court of arbitration. It was as follows:

In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muskogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded, as a final determination thereof, on the so-called "loyal Creek claims"—

Now, mark the words. "There is hereby awarded," not an appropriation, not that there is hereby appropriated a certain sum, but there is hereby awarded—

on the so-called "loyal Creek claims" named in said section 26 the sum of $1,200,000.

In other words, after failing to comply with our agreement and failing to appropriate the sum of $1,800,000, and after waiting about 40 years, we then agree to pay them very much less than what our original agreement was—a very worthy act on the part of the United States to its wards—

named in said section 26 the sum of $1,200,000, and the same is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and made immediately available. And the Secretary of the Treasury is hereby authorized to pay, under the direction of the Secretary of the Interior, to the loyal Creek Indians and the freedmen named in articles 3 and 4 of the treaty with the Creek Nation of Indians of June 14, 1866, the said sum of $1,200,000, to be paid such Indians and freedmen only whose names appear in the list of awards made in their behalf by W. B. Hazen and F. A. Field, as commissioners on behalf of the United States to ascertain the losses of said Indians and freedmen as provided in said articles 3 and 4; and such payments shall be made in proportion of the awards as set out in said list, and shall be in full settlement and satisfaction of all claims under said articles 3 and 4, etc.

This matter then came before the Senate upon this report of the Committee on Indian Affairs that the Senate should arbitrate and should award $1,200,000 in full payment of this claim. It was passed by the Senate February 16, 1903.

Now, I want the Chair and the Senate to understand whether or not we acted in fact as a court of arbitration upon this question.

Let us remember, first, Mr. President, that there is no provision under the Constitution for the Senate ever acting as a board of arbitration or as a court of arbitration. There is no power by which we could call the Senate together for any such purpose. Nevertheless the Senate when it is assembled may act as a court of arbitration, but it must act as such under a proper bill; and the only way that this matter could be brought before the Senate to secure an award would be by a bill in which that award were made manifest. That is exactly what the Committee on Indian Affairs did in bringing the matter to the attention of the Senate.

The Senate was not unmindful at that time of what it was doing. It understood thoroughly that it was acting as a court of arbitration. Senator Quarles, who, as I understand, then had the bill in charge, before voting upon this provision made this statement to the Senate:

That determination of the Senate upon this proposition will amount to an award from which an action will lie quite independently of the fate of this provision in the other House of Congress.

Can anyone conceive of language that could be more clear and definite that, in passing upon the first provision in that clause which was reported to the Senate, we were acting as a court of arbitration in fixing the amount, and that amount would be due under a contractual obligation, even though we were unable in that instrument to succeed in getting the other House to agree with us as to what amount should be appropriated to carry it into effect?

We voted, Mr. President, an award of $1,200,000 in full payment of a previous agreement to pay $1,800,000. The question was voted upon by the Senate with a clear understanding that it was granting that award. The bill in which the award was contained of course had to go to the other House. The other branch of Congress cut down the $1,200,000 to exactly $600,000, and also provided that the Indians receiving this award should sign an agreement—that our wards should sign an agreement—with this great Nation that is bound to protect them, that they would accept in full payment one-half of that which the Nation had acknowledged was absolutely due them.

Well, the contract was signed; they received the $600,000; and they signed receipts to the effect that the same was received in full. Is the United States in a position to claim, with its own wards, that with an imposition upon those wards to compel them to sign a release upon consideration of their receiving less than the amount due was fair and full compensation? Why, as between individuals no court on the face of the earth would ever allow a receipt in full for less than the amount acknowledged to be due to operate as a bar against the collection of the balance that would be due. If it would not be a bar in a court of law as between individuals of equal understanding, morally it ought not to be so when the contract is between guardian and ward, and where the guardian seeks to force the ward to accept less than the amount due.

Mr. President, that is practically all that there is in this case: First, we made our agreement in 1866 to pay the loyal Creeks the amount of their losses; secondly, in 1899, pursuant to that agreement, we investigated their losses, and we fixed the amount at $1,800,000. We agreed then and there with them that we would pay that $1,800,000. After the lapse of many years, and failing to comply with the terms of our contract, we made another agreement with them, that we would submit the question to the Senate of the United States for arbitration whether we should be bound by an obligation which we were morally bound to fulfill. We did submit that question for arbitration and all under the same treaty, because it is recited that it was under that treaty of 1866. The Senate did so arbitrate. Then the other House cut down the amount from $1,200,000 to $600,000.

The whole claim of the point of order is based upon the assumption, Mr. President, that the act of the Senate was not complete in itself until the bill had gone to the other House and had come back to the Senate for its consideration, and that the Senate in then agreeing to the $600,000 which was allowed by the other House had practically fixed its award at $600,000.

It is sufficient in law to answer that with the statement that when a court of arbitration has acted upon a matter submitted to it and has rendered its judgment, it then dissolves as a court of arbitration and has no power to take up the same subject at any subsequent time, or to change the award which it had given. The amount that was paid was paid under the appropriation portion of the bill, which bill contained the award, and it could not affect the award itself. If it could, why, then, you have got to go to the contract, to submit the question to the Senate of the United States, a construction that would mean that it would be submitted to the Congress of the United States. That was not the agreement, and it does sufficiently answer that statement.

So, Mr. President, upon the question of the propriety, the right, and the merit of this claim, I can only say that it ought to be paid now. Upon the question of the award, it is clearly

one that can not be changed by the Senate after the Senate has once made it.

Mr. CURTIS. Mr. President, I might state that there is another side to this case. I do not believe it worth while to go into the other side at this time, however. This same amendment has been upon two different occasions previously ruled out of order, once by Vice President Fairbanks, whose opinion will be found on page 84 of Decisions of Points of Order, and subsequently by Vice President Sherman, whose opinion will be found in the CONGRESSIONAL RECORD of January 24, 1911. I might add that later an appeal was made to the Senate, and that the Senate sustained the ruling of the Chair. As was said by Vice President Fairbanks—

The Chair is of the opinion that in determining the parliamentary question which is raised, it is impossible for him to go back of the act of Congress of 1903 and consider any agreements, awards, or settlements which may have been made prior thereto. The Congress has spoken upon the question, and it is not within the province of the Senate to set aside, nor is it within the province of the Chair to ignore, its deliberate, conclusive action. It is provided in the act as follows.

That is the act which I read a few moments ago.

If the Chair desires to hear further, I would gladly go into the facts, but it does seem to me that on these two decisions alone the Chair is justified in acting.

Mr. McCUMBER. Mr. President, the point I should like to have the Chair distinguish is whether or not the arbitration of the Senate was concluded when it voted, under the statement made by the committee, to grant $1,200,000—whether that was the arbitration or otherwise. If that was the arbitration, then of course the act of the other House in cutting down the amount to $600,000 would be an act introducing another factor into the arbitration that was not contained in the agreement.

Mr. CURTIS. Mr. President, the so-called award was placed in an appropriation bill, and it could not become conclusive or effective until that bill became a law. It would be the law as written in that bill as finally approved. That was the point that was discussed by Vice President Fairbanks in the chair, and which was settled by him in this case. I say, if an argument is desired upon the merits of this case, there is another side to it, and, as was contended by the House conferees, if there had been a full hearing it is doubtful whether anything would have been allowed to those people.

The PRESIDENT pro tempore. Will the Senator from Kansas kindly give the Chair the citation showing the ruling of Vice President Sherman?

Mr. CURTIS. It will be found on page 1357 of the RECORD of January 24, 1911.

The PRESIDENT pro tempore. Will the Senator kindly send the book to the desk? The Senator need not read it.

Mr. CURTIS. I take pleasure in sending the volume to the Presiding Officer.

Mr. OWEN. Mr. President, I want to call the attention of the Senator from Kansas to the fact that when that item came before the Senate, although a part of an appropriation bill, that item as such was presented to the Senate in the nature of a proposed award. The Senate, having the legal right to make the award, both Houses of Congress and the President having agreed that the Senate should exercise the authority as a court of arbitration in making the award, the Senate being admonished that its action on that item was to be an award, and having made it, does the Senator from Kansas propose that if the other branch of this Congress should have struck that item out proposing to pay the award it would not have been an award at all?

Mr. CURTIS. Mr. President, if the Senator from Oklahoma asks me the question, I will say that I claim that there never was an award in this case. It was not submitted to the Senate, and by the Senate to the Committee on Indian Affairs as a board of arbitration, as was done in the loyal Seminole case. That was referred by a separate proposition, acted upon separately, brought in separately, and a regular award made. This was submitted by the reference of a memorial to the Committee on Indian Affairs, and the Committee on Indian Affairs, in acting upon it, placed it in an Indian appropriation bill. So no matter what statement was made upon the floor of the Senate, or any other place, the award was not complete until the bill became a law, but the bill became a law with a provision for $600,000 in it, on the condition that those people should accept it in full settlement. They did accept it; they gave their receipts in full; and now these gentlemen hope to again open up this question. I was one of the conferees on the part of the House and know the item would not have been left in the bill if it was not understood that the Indians would accept the amount in full settlement.

The PRESIDENT pro tempore. The Chair is prepared to rule on the question.

Mr. OWEN. Mr. President, before the Chair makes the ruling, I wish to at least submit and record some observations with regard to this claim. These loyal Creeks were faithful to the Government during a time which tried men's souls. They stood loyal to the Government at the peril of their own lives. Their property was destroyed by the forces that opposed the United States. They had a treaty pledging to them the safety of their property. The United States had guaranteed by treaty to protect their property. The United States was unable to discharge that obligation when the war came on, but, nevertheless, when that war was over the United States, recognizing its previous treaty obligations, in 1866 entered into a new treaty with them containing the provision in article 4, as follows:

Immediately after the ratification of this treaty the United States agree to ascertain the amount due the respective soldiers who enlisted in the Federal Army, loyal refugee Indians and freedmen, in proportion to their several losses, and to pay the amount awarded each in the following manner——

Mr. CURTIS. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Kansas?

Mr. OWEN. I yield to the Senator from Kansas.

Mr. CURTIS. May I ask the Senator why he did not read all of that section and also read the previous section? Article 3 of the Creek treaty of 1866 stipulates:

One hundred thousand dollars shall be paid in money and divided to soldiers that enlisted in the Federal Army and the loyal refugee Indians and freedmen who were driven from their homes by the rebel forces, to reimburse them in proportion to their respective losses.

And the last part of the article read by the Senator states:

In case the awards so made shall be duly approved, said awards shall be paid from the proceeds of the sale of said lands within one year from the ratification of this treaty, or so soon as said amount of $100,000 can be raised from the sale of said land to other Indians.

That is a limitation placed on the treaty of 1866.

Mr. OWEN. Mr. President, no quibble on the language of that treaty will permit the Government to escape its just obligations. The officers representing the United States wrote the treaties for these Indians, and they put into this language the declaration that this money should be paid to them. It was not paid to them; they have never been paid. The matter was afterwards agreed to be submitted to the Senate of the United States to make an award; and it was upon that record that it came to Congress. I ask to insert in the RECORD the report upon this matter heretofore made, giving the facts with regard to it, without taking the time of the Senate to read it.

The PRESIDENT pro tempore. Without objection, that order will be made.

The report referred to is as follows:

LOYAL CREEK INDIANS.

The Committee on Indian Affairs, to whom was referred the bill (S. 2344) to pay the balance due the loyal Creek Indians on the award made them by the Senate on the 16th day of February, 1903, beg leave to submit the following report thereon:

By the terms of articles 3 and 4 of a treaty between the United States and the Creek Nation of Indians concluded June 14, 1866, ratified by a resolution of the Senate, with amendments July 19, 1866, which amendments were agreed to by the Creek Nation July 23, 1866, and said treaty as amended proclaimed by the President August 11, 1866 (14 Stats., pp. 785–792), the Creek Nation ceded and conveyed to the United States the west half of their entire domain, the east half being retained as a permanent home for themselves. The land thus conveyed was estimated to contain over 3,250,000 acres, for which the Government agreed to pay $795,168, being at the rate of 30 cents per acre. The treaty provides for the distribution of this sum, and, among other things, that "$100,000 shall be paid to soldiers that enlisted in the Federal Army and the loyal refugee Indians and freedmen who were driven from their homes by the rebel forces to reimburse them in proportion to their respective losses," etc. (Art. 3, 14 Stats., p. 786.)

The treaty further provides that immediately after the ratification thereof the United States should ascertain the amount due the respective soldiers who enlisted in the Federal Army, loyal refugee Indians, and freedmen, in proportion to their losses, and pay the amount awarded each; also that the Indian agent should prepare a roll of such Indians and freedmen, that the superintendent of Indian affairs for the southern superintendency and the Indian agent should investigate and determine from such roll the amounts due the respective Indians and transmit such awards to the Secretary of the Interior for his approval.

Pursuant to the terms of the treaty, Brig. Gen. W. B. Hazen, superintendent of Indian affairs for the southern superintendency, and Capt. F. A. Field, Indian agent to the Creek Nation, and both Regular Army officers, were appointed July 21, 1869, as commissioners to make up the roll of said loyal Creek Indians, ascertain their losses and make the awards due on their respective claims. The report of the commissioners was made February 14, 1870, and shows claims presented in the amount of $5,090,808.50, and awards made by them in the amount of $1,836,830.41. The total award thus made was approved by the Commissioner of Indian Affairs, and on the 5th day of September, 1870, the Secretary of the Interior approved the same, but only to the extent of $100,000. (S. Doc. No. 420, 57th Cong., 1st sess.)

Prior to the date of the qualified approval of the Secretary of the Interior, however, Congress, in the Indian appropriation act approved July 15, 1870, had made the following appropriation:

"For the fulfillment of the provisions of the 3d and 4th articles of the treaty with the Creek Nation, concluded June 14, 1866, from the proceeds of sales of lands to the Seminoles, to be applied pro rata on the several amounts awarded and approved by the Secretary of the

Interior, $100,000, payment to be made to each claimant or to his or her heirs in person." (16 Stat., p. 341, 41st Cong., 2d sess.)

The appropriation thus made was to apply on account of the awards already ascertained and made by Hazen and Field; it was not a payment in full of the claim, and was not so understood at the time either by the Indians, by Congress, or by the Government agent who made the payment. In fact, the Indians refused to accept the $100,000 until assured that it was a part payment only of their claim, and that the balance would be forthcoming later.

"The accuracy of the findings of Hazen and Field was never challenged by the Government. Using them as a basis, the sum of $100,000 was paid to the claimants. The Indians refused to take any portion of this latter amount until assured by Gen. Williamson, the Government agent authorized to make the payments, that the balance would be paid." (S. Doc. No. 201, p. 5, 60th Cong., 1st sess.)

Under date of September 27, 1897, the Commission to the Five Civilized Tribes concluded an agreement with the Creek Nation which provided, among other things, that the loyal Creek claim should be submitted to the Senate as a board of arbitration, whose finding should be final, and that any money found to be due the Creek Nation, or any individual thereof, should be paid at once. Although this agreement was ratified and confirmed by an act of Congress, approved June 28, 1898, nothing was done by the United States to carry out its terms, and under date of March 8, 1900, the Commission to the Five Civilized Tribes concluded another agreement with the Indians, which was ratified by an act of Congress, approved March 1, 1901. (31 Stats., pp. 861–873, 56th Cong., 2d sess.)

With reference to the loyal Creek claim, section 26 of the latter agreement provides, and its terms are almost identical with those of the prior agreement, that—

"All claims of whatsoever nature, including the 'loyal Creek claim,' under article 4 of the treaty of 1866, etc., shall be submitted to the Senate of the United States for determination; and within two years from the ratification of this agreement the Senate shall make final determination thereof; and in the event that any sums are awarded the said tribe, or any citizen thereof, provision shall be made for immediate payment of the same.

"Of these claims the 'loyal Creek claim,' for what they suffered because of their loyalty to the United States Government during the Civil War, long delayed, urgent in its character that the parties to this agreement express the hope that it may receive consideration and be determined at the earliest practicable moment." (31 Stats., sec. 26, p. 869.)

Early in the first session of the Fifty-seventh Congress a memorial praying the Senate to act in conformity with section 26 of the agreement of March 8, 1900, was presented to the Senate and was duly referred to the Committee on Indian Affairs for investigation. The committee examined the treaties and records, heard testimony, arguments were made and briefs were submitted by counsel, and finally the committee reported (S. Rept. No. 3088, 57th Cong., 2d sess.) its findings to the Senate as an amendment to the Indian appropriation act, which reads as follows:

"(27) In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muskogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded, as a final determination thereof, on the so-called 'loyal Creek claims' named in said section 26, the sum of $1,200,000, and the same is hereby appropriated out of any money in the Treasury not otherwise appropriated, and made immediately available. And the Secretary of the Treasury is hereby authorized to pay, under the direction of the Secretary of the interior, to the loyal Creek Indians and the freedmen named in articles 3 and 4 of the treaty with the Creek Nation of Indians of June 14, 1866, the said sum of $1,200,000, to be paid such Indians and freedmen only whose names appear in the list of awards made in their behalf by W. B. Hazen and F. A. Field, as commissioners on behalf of the United States to ascertain the losses of said Indians and freedmen as provided in said articles 3 and 4; and such payments shall be made in proportion of the awards as set out in said list, and shall be in full settlement and satisfaction of all claims under said articles 3 and 4, etc." (Passed by the Senate Feb. 16, 1903.)

A full discussion of this item was had in the Senate when the Indian appropriation bill was submitted for passage, and was finally passed without a dissenting voice. (CONGRESSIONAL RECORD, vol. 36, pt. 3, 2d sess., pp. 2252, 2253, and 2254.)

The House of Representatives disagreed generally to the amendments of the Senate to the appropriation bill, and the measure went to conference. When the conferees made their final report the item carrying the award to the loyal Creeks was reduced from $1,200,000, found due by the Senate award, to $600,000, and provided that the Indians should accept the same as full settlement and satisfaction of their claim. The act carrying the appropriation for $600,000 was approved March 3, 1903 (13 Stats., 995), and that sum accordingly was paid to the Indians, who accepted the same under the terms of the act.

The fact that the House (conferees) refused to make appropriation to pay the award of the Senate is not material, nor does the fact that the Senate, after making the award and the vesting of the rights of the Indians thereunder, agreed to an appropriation of half the amount, vary the force and effect of its finding. The award was fixed by its vote and was not subject to a review. It was a matter entirely beyond the jurisdiction of the House—except as to appropriate the amount of the award of the Senate—and the award would still stand had no appropriation been made. The Senate never again sat as a board of arbitrators, as a quasi court, but had it done so any action taken would not have been binding upon the Indians, because their rights became unalterably fixed, determined, and vested immediately upon the Senate making its award. As stated by the United States Supreme Court in the case of Comegys *v.* Vasse, above referred to, "the award in the premises is not reexaminable."

It is submitted that to compel these helpless Indians, wards of the United States, who were soldiers in the Union Army, to accept in full settlement of their claim a sum of money less than one-third of the value of their property lost and destroyed as ascertained by a commission appointed in compliance with the solemn terms of a treaty, is an unconscionable wrong and a reproach to the Government.

BINDING FORCE AND LEGAL EFFECT OF THE SENATE AWARD.

The United States Supreme Court, in the case of Wright *v.* Tibbitts (91 U. S., 252), held that a commission appointed under the Choctaw and Chickasaw treaty of 1866, for a purpose involving the same principles that are contained in the Creek agreement submitting to the Senate the claim of the loyal Creek Indians (31 Stat., 869), was a quasi court. It was in no material respect, for all the purposes of this controversy, different from the Court of Commissioners of Alabama Claims, of the Southern Claims Commission, or the Mexican Claims Commission, or Spanish Claims Commission, which have been called together in pursuance of treaty stipulation or otherwise, to settle and adjust disputed claims for the purpose of their ultimate payment and satisfaction. When the Senate, the quasi court, passed upon these claims they assumed the nature of an ascertained debt "for the purpose of ultimate payment and satisfaction." The rights of the claimants thereby became fixed and determined beyond controversy.

The United States is concluded by the finding of the Senate, the quasi court, by the law of good conscience and fair dealing, as well as by that provision of law sanctioned by a thousand decisions and opinions, which is best stated by the United States Supreme Court in the "Arre ondo" case in these words:

"It is a universal principle that when power or jurisdiction is delegated to an officer or tribunal over a subject matter, and its exercise is confined to his or their discretion, the acts so done are valid and binding as to the subject matter, and the individual rights will not be disturbed collaterally for anything done in the exercise of that discretion within the power and authority conferred." (6 Pet., 691.)

The object of the Creek agreement was to invest the Senate, the quasi court, with full power and authority to receive, examine, and decide upon the validity and amount of these claims, and the decision of the Senate is conclusive and final. If the Senate pronounced these claims invalid, or pronounced them valid and ascertained and fixed the amount, the award in the premises is not reexaminable. The United States and the Indians as well must abide by it as the decree of a competent tribunal of exclusive jurisdiction. If the claim of these Indians had been rejected by the Senate it would have been equally as binding, and could not again have been brought under review without further legislation. (See Comegys *v.* Vasse, 1 Pet., 193.)

Arbitrators exhaust their power when they make a final determination on the matters submitted to them. They have no power after having made an award to alter it; the authority conferred on them is then at an end. (Payne *v.* Morris, 1 Wall., 97.)

If the award be within the submission and contains the honest decision of the arbitrators after a full and fair hearing it will not be set aside for error either in law or fact. (Burchell *v.* Marsh, 17 How., 344.)

An award can be set aside only for a plain mistake of law or fact. (Williams *v.* Paschel, 4 Dall., 284.)

In the construction of an award, no intendment shall be indulged to overturn it, but every intendment shall be allowed to uphold it. (Kaethans *v.* Ferrer, 1 Pet., 222; Burchell *v.* Marsh, 17 How., 344.)

Where arbitrators keep within the terms of the reference and there is no fraud, mistake, misconduct, undue influence, or corruption, the award is conclusive on the parties, since it is a tribunal of their own choosing. (Denny *v.* Brown, Fed. Case No. 3, 805; Wolf *v.* Sheldon, 51 Ala., 425; Peachy *v.* Ritchie, 4 Cal., 205; Van Winkle *v.* Beck, 3 Ill., 188; Ross *v.* Watt, 16 Ill., 99; Kimball *v.* Walker, 30 Ill., 482; Graff *v.* Friedlander, 33 La. Ann., 188; Newburyport Ins. Co. *v.* Oliver, 8 Mass., 402.)

An arbitration which appears regular and unimpeached by facts or denials is the very highest authority. The question in controversy is as fully determined and the rights of the parties as fully settled as could be by their own agreement or by the judgment of a court. (Harrie *v.* Hains, 37 Ark., 349.)

The award of arbitrators under a statute is conclusive against the parties to the submission. (Taylor *v.* Scott, 26 Mo. App., 249.)

These are well settled principles of law and can not be gainsaid or controverted. In the present case power and jurisdiction were conferred upon the Senate, a quasi court, which, acting wholly within the power and jurisdiction conferred by the agreement, made its award, and no legal power can alter or change the validity and binding force and effect of that decision and award.

ACCORD AND SATISFACTION—RECEIPT IN FULL.

The act of Congress (32 Stat., 995) providing that the Indians should accept the $600,000 as full satisfaction of all claim and demand growing out of said loyal Creek claims, and execute a full release to the United States, is without consideration and void.

There is no principle of the common law better established and more generally recognized than that a payment, which is in accordance with the contract (award) after its maturity, of a part of a liquidated and ascertained debt is no satisfaction of the whole indebtedness, and that a receipt in full given upon such part payment is a nudum pactum as to the unpaid balance and not binding upon the maker. (Chitty's Con., 2 Perkins Ed., 821, title payment; 2 Parson's Con., 4th ed., 129; Bostwick *v.* The United States, 94 U. S., 53; 12 Court of Claims, 67; 15 Court of Claims, 303.)

To make a receipt of a part of a debt a discharge of the whole, there must be a new consideration or a voluntary compromise of a disreputable and disputed demand, by which each party yields something, or an accord and satisfaction by which a new contract is substituted, or a submission to arbitration. (15 Court of Claims, 297.)

Thousands of decisions by the various National and State courts on the subject might be referred to. There has never been a contrary decision by any court before which the question was submitted.

As stated by Senator Quarles, who was a member of the Indian Committee when the case was before the Senate:

"The determination of the Senate upon this proposition will amount to an award upon which an action will lie, quite independently of the fate of this provision in the other House of Congress." (See pp. 2252, 2253, and 2254 of the RECORD, vol. 36, pt. 3, 57th Cong., 2d sess.)

Therefore the receipt by the loyal Creek Indians of the $600,000 in full for the amount awarded by the Senate is a mere nudum pactum and of no legal binding force whatever.

Again, the relation of the Government toward these Indians is that of guardian toward its ward. By every principle of fairness and justice, as well as by the universal requirements of the law, the guardian is prohibited from coercing his ward into executing any agreement or receipt which will be detrimental to the interests of the ward.

In insisting, therefore, upon the binding effect of a receipt exacted from the ward by the stress of his conditions, the Government is perpetrating a wrong prohibited by the law of every State and civilized country, and shocking to every moral sentiment.

There is another reason that, we think, ought forever to prevent the Government of the United States, when acting in the capacity of a contracting party with an Indian tribe, from assuming, for an instant, such an attitude as it has in this case. These loyal Creeks, though owing no allegiance to the Government, were soldiers in its Army. They had sustained losses for which the Government was clearly responsible. Under the provisions of a treaty solemnly entered into, these losses were ascertained and reported to the Government for payment.

The Government, acting for itself alone, proceeded to reduce these findings to $1,800,000. This amount was not paid and the case was, by another treaty, submitted to the United States Senate as a board of arbitrators. Here they suffered another reduction, and the Senate, acting in its sole capacity as a board of arbitrators, found the amount due to be $1,200,000. After they had adjourned as a board of arbitrators and the award of $1,200,000 became fixed and final, the Senate placed said sum of $1,200,000 as an item in the Indian appropriation bill and passed it for that amount. Afterwards, in conference between the two Houses, the lesser amount was appropriated.

In Worcester v. Georgia (6 Pet., 582) it was said by Mr. Justice McLean in his concurring opinion:

"The language used in treaties with the Indians should never be construed to their prejudice. If words be made use of which are susceptible of a more extended meaning than their plain import as connected with the tenor of the treaty, they should be considered as used only in the latter sense. * * * How the words of the treaty were understood by this unlettered people, rather than their critical meaning, should form the rule of construction."

This beneficent rule of construction has been applied by the court in a number of cases, as in the United States v. Kagma (118 U. S., p. 385), in which the court says:

"These Indian tribes are the wards of the Nation. They are communities dependent on the United States; dependent largely for their daily food; dependent for their political rights. They owe no allegiance to the States, and receive from them no protection. Because of the local ill feeling, the people of the States where they are found are often their deadliest enemies. From their very weakness and helplessness, so largely due to the course of dealing of the Federal Government with them and the treaties in which it had been promised, there arises the duty of protection, and with it the power. This has always been recognized by the Executive and by Congress, and by this court whenever the question has arisen."

The loyal Creeks' claim was considered by the Committee on Indian Affairs of the Senate, and in its report of January 30, 1907 (S. Rept. 5689, 59th Cong., 2d sess.), said committee stated as follows:

LOYAL CREEK CLAIM.

"In 1901 Congress enacted into the statute an agreement made by the Dawes Commission with the loyal Creek Indians whereby their claim was to be 'submitted to the Senate of the United States for determination,' the Senate acting as a court of arbitration. The act provided that whatever sum was awarded 'provision shall be made for immediate payment of the same.' (31 Stat. L., 869, sec. 26.)

"In pursuance of that act the claim of the loyal Creeks was duly submitted to the Senate and sent to the Committee on Indian Affairs for investigation. The committee examined treaties and records, heard testimony from the claimants, both oral and by depositions; heard counsel, who submitted briefs; and finally reported its findings to the Senate as an item on the Indian appropriation bill, which read as follows:

"'In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muscogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded, as a final determination thereof, on the so-called "loyal Creek claims," named in said section 26, the sum of $1,200,000, and the same is hereby appropriated out of any money in the Treasury not otherwise appropriated, and made immediately available. And the Secretary of the Treasury is hereby authorized to pay, under the direction of the Secretary of the Interior, to the loyal Creek Indians and freedmen named in articles 3 and 4 of the treaty with the Creek Nation of Indians of June 14, 1866, the said sum of $1,200,000, to be paid to such Indians and freedmen only whose names appear on the list of awards made in their behalf by W. B. Hazen and F. A. Field, as commissioners on behalf of the United States to ascertain the losses of said Indians and freedmen, as provided in said articles 3 and 4; and such payments shall be made in proportion of the awards as set out in said lists and shall be in full settlement and satisfaction of all claims under said articles 3 and 4: *Provided, however*, That if any of said loyal Creek Indians or freedmen whose names are on said list of awards shall have died, then the amount or amounts due such deceased person or persons, respectively, shall be paid to their heirs or legal representatives: *And provided further*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to first withhold from the amount herein appropriated and pay to S. W. Peel, of Bentonville, Ark., the attorney of said loyal Creeks and freedmen, a sum equal to 10 per cent of the amount herein appropriated, as provided by written contracts between the said S. W. Peel and the claimants herein, the same to be payment in full for all legal and other services rendered by him or those employed by him, and for all disbursements and other expenditures had by him in behalf of said claimants in pursuance of said contract. And, further, said Secretary is authorized and directed to pay to David M. Hodge, a Creek Indian, of Tulsa, in the Creek Nation, a sum equal to 5 per cent of the amount herein appropriated, which payment shall be in full for all claims of every kind made by said David M. Hodge, or by those claiming under him, by reason of any engagement, agreement, or understanding had between him and said loyal Creek Indians.' (Cong. Rec., vol. 36, pt. 3, 57th Cong., 2d sess., p. 252.)

"A discussion followed, in which the attention of the Senate was specifically called to the fact that by the adoption of that item the Senate announced its award under the law. In the language of Senator Quarles, who was a member of the Committee on Indian Affairs and was opposed to the award:

"'The determination of the Senate upon this proposition will amount to an award upon which an action will lie, quite independently of the fate of this provision in the other House of Congress.'

"In a word, the Senate was fully apprised of the whole matter, and then passed the item without any dissenting votes. (See pp. 2252, 2253, and 2254 of the Record above cited.)

"The House disagreed generally to the amendment made by the Senate to the Indian bill, and the measure went to conference. When the conferees made their final report the item carrying the award had been modified by reducing the amount found by the Senate from $1,200,000 to $600,000, and provided that the Indians should accept the same as full satisfaction of all claim and demand growing out of said loyal Creek claims, and that the payment should be a full release of the Government. (32 Stat. L., 995.)

"The money thus appropriated, being only one-half of the amount awarded, was accordingly paid to the Indians. But in spite of the fact that they accepted, under compulsion, that amount under the terms of the act rather than lose all payment for their losses, yet they feel that the amount awarded them under the conditions of a solemn agreement between themselves and the Government has been only one-half paid and they are now entitled to the balance. They respectfully submit the following reasons for their present claim.

"I. The losses they sustained were the direct result of their loyalty to the Government. For this loyalty they were not only driven from their homes, but many of them—men, women, and children—in their flight from the Indian Territory to Kansas during the winter of 1861–62, lost their lives by attacks made upon them by other Indians and by organized whites, and all of them suffered untold hardships. More than 1,500 of the men entered the Union Army. The Commissioner of Indian Affairs in his report for the year 1865 says:

"'The Creeks were nearly divided in sentiment at the opening of the war, about 6,500 having gone with the rebellion, while the remainder, under the lead of the brave old chief, Opothleyoholo, resisted all temptations of the rebel agents and of leading men, like John Ross, among the Indians, and fought their way out of the country northward, in the winter, tracked by their bloody feet upon the frozen ground. They lost everything—houses, homes, stock—everything they possessed. Many joined the United States Army.' (Commissioner's Report, 1865, p. 39.)

"II. The Government promised them that they should be reimbursed for their losses. During the negotiations with the Five Civilized Tribes, preceding the reconstruction treaty of 1865, the commissioners on the part of the United States assured the Indians, loyal and disloyal, that 'those who have been loyal, although their nation may have gone over to the enemy, will be liberally provided for and dealt with.' Again the Indians were assured that above all other considerations it was the determination of the Government 'to recognize in a signal manner the loyalty of those who had fought upon the side of the Government and endured great sufferings on its behalf.' (Commissioner's Report, 1865, pp. 34 and 299.)

"And article 4 of the treaty of 1866 (14 Stat. L., 787) undertook to ascertain their losses and see that the same were paid. This ascertainment was subsequently made by two officers of the Army, Gen. W. B. Hazen and Capt. F. A. Field. The Indians filed claims with this commission amounting in the aggregate to $5,090,808.50. The two commissioners, in keeping with their military training, insisted on having every item proven by witnesses presented before them. The impoverished Indians, scattered over a territory twice as large as the State of Massachusetts, without property—not even a pony left them—and with many of their witnesses dead or left back in Kansas, could only comply in part. But they did prove the loss, before this exact and exacting court, of property found to be worth $1,836,830.41. This amount was awarded by Gen. Hazen and Capt. Field and approved by the Commissioner of Indian Affairs, and a qualified approval affixed by the Secretary of the Interior.

"III. The accuracy of the findings of Hazen and Field was never challenged by the Government. Using them as a basis, the sum of $100,000 was paid to the claimants. The Indians refused to take any portion of this latter amount until assured by Gen. Williamson, the Government agent authorized to make the payments, that the balance would be paid. Thus, when the matter came before the Senate as arbitrator, the Indians claimed the full amount of their losses as found ($1,836,830.41), less the $100,000 which had been paid, making $1,736,830.41. They also claimed interest for the 36 years that the claims had remained unpaid. This based upon the fact that the Government usually paid interest on Indian funds.

"The Indian Committee representing the Senate in making the investigation determined, upon some theory unknown to the claimants, to reduce the amount to $1,200,000. The loyal Indians of the Choctaws and Chickasaws had been paid the full amount of their losses as found, and their claims had not been cut by the commissioners who passed upon them.

"The claims of the loyal Seminoles were submitted to the arbitration of the Senate by the same act that provided for the submission of the loyal Creek claims. The Senate reduced by 45 per cent the amount which the commissioners had allowed for losses, and then added interest at the rate of 5 per cent for some 33 years. The reduction of the principal was based on the fact that the Indians had been allowed all they claimed. But the reduced principal and the interest brought the award to $186,000, while the original allowance was $213,888.95.

"The Choctaws and Chickasaws were thus paid the full amount of losses as they claimed them, and paid promptly after the date of the reconstruction treaty; and the Seminoles were generously dealt with by the Senate, a large amount of interest having been added to their claim. Yet when the Senate came to deal with the loyal Creek claims, which had been already cut by Commissioners Hazen and Field about 62 per cent, it further reduced the principal something more than 33 per cent (from $1,836,830.41 to $1,200,000), and refused to allow any interest. The claimants would have been glad to have accepted this award and been allowed, after the 36 years of waiting, to go in peace.

"IV. A fourth reason why the balance of the award should now be paid is the fact that the Indians submitted the whole matter to the Senate, trusting with the simplicity of children in its honor and justice. They were heard, the award was announced, and they returned to their homes with the feeling of perfect security that at least that much was safe and the $1,200,000 would be paid them and the long controversy ended.

"They had no knowledge of what was transpiring in the conference room. They were neither notified nor heard, yet provision was made for paying only one-half of their judgment, and conditioned that they should receive this as payment in full. The award between private parties would have been final and binding. (Wright v. Tebbitts, 1 Otto, 252.)

"V. Congress in its legislative capacity could not legally alter the award. The Senate, in pursuance of an agreement and a law, was the sole arbitrator. It formally announced its award. It never again opened the case. It never again sat as an arbitration board. Its sole connection with the matter thereafter was as a branch of Congress in its political capacity. Its function as a court was terminated. The question of finding what was due these loyal Creeks, who, in the language of the act providing for the arbitration, 'had suffered because of their loyalty to the United States Government during the Civil War,' was fully closed.

"VI. To coerce the Indians to sign receipts in full for a part of their award and refuse to pay the balance would, if done by an individual, be immoral. These untutored wards of the Nation who have been trained for generations to depend upon agents and other officers of the Government in all business transactions and to do whatever they are told to do are presented with a sum of money and receipt and told to sign the latter in order to secure the payment. Will such a receipt be held as a bar against the individual Indian? Is there not such a sense of injustice growing from the facts of this case as will compel the payment of the whole award? The Indians depend more upon such considerations than upon legal rights, which might be asserted as to the frailty of receipts in general as evidence of payment, and especially as to receipts procured by coercion or duress.

"VII. There must be no misunderstanding as to who these claimants are. They are simply and solely individual Indians. Their names, the property lost, and the amount due each for his particular loss, are all set out in the findings of Commissioners Hazen and Field. The Creek Tribe has no jurisdiction over the matter. On these claims the United States owed nothing to the tribe, and the latter never had any legal relation to them. The relinquishment of the tribe in its capacity as an organization can not have and should not have any effect on the pending claims."

The statement of the principles here enunciated has been held by our courts whenever a case has been brought to their attention. The gross inadequacy of the payment made to these loyal Creeks must be apparent to everyone.

For these reasons your committee recommend the passage of this bill.

Mr. OWEN. There was awarded the sum of $1,836,000. In point of fact the Creeks lost property amounting to about $5,000,000. Many of them were very ignorant people. They did not know how to make up their claims and did not properly present them, in many cases they had inadequate evidence, so that the total claim, amounting to a very large sum, was finally cut down to $1,836,000, all that these ignorant people could actually prove that they were entitled to receive.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I yield to the Senator.

Mr. McCUMBER. When Congress itself made a subsequent agreement that it would pay these Indians whatever a commission should find was their due and afterwards provided through an act of Congress that there should be submitted to the Senate of the United States for determination the question of what was due, does not the latter agreement take precedence over any question of prior construction?

Mr. OWEN. It absolutely cures any defect that might be pleaded by virtue of the bare technical language of the previous treaty.

Mr. McCUMBER. This claim is under the basis of the act of Congress, which said that it should be submitted and we should pay whatever the Senate should award.

Mr. OWEN. And when the United States desired to buy the lands of these people at a later time Congress agreed in the Thirty-first Statutes, page 862, section 26, in the act entitled "An act to ratify and confirm an agreement with the Muscogee or Creek Tribe of Indians, and for other purposes," that the Senate should act as an arbitration court to ascertain these losses, and when ascertained it provided for their immediate payment.

The Senator from Kansas can not deny that that is the language of that statute. It is provided there in the Thirty-first Statutes, page 862, section 26, that the United States agrees to ascertain these losses, and that the Senate of the United States shall act as an arbitration court to ascertain what the losses are, and then, when ascertained, to provide for their immediate payment.

The matter went in due course to the Committee on Indian Affairs to make a report back to the Senate of the United States as to what would be a proper course to pursue for the Senate acting as an arbitration court under this Creek agreement of 1902, and then the report was made. I ask the attention of Senators to this language. Here is the report made to the Senate:

In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muscogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded—

There is hereby awarded. I call the special attention of Senators to that—

there is hereby awarded as a final determination thereof on the so-called loyal Creek claims the sum of $1,200,000.

And the Senate of the United States, taking up that language and considering it carefully, having their attention called to the full significance of it, that they were in pursuance of an act of Congress and in pursuance of the Creek agreement of 1901, by which the United States had bought their western lands, which were turned into an empire of wealth—the United States by act of Congress, the Senate, the House of Representatives, and the President, agreed that this character of settlement should be made; that the Senate, acting as a court of arbitration, should make a final award, not an award subject to be set aside by the act of conferees from another House, and no escape is possible to the Senate of the United States. We pledged our honor in this body to the Creek people to pay them this money, and we have no moral right and we have no legal right to escape the just force of this obligation, which was voluntarily entered into after great preliminaries.

The act of 1901 waited a good while before the matter came before the Senate; and when finally it did come before the Senate there is no possibility that the Senate did not understand it. The language itself is perfectly plain and unequivocal—

That there is hereby awarded as a final determination thereof, $1,200,000.

And Senator Quarles, who was then upon the floor, and a member of the Indian Committee, said to the Senate—and I quote his exact language from the CONGRESSIONAL RECORD, volume 36, page 2252:

That the determination of the Senate upon this proposition will amount to an award from which an action will lie quite independently of the fate of this provision in the other House of Congress.

The Senator from Kansas says that because the conferees of the House of Representatives refused to recognize the award made by the Senate, therefore it is not an award at all. The Senate charged by a plain act of Congress with the responsibility of making the award, does make the award in terms beyond the possibility of misconception or misinterpretation, saying that, as an award the matter is finally determined by paying $1,200,000, and the conferees of another body, three gentlemen, say that they will not agree to pay the award of the Senate unless it is cut in half and a proviso made that those people shall take that or they shall never have another dollar. The poor Creeks, yielding to that hard necessity, receive the half loaf under protest, and then come back and say to the Senate of the United States: "Gentlemen of the Senate, honorable Senators, we submit our fate to your hands. With full knowledge of the facts, you awarded us a small part of what our losses were"——

The PRESIDENT pro tempore. The Chair will venture to submit to the Senator from Oklahoma that the Chair has been pretty thoroughly enlightened on this question. The Chair has read very carefully the brief from which the Senator has quoted, and the Chair is prepared to rule, if the Senator will permit the Chair to do so.

Mr. OWEN. I thank the Chair for his genial admonition.

The PRESIDENT pro tempore. This amendment has been before the Senate on quite a number of occasions.

Mr. OWEN. Mr. President, do I understand that the Senator from Oklahoma is being taken off the floor in the middle of his remarks by the Chair?

The PRESIDENT pro tempore. It is in the competency of the Chair to rule on points of order without hearing from Senators, or the Chair can, in his discretion, permit Senators to be heard. While the Chair is ready to rule, the Senator from Oklahoma will be heard further, if he so desires.

Mr. OWEN. The Senator from Oklahoma was in the midst of a discussion of the basis of this case, which bears directly upon a proper ruling by the President of the Senate. He was pointing out that this payment is in pursuance of existing law; that the amendment is in pursuance of an award and a judgment; that it is relevant under the rules of the Senate, notwithstanding the erroneous action of a previous President of the Senate, following an error first made four years ago.

Here is a treaty pledging these people the payment; here is an act of Congress, the Creek agreement of 1901, declaring that the Senate shall be a court of arbitration; here is the award of the Senate, as a court of arbitration, proposing to pay these people $1,200,000; here is a committee report from one of the standing committees of this body reporting this proposed payment in pursuance of that award of the Senate, and in pursuance of the law as it exists.

I wanted to put upon the record a statement of this case, in justice to these poor people, who have waited since 1866, a lifetime. They are nearly all dead now, and the Government has never paid its just obligations to them. The Senate of the United States is now asked to repudiate its solemn award to these people. It may be done, but it will not be done with my consent, nor with my approval. I wish to put that statement into the record.

The PRESIDENT pro tempore. The Chair was about to remark that this question has been before the Senate several times during the service of the present occupant of the chair in this body, and has been discussed at great length.

There are two decisions that the Chair has very carefully considered, the first having been made by Vice President Fairbanks on the 20th of February, 1909. The Chair will take the liberty of reading that in full. The CONGRESSIONAL RECORD shows that on that occasion Mr. CURTIS raised the question of order, namely, that the amendment, as amended, proposed general legislation to an appropriation bill, and was therefore not in order. After debate, by unanimous consent, Mr. LODGE raised a further question of order, namely, that the amendment, as amended, was—

a provision for a private claim, which can only be received to a general appropriation bill when it carries out the provisions of an existing law

or a treaty stipulation, which shall be cited on the face of the amendment. There is no treaty stipulation cited on the face of this amendment.

The Vice President sustained the point of order, using the following language:

The Senator from Kansas makes the point of order that the amendment is obnoxious to paragraph 3 of Rule XVI, in that it proposes general legislation. The Senator from Massachusetts interposes an additional point of order to the effect that the item is not for the purpose of carrying out the provisions of some existing law or treaty stipulation.

The Chair has been greatly impressed by the strength of the argument of the friends of the amendment as to the equitable character of the claim. But in deciding the point of order the Chair is, of course, precluded from considering either the equitable nature of the claim or the supposed merit of the claim that is involved in the amendment.

The Chair is of the opinion that in determining the parliamentary question which is raised, it is impossible for him to go back of the act of Congress of 1903 and consider any agreements, awards, or settlements which may have been made prior thereto. The Congress has spoken upon the question, and it is not within the province of the Senate to set aside, nor is it within the province of the Chair to ignore, its deliberate, conclusive action. It is provided in the act as follows:

"In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muskogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded, as a final determination thereof on the so-called 'loyal Creek claims' named in said section 26, the sum of $600,000, and the same is hereby appropriated out of any money in the Treasury not otherwise appropriated, and made immediately available."

Congress, in order, apparently, to leave no doubt as to its purpose and the effect of the act, provided:

"That said sum shall be accepted by said Indians in full payment and satisfaction of all claim and demand growing out of said loyal Creek claims, and the payment thereof shall be a full release of the Government from any such claim or claims."

Unless this act has been very materially modified or repealed by a subsequent act, it stands as the supreme law, and standing as it does, it negatives the suggestion that the pending amendment is to carry out an existing law or treaty stipulation.

The Chair is also clearly of opinion that the amendment can not be entertained under the third paragraph of Rule XVI. It proposes to change a general law. Therefore it is in the nature of general legislation, and is in contravention of the rule.

In view of the foregoing considerations, the Chair sustains the point of order made by the Senator from Kansas and the point of order interposed by the Senator from Massachusetts.

On the 24th day of February, 1911, the same question was before the Senate. It was debated at great length; and the late Vice President, Mr. Sherman, made this ruling:

The question presented here is a question of procedure, not a question of merit. It is manifest to the Chair, though not universally conceded, that this provision has in it very much of general legislation, as that term has been construed heretofore in the Senate.

The Chair has read with interest and with care the decision rendered when a like provision was presented in a like bill two years ago by Vice President Fairbanks (CONGRESSIONAL RECORD, 60th Cong., 2d sess., Feb. 20, 1909, p. 2823), and the Chair believes that the reasoning of that decision is clear and that its conclusion is correct, and the Chair proposes to follow that decision in this instance and sustain the point of order.

On that occasion the Senator from Oklahoma [Mr. OWEN] appealed from the decision of the Chair, and the Senate did not sustain the appeal.

The present occupant of the chair thinks there are equities in this case that might well be considered in a separate bill; but the Chair fully indorses the two decisions that have been read. Manifestly the amendment is obnoxious to Rule XVI, and therefore the point of order is sustained.

Mr. GAMBLE. Mr. President, I send to the desk a communication from the Secretary of the Interior, and ask that it be printed in the RECORD in connection with this ruling of the Chair.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, January 27, 1913.

Hon. ROBERT J. GAMBLE,
Chairman Committee on Indian Affairs,
United States Senate.

SIR: I have the honor to acknowledge the receipt, by reference of the Committee on Indian Affairs of the United States Senate, of a copy of an amendment intended to be proposed by Mr. OWEN to H. R. 26874, said intended amendment having for its purpose the final settlement of certain claims of the loyal Creek Indians. The amendment provides for an appropriation of $600,000 to be used in payment of the balance claimed to be due certain Creek Indians, who by reason of their loyalty to the United States during the Civil War suffered property loss. It also contains a provision for the payment of attorneys' fees to S. W. Peel and David M. Hodge of sums equal, respectively, to 10 and 5 per cent of the amount of the appropriation carried by the amendment, such fees to constitute payment in full for all legal and other services rendered by said attorneys.

By section 26 of the act of Congress of March 1, 1901, containing an agreement with the Creek Nation (31 Stat. L., 869), it was provided that—

"All claims of whatsoever nature, including the 'loyal Creek claim' under article 4 of the treaty of 1866 and the 'self-emigration claim' under article 12 of the treaty of 1832, which the tribe or any individual thereof may have against the United States, or any other claim arising under the treaty of 1866, or any claim which the United States may have against said tribe, shall be submitted to the Senate of the United States for determination; and within two years from the ratification of this agreement the Senate shall make final determination thereof; and in the event that any sums are awarded the said tribe, or any citizen thereof, provision shall be made for immediate payment of same.

"Of these claims the 'loyal Creek claim,' for what they suffered because of their loyalty to the United States Government during the Civil War, long delayed, is so urgent in its character that the parties to this agreement express the hope that it may receive consideration and be determined at the earliest practicable moment."

By an act of Congress approved March 3, 1903, an appropriation of $600,000 was made for the purpose of paying the loyal Creek Indians and freedmen after the deduction of attorneys' fees, and the attorneys above mentioned were allowed 10 per cent and 5 per cent, respectively, of the amount appropriated under said act, which amounts were intended by Congress to be in full payment of all legal and other services rendered by said attorneys. The act also provided that the sum appropriated thereby should be accepted by the Indians in full payment and satisfaction of all claims and demands growing out of said loyal Creek claims, and that the payment of said sum should be a full release of the Government from any such claim or claims.

Said act of March 3, 1903, was originally the Indian appropriation bill for the year ended June 30, 1904, which was introduced as H. R. 15804. The Senate amendment of February 16, 1903, as reported in the CONGRESSIONAL RECORD, in volume 36, part 3, page 2252, provided, in part, as follows:

"In pursuance of the provisions of section 26 of an act to ratify and confirm an agreement with the Muskogee or Creek Tribe of Indians, and for other purposes, approved March 1, 1901, there is hereby awarded, as a final determination thereof, on the so-called 'loyal Creek claims' named in section 26, the sum of $1,200,000, and the same is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and made immediately available. And the Secretary of the Treasury is hereby authorized to pay, under the direction of the Secretary of the Interior, to the loyal Creek Indians and freedmen named in articles 3 and 4 of the treaty with the Creek Nation of Indians of June 14, 1866, the said sum of $1,200,000, to be paid to such Indians and freedmen only whose names appear on the list of awards made in their behalf by W. B. Hazen and F. A. Field, as commissioners on behalf of the United States."

The House of Representatives disagreeing with the amendment in question, the matter was taken up in the conference committee, whose report on the bill submitted in the Senate on February 25, 1903 (Cong. Rec., vol. 36, p. 2626), provided:

"That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with amendments as follows: In line 7 of said amendment strike out 'one million two hundred thousand' and insert 'six hundred thousand'; in line 22 of said amendment, after the word 'list,' strike out all down to and including the word 'four,' in line 24, and insert in lieu thereof the following: '*Provided*, That said sum shall be accepted by said Indians in full payment and satisfaction of all claim and demand growing out of said loyal Creek claims, and the payment thereof shall be a full release of the Government from any such claim or claims'; and the Senate agree to the same."

The contention that the Senate had theretofore been made the arbiter of the claim was considered in the conference committee, as shown by the statement of the House conferees submitted in the House of Representatives February 27, 1903 (Cong. Rec. vol. 36, p. 2768), which statement was as follows:

"No. 27. The House recedes with an amendment making the appropriation $600,000 instead of $1,200,000. The amendment provides for the payment of the so-called loyal Creek claim. It has been mooted for some time, and it is claimed that the Senate has heretofore been made arbiters by action of both bodies of Congress, and that, acting as such, they have determined that $1,200,000 was just and due. The sum fixed herein is a compromise, and provision is made in the amendment that it be accepted in full payment of all claims and demands and act as a general relief of such claim against the Government."

On May 23, 1903, the principal chief of the Creek Nation approved a resolution of the general council of that nation accepting the $600,000 in full payment and satisfaction of all claims of the loyal Creek Indians and freedmen against the Government. It further appears that each person who participated in the distribution of the fund was required to sign a receipt for the sum paid him setting forth that it was accepted as a "full and complete settlement" of his claim against the United States for property taken or destroyed during the Civil War, as provided by the act of Congress, approved March 3, 1903, and the act of the Creek council above mentioned.

Respectfully,

WALTER L. FISHER, *Secretary.*

Mr. CURTIS. I ask unanimous consent to print in the RECORD a letter from the Commissioner of Indian Affairs, giving the early history of this claim prior to the recent legislation.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, January 15, 1889.

The honorable the SECRETARY OF THE INTERIOR.

SIR: I have the honor to acknowledge the receipt, by department reference for report, of a communication under date of October 8, 1888, from Hon. S. W. Peel, chairman of the House Committee on Indian Affairs, inclosing a memorial of the loyal Creek Indians setting out their claim against the Government, the claim being quite large and of old standing, and requesting a careful examination thereof and full and complete report on its merits and covering all points relative to its final adjustment.

In compliance with said reference, I have the honor to submit the following report:

By the third article of the Creek treaty of June 14, 1866, it is stipulated that—

"* * * $100,000 shall be paid to soldiers that enlisted in the Federal Army, and the loyal refugee Indians and freedmen who were driven from their homes by the rebel forces, to reimburse them in proportion to their respective losses; * * *." (14 Stats., p. 787.)

The fourth article provides that "immediately after the ratification of this treaty the United States agree to ascertain the amount due the respective soldiers who enlisted in the Federal Army, loyal refugee Indians and freedmen, in proportion to their several losses, and to pay the amount awarded each in the following manner, to wit: A census of the Creeks shall be taken by the agent of the United States for said nation, under the direction of the Secretary of the Interior, and a roll of the names of all soldiers that enlisted in the Federal Army, loyal

refugee Indians and freedmen, be made by him. The superintendent of Indian affairs for the southern superintendency and the agent of the United States for the Creek Nation shall proceed to investigate and determine from said roll the amounts due the respective refugee Indians, and shall transmit to the Commissioner of Indian Affairs for his approval, and that of the Secretary of the Interior, their awards, together with the reasons therefor. In case the awards so made shall be duly approved, said awards shall be paid from the proceeds of the sale of said lands within one year from the ratification of this treaty, or so soon as said amount of $100,000 can be raised from the sale of said land to other Indians." (14 Stats., p. 787.)

For various reasons, but principally because no funds were available to defray the necessary expense, no action was taken to carry out the provisions of the fourth article of said treaty until Congress by act of April 10, 1869 (16 Stats., p. 22), appropriated the sum of $1,500, the "amount required to pay the expenses of taking a census and investigating the claims of loyal refugee Indians and freedmen, per fourth article treaty June 14, 1866," although Congress had by previous act of July 27, 1868 (15 Stats., p. 206), appropriated $2,000 for that purpose.

On the 21st of July, 1869, instructions were issued to the Creek agent, Capt. F. A. Field, to take said census and roll of the names of all the soldiers that enlisted in the Federal Army, loyal refugees, and freedmen.

On the same day Gen. W. B. Hazen, Superintendent of Indian Affairs, was advised of the instructions issued to Agent Field, and requested, when informed of the completion of said roll, to make the necessary arrangements with Agent Field to investigate, determine, and award the amount due said soldiers, refugee Indians, and freedmen and report the result of their action as early as October 1, 1869, if possible, that an estimate for funds to pay their awards might be submitted to Congress at its next session.

The roll was reported "nearly ready" September 12, 1869, but the investigation was not commenced until October 28, 1869, and practically closed December 19, 1869, though notice was given that claims would be considered up to February 1, 1870.

On the 14th of February, 1870, Gen. Hazen and Agent Field submitted a joint report of their doings under their instructions of July 21, 1869. The census contained the names of 3,611 persons, and the abstract of claims for property lost by the loyal Creek Indians and freedmen in consequence of the War of the Rebellion show awards to have been made in 1,523 cases. The total number of claims investigated amounted in value to $5,090,808.50, and the awards made by said superintendent and agent amounted to $1,836,830.41. On the 26th of May, 1870, this report of Gen. Hazen and Capt. Fields, with supplemental report of April 30, 1870, together with said abstract of claims upon which award had been made and the census roll made in accordance with the provisions of the treaty aforesaid, was submitted to the Secretary of the Interior, with a report that the investigations were conducted with care and thoroughness, but from the mass of claims presented it was evidently impossible, at a reasonable valuation, to keep within the treaty limits of $100,000.

The third article of the treaty stipulated that $100,000 should be reserved, etc., for the payment of said claims, etc., and to that end, this office, on the 16th of March, 1870, recommended that an appropriation of said sum be made by Congress for the payment of these awards and such others as might thereafter be made.

By the act of July 15, 1870, Congress appropriated $100,000 to be applied pro rata on the several amounts awarded and approved by the Secretary of the Interior, payment to be made to each claimant or to his or her heirs in person. (16 Stats., p. 341.)

On the 5th of September, 1870, Secretary Cox returned the census roll and abstract of claims awarded, having approved the amounts awarded by the commission, only so far as the sum placed at his disposal by the treaty and the act of July 15, 1870, warranted, viz., $100,000, and directed payment to be made upon a pro rata basis of $100,000, by which each claimant would receive five and four hundred and forty-four one-thousandths of a dollar on the sum awarded.

Payment was accordingly made by Special Agent J. A. Williamson in 1870, and Agent F. S. Lyon in 1871, and the vouchers therefor are on file in the office of the Second Auditor of the Treasury.

The Creek delegates, Messrs. Stidham, Porter, and Hodge, under date of December 17, 1878, submitted a petition setting forth many facts respecting the merits of the claims of the said loyal Creeks, claiming that the losses had an individual character and came under the provisions of article 18 of the treaty of 1856 (11 Stats., p. 704), which were reaffirmed and reassured by the twelfth article of the treaty of 1866; that the stipulations of the treaty of 1866, as defined by article 11 thereof, had respect to the Creeks, as a nation, to bar the Creek Nation against claiming compensation for losses growing out of the rebellion; that said losses were the misapplication of Creek national annuity funds, and that this article 11 was intended to interdict the revival of any claim in the future by the Creek Nation for the reimbursement by the United States of such misapplied funds; that article 11 does not touch the loyal Creeks, who, as individuals, separated themselves from the rest of their people, when compelled to choose allegiance between the United States and the so-called Confederate States. This loyal Creek claim, they allege, has another feature, aside from the treaty obligation of the United States, as defined by article 18 of the treaty of 1856—the property lost and therein claimed was taken, they allege, by the United States Army for the use of said Army. For verification of this fact they refer to the reports of Commissioner Cooley, Supt. Sells, Lieut. Williams, and the letter of Hon. W. A. Phillips, all of which, they affirm, are on file in the Interior Department.

They argue that the appropriation of $100,000 can not be taken as fulfilling the eighteenth article of the treaty of 1856, as that money was the funds of the Creek Nation realized from the sale of the western half of the Creek domain (treaty of 1866), and by no construction could that payment be considered a full and final settlement of the awards made by the said commission.

In conclusion they asked that no exigency of public affairs, or the then present policy of the Government of the United States should be permitted to intervene, whereby the rights of the loyal Creeks, etc., as guaranteed by their treaties—compacts as sacred and binding as the fundamental law of the Federal Government—might be ignored.

On the 3d of February, 1879, Hon. Charles E. Hooker, of the House of Representatives, made the following inquiries in connection with House bill No. 3513 (45th Cong., 2d sess.), viz:

First. Have the loyal Creeks met with any loss?

Second. In what manner and how did this occur?

Third. Is the United States Government in any manner liable for the loss?

Fourth. Is the loss of a national or individual character?

Fifth. If individual, have the claimants been compensated in any manner by the Government, and to what extent?

After referring to the communication of the Creek delegates of December 17, 1878, and of a further communication from said delegates, dated February 5, 1879, submitting the argument of David Hodge (printed copy herewith), this office in a report to the Secretary of the Interior, dated February 18, 1879, submitted a statement of the history and legal status of these claims and of the treaties with the Creeks out of which they grew, holding that in the opinion of this office the loyal Creeks had no further legal claim against the Government under any treaty stipulations whatever, but that such of the individual members of the Creek Nation as maintained their allegiance to the United States during the late war, and especially those who served in the Federal Army, had strong equitable claims upon the justice and good faith of the Government. In view of these considerations it was held that relief must be derived from congressional action, and recommendation was accordingly made that the subject be presented to Congress with the request that such legislation be had thereon as the facts and circumstances connected with the claims presented would justify.

On the 27th of March, 1880, this office submitted to the Secretary of the Interior a report on Senate bill No. 1145, providing for the payment of $1,800,000 to the said loyal Creek Indians, expressive of the views of this office thereon, which were corroborative of those advanced on the 18th of February, 1879.

This subject was again brought to the attention of this office by Senator John A. Logan, in a communication dated the 13th of July, 1882 (referred by the Secretary of the Interior for report), requesting to be furnished with an opinion as to the obligation of the United States to pay the balances, remaining unpaid, of the awards made to the "loyal Creek Indians who enlisted in the Federal Army, loyal refugees, Indians and freedmen," with such recommendations as might be deemed proper and necessary to an early settlement of their claims. This office, on the 29th of July, 1882, reported that the views expressed in report of February 18, 1879, that loyal Creeks had no further legal claim against the Government under any treaty stipulation, were held to be correct, and concurred with the views therein expressed that such of the individual members of the Creek Nation as maintained their allegiance to the United States during the late war, and especially those who served in the Federal Army, had strong equitable claims upon the justice and good faith of the Government.

On the same day this office submitted a favorable report to the Secretary of the Interior relative to a contract made March 10, 1882, by and between the loyal Creek Indians, through Legus C. Perryman, their duly appointed and legally authorized agent and attorney in fact, and W. W. Wilshire, recommending that the compensation, a contingent fee of 10 per cent of the amount recovered, be reduced to 2 per cent of the amount collected as a sufficient compensation for any service rendered or to be rendered by Mr. Wilshire, inasmuch as the matter, with all the facts connected therewith, had already been presented to Congress by the department. This contract was approved August 19, 1882, by the department at the original compensation, but it has never received the approval of this office, though under date of August 16, 1882, the then Commissioner of Indian Affairs modified his recommendation to the effect that the compensation should be 4 per cent on the first $500,000 that might be collected, 2 per cent on the next $500,000, and 1 per cent on the remainder.

Some further ineffectual correspondence was held respecting this contract (herewith submitted).

On the 10th of May, 1883, the matter was referred to the Court of Claims by the Secretary of the Interior, under the second section of the Bowman Act of March 3, 1883 (22 Stats., p. 485), and under date of July 18, 1884, the chief clerk (Archibald Hopkins, Esq.) transmitted to the Secretary of the Interior a certified copy of the finding of fact, conclusions of law, and opinion of the court in department case No. 3, Thomas Connor and others, Loyal Creek Indians, *v.* The United States, rendered June 4, 1884. (See Court of Claims Reports, vol. 19, p. 675.)

The court held that—

"The treaty of 1856 binds the Government to protect the Creeks from domestic strife, from hostile invasion, from aggression by other Indians and white persons not subject to their jurisdiction and laws. But the Creek Nation enter into a treaty with the Confederate government and engage in war against the United States, excepting the claimants, who remain loyal and render military service. In 1866 a new treaty is made whereby the Government 'reaffirms and reassumes all obligations' of the treaty of 1856 and agrees to pay $100,000 to the claimants and other loyal Creeks in proportion to their losses. It is also provided that 'the stipulations of the treaty are to be in full settlement of all claims' 'growing out of the late rebellion.'

"I. When the Creek Nation entered into a treaty with the Confederate government and engaged in war against the United States the treaty of 1856 (11 Stat. L., p. 704) was abrogated and the obligations of the Government to individual Creeks at an end.

"II. The provision in the treaty of 1866 (14 Stat. L., p. 785) whereby the Government 'reaffirms and reassumes all obligations' existing under the previous treaty takes effect from the date of the new treaty and does not carry back the obligations so as to be operative during the war.

"III. The provision in the treaty of 1866 that 'the stipulations of this treaty are to be in full settlement of all claims of said Creek Nation for damages and losses of every kind growing out of the late rebellion,' applies to individual and personal as well as to national demands.

"IV. By the Creek treaty of 1866 the United States reserved $100,000 from moneys to be paid the Nation and stipulated that that amount should be divided among the loyal Creeks 'in proportion to their several losses'; but they did not thereby assume the losses which loyal individuals suffered by reason of their having faithfully adhered to the Government during the war."

The court decided as a conclusion of law that "all claims which the petitioners had against the United States for damages and losses growing out of the late rebellion were adjusted, settled, and released by the treaty of 1866 (14 Stat. L., 785), and the payment thereunder of $100,000, as provided in article 3, and that the claimants, having received that sum, are not entitled to be paid any further amount." * * * The "amount due the respective soldiers" was not the whole $1,900,000 of their losses, * * * but was the $100,000 which was set aside and appropriated for that purpose. * * * The taking an account of the actual losses of individuals under the circumstances raises no implied promise to pay the whole, because the purpose was, as declared, to ascertain the amount due to each one in proportion to his losses, thereby implying that they might not be paid to the full extent of the losses.

On the 11th of March, 1886, another contract was made between the loyal Creeks, through their agents, Legus C. Perryman and Co-ne-tn Micco, and J. W. Douglass for professional services to be rendered in prosecuting claim of said Creeks to final settlement and payment thereof, etc., at a compensation—a contingent fee of 10 per cent of the sum or sums collected by him or his assigns. No action has been taken on said contract looking to its approval.

The foregoing covers the views heretofore held by this office on the merits of said claim, as well as the views of the representatives of said loyal Creeks, etc., and its final adjustment, in my opinion, should be provided for by Congress.

Copies of the following papers are herewith submitted, with a copy of this report, viz:

1. Instructions to Agent Fields, July 21, 1869.
2. Instructions to Gen. Hazen, July 21, 1869.
3. Report of Gen. Hazen and Agent Fields, February 14, 1870:
(a) Roll of loyal Creek refugees, freedemen, and soldiers.
(b) Abstract of claims for property lost by them and the awards made therefor.
(c) Memorandum of prices observed in making awards.
4. Printed copy of House Executive Document No. 217, Forty-first Congress, second session, containing letter of Secretary of the Interior, dated March 22, 1870, transmitting copy of Indian Office letter March 16, 1870, asking an appropriation to pay losses.
5. Supplemental report of Gen. Hazen and Agent Fields, April 30, 1870.
6. Office report, May 26, 1870, submitting both reports of Gens. Hazen and Fields, with roll and abstract of claims and awards.
7. Letter of Secretary Cox, September 5, 1870, returning roll and abstract of claims and of awards made, approved only so far as the $100,000 would warrant, and directing payment on a pro rata basis of 5.444 of $1 on the sum awarded to each claimant.
8. Communication from Creek delegates, December 17, 1878.
9. Printed copy of House Miscellaneous Document No. 38, Forty-fifth Congress, second session, being a petition of the Creek delegates, asking early action on the awards made to loyal Creeks, etc.
10. Printed copy of the argument of David Hodge before the Committee on Indian Affairs in behalf of loyal Creek claims March 26, 1878.
11. Office report, February 18, 1879, on communication Hon. C. E. Hooker in connection with House bill No. 3513, Forty-fifth Congress, second session, relative to this claim.
12. Office report, March 27, 1880, on Senate bill No. 1145, providing for the payment of $1,800,000 to loyal Creeks.
13. Office report, July 29, 1882, on communication Senator Logan of July 13, 1882, relative to the obligation of the United States to pay the unpaid balances of the awards made to the loyal Creeks.
14. Office report, July 29, 1882, on contract made March 10, 1882, by loyal Creeks with W. W. Wilshire.
15. Assistant Secretary's letter, August 9, 1882, relative to the compensation named in contract.
16. Office report, August 16, 1882, recommending modification of said compensation.
17. Assistant Secretary's letter, August 19, 1882, returning contract approved at original compensation.
18. Letter from W. W. Wilshire, August 22, 1882, calling for approved contract and certified copy thereof.
19. Office letter, September 14, 1882, to W. W. Wilshire, transmitting certified copies of contract as approved.
20. Letter from W. W. Wilshire, July 17, 1883, to Secretary Teller, calling attention to the fact that contract is not approved by this office. (Referred by Secretary Teller with the indorsement, "I think the contract ought to be approved.")
21. Office report, July 25, 1883, relative to nonapproval of contract at original compensation.
22. Decision of the Court of Claims, rendered June 4, 1884.
23. Instructions to Agent J. Q. Tufts, July 26, 1884, to notify Creek Nation of adverse decision of said court.
24. Letter from D. Haynes, July 21, 1884, relative to the claim of an orphan boy of the Creek Nation for damages done him as a loyal Creek.
25. Office reply thereto, June 24, 1884.
26. Letter from D. Haynes, August 18, 1884, in further explanation of said individual claim.
27. Office letter, August 30, 1884, in reply.
28. Senate Miscellaneous Document No. 54, Forty-eighth Congress, second session, a memorial of loyal Creek Indians asking the action of Congress with reference to the payment of the awards, etc.
29. J. W. Douglass asks for copy of his contract of March 11, 1886, with loyal Creeks for professional services to be rendered in their behalf relative to said claims.
30. Office letter, March 3, 1888, transmitting copy.
31. Copy of said unapproved contract.

The communication of Hon. Mr. Peel, with its inclosures, is herewith respectfully returned.

Very respectfully, your obedient servant,

JNO. H. OBERLY, *Commissioner.*

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, on page 51, after line 6, to insert:

That the Secretary of the Interior be, and he is hereby, authorized to perform all acts and make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect.

The amendment was agreed to.

The next amendment was, under the head of "Pennsylvania," on page 52, line 22, after the word "superintendent," to strike out "$132,000" and insert "$151,950; for lavatories and bathing facilities $10,000," and in line 24, after the words "in all," to strike out "$152,000" and insert "$181,950," so as to make the clause read:

For support and education of Indian pupils at the Indian school at Carlisle, Pa., and for pay of superintendent, $151,950; for lavatories and bathing facilities, $10,000; for general repairs and improvements, $20,000; in all, $181,950.

The amendment was agreed to.

The next amendment was, under the heading of "South Dakota," on page 53, line 9, before the word "for," to insert "for construction of employees' quarters, $15,000," and in line 10, after the words "in all," to strike out "$42,000" and insert "$57,000," so as to make the clause read:

For support and education of 175 Indian pupils at the Indian school at Pierre, S. Dak., and for pay of superintendent, $32,000; for construction of employees' quarters, $15,000; for general repairs and improvements, $10,000; in all, $57,000.

The amendment was agreed to.

The next amendment was, on page 53, after line 10, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized to pay to the plaintiffs in the case entitled "Mary Sully and others against the United States and John H. Scriven, allotting agent," and in the case entitled "Narcissus Drapeau and others against the United States and John H. Scriven, allotting agent," in the United States Circuit Court for the District of South Dakota, the sum of $780.70 to reimburse said parties plaintiff for costs paid and disbursements in the above-named cases: *Provided*, That before said amount is paid the said parties plaintiff shall file with the Secretary of the Treasury a receipt in full for the costs so paid and disbursements in said cases and in full of all claims.

The amendment was agreed to.

The next amendment was on page 54, after line 17, to strike out:

For support and maintenance of day and industrial schools among the Sioux Indians, including the erection and repairs of school buildings, $200,000.

The amendment was agreed to.

The next amendment was, on page 54, after line 20, to insert:

For support and maintenance of day and industrial schools among the Sioux Indians, including the erection and repairs of school buildings, $200,000, to be expended under the agreement with said Indians in section 17 of the act of March 2, 1889, which agreement is hereby extended to and including June 30, 1914.

The amendment was agreed to.

The next amendment was, on page 55, after line 10, to insert:

For the construction of headquarters for employees at the Pine Ridge Agency, S. Dak., $10,000, and for repair and improvement of agency buildings at the Pine Ridge Agency, S. Dak., $5,000; in all, $15,000.

The amendment was agreed to.

The next amendment was, on page 55, after line 14, to insert:

The Secretary of the Interior is hereby authorized to approve voucher No. 53 for the second quarter of the fiscal year ending June 30, 1911, for the payment of benefits to the Pine Ridge Indians of South Dakota, under section 17 of the act of March 2, 1889 (25 Stat. L., pp. 888 to 894, as amended).

The amendment was agreed to.

The next amendment was, on page 55, after line 22, to insert:

The Secretary of the Treasury is hereby authorized and directed to reimburse Hugh W. Caton, C. C. Clark, and Walter Mosier, Indian farmers, for expenses incurred by them for operation and repair of their private automobiles, while said machines were used on public business, pertaining to the Rosebud Indian Reservation, during the fiscal years of 1909, 1910, 1911, and 1912: *Provided*, That said accounts shall receive administrative examination by the Interior Department, and payments shall be made from unexpended balances in appropriations for "Support of Sioux or different tribes, subsistence and civilization," for the fiscal years in which the expenses were severally incurred, and shall not exceed, in the aggregate, $1,974.22.

The amendment was agreed to.

The next amendment was, on page 56, after line 12, to insert:

For reimbursing Frank Philbrick for property destroyed by fire, $318.25.

The amendment was agreed to.

The next amendment was, under the head of "Utah," on page 57, after line 11, to insert:

The Secretary of the Interior is hereby authorized and directed to cause an investigation to be made of the claims of the Confederated Bands of the Ute Indians and an appraisal of the value of any and all of the lands ceded by them to the United States and now remaining unsold, and to negotiate with said Indians with a view of reaching an agreement as to the value of said claims and lands, such agreement if obtained to be reported, and if not obtained negotiations for such purpose reported, to Congress by the Secretary of the Interior prior to January 1, 1914, for appropriate action.

The amendment was agreed to.

The next amendment was, on page 57, after line 22, to insert:

For cash payment to the Confederated Bands of Ute Indians, or for expenditure for their benefit, in the discretion of the Secretary of the Interior, $100,000, said amount to be reimbursed out of the appropriation, when made, to cover the net amount of the judgment rendered by the Court of Claims in favor of said Confederated Bands of Ute Indians, dated February 13, 1911.

The amendment was agreed to.

The next amendment was, under the head of "Washington," on page 59, line 6, before the word "Indian," to strike out "300" and insert "350," and in line 8, after the word "superintendent," to strike out "$50,000" and insert "$60,000," so as to make the clause read:

For support and education of 350 Indian pupils at the Cushman Indian School, Tacoma, Wash., including repairs and improvements, and for pay of superintendent, $60,000, said appropriation being made to supplement the Puyallup school funds used for said school.

The amendment was agreed to.

The next amendment was, on page 59, after line 10, to insert:

That the Secretary of the Treasury be, and he is hereby, directed to pay the award of $1,900 made by the Secretary of the Interior under

date of December 31, 1912, pursuant to the authority contained in the act approved July 6, 1912 (Private, No. 49), out of any funds in the Treasury of the United States not otherwise appropriated, the United States to be reimbursed out of the first moneys collected from the leasing or sale of the lands of the minor Indian children named in said act approved July 6, 1912.

The amendment was agreed to.

The next amendment was, on page 59, after line 21, to insert:

For the survey of the town site of Klaxta, within the Spokane Indian Reservation, and the survey of any other town sites within any Indian reservations heretofore established or that may hereafter be established under authority of law, to remain available until expended, $15,000.

The amendment was agreed to.

The next amendment was, at the top of page 60, to insert:

That for the purpose of constructing storage reservoirs to impound flood waters of the Yakima River to provide for the total diversion of 516,000 acre-feet of stored water and natural flow during each irrigation season at the reservation gates for the irrigation of 120,000 acres, more or less, on the Yakima Indian Reservation, there is hereby appropriated out of any money in the Treasury not otherwise appropriated, $1,800,000, or so much thereof as may be necessary, to be expended in said works by the Reclamation Service.

That the lands within the project on the Yakima Indian Reservation owned by Indians in fee or otherwise to the extent of 32,000 acres, estimated to be necessary for the support of Indians allotted within the project, for which a water supply of 400 cubic feet per second of time is required, shall receive water free of any and all cost or charge on account of said storage works.

That other lands under Indian ownership to the extent of 70,000 acres additional, more or less, shall bear the proportionate acreage cost for providing said storage waters in the river, except that provided for in the preceding paragraph, which cost shall be a charge against said lands, to be paid on such terms and under such regulations as the Secretary of the Interior shall prescribe.

That the claims for water of the owners of the remaining area of 18,000 acres, more or less, of irrigable Indian land, the Indian title to which has been extinguished, shall be equitably adjusted by the Secretary of the Interior: *Provided*, That any payments by owners of said lands on account of said storage works shall be deposited in the Treasury to the credit of the United States.

That the owners of irrigable lands within the project shall pay the proportionate cost of the distribution and drainage systems upon such terms as may be fixed by the Secretary of the Interior: *Provided*, That no steps for the enlargement of the storage or distribution works for the benefit of the lands in the Wapato unit, as herein provided for, or for deliveries of water thereto in excess of the deliveries appropriate under the limitation to 147 second-feet, shall be undertaken until at least 80 per cent of the allotted and a like per cent of the patented lands of said unit shall have been pledged by the allottees or owners thereof for the repayment of the cost of the works, nor until all other claims for or arising out of water rights shall have been properly waived by the allottees or owners so pledging their lands, and no benefit from the works constructed on the faith of such pledges shall accrue by enlarged deliveries of water or otherwise to any lands within the unit so pledged with waiver.

Mr. LODGE. Mr. President, I do not desire to delay the passage of the bill; and therefore, without discussion, I make the point of order that this is clearly general legislation, and that it also carries an appropriation of $1,800,000 which is not estimated for.

Mr. JONES. I hope the Senator will reserve his point of order. I will state to him that he will not expedite the passage of the bill——

Mr. LODGE. Certainly I will reserve the point of order.

Mr. JONES. Because I do not believe, when the Senator understands the situation, he will insist upon his point of order.

Before proceeding to address the Senate on this proposition I desire to say that in line 25, page 61, after the word "unit" the word "not" was inadvertently omitted. I move to insert the word.

The PRESIDENT pro tempore. The proposed amendment will be stated.

The SECRETARY. On page 61, after the word "unit" in line 25 it is proposed to insert the word "not."

The amendment was agreed to.

Mr. JONES. Mr. President, this is an extremely important matter, not only to the Indians and to the locality, but to the United States itself, and I hope the Senator from Massachusetts will give me his attention. I have lived in the vicinity of this reservation during almost the last 24 years, and I know the conditions there thoroughly. The treaty setting aside this reservation was made in 1855, and ratified in 1859. The lands were then simply pasture lands, and not very good at that. That is, the lands involved in this proposition were practically desert lands. The reservation in all included over 1,000,000 acres of land, part of it being grazing land, and this, of course, was of benefit to the Indians.

The irrigation development in this valley began along about 1867, and continued slowly until probably 1880 or 1885 or 1886, when the Northern Pacific Railroad went through this valley. Settlers came in in great numbers, and a great development began, and has continued ever since, until now. There are under irrigation in the valley, taking water from the streams and sources of water supply tributary to this reservation, about 250,000 acres of land. As the Secretary says in his report—or, at least, it is in the report of the officer made to him—irrigation has developed in this neighborhood probably to a greater and higher degree than almost anywhere in the United States.

While the white settlers were developing the lands, building ditches, taking out water, and reclaiming the desert practically nothing was done toward the irrigation of these reservation lands. The Indians did nothing, and of course the whites could do nothing. There was some slight development, and along about 1892 or 1894 there was a ditch built for the purpose of reclaiming probably 20,000 acres of these lands. Money was appropriated by the Government for this purpose. I do not remember whether the first appropriation was reimbursable out of the Indian fund or not. Whether that is true or not, there has never been any reimbursement; and whatever irrigation canals have been placed upon this reservation have been placed there by appropriations made out of the Treasury of the United States without any reimbursement, although probably subject to reimbursement.

It is possible that there will be some reimbursement at some time out of the tribal fund; and yet there is a decided injustice with reference to that, for this reason: The reclamation of these lands results in benefits to particular Indians and not to the tribe, because it results in the reclamation of particular allotments or allotted lands; and while it is reimbursable out of the tribal fund, the benefit goes to particular individual Indians.

Mr. POINDEXTER. Mr. President, I should like to ask a question of the Senator.

The PRESIDENT pro tempore. Does the Senator from Washington yield to his colleague?

Mr. JONES. Certainly.

Mr. POINDEXTER. What would be the difficulty, in that connection, of charging the cost to the undivided portion of the allottees?

Mr. JONES. There would be no difficulty, so far as that portion would go; but I will suggest to the Senator that that portion probably would not pay the total expenditure. That is what ought to be done.

Mr. POINDEXTER. I am informed that it probably would. However, there may be a difference of opinion about that.

Mr. JONES. I doubt it very much; but that is what ought to be done, so far as that is concerned.

The Indians are making the claim that they are entitled to half of the water in the Yakima River, one of the boundary streams of this reservation. The opposition to this measure claim that it is against the interests of the Indians. As a matter of fact, I think it is in the interest of the Indians themselves. I want to say here that I believe I am more earnest in looking after the interests of the Indians in this legislation than those who are urging the Indians to oppose it.

I have no interest in this matter except the interest of the Indians and the development of that section of the country. I want these Indians to have every right they are entitled to. I would be willing to give them even more. We ought to do them justice, and no one is more anxious to do that than I. There are those who are urging these Indians to oppose this legislation who have personal interests at stake and who will become the real beneficiaries. There are those who are behind the opposition to this proposition, and urging the Indians to oppose it, who have purchased the lands of deceased Indians upon this reservation, and are hoping thereby to secure the land and a free water right. That is the basis of the whole opposition. Misrepresentations have been made to the Indians, and they have been led to believe that no protection is given them. This is not true.

These lands are now extremely valuable. They were practically of no value when the treaty was made. They are practically of no value without water. But with the prospect of a water right becoming available, the lands with a water right and those without are now of very great value.

The Indians claim half of the water in this river simply because the river runs along the side of their lands. I do not care to discuss that proposition. It is immaterial to me in view of the situation that we must meet. Whether that contention is correct or not, we can not afford at this time to destroy the development that has been made in this valley. We can not afford to destroy the homes that have been built up there. We can not afford to take away the value of the property that has been made by the efforts and the toil and the struggles of the people as would be done by the recognition of this claim and its enforcement. If the Indians were entitled to one-half the value of that land or of the water, they have a claim against the Government for the taking of their property that the Government itself should recognize and pay for and not take it out of the values that have been developed in that country.

The Government has invited the people to come in there; the Government has encouraged the people to settle these lands; the Government has induced the people to take up lands and has given them title to those lands—lands that were absolutely worthless without irrigation. They have irrigated them and reclaimed them and built their homes upon them, and their values rest upon the water which they have diverted at great expense.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Iowa?

Mr. JONES. Possibly I will cover the point that the Senator has in mind.

Mr. KENYON. If the Senator does, well and good. I was going to ask with reference to the memorial which the Indians themselves have presented against this bill of the Senator, which seems to put the case very tersely and rather pathetically.

Mr. JONES. Yes.

Mr. KENYON. I thought possibly the Senator would answer it. It might be well to have it read, and then have it answered by the Senator.

Mr. JONES. If the Senator will call particular attention to the point he has in mind and would like to have answered, I shall be glad to do so.

Mr. KENYON. I ask to have read the matter which I send to the desk, as the protest of the Yakima Indians against this proposition.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The Secretary read as follows:

In 1906 Secretary Hitchcock divide water in Yakima River and give us 147 cubic feet and give Sunnyside Canal 650 feet, leaving several miles of our new ditch dry, and not enough to water good the 30,000 acres watered by our ditches. We ask if this is right?

Our riparian rights are older than those of the white man. This reservation we were permitted to hold when the Government took all our other land. Water is life and belongs to the earth. Our land is poor without water. The Government has set still and let our water be stolen, and now the Reclamation Service cinch us tight if Jones bill 6693 become law.

On Ahtanum River divide of our reservation, where white man have most land, the Secretary of Interior gives three-fourths of water to white man. Now, when red man have most land to water, he gives nearly all water to white man. This was done, and we could not help ourselves. We want only what is right. God wants the white man and the red man to live in peace. We try hard to do right and obey the white man's laws. We want you to help us. We want the white man to be honest and treat us right. Our words are done.

Mr. JONES. Of course, Mr. President, that sounds well and appeals to our sympathy; and yet, when we come down to the cold fact, if we take their suggestion as the basis for our action, we will allow this water to go by this reservation forever, simply because the Indians were there before the white man. They made no use of the water before the white man came. They made no use after he came——

Mr. POINDEXTER. Mr. President——

Mr. JONES. They made no use of it for almost half a century.

Mr. POINDEXTER. The last statement of the Senator, made after I had risen, rather qualified the previous one.

Mr. JONES. Yes.

Mr. POINDEXTER. The Senator stated that they had made no use of the water. I was going to inquire if it was not a fact that they have made use of more water than is given to them free of charge in this amendment.

Mr. JONES. No; I am going to explain that.

Mr. POINDEXTER. And is it not true that while this amendment provides for the free irrigation of 32,000 acres of land they are already irrigating 30,000 acres, so that it is only 2,000 acres more than they have already irrigated?

Mr. JONES. That is not true.

Mr. POINDEXTER. My purpose in stating this is to get the Senator's views in regard to it.

Mr. JONES. I know that, and that is what I want to give. I want to explain the situation. I said for almost half a century this water had been going by there and these Indians had not used it. Until, I think, about 1892 or 1894 practically no irrigation had been done upon the reservation. There had been some water turned out into some sloughs and had been used by the white people who were leasing the lands from the Indians, and some subirrigation out of Toppenish Creek.

About 1892 or 1894, I think it was, we appropriated $20,000 for the purpose of building a ditch to irrigate some Indian land. Prior to that time very little irrigation had been done on the reservation. White settlers had come into the country, canals had been taken out, water had been diverted from the Yakima River and actually appropriated and put to beneficial use, and the lands reclaimed almost to the total extent of the low-water flow in the Yakima River This canal was taken out and it carried about 150 cubic feet of water, and it has been used continuously ever since.

In 1903 the Indian Office filed an appropriation, or notice of an appropriation, of a thousand cubic feet of water in this river on behalf of the Indians. In other words, the department made no claim that the Indians were entitled to half the water because their lands bordered the river, but it recognized that if the Indians should get water for their lands they should get it by appropriation, according to the laws of the State of Washington.

But the records at the Indian Office will show that this appropriation was made out of the surplus waters of the Yakima River, and not out of the low-water flow. It recognized that all the low-water flow had been appropriated. There is an abundance of water—high water—in the Yakima River until along about the middle of June, and this appropriation was made out of that water. The notice specified, as the records in the Indian Office will show, that the appropriation was made not out of the low-water flow, not for the low-water season, but out of the surplus waters, in order that there might be water sufficient to produce two crops, possibly the first two crops in the year, recognizing that beyond that they had no legal right; that there was no water to appropriate.

Mr. POINDEXTER. The Government was the trustee. Which one of the bureaus of the Government was looking after the interests of the Indians in that regard, or had been looking after them? Who was responsible for their failure to comply with the terms necessary to appropriate the water at the low stage of the river?

I merely call attention to the fact that when the case of these Indians is to be considered here as a legislative matter with questions that are in the discretion of the Congress of the United States to deal with, the Government is not in the position of one business man dealing with another business man, but is in a peculiar position, and the case ought to be considered upon that basis. The very officials in whose offices the notices were filed were agents and officials of the Government, which Government was in duty bound to look after the interests of the Indians in that regard as well as others.

Mr. JONES. I recognize that, and I am simply stating these facts to get the condition before the Senate for the position that I am going to contend for a little later.

One thing is certain, the Indians themselves did not use the water. It was there for them. They come now to Congress and plead that they want the same rights as the white man. They had the same right to divert the water; they did not do it. If they claim the same rights, then to a certain extent they are under the same duties as the white man. The white man could not sit by on his land as this water was going by and keep everybody from using it or claim that some time in the future, when he got ready to use it, he wanted to take it out and thereby stop all future development.

Of course, we recognize that they are the wards of the Government. The proper officials of the Government ought to see that their rights are protected. The officials of the Government might file their notices of appropriation, of course, but that would not hold the water unless it was diverted—unless it was used. There was nothing to prevent the Indian from taking out the water except, of course, his nature and his disposition, with which I have no quarrel; but I submit that this should not prevent the use of water by those desiring to use it and willing to divert it. But it is a fact that the water was not used on much of the reservation until the low-water flow was actually put to a beneficial use on other lands. Then, whether the officials of the Government did their duty or not, they did file the notice of appropriation, as I have specified.

The reclamation act was passed. Up to that time, as I said, we had reclaimed in that valley about 130,000 acres of land. All of the low-water flow had been diverted and actually appropriated and used. The reclamation people saw the possibility of development in this valley, and they saw by storing the water that there could be four or five hundred thousand acres of land reclaimed, including the lands of the Yakima Indian Reservation that had not been irrigated and for which water had not been actually diverted. Water rights were in a chaotic condition.

Those of you who know about the condition in the western country know that when a man comes to give notice of an appropriation of water he always gives notice of appropriating really more than he needs and more than he uses. This was the custom followed in our section. When the reclamation people went in there the claims to water in the Yakima River were three or more times the capacity of the river. So they said, "These claims must be adjusted. We recognize that

every drop of the low-water flow of the Yakima River has been actually appropriated and actually diverted and put to beneficial use, and in order for us to go in there and reclaim any land we must store all the water we can use, and whatever reclamation we do must be done with stored water." They recognized that condition. They said, "You must adjust your rights so that they will not cover more than the low-water flow in the river, so that we will have our stored water free of any claim and without interference."

For a year or two the people of that valley from the headwaters to the mouth of the river, a distance of probably 135 miles, negotiated among themselves and adjusted their rights. The Secretary of the Interior, Mr. Hitchcock, looked into the claim of the Indians. They submitted their claim to him for half of the flow in the Yakima River. He had the matter investigated not only by the legal authorities of the Indian Office, but by the legal authorities in his office, and they decided that under the treaty the Indians were not entitled to have half the flow of the river.

Right here I will say that the only language in that treaty which refers to water is the language that gives to the Indians the exclusive right to fish in the stream. It is different from other treaties that have been construed by the Supreme Court. But leaving out the construction of the treaty, which I do not consider it necessary to discuss, Secretary Hitchcock held that the Indians were not entitled by riparian rights to one-half the flow of the river. He held that they were entitled to what they had actually diverted, what they had actually put to a beneficial use, and the Secretary fixed that amount at 147 cubic feet. That was accepted in the settlement of all the water rights along the river.

There was an irrigation company that had constructed a very large canal known as the Sunnyside Canal. That was opened, I think, in 1890 or 1892. They began their appropriations away back in 1880 and developed it as rapidly as possible, claiming under their appropriation 1,050 cubic feet of water. This claim had to be adjusted in settling the water rights, and it had to be cut down by the Secretary in order to bring the water rights for the water users of that valley down to the amount of the low-water flow. This claim, with the others that had been scaled down, still exceeded the low-water flow.

Finally the Government, in order to solve this problem, bought the Sunnyside Canal, and it owns and operates it to-day. It fixed the rights of the Sunnyside Canal at 650 cubic feet of water, and on this basis the rights were finally adjusted, and whatever might be necessary to a further extension of the canal above the use of the 650 feet of water would be by stored water, and settlers under it would have to pay for that stored water in addition to the cost of canals.

It has developed that system until to-day it has under irrigation about 80,000 acres of land.

Now, here is the situation. If the claim that our Indian friends put up is conceded, that they are entitled to half the water in this river, the Government property is gone, because the Government's claim to water is subsequent to other claims for more than over half the water available, and if the Indians have half there is none for the Government canal except what it has stored. So if we admit that the Indian claim to half the water is good, we suffer a greater loss by recognizing it than it would cost us to furnish them water free for all their land.

If you want to take the position of these Indians and say they are entitled to half the water of that river, all right; we must give it to them, then, by furnishing them stored water and not taking away the property and the property values not only of the people in the valley who have gone there at our invitation, but also without destroying the Government's property and the Government's money that it has put in.

In connection with this matter, the Government has also taken up what is known as the Tieton unit of this great project and has spent $3,000,000 in the reclamation of that land. If you recognize the right of the Indians to bring a lawsuit and it is determined that they are entitled to one-half the water in the river then you destroy all that property, every bit of it, because every drop of water that is taken for that canal and for that unit has to be taken from the water flow of the Yakima River and replaced by storage water.

Mr. CLARK of Wyoming. Will the Senator permit a question? The Senator referred to the Tieton unit. Has that been pretty generally taken up?

Mr. JONES. Practically all of it.

Mr. CLARK of Wyoming. Can the Senator inform us what price the settler had to pay for the land on that unit?

Mr. JONES. The settler has to pay $93 an acre for water alone for that land.

Mr. CLARK of Wyoming. I knew it was a very large amount.

Mr. JONES. It is the highest, I suppose, in the United States. The lands can stand it. The lands are very valuable. They are wonderfully productive and fine fruit lands.

So we are confronted with that proposition, and that is something I want to avoid. If you throw this matter into court, no matter how it comes out, the Indians will not gain anything; the people of the valley will suffer and the Government will lose more than it would cost the Government to furnish the stored water for every foot of land on the reservation. If the Senate wants to say that these Indians are entitled to water for every acre of the reservation, well and good; I would be glad to have it say so; but I suppose that it is not possible for us to get that done. So I am supporting here a proposition to give the Indians something that they do not have now, and if this legislation is not passed we say we are not willing to recognize them as being entitled to anything. I am willing to follow the recommendation of Secretary Fisher, who says this with reference to Secretary Hitchcock's decision:

> Secretary Hitchcock had lawful authority to limit the rights of the Indians in the low-water flow of the Yakima River, and his limitation thereof to 147 cubic feet per second, which was a part of the general settlement of water rights in the valley, is valid and binding.

Then he goes on in his report to say, however, that while that was legal and binding he hardly thought it was an equitable adjustment. He thought that by reason of the fact that these are wards of the Nation they ought to be given enough to irrigate a sufficient amount of land to furnish a home for every Indian there. So he urges as an equitable adjustment of the matter instead of giving to the Indians 147 cubic feet of water, which was all they were entitled to of the low water flow according to his decision, that we shall give them 400 cubic feet of water, or a sufficient amount of water to irrigate 20 acres of land out of each 80 acres allotment under this canal—that is, we furnish each man, woman, and child a free water right for 20 acres of land and make available water that can be acquired for the other 60.

Now, it is suggested that 30,000 acres have been irrigated, and we are allowing water for only 2,000 acres more. More than that amount of land has been partly irrigated on this reservation, but not by a water right that is recognized as attaching to the low water flow.

Many persons have gone in there under this surplus-water appropriation and have reclaimed land. They can get a second crop of alfalfa out of the surplus water and before the low-water season comes; but every year we have had contentions and trouble about getting water when we get to the low-water flow.

In determining these rights in the adjustment in 1905 one of the conditions imposed by Secretary Hitchcock before he would adopt a reclamation project was that suits that had then been commenced with reference to water rights in this valley should be adjusted and settled, and those suits were adjusted and were settled.

So, while it is true that more than 30,000 acres of land have been brought under irrigation, nothing like that amount has a good water right; that is, a water right that is good in the low-water season. That is what I mean by that. This provision recognizes the possible free use of water to more than 32,000 acres. Out of this, as a matter of fact, only about 14,000 acres has a good water right. There are about 18,000 acres of land that belonged to Indians who have died and that was sold to other people, who thought they were entitled to some irrigation rights. Possibly some water had been used on some of those lands during the high-water flow. They may have what we call a partial water right.

The second clause of the amendment recognizes this situation and allows the Secretary to make an equitable adjustment. There may be a part of this land that will get its water right without having to pay anything, while some may have to pay for half a right and some for all.

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to his colleague?

Mr. JONES. Certainly.

Mr. POINDEXTER. On the particular provision the Senator is now calling attention to—of course it is only a suggestion and I do not mean to say that it would be a proper settlement of the case—but by comparison with the provision for the 18,000 acres of land which the Senator refers to as now owned by white men, why should there be a discrimination as to the 70,000 acres that are owned by Indians? You allow the Secretary of the Interior to make an equitable adjustment with white men who own the 18,000 acres, and yet the bill provides that the Indians who own the 70,000 acres shall pay for the water.

Mr. JONES. The 70,000 acres is land upon which no water has ever been placed. It has no water right at all by diversion and use. That is the basis for that. A part of the 18,000 acres has actually been irrigated already in the surplus water season or otherwise, as I said.

Mr. POINDEXTER. I do not think that distinguishes this situation at all. The question now before the Senate for disposal is the question, Who shall pay for the water, whether it has already been obtained, or whether it is to be obtained? The 18,000 acres is a part of the Indian allotment. The 70,000 acres is a part of the Indian allotment. There is no reason in the world why, because of the fact that some of the Indians have died and the land has gone into the hands of white men, their lands should occupy a preferential status to that which remains in the hands of the Indians.

Mr. JONES. Of course, the Senator does not intend to do it, but he misrepresents my position or the position of the Secretary, as evidenced by the provision in the bill, because this was drawn in the Secretary's office and recommended by the Secretary. The provision is not made because people bought the lands of Indians who died. It is made because, when they bought the land, water had already been used on it and was then being used on it, and therefore they may have some equitable rights to the use of the water. There was some kind of a water right to some or all of this land.

There are three classes of land recognized in this bill: First, the 32,000 acres for which the Secretary recognizes that the Indians are entitled to a full free-water right because of water that had been diverted and used on the land because of the fact that Secretary Hitchcock, in the opinion of the present Secretary, did not make a sufficient allowance. Then there is included the 18,000 acres of land upon which water had also been used, but for which there may be an imperfect water right and which has passed into the hands of white people who bought it after such water had been put on it.

Some of these people may have a good claim to a full water right for their land; some of them may not, some of them may, be entitled to surplus water out of the river. This condition actually exists, and the Secretary felt that it should be recognized and adjusted equitably. What their actual rights are we do not know, but leave them for the Secretary to ascertain and determine.

Then there is another class of these lands to which water has never been applied. That is the 70,000 acres. It seems to me that the distinction with reference to these three classes of land is very plain.

I do not like to take up too much of the time of the Senate, and yet this is the most important proposition that I have presented since I have been in Congress; affecting not only the interests of my locality, but also affecting the interests of the Government. We have a situation there that is unfortunate. The lands on this reservation are not worth anything without water; that is true. They will produce hardly a spear of grass without water; it is absolutely desert land without water, but the water has been taken out in perfect good faith at the invitation of the Government and applied to a beneficial use; other lands have been reclaimed, and there is no water available for much of these lands unless it be stored, unless you take it away from these people who have made a beneficial use of it.

We ought not to do that; and if the Indians are legally entitled, by reason of their treaty, to half the water of the Yakima River, or a sufficient amount to irrigate all the irrigable lands on the Yakima Indian Reservation, it is the duty of Congress to provide that water without taking it away from those who are already using it, and without destroying values in one of the most prosperous sections in this country.

I shall find no fault with the Senate if it provides in this bill for water free to all the lands of the Yakima Indian Reservation. As I said, I want justice done the Indians, and the more Congress will do for them the better I will be pleased, but something must be done and done now. Neither the Government nor that locality nor the Indians can afford to have this matter go into court. At the end of possibly 5 or 10 years of a lawsuit, with property values disturbed and destroyed, what will you have for the Indians? Suppose the court says that they are entitled to half the water. That does not put it on the Indian's land; that does not build up his farm; that does not make his crops grow—not at all; but it destroys the values which are in the valley now; it destroys the community. It not only destroys the community, but it destroys more money and property of the Government itself than it would cost to buy sufficient stored water for all these lands. Under the Sunnyside Canal alone the Government would lose $2,000,000.

You may say the Government ought not to have gotten into this situation. That may be true, but it is in it. It has bought the Sunnyside Canal and extended it. The Tieton Canal and its reservoir have been built and over $3,000,000 expended. The people now are paying it back at the rate of $93 an acre for the water right. Are you going to destroy that value simply because the Indians have a claim by reason of a treaty made in 1855, which is vague and uncertain in its terms? I say, instead of doing that, if you think they have an equitable claim, you should appropriate in this bill now a sufficient amount to recoup the Indians, because we have reached a most critical stage. Unless legislation of this kind is passed we are going to get into the courts; we are going to have litigation. Every water right will be clouded and unsettled. Development will cease and values will fall.

This matter was put in the bill at the last session of Congress; it was not agreed to in conference, but a provision was inserted directing the Secretary of the Interior to fully investigate the situation and to make a report to Congress as to what ought to be done in view of the situation there. Pursuant to that direction the Secretary has submitted the provision in this bill. The Secretary of the Interior visited the Yakima Reservation personally; he had a hearing with those Indians; he talked the whole matter over with them—heard their side, looked into the whole situation—and he is thoroughly familiar with it.

What did some of those Indians say? What did some of the Indians want to do? They said, "We do not want the white man on here at all; we want our lands as they have always been." They did not want to irrigate them; they did not want to develop them. It is not their nature; it is not their disposition to do so. They want that country to continue in its present condition. As a matter of fact, most of the lands that are farmed passed into the hands of the white people by lease or otherwise. The lands that are now farms are largely farmed by white people under lease. They are getting the benefit.

As I said a few moments ago—and I think I know what I am talking about—I know that the great opposition to this proposition comes from those who have purchased land of dead Indians and who expect and hope to get water rights free.

Mr. TOWNSEND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Michigan?

Mr. JONES. I do.

Mr. TOWNSEND. Can the Senator from Washington tell us whether any of these irrigation works have been instituted and completed in whole or in part by the Indians' money—by money which belongs entirely to the Indians?

Mr. JONES. No; they have not.

Mr. TOWNSEND. Has the Government expended all of the money?

Mr. JONES. Practically all of it. Some of the labor on the canal, which was built in 1894, was Indian labor, but I think they got paid for it out of the money that we appropriated. In most of our appropriations, if not in all—I will not say whether in all or not—there is a provision that such expenditures shall be reimbursed, but none of it has been yet reimbursed, and it is hardly fair, even, that we should require that money to come back out of the tribal fund, because, as I said a moment ago, the benefit has come to individual Indians and to individual allotments.

Mr. President, what benefit does the Indian get out of this? Well, he gets this: He gets a water right for 20 acres of land out of his allotment. What is that worth with that water right? It is worth $250 an acre. That is what it is worth, and that is what a white man would get out of it. What is the balance of his allotment worth with a sure prospect of water? It is worth $200 an acre. He can take the other $50 dollars and buy a water right. That is what this bill would do for the Indian. It will make 20 acres of their allotment worth $200 or $250 an acre; it will make the remainder of the allotment worth at least $150, if not $200, an acre. Does that look very much like damage to the Indian? But few allotments throughout the country are worth this, and these lands were not one one-hundredth of this valley when the treaty was made. This value has come too largely by the development that would be destroyed if the Indian's claim goes to court.

Some of the protests refer to the bill which is known as the Jones bill of 1906. What did the bill provide? It was indorsed by Secretary Hitchcock and to meet one of his requirements in connection with the reclamation project. It provided that each Indian allottee might sell so much of his allotment as might be necessary to buy a water right for 20 acres. What did some of the white men on that reservation do? They told the Indians that that bill required them to sell 60 acres of their allotment; they made the Indian believe it; they denounced me and they denounced the bill which I had had passed, because they said that it compelled the Indian to sell 60 acres of his allotment in order to buy the water right for 20 acres, when the bill had no such purpose within its language or intent, but simply permitted the

Indian to sell so much of his allotment as might be necessary to acquire a water right for the other 20 acres. He did not have to sell a foot of it.

If he had money in his tribal fund to his credit, he could use it in the purchase of a water right, not only for 20 acres, but for the whole 80 acres, if he wanted to do so, and have the whole tract with a water right. So, in this case, misrepresentations have been made to the Indians with reference to the purpose of this measure.

Mr. President, this measure is for the real benefit of the Indians of that valley. I do not want to injure them. I recognize their helpless condition and their helpless estate; no man will go further to protect those Indians than will I. As I have said, I think I know what is behind this proposition; I know of the conditions there. It is an unfortunate situation. Not only in behalf of the Indians, but in behalf of the locality and in behalf of the Government we should pass some legislation of this kind.

To my mind, it is useless to discuss the legal phases of this matter. It is a situation that confronts us that must be met by action; in other words, it is a condition and not a theory, legal or otherwise, that confronts this Congress. You may reject this bill, Mr. President; you may put this proposition into court, but the Government of the United States will lose far more money than it will cost to buy a free-water right for those Indians for every acre of the land. Put it into court, and the Indian will gain nothing; and you destroy the prosperity of what is to-day one of the most prosperous sections of the United States.

That is the situation and that is the reason I am so anxious about this matter. I want to see those Indians prosper; I want to see those lands reclaimed; I want to see them irrigated. It is said in either the protest which has been read here or in a letter that was submitted by some man who knows nothing about conditions there, "Let us go on and develop the Wapato unit as contemplated heretofore, and we can do it much cheaper than this." What does that mean? That means that thousands of acres of as rich land as there is in the country would go forever without irrigation.

The Secretary proposes—and this my conservation friends should take into account—the very highest possible development. He wants to make available every drop of water that is available and to use it upon every acre of land that can possibly be reclaimed, and accordingly the plans have been drawn up.

The proposition involved in this legislation contemplates the highest possible irrigation development. Instead of reclaiming 50,000 or 60,000 acres, as was the contemplation in the Wapato as originally called, and when the first canals were constructed, this contemplates the reclamation of 120,000 acres, with possibly 14,000 or 15,000 acres more. That ought to be done. That would be beneficial to the Indians.

You may say it will cost more. Possibly it may—probably not more per acre, but more in the aggregate—but what does it mean? It means that more Indian allottees will have their lands irrigated than if the other method is followed. Under the other method probably 60,000 acres will be reclaimed and probably 700 or 800 Indian allottees will get some benefit, while under this proposition 120,000 acres will be reclaimed and 1,800 Indian allottees will get the benefit. This is worth something to consider, even from the Indians' standpoint. Yet our friends who have presented the protest do not take that into account; their eyes are centered on their own individual interests. That is all there is to it.

Mr. President, I do not feel that I ought to take any more of the time of the Senate. I do feel, however, that I know more about this situation than any other Senator on this floor, and I do not feel that I am belittling the knowledge of other Senators when I say that. I make the same appeal to the Senator from Massachusetts that the Senator from Minnesota [Mr. CLAPP] made to the Senator from Indiana [Mr. KERN] this morning, and I hope that it will bear the same fruit and the same result. I think I am just as devoted to the interests of the Indians as is the Senator from Massachusetts, but I want also to look at these other interests. I want them taken care of.

If the Senate thinks that we are not making a sufficient provision for the Indians, I will be glad to have you make whatever you think ought to be made, but you must do something; if you do not, you work irreparable injury upon a prosperous and happy community, and you probably will entail upon the Government great loss.

The Government has acquired this property under the Sunnyside project. I think they have spent over $2,000,000 and they have reclaimed, since they took charge of it, nearly 40,000 acres of land. The water-right charge for those lands is $52 an acre. If you take this water away and give it to the Indians, you take it away from those people and destroy their homes. If you say the Indians are entitled to it give it to them, give them their water free; and if 32,000 acres is not enough, give them free water for 120,000 acres—the Government would be the gainer by doing so—instead of bringing us into lawsuits.

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to his colleague?

Mr. JONES. Certainly.

Mr. POINDEXTER. Before the Senator takes his seat, I want to ask him, if he can do so without impropriety, to state in general who the parties are who he says are interested in this matter, who have received lands from the Indians, and who are fomenting this criticism of the amendment.

Mr. JONES. It would not do any good for me to give the names.

Mr. POINDEXTER. I notice a clause in the amendment which makes a special provision, as I understand, for all the lands that have been conveyed from the Indians and to which the Indian title has been extinguished. Those people seem to be in the class to which the Senator is referring. They are well taken care of in the amendment, and I scarcely see how they could be interested in the defeat of this measure.

Mr. JONES. They do not think they are taken care of. They are afraid the Secretary will say they must pay for their water right. It leaves the matter to him to adjust. They are afraid that he will say, "You have got to pay thirty or thirty-five dollars an acre for your water right."

Mr. POINDEXTER. But the provision fixes the liability of the Indians for their proportionate share of the land and leaves the remainder of it to the equitable adjustment of the Secretary of the Interior.

Mr. JONES. Well, I have tried to make that plain.

Mr. POINDEXTER. I scarcely see how those people could be interested in the defeat of this measure.

Mr. JONES. I can see how it is. The Senator may not possibly see it, but I can. If they can get their water, if the Indians can finally establish the right to one-half the water of that river, then these people have their water right to that land without any pay at all, without any price whatever; but if they can not do it, if it is left to the Secretary of the Interior, and he looks into the equities and says, "Here, you gentlemen have not a good water right to your land; you have only got the right to use the water during the high-water flow, and for the months of July, August, and September, when the water is low, you will have to pay for the water right," then they will have to pay for it, and that is what they hope to avoid.

Mr. POINDEXTER. I want to say to the Senator, in passing, that I think he is mistaken in the basis of his argument that the people who are interested in protecting the Indian rights in this matter are opposed entirely to the amendment or to the irrigation project.

Mr. JONES. What do they want to do?

Mr. POINDEXTER. That is not the question. They want to make an equitable adjustment of the rights of the various parties. That is what they want to do.

Mr. JONES. How are they going to do it?

Mr. POINDEXTER. If the Senator desires me to state that now, I will do so.

Mr. JONES. I do.

Mr. POINDEXTER. Or I will wait until he takes his seat.

Mr. JONES. I should like very much to have the Senator state it now.

Mr. POINDEXTER. It will take me some little time.

Mr. JONES. All right.

Mr. POINDEXTER. I prefer to wait until the Senator concludes. Then I will state it.

Mr. JONES. Of course, any proposition that will adjust this matter satisfactorily is agreeable to me, but I want our friends who want to do justice——

Mr. POINDEXTER. For the purpose of allowing the Senator to comment on it I will say that one way in which we propose to adjust it is to strike out the word "thirty-two," in line 13, page 60, and insert "sixty-four."

Mr. JONES. I shall not object to that.

Mr. POINDEXTER. The Senator does not object to it?

Mr. JONES. Not at all.

Mr. POINDEXTER. I think probably we can agree on this whole thing, then.

Mr. JONES. I tried to make it plain that if the Senator——

Mr. POINDEXTER. Another amendment which I will offer is simply supplementary to that. That increases the amount of the allotment for which the Indians will receive free water, and consequently reduces the amount of the allotment for

which the charge is to be made; and so it will be necessary to strike out "seventy" in line 20 and insert "thirty-eight."

Mr. JONES. There will be no issue at all between my colleague and myself upon that. The only trouble we are going to have is with the Senator from Massachusetts.

Mr. POINDEXTER. I do not anticipate any trouble with him. Another proposition in this adjustment which I think we are going to agree on is to strike out the words "said lands," in line 23, and insert in the place thereof "the undivided tribal property of the allottees thereof," so as to make this charge for 40 acres of each allotment against the undivided tribal property of the allottees, instead of against the land.

Mr. JONES. That is, the Senator would not intend to make the charge against any portion of the allotment except that which belongs to the allottee who gets the benefit from the irrigation?

Mr. POINDEXTER. Yes.

Mr. JONES. I should have no objection to that.

Mr. POINDEXTER. I was anticipating, while the Senator was speaking, that his argument was based upon a misunderstanding of the position of the Indians themselves. They are not objecting to this improvement.

Mr. JONES. I think the Senator does not exactly understand the petition of the Indians, but that is a matter that does not make any difference. What I want to do is to get this matter adjusted without getting into court. I want to appeal to the Senator from Massachusetts—and I think in this appeal my colleague will join me—that if this provision is not satisfactory as it is, let us make it satisfactory; but let us meet a local situation that is of the most serious character in some way so that it can be adjusted without getting into court, and without disturbing all these values, and disturbing the values of the Government's property as well.

Mr. LODGE. Mr. President, if the Senator will allow me, I have no desire in this matter except to protect properly the rights of the Indians. It did not seem to me that this amendment protected them properly. They have asked in their petition to go into court, and it seems not an unreasonable request; but I fully appreciate the objections to that course, which I think would be bad for them and for all concerned, because it would lead to great delay. I think they ought to have a larger share than is allotted to them here, however. On the Tieton and Sunnyside projects, as I understand, they are allowed 40 acres, and here the Indians are allowed only 20 acres.

Mr. JONES. No, Mr. President; the Senator misunderstands that. The Indians are allowed 80 acres, but they are allowed a free water right for only 20.

Mr. LODGE. I mean the water right.

Mr. JONES. Yes. They can purchase a water right for the other 60 if they desire.

Mr. LODGE. The Reclamation Service gives 40 acres as a minimum farm unit for settlers under the Sunnyside and Tieton projects, which embrace lands similar to these Yakima lands which it is proposed to irrigate.

Mr. JONES. That is correct. If the Senator will permit me, that means that under the Tieton unit a man can not possibly acquire a water right for more than 40 acres. Whether he has the money to buy it or whether he has not, he can not do it. But the Indian is not limited to that. He is limited to his 80 acres.

Mr. LODGE. All I want to do is to protect the rights of the Indians. It seems to me the propositions made by the junior Senator from Washington are fair and that they do preserve the Indians' rights.

Mr. JONES. They are entirely agreeable to me. I will be glad to have the Senate adopt them.

Mr. LODGE. If the senior Senator from Washington accepts those amendments, I, for my part, will withdraw the point of order.

Mr. JONES. I am very glad of that, because I am glad to accept the amendments. I want to benefit the Indians and do everything that Congress will sanction in the matter.

Mr. GAMBLE. Will the junior Senator from Washington submit his amendments, so that the Senate may have them?

The PRESIDENT pro tempore. The amendments have not yet been submitted.

Mr. POINDEXTER. I submit the amendments now; and in addition to the ones I have stated I submit the following changes in the language, so as to make it more certain:

I move to insert, in line 22, page 60, after the word "that," the words "portion of said waters"; after the word "which," in line 23, to insert the word "proportionate"; after the word "charge," in line 23, to insert the words "and lien," so that it will read as stated in the amendment that I send to the desk.

The PRESIDENT pro tempore. The proposed amendment to the amendment will be stated.

The SECRETARY. On page 60, line 13, it is proposed to strike out "thirty-two" and insert "sixty-four"; in line 20 it is proposed to strike out "seventy" and insert "thirty-eight"; in line 22, after the word "that," it is proposed to insert "portion of said waters"; in line 23, after the word "which," it is proposed to insert "proportionate"; in the same line, after the word "charge," it is proposed to insert "and lien"; and in the same line it is proposed to strike out the words "said lands" and insert "the undivided tribal property of the allottees thereof," and a comma, so as to read:

That the lands within the project on the Yakima Indian Reservation owned by Indians in fee or otherwise to the extent of 64,000 acres, estimated to be necessary for the support of Indians allotted within the project, for which a water supply of 400 cubic feet per second of time is required, shall receive water free of any and all cost or charge on account of said storage works.

That other lands under Indian ownership to the extent of 38,000 acres additional, more or less, shall bear the proportionate acreage cost for providing said storage waters in the river, except that portion of said waters provided for in the preceding paragraph, which proportionate cost shall be a charge and lien against the undivided tribal property of the allottees thereof, to be paid on such terms and under such regulations as the Secretary of the Interior shall prescribe.

Mr. OWEN. This amendment is simply perfecting the amendment of the Senator from Washington?

The PRESIDENT pro tempore. Yes. The question is on the amendment of the Senator from Washington to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. In the absence of objection, the amendment as amended will be agreed to.

Mr. OWEN. I object to that amendment, and make the point of order against it.

Mr. JONES. Mr. President, I do not know whether this is subject to a point of order or not, but I want to appeal to the Senator from Oklahoma not to insist upon his point of order. I know that he does not desire either to injure those Indians or to injure that locality or to bring loss upon the Government. I do feel that if he recognized the situation there he would not insist upon his point of order. While, of course, the interests of the Government are at stake, it is largely a local proposition, and it means more to the locality in which I have lived during the last 24 years than any other legislation could possibly mean to any locality in the country. I want to appeal to the Senator from Oklahoma just as strongly as I possibly can, in behalf of my home and in behalf of the people with whom I have lived for so many years and whose interests I want to promote along with that of the Indians, not to insist upon his point of order.

Mr. KENYON. I should like to inquire of the Senator how much is appropriated from the Federal Treasury by this project?

Mr. JONES. In the provision here $1,800,000; but the great part of that is to come back from those who acquire the water rights. The white people who get this other land, the land that is not furnished with free water right, must pay back to the Treasury of the United States the amount apportioned for their water right; so that while we appropriate $1,800,000—I want to say that in conference that might be arranged to be spread over three or four years—probably half of it, anyhow, will come back to the Treasury.

Mr. KENYON. Within what time?

Mr. JONES. The Secretary is left to arrange the manner of payment. Under the reclamation act it is payable in 10 annual installments. The Secretary can fix it in five annual payments, however, if he desires. I think that would be a very reasonable adjustment to make of it, so far as that is concerned. So a good part of this money will come back. I hardly believe that the provision is subject to a point of order. It seems to me it is a provision that is germane to the bill. I do hope, however, the Senator from Oklahoma will not insist upon his point of order.

Mr. OWEN. I should like to ask the Senator from Washington how much of this $1,800,000 will be repaid to the Government?

Mr. JONES. It was estimated that under this provision, as it was originally framed, about $1,300,000 of it would be paid back into the Treasury. Just what effect the amendment of my colleague will have on that amount I can not say. It will somewhat lessen it.

Mr. OWEN. I should like to ask the Senator from Washington what is the explanation of the $500,000 that will not be repaid to the Government?

Mr. JONES. That went to pay for the free water rights for the Indians. Under this bill we furnish a water right free—that is, store water free—for 32,000 acres. The cost of stor-

ing is estimated at about $15 an acre. So that $500,000, in effect, went to pay for a free water right for the Indian allottees. That goes to the Indians; so that whatever does not come back into the Treasury goes to the benefit of the Yakima Indians, and to nobody else.

Mr. OWEN. Were there not certain white settlers there who had previous water rights in this area?

Mr. JONES. No; not in this reservation. The reservation was made in 1855, and there was no irrigation going on then at all.

Mr. OWEN. Do I understand that the amendment which has been proposed to this amendment in effect cures the protests which have been filed against it?

Mr. JONES. I understand so, and it is entirely satisfactory to me.

Mr. OWEN. I dislike very much to make a point of order about a matter in a Senator's State in which he is so deeply interested.

Mr. JONES. I hope the Senator will not do it.

Mr. OWEN. These points of order are only made against Oklahoma, apparently.

Mr. JONES. I have not made any point of order against Oklahoma.

Mr. OWEN. No; I know that; but Oklahoma seems to be peculiarly the object of these points of order.

Mr. JONES. I hope the Senator will not take it out on me.

Mr. OWEN. I will say to the Senator that I do not think the appropriation of $1,800,000 out of the Federal Treasury on this bill in this way without further hearing is good practice.

Mr. JONES. Mr. President, let me say to the Senator that I know it is a large amount, and yet this is not without investigation. As I said, this was in the bill before, and the Secretary recommended it. Then we cut it out and passed a resolution requiring the Secretary to report on it to Congress, and the Secretary sent his agents out, directing them to investigate the whole situation and report. The Secretary visited there himself and looked into it and then submitted this recommendation, so that the matter has been investigated very carefully and very thoroughly.

Mr. OWEN. This is now in accordance with the recommendation of the Secretary?

Mr. JONES. It was as put in here. We are more liberal to the Indians than the Secretary with the amendment we have put in.

Mr. OWEN. I will withdraw the point of order.

Mr. JONES. I certainly appreciate that.

The PRESIDENT pro tempore. The point of order is withdrawn.

Mr. POINDEXTER. I ask unanimous consent to print in the RECORD in connection with this matter, in order that it may be in the RECORD for use in the further consideration of it, two letters on this subject from Mr. Brosius, the agent of the Indian Rights Association, a petition from the Yakima Indians and allottees of the Yakima Indian Reservation dated January 30, 1913; and a series of resolutions of the Yakima Water Users' Association.

The PRESIDENT pro tempore. Without objection that order will be made.

The matter referred to is as follows:

INDIAN RIGHTS ASSOCIATION,
Washington, D C., February 20, 1913.

We respectfully urge consideration of the inclosed copy of a protest of the Yakima Indians, State of Washington, against the amendments of the Senate incorporated in the Indian appropriation act (H. R. 26874, calendar No. 1071), which appropriates $1,800,000 for constructing storage reservoirs on the Yakima River, Wash., said amount being chiefly reimbursable from the value of water rights appurtenant to the lands allotted Yakima Indians.

The inclosed memorial (H. Doc. No. 1304, 62d Cong., 3d sess.) presents the claim of the Indians more definitely and fully.

We inclose the resolution of the Yakima Reservation Water Users' Association of February 8, 1913, protesting against the legislation in question and urging that the status of the water rights appurtenant to the Yakima Reservation lands be determined by proper legal proceedings.

The proposed legislation limits the free use of storage water to 400 cubic feet per second, estimated to be sufficient for the irrigation of about 20 acres per capita. The Indians insist that they have heretofore used about 1,000 cubic feet of water per second, and that the limitation to 400 cubic feet per second deprives them of water for irrigation to which they are justly entitled by prior appropriation and by riparian rights.

We call your attention to the fact that the Indians whose land and water rights are affected by this legislation are citizens of the United States, that they have a vested right to the allotted lands and can determine by judicial proceeding any right claimed by them to the waters of the Yakima River for irrigation to as full an extent as may be done by other citizens. Yet, notwithstanding the fact that these Indians are sui juris, the Government controls their property so that their funds are not available for their use in securing a judicial determination of their rights. It will be very difficult for the Indians to secure a sufficient contribution from their private means to prosecute the necessary litigation and, indeed, they should not be compelled to do so.

We submit, therefore, that it is most important to determine the right of these Indians to the use of these irrigable waters before the proposed legislation is adopted.

Very respectfully,

S. M. BROSIUS,
Agent Indian Rights Association.

WASHINGTON, D. C., *February 24, 1913.*

Hon. MILES POINDEXTER,
United States Senate.

SIR: In the matter of legislation incorporated in the pending Indian appropriation act in the Senate (pp. 60–61), permit me to make a further suggestion. I feel quite sure that if water for irrigation sufficient for 40 acres for each allottee (being one-half of each 80-acre allotment already made) will be furnished free of storage charges, and each allottee be permitted in his discretion to buy the water right for the balance of his allotted lands by creating a lien upon his pro rata share of the undivided tribal property, it will meet with the approval of the Indians and their friends.

There will be ample funds derived from their tribal estate to apply to purchase of the additional water right. The value of the timber-lands belonging to these Indians, I understand, is upward of $3,000,000.

We hope you will be able to make some provision of this kind, and then there will not be the dissatisfaction over defeat of the present legislation which may retard the development of the Yakima country.

If not over 20 acres of a free water right is secured by legislation, we very much fear that litigation will be commenced to determine the Indian right to water, and in that event the whole question will be very much delayed in settlement.

The Indians are entitled to more than 20 acres with a free water right, and we trust that they will secure justice.

Very respectfully,

S. M. BROSIUS,
Agent Indian Rights Association.

Petition.

To the COMMITTEE ON INDIAN AFFAIRS,
House of Representatives and Congress, Washington, D. C.:

We, the undersigned Yakima Indians and allottees of the Yakima Indian Reservation, have assembled in council January 30, 1913, at White Swan, Wash., on the Yakima Indian Reservation.

We pray for what we think a just right and a right that belongs to us. First and above all we want our water canals on the Yakima Indian Reservation to remain as usual. We protest against the bill No. 6693, which W. L. JONES has prepared to introduce at this session of Congress. We find ourselves unable, under existing conditions, to comply with the requirements of the bill H. R. 26874. We have given this bill (6693) careful investigation, and have discovered it an injury to the Indians on this reservation, a depriving scheme, a scheme that will gradually grind our 80-acre allotments down to the minimum of 20 acres. Consequently, we pray and ask the Committee on Indian Affairs in both the House of Representatives and Congress to give our protest relative to the bill H. R. 26874 a thorough investigation. We bitterly oppose any scheme that arises from or is established by the reclamation act on the Yakima Indian Reservation. The present canals on the Yakima Indian Reservation were all erected from funds of the "Yakima Indian tribal fund," and they are of capacity sufficient to hold and flow water sufficient to irrigate all lands under these ditches; should we get our just claim of the Yakima River and Ahtanum Creek and a flow of these waters to supply the capacity of these above-mentioned canals.

As to our claims of the Yakima River and Ahtanum Creek, we claim enough water to irrigate all our lands which are riparian to these streams. This river and creek are evidently known by the Government as the east and north boundary lines. Ahtanum Creek is a tributary of the Yakima River and the north boundary line, while the Yakima River is the east line. And both have a sufficient flow of water to supply all the lands available under the ditches, if we are granted our request.

Further, we claim all waters such as creeks, rivers, and spring waters within our boundary lines, and we pray and ask Congress and other officials in Washington, D. C., within their jurisdiction, to reserve these just rights to us.

WEYALLUP (his x mark) WAYACIKA,
Chief Judge Yakima Tribal Court.
And 141 other members of the Yakima tribe of Indians.
LOUIS MANN,
Corresponding Secretary of Yakima Indian Councils.

Be it resolved, That it is the sense of the Yakima Reservation Water Users' Association that the plans to irrigate the Yakima Indian Reservation suggested by the United States Reclamation Service and Secretary Fisher, involving an expense of between $5,000,000 and $6,000,000, be not approved. That it is the sense of the association that the old plans heretofore suggested by the Indian Department of the United States for the irrigation of the lands on the Yakima Indian Reservation irrigable by gravity flow of water, and which system has been practically two-thirds completed and can be completed for an expenditure of approximately $150,000, be the plan pursued in further irrigation on the Yakima Indian Reservation as to lands now irrigable by gravity flow. That if any land must or can be irrigated by pumping plants, that such lands be charged with the full expense thereof, and that no part of such expense be charged against lands which can now be irrigated by gravity flow by the last-named system. That we oppose the passage of the proposed bill to appropriate $1,800,000 for stored water.

Be it resolved, That it is the sense of the Yakima Reservation Water Users' Association that the United States Government should immediately bring or cause to be brought a suit to secure for the irrigable lands on the Yakima Indian Reservation a prior right to such of the waters of the Yakima River as will furnish sufficient water to irrigate the irrigable lands on such reservation. That the legal status of the water rights appurtenant to such reservation should be established and settled by proper legal proceedings at once.

YAKIMA WATER USERS' ASSOCIATION.
FRANK WILLIAMS, *President.*
HENRY JONES, *Secretary.*

FEBRUARY 8, 1913.

At a regular meeting of the Yakima Reservation Water Users' Association, held at Toppenish, Wash., on February 12, 1913, the following resolutions were unanimously adopted:

Whereas the unsettled condition of the water rights on the Yakima Indian Reservation since the arbitrary cutting down of the water supply by the Reclamation Department in 1905 have retarded development of lands and kept the Indian more dependent instead of improving his condition; and

Whereas the prior filing to the waters of the Yakima River by the superintendent of the Yakima Indian Agency, which filing is of record, was ignored by the Reclamation Department when apportioning the water rights in the Yakima Valley, as were also the treaty and riparian rights of the Yakima Indians; and

Whereas the only manner in which the water rights of reservation lands can be permanently settled is by the courts; and

Whereas we believe the proposed legislation will be found inoperative and only result in further delay, since the signature of 80 per cent of allottees and land owners, as required in the bill, can not be obtained under the conditions named; and

Whereas at no time in the past have any representatives of the Government taken sufficient time to thoroughly investigate the claims of the Indians as to their water rights, nor met with and consulted the water users, land owners, and allottees on the ground; and

Whereas the construction of an irrigation system on the plans prepared by the Reclamation Department would fail to meet the changed physical conditions due to the construction of the drainage system and in addition thereto would be practically prohibitive in cost: Therefore be it

Resolved, That we approve the request of the Indian Rights' Association, through their agent, S. M. Brosius, that the Attorney General be instructed to bring suit at once to determine the rights of the Yakima Indians to the natural flow of the Yakima River, a boundary stream of the Yakima Indian Reservation, and that owing to the urgency of the case and the constantly recurring water shortage each season every effort should be made to obtain a decision before the low-water period of 1913.

Resolved, That we request the appointment of a congressional committee to investigate the arbitrary attitude and acts of the Reclamation Department toward the Yakima Indians in having, since 1905, diverted waters previously filed on and appropriated to beneficial use by the Yakima Indians, and to report before the low-water period of 1913 in order to avoid litigation and further damage.

Resolved, That we protest against Senate bill No. 6693 and recommend that all legislation for appropriations of money for construction of a permanent irrigation system on the Yakima Indian Reservation be deferred until the Indian rights shall be determined in the manner aforesaid, and that full and sufficient water for all lands now irrigated be supplied without storage charge pending this decision.

Resolved, That we approve Secretary Fisher's recommendation that the reservation irrigation system be constructed by the Indian Department.

Resolved, That we protest against the adoption of the plans of the Reclamation Department for irrigating these lands as needlessly extravagant and costly, especially so on account of changed conditions since the construction of 42 miles of drainage ditch on plans prepared and executed by Engineer Martin, of the Indian Department.

Resolved, That we request the immediate appointment of a board of three engineers not connected in any manner with the Reclamation Department to investigate the present irrigation and drainage system, the total cost of which is approximately $8 per acre, and to recommend such immediate enlargement, changes, and improvements therein as shall result in a comprehensive system for watering and draining all the lands under the Wapato project, this board of engineers to be selected as follows:

One member by the President of the United States from the Board of Army Engineers.

One member by the Commissioner of Indian Affairs.

One member by the Yakima Indian Reservation Water Users' Association.

Resolved, That a copy of these resolutions be addressed to the respective chairmen of Committees on Indian Affairs in the House of Represenatives and Senate of the United States, to the honorable Secretary of the Interior, to the Commissioner of Indian Affairs, to S. M. Brosius, agent of the Indian Rights Association, to our Senators and Representatives in Congress, and others interested, and that a copy be given the press for publication.

YAKIMA INDIAN RESERVATION WATER USERS' ASSOCIATION,
F. A. WILLIAMS, *President*.
HARRY JONES, *Secretary*.

Mr. POINDEXTER. In the same connection, without printing in the RECORD, I desire to call attention to Document 1304, Sixty-second Congress, third session, being a memorial of the Yakima Tribe of Indians protesting against the passage of this amendment as it was in its original form; and, also, as the basis of the rights of these Indians in this reservation, to cite the treaty with the Yakima and other tribes of Indians in 1855. I will say in passing that by accepting the conveyance thereof from the Indians, in that treaty the United States recognized the former title of the Indians to a vast domain in which now many cities of the State of Washington are located, which is set out, an imperial area, and described in the treaty; and in exchange for that magnificent grant which the United States received from the Indians in the treaty, the United States, on its part, set aside this reservation and agreed as follows:

All which tract shall be set apart and, so far as necessary, surveyed and marked out, for the exclusive use and benefit of said confederated tribes and bands of Indians, as an Indian reservation.

It is the contention of the Indians that that grant included the waters on the land to the same extent as the soil itself.

Mr. JONES. Mr. President, as part of my remarks, I desire to have printed a letter from the Secretary of the Interior, and the parts which I have indicated here from the reports to him.

The PRESIDENT pro tempore. Without objection that order will be made.

The matter referred to is a follows:

DEPARTMENT OF THE INTERIOR,
Washington, January 22, 1913.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: The Indian appropriation act approved August 24, 1912, contains the following provision:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to investigate the conditions on the Yakima Indian Reservation in the State of Washington with a view to determine the best, most practicable, and most feasible plan for providing water for such lands in said reservation as may be irrigated, and to cause surveys, plans, and reports to be made thereon, together with an estimated limit of cost of such irrigation project and to submit his report thereon to Congress on the first Monday in December, 1912, together with such facts and reasons in support of the same as may be necessary to advise Congress fully in regard thereto."

In accordance therewith I transmit a report prepared in the field by Supervising Engineer Swigart, of the Reclamation Service, Superintendent Don M. Carr, and Supervising Irrigation Engineer L. W. Holt, of the Indian Service. The latter portion of such joint report, consisting of plans and estimates for the irrigation system, is approved. The first part of the joint report, dealing with the history of irrigation on the reservation and conditions particularly concerning the needs of the Indians, requires corrections in two respects, viz, first, in the suggestion that the cost of the irrigation system be paid from the tribal funds, rather than from the lands irrigated; this suggestion does not meet with my approval. I am still of the opinion, as stated in my letter of June 13, 1912, to Senator GAMBLE, chairman of the Committee on Indian Affairs, that the cost not only of the storage works but of the entire irrigation system referred to should be charged upon these lands, and that the suggestion made by the joint report that it be defrayed from the tribal funds should not be approved, and the reasons for my position will be made clear further on in this report.

The joint report appears to me to be wrong in a second respect, in recommending that the 32,000 acres for which free storage is to be furnished be not segregated, but that the benefit of free storage be apportioned on all the irrigated lands, thus reducing the storage charge upon all such lands. I appreciate fully the difficulties set forth in the report, but I am convinced that the plan of segregation which would generally work out so that each allottee would have 20 acres segregated to him as free from storage charge is the most feasible method of correcting the error originally made in the allotments. The course recommended in the report avoids the questions presented by those allotments which have now come into the ownership and possession of white people. The principle of Senate bill 6693, with regard to these lands, was that the Secretary of the Interior be empowered to award them water rights in accordance with the equities which should be shown to him with respect to each tract, and I believe this to be the only practicable and just solution of the difficulties presented. Some of the white people who have purchased lands from Indian allottees have been making beneficial use of the water delivered through the existing Indian ditches, and doubtless a substantial equity arises from such use. Other lands lying under the Indian ditches, physically capable of irrigation therefrom, were purchased after the construction of the ditches and, as it is alleged, were intended to be irrigated from such ditches. It is claimed that the reason why this has not been done is the lack of water in the ditches, due to the mistake of the Government in limiting the Indians' claim to 147 second-feet and to delay of the Government in working out any solution of the difficulties which arose from that limitation. If these allegations and claims are true, there would appear to be some equity in these cases also. It may be, however, that some of the white holdings will not show either one of the equities referred to. The proper solution seems to be to deal with each case upon its merits.

Mr. JONES. After full conference with the heads and legal officers of the Indian Office and the Reclamation Service, I believe that the principles and policies which should control in the constructional and administrative problems presented by this project are the following:

(1) Secretary Hitchcock had lawful authority to limit the rights of the Indians in the low water flow of the Yakima River, and his limitation thereof to 147 cubic feet per second, which was a part of the general settlement of water rights in the valley, is valid and binding. Any other conclusion would involve the acceptance of the doctrine that the Indians, by virtue of the treaty of 1853, ratified in 1859, then acquired a vested right in the water flowing in the Yakima River, which is undetermined and must forever remain undeterminable as to quantity; for it is contended that it is to be measured at any given time by what then appears to be the duty of water for that area of which, from the economic and engineering standpoints, it is then feasible to irrigate; that it must be measured 50 years hence by what then appears the duty of water for the area which it then appears feasible to irrigate, and so for any point of time in the future. This would make it impossible to measure the future water rights of the Indians at any time, would prevent all irrigation development outside of the Indian reservation, and would amount to a reservation of the total flow of the river without any obligation on the part of the Indians to utilize the water, which might thus flow forever unused to the sea. The Indian treaty negotiated in 1853 and ratified in 1859 was to make possible the permanent settlement of the Yakima Indians and their transformation into an agricultural people; to reserve an abundance of land and of water rights out of which the real needs of the Indians for farms and for irrigation water for such farms could be satisfied as such needs might be determined by Congress or its duly authorized executive agent. It was not intended to reserve either lands or water rights above that measure, or to restrict the authority of Congress, or of the Secretay of the Interior under the authority of Congress, to determine the measure of the water rights needed by the Indians.

(2) Nevertheless, it now appears that such limitation placed the Indian water right at a lower amount than sound administration and the real needs of the Indians require. Therefore, steps should now be taken to provide the Indians with additional water up to such amount without cost to them, but without questioning the legality and binding effect of Secretary Hitchcock's limitation. The best method for doing this is to furnish stored water to the Indians free of construction cost for storage up to the amount which should originally have been reserved for them.

(3) The measure of the water rights which should have been reserved for the Indians in 1906 from the low water flow was not the area of their allotments (120,000 acres in all, within the Wapato unit), but

approximately such area as would give each Indian family a farm adequate for its support under irrigation. This area has been fixed, on the recommendation of the Indian Office, at 32,000 acres, being 20 acres for each of the 1,600 allottees (men, women, and children). This would have given an Indian family of four (father, mother, and two children) water enough for 80 acres. The Government should therefore furnish stored water free of storage cost to such an amount as, together with the 147 second-feet reserved by Secretary Hitchcock, will be sufficient to irrigate 32,000 acres.

(4) The cost of storing water for the remaining 88,000 acres of the allotted lands should be paid by the Indians, or from the proceeds of their lands or resources.

(5) The water rights of white purchasers of Indian allotments and of Indian patentees in fee (free of restrictions) should be determined according to the equities of each case by the Secretary of the Interior upon the principle that such rights depend upon actual beneficial use except in so far as there is reasonable ground for finding that the failure to make beneficial use of the water is fairly chargeable to the Government. To justify such a finding the land must have been, at the time patent in fee issued or the title first passed from Indian to white, under the ditches built by the Indian Service, thus giving the purchaser or patentee in fee a basis for the belief that he could acquire a water right by beneficial use.

(6) The storage charge per acre-foot should be averaged for all lands in the valley without regard to the case of the particular reservoir from which any one unit or body of lands can be supplied. This is because that policy will result in the reclamation of the largest possible area and will thus permit the largest development of the agricultural resources in the valley. The determination of the storage charge for the Indian allotments should be made on this principle.

(7) Water service to lands in the valley should be by acre-feet without distinction between the natural flow and the stored waters.

(8) The storage works from which the Indian lands are to be served can and should be built as a part of the general storage system in the valley. The reclamation fund should not be charged with any part of such expenditure, but the cost should be paid by a lump appropriation to be expended by the Reclamation Service on said general storage system. The amount of this appropriation should be determined by multiplying the total area of the allotments (120,000 acres) by an acreage charge calculated from the assumed duty of water for the Indian lands. Of this total appropriation thirty-two thousand one-hundred-and-twenty-thousandths, or four-fifteenths, should be nonreimbursable, since the stored water in excess of 147 second-feet paid for by said fraction will be the reparation made by the United States, because the limitation made by Secretary Hitchcock is now found to have been less than the Indians are fairly entitled to and reasonably need. The remaining eleven-fifteenths of this total appropriation should be repaid to the Treasury of the United States from the Indian lands or resources.

(9) The distribution works for the allotted lands (Wapato unit) should be built by the Indian Service from appropriations made from year to year, the cost thereof to be repaid from the Indian lands or resources.

To the principles above stated the following should be added:

(10) Sound public policy and the principles of equity forbid the Federal Government to appropriate or advance public funds for the irrigation of lands allotted to Indians who are asserting a claim for water rights appurtenant to such lands contrary to the public interests and in excess of the measure of their real needs as determined by the Secretary of the Interior. Therefore no steps for the enlargement of the storage or distribution works for the benefit of the lands in the Wapato unit, or for deliveries of water thereto in excess of deliveries appropriate under the limitation to 147 second-feet, should be undertaken until at least 80 per cent of the allotted and a like per cent of the patented lands in said unit shall have been pledged by the allottees or owners thereof for the repayment of the cost of the works in accordance with the principles hereinbefore stated, nor until all other claims for, or arising out of, water rights shall have been properly waived by the allottees or owners so pledging their lands; and no benefit from the works constructed on the faith of such pledges should accrue, by enlarged deliveries of water or otherwise, to any lands within the unit not so pledged with waiver.

(11) The power of Congress to modify the treaty and reduce the Indians' water rights thereunder is unquestionable (Lone Wolf *v.* Hitchcock, 187 U. S., 553). Therefore specific legislation should be enacted embodying, or based upon, the principles above stated.

With respect to the details of S. 6693, I respectfully refer to my letter of June 13, 1912, to Senator GAMBLE, above mentioned, in which and for the reasons therein set forth it was suggested that sections 1 and 2 be amended to read as follows:

"SECTION 1. That for the purpose of constructing storage reservoirs to impound the flood waters of Yakima River to provide for the total diversion at the reservation head gates of 516,000 acre-feet of stored water and natural flow during each irrigation season, for the irrigation of 120,000 acres, more or less, comprising the Wapato project on the Yakima Indian Reservation, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $1,800,000, or so much thereof as may be necessary, to be expended in said works by the Reclamation Service, the moneys as needed for said work to be transferred to the reclamation fund by the Secretary of the Treasury upon requisition of the Secretary of the Interior. Such storage works shall be maintained and operated by the Reclamation Service as a part of the storage system of the Yakima reclamation project.

"SEC. 2. That lands within the project now owned by Indians, in fee or otherwise, to the extent of 32,000 acres, shall be designated by the Secretary of the Interior as necessary for the support and use of the Indians severally allotted hitherto within the project, and thereafter water furnished for such lands shall be free of any and all cost or charge on account of said storage works. Water shall be reserved for present or future use on the lands so designated for which patents in fee shall not have been issued at the rate of 3 acre-feet per acre, measured at the land, whether beneficially used thereon or not, and such reservation shall continue until such time as patents in fee shall issue for said lands respectively. With the exception of water reserved without beneficial use as in this section above provided, beneficial use shall be the basis, the measure, and the limit of the right to use water on the lands within said Wapato project."

In addition to such amendments it is further suggested, in accordance with the principles hereinabove set forth, that for the proviso in section 5 of said bill there be substituted the following:

"*Provided*, That no steps for the enlargement of the storage or distribution works for the benefit of the lands in the Wapato unit, as herein provided for, or for deliveries of water thereto in excess of the deliveries appropriate under the limitation to 147 second-feet, shall be undertaken until at least 80 per cent of the allotted, and a like per cent of the patented, lands of said unit shall have been pledged by the allottees or owners thereof for the repayment of the cost of the works, nor until all other claims for or arising out of water rights shall have been properly waived by the allottees or owners so pledging their lands, and no benefit from the works constructed on the faith of such pledges shall accrue by enlarged deliveries of water or otherwise to any lands within the unit not so pledged with waiver."

Respectfully,

WALTER L. FISHER, *Secretary.*

REPORT ON THE CONDITIONS ON THE YAKIMA INDIAN RESERVATION, WASH.

NORTH YAKIMA, WASH., *October 22, 1912.*

Showing the history of irrigation in the Yakima Valley, the relation of irrigation in the Yakima Valley, the relation of irrigation in the Yakima Indian Reservation to the valley as a whole, the resources and needs of the reservation, the lands that can be irrigated, the most feasible irrigation plan, with estimates of cost and the water supply and source, based on surveys and studies by the field officers of the Reclamation Service and Indian Office.

Compiled jointly by the field representatives of these bureaus of the Interior Department:

Indian Office: Don M. Carr, superintendent and special disbursing agent, Yakima Indian Reservation; Lester M. Holt, superintendent of irrigation, Yakima Indian Reservation.

Reclamation Service: Charles H. Swigart, supervising engineer, United States Reclamation Service.

HISTORICAL.

IRRIGATION DEVELOPMENT IN THE YAKIMA VALLEY.

The Yakima Valley is situated in the southeastern portion of the State of Washington, and derives its water supply from the Yakima River, a tributary of the Columbia, having its source in the Cascade Mountains. Irrigation in the Yakima Valley has been practiced for many years, and matters pertaining to irrigation have reached a higher stage of development than in most irrigated districts. The rapid flow of the streams, the ease with which large areas of land have been irrigated by comparatively short canals, and the great value of the lands when irrigated, have all served to bring this about. Even before the first railroad had been built into the country irrigation in the Yakima Valley had reached a comparatively advanced stage of development. The early settlers were interested principally in stock raising. The range at that time being of the finest quality and apparently unlimited, only sufficient land was irrigated to furnish winter feed for the cattle and supplies for home consumption. Small irrigation ditches along the smaller streams which afforded the fewest obstacles to construction were the first to be developed.

The first irrigation ditch in the Yakima Valley of which we have record is the Nelson ditch, taken out of the left bank of the Naches River. This was built in 1867 and is still in existence. In 1872 a ditch was taken out of a tributary of the Ahtanum Creek by Charles and Joseph Schanno. It was built to irrigate 320 acres of land, near the locality now occupied by Yakima City. The water was used by the people for raising vegetables, and although only a small ditch it proved what could be done when water was applied to the land.

Two years later, in 1874, the ditch, still known as the Schanno, was built, which gave the town of Yakima City an abundant water supply. Along this ditch in 1881 the first alfalfa was successfully grown. It was 1884, however, before the usefulness of this great forage plant was fully understood. During that year it was raised freely and it marked a new era in the stock-raising industry, as it prevented the great winter losses of cattle which the cattlemen had so often experienced in the past.

In 1872 the first hops were grown in the Yakima Valley by Charles Carpenter, on Ahtanum Creek. He had seen them growing in Germany and concluded that favorable conditions existed here.

As early as 1874 farmers along the rivers commenced to realize that their bottom lands produced much better crops when irrigated and began to construct small irrigation ditches.

In 1875 people began to settle upon the bench lands in greater numbers and soon after some of the higher line canals—namely, the Kennewick, Naches-Cowiche, and Moxee—were built.

As no railroad was constructed through this region until 1886 and the nearest point of shipment was at The Dalles, on the Columbia River in Oregon, 100 miles distant over mountainous roads, only such crops were raised by the farmer as were necessary to supply himself and his family with food. Hay was raised for the cattle as an insurance against loss by starvation during the winter months.

The building of the Northern Pacific Railroad in 1886 marks the beginning of a tide of immigration toward the Northwest which has been flowing steadily ever since. It was then that the settlers began to raise crops to ship away, alfalfa, fruit, and hops being the principal products. These have been raised in increasing quantities ever since and have proved to be a great source of wealth to the people of the Yakima Valley. More irrigation ditches have been built from time to time as necessity and the increased value of land have warranted. The size of the farm unit has steadily decreased to make room for more settlers. This has been made possible by the rapidly increasing demand for diverse farm products in the western portion of the State, where the percentage of the population engaged in farming is small and the agricultural conditions are not so favorable.

The acreage now under irrigation in the Yakima Valley, exclusive of that on the Yakima Indian Reservation and exclusive of Government canals, is approximately 137,500 acres, which acreage is divided about as follows: Private systems above Umtanum, 41,500; between Umtanum and Union Gap, including Naches and Tieton Rivers, Wenas and Ahtanum Creeks, 70,000; Union Gap to mouth of the Yakima River, 26,000. In addition to which the Government is supplying water to approximately 115,000 acres, divided between the Tieton Unit of 35,000 and the Sunnyside Unit of 80,000 acres.

SETTLEMENT OF CONFLICTING CLAIMS TO WATER RIGHTS.

In the early days of small ditches it was customary for filings to be made on very large quantities of water, which resulted in a number of disputes, often terminating in litigation among the various appropriators. In the year 1903, when the first investigations were begun in the valley by the Reclamation Service, the water-right conditions had approached the chaotic, as the low-water flow of all the streams had been much overappropriated and no storage had been provided to tide over the dry seasons. The first reconnoissance made by the service indicated extensive irrigation possibilities, and the year 1904 was devoted to the measuring of streams and a general examination

of lands in the valley. Approximately 100,000 acres of land were being irrigated at that time in the Yakima Valley. It was essential prior to taking up active construction work that the unsatisfactory water-right situation be cleared up, and the Secretary of the Interior set down certain conditions which had to be fulfilled before approval would be given for such construction. The conditions laid down by the Secretary were:

"First. The adjustment of all conflicting claims of those who are appropriating water from the Yakima River or any other body of water for irrigation, power, or any other purpose.

"Second. The determination of all suits now pending to prevent the diversion of water from the Yakima River to the Yakima Indian Reservation, and any and all other litigation that in any way tends to embarrass or restrict the appropriation of the waters from said river or any other body of water needed for the irrigation of the lands under said proposed project.

"Third. The determination of the questions presented by the proposed contract to purchase the Sunnyside Canal for $250,000, now pending before the Assistant Attorney General for this department, and the submission to the department, if required or necessary, of such a contract from the owners of said canal as will meet the approval of the department.

"Fourth. The satisfactory disposition of the protest of the State of Washington against the entrance of the Government into contractual relations with the Washington Irrigation Co. until the State is heard in the matter.

"Fifth. The securing to the Indians on the Yakima Reservation of a sufficient water supply by passage of appropriate legislation by Congress, or otherwise.

"Sixth. The settlement, termination, and disposition of any and all difficulties, conflicts, litigation, complicatons, or controversies that will in any way tend to embarrass or restrict the appropriation and use of the waters of the Yakima River or any other stream or body of water necessary for the irrigation of the lands under this project and the lands in the Yakima Indian Reservation.

"Seventh. That a sufficient acreage be pledged to accure the return to the reclamation fund of the cost of construction.

"Eighth. That the above and foregoing matters be settled and a clean, feasible proposition submitted to the department free from all difficulties or complications before the expenditure of any money on the construction of said projects be made."

The conditions particularly affecting the Yakima Indian Reservation were the first, second, fifth, and sixth. The year 1905 was spent in collecting data and negotiating with the various interested parties for the purpose of complying with the eight conditions laid down by the Secretary.

In compliance with the first condition, 94½ per cent of all waters claimed by irrigation canals depending upon the natural flow of the river was included in agreements fixing their diversions in a definite quantity. These quantities were based on the actual diversions made during August, 1905. In the final report on which the approval by the Secretary of the Interior of the construction was based, the Sunnyside Canal was apportioned 650 second-feet and the reservation canals 147 second-feet. The canals which failed to sign agreements were relatively unimportant.

The Indian canal had an appropriation made on February 19, 1903, by the Indian Office, of 1,000 cubic feet per second. The appropriation secured to the Reclamation Service by purchase from the Washington Irrigation Co. for the Sunnyside Canal was 1,050 cubic feet per second. Fifty cubic feet per second was appropriated as early as 1880, while the additional 1,000 was appropriated in 1890. The quantities fixed by the Government for the Sunnyside and reservation canals were much less than was claimed for them, and the acceptance by the Government of the smaller quantities was a condition which operated most effectively toward obtaining the consent of all the private holders of water rights to limit their claims proportionately.

In regard to the second condition the following is quoted from the report of Mr. D. C. Henny, supervising engineer, to the chief engineer of the Reclamation Service, dated March 13, 1906:

"In August, 1905, the Prosser Falls Land & Power Co. and the Washington Irrigation Co. brought suits against officials of the Yakima Indian Reservation and canals higher up on the river for alleged illegal diversion of water from the river. At the request of the Reclamation Service action under these suits was suspended.

"The Prosser Falls Land & Power Co. bound itself to dismiss its suits at any time as part of the terms of the agreement in which it limits its claims to water.

"The Washington Irrigation Co. has entered into an agreement, dated March 13, 1906, * * * by which it binds itself to dismiss all litigation to which it is a party plaintiff tending to affect in any way the appropriations and use of the water in the Yakima River and dependent streams, immediately upon the announcement by the Secretary of the determination of the United States to construct storage and irrigation works in Yakima Valley under the reclamation act."

In regard to condition No. 5 the above report says:

"Official advices have reached me through the chief engineer that H. R. 10067, authorizing the disposition of surplus and allotted lands on the Yakima Indian Reservation, etc., has been passed and become law on March 7, 1906. The terms of this bill are such that a reclamation project covering the irrigable lands in the Yakima Indian Reservation becomes feasible, provided the Indians consent, and that thereby all controversy regarding water rights of the Yakima Indian Reservation will be avoided. I therefore recommend that the enactment of such law be considered a full compliance with condition No. 5."

In regard to condition No. 6 the report says:

"The agreements to dismiss litigation in which Yakima Indian officials were made defendants as discussed under condition No. 2 and the passage and enactment of H. R. 10067 above referred to in the discussion of condition No. 5, appear to meet the requirements under condition No. 6, and I therefore recommend that the present status be considered a full compliance with condition No. 6."

The remaining conditions laid down by the Secretary have no direct bearing on the water supply and irrigation of the Yakima Indian Reservation and will therefore not be discussed.

Pursuant to the report above quoted which was submitted to the Secretary of the Interior for approval and for authorization of construction work upon the Yakima project, the following letter was written:

MARCH 28, 1906.

The DIRECTOR OF THE GEOLOGICAL SURVEY.

SIR: In a letter of the 21st instant to the department you referred to departmental letter of December 12, 1905, to you, approving the Tieton and Sunnyside projects in the State of Washington, under the act of June 17, 1902 (32 Stat., 388), and setting aside thereunder the sums of $1,000,000 and $750,000, respectively, subject to certain conditions specified in the letter.

In your letter you have inclosed a report from Mr. D. C. Henny, supervising engineer, dated March 15, 1906, with exhibits, from which it appears that the conditions above mentioned have all been met, and you have expressed the opinion that the projects present clean, feasible propositions upon which the Government is fully warranted in expending money for the necessary works. You have therefore recommended that the two projects be definitely approved, that the contract with the Washington Irrigation Co. be also approved, and that you be authorized to proceed in the usual way for the construction of the necessary works for the first section of the two projects.

Your letter was referred to the Assistant Attorney General for an opinion as to whether or not the report and accompanying papers show such a compliance with the conditions by departmental letter of December 12, 1905, supra, as to justify departmental action in accordance with your recommendation.

In an opinion of the 27th instant by the Assistant Attorney General, which has been approved, he has stated that these conditions have been so complied with as to justify the action you have recommended.

In view of the foregoing, I have accordingly approved the contract and return it herewith. I also hereby definitely approve the Tieton and Sunnyside projects and authorize you to proceed in the usual way for the construction of the necessary works of the first sections thereof.

For your full information I inclose a copy of the opinion of the Assistant Attorney General.

Very respectfully,

THOS. RYAN,
Acting Secretary.

THE YAKIMA INDIAN RESERVATION.

The Indians have been irrigating in a more or less crude manner on this reservation since 1859. At first oxen were used for breaking the land, and in 1862 more than 200 acres were under irrigation. This had been increased to 500 acres in 1863 and to 1,000 or 1,200 in 1865. No work, however, was done by the United States Indian Service until May 20, 1896. The following is taken from the report of Mr. William Redman dated June 30, 1897, addressed to the Indian agent at Fort Simcoe, reporting on the irrigation canals then in existence, giving carrying capacity and length:

"Main canal, capacity, 210 cubic feet of water per second; length, 12.45 miles, from which the following laterals have been constructed: Lateral No. 1, 4,300 feet long; lateral No. 2, 8,500 feet long; lateral No. 3, 15,000 feet long; lateral No. 4, 28,100 feet long; and sublateral No. 5, 6,500 feet long; in all from main canal, 62,300 feet, which equals 11.8 miles.

"Toppenish Canal, capacity, 104 cubic feet of water per second; length, 3.2 miles, from which the following lateral ditches have been constructed: Lateral No. 1, 5,300 feet long; lateral No. 2, 500 feet long—to be extended by proprietors of allotted lands—lateral No. 3, 400 feet long; and lateral No. 4, 3,600 feet long; in all from this canal, 9,800 feet or 1.86 miles.

"Or to sum up the work done, there are of the foregoing 15.47 miles of the main canal with a carrying capacity of 315 cubic feet of water per second, with 13.66 miles of lateral ditches leading therefrom for the distribution of water. The above does not include provisions made near the head of the Main Canal (about 3,000 feet below the intake of the Yakima River) for turning about 200 cubic feet of water per second into the natural slough which runs in a southeasterly direction (nearly parallel with the Northern Pacific Railway) a distance of about 12 miles, emptying into Toppenish Creek, and which slough will serve as a canal from which many lateral ditches can be constructed for the distribution of its water. By constructing more lateral ditches nearly 50,000 acres of the best soil can be irrigated."

PRESENT IRRIGATION SYSTEM.

On February 19, 1903, the superintendent of the Yakima Indian Reservation filed on 1,000 cubic feet of water per second of time and the same year construction work was begun on the New Reservation Canal, and Lateral "A." Since that time that canal has been completed to Station 600 and Laterals "A," "B," and "C" have been completed. The new reservation canal was designed for an intake capacity of 1,000 cubic feet per second.

The irrigation system as constructed, with a few extensions and increasing its capacity, can serve 80,000 acres of land, providing water is available. The actual area irrigated in 1912 under the system constructed by the Indian service was 32,000 acres, 18,000 under the new reservation canal and 14,000 acres under the old canal, and 15,000 acres are irrigated from private ditches, sloughs, the Toppenish ditch—constructed by the Government—and the subirrigated land, making a total of 47,000 acres of land now irrigated and subirrigated within the area known as the Wapato project.

It has been estimated that 18,000 additional acres can be irrigated by giving the present system a thorough cleaning and with a few small inexpensive extensions the combined flow of the canals at their head gates will be somewhere between 900 and 1,000 second-feet.

The system as now constructed is somewhat wasteful, not only in power wasted at the numerous small drops but by seepage in the canals and in the irrigation of land, due to a large extent to insufficient preparation.

There are 65 miles of main canals and main laterals and about 200 miles of sublaterals now being operated. The cost of the irrigation system constructed by the Indian service to June 30, 1912, was $272,253.57, an acreage cost of $8.50 for the land actually irrigated this season. In addition to the above $28,293.05 have been expended in maintaining and operating the irrigation ditches.

In the spring of 1907 an appraisal was made of the irrigation works at that time constructed with special reference to their value for incorporation into the proposed complete system by representatives of the Reclamation and Indian Services. As a result of this it was agreed that the works should be valued at $121,000 for such purpose. This was approved by the heads of the bureaus concerned and submitted to the Secretary of the Interior, by whom it was approved, May 10, 1907. Various sums have been expended since that date, the exact amount of which can not be determined by the field accounts at present obtainable. It is therefore estimated that the present value of the irrigation system on the Yakima Indian Reservation for incorporation into the proposed complete system would be as follows: One hundred and twenty-one thousand dollars plus the cost of the drainage system, $250,000, to which should be added 75 per cent of the amount left after taking all expenditures for the construction of irrigation works on the Yakima Indian Reservation since April, 1907, and subtracting therefrom all maintenance and operation expenditures, also all expenditures on account of the Ahtanum Irrigation System, which is entirely separate from the one under consideration.

The topographical conditions of this project are such that an irrigation system can be constructed at a very reasonable cost per acre.

It would be impossible to construct the entire project with small annual appropriations, as has been proposed, as main ditches are needed, and unless a considerable amount of money should be available little could be accomplished except at excessive costs. Delay causes much loss each year in ditches, structures, etc., that possibly can not be used in the larger system, and lands are being alkalied owing to lack of proper drains in the irrigated districts. It is essential that some comprehensive policy for the development of this project be decided upon at an early date, as conditions during the last few years have been such as to cause a feeling of distrust among both the allottees and white landowners, and further delay will make matters worse.

DRAINAGE WORK ALREADY DONE.

The act of April 4, 1910, appropriated $250,000 for the construction of a drainage system to relieve the swampy condition of 30,000 acres of land on the lower part of the reservation and to prevent the swamping of an additional area.

The following description is taken from the report of J. W. Martin and addressed to Mr. W. H. Code, former chief engineer in the Indian Service:

"The reservation is very generally underlaid by a deep stratum of free water-bearing gravel which is covered generally by from 1 to 10 or 12 feet, more or less, of generally speaking volcanic ash soil. At Toppenish Creek and extending a distance of about a mile more or less north, the soil is appreciably deep. As the general slope of the reservation is to the southeast, the water from the irrigated lands to the north naturally tending to drain off in he underlying gravels to the south and east has been impeded in its course by the deeper soil which exists to the north of Toppenish Creek and consequently soaked up, bogged, created swamps, and temporarily destroyed by an alkali condition the southern part of the reservation.

"The Wapato project contemplated taking care of this condition by drainage canals parallel to and on the north side of the proposed east and west laterals, also an independent canal parallel to and just north of Toppenish Creek, with north and south laterals 1 mile apart, but on account of the difficulty of getting people to sign up for this project, also lack of funds, the project has not thus far been started. In the meantime the alkali and swamping conditions were gradually and surely extending to the north to such an alarming extent as to induce Congress to appropriate the aforesaid $250,000 reimbursable fund for immediate relief by the Indian department. As all proposed drainage lines to date had no other than paper projected locations, it was necessary to make actual preliminary surveys and borings which were submitted for your consideration on your arrival about the middle of June, 1910."

On June 27, 1910, W. H. Code, chief engineer Indian Service; D. C. Henny, consulting engineer, United States Reclamation Service; Charles H. Swigart, supervising engineer, United States Reclamation Service; James W. Martin, superintendent of irrigation, Indian Service; and C. G. Elliott, United States Department of Agriculture, acting as a board of engineers, submitted a report to the Secretary of the Interior on the necessary drainage system. This report was approved and construction ordered along the lines laid down by the board of engineers.

Machinery was purchased and the work of constructing the main drains was begun in the fall of 1910. On July 1, 1912, 42 miles of drainage ditches had been completed at a total expense of $220,497.71, or a unit cost, including structures, of 12 cents for each cubic yard excavated.

The total discharge from the drainage ditches from February 1, 1911, to September 30, 1912, was 196,584 acre-feet, the maximum mean monthly discharge during that period being 240 cubic feet per second. On October 7, 1912, the drains were discharging 220 cubic feet per second.

The following is cited as tending to show the efficiency of the system as constructed:

A well located at the center of section 20, township 10 north, range 20 east, had a depth of 12 feet with water 8 feet deep. This well went completely dry within 24 hours after the construction of a drain one-half mile northeast.

Lands formerly tule beds and permanently covered with water are now sufficiently dry for plowing and farming, and other lands formerly alkalied and subirrigated now require irrigation. The drainage system has accomplished even more than was expected in so short a period of time.

Following is a classification of the lands reclaimed by drainage:

	Acres.
Lands permanently flooded before the construction of the drains	5,000
Lands too wet for cultivation and flooded part of the time	10,000
Lands alkalied and subirrigated	15,000

Plate No. M75–Q shows the areas reclaimed.

WATER FOR THE RESERVATION LANDS.

The question of a sufficient water supply for the reservation lands is one of great importance to both the allottee and the white landowner. Since the apportionment by the department on March 26, 1905, of 147 second-feet as the portion of the low-water flow of the Yakima River to which the Yakima Indian Reservation was entitled, the development of the new land has been slow, as the water users were not sure of any water after July 15 or August 1 of each year, and many acres of raw land within reach of water from the irrigation ditches as now constructed would have been cultivated long ago except for this shortage of water.

RESOURCES OF THE YAKIMA INDIAN RESERVATION.

The resources of the reservation are amply sufficient to warrant the construction of irrigation works on as extensive a plan as is needed to secure maximum efficiency. The question as to the ability of the beneficiaries to successfully meet their financial obligations covering the item of cost is one that will be carefully weighed by the Congress in passing upon the feasibility of the project and the extent to which it should be carried. In considering the question of resources, as related to the lands within the limits of the proposed project, it should be kept in mind that the expense of construction will have to be borne entirely by those allottees and white owners whose lands are within the limits of the project. This would be logically so with respect to white owners, but not necessarily so in the case of allottees. It is true, however, that a considerable portion of the allotments of the allottees which are within the limits of the project comprise their entire acreage. Such being the case, those allottees who would have to pay their proportionate share of the cost of construction, maintenance, and operation, whatever it might be, would have two sources of revenue—from individual and tribal lands. Any funds they might acquire in their individual capacity would necessarily come from the sale of their original allotments, or a portion thereof, of inherited allotments in which they have an interest, or from the leasing of lands in which they may be interested. The proportionate share of tribal moneys would be their other source of revenue.

TRIBAL RESOURCES.

The census of the Yakima Indians as of July 1, 1912, shows a population of 3,046. Up to and including 1910 the allotments made on the reservation numbered 3,169. Allotting work has been in progress for two years, during which time approximately 700 selections have been made. It is very probable that before the close of allotting operations something in the neighborhood of 4,200 allotments will have been taken within the limits of the reservation; these allotments, of course, affect only the tribal resources and do not involve to any extent the individual financial standing of an allottee.

That there might be available some reliable data as to the extent and value of the tribal resources on this reservation, an appraising commission was appointed to make a survey of the entire field. This work was carried on for nearly two years and completed in the fall of 1910. The value of the tribal land, according to the schedules prepared by the appraising commission, was fixed at $1,023,453. The acreage involved was fixed at 762,313.

The value of the timber on tribal land, as fixed by said commission, was $3,398,450. There have been no material changes with respect to conditions upon which these figures were based as they existed then and as they exist now. There have been no destructive fires or any considerable damage from any cause. The per capita valuation of the tribal resources can be conservatively placed at $1,500. Changes have been made in the way of opening roads, trails, and fire lines which have afforded protection to the timber, and a study of routes and methods of transportation makes the statement that it can be marketed without great expense a reasonably safe one.

PRODUCTS.

It is difficult to arrive at accurate figures as to the agricultural and horticultural possibilities of the reservation because, up to this time, no figures in the nature of a crop census are obtainable. There is available, however, certain general information which will have a bearing on that subject.

The total acreage under cultivation within the limits of the project during the season of 1912 is fixed at 32,000. It is readily admitted that alfalfa is the principal growing crop. It is conservative to say that about 24,000 acres are in alfalfa. This means approximately 300 tracts of 80 acres each. The average yield per tract will be about 300 tons of merchantable hay. A year or two ago the surplus was undisposed of, but this year all the hay obtainable within the limits of the reservation will either have been sold or used for feeding on the ground.

There is a considerable acreage in small grains, the returns from which are encouraging and very profitable. Potatoes and onions are good crops, and the yields of each are bountiful. Hops are successfully grown.

The area so far planted to orchard is not large, yet the results being obtained are indicative of the value of the land as fruit land. The best land is producing abundantly; in fact, there are very few sections of the reservation where it is at all probable that fruit would not do well. There are accessible markets for all products, with ready means of transportation. The roads and highways are being made as rapidly as possible, and extensions of transportation facilities will have a direct bearing upon the value of the lands. The present irrigation system has accomplished wonders with the country, considering the expense incurred in connection therewith. It is well known that it could be enlarged and improved, but in so doing, it should always be borne in mind that the beneficiaries, to a large extent, are Indians whose capacity as farmers and ranchers, in a great majority of cases, is yet to be ascertained; whose ability to actively compete with their neighbors is less than maximum; whose financial ability to meet a construction charge for water is limited to their resources. To proceed with the construction of this project on the same theory that would obtain were the land being constructed for white people will result in disappointment.

If there is to be a charge to be borne by the Indians, that charge must be met out of their property. To assume that they could as farmers be successful enough to pay their indebtedness from their crops will result in a disappointment to all concerned. Their intentions are good, but their surroundings and mode of life are such as to make such an aim unattainable.

LAND VALUES.

As showing the difference in the value of lands within the project and those outside of the limits thereof, the records of the agency contain some interesting data. The following gives the number of sales, the acreage involved, and the purchase price:

1. For all sales on the reservation from July 1, 1909, to Sept. 30, 1912:	
Sales	166
Acreage	11,497.22
Total purchase price	$484,204.13
2. For all sales within the project from July 1, 1909, to Sept. 30, 1912:	
Sales	110
Acreage	6,771.75
Total purchase price	$398,695.50

The difference represents all sales outside the project during the period. The average selling price of the lands within the project is $58.87; that for the lands outside of the project is $18.05.

The total sales within the project number 231, with an acreage of 16,150.36, the consideration being $792,385.23, the total average price being $49.05 per acre.

The per acre value has been steadily increasing on lands both inside and outside of the project, but naturally the lands susceptible of irrigation will increase in value more rapidly than those where the question of a water supply is uncertain.

There is a considerable difference between the appraised price of land outside and that inside, the difference depending entirely upon the conditions of soil, topography of country, and other natural conditions which enter into consideration in arriving at the probable value of each particular tract.

As a general proposition, the best improved lands offered for sale are valued at about $100 per acre. This valuation is for the land only, and it is very seldom that the improvements are considered. The sales which have been made have been based on the value of the land with the prospect of a shortage of water during the low-water

season confronting the purchaser, and, further, with no water right. If the good lands have brought this figure under such conditions of uncertainty, it must be readily apparent that with a sufficient water right, permanently settled, value of the land within the project can be secured from the statement as to the rental received for improved lands under lease. The average rental for improved alfalfa lands is about $5 per acre per year.

The PRESIDENT pro tempore. The question is upon the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Indian Affairs was, at the top of page 62, to insert:

That the Secretary of the Interior be, and is hereby, authorized and directed to make an allotment, in accordance with the provisions of the act of July 4, 1884 (23 Stat. L., 79), of not more than 200 acres of land within the diminished Colville Indian Reservation, in the State of Washington, for the benefit of the heirs of Quelock-us-soma, deceased, Moses agreement allottee No. 35, jointly, in lieu of the portion of the Moses agreement allotment No. 35 embraced within the patented homestead entries of Deborah A. Griffin and Mary J. Griffin, and trust patent issue thereon under the provisions of the act of March 8, 1906. (34 Stat. L., 55.)

Mr. CURTIS. I want to make a point of order against that amendment and the one following. They are to be considered together. I make the point of order that it is general legislation.

Mr. JONES. I hope the Senator will reserve the point of order for a moment.

Mr. GAMBLE. Mr. President, both paragraphs make one amendment.

The PRESIDENT pro tempore. The second paragraph should be read, then.

The Secretary read as follows:

That the patent in fee heretofore issued in the name of Deborah A. Griffin, June 30, 1906, for lots 1 and 2 and the northeast quarter southeast quarter section 6, and lots 1 and 2, section 5, township 36 north, range 27 east of the Willamette meridian; and a similar patent issued in the name of Mary J. Griffin, November 21, 1910, for the southeast quarter of the southwest quarter, and lots 5, 6, and 9 of section 31, township 37 north, range 27 east, of the Willamette meridian, all situated in Okanogan County, Wash., be, and the same are hereby, confirmed and declared valid, notwithstanding the previous allotment of a portion of this land under Moses agreement allotment No. 35.

Mr. CURTIS. I make the point of order that this is general legislation on an appropriation bill.

Mr. JONES. I hope the Senator will reserve that for a moment.

The PRESIDENT pro tempore. Does the Senator from Kansas withhold his point of order?

Mr. CURTIS. I do.

Mr. JONES. I desire to say that this provision has passed the Senate once. It went to the Committee on Public Lands and was reported. Now it is recommended by the department, except that the department recommends that $500 should be paid to these Indians in addition to permitting them to have an allotment upon the south half of the Colville Indian Reservation.

That was considered by the committee and the committee did not think, under the circumstances of the case, that it was fair to these people, who acted in perfect good faith and who had no idea whatever of the claim of these Indians to this land until after the patent was issued to them, that they should pay $500. If any amount of money should be paid it should be paid by the Government, whose agents were at fault in the matter.

These Indians are permitted to take an allotment on the south half of the reservation. They have never been on this land. They have never cultivated it. They have never laid any claim to it and I understand would really be better satisfied with land on the Colville Reservation.

I wish to say to the Senator from Kansas that these people have under cultivation now about 100 acres of this land. They have it planted to orchard and they have gone to great expense. They did it in perfect good faith. I hope the Senator will withdraw his point of order. I will say the House committee has recommended a similar bill with a provision in it for $500. I hope the Senator will withdraw the point of order.

The PRESIDENT pro tempore. The Senator from Kansas makes the point of order against the amendment that it is general legislation.

Mr. JONES. I should like to have the attention of the Senator from Kansas for a moment.

Mr. CURTIS. Mr. President, the amendment does not comply with the recommendation of the department, and it is unsafe to put legislation upon this appropriation bill that does not meet with the approval, at least, of the department. I insist upon the point of order.

The PRESIDENT pro tempore. The Chair will sustain the point of order.

The next amendment was, on page 63, after line 4, to insert:

For the support, education, and civilization of the Kalispel Indians in the county of Pend Oreille, in the State of Washington, and to erect a school building, employees' quarters, and other necessary buildings and providing the same with equipment, in the purchase of stock, implements, seeds, and other articles necessary to promote the general welfare of said Indians, including the employment of teachers and instructors, under the jurisdiction of the Spokane Indian School, Spokane, Wash., with the approval and direction of the Secretary of the Interior, $10,000.

The amendment was agreed to.

The next amendment was, under the head of "Wisconsin," on page 63, line 17, before the word "Indian," to strike out "two hundred and ten" and insert "two hundred and fifty"; in line 18, after the word "superintendent," to strike out "$36,670" and insert "$43,470"; in line 19, after the word "improvements," to strike out "$2,500" and insert "$4,180"; and in line 20, after the words "in all," to strike out "$39,170" and insert "$47,650," so as to make the clause read:

For the support and education of 250 Indian pupils at the Indian school at Hayward, Wis., and pay of superintendent, $43,470; for general repairs and improvements, $4,180; in all, $47,650.

The amendment was agreed to.

The next amendment was, on page 63, line 25, before the words "in all," to insert "for new central heating plant, $20,000," and in the same line, after the words "in all," to strike out "$53,450" and insert "$73,450," so as to make the clause read:

For support and education of 250 Indian pupils at the Indian school, Tomah, Wis., and for pay of superintendent, $43,450; for general repairs and improvements, $10,000; for new central heating plant, $20,000; in all, $73,450.

Mr. LA FOLLETTE. After the numerals "$20,000," in line 25, and before the semicolon, I move to amend the amendment by adding "or so much thereof as may be necessary."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 64, after line 5, to insert:

That the Secretary of the Interior be, and he hereby is, authorized to sell the merchantable timber on all unallotted lands within the Bad River Reservation, Wis., under such rules and regulations as he may prescribe, the net proceeds derived therefrom to be distributed per capita among the unallotted members of the band and deposited to their individual credit as individual Indian moneys are now deposited, and subject to expenditure for their benefit under the supervision of the Secretary of the Interior: *Provided, however*, That said lands shall be allotted to unallotted members of the band under existing laws; said allotments to be made subject to the sale of the timber and distribution of the proceeds as herein provided: *Provided further*, That patents for said allotments shall not issue until the merchantable timber has been cut and removed from the lands allotted, whereupon the title to such timber as remains on the lands allotted shall then pass to the respective allottees with the issuance of patents for their allotments.

That for the purpose of carrying out the stipulations of the treaty of September 26, 1833, with the Pottawatomie and other Indian Tribes, and for the purpose of carrying into effect the act of June 25, 1864 (13 Stat. L., p. 172), the Secretary of the Treasury is hereby authorized and directed to transfer upon the books of the Treasury, to the credit of that portion of the Wisconsin Band of Pottawatomie Indians now residing in the States of Wisconsin and Michigan, the sum of $447,339, the same being the proportionate share of these Indians in annuities and moneys of the Pottawatomie Tribe, in which they have not shared, as set forth in House Document No. 830, Sixtieth Congress, first session, together with interest at 5 per cent on said sum since the date to which the computation contained in said document was made. And the Secretary of the Interior is hereby authorized to withdraw from said sum so credited to the Wisconsin Band of Pottawatomie Indians a sum not exceeding $150,000, and to expend the same in the purchase of land within the States of Wisconsin and Michigan, the title to such land to be taken in trust by the Government for the use and benefit of said Indians, said land to be situated in organized school districts, and to be purchased in bodies of not more than one section, which said bodies shall not adjoin each other. The land so purchased, except that part thereof as may be necessary for administrative purposes, shall be divided equitably among the Indians entitled thereto, and patents thereto shall be issued in accordance with the general allotment laws of the United States; and the said sum of $150,000 herein provided shall be immediately available.

Out of the sum placed to the credit of said Pottawatomie Indians the Secretary of the Treasury is hereby authorized and directed to pay to Mrs. R. V. Belt, widow of R. V. Belt, deceased, the attorney who in his lifetime represented said Indians in the proceeding and accounting set forth in said document, House report No. 830, Sixtieth Congress, first session, $5,000, and to Eric O. Morstad, of Carter, Wis., who assisted said Belt in the services so rendered, and who has lived with and cared for said Indians for many years, the sum of $5,000, in lieu of the amount provided to be paid under the contract approved by the Commissioner of Indian Affairs, the 1st day of November, 1902; said payment shall be in full payment for all services rendered by the said R. V. Belt, his associates and assigns. All moneys remaining in the Treasury to the credit of the said Pottawatomie Indians shall bear interest at the rate of 5 per cent per annum, and said interest shall be distributed per capita, under the direction of the Secretary of the Interior, to the members of the said band now residing in the States of Wisconsin and Michigan.

The lands so purchased, except such part thereof as may be necessary for administrative purposes, shall be divided equitably among the Indians entitled and patents therefor issued in accordance with the general allotment laws of the United States: *Provided*, That the Secretary of the Interior may, in his discretion, withhold allotments or pro rata distribution hereunder from any Indian or Indians belonging to this band who, owing to advanced age or other infirmities, are deemed by him incapable of making beneficial use thereof. In lieu of formal

allotments to Indians falling within this class, tentative allotments of land may be made to such Indians for occupancy and use during the remainder of their natural lifetime.

The amendment was agreed to.

The next amendment was, on page 67, after line 13, to insert:

For construction of roads and bridges on the Red Cliff Reservation in Wisconsin, $8,600.

The amendment was agreed to.

The next amendment was, under the head of "Wyoming," on page 67, line 18, after the word "employees," to strike out "$12,000" and insert "$15,000," so as to read:

For support and civilization of Shoshone Indians in Wyoming, including pay of employees, $15,000.

The amendment was agreed to.

The next amendment was, on page 68, after line 19, to insert:

The unexpended balance of the reimbursable appropriation of $10,000 for road and bridge construction on the Shoshone Reservation, Wyoming, made in the Indian appropriation act approved August 24, 1912, is hereby reappropriated and made available until expended.

The amendment was agreed to.

The next amendment was, at the top of page 69, to insert;

The Commissioner of Indian Affairs is hereby authorized to expend any sums collected as rentals from the old abandoned military post of Fort Washakie, on the Wind River Reservation, in Wyoming, in such repairs as may be necessary on said buildings and grounds, and that the sum of $1,427, heretofore collected as such by the superintendent in charge of the Wind River Reservation and deposited to the credit of the United States, is hereby appropriated and made available for said repairs.

The amendment was agreed to.

The PRESIDENT pro tempore. That concludes the reading of the bill.

Mr. GRONNA. Mr. President——

Mr. GAMBLE. There are one or two amendments or corrections that I desire to make, and then I will yield to the Senator from North Dakota. On page 12, after line 25, I move to insert as a separate item:

For continuing the investigation by the Secretary of War for the purpose of determining the reasonability and practicability of constructing a dam and reservoir at or in the vicinity of the Box Canyon on the San Carlos Indian Reservation, and for other purposes, as authorized by the act of August 24, 1912 (37 Stat. L., 518–522), $10,000, to be immediately available and to remain available until expended.

The amendment was agreed to.

Mr. GAMBLE. I submit a communication from the Secretary of the Interior relative to the amendment, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

INVESTIGATION OF THE FEASIBILITY OF THE SAN CARLOS PROJECT.

DEPARTMENT OF THE INTERIOR,
Washington, February 20, 1913.

Hon. ROBERT J. GAMBLE,
Chairman Committee on Indian Affairs,
United States Senate.

SIR: I am advised by the Acting Commissioner of Indian Affairs that you have requested a letter in justification of the following proposed item of legislation, to be incorporated in the Indian appropriation bill:

"For continuing the investigation by the Secretary of War for the purpose of determining the reasonability and practicability of constructing a dam and reservoir at or in the vicinity of the box canyon on the San Carlos Indian Reservation, and for other purposes, as authorized by the act of August 24, 1912 (37 Stat. L., 518–522), $10,000, to be immediately available and to remain available until expended."

This department is in receipt of a letter dated February 20, 1913, from Lieut. Col. W. C. Langfitt, Corps of Engineers, United States Army, in which he invites attention to the fact that the appropriation of $15,000 contained in the Indian appropriation act of August 24, 1912 (37 Stat. L., 518–522), is inadequate to provide for the required investigation. Col. Langfitt in his letter of February 20, 1913, says:

"Attention is invited to the fact that all the estimates of those concerned in the matter for this investigation, before the bill was passed, exceeded very largely the sum appropriated, and none were less than $25,000.

"In view of the doubts thrown around this project as to its feasibility, a careful and detailed investigation of the doubtful points is necessary. Furthermore, there have never been any surveys which could be utilized looking to the distribution system of the project, and this alone is an expensive item."

In order that the investigation heretofore authorized may be completed and the feasibility of the San Carlos project be determined, I have the honor to urgently request that the proposed item of legislation herein referred to be included in the appropriation bill and receive favorable consideration by the Congress.

Respectfully,
WALTER L. FISHER,
Secretary.

Mr. GAMBLE. On page 32, line 14, I move to strike out the figures "$51,900" and insert the word "and," and in line 15 to strike out the figures "$3,000" and insert in lieu thereof "$70,000; new buildings, $25,000," and to strike out the figures "$54,900" and insert in lieu thereof "$95,000," so as to read:

SEC. 13. For support and education of 300 Indian pupils at the Indian school at Albuquerque, N. Mex., and for pay of superintendent, and for general repairs and improvements, $70,000; new buildings, $25,000; in all, $95,000.

The PRESIDENT pro tempore. Would not the Senator strike out the word "and" after "New Mexico" in the same line?

Mr. GAMBLE. I suggest the amendment to conform with the language of the estimates.

Mr. OWEN. I should like to have an explanation of that change.

Mr. GAMBLE. There is a report from the Secretary of the Interior. It is an amendment proposed by the Senator from New Mexico. It is offered to conform to the wording of the Book of Estimates.

Mr. OWEN. Was the amendment passed on by the committee?

Mr. GAMBLE. It was not passed upon because one of the Senators was away. After conferring with the Senators from New Mexico, as I had the recommendation of the Secretary of the Interior, which I will ask to have printed in the RECORD, I agreed to offer the amendment. As I said, it is to conform to the language in the Book of Estimates.

The amendment was agreed to.

Mr. GAMBLE. On line 16, on the same page, I move to strike out "three" before the word "hundred" and insert "four"; in line 18, to strike out "$51,900" and insert in lieu thereof "$78,500"; and in line 20, to strike out "$57,500" and insert in lieu thereof "$92,100," so as to read:

For support and education of 400 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $78,500; for general repairs and improvements, $4,000; for water supply, $1,600; for girls' dormitory, $18,000; in all, $92,100.

The amendment was agreed to.

Mr. GAMBLE. I ask unanimous consent that the clerks may be authorized to correct any errors in the totals.

The PRESIDENT pro tempore. That will be attended to.

Mr. GAMBLE. I send the communication of the Secretary of the Interior to the desk and ask that it be printed in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
Washington, January 25, 1913.

Hon. ROBERT J. GAMBLE,
Chairman Committee on Indian Affairs, United States Senate.

SIR: I have your letter of January 15, 1913, transmitting for report a copy of an amendment to H. R. 26874, reading as follows:

"For the support and education of 400 Indian pupils at the Indian school at Albuquerque, N. Mex., and for pay of superintendent, $68,600; for general repairs and improvements, $7,000; for construction of shop building, $14,000; for a domestic science building, $7,000; for a gymnasium and assembly hall, combined, $25,000; in all, $121,600.

"For support and education of 400 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $68,600; for general repairs and improvements, $8,000; for water supply, $1,600; for shop building, $14,000; for a domestic science building, $7,000; for a gymnasium and assembly hall, combined, $25,000; in all, $124,600."

This amendment provides for the support and education of 400 pupils at the Albuquerque boarding school, instead of 300, for which estimates were submitted by the department for the fiscal year 1914. Since the estimate was submitted for this school it has been brought to the attention of the department that the dormitory now under construction will be completed and ready for occupancy at the commencement of the next school term. This will give the school a capacity of 400 pupils.

It is therefore recommended that the first item of the amendment to H. R. 26874, for the support and education of pupils at the Albuquerque school, receive favorable consideration.

While the department did not originally request an appropriation for a gymnasium and assembly hall building at this school, a building for these purposes would be very desirable.

The carpenter and blacksmith shops at the Albuquerque school are quartered in small, unsightly, adobe buildings. They are inadequate in size, and better facilities should be furnished for the instruction of boys in these trades. The shoe and harness and tailor shops are in a frame building needed to quarter employees. There is no shop space provided for the engineer, who attends to the plumbing. Space for his tools and supplies and for the use of himself and detail in inclement weather is necessary and should be furnished. No paint shop is provided. If the item of $14,000 for the construction of a shop building is allowed for this school, plans will be made for the construction of a building suitable to include all these shops.

The domestic science department of this school is now conducted in three rooms of an adobe building, and admits of a class of four pupils only. The efficiency of this department would be greatly increased by furnishing a suitable building where the class and teacher could be furnished quarters, thus adding to the elements of housekeeping and family laundering. If the item of $7,000 is allowed it will be used for this purpose.

In its estimates for the Santa Fe Boarding School for 1914, the department submitted the following:

"For support and education of 300 Indian pupils at the Indian school at Santa Fe, N. Mex., for pay of superintendent, and for general repairs and improvements, $54,500; for water supply, $1,600; for addition to girls' dormitory, $18,000; in all, $74,100."

The present dormitory capacity for girls at the Santa Fe school is not to exceed 60 per cent of that required. The present building is crowded with 100 girls, and every year many girls are refused admittance because of lack of accommodations. An addition to this building is an absolute necessity, and it is estimated that it will cost $18,000.

I am advised by the Acting Commissioner of Indian Affairs that a domestic science building was constructed at the Santa Fe school just recently, costing nearly $6,000, and that there is a workshop building at the school which is amply sufficient to meet its needs for industrial work. The items of $7,000 for a domestic science building, and $14,000 for a workshop are therefore not needed, and can be stricken from the amendment as submitted.

If the $18,000 for the construction of an addition to the girls' dormitory, estimated for by the department, can be made immediately available so that building operations can be commenced before the beginning of the next fiscal year, this building could be completed and ready for occupancy next fall, which would increase the capacity of the school to approximately 400 pupils.

It is therefore recommended that the amendment for the support and education of pupils at the Santa Fe School be made to read as follows:

"For support and education of 400 pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $68,000; for general repairs and improvements, $8,000; for water supply, $1,600; for addition to girls' dormitory, to be made immediately available, $18,000; for a gymnasium and assembly hall combined, $25,000; in all, $121,200."

While the estimates for the Santa Fe School originally submitted by the department did not include an item for the construction of a gymnasium and assembly hall building, a building for these purposes would be very desirable.

It is earnestly recommended that these estimates receive favorable consideration.

Lines 4 and 5, on page 2, of the proposed amendment contemplates the elimination from the appropriation bill of that item which provides for the employment and salary and contingent expenses of the special attorney for the Pueblo Indians of New Mexico. The department is of the opinion that it would be unwise to strike this item from the bill. The lands of some of the Pueblos are very much involved, and the special attorney has instituted a number of suits with a view to removing clouds from the titles and recovering lands to which claims opposed to the interests of the Indians have been made. While it is probably true that these cases could be handled by the United States attorneys, the Indians have great confidence in their special attorney, and it is believed by the department that the work done by him has been of great benefit to these Indians and will prove to be of still greater benefit if this attorney is permitted to proceed with the cases that are now before the courts.

The United States attorneys, as a rule, are so greatly pressed with Government business that they can hardly give these Indian matters the proper and minute attention which they require. The lawyer who has occupied the position of special attorney for the past three or four years has made a most searching investigation into the matters involved, and the department is of the opinion that it would be a step backward and result in longer delay in clearing up the titles of the Pueblo Indians, should they be deprived of their special attorney at this time.

It is therefore respectfully recommended that lines 4 and 5 on page 2 of the proposed amendment be stricken therefrom.

Respectfully,

WALTER L. FISHER, *Secretary.*

Mr. GRONNA. I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 34, line 18, strike out the words "in all, $89,500" and insert:

For a fair at Fort Totten, $1,000, to be expended under the direction and supervision of the superintendent; in all, $90,500.

Mr. GAMBLE. I wish to ask, in regard to the amendment offered by the Senator from North Dakota, if there is any estimate in regard to the amount in the amendment which he proposes, and has there been any report from a committee?

Mr. GRONNA. In reply to the inquiry made by the Senator from South Dakota, the chairman of the committee, I will say that I understand that the amendment was inadvertently omitted. I have been told it was presented to the committee, and it was understood that it should go into the bill.

Mr. GAMBLE. I have no such information, and I think I was present at all the meetings of the committee. If there has been no estimate, I will raise the point of order against it, because it is taking it out of the funds in the Treasury. There has been such a provision for some years in Minnesota. The junior Senator from Minnesota [Mr. CLAPP] suggests that the amendment of the Senator from North Dakota was inadvertently omitted.

Mr. CLAPP. The Senator from North Dakota is right when he supposes it was inadvertently omitted.

Mr. GRONNA. I said I understood it was inadvertently omitted.

Mr. GAMBLE. I say the amendment proposes to take the money out of the Federal Treasury. Such a provision has been embodied heretofore in regard to Minnesota, but it was taken out of the funds of the Indians.

Mr. GRONNA. If the Senator will allow me, I hope he will not make a point of order against this amendment. It is an appropriation of only $1,000; and I offered the amendment at the request of a delegation of Indians who were here this winter.

Mr. LODGE. It is only a thousand dollars.

Mr. CLAPP. I hope the Senator from South Dakota will allow the amendment to go on the bill. There is no money that we invest that is a better investment than bringing the Indians together at these county fairs. I hope the Senator will not press the point of order.

Mr. GAMBLE. I will merely make the suggestion that if we are to appropriate out of the Federal Treasury for Indian fairs there will be not only one or two such amendments as we have now, but they will be coming from every reservation in the country.

Mr. CLAPP. It is always in the power of Congress to stop it.

The PRESIDENT pro tempore. Does the Senator from South Dakota make the point of order?

Mr. GAMBLE. Yes, sir.

The PRESIDENT pro tempore. The Senator from South Dakota makes the point of order that the appropriation is not estimated for. The point of order is sustained.

Mr. GRONNA. I offer another amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 34, after line 18, insert:

For examination of the land embraced in Sullys Hill Park to determine whether it contains valuable minerals, $1,000, or so much thereof as may be necessary.

Mr. GAMBLE. I ask the Senator from North Dakota if there is any report from a committee?

Mr. GRONNA. I do not know that an estimate has been made for this amount, but I do know that the Secretary of the Interior and the Commissioner of Indian Affairs are in favor of this item.

Mr. GAMBLE. I will make the point of order that it has not been estimated for and has not been reported by any standing committee of the Senate.

The PRESIDENT pro tempore. If the item is not estimated for, the point of order is sustained.

Mr. THOMAS. I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 32, after line 3, it is proposed to insert:

The Secretary of the Interior is hereby authorized and directed to enroll Tilla A. Provost and her son, Harold Provost, upon the rolls of the Nebraska Winnebago Indians, and said Tilla A. Provost, as head of a family, is hereby allotted 180 acres of land according to her selection.

Mr. GAMBLE. I make the point of order against the amendment that there is no report from a standing committee of the Senate, that it is not estimated for, and that it is legislation upon an appropriation bill. I might add further that this amendment came up before the committee and was heard and was not included in the bill.

Mr. THOMAS. I hope that the Senator from South Dakota will withdraw that point of order. This is a most meritorious claim. It is one which certainly does not burden this bill with any additional amount of appropriation. This woman, according to the judgment of the officials of the Indian Bureau, is entitled to be enrolled as she here asks to be, but the Secretary of the Interior has been compelled, by reason of his position and a rule of the department, to reverse the holding of the Indian Bureau, not because the holding was contrary to law in this case, but because of the rule that an executive officer shall not admit a claim against the United States. This woman was born in this tribe.

The fact that she has not been enrolled is due to a payment to her stepmother, who was not entitled to receive it, of the tribal funds which belonged to her. Inasmuch as it is admitted that she ought properly to be enrolled and to receive this allotment to which she is entitled, I hope the Senator will withdraw his point of order and permit the amendment to be adopted.

Mr. GAMBLE. I would not, Mr. President, feel justified or authorized in doing that. This party was given a full hearing before the Committee on Indian Affairs of the Senate, and the amendment was there rejected.

The PRESIDENT pro tempore. The point of order is sustained, on the ground that the amendment is general legislation on an appropriation bill.

Mr. THOMAS. I have another amendment, Mr. President, which I send to the desk.

The PRESIDENT pro tempore. The Senator from Colorado offers an amendment, which will be stated.

The SECRETARY. On page 57, line 13, it is proposed to strike out the words "cause an investigation to be made of" and in lieu thereof to insert "appoint three commissioners, who shall be instructed and required to investigate."

The PRESIDENT pro tempore. That seems to be an amendment to an amendment already agreed to. If the Senator will withhold it until the bill gets into the Senate, it will then be in order, but it is not in order now unless the vote of the Senate agreeing to the amendment heretofore adopted is reconsidered.

Mr. THOMAS. I want the amendment to be considered before the bill passes.

The PRESIDENT pro tempore. If the Senator will withhold the amendment until the bill gets into the Senate, it will then be in order.

Mr. DIXON. I offer an amendment, which I sent to the desk, on page 27, line 7, to correct the verbiage. I do so at the suggestion of the Director of the Reclamation Service.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. On page 27, line 7, before the word "disposed," it is proposed to insert "or which have been heretofore," so that if amended it will read:

And the unallotted irrigable lands to be or which have been heretofore disposed of under authority of law.

Mr. DIXON. The Director of the Reclamation Service tells me there might be some possible question raised as to the locality of the allotment to the settler unless this amendment be made.

The amendment was agreed to.

Mr. CATRON. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from New Mexico will be stated.

The SECRETARY. On page 39, at the end of line 5, after the name "Edward Welch," it is proposed to insert the following proviso:

Provided, That no part of the $100,000 hereby appropriated, nor of the $200,000 appropriated by the act approved April 24, 1912, making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1913, which was authorized to be expended for the relief and settlement of the Apache Indians now confined as prisoners of war at Fort Sill Military Reservation, Okla., on lands to be selected for them by the Secretary of the Interior and the Secretary of War, to be expended under such rules and regulations as the Secretary of the Interior and the Secretary of War may prescribe, shall be used for the purpose of transporting or making settlement of said Apache Indians, prisoners of war at Fort Sill Military Reservation, Okla., within the State of New Mexico or State of Arizona.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from New Mexico.

Mr. GAMBLE. I make the point of order against the amendment that it is not recommended by any standing committee of the Senate and that it is general legislation.

The PRESIDENT pro tempore. The Chair sustains the point of order on the ground that the amendment is general legislation.

Mr. FALL. Mr. President, before the President pro tempore rules on the point of order I should like to be heard for a moment.

At the last session of Congress, Mr. President, when this bill was up for consideration the conference committee in its report presented to this body a provision that $200,000 should be appropriated for the purpose of removing these Indians to the Mescalero Reserve in New Mexico. I have the record before me in relation to the matter, but I do not think it will be necessary to quote the language. However, that was the provision. The acting chairman of the committee, the Senator from Minnesota [Mr. CLAPP], explained to the Senate that this was not a customary method adopted in matters of this kind for a provision such as this to be presented in a conference report for the first time. The matter was then discussed very fully, and the opinions of the Senators from Arizona and New Mexico were expressed in very strong language as to the proposition that these Indians should be removed to either of those new States. After full consideration and after very full discussion, the bill was sent back to the conference committee.

There were only two objections to the conference report at that time—one made by the Senator from Kansas and the other first made by myself, joined in by my colleague and the Senators from Arizona. After listening to the objections of the Senators, the entire Indian appropriation bill was sent back to the conferees because of those objections. The conferees subsequently brought in a report simply providing for the appropriation of $200,000 for the removal of these Indians from Fort Sill to land to be selected by the Secretary of the Interior and the Secretary of War.

Mr. President, none of the lands in the Mescalero Reserve in New Mexico have ever been allotted in severalty. Those lands are held by the Mescalero Tribe of Apaches as a tribe. They are used by those Indians for agricultural purposes, without allotment, each, however, having, by general consent, his little piece of agricultural land. The balance of the lands are generally used for grazing lands.

The action of the Senate itself and of the Congress in making this appropriation certainly was in accordance with the objections made here on this floor by Senators, striking out that provision which authorized the removal of those Indians to the Mescalero Reserve in New Mexico and simply providing an appropriation of $200,000, through which they might secure allotments in Oklahoma or in some other place.

I am not going to refer to the private conferences between the Representatives in Congress from Oklahoma, who were conferees on this bill, and the Representatives from New Mexico or the Senators from New Mexico, and the agreement reached there, because such an agreement was crystallized in legislation.

Now, Mr. President, the proposition we are confronted with here is simply this: Shall the Congress of the United States pass an appropriation bill, providing impliedly, as strongly as such an implication could be found or could be written, that the appropriation should not be used for certain purposes, and then have the Secretary of the Interior of the United States override the will of Congress? In other words, shall the Congress of the United States make an appropriation and direct its application, or shall the Secretary of the Interior legislate by appropriation in such matters as this? This is precisely the question with which we are now confronted. The Senate of the United States, when this same matter came before it at a previous session directly providing that these Indians should be sent back to the Mescalero Reservation in New Mexico, turned that proposition down absolutely, re-referred the bill to the conference committee, and the conferees then simply authorized an appropriation of $200,000 for the placing of these Indians on allotments. There are no allotments, and no part of this money can be used for securing lands in severalty on the Mescalero Reserve.

Mr. President, the Secretary of the Interior of the United States is now taking steps, despite the action of Congress, to send those Indians back to Mescalero over the protest of the citizens of New Mexico and over the protest of their Senators here in the Senate of the United States and despite the action taken by this body and the lower House and the conferees of the two Houses at the last session.

I do not care to go fully into an explanation of what is behind this movement. In 1911 a report was made to the Secretary of the Interior upon this proposition. That report was made at the instigation of certain interested parties. I do not care to expose them; but I want to say that the Mescalero Indians or the head men of the Mescalero Indians in 1911—I have the report here—agreed that a certain proportion of the Fort Sill Apaches might be brought back there.

Reading between the lines and reading the expression of the then agent of the Mescalero Indians, you can see that influence had been brought to bear. He says the matter has been thrashed out from time to time, until finally these Indians have consented that a certain proportion of the Fort Sill Indians might be brought to Mescalero. The Fort Sill Apache Indians did not come from the Mescalero Agency. They are not Mescalero Apaches. They were the Hot Springs and San Carlos Apaches of Arizona. None of them are Mescalero Apaches. They followed Geronimo in the Apache War. A few of these men claim to have married relatives of some of the Indian women now living upon the Mescalero Reserve. Now it is sought to send them back to Mescalero.

Mr. President, the entire people of New Mexico are protesting against this action. I have here upon my desk a resolution from the Legislature of New Mexico, passed unanimously, requesting that such action as I now advocate and as is embraced in this amendment be adopted by the Congress of the United States.

If Senators want to know why the headmen of the Mescalero Indians agreed that the Fort Sill Apache Indians might be sent back there and that they would receive them, I will say that I have the documents here, coming from the office of the Secretary of the Interior himself, showing exactly why. It is because the superintendent of that agency has told these people that he would secure for them—the Mescaleros—$3,000,000 to be distributed among them if they would agree to receive the Fort Sill Apaches. I hold in my hand a letter from the present agent of the Mescalero Indians, in which he says that at present, if the lands of the Mescalero Indians were allotted in severalty to the 450 Mescaleros now residing on the reservation, there would only be from 10 to 15 acres of land which it would be possible for them to use for agricultural purposes. Now it is proposed to place upon that reservation 200 Indians more, who never belonged there, who never were any part of the Mescalero Tribe, and who have no rights there whatsoever. It is held out to them finally in this letter to the Secretary of the Interior, or to the Commissioner of Indian Affairs, that if this move is made, then $500,000 must be appropriated for the Mescalero Indians; and the Commissioner of Indian Affairs writes back to him that it is too late to make the estimate; that they can not get it through this Congress; but should they move the Indians to Mescalero, then hereafter they could come before Congress and ask an appropriation of from $500,000 to $3,000,000 to reimburse the Mescaleros.

All their headmen have agreed to these people coming back because they have been told that immediately they would receive $500,000 from the Government of the United States. This is the true inwardness of this proposition.

We have no objection to the Fort Sill Apaches being removed from the Fort Sill Reservation; we have absolutely no objection to their being discharged as prisoners of war; but we do object

most seriously to receiving them back in New Mexico, where they themselves and their fathers made the ground run red with the blood of Americans, descendants of whom are yet living around the Mescalero Reserve. I know whereof I speak, because the reservation is in my own county in New Mexico. Around this reservation there are little cairns of stones thrown up where Americans and Mexicans may see them as they pass by to indicate where some man or some woman or some child was murdered by these Apaches. Those piles of stones have been erected, in accordance with the Mexican custom, to the memory of the deceased.

Mr. President, when I originally went to New Mexico the first town that I went into was Silver City, and as I got off the train in the streets of Silver City one of the first things I saw was an American holding in his hand the bleeding scalp of a woman who had been killed by one of these Fort Sill Apaches within a mile of the courthouse of Silver City that afternoon. The Indian who scalped her had been shot.

Can you not find some other place to take these Indians? Is it possible there is not sufficient land in all these great United States to which Indians can be taken and where they can be kept without forcing them back to live among the people whose relatives they murdered? Why should they not occupy the land which has been given to them adjoining the Fort Sill Military Reservation in Oklahoma? What use is to be made of the land from which these Apaches are to be withdrawn? We care nothing about that. We agreed at the last session of Congress with the Representatives of Oklahoma on the Indian Committee in conference that no part of this money should be used under any circumstances to locate these Indians in New Mexico. I think the Senator from Minnesota, who had this bill in charge at that time, will bear me out in the assertion that no part of this money was to be used for that purpose?

Mr. CLAPP. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Minnesota?

Mr. FALL. I do.

Mr. CLAPP. There is no question as to the correctness of the statement the Senator makes.

Mr. FALL. I thank the Senator from Minnesota. Now, I hope that the chairman of the committee having this bill in charge will not insist upon the point of order.

Mr. President, it is an outrage upon the people of New Mexico, and it is bad faith upon the part of the Secretary of the Interior, who has had this matter brought before him, in view of the record shown here made in this body at the last session, to insist that he will misapply these funds and take these Indians back, despite the protest of the legislature and of the people of New Mexico and of their Representatives in Congress. I hope that the Senator will not insist upon his point of order.

Mr. DIXON. Mr. President, I ask that the amendment offered by the Senator from New Mexico may be again read.

The PRESIDENT pro tempore. The amendment will be again stated.

The SECRETARY. On page 39, at the end of line 5, it is proposed to insert:

Provided, That no part of the $100,000 hereby appropriated, nor of the $200,000 appropriated by the act approved April 24, 1912, making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1913, which was authorized to be expended for the relief and settlement of the Apache Indians now confined as prisoners of war at Fort Sill Military Reservation, Okla., on lands to be selected for them by the Secretary of the Interior and the Secretary of War, to be expended under such rules and regulations as the Secretary of the Interior and the Secretary of War may prescribe, shall be used for the purpose of transporting or making settlement of said Apache Indians, prisoners of war at Fort Sill Military Reservation, Okla., within the State of New Mexico or State of Arizona.

Mr. GAMBLE. Mr. President, I withdraw the point of order.

The PRESIDENT pro tempore. The Senator from South Dakota withdraws the point of order.

Mr. THOMAS. Mr. President, these points of order seem to be something extremely flexible. They are withdrawn very readily in behalf of some Senators and insisted upon very rigidly in behalf of others. I renew the point of order.

The PRESIDENT pro tempore. The point of order is renewed, and the point of order is sustained.

Mr. JONES. Mr. President, I desire to reoffer the two paragraphs on page 62, down to line 4 on page 63, with the added paragraph that I have marked here, which meet the objections made a few moments ago.

The PRESIDING OFFICER (Mr. CURTIS in the chair). The Senator from Washington offers an amendment, which the Secretary will state.

The SECRETARY. The Senator from Washington offers the amendment printed on page 62, ending with line 4, on page 63, with the following addition:

That the allotment herein authorized shall not be made, nor shall the confirmation of the patents issued in the names of Deborah A. Griffin and Mary J. Griffin become effective, until payment be made to the Secretary of the Interior on behalf of those claiming under the said patents of the sum of $500, which shall be disposed of for the benefit of the Colville Indians in the manner as provided in section 6 of the act of March 22, 1906 (34 Stat. L., p. 80).

The amendment was agreed to.

Mr. OWEN. On page 44, line 5, after the figures "$40,000," I move to insert "$5,000 of which is to be immediately available." The Commissioner to the Five Civilized Tribes has advertised 200,000 acres of land to be sold in May, and it is feared that the available appropriation will be exhausted before the sale is completed.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The SECRETARY. On page 44 in the committee amendment, line 5, after the numerals "$40,000," it is proposed to insert:

$5,000 to be immediately available.

The amendment to the amendment was agreed to.

Mr. OWEN. Mr. President, I have one other item here which I was requested to offer by one of the Members of the Oklahoma delegation. I send it to the desk and ask that it may be read.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 35, after line 15, it is proposed to insert:

That the Secretary of the Interior is hereby authorized, in his discretion, to extend the time of the deferred payments on the town lots of the north addition to the city of Lawton, Okla., one year from the date on which they become due under existing law: *Provided*, That no title shall issue to any such purchaser until all deferred payments, interest, and taxes have been made as provided in the act of March 27, 1908 (35 Stats., 49), and the act of February 18, 1909 (35 Stats., 637).

Mr. GAMBLE. Mr. President, I will ask the Senator from Oklahoma, what is the necessity for this amendment. Has it been recommended by the department, and is there a bill pending for it?

Mr. OWEN. There is a bill pending for it in the House, which has been favorably reported from the committee in the House. It will simply result in some of these people who have town lots paying 5 per cent interest that much longer, rather than to force them to pay immediately. It does not do the Indians any harm. It simply extends the time within which they may pay it.

The amendment was agreed to.

Mr. THOMAS. Mr. President, I desire to withdraw the point of order which I made to the amendment of the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from Colorado withdraws the point of order made by him to the amendment offered by the Senator from New Mexico.

Mr. OWEN. Mr. President, I renew the point of order.

The PRESIDING OFFICER. The Senator from Oklahoma renews the point of order. The point of order is sustained.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. THOMAS. I offer an amendment, which I send to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 57, line 13, it is proposed to strike out the words "cause an investigation to be made of" and insert:

Appoint three commissioners, who shall be instructed and required to investigate.

Mr. GAMBLE. Mr. President, I raise the point of order that that has not been estimated for; it has not been recommended by any standing committee of the Senate; and in addition to that, full authority is given in the provision itself for the Secretary to send out special agents to take up this matter, which would be without any additional expense to the Government. If commissioners are appointed it will result in incurring an expense and an obligation that I do not think is necessary; and I insist upon the point of order.

The PRESIDING OFFICER. The point of order is sustained.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read three times, the question is, Shall it pass?

Mr. FALL. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The Senator from New Mexico suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Lodge	Sheppard
Bacon	Dillingham	Martin, Va.	Simmons
Bankhead	Dixon	Martine, N. J.	Smith, Ga.
Borah	du Pont	Myers	Smith, Mich.
Bourne	Fall	Nelson	Smoot
Bradley	Fletcher	O'Gorman	Sutherland
Brady	Foster	Oliver	Swanson
Brandegee	Gallinger	Overman	Thomas
Bristow	Gamble	Owen	Thornton
Bryan	Gronna	Page	Townsend
Burnham	Guggenheim	Paynter	Warren
Burton	Johnson, Me.	Penrose	Webb
Catron	Jones	Percy	Wetmore
Chamberlain	Kavanaugh	Pittman	Works
Clarke, Ark.	Kenyon	Poindexter	
Crane	Lea	Richardson	
Cummins	Lippitt	Root	

The PRESIDENT pro tempore. Sixty-five Senators have answered to their names. A quorum of the Senate is present.

The bill having been read three times, the question is, Shall it pass?

Mr. FALL. On that I demand the yeas and nays.

The yeas and nays were ordered, and the Secretary called the roll.

Mr. SMITH of Michigan (after having voted in the negative). I voted inadvertently. I am paired with the junior Senator from Missouri [Mr. REED], and withdraw my vote.

Mr. STONE (after having voted in the affirmative). I should like to inquire whether the Senator from Wyoming [Mr. CLARK] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. STONE. Having a pair with him, I withdraw my vote.

The result was announced, yeas 68, nays 5, as follows:

YEAS—68.

Ashurst	Dixon	Lodge	Root
Bacon	Fletcher	McCumber	Sheppard
Bankhead	Foster	Martin, Va.	Simmons
Borah	Gallinger	Martine, N. J.	Smith, Ariz.
Bourne	Gamble	Myers	Smith, Ga.
Brady	Gore	O'Gorman	Smith, S. C.
Brandegee	Gronna	Oliver	Smoot
Bristow	Guggenheim	Overman	Sutherland
Bryan	Johnson, Me.	Owen	Swanson
Burnham	Johnston, Ala.	Page	Thornton
Chamberlain	Jones	Paynter	Tillman
Clapp	Kavanaugh	Penrose	Townsend
Clarke, Ark.	Kenyon	Perkins	Warren
Crane	Kern	Pittman	Webb
Cummins	La Follette	Poindexter	Wetmore
Curtis	Lea	Pomerene	Williams
Dillingham	Lippitt	Richardson	Works

NAYS—5.

Bradley	Catron	Fall	Thomas
Burton			

NOT VOTING—22.

Briggs	Cullom	Nelson	Smith, Mich.
Brown	du Pont	Newlands	Stephenson
Chilton	Gardner	Percy	Stone
Clark, Wyo.	Hitchcock	Reed	Watson
Crawford	Jackson	Shively	
Culberson	McLean	Smith, Md.	

So the bill was passed.

POST OFFICE APPROPRIATION BILL.

Mr. BOURNE. I move that the Senate proceed to the consideration of House bill 27148, known as the Post Office appropriation bill.

The motion was agreed to.

Several Senators addressed the Chair.

Mr. BOURNE. I yield for routine business.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. WARREN. From the Committee on Appropriations I report back favorably with amendments the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, and I submit a report (No. 1317) thereon. I desire to give notice that I shall undertake to call up the bill for consideration to-morrow.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

PREVENTION OF DESECRATION OF THE FLAG.

Mr. LEA. From the Committee on Military Affairs I report back favorably without amendment the bill (S. 8487) to prevent the desecration of the flag of the United States and to provide punishment therefor.

Mr. WEBB. I ask unanimous consent that the bill just reported by my colleague may be put upon its passage. A similar bill passed the Senate in the Fifty-eighth and Sixtieth Congresses, and it carries no appropriation.

The PRESIDENT pro tempore. The Senator from Tennessee asks unanimous consent for the present consideration of the bill just reported.

Mr. SMOOT. Let it be read.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. ROOT. I think we should be able to read the bill before we act upon it. I feel constrained to object.

The PRESIDENT pro tempore. Objection is made, and the bill goes to the calendar.

POST OFFICE APPROPRIATION BILL.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 27148) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1914, and for other purposes, which had been reported from the Committee on Post Offices and Post Roads with amendments.

Mr. BOURNE. I ask that the Senate dispense with the formal reading of the bill and proceed to consider the amendments of the committee.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments be first considered. Is there objection? The Chair hears none, and it is so ordered.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Post Offices and Post Roads was, under the subhead "Office of the Postmaster General," on page 2, line 11, after "$704,450," to strike out the following proviso:

Provided, That, for the purpose of inspecting and investigating rural delivery routes and proposed rural delivery routes, a number of inspectors not exceeding 30 shall be placed subject to the orders of the Fourth Assistant Postmaster General whenever and for such periods as in his judgment they may be needed for that purpose.

The amendment was agreed to.

The next amendment was, on page 2, line 17, after the word "For," to strike out "per diem allowance" and insert "actual expenses"; in line 19, after the word "headquarters," to strike out "at a rate to be fixed by the Postmaster General"; in line 21, after the word "exceed," to strike out "$3" and insert "$4"; and in the same line, after the word "day," to strike out "$261,400" and insert "$348,534," so as to read:

For actual expenses of inspectors in the field while actually traveling on official business away from their homes, their official domiciles, and their headquarters, not to exceed $4 per day, $348,534.

The amendment was agreed to.

The next amendment was, in the item of appropriation for the allowances of inspectors, on page 3, line 6, after the word "*further*," to strike out "that no part of the sums herein provided for the salaries of post-office inspectors or for per diem allowances to such inspectors shall be paid or allowed to them while they may be engaged in making selections and recommendations for the appointment of fourth-class postmasters," and insert "that when hereafter any vacancy shall occur in the office of postmaster of the fourth class in any of the States of the United States the compensation of the postmaster of which office is $300 or more per year, a special nominating election may be held for the purpose of nominating a postmaster to fill such vacancy. Such nominating elections shall be conducted by the local authorities of the county, township, incorporated town, or city in which such post office is situated, the same as the election for county, township, or municipal officers, and the laws and regulations of the State and township or city in which such post office is located shall be held to apply to and be applicable to the conduct of such nominating election; and the actual necessary expenses incurred in the conducting of such nominating election shall be paid out of the appropriation from the Treasury of the United States for the support and maintenance of the Post Office Department of the United States, and the compensation of the necessary officials for such nominating election shall be the same as that provided by State statutes or city ordinances relating to the expenses for conducting county, township, or municipal elections," so as to make the proviso read:

And provided further, That when hereafter any vacancy shall occur in the office of postmaster of the fourth class in any of the States of the United States, etc.

Mr. TOWNSEND. Mr. President, I feel constrained to raise a point of order on that amendment as being general legislation.

Mr. BRISTOW rose.

Mr. TOWNSEND. I do not care to press it now if the Senator from Kansas desires to speak. I will reserve it.

Mr. BRISTOW. Mr. President, I wish to contest the point of order. This is in lieu of the lines stricken out on page 2 of the information print, lines 6, 7, 8, 9, and 10.

The present system of selecting fourth-class postmasters is for the department to detail inspectors to go to the community and select from the eligibles a postmaster. The House undertook to stop this manner of selection by refusing to permit the inspectors to have their per diem for the time engaged in this kind of work. That is the method which the House adopted to change the existing practice.

The Committee on Post Offices and Post Roads has stricken out the House provision, which seeks to modify and change the present practice, and in lieu of that has incorporated the language of the amendment which provides a way for selecting these postmasters other than that which the House seeks to change. It seems to me like it is a modification of the provision that comes from the House. I do not think it is subject to the point of order.

I will admit that if it had been a new proposition that originated in the Senate and was not in lieu of the lines stricken out, the point of order would hold against it.

Mr. TOWNSEND. I had not supposed that there could be any question about this being general legislation on an appropriation bill. It is true that under existing law the fourth-class postmasters are selected after an investigation and inspection by Government officials, but here we propose a radically new method. We propose to have an election in the various precincts of the fourth-class offices within a certain class, and we involve in that also the expenditure of the money necessarily spent in holding the election. I can think of nothing more radical in the way of legislation on an appropriation bill than this particular item.

Mr. BRISTOW. If the Senator will permit me, the expenditure is provided for in the House bill. It will not cost as much to nominate a postmaster, in my judgment, as the present system of detailing inspectors or sending them there to make a selection costs.

The House cuts out the provision of the law, or would seek to minimize this expense, by refusing the inspector his per diem while detailed upon this work, and by that means it undertakes to change the present system of selecting postmasters.

As is well known, until recently fourth-class postmasters were selected by Members of Congress and political committees. When a vacancy occurred in a congressional district where the Member of Congress belonged to the same political party as the administration in power it has been customary for the Post Office Department to call upon the Congressman for a recommendation for a postmaster to fill the vacancy. In the event that there was a Congressman who was not in harmony politically with the administration, if there was a Senator from that State who did belong to the same party as the President, then the Senator would be called upon for a recommendation. In the event there would be no Senator and no Congressman, then some political agent or committeeman of some character would be called upon to make the recommendation.

The present administration has changed that system. It has put the fourth-class postmasters under the civil service. Instead of depending upon Congressmen or political committees it sends the agents of the department, the inspectors, to make the selection, and they select from a certain eligible list which is created.

Mr. SMITH of Michigan. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Michigan?

Mr. BRISTOW. I do.

Mr. SMITH of Michigan. May I ask the Senator right there whether he has observed closely the workings of the new rule, and knows of his own knowledge whether these vacancies have been filled under the civil-service rules?

Mr. BRISTOW. Yes; they are being filled that way now.

Mr. SMITH of Michigan. I do not know to what extent they have not been filled, but I venture the assertion that they have not been able to get candidates for these offices under the new rules, and that scores of offices to-day have no postmaster because no candidates have applied.

Mr. BRISTOW. That may be true. I will not go into a discussion with the Senator from Michigan as to the desirability of the present system. I do not think it is a desirable one myself.

Mr. SMITH of Michigan. I can not let the opportunity go by without felicitating my friend from Kansas upon that expression. The distinguished Senator had a very large experience in the system that prevailed before this new order was established. He held the position of Fourth Assistant Postmaster General. I happened at that time to be a Member of the House of Representatives and came in frequent contact with him in that position, and I venture the assertion that the plan upon which we then worked could not be improved upon; that the personnel of the service, the care which was given the subject, both by the Fourth Assistant Postmaster General and the Representatives in Congress, have never been improved upon.

I wish much of the old order restored. Mr. President, with a full knowledge of the changed political conditions, I would be entirely satisfied after the 4th of March to see the old order reestablished and these offices turned over to prominent men in the community, Democrats, if you please, who feel honored to be thus favored.

Mr. BANKHEAD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Alabama?

Mr. BRISTOW. I do.

Mr. BANKHEAD. I regret very much to have to differ with the distinguished Senator from Michigan with reference to conditions existing under the administration of the distinguished Senator from Kansas. I wish to ask the Senator from Michigan if he would like to accept the conditions now which applied during that administration.

Mr. SMITH of Michigan. Mr. President, I say without the slightest hesitation that I would gladly accept every condition that governed the administration of William McKinley, and I wish that after the 4th of March the country might be assured of such a sane, careful, patriotic, sensible, and successful administration as was enjoyed at that time.

Mr. BANKHEAD. Mr. President, I want to call the attention of the Senator from Michigan to the fact that if that plan should be adopted in the next administration, he certainly would have no worry whatever in selecting fourth-class postmasters in any district in his State.

Mr. SMITH of Michigan. No; but I cheerfully yield that responsibility to the other side of the Chamber. I think that in a country and under a government essentially political the fruits of victory ought to go with the verdict, and let the responsibility rest with the people who have determined the choice of public servants.

Mr. ROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from New York?

Mr. BRISTOW. I shall when the Senator from Alabama is through.

Mr. BANKHEAD. Mr. President, I should like to ask the Senator from Michigan this question: After the 4th of March, if there should be a vacancy in a fourth-class post office in the State of Michigan or within his congressional district, were he a Member of Congress from that State, and he should go down to the First Assistant Postmaster General and say, "I would like to have this office filled," and that official should say to him, "Well, Senator," or "Representative, I will refer the matter to our referee down in your district or your State"——

Mr. SMITH of Michigan. Oh, well, Mr. President, I am not responsible for the scarcity of Democrats in the State of Michigan, although I have not encouraged their multiplication to any great extent.

Mr. BANKHEAD. I am asking the question of the Senator if he thinks that——

Mr. SMITH of Michigan. No; I do not plead guilty to that.

Mr. BANKHEAD. I thought you did.

Mr. SMITH of Michigan. But, Mr. President, under the last Democratic administration of Mr. Cleveland there was no difficulty whatever in parceling out the offices in my State, and to good men.

Mr. BANKHEAD. No; and the reason for that was that the Republicans were all turned out.

Mr. SMITH of Michigan. What does the Senator say?

Mr. BANKHEAD. The reason there was no difficulty in administering the law at that time was that the Assistant Postmaster General who had charge of the matter did not hesitate to make a vacancy and appoint a new man.

Mr. SMITH of Michigan. I know he did not; and I hope the same official will not hesitate to do so again as commissions expire.

Mr. BANKHEAD. He can not, for the fourth-class postmasters are now under the civil service.

Mr. SMITH of Michigan. I should like to see that law repealed.

Mr. BANKHEAD. Very well; but that is a different proposition.

Mr. SMITH of Michigan. Frankly, I do not believe in the application of that rule. Men who have grown up in their communities who have become recognized as men of character and have achieved success, men who have been the color bearers of their party, and who have done the things necessary to bring about party success, are entitled to reap the fruits of their victory, and the public service would not suffer.

Mr. BANKHEAD. That may be true, and I quite agree with the Senator from Michigan, but the conditions now will not permit it.

What I started out to say was that I remember very distinctly during the administration of the Post Office Department when presided over by my distinguished and able friend from Kansas [Mr. BRISTOW] when he was Fourth Assistant Postmaster General, when I went down to his office and suggested to him that there was a vacancy in my district that I should like to have filled, and that I had a very competent man to suggest for the place; that the people were all for him, that there was no opposition to him, the Senator from Kansas would always sit back and say, "Well, I am very sorry; but under the rules I shall have to refer that appointment to our referee down in Alabama." Who was that referee? Of course, he was a Republican; and, of course, nine times out of ten he had no knowledge of conditions; he had no acquaintance with the applicants. That is the way our postmasters were appointed. I do not want to see a recurrence of that in my State, or in that of my distinguished friend from Michigan [Mr. SMITH].

Mr. SMITH of Michigan. Mr. President, I am perfectly willing that that same rule should apply now; in the progress of political warfare, we having temporarily lost, the other side should take all the places; they are responsible for the change. I do not regard the present civil-service system as any improvement upon the old one, as a whole. There is more mean, contemptible, degrading politics in the civil service to-day than is generally understood by the public. This criticism does not apply to all departments, but to many. I assert, without any hesitation whatever, that there has not been a Cabinet minister in charge of any department of this Government in the last 15 years who has run his department. He has been blindfolded by an official force protected by law, and he has been obedient to their will.

Mr. President, I am not much of a wholesale civil-service reformer; I do not believe in it at all as applied to post offices, although certain public work requires experts and can be done best by people of special training. I think it is little less than grotesque to ask the leading men of a little community to get behind a little desk and define the rule of higher mathematics before they can serve the public in that capacity. If candidates are honest and competent, I would like to see all these offices go to the dominant party to be apportioned by them as a reward for loyal political services, and feel that the public would be served with equal fidelity and the expense of administration in no manner increased.

Mr. BRISTOW. Mr. President, I appreciate the cordial expressions of confidence which my friend from Michigan [Mr. SMITH] expresses in the administration of one of the bureaus of the Post Office Department when I was at the head of it. He was delighted with my administration, because under the rules which controlled then, whatever he recommended went. [Laughter.] I appointed upon his recommendation.

Mr. SMITH of Michigan. You never had any complaint.

Mr. BRISTOW. The Senator from Alabama, who was then in the House of Representatives, was not very well satisfied, because I never appointed the man whom he recommended, unless the recommendation was ratified by the Republican committeeman from that district. That was the system which prevailed then. I do not think it a good one. I think it would be a better system for the Representative of the district, regardless of his political affiliations, to nominate all postmasters, because he would have some knowledge of the communities and be better able to judge than would some irresponsible committeeman. I do not care what party is in power or who might be President, it would be a better system to have the Representative make the recommendations for the postmasters within his district. That, however, is not the best system.

The better system is to provide a lawful way in which the people themselves can select the postmasters who are to serve them in the different communities, placing the discretion in the hands of the executive officer, the Postmaster General, to pass upon the qualifications of the man or woman who is recommended. If an incompetent person is recommended, the Postmaster General under this provision is not required to appoint such a person, but he would have the expression of the wishes of the community as to whom that community wants to serve them as their postmaster. Of course, any Postmaster General will appoint that person if the person is competent to properly conduct the office.

Now we all may have theories as to what is the best means of selecting postmasters. The proposition recommended here by the Committee on Post Offices and Post Roads would substitute for the condition to which the Senator from Michigan objects, in my opinion, a better one than the system that now prevails. I have an illustration of it here. A Senator has just received a letter from the Post Office Department which answers one of the questions submitted by the Senator from Michigan. It is from the Postmaster General, and reads:

> In reply to your letter of the 3d instant, with which you transmitted two communications, one from W. H. Pray and the other from Frank C. Stearns and Byron Sweet jointly, in behalf of the appointment of Mrs. Lora E. Moore as postmaster at Roger, N. Dak., to succeed the late postmaster, I beg to say that there were but two eligibles for appointment to fill the vacancy, Ward J. Pickett and Mrs. Moore, both of whom stated in their application papers that they would conduct the post office at the present site. As the rating of Mr. Pickett was 93.10, while that of Mrs. Moore was only 86.05, in accordance with the practice in such cases Mr. Pickett was appointed under date of the 21st ultimo.
>
> In compliance with your request, the letters transmitted by you are returned herewith.

Showing that the Post Office Department is following that system in making these appointments. The House undertakes to change that system by a legislative enactment, and this amendment is a substitute for the House provision, and I think is in order.

As to the merits of the case, it is simply giving the people of a community an opportunity to say in a lawful way whom they prefer for postmaster, and who is more interested in the selection of postmasters than those who are to be served?

Mr. GRONNA. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from North Dakota?

Mr. BRISTOW. I yield to the Senator.

Mr. GRONNA. I was out of the Chamber for a few moments and did not have an opportunity to hear all of the remarks of the Senator from Kansas. I simply want to ask him this question: Does the Senator from Kansas believe that the selection of fourth-class postmasters would be more easily settled by an election than by appointment under the civil service, as they are now supposed to be appointed?

Mr. BRISTOW. I think so. I think it would be far more satisfactory to the community, and I think the expense would be less than under the present system.

Mr. GRONNA. Is it not true that elections carry with them more or less disturbance, more or less trouble, and would it not be better if we could be assured that all these selections would be made as they are now made, under the civil service, or if they were all put in the classified service?

Mr. BRISTOW. All fourth-class postmasters are in the classified service now. I do not think it is practicable to hold examinations for fourth-class postmasters and then select the one who has the highest grade, because the character of the position is such and the nature of the service is such that the person who passes the highest examination may not make the most desirable postmaster, and there is the difficulty of getting people to take the examinations. There are a great many of the fourth-class post offices where it is the question of what store is to have the post office, where it is to be located, and that is a matter in which the community is interested. This proposition is simply to permit the people of that community at a primary election to determine whom they want for postmaster. Why should they not determine that as well as whom they want for their township trustee or for their sheriff or for their county clerk or for any other local office?

M. GRONNA. I do not say that the people are not as competent to make as wise selections as are made under civil-service rules, but the letter the Senator just read shows that the present system is in the interest of efficiency, in the interest of good service, and that those most capable are being selected.

Mr. BRISTOW. If these were political positions and the person selected was to take a place in an office as a clerk, I quite agree with the Senator. I believe in the civil service as to that. I can not accord with my friend from Michigan [Mr. SMITH] in the criticism of the general civil-service policy.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Missouri?

Mr. BRISTOW. I yield to the Senator.

Mr. STONE. I should like, for information, to ask my friend from Kansas one or two questions.

Mr. BRISTOW. I will be very glad to answer if I can.

Mr. STONE. I am sure the Senator can if anyone can, although there is some doubt whether anybody can. The provision inserted as an amendment provides:

That when hereafter any vacancy shall occur in the office of postmaster of the fourth class in any of the States of the United States the compensation of the postmaster of which office is $300 or more per year, a special nominating election may be held for the purpose of nominating a postmaster to fill such vacancy.

Now follows this provision—and this is one of the two matters about which I wish to ask the Senator for some information—

Such nominating elections shall be conducted by the local authorities of the county, township, incorporated town or city in which such post office is situated, the same as the election for county, township, or municipal officers, and the laws and regulations of the State and township or city in which such post office is located shall be held to apply to and be applicable to the conduct of such nominating election.

What constituency would have the right to vote at that election?

Mr. BRISTOW. The Postmaster General would have the authority to determine that. If the Senator wants to know what my opinion is as to the constituency that should be prescribed, I would say the patrons of the office. It is easy to ascertain who they are. That is a question for the administration to decide.

Mr. STONE. Does this contemplate that the Post Office Department shall define the election-district limits of each fourth-class post office?

Mr. BRISTOW. Yes; it could do that.

Mr. STONE. How many of these fourth-class post offices are there?

Mr. BRISTOW. There are something over 50,000.

Mr. STONE. That would entail a pretty large task on the Post Office Department, would it not?

Mr. BRISTOW. I think not.

Mr. STONE. I will ask the Senator whether, taking any village in his State or in mine where the conditions are substantially the same——

Mr. BRISTOW. I should say there are not 50,000 post offices that would come under the provisions of this amendment. I had in mind the entire number. There probably would not be more than twelve or fifteen thousand of this great number, not to exceed 20,000 in any event.

Mr. STONE. You mean where the compensation is $300 and over?

Mr. BRISTOW. Yes.

Mr. STONE. There are 20,000 offices then that would be affected?

Mr. BRISTOW. Yes; not to exceed that, in my judgment. Of course, that is simply an estimate.

Mr. STONE. Take any fourth-class post office where the compensation is $300 or more, would it not be a rather difficult task to define the limits in a manner satisfactory to determine the election?

Mr. BRISTOW. No; the resident patrons of the office would be on the eligible list, and the list of resident patrons of an office can be secured very easily.

Mr. STONE. This language disturbs me a little bit:

Such nominating elections shall be conducted by the local authorities of the county, township, incorporated town or city in which such post office is situated.

Mr. BRISTOW. Yes.

Mr. STONE. Take a fourth-class post office in the county in which my friend lives: According to this, it could be held by the local authorities of the county. Who is to hold it under the particular provisions of this bill? Would it be the county or the township?

Mr. BRISTOW. It would be the township, as a rule.

Mr. STONE. But it is in the county as well as in the township.

Mr. BRISTOW. Yes; but that is a matter for the Postmaster General, of course. He has the discretion. It depends upon the location of the office. If the office is a small one, out in a township, of course the township officers would be designated as the proper officers to conduct the election, and it would be conducted under the same laws that a township election would be conducted.

Mr. STONE. It is in a county, nevertheless; and under the very terms of the law the people of the county might insist upon conducting it.

Mr. BRISTOW. If the Senator from Missouri will pardon me a minute, if any election is held within that county the officers in the township that serve that community hold the election in that township. In his own State the Senator knows that that is done. The officers that conduct the election primarily are the township officers of election, and they of course send their returns, in the case of a county election, to the township commissioners. So that that is not at all difficult. The officers are there for holding local elections, and the Postmaster General simply makes the designation. If there were to be an election of a postmaster in the county in which I live, as the Senator has referred to me, there would be no difficulty about it.

Mr. STONE. I fear that would create a very great deal of confusion. My friend from Mississippi asks, "What are you going to do in a section of the country or a State where they have no such thing as a township?"

Mr. BRISTOW. There is always a subdivision which corresponds to a township. In New England it is a town. I think in Louisiana it is a parish, or some subdivision of a parish.

Mr. WILLIAMS. A parish in Louisiana is a county itself.

Mr. BRISTOW. There is some local subdivision, is there not, of the parish?

Mr. WILLIAMS. In Mississippi each county is divided into about five "beats," as they are called, simply for the purpose of electing a magistrate and constable, and——

Mr. BRISTOW. That is the same as a township in Kansas, or a town in New England.

Mr. WILLIAMS. Each of them has a member of the board of supervisors; but there is no constant, enduring form of election officers.

Mr. BRISTOW. Then the county officers that conduct the elections in that "beat," as it is called, would have control of the matter.

Mr. SMITH of Michigan. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Michigan?

Mr. BRISTOW. Certainly.

Mr. SMITH of Michigan. Let me suggest to the Senator from Kansas that the theory upon which his amendment is predicated is that a majority of the people will determine for themselves whom they want for a postmaster.

Mr. BRISTOW. Yes.

Mr. SMITH of Michigan. If only a small faction were to determine the matter the amendment of the Senator from Kansas would entirely miscarry, would it not?

Mr. BRISTOW. Oh, yes; the same as any other election, if the people do not take any interest in an election.

Mr. SMITH of Michigan. But a multiplicity of candidates—say, four or five candidates—would reduce the percentage of any one candidate far below a majority; and, then, if we get the recall, there would be more than enough dissenters to retire him before he could take his place.

Mr. BRISTOW. It is the same method in which county and township officers are elected now. That criticism would go to the whole system of institutions under which we have been living for more than a century.

Mr. STONE. If my friend will permit me, I will ask him the second question I had in mind. I do not wish to interrupt my friend too long or to impose too much upon his known courtesy.

Mr. BRISTOW. Oh, not at all. There is no imposition.

Mr. STONE. There is a provision here to the effect that—

The actual necessary expenses incurred in the conducting of such nominating election shall be paid out of the appropriation from the Treasury of the United States for the support and maintenance of the Post Office Department—

And so forth.

That provision goes on further to say that the per diem or compensation to be paid the officials who are to conduct these elections shall correspond to the compensation allowed by the statutes locally applicable in the case of somewhat similar elections. Is that correct?

Mr. BRISTOW. Yes.

Mr. STONE. That is correct?

Mr. BRISTOW. Yes.

Mr. STONE. Has the Senator thought out—I assume he has and will be able to furnish the information I seek—the probable cost of holding these 20,000 or more elections?

Mr. BRISTOW. In the first place, I wish to advise the Senator that there would not be any 20,000 elections held. There are hundreds and hundreds of these post offices that do not become vacant and where there will be no election.

Mr STONE. At some time there will be.

Mr. BRISTOW. Oh, in time, as the years go by; but I have in mind one postmaster in New York who served for 70 years in a fourth-class post office.

Mr. STONE. Does the Senator desire, in this way, to nominate a man to hold office for life, or during good behavior?

Mr. BRISTOW. They will hold their offices just the same as they do now. A fourth-class postmaster has no term of service. He serves until he dies, resigns, or is removed. In the days when the spoils system was running its full course, I do not think there were ever more than 12,000 appointments of postmasters in the United States made in any one year, and I do

not think there would be any more rapid changes under this system than there are under the present system; and of course the appointment would run on.

Mr. STONE. With all due deference, this seems to me to be a very remarkable departure from anything I have ever conceived likely to take place in the administration of this Government. The measure itself is too crude, not sufficiently developed, to undertake to put it forth in this form.

The PRESIDENT pro tempore. The Chair is prepared to rule on the point of order.

Mr. BRISTOW. If the Senator will pardon me, we have drifted from the point of order to the merits of the case; and I wish to answer my friend from Missouri by saying that the method, in my opinion, is not crude. It has been practiced in many sections of the country. Congressmen have adopted it, only they have held party primaries. This takes the matter out of partisan politics and leaves it with the community to select whomsoever they please.

As to the fourth-class postmasters in office, this provision does not change the present policy or method as to them at all. Whenever a removal is made, whenever a vacancy occurs, for whatever cause, the people nominate a successor, instead of depending upon some political committeeman or some Member of Congress to nominate him.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Utah?

Mr. BRISTOW. Certainly.

Mr. SUTHERLAND. I should like to ask the Senator a question. The language of this amendment, as the Senator has already said, is permissive. Who is to exercise the option as to whether or not an election shall be held?

Mr. BRISTOW. The Postmaster General.

Mr. SUTHERLAND. The Senator's amendment does not say so. If the Senator will permit me, the amendment simply says——

Mr. BRISTOW. That it may be held.

Mr. SUTHERLAND. "That when vacancies occur," and so on, "a special nominating election may be held for the purpose of nominating a postmaster." It is left entirely in doubt, it seems to me, as to whether the community shall exercise the option or whether the Postmaster General or somebody else shall exercise the option.

Mr. BRISTOW. The Senator is a great constitutional lawyer, and I will say to him that when I drew this amendment, in the first place, I made it mandatory upon the Postmaster General to appoint the party so selected. But the constitutional lawyers belonging to the Committee on Post Offices and Post Roads said that under the Constitution of the United States you could not command an executive officer to make a specific appointment. They advised me that you had to leave it optional with him. We invite the Postmaster General to hold this primary to give the people an opportunity to nominate a candidate for him to appoint as postmaster, and the Government will pay the expenses of that primary. If the Postmaster General does not do it, then the law is of no effect; it does not prevail. But the responsibility is on the executive officer to determine whether or not he will follow out the plan which Congress has provided that he may follow if he sees fit.

Mr. SUTHERLAND. I was not complaining that the language of the amendment was not mandatory, but I was complaining that the permission was granted without saying to whom it was granted.

Mr. BRISTOW. It was granted to the Postmaster General, of course, because we have given him in the law the authority to appoint these postmasters and select them in any way he pleases. Now, we propose in this way to offer to pay the expenses of this mode of selection. If the Postmaster General accepts it——

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Mississippi?

Mr. BRISTOW. I do.

Mr. WILLIAMS. Mr. President, if any postmaster chose, and the chief of the administration with which he served agreed with him, he could order these special nominating elections in his discretion and make the appointments accordingly. He could prescribe that or any other method as a rule of conduct for the department. What are you doing here more than giving an authority which the Postmaster General already has?

Mr. BRISTOW. The Postmaster General does not now have the authority. In the first place, he could not pay the expenses of such an election. There is no provision for it, and there is no way that I know of by which he could avail himself of the election laws of the State in order to meet this expense.

Mr. WILLIAMS. The question of the expense is another matter. Of course, Congress would have to grant an appropriation when the rule or regulation was made, or he would have to find it in a lump sum granted to the post office somewhere which would be applicable for this purpose. But it is a fact that such elections have been held. I myself, when a Member of the House of Representatives, in two cases called elections of the Democratic patrons of the post office to determine whom they wanted for postmaster. By the way, there it was much fairer than here, because if at the first nominating convention nobody had a majority they had to hold a second one, so that somebody must have a majority instead of a mere plurality.

But the point of my remark is that, of course, no money can be paid out of the Treasury except by act of Congress. So far as concerns adopting a rule of guidance for itself, however, the Post Office Department, provided the President agrees to it, has full power now to adopt this or any other method it may choose as a rule of guidance for itself. It has already adopted the rule, under which it is now acting, of letting the Congressman's recommendation control, and in some cases the referee's recommendation. There was no law providing for that when the Senator from Kansas was Fourth Assistant Postmaster General. It was merely a rule which he adopted for his own guidance.

Mr. BRISTOW. The Senator from Mississippi should remember that all fourth-class postmasters are now under the civil service. They are appointed upon an examination to determine who is eligible and then a post-office inspector is sent there to select one from the eligibles.

Mr. WILLIAMS. I understand that a presidential decree has placed them under the civil service—that an Executive order has done it. I equally understand that that Executive order can be suspended or set aside by another Executive order. There is just as great authority to uncreate the system as there was to create it. I do not know that I am opposed to this; but it does seem to me there ought to be some clear way of getting at it.

I want to ask the Senator this question: Take my own State, for example, and our system. We have no town or township governments at all. A township with us is simply a geographical designation. Each township has a sixteenth section and they are trustees elected for the sixteenth section. Outside of that, a township has nothing to do with the government of the State of Mississippi. How would this election be held in that State? Each county is divided into five "beats," merely for the purpose of having a justice of the peace and a constable apportioned to each beat, and a member of the police board, the board of supervisors; but there is no continuing election machinery in these townships.

One other word. The territorial limits of the "beats" would by no means coincide with the patronage of the post office.

Mr. BRISTOW. I think I have covered that in my answer to the interrogatories of the Senator from Missouri [Mr. STONE].

The PRESIDENT pro tempore. The Chair will call attention to the fact that Rule XX provides that a point of order shall not be debated unless it is submitted to the Senate.

Mr. BRISTOW. I am ready to have a ruling upon the point of order.

The PRESIDENT pro tempore. If the Senator will permit the Chair to rule, the Chair sustains the point of order as to the part inserted by the committee.

Mr. BOURNE. I ask that the amendment of the committee striking out the proviso be agreed to.

The PRESIDENT pro tempore. Without objection, it is agreed to.

Mr. BOURNE. Mr. President, it is growing late, and I will make a motion that the Senate take a recess now until 8 o'clock this evening, with the expectation that we will be able to finish up the Post Office appropriation bill this evening.

Mr. CLARKE of Arkansas. Do I understand that no other business can be taken up?

Mr. BOURNE. We can make that provision.

Mr. CLARKE of Arkansas. I simply want to understand it. We are to consider no other bill except this one?

Mr. SUTHERLAND and Mr. BORAH addressed the Chair.

The PRESIDENT pro tempore. The Senator from Utah first addressed the Chair.

Mr. SUTHERLAND. Mr. President, I do not want the Senate to take a recess with the understanding that no other business will be taken up except the Post Office appropriation bill. It may be that that will be all we will be able to do; but if any time remains during the evening, I should like to proceed with the consideration of the public buildings bill.

Mr. BORAH. Mr. President, I have a unanimous-consent agreement here which I want to carry out this evening if we can; and I want Senators to know that it is my expectation to do so if it is possible.

Mr. CLARKE of Arkansas. If my suggestion were modified to the extent of including the public buildings bill and the bill submitted by the Senator from Idaho, would that be agreeable to everyone?

Mr. BORAH. It would be agreeable to the Senator from Idaho.

Mr. CLARKE of Arkansas. With that understanding, that is all right.

Mr. SWANSON. Mr. President, do I understand that this agreement includes the bill in which the Senator from Idaho [Mr. BORAH] is interested, and does not interfere with the unanimous-consent agreement? I can not consent to that if it interferes with the unanimous-consent agreement which contemplates a vote on the bill creating a department of labor. If a recess until 8 o'clock and the additional unanimous-consent agreement interfere with the vote on that bill, I shall not consent to it.

The PRESIDENT pro tempore. Does the Senator from Oregon ask unanimous consent or move a recess?

Mr. BOURNE. I move a recess.

The motion was agreed to, and (at 5 o'clock and 55 minutes p. m.) the Senate took a recess until 8 o'clock p. m.

EVENING SESSION.

The Senate reassembled at 8 o'clock p. m., on the expiration of the recess.

POST OFFICE APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 27148) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1914, and for other purposes.

The PRESIDENT pro tempore. The reading of the bill will be proceeded with, at page 4, line 6.

Mr. GRONNA. Mr. President, this is a very important bill, and I think a quorum should be present. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from North Dakota suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Johnston, Ala.	Smith, Ga.
Borah	Dillingham	Jones	Smith, S. C.
Bourne	Fall	Martin, Va.	Smoot
Brady	Fletcher	Nelson	Sutherland
Bristow	Gallinger	Page	Swanson
Chamberlain	Gardner	Pomerene	Townsend
Clapp	Gore	Sheppard	Works
Cummins	Gronna	Shively	

Mr. ASHURST. I have been requested to state that the Senator from Colorado [Mr. THOMAS] is detained from the Senate by reason of a slight illness, and that my colleague [Mr. SMITH of Arizona] is absent from the Senate on important public business.

The PRESIDENT pro tempore. Thirty-one Senators have answered to their names—not a quorum. The names of the absentees will be called.

The Secretary called the list of absent Senators and Mr. CATRON and Mr. KENYON answered to their names when called.

Mr. BRADLEY and Mr. BANKHEAD entered the Chamber and answered to their names.

The PRESIDENT pro tempore. Thirty-five Senators have answered to their names—not a quorum.

Mr. SMOOT. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDENT pro tempore. The Sergeant at Arms will execute the order of the Senate.

Mr. CRAWFORD, Mr. GUGGENHEIM, Mr. BRYAN, Mr. CLARKE of Arkansas, Mr. KAVANAUGH, Mr. PENROSE, Mr. SIMMONS, Mr. SMITH of Michigan, Mr. POINDEXTER, Mr. LEA, Mr. PAYNTER, Mr. JOHNSON of Maine, and Mr. SMITH of Arizona entered the Chamber and answered to their names.

The PRESIDENT pro tempore. Forty-eight Senators have answered to their names. A quorum of the Senate is present. Without objection, further proceedings under the call will be dispensed with. The Secretary will continue the reading of the bill.

The Secretary resumed the reading of the bill, beginning on page 4, line 6.

The next amendment of the Committee on Post Offices and Post Roads was, on page 4, line 16, after the words "business in," to insert "connection with the postal service of," so as to make the clause read:

For traveling expenses of inspectors without per diem allowance, inspectors in charge, and the chief post-office inspector, and expenses incurred by inspectors not covered by per diem allowance, unusual and extraordinary expenses necessarily incurred for maintenance by inspectors over and above per diem allowance while traveling on official business in connection with the postal service of Alaska, and for the traveling expenses of two clerks performing stenographic and clerical assistance to post-office inspectors in the investigation of important fraud cases, $41,400.

The amendment was agreed to.

The next amendment was, on page 4, line 22, after the word "routes," to strike out "$35,000" and insert "$45,000," so as to make the clause read:

For livery hire incurred by inspectors not covered by their per diem allowance, including livery hire in connection with the installation and inspection of rural routes, $45,000.

The amendment was agreed to.

The next amendment was, on page 5, line 3, after the word "robbers," to strike out "$7,500" and insert "$15,000," so as to make the clause read:

For payment of rewards for the detection, arrest, and conviction of post-office burglars, robbers, and highway mail robbers, $15,000: *Provided*, That of the amount herein appropriated not to exceed $5,000 may be expended, in the discretion of the Postmaster General, for the purpose of securing information concerning violations of the postal laws and for services and information looking toward the apprehension of criminals.

The amendment was agreed to.

The next amendment was, under the subhead "Postal Savings System," on page 5, line 16, after the word "office," to strike out "$100,000" and insert "$149,000," so as to make the clause read:

For blank books, forms, pamphlets, rubber stamps, canceling devices, and postal savings certificates for use in depository offices and banks, postal savings cards and stamps, official postage and stamped envelopes for use in lieu of penalty or franked envelopes, in the transmittal of free mail, authorized by act of June 25, 1910, including those used in the central office, $149,000.

The amendment was agreed to.

The next amendment was, on page 5, line 22, after the word "charges," to strike out "$2,500" and insert "$5,000," so as to make the clause read:

For miscellaneous items, including the purchase of filing cabinets in depository offices not located in Federal buildings, and the expense incident to the shipment of supplies, including the cost of wrapping paper, twine, packing boxes, drayage, freight, and express charges, $5,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the First Assistant Postmaster General," on page 6, line 4, after "$30,250,000," to strike out "*Provided*, That no part of this appropriation shall be expended in the payment to postmasters of the first class where any part of the amount of salary has been computed on the sales of parcel-post stamps," so as to make the clause read:

For compensation to postmasters, $30,250,000.

The amendment was agreed to.

The next amendment was, on page 12, line 7, after the word "stations," to strike out "5,480" and insert "2,730"; in line 9, after the word "each," to insert "2,730, at not exceeding $800 each, and 2,750, at not exceeding $720 each: *Provided*, That after June 30, 1913, the salary of the first grade for clerks and carriers shall be $720 instead of $600"; and in line 13, after "$600," to strike out "*Provided*, That after June 30, 1913, the first grade for clerks and carriers shall be abolished and that appointments shall be made to the second grade, salary $800; and that clerks and carriers at first-class offices shall be promoted successively to the fifth grade and clerks and carriers at second-class offices shall be promoted successively to the fourth grade," so as to make the clause read:

Clerks and clerks in charge of stations, 2,730, at not exceeding $800 each, and 2,750, at not exceeding $720 each: *Provided*, That after June 30, 1913, the salary of the first grade for clerks and carriers shall be $720 instead of $600.

Mr. CURTIS. Mr. President, I should like to have the chairman of the committee consent to treat that all as one amendment. I have offered an amendment to strike out and insert, but the object of my amendment really would be accomplished if the amendment recommended by the Senate committee were disagreed to. Therefore, if the Senator from Oregon will consent, I should like a vote on the whole paragraph as one amendment.

Mr. BOURNE. Mr. President, that is perfectly agreeable to me. I should like to say, for the information of the Senate, that the Senate committee believed that the increase in compensation of the clerks from $600 to $720 was ample, and the limitations on the numbers were made to conform to that idea. If the desire of the Senate is to abolish the $600 grade and absorb that in the $800 grade, making a promotion of $200, well and good. Then the Senate will vote for the motion to disagree as made by the Senator from Kansas [Mr. CURTIS]. If, however,

they believe that an increase of $120 is sufficient, they will vote against the motion to disagree and will support the committee.

Mr. CUMMINS. Mr. President, the House provision gives to these employees, as I understand, $800?

Mr. BOURNE. Yes.

Mr. CUMMINS. And advances the $600 grade to $800?

Mr. BOURNE. That is correct.

Mr. CUMMINS. And the Senate committee proposes to reduce a certain portion of them as compared with the House provision to $720?

Mr. BOURNE. The committee amendment, if adopted, would increase the compensation of several thousand of these employees by $120 a year.

Mr. CUMMINS. But the House provision increases the same number.

Mr. BOURNE. Yes; $200.

Mr. CUMMINS. To $800 per year.

Mr. PENROSE. Mr. President——

Mr. CUMMINS. I want to say all that I have to say if the Senator from Kansas will permit me now.

Mr. CURTIS. Certainly.

Mr. CUMMINS. I very earnestly hope that the House provision will be retained in the bill. I do not believe that $800 per year is more than adequate compensation for these men. On the contrary, if I were to criticize it at all, I would insist that the House provision gave these men inadequate compensation. I do not think that the Government ought to ask men who are employed to do the kind of work that these men do to labor for less than $800 per year.

I know that there is a difference of opinion with regard to the standard that we should adopt in fixing pay for Government employees; I know that there are some people who believe that the compensation ought to be fixed with reference to what similar work commands in other employments. I am not one of them.

I believe that the Government ought to pay to all of its employees a compensation that will enable them to live in reasonable comfort and to maintain themselves and their families with reasonable success. I think the general labor of the country is underpaid. I do not believe that the laboring men of this country take their fair share from the accumulated wealth which they produce. I think it is one of the most imperative duties of Congress to so adjust our laws that these laboring men may advance their compensation; but until we succeed, if we ever do succeed, in giving the laboring people of this country a better opportunity in the struggle of life, it is a false notion that we shall measure the compensation that we pay as a Government to these men by the underpay that is taken by the employees in the general battle of life.

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I do, although I hold the floor at the pleasure of the senior Senator from Kansas [Mr. CURTIS].

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the senior Senator from Kansas yield to his colleague?

Mr. CUMMINS. I yield, however, if I may be permitted to do so.

Mr. CURTIS. I yield.

Mr. BRISTOW. I should like to suggest to the Senator from Iowa [Mr. CUMMINS] that he is proposing to tax the man who is receiving less than $800 a year in order to get money to pay these men more.

I would like to call the Senator's attention to the fact that the very men who, he says, are now paid inadequately outside of the Government service are the men upon whom he imposes a tax to pay the men in the Government service more than the man outside is getting. I myself can not concur in any such policy.

Mr. CUMMINS. There is some truth in what the Senator from Kansas has just said. It is, however, only a partial truth. In so far as the men who are underpaid do contribute to the revenues of the Government, the statement of the Senator from Kansas is correct. However, that does not justify the Government itself in fixing a false standard of compensation. It ought to incite the Government to every possible effort to increase the pay of the men who really do create and earn the wealth of our country.

Mr. BORAH. Mr. President——

Mr. CUMMINS. I yield to the Senator from Idaho.

Mr. BORAH. I desire to ask what kind of service the employees, about whom we are now talking, perform. What is the particular service which they do?

Mr. CUMMINS. They are clerks in the post office.

Mr. CURTIS. Postal carriers.

Mr. CUMMINS. Clerks in charge of stations.

Mr. BOURNE. And stenographers.

Mr. CUMMINS. Clerks, and clerks in charge of stations—2,730 at not exceeding $800 each, and 2,750 at not exceeding $720 each.

Mr. SMOOT. The great majority of them, however, are letter carriers.

Mr. CUMMINS. I think that is true. They are somewhat divided.

Mr. BORAH. What is the average earning per annum of the man who labors in this country?

Mr. CUMMINS. If the Senator from Idaho is asking me that question, I can not answer it with absolute accuracy; but my recollection is that the average wage of laborers in the United States is not quite $500 per year.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. CUMMINS. I yield.

Mr. POMERENE. Here in the city of Washington last year we raised the wages of street cleaners to $2 a day. I had some part in making that raise, and I am glad they have it. They are not getting too much——

Mr. WORKS. Mr. President——

Mr. POMERENE. Just one moment—but it does seem to me that the men who are employed in the responsible position of clerks ought to get more than $600 a year. If they can not earn more than $600 a year, they ought not to be in the service. I do not feel that it is right to have men who are required to have a considerable degree of intelligence to work for this Government at anything like a salary of $600 a year.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from California?

Mr. CURTIS. I do.

Mr. WORKS. I should like to ask the Senator from Ohio if he knows that our good intentions in raising the wages of the laboring men in Washington was a failure, and that they have never received the increased wages?

Mr. POMERENE. Mr. President, I did not know that; and if that is true, I am very sorry for it. I know that in this Chamber we did what we could to raise their wages to $2 a day.

Mr. WORKS. I happen to know that, because I myself offered the amendment, but I afterwards learned that they were not paid. I again offered the same amendment, and it was adopted a few days ago. I hope we shall have better success in the future.

Mr. POMERENE. I think Congress owes an apology, then, to these laborers.

Mr. CUMMINS. May I give a moment's more attention to the thought suggested by the Senator from Kansas? It is well worthy of consideration. We might as well face that proposition now. If we are to adjust the salaries or compensation of Government employees according to the underpaid, admittedly underpaid, general labor of the country then this whole bill is manifestly wrong, because there are hundreds of salaries here reported by the committee that are vastly above the standard that would be set up by that comparison.

We are doing the best we can here, and I think we ought to do a great deal more for equalizing the wealth of this country. There are many ways in which we might do it if we would give more attention to the subject, as I think we ought to. Meanwhile, we ought to give to our employees enough to live upon, enough to take care of their families in a meager way.

There is not a Senator here who does not know that $720 a year will not support a man with his family, living as the men who do this work must live, in order to maintain themselves in the society of which they are a part. I hope very earnestly that we will retain the House provision, and not limit this compensation as suggested by the Senate committee.

I have said this with very great reluctance. I have the very greatest confidence in this committee, in its chairman, and in its members. I know they have bestowed upon this work a high measure of fidelity, and not only fidelity but a great measure of intelligence as well. I do not know whether there are other instances in which they have reduced the salaries proposed by the House, but I can not think they have in many instances. I assure the chairman of the committee and its members that it is with no disrespect whatever toward them that I have said what I have, in the hope that the amendment may be rejected and the House provision preserved.

Mr. ASHURST and Mr. SMOOT addressed the Chair.

The PRESIDENT pro tempore. The Chair will inquire of the Senator from Kansas if he still desires to retain the floor?

Mr. CURTIS. I do.

The PRESIDENT pro tempore. Does the Senator yield, and to whom?

Mr. CURTIS. I yield to the Senator from Utah.

Mr. SMOOT. Mr. President, I will ask the Senator from Iowa if he believes that all the clerks provided for in the House bill should receive the same salary? I ask that because of the fact that in the past the clerks and carriers of a first-class office have always received a higher salary than the clerks and carriers of a second-class office.

Mr. CUMMINS. I am not competent to answer the question propounded by the Senator from Utah. I have no doubt that if perfect justice were done some of these clerks should be paid higher salaries than others. The House provision, as I understand, abolishes the first grade and starts them all in on their way to promotion upon a grade ahead of the $600 grade, or the first grade. I do not insist that they are all entitled to exactly the same compensation, but I do insist that no one of them should receive less than $800 per annum.

Mr. SMOOT. Mr. President, I am rather in sympathy with that view—that they should all receive an increase. I sympathize with that position. But I myself am not sufficiently familiar with the matter to say whether all of the carriers and clerks in first-class post offices should receive the same identical salary that clerks and carriers of second-class post offices receive, or vice versa. I have always understood that the clerks and carriers of a first-class post office had more responsibility and a rather larger field of labor to attend to than those of a second-class office, but really, as I say, I am not sufficiently familiar with the matter to say whether that is so or not.

Mr. CUMMINS. I do not think that is well founded, probably; but I do not know. I think in a great many instances the fourth-class postmaster himself does a very large part of the work.

Mr. SMOOT. This does not apply to fourth-class postmasters; it applies only to the carriers and the clerks.

Mr. CUMMINS. I understand that perfectly, but I thought the Senator from Utah referred to the clerks of the fourth-class offices.

Mr. SMOOT. Oh, no; I was comparing the clerks and letter carriers of the first-class offices with those of the second-class offices.

Mr. CUMMINS. I am not sufficiently familiar with the subject to say which ought to have the larger salary. I have no doubt that, taking the whole 7,000 or 15,000 here, many men of superior skill and merit could be found who are entitled to a larger salary than some of their less efficient fellows. But there has been no effort to grade them in that way, according to their real efficiency; and I put my objection to the Senate amendment upon the ground that $800 ought to be the minimum compensation.

Mr. ASHURST. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Arizona?

Mr. CURTIS. I do.

Mr. ASHURST. Mr. President, I shall support the amendment which has for its purpose the reinstatement of the House provision.

As the Senator from Iowa [Mr. CUMMINS] said when he concluded and took his seat, I also feel that any working person supporting a family in any department of life in the United States to-day who is paid a salary of less than $800 per year is inadequately paid. There was recently made an investigation into the condition of a large number of workingmen. A searching analysis was made and 2,567 cases were examined. It was ascertained that in order for a workingman and his family to exist as becomes human beings it was necessary for him to expend for food, rent, clothing, and the other actual necessaries of life, the sum of $768.54. That sum purchased only the barest actual necessaries of life; which left him no money whatever for books, no money for theater tickets, no money for flowers, no money to lay aside for the ever-dreaded rainy day; no money to purchase any of the things which add to the comforts of life.

Hence with pleasure I shall support the amendment to reinstate the House provision so that these men shall receive, not $720 per annum, but $800 per annum. Economy is a noble virtue, but should not be carried to the extent of paying less than a living wage to those who must depend wholly upon their labor for a subsistence.

Mr. CURTIS. Mr. President, I simply want to say, in conclusion, that it should be remembered by the Senate that these men are not appointed until after they have served in many cases three and four years as substitutes. That ought to weigh with the Senate. Further, Senators should remember the fact that the Postmaster General, under whom these men work, recommended this increase in his estimate to the House and the Senate; and not only that, but in his annual report, on page 12, he says:

> Under the present law the initial salary for clerks and carriers is $600 per annum. Taking into consideration the long period of substitute service and the high cost of living, it is believed that this salary ought to be increased from $600 to $800.

With this statement I hope the Senate will vote down the committee amendment and allow the House provision to remain.

Mr. BANKHEAD. Mr. President, the committee gave as much consideration to this item as to any other in the bill. I do not believe there is a member of the committee who is not in favor of adequate salaries and higher salaries if it were possible that that could be done. But it must be remembered that all these clerks are promoted every year automatically. Under the provisions of the bill this class receives $720 and next year they will receive $820, and in three years they will be getting a thousand dollars.

The committee were of the opinion, and in that opinion the Post Office Department concurred, that a better service would be rendered and perhaps a better class of men would be admitted, and that owing to the fact that there would be greater rivalry for promotions by coming in automatically it would be better for the employees in the end and for the Government, if instead of paying all these appointees $800 annually they were divided into two classes, paying one $700, which is an increase of $120 over the present salary, than to put them all into one class and pay them $800.

For that reason the committee thought it best not to adopt the House provision putting all these employees into one class and paying them $800 per year, but to divide them and to pay one class $700, with the knowledge every year that they would be promoted and $100 would be added to their salaries. We thought that would be the best arrangement for the employees in the end. That is the reason why the committee adopted it.

Mr. WORKS. Mr. President, I am sorry to disagree with the conclusions reached by the committee. I have no doubt that the committee has done its work conscientiously, but I am utterly opposed to the payment of so small a wage by the United States Government for services of this kind.

I object seriously to the Government taking as an example the wages that are paid by corporations. Instead of following their example and paying starvation wages to employees the Government should set an example of paying fair wages. We may come to the time directly when a minimum wage will have to be fixed for corporations and for their employees. I think we are fast coming to that time, because the idea is absolutely abhorrent to me of an American citizen having to live upon such wages as it is said here is the average wage paid to employees in this country. I think it is high time the Government of the United States should be setting an example in the payment of reasonable wages.

Mr. BRISTOW. Mr. President, I desire to say in behalf of the committee amendment that heretofore the initial wage or salary of the clerks and carriers has been $600. There is a promotion of $100 a year each year until the amount of $1,100 is reached, and that becomes the salary of the clerk after four years' service. The clerks who are appointed are as a rule young men and women who do not have families to support, as has been alleged here, but they come out of the high schools and take the examination and get upon the eligible list. In some of the cities there are large waiting lists. The eligible list is crowded with people desiring to get into this service, because it is a better job than they can get outside of the Government service. Indeed it is regarded as a very desirable position to be near the head of the eligible list for one of these appointments. That has been the case with the compensation of $600 for the first year. The committee amendment proposes to increase that from $600 to $720, so that the new appointees will start in at $720 and receive the annual promotion until at the end of four years they will receive $1,100.

I know when it comes to voting the Government money away, money that is secured by taxing people and from the working people, working for the low wages that have been referred to here, Congress does it with a lavish hand and with very little thought. We go over the country and preach economy, but when we get inside the Senate Chamber we do not carry it out by our votes. We attack the system of taxation that is imposed throughout the country and say that it is resting as a great burden upon the people, and we denounce extravagance, but we will heap up the taxes and make the burden harder on the man who is outside the Government service in order to pay men who are inside of it better wages than they can possibly get outside.

It is not a popular thing to stand up here and take the side of the question that I am now speaking upon, but it is the right one from the standpoint of equity and justice to the average American citizen who works with his hands for his living. If the Senate of the United States wants to fix a minimum wage of $720 a year for every man who is eligible for these appointments, regardless of the employment that he may receive, then I will meet any Senator here upon a proposition of that kind. But I am not going to vote to make special favorites of Government employees at the expense of the men who do not have an opportunity to earn that much money and who do harder and more disagreeable work.

Mr. CURTIS. May I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Kansas yield to his colleague?

Mr. BRISTOW. I am very glad to yield.

Mr. CURTIS. Has the Senator always entertained this idea about the payment of high wages to Government employees?

Mr. BRISTOW. I have entertained the ideas I am expressing now.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. Certainly.

Mr. KENYON. Messengers to Senators and Members have very little to do and they are paid a great deal higher wages than these employees.

Mr. BRISTOW. Certainly.

Mr. KENYON. We tax the outside man to pay these high wages to messengers and clerks here.

Mr. BRISTOW. I ask the Senator if he asks my vote to tax people outside for especially high wages?

Mr. KENYON. I sympathize with the Senator's statement as to economy. We preach economy before an election, but we do not generally practice it when we get here.

I do not want to see the economy practiced on the man who toils. Let us practice it on something else. Here was a bill before us this afternoon, and at the conclusion of the discussion $1,800,000, after the warfare between the two Senators from Washington, was put on the bill. Why not practice economy in something of that kind instead of on these men who toil?

Mr. JONES. I wish to suggest that that was the very highest economy.

Mr. KENYON. The highest economy?

Mr. JONES. Yes.

Mr. KENYON. I was glad to see the two Senators compromise.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Georgia?

Mr. BRISTOW. I do.

Mr. SMITH of Georgia. I wish to ask the Senator from Iowa if it is not true that practically all the persons who are serving as messengers in connection with the senatorial service serve as clerks and many of them as stenographers?

Mr. KENYON. I think it is the case now. I do not know how it will be after March 4.

Mr. SMITH of Georgia. The messengers really do clerical work and stenographic work in many cases.

Mr. KENYON. I think that is true, but the work is not comparable to the work these men do, in my judgment.

Mr. BRISTOW. I desire to correct the Senator from Iowa. A messenger, as has been stated by the Senator from Georgia, is a stenographer, and he must be a man of high intelligence if he does his work well. He is not paid any more and not as much as the employees in the postal service receive, who do that grade of work. It is certainly a well-established fact that experience counts in employment. These men and women start in as inexperienced clerks at a salary of $60 a month, and they get a promotion every year until the salary amounts to $1,100. Then the promotions are not annual; they come as vacancies occur.

Mr. KENYON. Ah, but it is true that these men serve an apprenticeship of one or two years, is it not, before they receive a regular appointment, and they receive but $700 a year during that time?

Mr. BRISTOW. No; they are paid as substitutes.

Mr. KENYON. When they work they are paid as substitutes, and they have to wait around.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Idaho?

Mr. BRISTOW. I do.

Mr. BORAH. I do not desire to shorten this discussion, but I simply want to suggest to the Senate that I have a bill pending here in which several thousand people are interested who receive less than $500 a year. I have only about two hours and a little over to pass that bill. I should like to pass it this evening, if we can.

Mr. BRISTOW. I do not intend to unnecessarily take the time of the Senate, but I have stated what I had to say in defense of the committee's amendment because I believe it is right. I believe that in making appropriations here we should consider two things—the man who pays the bill and the man who receives the salary. I think that the Senator from Iowa stated that the average compensation of the laboring man in this country is less than $500 a year.

Mr. KENYON. I should like to ask the Senator from Kansas if that is a decent condition of living?

Mr. BRISTOW. No; of course it is not.

Mr. KENYON. Then why not let the Government set the example of decent living?

Mr. BRISTOW. And tax the man who is getting $500 to make it up. The proposition here is to do that; instead of helping the laboring man you are putting an additional burden on his back.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the senior Senator from Iowa?

Mr. BRISTOW. I do.

Mr. CUMMINS. May I ask the Senator this question?

Mr. BRISTOW. I shall be very glad to answer it if I can.

Mr. CUMMINS. Upon the principle that has been announced by the Senator from Kansas and having reference to the facts which nobody disputes, how does he justify the advance from $600 to $720?

Mr. BRISTOW. I might answer that question by asking the Senator how he justifies himself in making the salary $800 instead of $1,100.

Mr. CUMMINS. No; I have adopted another standard. The Senator from Kansas has adopted the standard of the average wage throughout the country. I deplore the situation which requires any man to work for $500 a year, but I do not accept that as a sufficient reason for making a Government employee work for $500 a year. In that respect I am not subject to the same suggestion. I think $800 a year is as little as a man can live upon.

Mr. BRISTOW. How do a majority of the people who labor in this country live on $500?

Mr. CUMMINS. I think a full answer to that question would be to paint a picture that no American citizen wants to look upon.

Mr. BRISTOW. I will meet any Senator on this floor in any kind of legislation that will force an increase in the payment of the wages of the men who work at these miserable wages. I do not believe that the man who labors gets sufficient compensation for his work, but the proposition of the Senator does not help him; it places a still greater burden upon him.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the junior Senator from Iowa?

Mr. BRISTOW. Certainly.

Mr. KENYON. I wish to supplement the answer of my colleague by saying that these men and their families do not live; they merely exist.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to his colleague?

Mr. BRISTOW. I do.

Mr. CURTIS. I wish to suggest to my colleague an excellent place to begin by raising the pay of these deserving clerks and carriers from $600 to $800 if you are going to increase salaries.

Mr. BRISTOW. And in order to get the money to do it you are taxing the laboring man who receives much less than that amount; you are not helping him.

Mr. CURTIS. Not necessarily. If my colleague will submit some suggestion here that will help the man who gets but $500 I will join with him in any effort he makes. I have been working for 20 years for a policy that would give labor employment in this country, and I have seen their wages increase, and I hope they will continue to increase.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Georgia?

Mr. BRISTOW. I yield.

Mr. SMITH of Georgia. I think there is a vast number of small farmers who do not get anything like the sum the Senator indicates.

Mr. BRISTOW. There are thousands and thousands of them.

Mr. SMITH of Georgia. How would you undertake to reach them and take care of them? By the wage scale you are putting the limit at $800.

Mr. BRISTOW. I do not know, but I will join any Senator, and be delighted to join any Senator, in a system of legislation that will increase the compensation of the man who has to work for his living day by day; but I am not going to vote upon him a tax to give men in the Government service a much higher wage than he can possibly earn outside.

Mr. GRONNA. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from North Dakota?

Mr. BRISTOW. I do.

Mr. GRONNA. May I ask the Senator from Kansas what is the average pay that the rural carriers get?

Mr. BRISTOW. Eleven hundred dollars a year.

Mr. GRONNA. How does that compare with the pay that these people get? Do not the rural carriers have to furnish their teams?

Mr. BRISTOW. The rural carrier is not paid so much as these carriers and clerks are after they arrive at the term of the standard wage.

Mr. BORAH. Has the Post Office Department any trouble in filling these positions?

Mr. BRISTOW. Not at all.

Mr. GRONNA. It is true, is it not, that the Post Office Department does have trouble in getting people, so far as it applies to rural carriers?

Mr. BRISTOW. Oh, no.

Mr. GRONNA. It has been the case in my State.

Mr. BRISTOW. That may be in some sections of the country, where horses are high and horse feed is high, but as a rule there is no difficulty in securing rural carriers.

Mr. GRONNA. I stated on the floor of the Senate a year ago that the farmers in my State and in my part of the country have to pay rural carriers additional in order to get service.

Mr. BRISTOW. That is not a usual condition; it would be an unusual condition. I know how disagreeable it is to stand up and resist increase in salaries. I know the enemies a man makes in public life when he does that. I have had some experience in that line. But to start these employees in when they are young men and women just out of high school at $60 a month—$10 a month more than such employees have heretofore received—and then let them have the advantage of the promotion they will get for four years—$80 for the first year and then $100 for each additional year—makes these positions very desirable. The Government has no trouble and will have no trouble in securing employees. In some of the large cities there has been complaint that $50 did not offer a sufficient inducement to bright and capable young people when they start out to make their own living to seek these places, and it was believed by the department that an increase would help in those places. But there are only a few places where there has been any trouble.

Mr. SMITH of Georgia. I should like to make one other suggestion to the Senator, if he will allow me. Is it not true that nearly all of these places the first year are filled with young men and young women just out of high school, and that they have no families, and do the salaries not increase after the first year?

Mr. BRISTOW. Yes; they got a promotion every year for five years under the old system. It will be every year for four years now. That was the view presented to the committee.

Mr. CUMMINS. That may be true generally. I have no personal knowledge outside of my own city, but it is not true there that the substitute carriers are young men just out of high school. I do not know their average age, but it can not be said that these men who go into the service are young men just out of high school, so far as my own city is concerned; it may be true elsewhere. There is an age limit that precludes the entering of an old man into the Government service, and therefore they are young men; but I venture to say that three-fourths of the men who go into the service in my own town as carriers are married men. That probably is not true of young women, if there are any. I do not know that there are very many who get into the service as clerks.

Mr. BRISTOW. Is not that evidence that this is a very desirable service to get into?

Mr. CUMMINS. Of course it is a desirable service. I venture to say if you will cut down all of the salaries in the United States, including those of Members of Congress one-half, there would be no difficulty in filling the places. But that to me is no standard for fixing compensation.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to his colleague?

Mr. BRISTOW. I do.

Mr. CURTIS. I wish to state again that these men are not appointed to these regular places until after they have served three and four years in many cases as substitutes; and while they are working as substitutes in the larger cities their salary is $40 and smaller, even $15 a month; and all the time they are on the substitute roll they must study the districts and prepare themselves to fill the regular places when they are appointed. Those men prepare themselves for these places.

Mr. BRISTOW. I wish to say to my colleague that a substitute gets the pay of the lower grade for the time that he works. He gets $600 a year for the time that he works, under the old system. If the Senate amendment is adopted, he will get at the rate of $720 for the time that he works. When he is not employed at this service he has other employment.

Mr. CURTIS. That is true while he is working, but he gets very little work during the year. The average will not amount to more than the sum I gave a moment ago, and he must prepare himself all the time and must be ready for call.

The PRESIDENT pro tempore. The question is on the amendment reported by the committee.

Mr. TOWNSEND. Mr. President, there are two or three, possibly four, items in the bill as to which I was not in accord with the committee, and so suggested at the time it considered this bill. This was one of them. I know that great and painstaking care was taken by all the members of the committee, and I think a conscientious conclusion was arrived at by the majority, but I have other reasons than those that have been given for advocating a salary of $800 for the lowest salaried clerks. I am willing to carry the illustration, as the Senator from Kansas has done, to outside labor, if also I may be permitted to carry it to employers outside.

I have always noticed that the successful business man, the man who does things, realizes the worth of men, and the wise one generally pays a good wage to the man who can do his work well. I think the Government will get better service by paying adequate salaries, notwithstanding the fact, as stated by the senior Senator from Iowa [Mr. CUMMINS], that we might get a sufficient number of men at half the salary now paid than it would if the low wage was adopted. I do not believe that if we could get men enough at half the salary that we could get the men who are best fitted for doing the work of the Government. I do know it is a fact, notwithstanding the statement of some of the officers of the Post Office Department to the contrary, that that department has had difficulty in many places in this country in getting proper substitute clerks to enter the service of the Government.

Mr. CUMMINS. I did not make the statement quite as stated by the Senator from Michigan. I said you could get men who would take these places. I did not say you could get a class or type as efficient as you now get.

Mr. TOWNSEND. I believe it is a good policy, regardless of wages for outside employment, for this Government to pay good wages to its employees. I think the way to begin economy in the Government is to get rid of the useless employees of the Government. If we could do that; if we could eliminate the great numbers of useless men and women who are in the employment of the Government and practically pay the same amount in the aggregate to those who remain that we now do, I have no doubt that a real economy by way of better service to the Government would be secured. So I have felt in regard to this item that it was our duty not only to raise this class of clerks, the $600 grade, to the $800 class, but I have also felt that we would at the same time benefit the substitutes. They would get better pay. It is not only true that these substitutes have to prepare themselves, but they have to report for duty. Those men have to be on hand; they have to report daily for service, and, therefore, can not engage in other certain and fixed employment outside, and they serve an apprenticeship for from three to four years.

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Michigan yield to the Senator from Kansas?

Mr. TOWNSEND. I yield.

Mr. BRISTOW. I should like if the Senator from Michigan would suggest a means by which these useless employees of which he speaks may be gotten rid of. It is all right to get up and say that there are so many thousand useless employees here, but we have got the responsibility of legislation. Let us have a suggestion by which they can be eliminated and let us go to work and get rid of them if there are thousands of them that are not needed. I do not accede to that myself.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Michigan yield to the Senator from Ohio?

Mr. TOWNSEND. I do.

Mr. POMERENE. I will give this information for what it is worth. It came to me from a responsible employee in one of the departments. In a certain bureau of this Government there are 57 men employed on large salaries. Out of the 57 men, 7 of them are timekeepers for the other 50.

Mr. BRISTOW. I think the Senator from Ohio [Mr. POMERENE] owes it to the Senate to state the bureau from which he obtained the information, so that an investigation may be had as to the facts.

Mr. POMERENE. I tried to get my informant to give me that information, but he would not give it to me at the time. If, however, I remain here very long, permit me to suggest that I propose to see what is in it, and I shall be glad to join hands with the Senator from Kansas upon that proposition.

Mr. BRISTOW. I make the prediction that the Senator will find that if that had been true his informant would not have hesitated to give him the place where he could have verified the truthfulness of the statement.

Mr. POMERENE. Permit me to suggest to the Senator that my informant is a very reputable man and a member of the Senator's own party.

Mr. BRISTOW. I care nothing for that; I care nothing for "the Senator's own party." If the Senator from Ohio will be as independent of the party lash as I have been since I have been in the Senate, I think the Senator will serve his country well. I hope I can make this statement without taking any undue credit to myself.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Senators will get permission to interrupt. Does the Senator yield further?

Mr. POMERENE. I have been able to assert my independence on different occasions, and I hope so long as I remain here to continue in that respect.

Mr. BRISTOW. I hope the Senator will, and we shall have a test of that in the next two or three years.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Michigan yield?

Mr. BORAH. I thought that the Senator from Michigan had concluded. I do not want to take the Senator off the floor.

Mr. TOWNSEND. I did not have time or opportunity to answer the junior Senator from Kansas when he asked if I would make some suggestion as to how economy could be practiced in the employment of Government help. I have not a ready-made remedy; I have some ideas, and have had for some little time, upon this question. I go into some of the departments here, and I find some superannuated people—a great many of them. I know there are men and women in the employ of the Government whose services are of absolutely no value to it, but, on the contrary, they are really a hindrance to its work.

I am not prepared to say that we can over night discharge those people. I know what a difficult matter it is for their chiefs to handle this particular problem; but something has got to be done along that line. There are other lines that we should investigate, in our efforts at economy, and we should bear in mind that service is what is required, and a proper wage is a requisite to good service. The cutting of wages or the keeping down below the reasonable standard of salaries is an unwise thing to do if we want the business of Government well done. I believe the clerks and substitute clerks are capable people; I believe they are some of the Government's best men and women, and while they seek this employment, just as we seek positions in Congress, they have a right to expect that they shall be properly paid. Therefore I feel that the House provision should be adopted. I so felt when this matter was considered by the committee, and I am still of the same opinion.

Mr. BORAH. Mr. President, I want to ask the Senator in charge of the bill if he would not be willing to lay the bill aside for the rest of the evening? I secured a unanimous-consent agreement in reference to a matter in which I am very much interested, and, while I understand, of course, that the unanimous consent granted for the consideration of the bill which I have in mind provides that it is not to interfere with appropriation bills, I should like, if the Senator could see his way clear to do so, to have the pending bill put aside until we could dispose of the bill to which I refer. I think we can do so in a couple of hours.

Mr. BOURNE. I ask the Senator from Idaho if it would not be perfectly agreeable to him if we take a vote on the motion of the Senator from Kansas now before the Senate, so that we can dispose of that, and then I will be very glad to have the bill go over.

Mr. BORAH. If it is ready for a vote, very well; but I had an idea that perhaps the debate would continue in view of the wide range it has taken.

Mr. CURTIS. Mr. President, I am very anxious to have a vote on this amendment to-night, because I have two conference committees to attend to-morrow, and it will be impossible for me to be here to look after the amendment. I should therefore like to have a vote on the amendment to-night if it can be obtained.

Mr. BORAH. If there is to be no more debate on the amendment, I shall be very glad to see it disposed of.

Mr. GRONNA. I desire to say to the Senator from Idaho that I wish to make some remarks on this particular amendment.

Mr. BORAH. Then I should like to ask the Senator from Oregon to lay the bill aside for to-night and permit me to go on with the other matter.

Mr. BOURNE. I did not hear what the Senator from North Dakota said.

Mr. BORAH. I presume the Senator from North Dakota would just as soon make his remarks to-morrow.

Mr. GRONNA. Perhaps the Senator from Idaho would just as soon make his remarks to-morrow. My statement was, I will say to the Senator from Oregon, that I intend to make some remarks on this particular amendment while it is pending. Of course it is not important to the Senate and may not be important to me, but I thought perhaps——

Mr. BORAH. Of course I am not seeking to take the Senator off the floor. I know that he is acting in good faith.

Mr. GRONNA. Mr. President, I do not intend unnecessarily to delay the Senate from voting upon this bill. The amendment now pending is, however, a very important one. As the Senator from Kansas [Mr. BRISTOW] has well stated, the average pay received by laborers all over the United States, outside of the Government service, for the labor which they perform is far less than $720 per year. I do not mean to say that $720 or $800 or a thousand dollars is too much for those who perform labor. I believe that they are all entitled to better pay; but we must take conditions as they are. I do not see how we can consistently and with even-handed justice take money out of the Treasury of the United States for this purpose at the expense of the public, of course.

Mr. President, I wish it were possible to pay every laborer in the Government service more than we are paying to-day. I wish it were possible, sir, that all laborers in this great country could receive better pay for their services. This is one of the most important questions that this country has to face, and the time will come when we must face it honestly, and not by indirection.

I would be the last one to ask that the pay of laborers should be reduced, provided conditions are such that it is possible to increase their pay. But we gather a certain amount of revenue; we raise certain sums of money and deposit them in the Treasury of the United States, and, even if we were willing in this bill to provide for a higher wage scale, it may not be possible for us to do so.

I said a moment ago that the rural carriers of this country were receiving on an average, where daily service is performed, less than $1,100 per year. I believe that those who are familiar with the service that those men have to perform will agree with me that they are the lowest paid employees in the service of the Government. They receive $1,100 per year, not merely for their own service, but for their equipment as well. In the western country, where the routes are from 25 to 35 miles in length, it will take the entire day to make the trip. The carriers are required to have for their use not less than two and sometimes four horses; they must have a wagon and a sleigh; they have to buy their harness, furnish feed for their horses, and all this for the small amount of $1,100 per year. Those men are married men, men with families, the same as the men who are living in the cities.

Mr. President, if it were possible to appropriate to these men more money than they are now receiving, I should be very glad to support such a proposition, but we have to make some comparison; we have to draw the line somewhere. It is true of this service as it is of the same character of service that is being performed by the laboring men, that those who perform the hardest labor always receive the smallest pay. I trust the time will come when labor in this country will, in their own right, demand and receive a great deal more than they are receiving to-day.

I believe the Senator from Kansas [Mr. BRISTOW] has well stated the proposition. It is an easy matter to vote for large appropriations of the people's money, and it is probably a popular thing to do, but we must not forget that we are here as servants of the people to guard the people's money. We are here to act, not for ourselves, but for the people of this great coun-

try; and until the time shall come that we can appropriate more money to all these people, unskilled as well as skilled labor; until the time comes that those who are engaged in the industries of this country can be paid higher wages—and I express the hope that the time will come—we must draw the line somewhere.

Mr. GUGGENHEIM. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Colorado?

Mr. GRONNA. I yield to the Senator.

Mr. GUGGENHEIM. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Colorado suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Crawford	Jones	Shively
Bankhead	Cummins	Kavanaugh	Simmons
Borah	Curtis	Kenyon	Smith, Ariz.
Bourne	Dillingham	La Follette	Smith, Ga.
Bradley	Fall	Lea	Smith, Mich.
Bristow	Gallinger	Martin, Va.	Smoot
Brown	Gamble	Myers	Stone
Bryan	Gardner	Page	Sutherland
Catron	Gore	Penrose	Swanson
Chamberlain	Guggenheim	Poindexter	Townsend
Clapp	Johnson, Me.	Pomerene	Williams
Clarke, Ark.	Johnston, Ala.	Sheppard	Works

The PRESIDENT pro tempore. Forty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. GRONNA. Mr. President, this is one of the most important measures we have had before Congress this session. I believe every provision that affects labor is entitled to the most careful consideration. I do not wish to state authoritatively, but if my recollection serves me right the average pay of laborers in this country, outside of those who are in the Government service, is between three and four hundred dollars per year. Those very conditions are confronting the American people. If the question could be settled by simply increasing the wage scale, it would be an easy matter to dispose of it; but it enters into the question of the high cost of living. We can not appropriate large sums of money without taxing the American people. If it were possible to tax those who can best afford to bear the burden, no one would be more willing than I to do so.

I am not a member of this committee. I have not gone into the details of this particular item; but I have heard the argument made by the Senator from Kansas [Mr. BRISTOW], and I believe his statement is logical. I am sure this committee has tried to do justice to all those who are in the employ of the Government. It is not a question alone of raising the salaries of these particular men; the question is, What are we able to do for all these people?

If it were possible to take from those who receive higher wages, myself included—if a proposition of that kind were made, to take from those who receive higher salaries and give to those who receive lower salaries—I should vote for it. But that is not the question here. The question is, Can we, under existing circumstances, increase the pay of the men who are doing this particular work any more than it has been increased by this committee?

Mr. President, I do not intend to delay the Senate further upon this particular question, as there are several items in the bill upon which I want to be heard. There are many provisions in the bill which are of the greatest importance not only to the laboring men but to the people of the entire country. It is a bill that carries $285,000,000, and I believe it should be given the most careful consideration.

I have not had time to look into all the provisions of the bill as carefully as I would like to do. I had hoped that we would have time at least until to-morrow to consider the most important features of this bill, but I understand that the chairman of the committee is anxious to have it passed before we adjourn.

Mr. President, I shall not delay the Senate any longer upon this item of the bill, because, as I said, I shall ask to be heard later on.

The PRESIDENT pro tempore. The question is on agreeing to the first amendment reported by the committee, on page 12, which will be stated.

The SECRETARY. On page 12, lines 7 and 8, strike out "5,480" and insert "2,730," so as to read:

Clerks and clerks in charge of stations, 2,730, at not exceeding $800 each.

Mr. CURTIS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

The PRESIDENT pro tempore (when Mr. GALLINGER'S name was called). I am paired with the junior Senator from New York [Mr. O'GORMAN].

Mr. SMITH of Michigan (when his name was called). I desire to transfer my pair with the junior Senator from Missouri [Mr. REED] to the Senator from Ohio [Mr. BURTON] and vote. I vote "nay."

The roll call was concluded.

Mr. CHAMBERLAIN. I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the junior Senator from Colorado [Mr. THOMAS] and vote. I vote "nay."

Mr. NELSON (after having voted in the negative). I voted through a mistake. I have a general pair with the senior Senator from Georgia [Mr. BACON]. I withdraw my vote on that account.

Mr. STONE. I have a general pair with the Senator from Wyoming [Mr. CLARK]. He does not seem to be present, and I withhold my vote.

Mr. SMITH of South Carolina. I have a general pair with the junior Senator from Delaware [Mr. RICHARDSON]. I should like to know if that Senator has voted.

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. SMITH of South Carolina. Then I withhold my vote.

The result was announced—yeas 17, nays 31, as follows:

YEAS—17.

Bankhead	Bryan	Kavanaugh	Sutherland
Borah	Catron	Lea	Swanson
Bourne	Gore	Martin, Va.	
Brady	Gronna	Smith, Ga.	
Bristow	Johnston, Ala.	Smoot	

NAYS—31.

Ashurst	Fall	Page	Shively
Bradley	Gardner	Paynter	Simmons
Brown	Guggenheim	Penrose	Smith, Ariz.
Chamberlain	Johnson, Me.	Percy	Smith, Mich.
Clapp	Jones	Pittman	Townsend
Crawford	Kenyon	Poindexter	Williams
Cummins	La Follette	Pomerene	Works
Curtis	Myers	Sheppard	

NOT VOTING—47.

Bacon	Dixon	McLean	Smith, Md.
Brandegee	du Pont	Martine, N. J.	Smith, S. C.
Briggs	Fletcher	Nelson	Stephenson
Burnham	Foster	Newlands	Stone
Burton	Gallinger	O'Gorman	Thomas
Chilton	Gamble	Oliver	Thornton
Clark, Wyo.	Hitchcock	Overman	Tillman
Clarke, Ark.	Jackson	Owen	Warren
Crane	Kern	Perkins	Watson
Culberson	Lippitt	Reed	Webb
Cullom	Lodge	Richardson	Wetmore
Dillingham	McCumber	Root	

So the amendment of the committee was rejected.

Mr. BOURNE. In view of the fact that the Senate has disagreed to a portion of the amendment of the committee on page 12 and that the whole paragraph has to be taken together, I ask the Senate to disagree to the committee recommendation in order to perfect the section.

The PRESIDENT pro tempore. The question is on agreeing to the second amendment.

The amendment was rejected.

The next amendment of the Committee on Post Offices and Post Roads was, beginning in line 13, on page 12, to strike out the following proviso:

Provided, That after June 30, 1913, the first grade for clerks and carriers shall be abolished and that appointments shall be made to the second grade, salary $800; and that clerks and carriers at first-class offices shall be promoted successively to the fifth grade and clerks and carriers at second-class offices shall be promoted successively to the fourth grade.

The amendment was rejected.

Mr. BORAH. I wish to ask the Senator from Oregon if he is not willing to lay aside the bill for a time?

Mr. BOURNE. At the request of the Senator from Idaho I will ask to lay aside the further consideration of the Post Office appropriation bill at the present time.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the bill be temporarily laid aside. Is there objection?

Mr. GUGGENHEIM. I object.

The PRESIDENT pro tempore. The Senator from Colorado objects.

Mr. BORAH. I move that the Senate proceed to the consideration of House bill 22913, to create a Department of Labor, notwithstanding the objection.

The PRESIDENT pro tempore. The Senator from Idaho moves that the Senate proceed to the consideration of House bill 22913, to create a Department of Labor.

Mr. SMOOT. I am not going to object to that at all. I simply want to call the attention of the Senate to it. Is it a violation of the unanimous-consent agreement? If not, I have not anything more to say; but it seems to me that it is a violation of the unanimous-consent agreement.

Mr. BORAH. Does the Senator object?

Mr. SMOOT. No; I do not object further than that is seems to me that a unanimous-consent agreement will take a unanimous consent to change it, and not a vote of the Senate.

Mr. BORAH. The unanimous-consent agreement is that it is not to interfere with appropriation bills. The Senator from Oregon has asked to lay aside the appropriation bill, and I do not think, therefore, that it is an interference with the agreement.

The PRESIDENT pro tempore. But the request of the Senator from Oregon was objected to, and it is not laid aside. The appropriation bill is before the Senate at the present time unless it is displaced.

Mr. SWANSON. That is what I was going to suggest. Can a motion be made to displace the appropriation bill?

The PRESIDENT pro tempore. Certainly.

DEPARTMENT OF LABOR.

Mr. BORAH. I move that the Post Office appropriation bill be laid aside for this evening.

The PRESIDENT pro tempore. The Senator from Idaho moves that the Post Office appropriation bill be laid aside for the remainder of the evening. The question is on agreeing to the motion.

The motion was agreed to.

Mr. BORAH. I ask, under the unanimous-consent agreement, that the bill (H. R. 22913) to create a department of labor be proceeded with.

The PRESIDENT pro tempore. The Senator from Idaho moves to proceed to the consideration of the bill.

The motion was agreed to.

Mr. GUGGENHEIM. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Colorado suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Martin, Va.	Smith, Ga.
Bankhead	Curtis	Myers	Smith, Mich.
Borah	Fall	Page	Smith, S. C.
Bourne	Gallinger	Paynter	Smoot
Brady	Gardner	Penrose	Stone
Bristow	Gore	Percy	Sutherland
Brown	Guggenheim	Pittman	Swanson
Bryan	Johnson, Me.	Poindexter	Townsend
Catron	Jones	Pomerene	Williams
Chamberlain	Kavanaugh	Sheppard	Works
Clapp	Kenyon	Shively	
Clarke, Ark.	La Follette	Simmons	
Crawford	Lea	Smith, Ariz.	

The PRESIDENT pro tempore. Fifty Senators have answered to their names. A quorum of the Senate is present.

Mr. BORAH. I ask that the bill may be read for action on committee amendments.

The PRESIDENT pro tempore. The Chair is informed that the bill has been read and the committee amendments have been agreed to.

Mr. BORAH. I desire to offer an amendment at this time.

Mr. GUGGENHEIM. In order to be familiar with the bill, I should like to have it read again.

The PRESIDENT pro tempore. Without objection, the bill will be again read.

Mr. BORAH. I object to its reading.

The PRESIDENT pro tempore. It is objected to.

Mr. BORAH. I presume the Senator is familiar with it or he would not be objecting to its consideration.

Upon page 7 of the bill, in line 13, I move to strike out "October" and insert "March," and to strike out the word "first" and insert "fourth," and, in line 14, to strike out "twelve" and insert "thirteen," so as to read:

That this act shall take effect March 4, 1913.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Idaho.

The amendment was agreed to.

Mr. GRONNA. I have an amendment here that I wish to offer, but I have misplaced it. I yield to the Senator from Colorado, who wishes to offer an amendment.

Mr. GUGGENHEIM. I hold in my hand the amendment offered by the Senator from Massachusetts [Mr. LODGE], which I send to the desk.

The PRESIDENT pro tempore. The Senator from Colorado submits an amendment, which will be read.

The SECRETARY. It is proposed to strike out all down to the word "and," in line 7, page 2, and to insert "That."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Colorado.

Mr. BORAH. This is an amendment which was prepared by the Senator from Massachusetts [Mr. LODGE], and while, of course, it is proper for anyone to offer an amendment if he desires to do so, nevertheless I desire to say that the Senator from Massachusetts stated that he did not himself desire to offer this amendment, and thought that it was not well that it should be adopted. I hope it will not be adopted, as it changes the entire bill and would undoubtedly defeat the bill so far as the present session is concerned.

The effect of this amendment is simply to abolish the Department of Commerce and to transfer a number of departments which are now under the Department of Commerce and Labor to the Treasury Department, and to leave to it alone the creation of the Department of Labor. It would raise an issue, of course, which it would be impossible to dispose of at this session, because there are a great many people who are opposed to abolishing the Department of Commerce. I trust, therefore, that the amendment will not carry.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Colorado [Mr. GUGGENHEIM].

Mr. GUGGENHEIM. On that I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. GORE. I ask for a division.

There were, on a division—ayes 2, noes 34.

The PRESIDENT pro tempore. Not a quorum has voted.

Mr. GORE. Did the vote disclose the lack of a quorum?

The PRESIDENT pro tempore. The Chair so announced.

Mr. GORE. I desire to submit a motion, but will withhold it for a minute.

The PRESIDENT pro tempore. The roll will be called.

The Secretary called the roll, and the folowing Senators answered to their names:

Ashurst	Cummins	Martin, Va.	Simmons
Bankhead	Curtis	Myers	Smith, Ariz.
Borah	Fall	O'Gorman	Smith, Ga.
Bourne	Gallinger	Page	Smith, Mich.
Brady	Gardner	Paynter	Smith, S. C.
Bristow	Gore	Penrose	Smoot
Brown	Johnson, Me.	Percy	Stone
Bryan	Jones	Pittman	Sutherland
Catron	Kavanaugh	Poindexter	Swanson
Chamberlain	Kenyon	Pomerene	Townsend
Clapp	La Follette	Sheppard	Williams
Crawford	Lea	Shively	Works

The PRESIDENT pro tempore. Forty-eight Senators have answered to their names. A quorum of the Senate is present. The question is on the amendment of the Senator from Colorado [Mr. GUGGENHEIM], on which a division has been demanded.

The question being put, there were, on a division—ayes 0, noes 37.

The PRESIDENT pro tempore. No quorum has voted.

Mr. SMITH of Georgia. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. BRISTOW. Mr. President, before the roll is called I desire to say that I had determined that I would not vote for any additional Cabinet officer. I very much prefer that the present Department of Commerce and Labor should be made the Department of Labor. I think it should have been originally a Department of Labor, and the commercial divisions and bureaus that have been transferred to it should have been left with the Treasury Department, where they belong; but because of the statement of the Senator from Idaho [Mr. BORAH] that that is not practicable and could not be done now, I, with reluctance, shall vote against the amendment. I do so reluctantly, because I think the Cabinet is large enough now. As I have said, it would certainly be better to make the Department of Commerce and Labor a Department of Labor, with all the functions which the Department of Labor when created will have, and not encumber the Cabinet with an additional officer.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Colorado [Mr. GUGGENHEIM]. The roll will be called.

The Secretary proceeded to call the roll.

Mr. SMITH of Georgia (when Mr. BACON's name was called). I desire to state that my colleague [Mr. BACON] has been indisposed from a severe cold for several days, and on account of his health could not come out to-night.

Mr. SMITH of South Carolina (when his name was called). I have a general pair with the Senator from Delaware [Mr. RICHARDSON]. I transfer that pair to the Senator from Tennessee [Mr. WEBB] and vote. I vote "nay."

Mr. STONE (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK]. In his absence I withhold my vote. If permitted to vote, I should vote "nay."

Mr. SUTHERLAND (when his name was called). I inquire whether the Senator from Arkansas [Mr. CLARKE] has voted.

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. SUTHERLAND. I have a pair with that Senator, and in his absence I withhold my vote.

The roll call was concluded.

Mr. SMITH of Georgia (after having voted in the negative). I have a general pair with the senior Senator from Massachusetts [Mr. LODGE] and this is a measure to which, I think, the pair should apply, although we have an agreement that each shall vote when he wishes. I transfer that pair to the Senator from Nebraska [Mr. HITCHCOCK] and will let my vote stand.

Mr. SUTHERLAND. I am informed that the Senator from Arkansas [Mr. CLARKE] with whom I am paired, if present, would vote "nay." I therefore feel at liberty to vote. I vote "nay."

Mr. CHAMBERLAIN (after having voted in the negative). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I desire to transfer my pair with that Senator to the junior Senator from Colorado [Mr. THOMAS], and will let my vote stand.

Mr. SIMMONS. I desire to announce that my colleague [Mr. OVERMAN] on account of his physical condition is unable to be present to-night.

The result was announced—yeas 1, nays 46, as follows:

YEAS—1.

Guggenheim

NAYS—46.

Ashurst	Cummins	Martin, Va.	Smith, Ariz.
Bankhead	Curtis	Myers	Smith, Ga.
Borah	Fall	Newlands	Smith, Mich.
Bourne	Gallinger	O'Gorman	Smith, S. C.
Brady	Gardner	Page	Smoot
Bristow	Gore	Penrose	Sutherland
Brown	Johnson, Me.	Pittman	Swanson
Bryan	Jones	Poindexter	Townsend
Catron	Kavanaugh	Pomerene	Williams
Chamberlain	Kenyon	Sheppard	Works
Clapp	La Follette	Shively	
Crawford	Lea	Simmons	

NOT VOTING—48.

Bacon	Dillingham	Lodge	Richardson
Bradley	Dixon	McCumber	Root
Brandegee	du Pont	McLean	Smith, Md.
Briggs	Fletcher	Martine, N. J.	Stephenson
Burnham	Foster	Nelson	Stone
Burton	Gamble	Oliver	Thomas
Chilton	Gronna	Overman	Thornton
Clark, Wyo.	Hitchcock	Owen	Tillman
Clarke, Ark.	Jackson	Paynter	Warren
Crane	Johnston, Ala.	Percy	Watson
Culberson	Kern	Perkins	Webb
Cullom	Lippitt	Reed	Wetmore

The PRESIDENT pro tempore. A quorum has not voted, and the roll will be called.

Mr. SMITH of Georgia. I suggest, Mr. President, that the names of absentees be called.

The PRESIDENT pro tempore. That can not be done on a yea-and-nay vote. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Myers	Smith, Ariz.
Bankhead	Fall	Newlands	Smith, Ga.
Borah	Gallinger	O'Gorman	Smith, Mich.
Brady	Gardner	Page	Smith, S. C.
Bristow	Gore	Penrose	Smoot
Brown	Johnson, Me.	Percy	Stone
Bryan	Jones	Pittman	Sutherland
Catron	Kavanaugh	Poindexter	Swanson
Chamberlain	Kenyon	Pomerene	Townsend
Clapp	La Follette	Sheppard	Williams
Crawford	Lea	Shively	Works
Cummins	Martin, Va.	Simmons	

The PRESIDENT pro tempore. Forty-seven Senators have answered to their names—not a quorum. The names of absent Senators will be called.

The Secretary called the names of absent Senators, and Mr. BOURNE entered the Chamber and answered to his name.

The PRESIDENT pro tempore. Forty-eight Senators have answered to their names. A quorum is present. The question is on the amendment submitted by the Senator from Colorado [Mr. GUGGENHEIM], upon which the yeas and nays have been ordered. The roll will be called.

The Secretary proceeded to call the roll.

Mr. SMITH of Georgia. I again announce my pair with the senior Senator from Massachusetts [Mr. LODGE], and again transfer that pair to the Senator from Nebraska [Mr. HITCHCOCK]. I will let this announcement and transfer stand for the remainder of the evening. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again announce my pair with the Senator from Delaware [Mr. RICHARDSON] and the transfer of that pair to the Senator from Tennessee [Mr. WEBB]. I vote "nay."

The roll call was concluded.

Mr. CHAMBERLAIN (after having voted in the negative). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the junior Senator from Colorado [Mr. THOMAS], and will let my vote stand.

Mr. STONE. I have a pair with the Senator from Wyoming [Mr. CLARK]. I transfer that pair to the Senator from Florida [Mr. FLETCHER], and will vote. I vote "nay."

The result was announced—yeas 0, nays 44, as follows:

NAYS—44.

Ashurst	Cummins	Martin, Va.	Simmons
Borah	Curtis	Myers	Smith, Ariz.
Bourne	Gallinger	Newlands	Smith, Ga.
Brady	Gardner	O'Gorman	Smith, Mich.
Bristow	Gore	Page	Smith, S. C.
Brown	Johnson, Me.	Penrose	Stone
Bryan	Jones	Pittman	Sutherland
Catron	Kavanaugh	Poindexter	Swanson
Chamberlain	Kenyon	Pomerene	Townsend
Clapp	La Follette	Sheppard	Williams
Crawford	Lea	Shively	Works

NOT VOTING—51.

Bacon	Dillingham	Lippitt	Richardson
Bankhead	Dixon	Lodge	Root
Bradley	du Pont	McCumber	Smith, Md.
Brandegee	Fall	McLean	Smoot
Briggs	Fletcher	Martine, N. J.	Stephenson
Burnham	Foster	Nelson	Thomas
Burton	Gamble	Oliver	Thornton
Chilton	Gronna	Overman	Tillman
Clark, Wyo.	Guggenheim	Owen	Warren
Clarke, Ark.	Hitchcock	Paynter	Watson
Crane	Jackson	Percy	Webb
Culberson	Johnston, Ala.	Perkins	Wetmore
Cullom	Kern	Reed	

The PRESIDENT pro tempore. Not a quorum has voted. The Secretary will call the roll.

Mr. SMITH of Georgia. I think I might suggest that perhaps there are some Senators present who did not notice the call of their names and were not excused from voting by the Senate. Would it not be proper to suggest that they vote before the announcement is made?

The PRESIDENT pro tempore. The suggestion can be made, but the Chair can not enforce it. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Lea	Shively
Bankhead	Fall	Martin, Va.	Simmons
Borah	Gallinger	Myers	Smith, Ga.
Brady	Gardner	Newlands	Smith, Mich.
Bristow	Gore	O'Gorman	Smith, S. C.
Brown	Gronna	Page	Stone
Bryan	Guggenheim	Penrose	Sutherland
Catron	Johnson, Me.	Percy	Swanson
Chamberlain	Jones	Pittman	Townsend
Clapp	Kavanaugh	Poindexter	Works.
Crawford	Kenyon	Pomerene	
Cummins	La Follette	Sheppard	

The PRESIDENT pro tempore. Forty-six Senators have answered to their names—not a quorum. The names of absentees will be called.

The Secretary called the names of absentees, and Mr. WILLIAMS, Mr. SMITH of Arizona, Mr. SMOOT, and Mr. BOURNE answered to their names.

The PRESIDENT pro tempore. Fifty Senators have answered to their names. A quorum of the Senate is present.

Mr. SMITH of Georgia. I ask unanimous consent to dispense with the further call of the yeas and nays.

Mr. GUGGENHEIM. I object.

Mr. SMITH of Georgia. Who objects? The roll has been called. I do not think the Senator from Colorado is here.

Mr. GUGGENHEIM. I am here now.

Mr. SMITH of Georgia. Then, Mr. President, I suggest that the Senator's name be called to answer.

Mr. BORAH. I ask that the name of the Senator from Colorado be called.

The PRESIDENT pro tempore. The Senator's name will be called.

The Secretary called the name of Mr. GUGGENHEIM.

Mr. GUGGENHEIM. Mr. President, a parliamentary inquiry. Do I have to reply?

The PRESIDENT pro tempore. As the Chair remembers the rule, it is that all Senators shall respond to their names unless excused from doing so.

Mr. GUGGENHEIM. Will the Chair excuse me?

The PRESIDENT pro tempore. It is not for the Chair. It is for the Senate. Will the Senate excuse the Senator from Colorado from responding?

SEVERAL SENATORS. No.

The PRESIDENT pro tempore. The Secretary will call the name of the Senator from Colorado.

The Secretary again called the name of Mr. GUGGENHEIM.

Mr. GUGGENHEIM. Present.

Mr. SMITH of Georgia. Mr. President, I think there was also another Senator present who did not answer. I do not desire to mention his name, but I should appreciate his voting.

Mr. GRONNA. Mr. President, I wish to have my name called.

The PRESIDENT pro tempore. The Senator's name will be called.

The Secretary called the name of Mr. GRONNA.

Mr. GRONNA. Present.

The PRESIDENT pro tempore. The question recurs upon the amendment.

Mr. SMITH of Georgia. The amendment, as I understand, is that proposed by the Senator from Colorado [Mr. GUGGENHEIM]?

The PRESIDENT pro tempore. It is.

Mr. LA FOLLETTE. And upon that the yeas and nays have been ordered.

The PRESIDENT pro tempore. The yeas and nays have been ordered. The Secretary will call the roll.

Mr. SMITH of Georgia. I again ask unanimous consent to dispense with the yeas and nays.

The PRESIDENT pro tempore. The Senator from Georgia asks unanimous consent to dispense with the yeas and nays.

Mr. SMOOT. I believe that under the rule that can not be done, because of the fact that we have called the roll four or five times on the same question.

The PRESIDENT pro tempore. Objection is made, and the roll will be called. Those in favor of the amendment will, when their names are called, answer "yea"; those opposed will answer "nay."

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I desire to make the same transfer of my pair that I did awhile ago and I ask that it may stand for the evening. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again announce my pair with the Senator from Delaware [Mr. RICHARDSON] and the transfer of that pair to the Senator from Tennessee [Mr. WEBB]. I vote "nay."

Mr. STONE (when his name was called). I transfer my standing pair with the Senator from Wyoming [Mr. CLARK] to the Senator from Florida [Mr. FLETCHER]. I vote "nay."

The roll call having been concluded, the result was announced—yeas 0, nays 48, as follows:

NAYS—48.

Ashurst	Cummins	Martin, Va.	Simmons
Bankhead	Curtis	Myers	Smith, Ariz.
Borah	Fall	Newlands	Smith, Ga.
Bourne	Gallinger	O'Gorman	Smith, Mich.
Brady	Gardner	Page	Smith, S. C.
Bristow	Gore	Penrose	Smoot
Brown	Johnson, Me.	Percy	Stone
Bryan	Jones	Pittman	Sutherland
Catron	Kavanaugh	Poindexter	Swanson
Chamberlain	Kenyon	Pomerene	Townsend
Clapp	La Follette	Sheppard	Williams
Crawford	Lea	Shively	Works

NOT VOTING—47.

Bacon	Dillingham	Lippitt	Richardson
Bradley	Dixon	Lodge	Root
Brandegee	du Pont	McCumber	Smith, Md.
Briggs	Fletcher	McLean	Stephenson
Burnham	Foster	Martine, N. J.	Thomas
Burton	Gamble	Nelson	Thornton
Chilton	Gronna	Oliver	Tillman
Clark, Wyo.	Guggenheim	Overman	Warren
Clarke, Ark.	Hitchcock	Owen	Watson
Crane	Jackson	Paynter	Webb
Culberson	Johnston, Ala.	Perkins	Wetmore
Cullom	Kern	Reed	

So Mr. GUGGENHEIM's amendment was rejected.

Mr. GRONNA. I move that the Senate adjourn.

Mr. BORAH. Will the Senator withhold that for a moment?

The PRESIDENT pro tempore. Does the Senator from North Dakota withhold his motion?

Mr. GRONNA. I will do so.

Mr. BORAH. I ask that the Senate do not adjourn.

Mr. GRONNA. I withdraw my motion to adjourn and I will offer the following amendment. On page 3 of the bill, I move to strike out all of lines 10, 11, 12, and 13, and to insert in lieu thereof the following:

Children's Bureau, the—

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 3, strike out lines 10, 11, 12, and 13, in the following words: "Commissioner General of Immigration, the commissioners of immigration, the Bureau of Immigration and Naturalization, the Division of Information, the Division of Naturalization, and the Immigration Service at large, the," and insert in lieu thereof "Children's Bureau, the," so as to read:

SEC. 3. That the following-named officers, bureaus, divisions, and branches of the public service now and heretofore under the jurisdiction of the Department of Commerce and Labor, and all that pertains to the same, known as the Children's Bureau, the Bureau of Labor, and the Commissioner of Labor, be, and the same hereby are, transferred from the Department of Commerce and Labor to the Department of Labor, and the same shall hereafter remain under the jurisdiction and supervision of the last-named department.

Mr. GRONNA. Mr. President, I offer this amendment in good faith in the hope that the Senator from Idaho will accept it. I have no objection to the creation of as many bureaus as the Senate sees fit to create or as many departments as the Senate sees fit to create. I believe, however, speaking seriously, that the Senate of the United States will discover in the future, if this bill is passed in the shape it is now, that it has made a mistake. That, of course, is only my opinion.

I do not want to place the Bureau of Immigration under a mere Department of Labor, any more than I would want to place the Department of Labor under the management of those who control the strong industries of this country. I would prefer to have a bill such as we had before the Senate a few days ago and to have these regulations which are of such great importance interpreted and the law interpreted by disinterested people.

You can not by mere legislation trade wealth for labor. There are many ways you can take opportunity away from labor by legislation. I can recall when I grew up a boy that if restrictions such as you have now placed upon labor had existed, when I undertook to make my way single handed and alone, I would have been to-day laboring in the ditch with those who have been laboring there for many years.

Opportunity is the greatest asset that the American wage earners have. I come from a part of the country where the people are in favor of a liberal construction of the immigration laws. The people in my State, in many localities, have been holding meetings and conventions discussing the importance of securing immigrants for that State. I wish to read a short article which I clipped from the Williston Graphic, North Dakota. It is headed "Immigration Commission."

The Williston Commercial Club has passed resolutions indorsing house bill No. 271—

That is a bill pending before the North Dakota Legislative Assembly—

and has forwarded a copy of the resolutions to the legislature at Bismarck.

House bill No. 271 is a bill for the creation and maintenance of a North Dakota publicity and immigration commission. The object of such bureau and commission would be to place before the prospective immigrants from other States, and the world at large, the opportunities afforded in North Dakota. Also that through this bureau desirable immigrants could be aided in securing homes within the State.

Gov. Hanna, previous to his inauguration, pointed out the many things that could be accomplished for the State through the establishment of such a bureau, and indorsed its establishment. The bill was introduced by W. G. Owens, of this city.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. GRONNA. For a question.

Mr. KENYON. I rose to move an adjournment.

Mr. GRONNA. Mr. President, I do not want to detain the Senate much longer, but I feel that this is a question of such importance that I should like to discuss it further, unless the Senate——

Mr. KENYON. The discussion is very interesting, indeed; but, at the same time, we can proceed in the morning just as well.

Mr. GRONNA. Still, of course, if through fatigue, owing to the strenuous work we have been going through, an adjournment is necessary——

Mr. KENYON. We are more likely to be in a receptive attitude to listen to the discussion in the morning. I move that the Senate adjourn.

Mr. GRONNA. I have the floor. I did not yield for that purpose.

The PRESIDENT pro tempore. The Senator from North Dakota will proceed.

Mr. GUGGENHEIM. Mr. President, I suggest the absence of a quorum. The Senator from North Dakota is making a very interesting speech, and there should be a quorum here.

The PRESIDENT pro tempore. The Senator from Colorado suggests the absence of a quorum. The roll will be called.

Mr. KENYON. Mr. President, I rise to a question of order. The Senator from Colorado did not have the floor any more than I had it when I made my motion.

The PRESIDENT pro tempore. The rules provide that a Senator can suggest the absence of a quorum at any time. The roll will be called.

Mr. SMITH of Georgia. Does the Chair rule that a Senator can take another off his feet to suggest the absence of a quorum?

The PRESIDENT pro tempore. The Chair does so hold.

Mr. SMITH of Georgia. I just asked for information.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Myers	Smith, Ariz.
Bankhead	Fall	Newlands	Smith, Ga.
Borah	Gallinger	O'Gorman	Smith, Mich.
Bourne	Gardner	Page	Smith, S. C.
Brady	Gore	Penrose	Smoot
Bristow	Johnson, Me.	Percy	Stone
Brown	Jones	Pittman	Swanson
Bryan	Kavanaugh	Poindexter	Townsend
Catron	Kenyon	Pomerene	Williams
Chamberlain	La Follette	Sheppard	
Clapp	Lea	Shively	
Cummins	Martin, Va.	Simmons	

The PRESIDENT pro tempore. Forty-five Senators have answered to their names—not a quorum.

Mr. SIMMONS and Mr. GRONNA addressed the Chair.

The PRESIDENT pro tempore. The roll will be called.

Mr. SIMMONS. Mr. President——

Mr. GRONNA. I think I have the floor; I did not yield it when the suggestion was made of the absence of a quorum.

The PRESIDENT pro tempore. No business can be transacted in the absence of a quorum.

Mr. SIMMONS. I want to say there is hardly on the calendar a more important measure——

The PRESIDENT pro tempore. The Senator is out of order. There is no quorum present.

Mr. SIMMONS. Then I move that the Sergeant at Arms be directed to notify absent Senators to attend the session of the Senate.

The PRESIDENT pro tempore. The Senator from North Carolina moves that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDENT pro tempore. The Sergeant at Arms will execute the order of the Senate.

Mr. GRONNA. I move that the Senate adjourn.

The PRESIDENT pro tempore. The Senator from North Dakota moves that the Senate adjourn. [Putting the question.] By the sound, the noes appear to have it.

Mr. GRONNA. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. BORAH. What is the motion before the Senate now, Mr. President?

The PRESIDENT pro tempore. The Sergeant at Arms has been directed to request the presence of absent Senators.

Mr. SIMMONS. Mr. President, I ask to withdraw the request that I made a few moments ago, and I move that the Senate adjourn.

The PRESIDENT pro tempore. Without objection, the proceedings under the call will be dispensed with. The Senator from North Carolina moves that the Senate adjourn.

The motion was agreed to; and (at 11 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, February 26, 1913, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

TUESDAY, *February 25, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, draw us by Thy holy influence close to Thee, that we may receive of Thy substance the qualities of soul which make men great in the daily duties of life; that we may be the instruments in Thy hands for the promotion and furtherance of Thy kingdom upon the earth; that evil may be diminished, wrongs righted, and the things which make for righteousness increased; that we may thus pass from glory to glory under the spiritual leadership of the King of men, the Holy One of Israel. Amen.

Mr. SISSON. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER. Evidently there is no quorum present.

Mr. FLOOD of Virginia. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Aiken, S. C.	Barchfeld	Brown	Cary
Ames	Bartholdt	Burke, Pa.	Clark, Fla.
Andrus	Berger	Campbell	Conry
Ansberry	Bradley	Carlin	Copley
Anthony	Broussard	Carter	Crago
Cravens	Hamilton, W. Va.	McKinney	Rothermel
Crumpacker	Hammond	McMorran	Rucker, Colo.
Danforth	Harris	Madden	Rucker, Mo.
Davenport	Harrison, N. Y.	Martin, Colo.	Sabath
Davidson	Hartman	Matthews	Scott
Davis, Minn.	Henry, Conn.	Mays	Slemp
De Forest	Higgins	Merritt	Smith, J. M. C.
Dickson, Miss.	Hinds	Moon, Pa.	Speer
Draper	Hobson	Morgan, Okla.	Stack
Driscoll, D. A.	Howard	Morse, Wis.	Stanley
Ferris	Hughes, Ga.	Mott	Steenerson
Focht	Hughes, W. Va.	Murdock	Stephens, Nebr.
Fornes	Jackson	Needham	Sweet
French	Kindred	Norris	Switzer
Gardner, Mass.	Kinkaid, Nebr.	Nye	Talbott, Md.
Gardner, N. J.	Knowland	Olmsted	Talcott, N. Y.
George	Konig	Parran	Taylor, Ohio
Gill	Korbly	Patten, N. Y.	Thistlewood
Glass	Lafean	Patton, Pa.	Townsend
Godwin, N. C.	Langley	Pray	Vreeland
Good	Lee, Ga.	Prince	Watkins
Green, Iowa	Lindsay	Pujo	White
Gregg, Pa.	Littleton	Randell	Wilder
Gregg, Tex.	McCall	Reyburn	Wilson, Ill.
Gudger	McCreary	Richardson	Wilson, N. Y.
Guernsey	McDermott	Riordan	Wood, N. J.
Hamill	McGuire, Okla.	Rodenberg	

The SPEAKER. On this call 254 Members respond to their names, a quorum.

Mr. UNDERWOOD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The Journal of the proceedings of yesterday was read and approved.

BRIDGE ACROSS SNAKE RIVER, WYO.

Mr. SMITH of Texas. Mr. Speaker, I call up the conference report on the bill (S. 3947) to provide for a bridge across Snake River, in Jackson Hole, Wyo., and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from Texas calls up a conference report and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT (NO. 1560).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3947) to provide for a bridge across Snake River, in Jackson Hole, Wyo., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered 1 and agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment, insert the following:

"That the Secretary of the Interior is hereby authorized to use such portion of the reclamation fund, not to exceed $27,000, and in no event more than three-fourths of the sum that may be necessary for the construction of a bridge across Snake River, at a point in township 41 or 42 north, range 116 or 117 west, Wyoming, to be determined by the Reclamation Service, with the view of best serving the people of Jackson Hole and adjacent territory in Wyoming: *Provided*, That no part of the funds herein authorized to be used, except such as may be necessary for the making of examinations and estimates, shall be expended until the Secretary of the Interior shall have obtained, from the proper local authorities, satisfactory guaranties of the payment, by the said local authorities, of one-fourth of the cost of said bridge; and that the said local authorities assume full responsibility for and will at all times maintain and repair the said bridge and approaches thereto: *Provided further*, That the amount of the reclamation fund so used shall be charged as a part of the cost of the reclamation project or projects the construction and development of which have caused the necessity of such bridge."

And the House agree to the same.

W. R. SMITH,
A. W. RUCKER,
M. P. KINKAID,
Managers on the part of the House.

W. L. JONES,
F. E. WARREN,
FRANCIS G. NEWLANDS,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3947) to provide for a bridge across Snake River, in Jackson Hole, Wyo., submit the following written statement explaining the effect of the action agreed on:

Amendment No. 1 merely struck out the preamble, and to this the Senate agrees.

The effect of amendment No. 2 is to authorize the expenditure of not to exceed $27,000, instead of $18,000, from the reclamation fund in the construction of the bridge; in no event to exceed three-fourths of the cost of construction, instead of one-half, as provided in the House amendment, leaving one-fourth instead of one-half of the cost of construction to be borne by the local authorities.

W. R. SMITH,
A. W. RUCKER,
M. P. KINKAID,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

REGULATION OF WATERS OF NIAGARA RIVER.

Mr. FLOOD of Virginia. Mr. Speaker, I ask unanimous consent to have printed the views of the minority on the bill (H. R. 28674) for the control and regulation of the waters of the Niagara River above the Falls of Niagara (H. Rept. 1488, pt. 2).

The SPEAKER. The gentleman from Virginia asks unanimous consent to file minority views on the bill H. R. 28674. Is there objection?

There was no objection.

WITHDRAWAL OF PAPERS—M. R. WILLIAM GREBE.

The SPEAKER laid before the House the following request for unanimous consent:

Mr. ANTHONY asks leave to withdraw from the files of the House, without leaving copies, papers in the case of M. R. William Grebe (H. R. 4474, 1st sess. 57th Cong.), adverse report having been made thereon.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, may I ask what the papers are?

The SPEAKER. The gentleman from Kansas is not in the House and the Chair has no knowledge of it. If there is any objection, the Chair will reserve it until the gentleman is in the House.

WITHDRAWAL OF PAPERS—THOMAS D. FLYNN.

By unanimous consent, Mr. CANNON was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of H. R. 5351, for the relief of Thomas D. Flynn, alias Thomas D. Allen, Sixty-second Congress, second session, no adverse report having been made thereon.

RIVER AND HARBOR AND PHYSICAL VALUATION BILLS.

Mr. MANN. I would ask that these two bills, with Senate amendments, be printed with Senate amendments numbered and remain on the Speaker's table.

The SPEAKER. The gentleman asks what?

Mr. MANN. That the two House bills just coming from the Senate, with Senate amendments, the river and harbor bill and the physical valuation bill.

The SPEAKER. The gentleman from Illinois asks unanimous consent to have the river and harbor bill, with Senate amendments, properly numbered, printed, and also the physical valuation bill.

Mr. MANN. And to remain on the Speaker's table.

The SPEAKER. Is there objection?

Mr. SPARKMAN. Just one moment. I was about to ask unanimous consent to take the bill from the Speaker's table, disagree to the Senate amendments, and ask for a conference, and I understand that would result in the printing of the bill.

Mr. MANN. I should have to object to that until the bill is printed with the Senate amendments.

The SPEAKER. Ask that to-morrow morning. The Chair hears no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 22593. An act to amend an act entitled "An act to regulate commerce, approved February 4, 1887, and all acts amendatory thereof by providing for physical valuation of the property of carriers subject thereto, and securing information concerning their stocks and bonds and boards of directors"; and

H. R. 28180. An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812, the naval appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812, the naval appropriation bill, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill, the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes.

The CHAIRMAN. The Clerk will read the bill.

The Clerk read as follows:

Battle compasses: For the purchase of battle compasses for ships of the Navy heretofore completed, $120,000.

Mr. SISSON. Mr. Chairman, I would like to ask for my own information. I do not know that I have any objection to this item. I understand this has been carried for a number of years?

Mr. PADGETT. Only last year.

Mr. SISSON. I notice it is an appropriation of the same amount. Will the gentleman tell me if he knows what these battleship compasses cost, and why should we carry this appropriation every year?

Mr. PADGETT. They cost $10,000 apiece. This is to get 12. It is intended to put them on the battleships and on the armored cruisers and some of the submarines.

Mr. SISSON. In other words, we have 12 ships that are ready or will be ready at the end of the next fiscal year.

Mr. PADGETT. More besides these we authorize.

The Clerk read as follows:

Coal and transportation: Coal and other fuel for steamers' and ships' use, and other equipment purposes, including expenses of transportation, storage, and handling the same, and for the general maintenance of naval coaling depots and coaling plants, water for all purposes on board naval vessels, including the expenses of transportation and storage of the same, $75,000 of said sum, or so much thereof as may be necessary, may be used for the survey and investigation by experimental tests of coal in Alaska for use on board ships of the United States Navy, and for report upon coal and coal fields available for the production of coal for the use of ships of the United States Navy or any vessel of the United States, $5,000,000.

Mr. MANN. Mr. Chairman, I reserve a point of order.

Mr. BOOHER. I reserve a point of order.

Mr. MANN. I thought the gentleman from Missouri started to discuss the item.

Mr. BOOHER. I want to reserve the point of order on that part of the paragraph beginning with the figures "$75,000," in line 11, down to and including the words "United States," in line 17. I would like to find out from the chairman, if I can, why it is they make this appropriation for the purpose of surveying coal lands in Alaska and testing coal by the Navy Department.

Mr. PADGETT. There is a good deal of coal used on the ships on the Pacific, and there is a very high transportation charge on coal from the Atlantic to the Pacific. Various tests have been made of coal in the Pacific States by the Navy Department, by the Bureau of Mines, and I believe also by one of the other bureaus, and the report is they have never been able to find any coal satisfactory for the use of ships of the Navy upon the Pacific coast. It is well known that there are valuable deposits of coal in Alaska, and for the purpose of testing this matter in the last Congress we appropriated $75,000 for the purpose of getting some coal and bringing it down and testing it on the ships they have secured——

Mr. BOOHER. Eight hundred and eighty-five tons.

Mr. PADGETT. About 900 tons, in round numbers. It is from the Bering River field.

Mr. SISSON. Mr. Chairman, I can not hear what the gentleman is saying.

Mr. PADGETT. I regret my voice is such that it is difficult for me to speak. I was saying that last year we appropriated

$75,000 to test the coal in Alaska, for the reason that heretofore we have been unable to find coal of a satisfactory quality on the Pacific coast to use on the ships. According to the reports made by the Navy Department, the Bureau of Mines, and, I believe, by the Geological Survey——

Mr. SISSON. If the gentleman will yield, I will state I am in sympathy with the $75,000 appropriated for the purpose of testing Alaskan coal with the idea of using it in the Navy for the Pacific Fleet. It is simply a survey——

Mr. PADGETT. It is not a survey; the word "survey" is simply to ascertain and locate coal and get some of it and bring it down and test it.

Mr. SISSON. Does not the gentleman think, unless perhaps it is thoroughly understood, that another word might be used?

Mr. PADGETT. I will say to the gentleman that this amendment was put on in the Senate last year, and in conference the House conferees attempted to change it.

Mr. SISSON. Do you not think——

Mr. PADGETT (continuing). And it went out on a point of order made against the conference report, and we adopted the language from the necessity of the situation.

Mr. SISSON. Do you not think it would we better to put the amendment in here to assist the conferees in getting the item as you would like to have it?

Mr. PADGETT. I have no objection to changing the language.

Mr. SISSON. I will say to the gentleman that there have been some criticisms which I have heard in reference to the language carried, because it might convey the idea that they were to make surveys of coal lands.

Mr. PADGETT. I will be very glad to have substituted the language that was used in the conference report last year.

Mr. SISSON. I would be very glad to support that, if the gentleman will offer it.

Mr. BOOHER. Mr. Chairman, I would like to ask the gentleman how he expects to get the coal from the mines to tidewater so the Navy can get it to use?

Mr. PADGETT. That is a matter to settle when we find that we have got the coal there in sufficient quantity and of satisfactory quality. Then the Government will have to devise some means, or private capital will have to do it. That is a matter that we are not dealing with now. We are dealing with a question of whether or not there is coal there of a satisfactory quality and of sufficient quantity.

Mr. BOOHER. You have already tested coal from the Bering River coal fields in Alaska and have found that 15 tons of that coal is equal to 18 tons of other coal used by the Navy, have you not? Do not your records show that?

Mr. PADGETT. That is an old test that was made many years ago.

Mr. BOOHER. When? How long ago?

Mr. PADGETT. Seven or eight years ago.

Mr. BOOHER. Was it not five years ago?

Mr. PADGETT. I do not remember exactly. It was five or six or seven years ago, and it was stated in that report that 15 tons was such a small quantity that they could not make a satisfactory report upon that amount, and that there should be a larger quantity tested. This is intended——

Mr. BOOHER. I have that report before me, and it shows the result as I stated. Because it was made a few years ago is no reason why it should be discredited now.

Mr. PADGETT. I know. This is intended to get coal from Matanuska.

Mr. BOOHER. You propose to get coal from Matanuska and Copper River and Bering River, do you not?

Mr. PADGETT. Yes, sir.

Mr. BOOHER. Will you tell this committee how it is possible to get a single ton of coal from Bering River or Copper River or the Matanuska coal fields to salt water?

Mr. PADGETT. It will have to be taken down on sleds.

Mr. BOOHER. It will have to be taken down by dogs or carried out on the top of the mountains and rolled down, will it not?

Mr. PADGETT. It will be carried down on sleds.

Mr. BOOHER. Dog sleds?

Mr. PADGETT. I do not know whether they use dogs or not.

Mr. BOOHER. They have no horses up there. How far do you have to haul it?

Mr. PADGETT. From the Matanuska fields it is more than 100 miles.

Mr. BOOHER. What does it cost to get a ton of that coal down to Bremerton, where the testing station is located?

Mr. PADGETT. It is quite expensive.

Mr. BOOHER. How much? Do you not know that the hearings show that it cost $100 a ton to get it out there?

Mr. PADGETT. No; it does not cost anything like that.

Mr. BOOHER. It is so shown by the hearings.

Mr. PADGETT. In fitting out their expedition and getting their food and provisions and transportation of the men, and so forth, up there and losing $15,000 worth of provisions by the sinking of a vessel, it may be it cost about the amount as stated; but after they have gotten their plant and their operations started, it would not cost anything like that in the future.

Mr. BOOHER. Now, the hearings before your committee show, on a question asked by the gentleman from Alabama [Mr. HOBSON], in which he made the statement that it cost them $60 to $70 a ton, the witness said it cost $100 a ton. Mr. McKenzie said that when they got it to salt water it would be considerably over $100 a ton.

Mr. HAMILTON of Michigan. A hundred dollars a ton? From which coal fields—the Bering River or the Matanuska?

Mr. BOOHER. Either one.

Mr. HAMILTON of Michigan. The Bering River field is only about 35 miles, I think, from the coast.

Mr. BOOHER. Yes; but you have a mountain to cross.

Mr. HAMILTON of Michigan. And the Matanuska coal field is something like 200 miles.

Mr. PADGETT. About 140 miles.

Mr. HAMILTON of Michigan. No; about 200 miles.

Mr. BOOHER. Now, if the gentleman from Tennessee will pardon me further, I want to say that the sole purpose of this appropriation is to survey coal land up there in Alaska, is it not? I gather that from the hearings.

Mr. PADGETT. No; it is not.

Mr. BOOHER. I am telling you what the hearing shows. I say that the hearing shows that Mr. ROBERTS of Massachusetts, a member of the committee, stated that the sole purpose of this appropriation was to find out how much coal land there was in Alaska.

Mr. PADGETT. It is to ascertain if there is a sufficient quantity of coal to justify the Government in entertaining the hope and expectation of getting naval coal there.

Mr. BOOHER. That is not it. I read:

Mr. HOBSON. Mr. ROBERTS, you do not mean to say that the Navy Department samples all the outcroppings in Alaska?

Mr. ROBERTS. The very point of this Government expedition is to find out how much coal there is.

That is the object of this whole thing. The Geological Survey has made survey after survey, and here is the report of the Geological Survey that shows the number of millions of acres of land up there that has coal in it in Alaska, so that this work has already been done, and the work that the provision seeks to do is simply a duplication of the work already done by the Geological Survey.

Mr. PADGETT. Not at all, because it does not show whether it is coal suitable for battleships or whether it is simply land with coal deposits.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOOHER. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BOOHER. If that be the reason for it, the sundry civil bill carried an appropriation to do that express thing, and leaves it with the Bureau of Mines, where it ought to be. If the Bureau of Mines is not qualified to test this coal, you had better abolish the Bureau of Mines and turn it over to the Navy Department, instead of having three or four different bureaus doing it. Let me read this from the sundry civil bill:

For the analyzing and testing of coals, lignites, ores, and other mineral-fuel substances belonging to or for the use of the United States, including personal services in the Bureau of Mines at Washington, D. C.—

And so forth, $135,000. There you have in the sundry civil appropriation bill a provision for testing this coal and making an appropriation of $135,000 to do exactly what you want to do here with $75,000 in the Navy Department, thus duplicating the work.

Mr. PADGETT. No; that is intended for the continental limits of the United States, and it does not contemplate the investigation of coal in Alaska.

Mr. BOOHER. I do not agree with the gentleman as to what it contemplates. I take the language of the provision. It says, "coals, lignites, ores, and other mineral fuel substances belonging to or for the use of the United States." This duplicates that, as other provisions are duplicated in this bill. This matter ought to be submitted to the Bureau of Mines, or else the Bureau of Mines ought to be abolished, thereby saving the

Government the expenditure of that much money that is uselessly expended. What else are they there for?

Mr. PADGETT. The Bureau of Mines has been cooperating with the Navy Department in this investigation.

Mr. BOOHER. Do you propose to take this 885 tons of coal that you have mined at Matanuska and take it down at a cost of $100 a ton to Bremerton, to have it analyzed in order to find out how much heat there is to it?

Mr. PADGETT. No.

Mr. BOOHER. What do you propose to take it there for?

Mr. PADGETT. We propose to take it down to salt water and put it on the battleships and burn, not analyze it.

Mr. BOOHER. Is it necessary to take all that coal down and burn it? The hearings show that it costs $100 a ton to get it down there.

Mr. HAMILTON of Michigan. Mr. Chairman, may I ask the gentleman a question?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Certainly.

Mr. HAMILTON of Michigan. I want to ask the gentleman if the Alaska Central Railroad, extending northward from Seward in the direction of Matanuska, is now running?

Mr. PADGETT. They have constructed about 70 miles.

Mr. BOOHER. I can answer that, gentlemen. It is a triweekly line.

Mr. PADGETT. About 70 miles are yet to be completed.

Mr. HAMILTON of Michigan. In order to get to the Matanuska fields they have to run about 25 or 35 miles farther north, and then perhaps 75 miles eastward.

Mr. BOOHER. Yes; and then run as far back in to the coal mines.

Mr. HAMILTON of Michigan. It was testified before the Committee on Territories when I was a member of that committee that this coal could be laid down at the seaboard at $5 per ton if there was transportation for it, and that the Government was then paying, as I remember, $12 a ton for Welsh or Pocahontas coal, which was no better than this coal.

Mr. PADGETT. Not as much; I think the coal on the Pacific coast, including freight, costs $8 to $10.

Mr. HAMILTON of Michigan. It was testified repeatedly that it was costing $12 for Pocahontas coal, freighted across the continent.

Mr. PADGETT. I think it varies from $7 to $8 by ship.

Mr. HAMILTON of Michigan. They were shipping this by rail.

Mr. PADGETT. I do not know about the cost of that.

Mr. HAMILTON of Michigan. Then, in the last analysis, this is only a question of transportation. If the Alaskan Central Railway was extended so as to reach the Matanuska coal fields, or there was a spur run up to the Bering River coal fields, about 35 miles, it has been frequently claimed that we would have practically an inexhaustible supply of good coal.

Mr. PADGETT. There was some gentleman, representing that railway, came to see me.

[The time of Mr. PADGETT having expired, by unanimous consent he was given five minutes more.]

Mr. MONDELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MONDELL. Did the gentleman from Texas reserve a point of order?

The CHAIRMAN. The gentleman from Missouri [Mr. BOOHER] reserved a point of order.

Mr. MONDELL. On the Alaskan coal item?

The CHAIRMAN. Yes.

Mr. PADGETT. These gentlemen said they had about 70 miles of railroad completed, and if it developed that the coal was suitable for the Navy they would complete their road, and then they could deliver coal at salt water at a saving to the Navy of not less than $1 or $1.50 a ton.

Mr. HAMILTON of Michigan. I have heard it claimed that the Government could be saved much more than that.

Mr. PADGETT. I am telling the gentleman what they said. I said I thought that if the railway was completed there should be a greater saving than $1.50 a ton, but the question that we are trying to get determined officially and satisfactorily is whether or not there is coal there in sufficient quantities and of a specified quality for the use upon the ships.

Mr. HAMILTON of Michigan. Is it impossible to test that coal on the ground or somewhere near the place of mining?

Mr. PADGETT. They say that it is. They say that the only satisfactory test will be to try it on the ships and see what it will do and the results that it will accomplish in the actual trial.

Mr. HAMILTON of Michigan. It is pretty expensive bringing coal out by dog sleds across the snow.

Mr. HOBSON. I will say to the gentleman that they have tested a limited number of tons of this coal and it gave good heating results, but it was a question whether it could be operated with the present grate bars. To determine whether the coal is suitable in a conclusive way it would be necessary to have a large amount of coal.

Mr. BOOHER. Is it not a fact that Admiral Cowles went into Alaska and made a contract for 2,000 tons of coal to be put aboard ship, closed his contract, and before they could get the coal on the ship the order was issued closing the coal mines there in Alaska?

Mr. HAMILTON of Michigan. Coal mines where?

Mr. BOOHER. Up in Alaska.

Mr. HAMILTON of Michigan. They have not opened any coal mines yet, have they?

Mr. BOOHER. Yes.

Mr. PADGETT. Admiral McKenzie testified in the hearings that the contract was made for 2,000 tons of coal and that before they could deliver the coal a question arose in the Interior Department, in the Land Office, as to the validity and regularity of these titles, and on account of that conflict of title the contractors were unable to deliver the coal on the contract, but it was no fault of the Navy Department.

Mr. HAMILTON of Michigan. I want to make this suggestion: I have been informed—and I think it is a part of the testimony before the Territories Committee—that the railroad running out from Fairbanks runs across coal beds, but they are not permitted to touch it and at the same time they are obliged to pay $15 a cord for wood.

Mr. BOOHER. I have no doubt about that.

Mr. PADGETT. But the important question with us is to know whether there is coal of sufficient quantity and of a specified quality suitable for the Navy. If there is, arrangements can be made to save the Government in transportation and in the cost of coal several hundred thousand dollars every year.

Mr. HAMILTON of Michigan. How many tons would it take to coal up a ship?

Mr. PADGETT. I do not know.

Mr. HAMILTON of Michigan. Would it not be sufficient if they could get coal enough to coal one ship and make the test on one ship?

Mr. PADGETT. I understand that they use from 300 to 500 tons on a ship.

Mr. HAMILTON of Michigan. I meant for a suitable test.

Mr. PADGETT. Mr. Chairman, we have 885 tons, and if we are to make a test we ought to make a satisfactory test.

Mr. HAMILTON of Michigan. How much coal can a dog team haul?

Mr. PADGETT. I do not know.

Mr. BOOHER. I think 500 pounds.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent that his time be extended for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BOOHER. I want now to ask the gentleman this question: When Admiral Cowles made this contract to buy 2,000 tons of coal, what did he agree to pay for it?

Mr. PADGETT. I think they were to deliver it at about five to eight dollars a ton.

Mr. BOOHER. Six dollars a ton, was it not?

Mr. PADGETT. Somewhere along there.

Mr. BOOHER. Did not the witness testify before the gentleman's committee that if they had transportation and the right to mine the coal they could put that same coal at salt water for $4.25 a ton?

Mr. PADGETT. I do not remember whether he said $4 or around $5.

Mr. BOOHER. He said $4.25, finally.

Mr. PADGETT. I do not remember what it was. Mr. Chairman, if the point of order is to be made, I should like to have it made now, for I think we have consumed enough time.

Mr. THOMAS. Mr. Chairman, I wish to ask the gentleman from Tennessee if the last naval appropriation bill did not contain an appropriation of $75,000 for the purpose of testing Alaska coal?

Mr. PADGETT. It did.

Mr. THOMAS. Has all of that appropriation been expended?

Mr. PADGETT. Yes; practically all of it.

Mr. THOMAS. How many tons of coal was the total result of that expenditure of $75,000?

Mr. PADGETT. That has been stated—885 tons of coal, and then the purchase of the equipment to carry on the further test.

Mr. THOMAS. Where is that coal now?
Mr. PADGETT. It is at the Bering River mine.
Mr. THOMAS. At the mouth of the mine in sacks, is it not?
Mr. PADGETT. Yes.
Mr. THOMAS. Then that would have cost in round numbers about $80 a ton to mine that coal and place it at the mouth of the mine in sacks?
Mr. PADGETT. No.
Mr. THOMAS. Why would it not?
Mr. PADGETT. I have stated that a half dozen times. I have stated that the purchase of boats and equipment and fuel and transportation of men and everything of that kind were items that went in to establish a testing plant.
Mr. BOOHER. And you have not tested a ton of coal, have you?
Mr. PADGETT. No; we have not.
Mr. HUMPHREYS of Mississippi. Mr. Chairman, is it not a fact that a large part of that equipment was wrecked?
Mr. PADGETT. Yes; $15,000 of it in provisions was lost in a boat that sank. Mr. Chairman, I ask for the regular order. If the gentleman desires to make the point of order, I wish he would make it.
Mr. BOOHER. Mr. Chairman, I make the point of order.
The CHAIRMAN. Does the gentleman from Tennessee concede that this is new legislation?
Mr. PADGETT. I do not. Last year we carried an appropriation for this purpose, and this is a continuation to complete the work that was authorized, or to continue the work that was authorized last year. It is not new legislation.
The CHAIRMAN. The time of the gentleman from Tennessee has again expired.
Mr. OLMSTED rose.
Mr. BOOHER. Mr. Chairman, I will withhold the point of order for a moment in order that the gentleman from Pennsylvania may be heard.
Mr. OLMSTED. I thank the gentleman from Missouri for his courtesy. I desire merely in a few moments to say that I, having been elected thereunto by the House, had the fortune or the misfortune to sit upon the Ballinger-Pinchot committee. We heard a vast amount of testimony concerning coal in Alaska. It was argued before us that there was so much coal there and so valuable that a half interest in 5,280 acres was worth $100,000,000. Of course, that was wildly extravagant. The testimony did show, however, that there is a great, vast acreage of land in Alaska containing coal. Some of it is not of very desirable quality, while in other parts there seems to be very excellent coal. The fact is that there is so much scandal concerning the Alaskan coal fields that Congress has not dared to pass any act which would authorize anybody on any reasonable terms to buy or lease or conduct the mining of coal on Government lands in Alaska. The result is that people living right on top of immense coal beds have been compelled to pay from $14 to $24 for coal for fuel. That is an outrage. It is inexcusable we leave anybody in that position that their coal must come from such a great distance that with the freight they have to pay from $12 to $24 a ton.
Mr. BOOHER. If the gentleman will permit, just as long as Congress makes this kind of an appropriation for coal in Alaska the condition that the gentleman describes will be permitted to remain as it is there; there will be no change up there.
Mr. OLMSTED. There ought to be a determination of the quality of the coal up there, and then there ought to be general legislation which would permit private capital to get out that coal and sell it and reduce the price to a reasonable rate to the people who are consuming it.
Mr. BURNETT. What is the reason the Bureau of Mines does not do that with the $135,000 carried in the sundry civil bill which we passed?
Mr. OLMSTED. I do not think they have sufficient appropriations to make an exploration of Alaska.
Mr. BURNETT. It would not if it takes $75,000 to do what seems to be intended.
Mr. OLMSTED. This would help to do it, and therefore I am in favor of it. I think that the Navy could obtain its coal at half the present prices up in that county if there were an investigation, and if this coal were opened up and made available to use.
Mr. MANN. Will the gentleman yield?
Mr. OLMSTED. With pleasure.
Mr. MANN. Is it more important for the Government to get coal in the Navy than it is for the people of Alaska to get coal to burn at home or for the people on the Pacific coast to get Alaskan coal?
Mr. OLMSTED. I do not think it more important—I do not think it nearly so important that the Government shall get coal as the people. But this is a Navy bill, and I was speaking more directly to the effect of this appropriation upon the Navy, and its effect will ultimately be to the benefit of the people living in Alaska.
Mr. MANN. Has the gentleman examined the recent report of the commission provided in the Territorial bill of last year just submitted to Congress?
Mr. OLMSTED. I have not yet had an opportunity of reading it.
Mr. MANN. Well, we appointed a commission last year in the bill creating the Territorial Legislature of Alaska, one naval officer and some other gentlemen, who have just submitted a report, which I believe has been already transmitted to the Congress by the President, on the subject of coal transportation in Alaska in order to open up the coal fields. On the whole, would it not be a little wiser to wait until we take the first step before we take the last step in reference to getting coal?
Mr. OLMSTED. Well, that might probably be, but it is time we take the first step.
Mr. MANN. I fully agree with the gentleman.
Mr. OLMSTED. It seems to me this would be about the first step.
Mr. MANN. How?
Mr. OLMSTED. In the first place, they want to investigate and find if it is suitable coal for the Navy and how they can get out the coal.
Mr. MANN. Oh, no. How will they do it?
Mr. OLMSTED. I suppose they would get out a lot of samples.
Mr. MANN. The only way to get the coal would be to send a mining crew, or whatever you call it, into the fields of Alaska and take out a small amount of coal if there is any there and carry it down upon dogs or something else to the coast.
Mr. OLMSTED. In some way they would get it done, and until something of that kind is done there will be nothing done.
Mr. MANN. If that new coal was satisfactory, what good would that do? We can not get it out for use until we provide a method for transportation.
The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. OLMSTED] has expired.
Mr. OLMSTED. Mr. Chairman, I would like to have five minutes more.
The CHAIRMAN. The gentleman from Pennsylvania [Mr. OLMSTED] asks unanimous consent for five minutes more. Is there objection? [After a pause.] The Chair hears none. The Chair asks the gentleman from Pennsylvania [Mr. OLMSTED] if he contends this provision is not subject to a point of order?
Mr. OLMSTED. I was not, if it please the Chair, discussing the point of order, as the gentleman from Missouri [Mr. BOOHER] kindly yielded to me, reserving his point of order to allow me to be heard on the merits of the provision. If it is as the gentleman from Tennessee suggested——
Mr. HAMILTON of Michigan. Mr. Chairman——
Mr. OLMSTED. Mr. Chairman, I yield to the gentleman from Michigan [Mr. HAMILTON].
Mr. HAMILTON of Michigan. In partial answer to the suggestion of the gentleman from Illinois [Mr. MANN] I wanted to make this suggestion to the gentleman from Pennsylvania [Mr. OLMSTED]: The Matanuska coal field is probably something like 75 miles northeast of the northern terminus of the Alaska Central road, so far as it is extended at this time, so that it would be necessary to haul coal by dogs 75 miles, say, to a point where it can reach the railroad, and it is claimed that if it is found that the coal can be used, then the Alaska Central Railroad would extend its road to the Matanuska field, and therefore that much farther northward in the direction of Fairbanks. That would be a decided gain in the way of transportation for Alaska, certainly.
Mr. OLMSTED. Certainly it would.
Mr. WILLIS. Will the gentleman yield to me for a question? I want to suggest to the gentleman from Michigan [Mr. HAMILTON] in further answer to the suggestion of the gentleman from Illinois [Mr. MANN] that it would be entirely possible to test the Bering River coal, without much of this expense of transportation by dog team as referred to, because there is a railroad in relatively close proximity thereto, and this money can be economically expended.
Mr. HAMILTON of Michigan. I think the gentleman is mistaken about the distance, if he will pardon me.

Mr. OLMSTED. I would like to occupy a little bit of my time.

Mr. HAMILTON of Michigan. Just a moment.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. OLMSTED] asks to be permitted to continue without interruption.

Mr. OLMSTED. Mr. Chairman, if this coal is found to be desirable coal, as I believe it will be found, there will be no trouble about its transportation. If we will not pass such legislation as would warrant people in taking up the land and constructing means of transportation, then the Government itself had better build some short line of transportation in order to get the coal for its own use and enable the people of Alaska also to get cheaper fuel. But there is no trouble about getting transportation. There is capital quite willing to provide transportation and also quite willing to open and operate coal mines if Congress will only enact reasonable legislation permitting that to be done. I hope the gentleman will not insist upon his point of order. If, as the chairman of the Naval Committee suggests, this is a continuation of a work already commenced—a Government project already commenced—of course, it would not be subject to a point of order. Of the facts of the matter I am not fully advised. I hope the gentleman will not press the point of order.

Mr. MONDELL rose.

Mr. OLMSTED. I yield to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. I thought the gentleman had yielded the floor.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. OLMSTED] has expired.

Mr. PADGETT. Mr. Chairman, I demand the regular order.

Mr. MONDELL. Mr. Chairman, I desire to discuss the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read.

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I did not understand what the Chair had done.

The CHAIRMAN. The point of order is sustained.

Mr. MANN. A parliamentary inquiry, Mr. Chairman. To what was the point of order made—to the entire paragraph?

The CHAIRMAN. The point of order was sustained to the language beginning in line 11, page 20, to the words:

> Seventy-five thousand dollars of said sum, or as much thereof as may be necessary, may be used for the survey and investigation by experimental tests of coal in Alaska for use on board ships of the United States Navy, and for report upon coal and coal fields available for the production of coal for the use of ships of the United States Navy or any vessel of the United States.

Mr. MURRAY. Mr. Chairman——

Mr. SISSON. Mr. Chairman, I have the floor and move to strike out the last word.

Mr. MURRAY. Mr. Chairman, does the language that the Chair just read go out on a point of order which he sustained?

The CHAIRMAN. Yes.

Mr. SISSON. If that $75,000 goes out on a point of order, then the gentleman ought to correct the total and take the $75,000 from it. But before I give up the floor, I want to state that I notice in the hearings that the transportation of coal costs more than twice as much as the original cost of the coal.

It strikes me that if the $75,000 had remained in the bill, it might have been for economy, because the naval officers state that they could not, nor would they adopt any particular coal until they were absolutely assured that it would be suitable for steaming purposes in time of war.

Now if, as a matter of fact, the transportation is, as I have no doubt it is, as the admiral says, then the transportation of every ton of coal from the eastern mines to the Pacific coast is more than twice the cost of the coal, and if the coal in Alaska could be tested you could save this enormous amount. I will now ask the gentleman from Tennessee [Mr. PADGETT] if about half, or a little more than half, the entire appropriation for coal is not expended for the transportation of the coal on the Pacific coast?

Mr. PADGETT. Over a million dollars of it is expended in transportation.

Mr. SISSON. Then, if these figures are correct, every ton of coal going into the Pacific coast costs three times as much as the cost of the coal itself?

Mr. PADGETT. Twice as much.

Mr. SISSON. For that reason I believe the committee acted wisely, although this money may not be expended as economically as it should be expended; because if any of these gentlemen had charge of these naval vessels, they would not undertake to fill their bunkers and their naval stations from the Alaska mines until they could be assured that this coal was suitable for use in time of war.

Mr. PAGE. Mr. Chairman, as a matter of fact, is not a large amount of the appropriation made for the Bureau of Mines intended for the purpose of testing the coal that is burned in the Navy?

Mr. PADGETT. I understand so.

Mr. SISSON. That may be true, but the Navy ought to make its own tests. The men in charge of the boilers on the ships and the men on the ships and the expert stokers and the steam people ought to have charge of it. But because it is well understood that climate has a great effect on coal and on its thermal energy, such conditions ought to be tested by the Bureau of Mines. But I doubt the propriety of sending men from the Bureau of Mines to those naval vessels.

Mr. PAGE. As a matter of fact the Bureau of Mines sends its men to every battleship when the coal is to be tested.

Mr. MONDELL. Mr. Chairman, did the gentleman from Mississippi [Mr. SISSON] make a motion to reduce the item?

Mr. SISSON. I made a motion to strike out the last word, but in a moment I will make the motion to reduce the item. But I believe the item should remain in the bill, because this test of coal would give sufficient knowledge to Congress to enable it to determine whether it should authorize the construction of a railroad to get into the mines.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield for a question?

Mr. SISSON. I will.

Mr. HAMILTON of Michigan. Is it not true that under present conditions the coal used in the Pacific is transported across the continent or shipped from Wales?

Mr. SISSON. I do not know whether that is true or not.

Mr. HAMILTON of Michigan. And if that is true—and I think it is true—we are paying the freight on the transportation of every ton of that coal across the continent or on the water haul from Wales to the place where we use it.

Mr. SISSON. That is what I complain about.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. Mr. Chairman, I ask unanimous consent to have one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. KAHN. The coal that is used on the Pacific coast comes from Maryland, principally from Georges Creek, and very little of it comes from Wales. It is shipped around the Horn in vessels, and is taken from Georges Creek and from New Creek and several places around here. It is known as Pocahontas coal. That is used largely on the ships.

Mr. SISSON. I understand that. That is what I am objecting to. If the Pacific coast coal can be used for this purpose, it should be used.

Mr. KAHN. I agree with the gentleman fully on that.

Mr. HOBSON. Mr. Chairman, has not this provision gone out on a point of order?

The CHAIRMAN. It has, and the debate that has been proceeding is not relevant to anything that is before the House.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

Mr. HOBSON. But it has gone out. There is no last word or first word.

Mr. SISSON. Now, Mr. Chairman, I move to amend the paragraph, in line 19, by striking out "$5,000,000" and inserting "$4,925,000."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. SISSON].

The Clerk read as follows:

> At the end of line 17, page 20, strike out "$5,000,000" and insert in lieu thereof "$4,925,000."

Mr. MONDELL. Mr. Chairman, I hope the amendment may be adopted. I do not believe that the sum appropriated last year was put to any good use. I do not believe that the sum carried in this bill can be used to any useful purpose. We all know that there is coal in Alaska fit for naval use. No inquiry or test is necessary to prove that. There is coal with sufficient fixed carbon, low enough in ash, in moisture, and of the quality to make a perfect naval coal. The question is, How much is there of it and how much will it cost to mine and transport it? Those questions can not be economically or intelligently decided by the Navy. The questions of quantity and transportation are being investigated under another appropriation. The Bureau of Mines can give us an opinion as to the quantity of coal fit for naval use, and the question of

transportation will not be met until Congress legislates upon Alaskan coal, either providing for or encouraging transportation. This expenditure is therefore useless, unnecessary, and can serve no good purpose.

Mr. KOPP. Will the gentleman cite us to the source where we can find the information as to the quality of Alaskan coal?

Mr. MONDELL. The gentleman can find any number of analyses of Alaskan coal.

Mr. KOPP. Where can they be found?

Mr. MONDELL. In the Bureau of Mines, in the Navy Department, and in the Interior Department, and they show that there is Alaska coal high in fixed carbon, low in ash, low in moisture, and high in heat units. Now, that decides the question as to whether the coal is available for naval use or not. Is it clean coal? Does it produce a large amount of steam for the volume of the coal?

Mr. KOPP. Will the gentleman yield for one more question?

Mr. MONDELL. Yes.

Mr. KOPP. Has there ever been a report by any bureau to the Navy Department, or anyone who is thoroughly posted on the question of coal that the Navy uses, to the effect that this coal is suitable for naval uses, and if so by whom was it made, and where can the report be found?

Mr. MONDELL. I do not know if such report has been made, and my opinion is none is necessary. In my opinion the Navy never will be quick to decide on any new coal for naval use. The Navy is perfectly content to use the coal it has tested. The naval officers are not interested in questions of economy or in the question of the development of Alaska. They are interested in having a coal that has been tested, that they are confident of, that they can depend upon under battle conditions; you never will get from the Navy favorable reports on Alaska coal until they are satisfied beyond all pervadventure as to the quantity, availability, and quality, and they never can decide all these questions under this appropriation.

The CHAIRMAN. The question is on the amendment of the gentleman from Mississippi.

The amendment was agreed to.

Mr. MURRAY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Massachusetts.

The Clerk read as follows:

Amend by adding at the end of line 17, page 20, the following proviso: "*Provided*, That no part of this appropriation shall be expended in time of peace for transporting coal from the Atlantic to the Pacific Oceans for the use of naval vessels or navy yards on the Pacific Ocean, except this limitation shall not apply to vessels crossing the Pacific Ocean or stationed in the Hawaiian Islands or the Philippine Islands, or to navy yards situated in these islands."

Mr. MURRAY. Mr. Chairman, this is not my amendment originally, but it is the same amendment offered a year ago on the naval appropriation bill by the gentleman from Washington [Mr. HUMPHREY]. He made at that time a statement of facts which greatly impressed me as to the possibility of saving a large amount of money, and for the purpose of bringing the matter clearly before the committee I have taken the liberty of offering the amendment.

The facts as stated by him are that it now costs the Government of the United States between one and two million dollars to transport coal from the eastern border of the United States to the western coast. The facts as presented to the committee were that the transportation of coal is at a cost of $6.50 a ton, whereas the Pacific coast coal could be laid down at the Bremerton Navy Yard at $4 a ton; that the transportation alone for sending a ton of eastern coal around to that western country was $2 to $2.50 more for transportation than the entire cost of a ton of coal laid down at the Bremerton Navy Yard.

Now, I am a large-navy advocate, because I have been to my people on that matter in the first campaign I made for nomination for Congress, and it is because of that campaign and my sincere belief in the idea of the two-battleship program that I am going to vote in this bill for that item as reported by the committee. But I am just as strong in my desire for wise economy as any man in the House of Representatives, and when I see an opportunity that may save a million or two million dollars, I believe it is my duty to bring it to the attention of this committee. I suggest that we consider, therefore, the amendment introduced a year ago by the gentleman from Washington.

Mr. HOBSON. Will the gentleman yield?

Mr. MURRAY. I will yield to the gentleman from Alabama.

Mr. HOBSON. Has the gentleman looked up carefully the actual experiments and investigations made by the Navy Department?

Mr. MURRAY. I have looked them up as carefully as I could from the debates of last year, and I saw something that the gentleman from Alabama himself said. I will read it:

I wish to register here a complaint that the Navy Department is not encouraging the development of appliances so that it can use the other coals. When it found, for instance, that the coal in Alabama approximated to the needs of the Navy it would have been in the line of economy and the best interests of the Government to have undertaken to develop smoke-consuming devices and other devices, so that the department could then use Alabama coal.

The same applies to the Pacific coast coal, not only that mined on the mainland but that in Alaska, and the Navy Department has not shown great interest in developing additional sources of supply that would prove of great, if not vital, importance in time of war, and we are put to millions of dollars of expense, perhaps, unnecessarily.

Now, Mr. Chairman, the gentleman from Alabama in that statement refers to Alabama coal, and he comes from Alabama. The gentleman from Washington comes from that section, and he may have some local interest in the concern in this matter, and it is perhaps wise to have the amendment come from some one who has no interest in the industry, and I can say that I have no local interest in the coal proposition.

Mr. MANN. Will the gentleman yield for a question?

Mr. MURRAY. Certainly.

Mr. MANN. I have read the gentleman's amendment, and I do not catch exactly what the purpose is.

Mr. MURRAY. It is to prevent the expenditure of a million or two million dollars in the transportation of coal from the eastern section of the United States around for use on the western coast, when it is believed that they might be able to get coal out there of a good degree of efficiency at a great saving. It is not my language; I do not know anything originally about the proposition except as I have learned since I served in the House of Representatives. But it did strike me last year, and does now, as a serious proposition. I discussed it with the gentleman from Alaska [Mr. WICKERSHAM], who is not now here because the first Alaskan Territorial Legislature is now about to meet, and he is on his way there, as he has a right to be, because he was such a great force in getting the Territorial form of government for Alaska.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

[By unanimous consent, Mr. MURRAY's time was extended three minutes.]

Mr. HOBSON. Will the gentleman yield?

Mr. MURRAY. Certainly.

Mr. HOBSON. Taking the amendment as it reads, I want to ask the gentleman from Massachusetts, irrespective of the Navy Department activities in these experiments and investigation, if his amendment should prevail and the Navy Department were prevented from transporting any coal to the Pacific Ocean to-day, where would he get the coal for the Pacific Fleet?

Mr. MURRAY. I do not know.

Mr. HOBSON. I will say to the gentleman, in order to answer my own question, that I have not been satisfied with the activities of the Navy Department and of the Government at large in the matter of the development of the investigation of its coal fields, like the investigations in other lines in the Navy, including ordnance and other matters.

They have given assurance that at the earliest possible moment, when they can be satisfied that coal is available for Navy purposes from a Pacific Ocean field, they will make reasonable sacrifices to introduce it into the Navy.

Mr. MURRAY. Mr. Chairman, I can not yield any more. The gentleman from Alabama [Mr. HOBSON] in his very able speech of Saturday last predicated his argument on the proposition that we were going to war, that we were not going to stay at peace. Assuming his proposition to be sound, that we are looking at these problems or ought wisely to look at them from a warlike basis, where would we get the coal in time of war if we were at war on the Pacific coast? How would we get the coal in that event? Would we not then have to develop the Alaskan coal fields, which I understand are rich with these coal deposits, and get away from the policy that has been harsh and restrictive on the people of the Pacific coast? Of course we would.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

Mr. HOBSON. Mr. Chairman, I wish simply to add to my question to the gentleman from Massachusetts [Mr. MURRAY] that the Navy Department's last report, after testing, if I remember correctly, about 20 tons of Alaskan coal, was that it would burn very well and had a good heating value, but that when you come to use the sliecbar, or to put on the forced draft, a goodly portion would go into the ash pit and up the

smokestack, and it would require a further test before they could give their consent to rely upon it in time of war.

The gentleman from Massachusetts [Mr. MURRAY] has struck the real issue when he refers to a condition of war. We are establishing coaling stations at this time in the Pacific Ocean, and those coaling stations ought to be stocked with high-grade coal, to be available in time of war, for the very reason that transportation would be so difficult at that time. If this amendment were to prevail, it would absolutely forbid the use of high-grade coal in the Pacific Ocean unless it were brought from Europe; it would absolutely prevent the stocking of the station at Pearl Harbor, the station in the Philippines, or of having coal of a high grade that would be available in time of war, even in our mainland harbors, unless bought abroad.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. Certainly.

Mr. MONDELL. Does the gentleman know why the department declines to use these other coals in time of peace, to any considerable extent?

Mr. HOBSON. That is partly due to the fact that in time of peace we want the Navy to be ready for war. It is not like the use of target shells. You can use a low-grade shell for target practice and get practically the same result, so far as the target practice is concerned, as with a high-grade shell.

Mr. MONDELL. Yet the gentleman knows that we will always have some little notice of a great war, and the ordinary maneuvering of the naval vessels along the Pacific coast could be accomplished much more economically by the use of the local fuel.

Mr. HOBSON. The gentleman will find that scarcely any government in the world supplies its navy in time of peace with a low-grade coal. I do not mean to say that all of the coal out there is low grade. That is not my conclusion, but the Navy Department's standard, even for use in time of peace, has not yet been reached by the coals available as yet, at least under the tests so far made.

Mr. COX. Does the gentleman feel that we are fast approaching the time when we will abandon the use of coal entirely for oil?

Mr. HOBSON. I think the use of oil is rapidly developing, and that we will be able to find large oil deposits on the Pacific coast.

Mr. COX. Does not the gentleman think that in a very few years that will be the result?

Mr. HOBSON. I think there will be a combination of coal and oil.

Mr. COX. Which makes the best heat, oil or coal?

Mr. HOBSON. Oh, the firing of oil has so many advantages that when it can give satisfactory results it will be generally adopted.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. Certainly.

Mr. KAHN. Can the gentleman inform us what kind of coal the Japanese Government uses for its war vessels in time of peace? Is not that a low grade of coal, a native Japanese coal?

Mr. HOBSON. Mr. Chairman, I can simply give the gentleman my impression. My impression is that it is a high-grade coal though a native coal, and that they keep their coaling stations stocked with the highest grade Welsh coal. It is my impression that they use a local coal in time of peace, a coal found up in their recently acquired territory in southern Manchuria. I will also say to the gentleman that that Manchurian coal does come up to their requirements of efficiency for time of peace. Our Navy Department has not yet come to the conclusion that any coal supply thus far developed on the Pacific coast reaches those requirements.

Mr. KAHN. Mr. Chairman, I have had occasion to investigate the matter of bringing coal to the Pacific coast in recent years. The most of the coal that is sent to the Pacific coast for use of the Navy comes from fields near here; from fields known as the Georges Creek and New River fields. The coal they yield is known as Pocahontas coal. The department contends that it is the most effective coal that we can get other than Welsh coal. The department occasionally secures a cargo of Welsh coal that is sent as ballast in vessels that come under sail to the Pacific coast. A tramp steamer will also bring a cargo of Welsh coal occasionally. Now, some years ago an effort was made by owners of American ships to carry the Pocahontas coal to the Pacific coast, but the department officials contended that the cost of transportation in American ships was so much greater than it was in foreign bottoms that they decided to continue sending it out there in foreign ships. Then an effort was made by the Pacific coast people to have the coal mined on the Pacific coast utilized by the Navy Department.

The department has constantly contended that this latter coal has not a sufficient heat-producing force to warrant its doing so; and yet Japan, on the other side of the Pacific, is using a native coal for its own navy in time of peace. The amendment offered by the gentleman from Massachusetts would allow the Navy Department to use the native coal mined on the Pacific coast in our Navy in time of peace.

Mr. SHERLEY. Will the gentleman permit?

Mr. KAHN. So far as stations on the Pacific coast are concerned, the high-grade coal could be shipped to them for war purposes; there is no doubt of that. And the native coal could be used in time of peace, because its use would result in a great saving in transportation to the coast. Now, I yield to the gentleman from Kentucky.

Mr. SHERLEY. Does not the gentleman think it is rather foolish for us to undertake to determine the question of the coal supply when in less than a year, by the opening of the Panama Canal, you will have made obsolete every fact in connection with coal rates of to-day?

Mr. KAHN. I do not think the opening of the Panama Canal will make that obsolete. I think most of the coal will still be sent to the Pacific by sailing vessels, because they will be able to carry it at a lower rate.

Mr. SHERLEY. It will certainly affect the price of coal on the Pacific.

Mr. KAHN. It may to a certain extent; and yet I think coal will undoubtedly continue to be sent in foreign sailing vessels and in foreign tramp steamers just as it has been done heretofore. The Government attempted to utilize some American bottoms, but the price charged was too high, and when Col. Roosevelt was President he made a ruling that if an American owner of a vessel would be willing to take coal at the price offered by the foreigner plus 50 per cent he would prefer to give it to the American ships. For a while a number of American ships did carry coal, but ultimately the foreign shipowners reduced the rate so low that even with the 50 per cent added the American vessels could not make a profit in taking the coal. That is the situation to-day. The foreign vessel owners reduced prices to $3.50 a ton. It practically drove every American ship competing with that trade out of the market, and now, having gotten rid of American ships, they have increased the price to $6 a ton. That is the very condition we predicted would result at the time we made our protest against the action of the department in utilizing foreign ships to the exclusion of American ships.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman, I move that all debate upon the paragraph and amendments thereto be closed in five minutes.

The question was taken, and the motion was agreed to.

Mr. LITTLEPAGE. Mr. Chairman, if the membership of this House desires to cripple the Navy Department of our Government and cripple the usefulness of our naval fleet in the Pacific Ocean, adopt this amendment. Two years ago this amendment was offered. A year ago it was offered again to the then pending naval bill, and defeated. By this amendment it is sought to make it appear this scheme is sought; that by its adoption to make believe the Government would save $1,000,000 yearly in money we have been paying for the transportation of coal between the Atlantic and Pacific Oceans in railroad rates. That is not true from any point of view. You will find upon investigation that the great bulk of the coal is not shipped by railroad but shipped by water. This amendment is in the interest of the Pacific coal combine or interest, and I say that without any intentional harsh criticism upon my part of any Member of this House——

Mr. MURRAY. Will the gentleman yield?

Mr. LITTLEPAGE. I can not yield. If the membership of this House will take the time to consider and read the report coming from the Navy Department a year ago, they will find that it is impracticable to use the Pacific coast coal either in time of peace or war, for the reason it burns out the grate bars of the vessel almost as fast as they can be put in; for the reason it does not and will not produce the necessary amount of steam in any given time; and you will find by the report that of the eastern coal, to be found only in New River, W. Va., Elkhorn, Va., and Maryland, 1 ton produces quite as much steam as 2 tons of Pacific coast coal, and in the long run its use is a net saving to the Government, including freight and all expense, of about $1.50 per net ton. This coal can not be equaled.

Mr. CALLAWAY. Will the gentleman yield?

Mr. LITTLEPAGE. I can not yield. I trust the gentleman will pardon me; time is precious. That Pacific slope coal results in heat for a short time, and then it forms in tremendous clinkers, requiring the service of an extra hauler to pull the clinkers out of the furnace. This whole matter was gone into by the department in the report to this House a year ago, and I will quote for your benefit in substance the principal portion of that report by a later insertion in the RECORD. It is enough to say here that the saving to this Government by continuing the use of the New River smokeless coal should appeal to your economists of this Congress, if you really want to practice what you preach. Defeat this amendment and you will save $250,000 to $400,000 per year in time of peace; in time of war millions per year. Our coal does the work, produces the steam quicker and more lasting than any coal in the civilized world; this is the Government test, and can not be questioned nor duplicated.

This amendment went through the House some years ago. It was with difficulty that the Navy Department obtained its elimination in the Senate. When it came up in this House a year ago it was overwhelmingly defeated. The coal utilized by the Government from the eastern region comes from the New River fields in West Virginia, and the Elkhorn fields, and from the Maryland mines also. It is of the finest quality of steam-producing coal on this continent. It is that coal which the United States Government wants; it is that coal the Navy Department needs, and is obliged to have, to insure the management of the naval vessels plying on the Pacific Ocean. It was urged here some years ago on the floor of this House that there was a combination between the Navy Department and the eastern coal operators. I went into that matter as thoroughly as I could, and I am here to tell this Congress that that statement was an injustice both to the Navy Department and to the eastern coal interests whose property is being shipped to the Pacific slope. As a matter of fact, the eastern coal operators realize less than 70 cents a ton on their coal shipped. It is the very best coal they have or to be had. It is the best coal in this country. If you want to hurt the Navy Department, pass this amendment, but if you want to add to its efficiency, defeat it. Stand by your convictions and the best interests of this Government and all will be well at home and abroad.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. MURRAY].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MURRAY. Division, Mr. Chairman.

The committee divided; and there were—ayes 28, noes 55.

So the amendment was rejected.

Mr. OLMSTED. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 20, line 17, by striking out "$5,000,000" and inserting in lieu thereof "$4,990,000, of which not exceeding $65,000 may be used for the investigation of coal in Alaska, and report as to its availability for transportation and use on vessels of the United States Navy."

Mr. MANN. I make the point of order against the amendment.

The CHAIRMAN. The Chair will call the gentleman's attention to the fact that the amount has been changed from $5,000,000 to $4,925,000.

Mr. MANN. That amendment has been adopted and can not now be changed.

Mr. OLMSTED. I was not aware that the amendment had been adopted.

The CHAIRMAN. It has been adopted.

Mr. OLMSTED. Then I withdraw my amendment.

Mr. MONDELL. Mr. Chairman, I offer an amendment as a proviso at the end of the paragraph.

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] offers an amendment, which the Clerk will report.

The Clerk read as follows:

That in the expenditure of this appropriation fuel produced in the western portion of the United States shall be used on the Pacific so far as the use of the same shall be economical and practical.

Mr. MANN. Mr. Chairman, I make a point of order against that.

The CHAIRMAN (Mr. SHERLEY in the chair). The Chair sustains the point of order. It is clearly new legislation. The Clerk will read.

The Clerk read as follows:

Section 1552 of the Revised Statutes of the United States, authorizing the Secretary of the Navy to establish, at such places as he may deem necessary, suitable depots for coal and other fuel for the supply of steamships of war, is hereby repealed.

Mr. FOWLER. Mr. Chairman, I reserve a point of order on that paragraph. I desire to ask the chairman of the committee if this sum was not carried in the bill a year ago?

Mr. PADGETT. No. There is a general appropriation which has been carried for a number of years of $500,000, to be expended by the Secretary of the Navy, in his discretion, to establish coal depots under the authority of this section. We found upon investigation that various coal depots have been established and abandoned. One at Frenchmans Bay, with about $900,000 expended, with only 20,000 tons of coal in its whole history. There was one at Dry Tortugas, of about $500,000; it is abandoned. There was one at New London, Conn., at something like $500,000, making altogether $1,800,000 in those three establishments that since 1908 have been established and abandoned. The committee felt that this statute should be repealed, and if it is desired to establish a new station the authority of Congress should be first obtained.

Mr. COX. Will the gentleman yield?

Mr. PADGETT. Yes, sir.

Mr. COX. I see that section 1552 provides—

The Secretary of the Navy may establish at such places as he may deem necessary suitable depots for coal and other fuel for steamships of war.

Now, it is the gentleman's opinion, is it not, that if this section be repealed it will be ultimately in the interests of economy?

Mr. PADGETT. Beyond all question.

Mr. COX. Under this section which the gentleman proposes to repeal complete power is given to the Secretary of the Navy to establish coaling stations wherever he sees fit.

Mr. PADGETT. And without consulting Congress.

Mr. COX. And if this be repealed, hereafter when he establishes a coaling station he will have to get the permission of Congress to do it?

Mr. ROBERTS of Massachusetts. The whole purport of the repeal is to compel the department to come to Congress and point out the necessity for the station and what it would cost.

Mr. COX. I think the incorporation in the bill is a wise provision.

Mr. FOWLER. I had in mind that the same provision was carried in the bill a year ago.

Mr. ROBERTS of Massachusetts. It is the first time it ever has been done.

Mr. FOWLER. I desired to have it eliminated if it was carried in the bill a year ago. But on examination I find that it was not carried in the bill, and I therefore withdraw the point of order.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] withdraws his point of order.

Mr. MANN. And I reserve a point of order.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves a point of order.

Mr. MANN. I desire to ask the gentleman from Tennessee [Mr. PADGETT] if any navy yards have been abandoned?

Mr. PADGETT. Two have been discontinued. The one at New Orleans and the one at Pensacola have been discontinued, and I think there are one or two others that should be discontinued. I reported in a bill, either in the last session or in the year before, a recommendation to that effect, and upon discussion in the House they went out. A point of order was made against some of them on the ground that the committee would take up the matter and try to give a comprehensive consideration of the subject, and they want to do that in the next session.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield for a moment?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Yes.

Mr. ROBERTS of Massachusetts. I want to suggest to the gentleman from Illinois [Mr. MANN] that the Secretary of the Navy has no authority under any general law to establish a navy yard. It can only be established by coming to Congress.

Mr. MANN. That is not information to me. But the Secretary of the Navy has abandoned some coaling stations, because he did have authority to abandon them or to establish new ones. But when the Secretary of the Navy has not authority to establish a new one, the committee will not abandon it, and it becomes a logrolling process on every occasion.

Mr. PADGETT. I will say to the gentleman that the committee expects to take up that matter of navy yards and go into it very thoroughly at the next session.

Mr. MANN. Yes; and I heard the chairman of the Committee on Naval Affairs make that same statement 10 years ago.

Mr. PADGETT. Well, it was a different chairman. [Laughter.]

Mr. MANN. Yes; it was a different chairman, but it was practically the same committee, with practically the same men on it that are there now.

Mr. PADGETT. No; there are six new ones on it.

Mr. MANN. But they are not running this bill.

Mr. PADGETT. No; not all of them. [Laughter.]

Mr. MANN. Now, what the gentleman has in mind, I take it, is that the committee will select where a coaling station is to be located. The gentleman is aware, if this provision goes out of the bill and the gentleman provides in an appropriation bill a provision for a new coaling station, that it becomes subject to a point of order at once. There is no item for establishing new coaling stations in the law.

Mr. ROBERTS of Massachusetts. Would it not be possible to logroll against the new provision? Would not a point of order lie against it?

Mr. MANN. Yes; it would. It would lie against it in the House. But the items that go out will come back, and when they are once in we shall be just as powerless to abandon a useless coaling station or a useless navy yard or a useless magazine as we shall be to abandon any other of the unnecessary naval accessories, most of which ought to be abandoned in the interest of economy. Now, the gentleman knows perfectly well, so far as the appropriation is concerned, that the Secretary of the Navy can not establish a coaling station without money.

Mr. PADGETT. Let me say to the gentleman at that point that every year the Secretary submits an estimate for $500,000 to enable him to execute the provisions of that statute. He will use a part of it on an existing one and a part of it to start another one, and then he will come back the next year and ask to start still another one.

Mr. MANN. That depends on how complaisant the committee is. This year the Secretary submitted an estimate of $500,000, but the committee did not give him one cent under that provision of law.

Mr. PADGETT. Yes; but we limited it to the purpose which he says in this letter he wanted to apply it to.

Mr. MANN. You can always do that if you want to. It is not necessary to strike this authority out in order to follow that practice, and the Naval Committee every year ought to make the Secretary of the Navy state just where the money is to be expended. If that has not been the practice of the Naval Committee in the past, they have been negligent.

Mr. PADGETT. It has been the practice for several years past.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBERTS of Massachusetts. I move to strike out the last word.

The CHAIRMAN. Does the gentleman from Illinois [Mr. MANN] make the point of order?

Mr. MANN. I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. ROBERTS of Massachusetts. Will the gentleman reserve his point of order for a moment?

Mr. MANN. I will reserve it if the gentleman desires me to.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I want to explain to the gentleman that under the operation of this law the Naval Committee, while I have been a member of it, has never been notified of the proposed establishment of a coal depot, because it was not necessary under that law. The Secretary has gone ahead, acquired the land, made his contracts, and then at the succeeding session of Congress has put in an estimate for the amount of money that was necessary, and in that way the Naval Committee could do no less than to provide the funds to carry out the contract which the Secretary, under the law, was authorized to make. Now, if the gentleman will withdraw his point, and let us vote on this amendment, then if we change the law the Naval Committee and Congress will have full information in advance of any appropriation or any obligation on the part of the Government with regard to new coaling depots and sites.

Mr. MANN. Do I understand the gentleman to say that the Secretary of the Navy in submitting his estimates and appearing before the committee states how the half million dollars is to be expended, and then goes on and expends it in some other way?

Mr. ROBERTS of Massachusetts. Oh, no.

Mr. MANN. That is the inference that might be drawn from the gentleman's statement.

Mr. ROBERTS of Massachusetts. No, indeed. The Secretary of the Navy reports so much money to carry out the contracts——

Mr. MANN. Does the Naval Committee make no inquiry as to where that is to be expended?

Mr. ROBERTS of Massachusetts. No; there has been no direct inquiry.

Mr. MANN. Then the reform that ought to take place is in the Committee on Naval Affairs and not in the law.

Mr. ROBERTS of Massachusetts. We can not change the contracts that the Secretary has made, which he is authorized by law to make.

Mr. MANN. The Secretary is not authorized to make any contract of any kind unless money has been appropriated to carry it into effect.

Mr. BUTLER. There has been appropriated $500,000.

Mr. ROBERTS of Massachusetts. The money comes in after that to carry out the contract.

Mr. MANN. But the gentleman's committee not only has the right, but it is its duty to ask the Secretary of the Navy where this $500,000 is to be expended and how it is to be expended, before the committee recommends it to the House. This year the committee have done that and they have said where the money was to be expended.

Mr. ROBERTS of Massachusetts. I want to call the attention of the gentleman to the fact that the committee have had their attention called to this abuse of this old law by a former Secretary. The gentleman will understand that there is no complaint of the present Secretary, because in the establishment of the only coaling plant that I know of under this administration, namely, that at Pearl Harbor, all the facts in connection with that have been placed before the committee and the money has been asked for it. But when we came to look into it we found that there had been these abuses in the past, and it is the desire of the committee to prevent those abuses arising in the future. We can not tell what some succeeding Secretary of the Navy may do in this respect. I want to say to the gentleman, as he must well know, that the Secretaries are governed very largely by bureau chiefs.

Mr. MANN. They are governed by the appropriations which come from the Committee on Naval Affairs.

Mr. ROBERTS of Massachusetts. The thing that the gentleman complains of is the lack of wisdom of past committees 10 or 12 years or more ago. Now their failure to perform their duties according to the ideas of the gentleman from Illinois should not operate against a change of law that will make it impossible for any future Secretary to cause these conditions to arise in the future.

Mr. MANN. The gentleman would not contend that the Secretary could establish a new coaling station under the provisions of this bill, would he?

Mr. ROBERTS of Massachusetts. No; not if this provision should become a law he could not.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to extend my remarks by printing a letter from the Secretary of the Navy in relation to the naval coal depots.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The letter is as follows:

NAVY DEPARTMENT,
Washington, January 24, 1913.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
House of Representatives.

MY DEAR MR. CHAIRMAN: I have the honor to acknowledge the receipt of your letter of the 21st instant, relative to naval coal depots.

I am inclosing herewith a table showing the information requested by you.

The following is a statement showing for what purposes it is now intended to expend the estimate of $500,000 submitted for "Depots for coal" for the next fiscal year:

To complete coaling plant at Pearl Harbor	$306,250
Provide heater coils in fuel-oil tanks	43,500
Fuel-oil tank at Boston	57,700
Additional fuel-oil tank at Pearl Harbor	30,000
Contingent (repairs and additions to existing stations)	62,550
Total	500,000

The "contingent" item under this appropriation must necessarily be large to account for unforeseen demands which may be made upon it.

The above expenditures are in conformity with recommendations made to the department by the general board, and follow the general policy for the establishment and improvement of fuel depots as approved by the department.

Faithfully, yours, G. v. L. MEYER.

NAVAL COAL DEPOTS AND STATIONS ESTABLISHED SINCE 1890.

All of the coaling plants enumerated below were authorized and built since about January, 1898. Before that date the United States Navy possessed nothing that could be designated as coaling plant in the modern sense of the term; small coal piles were maintained at some of the navy yards and naval stations, either in the open or under light wooden sheds, and small piles were kept at Sitka, Alaska; Pago Pago; Tutuila; Samoa; Yokohama, Japan.

The coaling plants built since January, 1898, together with the date of establishment or letting of first contract, cost, and capacity, are given in the table following.

Navy yard, naval station, or coal depot.	Date.	Cost to date; approximate but fairly accurate.	Capacity, in tons.
Boston (navy yard)	About 1901 or 1902	$175,000	11,500.
Melville Station (Narragansett Bay)	1901	$1,070,523.10 to date. Includes cost of land, about 160 acres, $35,000.	In sheds, 40,000; under sheds, 20,000; total, 60,000.
Cavite, P. I. (Sangley Point)	About 1900	$563,809.99 (no cost for land)	25,000.
Charleston		No plant	Unlimited.
Culebra	About 1904	Cost little	5,000.
Frenchmans Bay	Purchased Apr. 23, 1900; cost $24,650 for 56 acres.	$475,595.80	12,000 in shed; on shore unlimited.
Guam	About 1900	Cost little (shed storage)	3,000 in shed.
Guantanamo (Hospital Cay)	About 1905	About $270,000	40,000 in open.
Honolulu	About 1899	Cost very little. No handling appliances.	80,000.
Key West	1898	$292,887	14,000.
Mare Island		Probably about $150,000	12,500.
New London	About 1901	$175,000	8,000.
New Orleans	About 1907	$147,143	5,000.
New York	About 1903	$276,982	8,500.
Norfolk (no plant)			
Olongapo	About 1905	$635,823	14,500.
Pensacola	About 1904	Not much	5,584.
Philadelphia	About 1906	About $50,000	10,000.
Pichilinque Bay, Lower California, Mexico	About 1900	do	10,000.
Portsmouth, N. H	About 1901	$175,000	10,000.
Puget Sound	About 1902	About $200,000	75,000.
San Diego (no handling appliances)	About 1904	$190,000	Unlimited; on ground.
San Juan, Porto Rico	About 1901	About $50,000	18,000.
Sitka, Japonski Island	1900	About $65,000	7,462.
Tiburon	About 1903	$1,200,000	135,000.
Tortugas	About 1899	About $500,000	20,000.
Tutuila	do		4,000.
Washington, D. C	About 1902		3,500, mostly for yard use.
Yokohama			7,000.

Culebra, San Juan, and Tortugas abandoned April, 1911, June, 1912, and April, 1906, respectively.

Frenchmans Bay, New London, Pensacola, and Sitka practically discontinued January, 1912, January, 1912, January, 1912, and March, 1912, respectively.

The coaling plants at Dry Tortugas and Frenchmans Bay have been ordered sold by the department, but the sale has not yet been made.

The coaling plant at Pearl Harbor is now in course of construction. The total estimated cost of this coaling plant and its equipment is $960,000.

The table submitted above does not include fuel-oil stations, it being understood that the committee wished the information about coaling plants only.

The Clerk read as follows:

Depots for coal and other fuel: To complete coaling plant at Pearl Harbor, Hawaii, $306,250; heater coils in fuel oil tanks, $43,500; additional fuel oil tank at Pearl Harbor, Hawaii, $30,000; fuel oil tank at Boston, Mass., $57,700; contingent for repairs and additions to existing depots for coal and other fuel, $62,550; in all, $500,000, to be available until expended.

Mr. SISSON. Mr. Chairman, I reserve a point of order to the paragraph. I notice that this makes the $500,000 available until expended. That provision is in violation of existing law. I ask the gentleman from Tennessee if the committee considered in establishing this coaling station at Pearl Harbor, which is sort of a halfway station between Japan and the United States, that it was affording Japan an opportunity to get coal in her attack upon the Government of the United States?

Mr. PADGETT. No; I think we will have it so fixed that Japan will not get near enough to get any coal.

Mr. SISSON. Does the gentleman believe that it will not then be the contention that we will have to have two more battleships to defend the coal?

Mr. PADGETT. We will have enough battleships by that time.

Mr. SISSON. Will you not have the same argument after you establish a coaling station at Hawaii that we have in reference to the Panama Canal, that we have got to have more battleships to defend it?

Mr. PADGETT. No; the naval station at Hawaii is the most important strategic position in reference to the United States. It was fully debated in Congress several years ago, and there was only one dissenting vote at that time as to the establishment of this station and the adoption of the plans then submitted. The reports here and the ones heretofore are simply parts and parcels of that program.

Mr. SISSON. How much have you expended already in Hawaii?

Mr. PADGETT. The limitation was a little over ten millions, and we have expended something like seven or eight millions, including what is in this bill.

Mr. SISSON. It will take two millions or thereabouts, additional, to complete it?

Mr. PADGETT. Yes; in two or three years to come.

Mr. SISSON. How many bills appropriate for fortifications, and so forth, in Pearl Harbor?

Mr. PADGETT. We do not appropriate for fortifications.

Mr. SISSON. This goes into the fortification plan.

Mr. PADGETT. Into the naval plan; the fortifications are under the Committee on Appropriations, of which the gentleman is a member. Pearl Harbor is on a little island of perhaps a thousand acres, perhaps a mile or a mile and a half out to sea.

Mr. SISSON. Was the ten millions for fortifications and the naval program?

Mr. PADGETT. The fortifications are taken care of by the Appropriations Committee under the fortifications bill. This relates alone to the naval station.

Mr. SISSON. If the gentleman knows, I would like to have him state how much is carried for this purpose in the bill?

Mr. PADGETT. I do not know about the fortifications, because that comes from the Appropriations Committee.

Mr. SISSON. Mr. Chairman, I will make the point of order.

Mr. PADGETT. I ask the gentleman not to make the point of order. This is for original construction, and they could not do the work within the narrow time and get it delivered. It will place us in the position of turning the money back into the Treasury.

Mr. MANN. You can not let the contract at all; that is the trouble.

Mr. SISSON. I do not understand why this money does not become available on the 1st of July, and you have 12 months in which to make the contract.

Mr. MANN. You can not run the contract beyond the end of the fiscal year, and hence you can not make a contract within the fiscal year.

Mr. PADGETT. This is in the interest of economy and good administration, and it does not interfere at all with the matter; it is simply a part of the appropriation of $10,000,000.

Mr. SISSON. I still do not understand why it is impossible to make the contracts.

Mr. MANN. You can not make a contract unless you have the money appropriated, or by specific act of Congress the contract is authorized. Now, this appropriation would not be available beyond the end of the next fiscal year, and hence you can not make a contract unless the contract is completed within the fiscal year, which I doubt is practicable.

Mr. SISSON. You can appropriate so much money as may be necessary for the current fiscal year.

Mr. MANN. Oh, that might be; but you would then have to have authority to make the contract. Here the total amount is appropriated, and they can not let a contract which would run beyond the end of the fiscal year, 1914.

Mr. SISSON. This is in continuation of a certain project, then.

Mr. MANN. This item provides for the completion of a coaling plant at Pearl Harbor, Hawaii.

Mr. SISSON. But there are also these items:

Heater coils in fuel-oil tanks, $43,700; additional fuel-oil tank at Pearl Harbor, Hawaii, $30,000; fuel-oil tank at Boston, Mass., $57,000, etc.

Mr. MANN. They could not let a contract on any of those unless the work was all to be completed within the fiscal year 1914, without this availability of the money being provided for, or an authorization to let a contract, because the money would

not be available after the end of the fiscal year, and they can not let a contract beyond the time when the money would be available.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Mr. Chairman, I reserved the point of order.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SISSON. Mr. Chairman, I simply want to get information. I shall have to make the point of order unless I can be convinced that this language is necessary in the bill. It is clearly subject to a point of order.

The CHAIRMAN. The time of the gentleman from Mississippi has been extended.

Mr. MANN. Mr. Chairman, it is like all the public-building propositions. You can not in any event make a contract that is not authorized specifically, unless the work is completed within the time that the appropriation is available. This appropriation without this language in it would be available only during the year 1914, and hence no contract could be let that was not to be completed within that time.

Mr. SISSON. I understand that the law has to authorize the construction of buildings before the money can be expended. And unless there is some special reason in this case why it should be made available until expended, I think it very bad legislation not to have these limitations in reference to appropriations, in accordance with the existing law.

Mr. MANN. As a rule, I quite agree with the gentleman; but here is a law under which you could not let a contract until after the 1st of July, and I judge from the items that they could not obtain a contract to be finished within one year unless an excessive price was paid for it. There is no object to that.

Mr. SISSON. Mr. Chairman, I shall not make the point of order on this paragraph, but it strikes me that the committee which has charge of this bill, like a good many other committees, is endeavoring to evade deficiencies, and for that reason I wanted an explanation in reference to this matter. I withdraw the point of order.

Mr. MANN. The gentleman knows that I quite agree with him on the deficiency proposition.

Mr. SISSON. Yes.

The Clerk read as follows:

BUREAU OF YARDS AND DOCKS.

Maintenance, Bureau of Yards and Docks: For general maintenance of yards and docks, namely: For books, maps, models, and drawings; purchase and repair of fire engines; fire apparatus and plants; machinery; purchase and maintenance of horses and driving teams; carts, timber wheels, and all vehicles, including motor-propelled vehicles for freight-carrying purposes only for use in the navy yards; tools and repair of the same; stationery; furniture for Government houses and offices in navy yards and naval stations; coal and other fuel; candles, oil, and gas; attendance on light and power plants; cleaning and clearing up yards and care of buildings; attendance on fires, lights, fire engines, and fire apparatus and plants; incidental labor at navy yards; water tax, tolls, and ferriage; pay of watchmen in navy yards; awnings and packing boxes; and for pay of employees on leave, $1,500,000; *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, inspection, drafting, messenger, and other classified work in the navy yards and naval stations for the fiscal year ending June 30, 1914, shall not exceed $425,000.

Mr. SISSON. Mr. Chairman, I would like to ask the gentleman from Tennessee what inquiry the committee made as to the proviso for $425,000 being used for the purposes mentioned—inspection, drafting, messenger, and other service.

Mr. PADGETT. We went into it very fully, as will appear in the hearings.

Mr. SISSON. I had not time to look at the hearings.

Mr. PADGETT. Beginning on page 90 of the hearings, there are several pages.

Mr. SISSON. It just struck me that unless the committee had some reason for it, $425,000 was a considerable sum to be taken out of an item of $1,500,000 for this purpose.

Mr. PADGETT. There is something like $10,000,000 that that covers. This is simply one item in the pages that follow.

Mr. SISSON. In other words, these drafting and clerical services take care of the entire proposition of the Bureau of Yards and Docks?

Mr. PADGETT. It does; and also does some work in the other bureaus.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. FLOYD of Arkansas having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. DU PONT, Mr. DIXON, and Mr. JOHNSTON of Alabama as the conferees on the part of the Senate.

The message also announced that the Senate had passed with amendment bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28730. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8182. An act granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River; and

S. 8439. An act restricting the issuance of interlocutory injunctions to suspend the enforcement of the statute of a State or of an order made by an administrative board or commission created by and acting under the statute of a State.

The message also announced that the Senate had passed, without amendment, concurrent resolution of the following title:

House concurrent resolution 71.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 2,500 copies of "Tariff Hearings" before the Committee on Ways and Means of the House of Representatives since the 6th day of January last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

PUBLIC WORKS, BUREAU OF YARDS AND DOCKS.

Navy yard, Portsmouth, N. H.: Fitting up room for storage of cranes, $9,000; garbage crematory, $6,000; in all, $15,000.

Mr. GREGG of Texas. Mr. Chairman, I move, in lines 19 and 20, to strike out the words "fitting up room for storage of cranes, $9,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out, on page 23, in lines 19 and 20, the words "fitting up room for storage of cranes, $9,000."

Mr. GREGG of Texas. Mr. Chairman, this amendment brings before the committee the first of a series of amendments that will be offered in regard to the navy yards. I do not suppose that anyone will deny that our navy yards are improperly located. No one will deny that the present Secretary of the Navy has called attention to that fact. They are so arranged as to be unbusinesslike and to be unuseful, and so numerous as to be exceedingly extravagant. Every navy yard has to have a plant, has to have its power plant, has to have its tool house, has to have all of its accompaniments. Now, then, in view of the fact that our navy yards are so arranged, if Congress does its duty or the Secretary of the Navy does his duty, there must be a rearrangement of them and an abandonment of some of them. The Secretary of the Navy has outlined the plans for the proper erection of navy yards upon the Atlantic. He suggested one at Narragansett Bay; he suggested one, a reserve basin, at Philadelphia; a navy yard at Norfolk. Now, according to all the experts, these are sufficient for the Atlantic coast.

Mr. MURRAY. Mr. Chairman——

Mr. GREGG of Texas. We will then need one at Guantanamo——

Mr. MURRAY. Will the gentleman state the estimated cost of the establishment of a naval base at Narragansett Bay as outlined by the Secretary of the Navy?

Mr. GREGG of Texas. It is estimated that by selling the abandoned yards that we can realize money enough to establish this new yard.

Mr. MURRAY. Mr. Chairman, may I ask the gentleman to give the details of that proposition?

Mr. GREGG of Texas. I do not remember the details, but whether we located one at Narragansett Bay or not—I am not contending for Narragansett Bay.

Mr. ROBERTS of Massachusetts. Will the gentleman yield to me?

Mr. GREGG of Texas. I will.

Mr. ROBERTS of Massachusetts. Does not the gentleman recall that the proposition of the Secretary to close up certain yards and establish another at Narragansett Bay was only tentative and depended entirely upon whether or not he could sell those he wished closed up for a considerable sum of money and he had no information whatever as to whether he could sell them at a reasonable price or not?

Mr. GREGG of Texas. It was only tentative, but we knew that when this question was raised Members on this floor from every one of these navy yards would be up in arms and we can not effect any abandonment or any compromise in the conduct of these yards as long as that condition exists. The Members of this House ought to be big enough, at least as big as the Secretary of the Navy, who included for abandonment the navy yard at his own home, and we ought to be interested enough in an economical administration of the Navy to rise up and meet him upon this proposition. Nobody will deny that these yards are costing millions of useless expenditure every year. Some of them, if Congress does its duty, must surely be abandoned. We hear it said, as the gentleman from Illinois said about the naval stations, that this matter will be taken up and gone over thoroughly by the committee, but let me tell you, gentlemen, that if something is not done in this House to stop the appropriations for these navy yards nothing will ever be done by the committee or anyone else looking to a consolidation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GREGG of Texas. I ask for five minutes more.

Mr. MURRAY. I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. GREGG of Texas. Now, the point I make is this. If the abandonment of any of these yards is only tentative, we are criminally extravagant in proceeding to expend hundreds of thousands, yea millions, of dollars annually upon those navy yards while their abolishment is being considered. Now, my proposition does not affect these navy yards as going concerns at all. It is not a question of repairing them, it is not a question of keeping them in a condition to do the work, to continue to do the work they are doing, but on page 31, line 14 to 16, we find this provision.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GREGG of Texas. Not at this moment. "For repairs and preservation at navy yards and stations, $800,000." There is a general provision for the purpose of keeping these yards in proper repair so that they can continue to do the necessary work, but my amendment goes to the point of cutting off the addition of new buildings and the building up of a larger establishment. Now I will yield to the gentleman.

Mr. MOORE of Pennsylvania. Does the gentleman consider favorably the construction of battleships or the making of repairs in navy yards?

Mr. GREGG of Texas. I have always voted for that proposition.

Mr. MOORE of Pennsylvania. Would it be fair, in the gentleman's opinion, to have but one navy yard in which to construct ships, provided we adopt that policy?

Mr. GREGG of Texas. We do not propose to build all of them in the navy yards. I never have favored that.

Mr. MOORE of Pennsylvania. Suppose we have but one Government yard equipped to construct a battleship, which is the situation confronting us to-day, and there arose along the Gulf States and along the Lakes, or on the Pacific coast, a demand that they should have a navy yard fully equipped to construct ships, would not the gentleman think it a fair proposition to be prepared in those sections of the country?

Mr. GREGG of Texas. I do not think so now; if the necessity should ever arise, I would favor it.

Mr. MOORE of Pennsylvania. Is the gentleman familiar with the Pensacola yard?

Mr. GREGG of Texas. I am familiar with the place where there used to be a yard.

Mr. MOORE of Pennsylvania. I know it has been abandoned. But in the event of war, or the necessity of suddenly constructing or repairing ships, might it not be a good thing to have that station ready for action?

Mr. GREGG of Texas. The experts say not. Now, I am not an expert——

Mr. MOORE of Pennsylvania. Suppose this country should be struck at Panama at some future time, or a great naval warfare should arise in the West Indies, which gentlemen familiar with the subject think might be possible, would it not be well that we should be equipped along the Gulf States, particularly somewhere within the Florida Keys, to prepare for the emergencies that might arise?

Mr. GREGG of Texas. As I told the gentleman just now, I am no expert. As I understand, the plan of the department is to make the place for the defense in that section at Guantanamo, and I think there ought to be a large dock, and there ought to be provision asked for by the Navy Department at Guantanamo.

Mr. MOORE of Pennsylvania. Would the gentleman do the construction and repair work there exclusively, so far as the southern and Gulf coasts are concerned?

Mr. GREGG of Texas. I am not making a fight for the Gulf coast. I am making a fight for the economic and businesslike administration of the Navy Department. I am making a fight, sir, against the Representatives who have navy yards in their districts, and who will never permit any move to economize or to reduce expenses.

Mr. MOORE of Pennsylvania. Admitting that that is true, and that is a fair proposition coming from the gentleman who does not have a navy yard in his district, does he still answer the question I put with regard to our preparedness for construction or for repairs at a point remote from the larger centers of population in the event of war?

Mr. GREGG of Texas. The policy of the department is to have that at Guantanamo, and I have no war on the department on that proposition.

Mr. KNOWLAND. Will the gentleman yield?

Mr. GREGG of Texas. Yes, sir.

Mr. KNOWLAND. In reply to the statement made by the gentleman from Pennsylvania [Mr. MOORE] that there was only one navy yard fitted to equip, or rather to build, ships, I want to say that we have one at Mare Island.

Mr. MOORE of Pennsylvania. I ask the gentleman from California [Mr. KNOWLAND] to remember I said "battleships." I know that a collier has been constructed at the Mare Island Navy Yard. There is only one navy yard in the country equipped to build a battleship.

Mr. KNOWLAND. The Mare Island Navy Yard is equipped to build battleships.

Mr. GREGG of Texas. The point I make is this: That these navy yards are not properly arranged. Some of them have to be abandoned, and that matter is under consideration, and, while it is under consideration, it looks to me foolish to appropriate hundreds of thousands of dollars a year to add new buildings. There is ample provision in this bill for maintaining them. It will not affect their efficiency. They will be kept up to their present standard. They are doing the work now, and they will continue to do the work, but I see no reason why we should continue to appropriate these large sums of money for the addition of new buildings, barracks, machine shops, power houses, and such things, because, when abandoned, all of that will be waste money. I put it up to this Congress, and we shall put it up by motion after motion to ascertain whether or not you are willing in any sense of the word to resort to any kind of economy.

Mr. BATES and Mr. ROBERTS of Massachusetts rose.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. BATES] is recognized.

Mr. BATES. Mr. Chairman, I believe that it would be a very poor proposition and false economy to strike out this item.

Now, what is it? Last year the very small appropriation for Portsmouth Navy Yard was $44,000. This year it is only $15,000, in two items, one in the interest of economy and another in the interest of sanitation and health. One is an item of $9,000 for fitting up a room for the storage of cranes. Admiral Stanford, in the hearings, states that it is for the storage of two valuable cranes, worth, I presume, $100,000, and for the storage of yard locomotives, which are also valuable.

The question does not arise here whether we are going to continue or discontinue the Portsmouth Navy Yard. That does not enter into the question at all. We are not authorizing the buying of any new lands or the building of any new buildings or the purchase of any new equipment.

It is merely to preserve the valuable machinery that we have there now, and for a crematory, because Admiral Stanford states in the hearings that this item is necessary to provide a crematory for the disposition of yard waste. It is necessary to burn it. "In some of the yards," he says, "the organic waste is collected by people who keep pigs or have some other use for the material." The crematory will be used if the wastes are not otherwise more satisfactorily disposed of.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BATES. I regret I have only two or three minutes.

Now, Mr. Chairman, it seems to me this is striking a note of false economy. I will not urge that it is playing politics; I will not be so ungracious as to say that. But I do say it is from an overweening desire to cut something out of this bill. These items stand for themselves and speak for themselves, and if the gentleman had attended the meetings of the Naval Committee for the past two months, when we were in session two hours and three hours and four hours, sometimes, a day, and heard carefully discussed and explained these several items by the heads of departments and bureau chiefs, there would not be so

much kindergarten talk as has gone on in this Chamber for the last two or three days. [Applause.]

I believe it is the part of economy that the storage of cranes should be provided for. If the gentleman from Texas [Mr. GREGG] or any other gentleman were about to sell his farm or plantation, it would be good economy to house his farm machinery for the winter, even pending the sale; otherwise the machinery would suffer in a few weeks to a greater extent than the amount of the paltry sum that is necessary to take care of it and keep it from the natural deterioration that would ensue by leaving it exposed to the elements.

Mr. SAMUEL W. SMITH. Mr. Chairman, does the gentleman yield?

Mr. BATES. Yes.

Mr. SAMUEL W. SMITH. I would like to inquire of the gentleman whether the other navy yards have crane sheds for their protection?

Mr. BATES. Yes; certainly. This is not even to build a shed. It is simply to fit up a room suitable for the storage of cranes and yard locomotives. They are valuable pieces of property, and they could be used, perchance, at another navy yard if it were seen fit to dispose of this navy yard at any time in the future.

I do not believe, Mr. Chairman and gentlemen of this committee, that you do not appreciate the hard, patient labor that has been expended upon this bill by the chairman of the Committee on Naval Affairs, who has labored unceasingly and with the true spirit of economy, and still with the true spirit of patriotism, to the end that this bill may be presented here properly. [Applause.]

I once heard an old soldier and distinguished Democrat, Amos Cummings, a Member on the other side of this Chamber, declare, when some one moved to strike out an item for barracks in the Philippines, that he would rather his right arm fall palsied to his side and his tongue cleave to the roof of his mouth than that he should vote to cripple the efficiency of the Army or the Navy of his country. [Applause.]

Mr. PADGETT. Mr. Chairman, I simply want to call attention to the fact that the total expenditures for buildings, public works, improvements, and machinery installed at Portsmouth is $10,600,929. The total cost of land and maintenance has been $18,838,000. We have at Portsmouth the finest water of any yard that we have perhaps on the Atlantic coast.

Here is a proposition to appropriate $15,000 to take care of this property, a very economical proposition, and also from the point of sanitation. It represents an investment of $18,000,000. It seems to me that to come and criticize this action, or to suppose upon mere rumor that it is going to be abandoned, a matter, I dare say, that is in the ages to come, is absurd. Let us deal with this proposition along business lines.

Now, Mr. Chairman, we must make some progress on this matter, and I move that all debate upon this paragraph and all amendments thereto be closed.

Mr. BUTLER. Mr. Chairman, I would like to have two or three minutes.

Mr. SLAYDEN. I would like to have two or three minutes. I have used hardly three minutes since the bill came under consideration.

Mr. PADGETT. Then, I will move that all debate on the paragraph and amendments thereto close in 10 minutes.

Mr. WITHERSPOON. Mr. Chairman, I would like a few minutes.

Mr. O'SHAUNESSY. Mr. Chairman, I ask for five minutes. I have not interjected myself into the debate, realizing that the time was short.

Mr. BUTLER. In order not to embarrass the gentleman, I will withdraw my request for time.

Mr. PADGETT. Mr. Chairman, I will withdraw the motion, but I notify the members of the committee that I shall hereafter insist on the rule. We must get through with this bill.

Mr. SLAYDEN. Mr. Chairman, as a member of the primary class in the kindergarten that so much excites the contempt of my friend from Pennsylvania, I want to submit a few observations. Out of the mouths of babes and sucklings there has come some words of wisdom. The chairman says that there has been $18,000,000 spent on the Portsmouth Navy Yard, and the gentleman from Pennsylvania said $10,000,000.

Mr. BATES. I beg the gentleman's pardon, I made no estimate; but I did emphasize the spending of practically nothing on it now except to take care of it.

Mr. SLAYDEN. If it is a useless navy yard, every dollar spent on it is wasted. We better dismantle it and remove the machinery that is valuable and give it up. The splendid water the chairman speaks of will not deteriorate and will not require a watchman.

Mr. BATES. The fault that is found with the Portsmouth Navy Yard is that it is not big enough to take care of the modern ships like the *Utah* and the *Pennsylvania*. They can not go into the dock. In case of war it might be useful.

Mr. SLAYDEN. The *Pennsylvanias* and the *Utahs* in the near future, if my friend from Pennsylvania and my friend from Alabama, who know no limit for aspirations for the growth of warships, succeed, will not be able to be accommodated by the Panama Canal, and we will have to enlarge that ditch to accommodate the expensive *Utahs* and *Pennsylvanias* that our friends want to make the people bankrupt themselves in building.

Mr. BATES. The Panama Canal, by common consent, fixes the width of all future battleships.

Mr. SLAYDEN. Then in the name of God, why did we not have wisdom enough to make it a very much smaller ditch than it is? [Laughter.] Mr. Chairman, I am advised by a gentleman who is a member of the committee that the Secretary of the Navy says that the Portsmouth Navy Yard is of no value to us.

Mr. ROBERTS of Massachusetts. Oh, Mr. Chairman, I want to challenge that statement.

Mr. SLAYDEN. The gentleman can challenge it, but not in my time. I have heard it said repeatedly under discussion on this naval question that there are a number of navy yards, built at great expense, that are of no value to us. If that is true, these navy yards ought to be abandoned. We ought not to yield to the blandishments of Members of the House, chairmen of committees, and individual Members. We ought not to spend a dollar in the building of a navy yard or the establishment of a navy yard where it is not needed and where it will be of no service. We ought to spend all the money that is required to maintain an efficient and adequate Navy. We do differ somewhat in our definition of some of those terms, but every man here, I take it, is a patriotic American citizen and does not want to see the interests of his country, its sovereignty and territory imperiled in any way, and will all stand ready to do what is necessary to protect it. But when the Secretary of the Navy is permitted to——

Mr. ROBERTS of Massachusetts. Mr. Chairman, I want to challenge what the gentleman says.

Mr. SLAYDEN. I wish the gentleman would please wait until I get through and to address the Chair if he wants to interrupt me. If I am making an inaccurate statement, I am relying on the judgment of those upon whom I place as much reliance as I do on the gentleman from Massachusetts, much as I esteem him.

Mr. O'SHAUNESSY. Mr. Chairman and gentlemen, I have hesitated to inject myself into this debate, realizing that in the closing days of this session the appropriation bills should be passed without unnecessary interruption. I am an advocate of an efficient Navy, and I believe that this bill in providing for two battleships meets the demands of the American people. It is a business proposition, an insurance proposition, a proposition that will lead to safety, a proposition that will lead to a sustaining of the national honor when it is in danger. Washington's classical remedy for war was preparedness. We should be guided by his advice and experience. But, like my distinguished friend from Massachusetts [Mr. MURRAY], wherever there is an opportunity to wield the pruning knife to save a million or two, I am in favor of that kind of economy. I believe that the American people generally hesitate to criticize Congress for the expenditure of millions of money, providing they get a dollar's worth of value for every dollar expended. But there is just criticism to be leveled at this bill, and I congratulate the gentlemen who drew the minority report in calling such sharp attention to the items for the maintenance of navy yards which are generally believed to have become worthless. I have been told that the Joint Army and Navy Board have recommended the abandonment of certain naval stations as having outlived their usefulness. The Secretary of the Navy has spoken favorably of Narragansett Bay as a naval base. For the enlightenment of the committee I will insert at this point in my remarks the testimony of the Secretary before the Committee on Naval Affairs:

Secretary MEYER. I made a recommendation to the committee a year ago, recommending the abolition of certain yards, because, with the Navy constituted as it is now, with a battleship fleet of 21 (including new and old type vessels), there was no longer a necessity for those stations, and I showed that if we abolished all those mentioned in my recommendation it would mean a saving of about $1,500,000 a year in maintenance, etc. After that, I studied the problems on the Atlantic coast from Charleston to Portsmouth and put the matter up to the General Board of the Navy, and after they had given me their opinions, I further assigned it to the Joint Army and Navy Board for consideration, because a naval station is not a fortified station.

Quite the contrary, it rather invites attack to the harbor in which it is located, and has no means of defense. Therefore, it would de-

volve upon the Army to defend that station in case of war. The Joint Army and Navy Board reported that the ideal plan for the Navy would be to have two great naval bases on the Atlantic coast in harbors which would receive and could maintain the entire fleet and its auxiliaries.

Mr. GREGG. Did they designate the places?

Secretary MEYER. Yes, sir; I will come to that. They further reported that Philadelphia, on account of its fresh-water basin, was valuable to retain as a station for the reserve fleet and for its maintenance there, because of the labor market and because the station was already there. While the station at Charleston, S. C., should never have been built originally, nevertheless, as it is already there, we can make use of it as a torpedo base. At Key West is a station for torpedo vessels, not an extensive naval base but merely as an adjunct to Guantanamo for the protection of the Gulf of Mexico. It supplements Guantanamo as a naval station, and the torpedo vessels can protect the entrance to the Gulf of Mexico from this point.

Then came the question of the best locations, according to the views of the Joint Army and Navy Board, as to two naval bases which would receive and maintain the fleet. It appeared self-evident that the only two places which could receive the fleet and all the auxiliaries, with harbors and anchorage sufficient for such purposes, were Hampton Roads, where we have the Norfolk Navy Yard, and Narragansett Bay, where there is a large protected harbor with two exits and possibilities such as the Joint Army and Navy Board require.

The CHAIRMAN. What are the climatic conditions as to frozen water at Narragansett?

Secretary MEYER. Absolutely favorable. It is south of Cape Cod. The harbor is always open. Therefore, the question for me to consider was what was feasible, and whether it was possible to finally recommend the abolition of the Portsmouth, Boston, and New York yards, and in their place center a naval base in Narragansett Bay.

I am not prepared, as yet, to make a recommendation, for the reason that we are still studying and investigating. It requires a great deal of thought and consideration from many points of view. There has been a tentative plan made which would give us two docks 1,000 feet long, two docks 650 feet long, which would take in any battleship or dreadnought up to the present time, and two small docks suitable for gunboats and destroyers, making six docks in all, and berthing space for 12 to 16 ships.

The CHAIRMAN. That is at Narragansett Bay?

Secretary MEYER. Yes, sir. There would be shops for construction and repair, and for steam engineering, and everything necessary for an up-to-date efficient navy yard. The questions that I have to solve are these: Whether that could be done without expense to the Government. That is, whether the proceeds from the sale of those three yards would be sufficient to pay for the reestablishment of a naval base necessary to the Navy's requirements at Narragansett Bay.

That is one of the problems. Second, before we commit ourselves, it is necessary to study the locality and see whether it is feasible and practicable, and third, to see whether it can be done within the estimates. It has been estimated that those three yards will bring from $24,000,000 to $25,000,000. We have tentative plans of what can be done at Narragansett Bay for $24,000,000 to $25,000,000, but it is necessary to make soundings. It is necessary for us to ascertain if it can be done. We do not propose to commit ourselves to something and find that it will cost double what we anticipated. Therefore, I am temporarily reporting this to the committee as I have always endeavored to do, in order that they may know what the department is considering. Until the engineers have thoroughly studied the locality, until they have made their soundings, and until they have tentative estimates of the cost which would be sufficiently definite to authorize a recommendation, I can not say anything further at the present time to the committee.

Now, my criticism may not come with all the good grace that it comes from the gentleman from Texas [Mr. SLAYDEN], because I represent a district possessing one of the greatest bays in the world, as my friend the gentleman from Massachusetts [Mr. MURRAY] can bear me out, a place that would harbor all the battleships we would be able to build for years to come, but I hope in my course in this House I shall always be recognized as the gentleman from Rhode Island instead of the gentleman for Rhode Island. [Applause.] I prefer to be national rather than local in my political character, and in my zeal for my State not to overlook the Nation's necessities. And if there is any other naval base superior to Narragansett Bay, if there is any better place that appeals to the people charged with the administration of the Navy, then I say, go and take it, and if the naval establishments now in Rhode Island are or should at any time be considered not what they ought to be, I say, abolish them, but if being all that is desired to promote efficiency and economy we ought to use and enlarge them and sell some of the other places and thereby effect a great saving to the country. I hope that the time is near when that shall be done. I hesitate just now to join in the proceedings to strike out of this bill the provisions for the maintenance of these yards outside of Rhode Island, but I am very highly pleased to know that the gentlemen representing the minority on this committee have so succinctly and splendidly called attention to the glaring defects in our naval administration. I do not believe I can better support my argument and my statement at this time than by quoting from an editorial in the Washington Herald under date of January 13, 1913:

> It would be unwise economy to curtail the strength of the fleet to such an extent as to impair the authority of the United States among the powers.

That is a sentiment to which I have the honor to subscribe.

> At the same time, the expenses of naval administration must be reduced. The Navy Department has pointed the way to this. Abolition of useless navy yards is the solution. The cooperation of Congress is necessary to this end. At present navy yards are located at Portsmouth, N. H., Boston, New York, Philadelphia, Portsmouth, Va., Charleston, and Key West. It is difficult for the largest battleships to reach some of them, but they are all kept going, and the expense of repairs at these scattered stations is far greater than it would be were they combined in two or three. England has passed through this wasteful stage and now pursues a policy of concentration. Three naval stations, one in Narragansett Bay, another in Hampton Roads, and a third at Guantanamo, would adequately maintain the Atlantic Fleet, while stations in Puget Sound, San Francisco Bay, and Pearl Harbor would be sufficient shore establishment for the naval force in the Pacific.
>
> Concentration has long been the American policy, so far as its warships are concerned, for the vessels are now kept constantly together in the fleet, except when it is necessary for them to separate or go for repairs to the scattered shore stations.
>
> If there is good reason for concentration afloat, there is better reason for concentration ashore. Navy yards should exist for the fleet, not the fleet for navy yards.

The CHAIRMAN. The time of the gentleman has expired.

Mr. O'SHAUNESSY. I ask for five minutes.

Mr. GREGG of Texas. I was about to ask that the gentleman have five minutes.

Mr. O'SHAUNESSY. I thank the gentleman from Texas.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. O'SHAUNESSY. Now, Mr. Chairman, in my short experience in this House I have become convinced that Congress is but a convention of local envoys, and I know how extremely difficult it is to wrench a Member away from some cherished project in his district. Rhode Island possesses, as it does many industries, some of which were supposed to be attacked by the Underwood tariff bills in the last Congress. There was a wailing and a lamentation from some quarters when the Underwood bill passed; that is, a lamentation from some particular interest involved, but in spite of the fact that I voted for every one of Democratic tariff bills I have had the pleasure of being returned. [Applause.] And I hope it will be my good fortune to support that prince of American statesmen, that imperturbable gentleman, OSCAR W. UNDERWOOD, so genial in character, so persuasive in eloquence, and possessing that particular charm and ability—conciliation. I hope it will be my pleasure for some years to follow his distinguished leadership in this House. [Applause.] Now I am diverting. I do not want to be guilty of piping too long upon my own particular tune, which in this instance is Narragansett Bay——

Mr. MURRAY. May I inquire of my good friend and colleague what is the estimated cost of the establishment of the naval base at Narragansett Bay?

Mr. O'SHAUNESSY. In the testimony of the Secretary of the Navy, which will be found incorporated in my remarks, the Secretary estimates that the cost would be $24,000,000 to $25,000,000, the sum to be obtained by the sale of other yards.

But I want to be firm, and I want to be very honest in this statement. I would not be here advocating this, if I believed that Narragansett Bay was not the proper place. I hope the prediction of the gentleman from Tennessee [Mr. PADGETT], the dire prediction that these abolitions of certain navy yards are away off in the distant future——

Mr. PADGETT. Mr. Chairman, will the gentleman permit me to state that I said only the Portsmouth Navy Yard?

Mr. O'SHAUNESSY. Oh, I am pleased and gratified.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. O'SHAUNESSY. Certainly.

Mr. MANN. I suppose I am to blame for my ignorance of geography, but just where is Narragansett Bay? [Laughter.]

Mr. O'SHAUNESSY. Oh, Narragansett Bay is an inlet of the Atlantic Ocean, extending 28 miles into Rhode Island, and being 18 miles wide from its point of entrance, Sakonnet Point to Point Judith. Providence, Newport, and Fall River are on the shores of the bay. Its harbor can accommodate all of our battleships, and I want to say to the gentleman that I trust the Rhode Island Legislature before long will have the pleasure of inviting the Naval Committee there and showing them how bountiful God Almighty has been in his gifts to Rhode Island.

Mr. MANN. In his gifts to Rhode Island, or in what will be furnished for the Naval Committee when they get there?

Mr. O'SHAUNESSY. Oh, I presume they will be properly taken care of.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. O'SHAUNESSY. Certainly.

Mr. MOORE of Pennsylvania. Mr. Chairman, I grant that Narragansett Bay is one of the most beautiful bodies of water along the Atlantic coast, or in the country, but will the gentleman state whether it is salt or fresh water?

Mr. O'SHAUNESSY. Salt water.

Mr. MOORE of Pennsylvania. That enters very largely into this proposition.

Mr. O'SHAUNESSY. I know it does, and the gentleman I suppose now is boasting in an indirect way of the Delaware River.

Mr. MOORE of Pennsylvania. I always boast of it, and in a very direct way, but I thought it only fair to draw the comparison as between the beautiful sheet of water known as Narragansett Bay, where the water is salt, and the great Delaware River, where the water is fresh.

Mr. O'SHAUNESSY. Because one is fresh and the other salt, with the consequent action involved on ships' bottoms?

Mr. FOSTER. Does the gentleman think there will be anything left for Narragansett Bay after we get through with Philadelphia and her demands?

Mr. O'SHAUNESSY. I know the gentlemen from Philadelphia are very insistent, and they are disposed to look after the interests of their constituents, but I do hope that there will be something left for Narragansett Bay when they get through.

In order that the committee may know something more about Narragansett Bay, it will be my pleasure in the extension of my remarks, to insert a newspaper clipping epitomizing the views of Rear Admiral Luce on the subject under discussion.

The newspaper clipping referred to is as follows:

NAVAL BASES V. NAVY YARDS.

The wide difference between a navy yard and a naval base is cogently stated in a recent article by Rear Admiral Stephen B. Luce, U. S. Navy (retired), now of Newport, in which he states that while the United States has navy yards, naval stations, and naval rendezvous it has in a technical sense no naval bases.

Rear Admiral Luce found that Narragansett and Chesapeake Bays were advirably designed naturally for naval bases and points out that the Atlantic seaboard possesses three principal strategic naval points—the two bays and the Florida Keys.

"Narragansett Bay," he said, "seems to have been intended by nature for a permanent naval base of the first order." He cited the fact that Gay Head, Block Island, and Montauk Point would be lookout stations that in time of war would give timely notice of the approach of an enemy's fleet, giving an exceptional primary advantage to Narragansett Bay as a naval base.

Rear Admiral Luce also pointed to the fact that the old reason for not locating a naval base in Narragansett Bay, the lack of fortifications, no longer existed. Now the fortifications are here and capable of fulfilling nearly every condition necessary in cooperation with a naval base.

He also presented the following requirements for a naval base, which, he said, Narragansett Bay can fill, and which New York and Boston's yards can not.

Its situation must be at the best strategic point within the area under consideration.

It must afford a safe harbor for a fleet of at least from 25 to 30 battleships, with their auxiliaries, aggregating a total of about 60 heavy-draught ships and numerous small craft.

Such anchorage must be within the lines of defense.

It must afford ample docking facilities at one and the same time for at least four ships of 45,000 tons displacement, each of, say, 38 feet draft.

The interior lines of communication to the sources of supply should be such as may be fully secured in time of war.

It should be easy of access and egress and admit at mean low water, without constant recourse to dredging, ships of the heaviest drafts of water, say, 38 feet.

It should be in the proximity of a community able to furnish skilled labor in the departments of iron shipbuilding and marine enginery.

The facilities of the neighborhood for furnishing the materials which enter into these industries should be ample.

The character of the soil of the littoral should be such that the dry docks and wet basins in numbers sufficient to meet all probable demands of the future can be constructed at moderate cost, and its area sufficient for all the structures that may be needed for a repairing yard and a naval arsenal combined.

It should enjoy a salubrious climate, and it should be difficult to blockade.

"Narragansett Bay," continues Admiral Luce, "and its tributaries can furnish all the skilled labor a naval base could need during peace or in time of war. The fact that it has a channel 40 feet deep which can be carried 10 miles up from the entrance, and that, too, without dredging, furnishes another advantage enjoyed by no other harbor on our Atlantic seaboard.

"Narragansett Bay is now well fortified. It has, therefore, all the constituents of a naval base of the first order save the docking facilities. It only awaits the time when its exceptional advantages shall have been passed upon officially by a duly appointed mixed commission of Army and Navy officers, as has been our practice in the past, and the question of its adoption taken up by Congress."

Mr. WITHERSPOON. Mr. Chairman, I do hope that the debate on this item will not be cut short by the House, for the reason that the considerations that will determine the House in voting upon this item will also determine it in voting upon a very large number of items in the bill that are in the same condition. This item which the amendment seeks to strike out provides for the erection of some kind of structure for the storage of cranes. I do not deny that it is useful and beneficial and necessary that cranes should be stored. The fact is I am not sufficiently posted on the subject to know whether they ought to be or not. It seems to be a fact, however, that for 120 years of the country's history these cranes have not been stored, and this necessity has suddenly been discovered. I do not base my support of the amendment upon the idea that it would not be a useful expenditure of the money to construct this house in which to put these cranes. I put it upon the proposition that in all probability this navy yard at Portsmouth will be abandoned, and in case it should be, this will be a waste of money, and more than a waste. It would be a waste of money if we expended it there and afterwards discovered that it was useless, but when we are advised beforehand that it will be useless, I say it is criminal waste of money. The chairman of the Committee on Naval Affairs, the gentleman from Tennessee [Mr. PADGETT], left the impression on the House that this was based on rumor. I tell this House it is not based on rumor, it is based on the statement of the Secretary of the Navy himself.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. WITHERSPOON. Certainly.

Mr. MURRAY. I desire to read from page 709 of the hearings, quoting Secretary Meyer:

I am not prepared as yet to make a recommendation for the reason that we are still studying and investigating. It requires a great deal of thought and consideration from many points of view.

Mr. PADGETT. And on the next page the reasons are given.

Mr. MURRAY. I do not want to take too much of the gentleman's time.

Mr. WITHERSPOON. Secretary Meyer has said a great many things, but in some part of his testimony, where he was explaining why some of these navy yards ought to be abandoned, where he was trying to show the committee how much less expensive it would be to have the work concentrated at a few yards, he gave us to understand that, in his judgment, some of them ought to be abandoned, and he mentioned Portsmouth and Boston and one other that I do not remember among the number.

Mr. MURRAY. Can you cite me to the place and time?

Mr. WITHERSPOON. I can not cite you to it, and it does not make any difference whether you ever find it or not.

Mr. MURRAY. Oh, yes; it does.

Mr. WITHERSPOON. It does not.

Mr. MURRAY. It makes a difference to me and my folks.

Mr. WITHERSPOON. Well, get his testimony and read it from beginning to end. I have not the time to hunt up the pages now.

Not only that, Mr. Chairman, but some of the bureau chiefs have explained to us how the multiplication of navy yards causes a duplication of expenses, and I think one of the examples used to illustrate it was that you would need a crane at Portsmouth, you would need a crane at Norfolk, and if the work done in both of the navy yards were done in the same place one crane would do the work. That is just an illustration, but it is undoubtedly a fact that the multiplication of these navy yards does greatly increase the expense of maintaining the American Navy. It is not only not rumor, but whatever the Secretary of the Navy may have said is not nearly so strong and significant as what he has done.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WITHERSPOON. Actions speak louder than words. We spent $10,000,000 in building a navy yard with great buildings of all kinds and immense machinery of all kinds, at Pensacola, which the Navy Department has actually abandoned, and there is not a dollar of appropriation in this bill for that navy yard.

Mr. MONDELL. Will the gentleman yield for a question?

Mr. WITHERSPOON. Yes.

Mr. MONDELL. Does the gentleman believe that the Pensacola yard should have been abandoned?

Mr. WITHERSPOON. I can not believe that it ought, or that it ought not to have been abandoned, because I have not sufficient information to base an opinion upon. But I will say to the gentleman from Wyoming that what I do believe is this, that the Committee on Naval Affairs ought, if it could ever get time enough left, after considering battleships, to devote its attention to this subject of whether we will concentrate our work at two or three navy yards, or whether we will abandon the others, and, if so, which ones. That is a subject which we ought to consider, and we ought to get the advice and opinion and facts from men who are informed on the subject. And, in addition to that, we ought to visit every one of them and know what we are doing before we act. I do not know whether the navy yard at Pensacola ought to be abandoned or not, but I know it has been abandoned. That is a fact, and, therefore, the contention we make here that this Portsmouth Navy Yard may be abandoned is not, as the gentleman from Tennessee [Mr. PADGETT] says, based on rumor, but is based on actual fact.

Mr. MONDELL. If the gentleman will allow me, my thought was this, and I plead to a vast amount of ignorance on the subject——

Mr. WITHERSPOON. You have plenty of good company.

Mr. MONDELL. The navy yard at Pensacola ought to be made one of our great navy yards. My own opinion has been that there was a very great question with regard to Portsmouth, but the Navy Department has abandoned the one at Pensacola, and they have maintained Portsmouth. Now, the gentleman claims he does not know whether Pensacola should have been abandoned, but he believes that Portsmouth should be abandoned.

Mr. WITHERSPOON. No; I did not say that at all.

Mr. MONDELL. Then I misunderstood the gentleman.

Mr. WITHERSPOON. I told you I did not know enough about it to say whether any of them ought to be abandoned, and, if so, which ones ought to be abandoned; but, I say that the Committee on Naval Affairs has never given to this subject sufficient consideration, has never taken enough testimony, has never gotten the advice and opinion of competent men on the subject sufficient for any of them to have an intelligent opinion. And while the thing is undecided and uncertain, I submit it is a waste to expend this money on any of them.

Now, in addition to that——

Mr. MOORE of Pennsylvania. Will the gentleman yield for one question?

Mr. WITHERSPOON. Yes, sir.

Mr. MOORE of Pennsylvania. Has the gentleman ever visited the Pensacola yard?

Mr. WITHERSPOON. I have not.

Mr. MOORE of Pennsylvania. I will say to the gentleman that I have, and to me, as a patriotic American, it seems lamentable that we should have abandoned so available a property for use if emergency required it. But I wanted to ask the gentleman this:

The Pensacola yard, apart from that at New Orleans, is the only yard that we have in any way protecting, or prepared to protect, in the matter of construction and repair in the Gulf region, the vessels of the United States in the event of war. Does not the gentleman think we ought to have some naval base along that great Gulf coast line?

Mr. WITHERSPOON. Well, I will state, in answer to that, that the experts who appeared before the Committee on Naval Affairs have advised us of the possibility or probability in case of war that the seat of war will be in the Caribbean Sea.

Mr. MOORE of Pennsylvania. Yes.

Mr. WITHERSPOON. Wait a moment; and it does seem to me as though we ought to have a great navy yard there close to the seat of war. But I am a mere Congressman; I am not an expert on such matters; and the point I make is that I am not willing to act upon what seems to me to be best, but I insist that the Committee on Naval Affairs, if it ever does do its duty, will find out what is the best thing to do and do it before we waste any more money upon these navy yards.

Now, again I will illustrate the same thing. We have a navy yard at Mare Island, Cal. It has been demonstrated before the Committee on Naval Affairs that that navy yard is useless; that it is valueless; that the $12,000,000 that we have squandered there amounts to nothing, because the water is so shallow that you can not get your warships to it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOSTER. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. The gentleman from Illinois [Mr. FOSTER] asks unanimous consent that the gentleman from Mississippi [Mr. WITHERSPOON] shall have five minutes more. Is there objection?

Mr. ROBERTS of Massachusetts. Mr. Chairman, before the question is acted upon, I would like to have a little understanding on this matter. I have no objection personally to the gentleman from Mississippi going on for an hour or more, provided there will be no objection coming from the other side to the requests of those who want to take an equal amount of time to answer his arguments. We shall make no motion here to close the debate.

Mr. WITHERSPOON. And I shall not go on for an hour, either.

Mr. PADGETT. I want to say, Mr. Chairman, that I am going to make a motion to close debate in 15 minutes.

Mr. MURRAY. Mr. Chairman, I hope the gentleman will not do that until some of us have had an opportunity to discuss these paragraphs.

Mr. MANN. Mr. Chairman, could we not reach some agreement or arrangement about debate? Of course this is the first paragraph of a series of paragraphs covering navy yards. Gentlemen are discussing the whole subject apropos to this first paragraph. I have no idea that they will desire to renew the discussion in full on each paragraph. I would like to know what can be done in regard to the extension of time.

Mr. PADGETT. I will agree to 20 minutes' debate.

Mr. MURRAY. Mr. Chairman, I do not know what the disposition of my colleague [Mr. ROBERTS] is in regard to time, whether he wants 15 minutes or more, but I want 10 minutes myself, because this is a matter of vital concern, not so much to me as to my people, and I move, therefore, Mr. Chairman, that the debate on all the items——

Mr. MANN. We had better reach an agreement or understanding, because, of course, if you cut off debate on this item it will not be ended unless you have some understanding as to the other items, too.

Mr. MURRAY. I suggest that debate be extended on all items up to line 8 of page 27, to the item concerning the naval station at Guam; that it shall be understood to include all the items from line 18, page 23, to lines 8 and 9, page 27.

Mr. MANN. You can not do that.

Mr. SISSON. That is too much, Mr. Chairman. Take it to line 16 of page 24.

Mr. MANN. If you have full debate on this item gentlemen will not object when the chairman of the Committee on Naval Affairs moves to close debate on the other items after a little debate runs, according to the understanding arrived at.

Mr. MOORE of Pennsylvania. Mr. Chairman, has action been had on the request for unanimous consent?

The CHAIRMAN. It has not.

Mr. BATHRICK. Is it the intention to close debate on specific amendments?

Mr. MANN. Oh, not at all. It is just to reach an understanding that the debate will be had now, and not extended over each of the separate items.

Mr. BATHRICK. The debate on the question as to whether we should close the navy yards or not, and where?

Mr. MANN. Yes.

Mr. BATHRICK. I agree to that.

Mr. PADGETT. Well, Mr. Chairman, we will let the debate run a while. Let the gentleman from Mississippi [Mr. WITHERSPOON] proceed.

Mr. MANN. I ask unanimous consent, Mr. Chairman, that the gentleman from Mississippi [Mr. WITHERSPOON] have 10 minutes' time.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. WITHERSPOON. Mr. Chairman, I was proceeding to illustrate to the House the folly of spending money in a place where it would not be useful, and I was proceeding to illustrate it by Mare Island. It has developed before the committee that that great navy yard, upon which we have spent $12,000,000, is now practically useless because the water is so shallow that you can not get your battleships to it.

Mr. KNOWLAND. Will the gentleman yield?

Mr. WITHERSPOON. In just a minute I will yield. Now, in view of that fact, we have pending before the Naval Affairs Committee a proposition from some corporation to provide a dry dock about 30 miles from Mare Island to which we can take battleships to be repaired. We are considering that very proposition now, and the committee, not having time to go into it fully, decided to postpone it until the extra session of Congress. In consideration of that I have heard members of the naval committee, Republicans too, say, "I am willing to vote to close up and abandon Mare Island Navy Yard right now."

That is the kind of folly that we have been guilty of—spending money and finding out after the money was squandered that it ought not to have been spent. We have done that in other cases.

Some years ago, Mr. Chairman, these advocates of the expenditure and waste of the people's money conceived the idea that we did not need battleships so much as we needed armored cruisers, and so we started out on the new policy of building armored cruisers. We continued that policy, I believe, for about 8 or 10 years and built 11 armored cruisers, costing the American people $66,000,000. But after we had squandered and wasted the money we suddenly discovered that we did not need armored cruisers, but we did need more battleships, and so we abandoned that policy and have not built any for many years.

Mr. MURRAY. Will the gentleman yield?

Mr. WITHERSPOON. Yes.

Mr. MURRAY. There is no analogy between that proposition and this case. You are going to build a new navy yard as fast as you discontinue this, and it is going to cost fifty or a hundred million dollars.

Mr. WITHERSPOON. So far as analogy is concerned, I know sometimes a thing can exist when you do not discover it.

Mr. MURRAY. How much is it going to cost to establish the Narragansett naval base?

Mr. WITHERSPOON. The gentleman from Massachusetts does not understand my position. I speak from ignorance. I say I do not know, and the Naval Affairs Committee has been so absorbed in the great scheme of building battleships that it has not taken time to find out, and my position is that we ought not to squander the money until we do find out.

Mr. MURRAY. Those of us who know the gentleman give him more credit for intelligence than he is willing to give himself.

Mr. WITHERSPOON. I have a great many kind and generous friends.

Mr. MURRAY. And I hope I am one of them.

Mr. WITHERSPOON. I count the gentleman as one of the very best. Now, Mr. Chairman, it may be that there are strategic reasons, it may be that there are military considerations, which make it necessary that we should keep this navy yard at Portsmouth. If any such exist, the Naval Affairs Committee did not try to find it out, and I do not know, but I do say that as long as those that are in a position to know are telling us that these navy yards, all except two or three, ought to be abandoned, we ought to say that we will quit spending money on them until we determine that question.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. WITHERSPOON. Yes.

Mr. MOORE of Pennsylvania. There are more navy yards along the Atlantic coast than on any other coast. Is it not due largely to the fact that the population centered there, that the necessities of the Navy were there, and that to-day along the Atlantic coast is centered east of the Appalachian Range about one-third of the entire population of the country? Is it not natural that these yards should have been established there, and is it not natural that they should remain where the population is so congested as it is to-day and where labor and material is at hand?

Mr. WITHERSPOON. If the gentleman wants my opinion about it, there is plenty of labor and material on the coast of the Gulf of Mexico, and I expect there is a plenty on the Pacific coast. My answer to the gentleman's question is that, in my judgment, in the whole history of the American Navy, the adequacy and efficiency of the Navy and the economy of its administration and public defense have cut a small figure. It has been a matter of business to spend public funds in these places where it would do the most good politically. That is what I believe about it. [Applause.]

I found that on facts. I heard a member of the committee, when we were discussing the question of whether a certain appropriation ought to be withdrawn from a certain place where it was expended, tell how it would affect business there, how it would throw laborers out of employment, and he said it would be a shame to withdraw this appropriation under those circumstances and turn those people out of employment. Business, commercialism, greed, avarice! That is the cause of all this trouble, and if you would substitute American patriotism for it I submit we would have a more efficient Navy. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman from Mississippi [Mr. WITHERSPOON], who has just taken his seat, stated as a fact that the Secretary of the Navy—and I assume he means the present Secretary of the Navy because I shall refer before I am through to the recommendations of other Secretaries of the Navy—had recommended the closing up of the Portsmouth Navy Yard, that being the one now under consideration.

Mr. WITHERSPOON. Mr. Chairman, the gentleman does not quote me exactly right.

Mr. ROBERTS of Massachusetts. I would like to quote the gentleman correctly.

Mr. WITHERSPOON. If I used the word "recommended," I used it inaccurately. I did not mean to say that the Secretary of the Navy recommended to us that we should put anything of that kind in this bill.

Mr. ROBERTS of Massachusetts. That is not the point.

Mr. WITHERSPOON. But that he gave it to us as his opinion that Portsmouth and Boston and one other navy yard ought to be closed.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I challenge the accuracy of the statement, and I challenge the gentleman to point to any place in the records of the Naval Committee where such a statement appears.

Mr. WITHERSPOON. Let me ask the gentleman a question.

Mr. ROBERTS of Massachusetts. The gentleman from Texas [Mr. GREGG] made substantially the same statement—if the gentleman will pardon me a moment I think I can state a little later just how far that subject has gone and how far it had approval or disapproval.

Mr. WITHERSPOON. I would like to ask the gentleman a question. Has the gentleman read the testimony of the Secretary of the Navy through?

Mr. ROBERTS of Massachusetts. Oh, yes; this year and last year and in prior years.

Mr. WITHERSPOON. The gentleman will excuse me. I asked him a question. Has he read through the testimony of the Secretary of the Navy from beginning to end, and will he state that it is not in there?

Mr. ROBERTS of Massachusetts. Mr. Chairman, my recollection is that I heard all of that testimony, and was present when it was given. I do not have to read it to know what he said.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of Massachusetts. Oh——

The CHAIRMAN. The gentleman declines to yield.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I do not decline to yield if I can be given time. I do not wish to be discourteous, but I wish Members to understand that I have only five minutes, and if my time is to be taken in answering questions, I desire the privilege of extension in order that I may say what I have in my mind. With that understanding, I will yield. The gentleman from Texas [Mr. GREGG] made substantially the same statement, carrying the impression that the Secretary of the Navy has given the sanction of his great office to the closing of these yards and the establishment of another one. Another gentleman from Texas reiterated that statement, and when it was challenged, said that he had it from a gentleman in whose word he placed as much reliance as he did in that of the gentleman now speaking. I challenge it right from beginning to end. The gentleman from Mississippi [Mr. WITHERSPOON] says it is not necessary to point out where the Secretary of the Navy said that. The gentleman from Mississippi is too good a lawyer to believe that such a thing as that would go anywhere before intelligent men. When a statement is challenged, that statement being claimed to be based on another person's statement, it is up to the person whose word is challenged to point out where that statement was made, and the language in which it was made.

Mr. WITHERSPOON. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of Massachusetts. Yes.

Mr. WITHERSPOON. Did the gentleman from Massachusetts understand me to say that there was any such statement in the printed hearings or that the Secretary made the statement?

Mr. ROBERTS of Massachusetts. Mr. Chairman, while the gentleman from Mississippi was talking and ostensibly quoting the Secretary of the Navy, the gentleman from Massachusetts [Mr. MURRAY] upon that side challenged the statement and asked the gentleman from Mississippi to point it out, and the gentleman from Mississippi said it was not necessary for him to point out that statement.

Mr. WITHERSPOON. But I asked the gentleman a question.

Mr. ROBERTS of Massachusetts. I do understand the gentleman from Mississippi to be quoting the Secretary of the Navy.

Mr. WITHERSPOON. But the gentleman evades the question.

Mr. ROBERTS of Massachusetts. And to say that he can not point to those statements in any official record.

Mr. WITHERSPOON. But the gentleman evades the question. Did the gentleman understand me to say that there was any such statement in the printed hearings?

Mr. ROBERTS of Massachusetts. No; I did not understand him to say it was in the printed hearings. What I did understand the gentleman to say was that the Secretary of the Navy had so stated.

Mr. WITHERSPOON. I want to ask the gentleman another question.

Mr. ROBERTS of Massachusetts. The gentleman was asked where and under what conditions the Secretary had made that statement, and he said it was not necessary to state where and under what conditions.

Mr. WITHERSPOON. Will the gentleman yield for a question?

Mr. ROBERTS of Massachusetts. I will.

Mr. WITHERSPOON. Will not the gentleman admit to this committee that when the hearings are typed off that they are sent to the Navy Department and they tell us there that they frequently erase things which were said in the hearings?

Mr. ROBERTS of Massachusetts. Oh, that is done.

Mr. WITHERSPOON. I want to make myself clear. I have not read the hearing of Secretary Meyer through from beginning to end to see whether that statement is in there or not, but I merely wish to be understood as asserting that I heard

him say so there, and I give the committee the benefit of my assertion that he did say it.

Mr. ROBERTS of Massachusetts. Well, now, Mr. Chairman, the Secretary of the Navy was questioned in the committee last year on this very proposition, and he was asked point-blank if he had any recommendations to make on the proposition of selling these yards and building a new one, and he said he had not; and he reiterated the same statement this year—that he has no recommendation to make. That is the point I want to bring out, that all this talk about discontinuance of certain navy yards grows out of the action of a board of the Navy Department.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ROBERTS of Massachusetts. All this talk about closing navy yards grows out of a tentative report made to the Secretary of the Navy by a board of naval officers, and the Secretary of the Navy has not yet given his sanction to that plan. It is a mere subterfuge seized upon by those who are posing as economists on this naval appropriation bill to throw dust in the eyes of the members of this committee to cripple not only the navy yards, but the effectiveness of our fleet by cutting out the appropriations necessary for the upkeep of that fleet when it comes to our navy yards for necessary repairs.

Now, I want to say a few words about the closing up of navy yards. There was a Secretary of the Navy who did recommend that the Portsmouth and Boston yards be closed. That was William E. Chandler, away back in the eighties, and under his administration as Secretary of the Navy those yards were substantially closed, and since then they have been reopened and adapted to the modern ships of war that have been built, and this Government has expended millions of dollars in dry docks, in buildings, in machinery, in everything that goes into the upkeep of a navy yard qualified from its equipment to handle vessels of war when they come in for repairs, and from the day of William E. Chandler down to the present time, I assert it again, no Secretary of the Navy has officially recommended either the closing up of the Portsmouth or the Boston yards. The present Secretary of the Navy two or three years ago did recommend the closing of certain yards and naval stations, and if Members will refresh their recollection they will remember that the Committee on Naval Affairs reported in the bill providing for the closing and sale of certain naval stations—Sacketts Harbor, N. Y.; Pensacola; New Orleans; and I think there was one other in New York Harbor, but I am not sure about that. I want to say that when that proposition came before the House it went out on points of order, and the committee have never been able to get or induce Congress to close and sell a single naval station or navy yard. Now, the present Secretary of the Navy, finding it impossible to get Congress to take this action on certain useless yards and stations, has exercised the power which he has as Secretary of the Navy to substantially, as the gentleman from Mississippi says, abandon certain yards. The gentleman from Mississippi did not use his words advisedly. The Navy Department has not abandoned the New Orleans station; it has not abandoned the Pensacola yard. Those yards are practically closed, but they are in the possession and care and control of the Navy Department. They are not active yards. The Secretary of the Navy, if he believes and has stated that Portsmouth should be closed, had it in his power to close it as tight as New Orleans or Portsmouth simply by diverting work from it.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MURRAY. I ask unanimous consent that my colleague may proceed for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts? [After a pause.] The Chair hears none.

Mr. ROBERTS of Massachusetts. Mr. Chairman, in regard to the policy that certain Members of the Naval Committee and of this House seem to be bent upon following, taking these navy yards and naval stations one by one and moving to cut out every item for their maintenance and upkeep, I want to say simply this: The argument they have advanced as the basis of their policy is not a true and correct statement of the attitude of the Navy Department to-day as based on official reports and official statements as to what the department thinks should be done with certain yards. This question of closing navy yards has been to the fore ever since I have been here in this body, and that is now 14 years, and the nearest approach we have ever had to the closing of any yard has been the recommendation carried in the naval bill to close two southern yards, which went out on points of order. I want to say to the members of this committee that it would be the blindest and stupidest sort of economy to cut off appropriations for the live, active navy yards of this country because, forsooth, at some time in the dim and distant future those yards may be closed and the money we put into them now wasted.

I want to say, furthermore, that the subcommittee of the Committee on Naval Affairs which drew up this bill wrestled for days and days with each and all of the individual items connected with the upkeep of these yards, and what the committee has reported to this House is the result of the closest scrutiny and the most rigid economy that the members of that committee felt could be practiced and yet keep those yards in condition to meet the requirements of the Navy. And, if we have the welfare of the American Navy at heart, whether we are to close one or more or all of our navy yards and build new ones, we must in the meantime, until such a policy is adopted and the work actually carried out, and the new yards established and the old closed, keep up our active yards to the utmost efficiency. Otherwise our fleet will rapidly deteriorate. It will rapidly go to pieces, and will quickly be in a position where it will be utterly and absolutely useless to us should it be called on in an emergency.

And we, as American citizens and as legislators representing the best interests and the dignity and the honor of this country, can not afford to cripple our Navy by any such shortsighted policy as that. [Applause.]

Mr. MURRAY. Mr. Chairman, it is an error frequently made that the Secretary of the Navy [Mr. Meyer] is entirely in favor at the present time of the closing up of the navy yards at Portsmouth, Boston, and New York, but the fact is that, frequently as that error is made, the Secretary of the Navy never has written any further than to say that the recommendations of the Army and Navy General Board were worthy of entire consideration by everybody who was interested in that great matter.

Mr. Chairman, so frequently is this error made, that in a speech yesterday in this committee, without careful accuracy, I announced that over a year ago, the Secretary said he was opposed to further activities at the Boston Navy Yard and when I made that statement I was telling the truth. But it also is true that in his official recommendation the Secretary of the Navy has never gone any further than to say that this matter ought to be carefully studied and that men ought to give it their attention. I shall print in the RECORD, if I may, the statement by Secretary Meyer, in response to the question of the chairman of the Committee on Naval Affairs, when he appeared before that committee on February 26, 1912, and shall print, without objection, two pages of his testimony, pages 709 and 710, from the hearings before the committee.

Briefly stated, Mr. Chairman, his statements are that we have something like $55,000,000 to $60,000,000 invested in the three navy yards at Portsmouth, Boston, and New York, and I shall print further in the RECORD a detailed appendix, which the Secretary submitted to that committee, showing that the total cost of the land, and so forth, at Portsmouth was rising $18,000,000, that the total cost in Boston was rising $30,000,000, and the total cost in New York was rising $57,000,000; and if the proposition advanced by my distinguished colleague from Texas [Mr. GREGG] and by the gentleman from Mississippi [Mr. WITHERSPOON], whom I admire as much as I admire any man in this House, should prevail, that proposition means the abandonment of navy yards that have cost more than $105,000,000; that they can not bring, so far as anybody can see, anything like the amount of the original cost and investment; and a further expenditure of from $50,000,000 to $100,000,000 for the establishment of a naval base at Narragansett Bay. And yet these men who advocate this proposition pose as economists. Mr. Chairman, let me show the members of this committee that the only reason the Secretary of the Navy is not entirely on record in favor of this proposition is that when it was first suggested men like my colleague [Mr. ROBERTS], who is a member of this committee, like the distinguished Senator elect from Massachusetts [Mr. WEEKS], who himself has had naval experience, and some of the rest of us, went to the Navy Department and saw the Secretary and made an appeal to him, not on the grounds of local advantage, not on the grounds of local interest, but we made an argument to him on the grounds of economy. And by marshaling the facts and the figures that I have suggested here in this discussion we were able to show him that a Congress composed partly of a House that was elected on an economy program would never stand for the consideration of his proposition. Why, that is the reason that I urged it to the chairman of the committee, the distinguished

gentleman from Tennessee [Mr. PADGETT] when I first went to him to discuss the matter. I did not press my case, not even with my fellow citizen from Massachusetts, Secretary Meyer, on any ground of local interest, because I know that in his presence and in this presence such an appeal would have little, if any, consideration given to it. And if I could not present a better argument than local self-interest to this committee I should not while away the time of the House on this afternoon when time is of so much value in the consideration of this great measure.

Now, the facts are that we have three navy yards costing more than $125,000,000. The facts are that nobody can see more than $50,000,000 from the sale of those three yards and all the buildings and machinery that are in them. The facts are that the Secretary of the Navy is staggered at the probable cost of the new naval base that it is proposed to establish in Narragansett Bay, and that he himself is on record, inferentially at least, as pointing out that the establishment of that naval base means an expenditure of possibly $60,000,000.

It is all very well to criticize an item of $9,000 for the Portsmouth Navy Yard. It is all very well to criticize an item of $6,000 for the Portsmouth Navy Yard. It is all very well to criticize small items.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURRAY. Mr. Chairman, I make the same request for myself now that I made for somebody else a little while ago.

Mr. GREGG of Texas. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MURRAY. But, Mr. Chairman, you can not come to me with any plea of economy when the balancing of expenditures and receipts from your proposition will show a net outgo from the Treasury of the United States of rising $100,000,000.

Now, I have no reputation and no capacity for juggling these millions that gentlemen so lightly juggle, but I am able to add a column of three separate items, and I am able to verify the result that is set forth in the two books to which I referred. Mr. Chairman, we are supposed to be Representatives, but I sometimes wonder whether or not we do represent. I am trying to represent, just as I suppose and believe these gentlemen are trying to represent, not only the great general welfare, but also the interests of the particular district from which I come.

It is a tremendous problem for any man to conceive in his own mind what may be the fixed purposes and the definite hopes of all the people in more than 390 great congressional districts. I can not tell the committee what all the people of all these districts believe with respect to this matter, but I can say to you that when the announcement of the Army and Navy board was made, realizing the responsibility that rested upon me, as one Representative, to come into this House with definite information, I addressed a circular letter to every one of the 30,000 registered voters of the congressional district which I have the honor to represent.

And let me say to the Members here that of those 30,000 voters not more than 300 of them are employed in the Charlestown Navy Yard, and only a small proportion of them are at all dependent on the activities of that navy yard. My appeal was greater, then, than an appeal to any selfish class. My appeal was intended to be greater than such an appeal could be. It was intended to elicit a definite and clear expression of opinion that might be worth more than any original thought to which I might give expression.

I say to you, gentlemen, that, regardless of considerations of employment and similar considerations, the practically unanimous sentiment of the 5,000 replies I received was, with fewer exceptions than I could bear on the fingers of my two hands, entirely in favor of the retention of that navy yard and in favor of its development rather than for the curtailment of its activities and its industries.

Mr. Chairman, it is only a day or two ago that I received from residents of that congressional district an earnest plea and a wise suggestion that I try to have included in this bill an item appropriating $200,000 for the benefit of that navy yard, so that it might build any battleship which the United States might in future need. I believe it was a wise request. I believe it would be a wise economy to include the item in this bill. But I know the temper of the times, as I know something of the rules of this body, and I know that it would be sheer demagogy and a grand-stand play to the folks at home to attempt to have any such item included in the bill at this time.

I have frankly stated that, because of the considerations mentioned I should not ask this committee to include that item. But I sincerely believe it might well be included, and I honestly say that my judgment is it would eventually result in a saving of many times $200,000.

It is a notorious fact, discussed frequently by my friends who are described as economists, that it costs considerably more to build a battleship for the United States of America than it costs to build one for Great Britain or Germany.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. MURRAY. I ask unanimous consent for three minutes more.

Mr. POWERS. Reserving the right to object, Mr. Chairman, I want to say that I will not object to this, but hereafter I shall object to any extension of the five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MURRAY. I thank the committee for its courtesy. My proposition is, as I gather it from the talk of the economists, that it costs 30 or 40 per cent more to build for the United State of America these battleships than it costs Great Britain and Germany. I do not know the reason for the increase of cost, but my friends insist that the reason is because men in Great Britain and Germany glory in an opportunity to serve their Government; while men here in the United States, built in a different mold, fashioned in a different sort of civic spirit, believe it is wise and believe it is clever to soak the Government whenever they get a chance.

I accept the analysis that these economists give to me; and I say to them publicly here, as I have said to as many of them as I could talk to privately, that if their analysis is sound it seems to me that the wise thing to do is to keep our navy yards, particularly since we have a tremendous amount of money invested in them, so that these navy yards under the supervision of men trained at the Naval Academy for service, dedicated to their country, may be able to turn out these ships at considerably less cost than that for which they are now being built for the Government of the United States.

I know that men may say the Government building experiment was tried a few years ago, when the *Florida* was built in the New York yard and the *Utah* in a private shipbuilding yard. I know men may point to the fact that the showing made by the Government construction was considerably larger than the cost to the Government and to the contractors of the ship that was built in the private yard. But gentlemen forget when they urge this thought upon me that in those days the private shipbuilders were permitted to work their employees 9, 10, and even 12 hours a day, because there was not then the requirement that has since been written into the laws that for work being done, not only by the Government but also for it, contractors shall not be permitted to work their employees more than 8 hours in any given day.

I do not know how large an item of expense the labor cost was, but I do know that in a work of that great magnitude the labor cost must have a large relation to the total amount. [Applause.]

As an extension of my remarks, I append the following extract from Secretary Meyer's statement at the hearings:

The CHAIRMAN. Just make fully whatever suggestions you have to the committee.

Secretary MEYER. I made a recommendation to the committee a year ago, recommending the abolition of certain yards, because, with the Navy constituted as it is now, with a battleship fleet of 21 (including new and old type vessels), there was no longer a necessity for those stations, and I showed that if we abolished all those mentioned in my recommendation it would mean a saving of about $1,500,000 a year in maintenance, etc. After that, I studied the problems on the Atlantic coast from Charleston to Portsmouth and put the matter up to the General Board of the Navy, and after they had given me their opinions I further assigned it to the Joint Army and Navy Board for consideration, because a naval station is not a fortified station.

Quite the contrary, it rather invites attack to the harbor in which it is located and has no means of defense. Therefore, it would devolve upon the Army to defend that station in case of war. The Joint Army and Navy Board reported that the ideal plan for the Navy would be to have two great naval bases on the Atlantic coast in harbors which would receive and could maintain the entire fleet and its auxiliaries.

Mr. GREGG. Did they designate the places?

Secretary MEYER. Yes, sir; I will come to that. They further reported that Philadelphia, on account of its fresh-water basin, was valuable to retain as a station for the reserve fleet and for its maintenance there, because of the labor market and because the station was already there. While the station at Charleston, S. C., should never have been built originally, nevertheless, as it is already there, we can make use of it as a torpedo base. At Key West is a station for torpedo vessels, not an extensive naval base but merely as an adjunct to Guantanamo for the protection of the Gulf of Mexico. It supplements Guantanamo as a naval station, and the torpedo vessels can protect the entrance to the Gulf of Mexico from this point.

Then came the question of the best locations, according to the views of the Joint Army and Navy Board, as to two naval bases which would receive and maintain the fleet. It appeared self-evident that the only two places which could receive the fleet and all the auxiliaries, with harbors and anchorage sufficient for such purposes, were Hampton Roads, where we have the Norfolk Navy Yard, and Narragansett Bay, where there is

a large protected harbor with two exits and possibilities such as the Joint Army and Navy Board require.

The CHAIRMAN. What are the climatic conditions as to frozen water at Narragansett?

Secretary MEYER. Absolutely favorable. It is south of Cape Cod. The harbor is always open. Therefore, the question for me to consider was what was feasible, and whether it was possible to finally recommend the abolition of the Portsmouth, Boston, and New York yards, and in their place center a naval base in Narragansett Bay.

I am not prepared, as yet, to make a recommendation, for the reason that we are still studying and investigating. It requires a great deal of thought and consideration from many points of view. There has been a tentative plan made which would give us two docks 1,000 feet long, two docks 650 feet long, which would take in any battleship or *Dreadnought* up to the present time, and two small docks suitable for gunboats and destroyers, making six docks in all, and berthing space for 12 to 16 ships.

The CHAIRMAN. That is at Narragansett Bay?

Secretary MEYER. Yes, sir. There would be shops for Construction and Repair, and for Steam Engineering, and everything necessary for an up-to-date efficient navy yard. The questions that I have to solve are these: Whether that could be done without expense to the Government. That is, whether the proceeds from the sale of those three yards would be sufficient to pay for the reestablishment of a naval base necessary to the Navy's requirements at Narragansett Bay.

That is one of the problems. Second, before we commit ourselves, it is necessary to study the locality and see whether it is feasible and practicable; and third, to see whether it can be done within the estimates. It has been estimated that those three yards will bring from $24,000,000 to $25,000,000. We have tentative plans of what can be done at Narragansett Bay for $24,000,000 to $25,000,000, but it is necessary to make soundings. It is necessary for us to ascertain if it can be done. We do not propose to commit ourselves to something and find that it will cost double what we anticipated. Therefore, I am temporarily reporting this to the committee as I have always endeavored to do, in order that they may know what the department is considering. Until the engineers have thoroughly studied the locality, until they have made their soundings, and until they have tentative estimates of the cost which would be sufficiently definite to authorize a recommendation, I can not say anything further at the present time to the committee.

The CHAIRMAN. What has the Government expended on the three yards which it is proposed to sell for $24,000,000 or $25,000,000?

Secretary MEYER. About $55,000,000.

Mr. GREGG. What is contemplated at Guantanamo?

Secretary MEYER. Guantanamo is the natural naval base for the Caribbean Sea. It is the locality where we send the fleet every winter. It has a wonderful harbor, drilling grounds, rifle ranges, and climatic advantages in winter. It is only 700 miles from the Panama Canal. It is a protection for the Gulf of Mexico, and with the fleet at Guantanamo the Gulf of Mexico is absolutely secure.

Statement showing date of establishment; original cost of site; expenditures for buildings, public works, and improvements; machinery installed in the various buildings; and cost of maintenance of the several navy yards and stations to June 30, 1910; also the average yearly cost of maintenance for five years.

Stations.	Date of establishment.	Original cost of site.	Total expenditures for buildings, public works, and improvements, and machinery installed in the various buildings.	Total maintenance, including repairs.	Total cost of land, public works, improvements, machinery, and maintenance, including repairs.	Average yearly cost of maintenance for five years.

Mr. POWERS. Mr. Chairman, I move that all debate on the paragraph and amendments thereto close in 10 minutes.

Mr. GREEN of Iowa. I shall not object, if I can have five minutes.

The CHAIRMAN. The gentleman from Kentucky moves that all debate on the pending paragraph and amendments close in 10 minutes.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. GREGG].

Mr. GREEN of Iowa. Mr. Chairman, I have been trying to get recognition.

The CHAIRMAN. The Chair will recognize the gentleman from Iowa.

Mr. GREEN of Iowa. Mr. Chairman, I was greatly edified last evening in hearing the distinguished gentleman from Mississippi [Mr. SISSON] so eloquently and forcibly contrast the promises made before election by the Democratic Party with the utter absence of any fulfillment since that time. When I heard the gentleman in such scathing terms denounce the proceedings which have been conducted here by Members of his own party, I said, "Yea, here is a very Daniel come to judgment." I thought, then, the gentleman would proceed to separate the sheep from the goats and that we would finally understand who was responsible for the wasteful squandering of the money of the people which he described, but the gentleman at the close of his remarks contented himself with throwing some boquets at the Naval Committee. Then I listened a little further on with great interest to the remarks of the gentleman from Illinois [Mr. FOWLER] with reference to the dire consequences that were to happen to the gentlemen on that side who refused to support the policy of economy which he was advocat-

ing, and, as I understood him, in the next election they would surely be cast out into outer darkness, where there would be weeping and gnashing of teeth. I agree with him as to the casting out part, which I think the Nation will attend to in due time, when it has the opportunity; but I did sincerely hope that all of the serious physical disability which he then predicted would happen to those gentlemen would not come to pass, as so many of them are my good friends, and I feel so kindly toward them. Still I did not learn who was responsible for this wasteful expenditure until finally the gentleman from Massachusetts [Mr. CURLEY] rose to explain why this is being done here, and he said it was all owing, as I understood him, to the bad Republicans who were in charge of the departments, who were recommending that these enormous amounts be appropriated. But here we have to-day something that goes very much to the contrary.

The Naval Department—every naval expert that I or any other gentleman has ever heard of—has condemned appropriations for the Portsmouth Navy Yard. How long, O Lord, how long are we going to continue to appropriate money for the construction and maintenance and upkeep of navy yards to which our larger vessels and most of our smaller vessels can not approach on account of the water? We might as well have a navy yard, so far as practical usefulness is concerned, out on some duck pond in my own State. Why should we talk here at this time about the cost of a naval base at Narragansett Bay or some other place? What difference does that make? If this navy yard at Portsmouth is useless and is condemned as such by all naval experts, what difference will it ever make with respect to the construction of a new one? If it is necessary to have one constructed out of the public funds, then let it be constructed; if it is not necessary, the board of naval experts will not recommend it. This is the condition in which we find ourselves today, and I hope these appropriations will go out of the bill. It has long been a stench in the nostrils of the American people that for political reasons we establish and maintain naval stations in places like this. The time has come to stop it. The people are demanding and are earnestly expecting that blots like this upon our legislation will be wiped out, and I hope that the time has now come. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. GREGG].

The question was taken; and on a division (demanded by Mr. PADGETT) there were—ayes 51, noes 53.

Mr. GREGG of Texas. Mr. Chairman, I demand tellers.

Tellers were ordered.

The Chair appointed Mr. GREGG of Texas and Mr. ROBERTS of Massachusetts to act as tellers.

The committee again divided; and the tellers reported—ayes 63, noes 70.

So the amendment was rejected.

Mr. GREGG of Texas. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 23, lines 20 and 21, strike out the words and figures "garbage crematory, $6,000."

Mr. GREGG of Texas. Mr. Chairman, an argument on the discussion of the amendment which has just been rejected was made by several gentlemen which is very misleading. They tried to create the impression by their argument that these amendments will destroy the efficiency of these navy yards. That is absolutely untrue. There is a provision in the bill for making all the necessary repairs and the upkeep of every single one of these navy yards, and we are not attempting to strike out that provision. This is simply objecting to the addition of new buildings on these yards. They will, under the provisions of this bill, be amply provided for and be efficiently maintained as going concerns. Every particle of repair work, every particle of building work that the Navy needs will be continued just the same. Not one part of it will be stopped. These will be maintained as adequate, efficient yards for all repair purposes and all work purposes. Be not misled. We are simply trying, while the question is up as to whether any of these yards shall be abandoned, to prevent the building of more expensive buildings upon them. In addition to all that, if they are kept up as efficient yards, why can we not cut out these provisions? They are not necessary for the efficiency of the yards. We can reduce this bill; we can reduce expenses independently of whether these yards are going to be abandoned or not. They can get along and do the work they have been doing without these appropriations. Why not, then, let us cut them out and wait, and if it is advisable to do it later appropriate for them at that time?

Mr. MANN. Will the gentleman yield for a question?

Mr. GREGG of Texas. Yes.

Mr. MANN. Was there generally any need of a garbage crematory at this place?

Mr. GREGG of Texas. Oh, it is desirable. All of this is desirable, and it is like in our private business around our homes—there are a great many things desirable we would like to have which we do not have.

Mr. MANN. Is not the trend now, even in private homes, to have some method of properly disposing of garbage instead of throwing it in the street or back yards?

Mr. GREGG of Texas. It is desirable; I do not deny that. All this is desirable, but they can get along without it, and have gotten along without it for years.

Mr. MANN. I did not know but the proposition might be to throw the navy yards on the garbage heap and burn them up.

Mr. GREGG of Texas. I expect for some of them it would be a matter of economy to do it. Now, gentlemen, I simply ask you, do not be misled. We are not crippling the working efficiency of a single navy yard in America—not one. They can all do their work. We are simply trying to stop the addition to buildings and the expenses growing out of that. [Cries of "Vote!"]

Mr. SISSON. Mr. Chairman, the gentleman from Iowa a moment ago wanted to know why it was we have had so much extravagance and referred to a statement I made on yesterday. Judge SAUNDERS took occasion to count the Democrats who went through the tellers in the effort to economize. I do not believe that there were more than 15 Democrats who went through the tellers in support of the committee, in the effort to cut out this useless expenditure of money until we can ascertain whether or not these are going to be retained, and there were 70 votes on that side, therefore there were 55 Republicans who went through the tellers in favor of extravagance——

Mr. MADDEN. Sixty-five and 15 make more than 70, does it not?

Mr. SISSON. Fifty-five Republicans went through the tellers. Well, I will say this, there were seven or eight Republicans over there who were honestly endeavoring to do their duty here; I will say that to the gentleman from Illinois. Now, my criticism is one of extravagance, irrespective of whether the extravagance applies to the Democratic membership of this House or to the Republican membership of this House. Nor do I intend in stating in reference to the Naval Committee to single that committee out, but at the other end of the Capitol there happens to be a body that now belongs to the gentleman's political faith, and they will add all the way from $35,000,000 to $40,000,000 to the Indian appropriation bill when it comes into the House, so the chairman informs me, which is just about double what it was when it left the House; $8,000,000 or $9,000,000 has been added to the river and harbor and the public buildings bill has been doubled at the other end of the Capitol, and if these increases are to be sustained by this Democratic House, I repeat that it is about time that the Democrats should take notice of the fact that Mr. Wilson will inevitably be confronted with a deficit in the Treasury unless they find some new method of taxation. They have one method now, and that is to raise an income tax, but they will be compelled, if these increases made at the other end of the Capitol are agreed to, to raise about $200,000,000 to prevent a deficit occurring. And another thing I want to say to this committee: These authorizations in this bill and in other bills we have passed will necessitate the next Democratic Congress taking care of them by spending more money than they now carry on the face of this bill, and I want to call the attention of Democrats to these items in this bill, and when these bills come from the other end of the Capitol it is up to the Democrats to make good their pledges to the American people, and, so far as I am individually concerned, I would rather these bills would die and let the next Democratic House, under a Democratic administration, take care of it. I hope I have made myself plain now to the gentleman from Iowa. [Applause.]

Mr. MANN. Mr. Chairman, the item upon which we just voted carried two provisions. One was to fit up a room for the storage of a crane, which I think nearly everybody admits is necessary, and the other was for a garbage crematory. The gentleman from Mississippi called attention to the fact that nearly all the Democrats voted against the item, which was really a vote against the garbage crematory. That is perfectly natural. This side believes in cleanliness, believes in a proper disposal of garbage. That side of the House does not appreciate the value of cleanliness or the proper disposal of garbage. They are opposed to burning garbage; they believe in throwing it upon a garbage heap in the back yard.

Mr. WITHERSPOON. Will the gentleman yield?

Mr. MANN. Certainly I yield to my distinguished friend from Mississippi, who is opposed to the garbage crematory.

Mr. WITHERSPOON. I would like to ask the gentleman from Illinois if it is a fact, as he states it, that the Republicans are so much in favor of what is clean why have they permitted for the last 50 years this garbage to stay there in an unclean state?

Mr. MANN. Why, Mr. Chairman, with the advance of civilization, with the advance of the promotion of cleanliness, we have come to learn in this country that it is necessary and desirable to burn the garbage. But you will learn it after you die, where they have places to burn. [Laughter.]

Mr. HAMILTON of Michigan. Where?

Mr. MANN. Well, where there are facilities. [Laughter.]

Mr. WITHERSPOON. The gentleman means that we will learn it after the Republican Party is dead, does he not?

Mr. MANN. No; because the Republican Party will not die. The gentleman need not worry about that. You are proving on that side of the House that you are not fit to live. [Laughter.] The gentleman from Mississippi [Mr. SISSON] says there are 63 who voted against the proposition, and most of them were Democrats; and then he seeks to avoid the responsibility. Where are the other 150 Democrats of this House? The gentleman has two hundred and thirty odd Members, or about that, and 63 of them, with 8 or 10 Republicans, voted against the proposition; and then he seeks to avoid the responsibility. If you wish to economize you may economize, but you can not charge this side of the House with the responsibility of legislation at this session. God forbid that we are responsible for the miserable manner in which you are conducting the public business. [Laughter.]

Mr. SISSON. If the gentleman from Illinois [Mr. MANN] will permit, I say, without hesitation, that the gentleman's question is a very pertinent one. [Laughter.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. GREGG].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GREGG of Texas. Division, Mr. Chairman.

The committee divided; and there were—ayes 56, noes 68.

Mr. GREGG of Texas. Tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] and the gentleman from Texas [Mr. GREGG] will take their places as tellers.

While the vote was being taken,

Mr. RODDENBERY. A parliamentary inquiry, Mr. Chairman. Will it be proper to take the vote by tellers until first a vote has been taken by the committee to determine whether or not tellers are ordered by a sufficient number?

The CHAIRMAN. The Chair omitted that.

Mr. RODDENBERY. It will not affect the vote in any way?

The CHAIRMAN. Oh, no.

The tellers reported—ayes 49, noes 73.

So the amendment was rejected.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. FOSTER having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On February 18, 1913:

H. R. 24121. An act to pay certain employees of the Government for injuries received while in the discharge of their duties, and other claims.

On February 19, 1913:

H. R. 14053. An act to increase the pensions of surviving soldiers of Indian wars in certain cases.

On February 21, 1913:

H. R. 19191. An act for the relief of Christian Hedges; and

H. R. 22939. An act for the relief of John K. Wren.

On February 25, 1913:

H. R. 17260. An act to amend an act entitled "An act to establish in the Department of the Interior a bureau of mines," approved May 16, 1910;

H. R. 16127. An act for the relief of William Kaiser; and

H. R. 21220. An act to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor.

On February 25, 1913:

H. R. 20648. An act for the relief of David Crowther;

H. R. 2839. An act for the relief of William Hommelsberg; and

H. R. 3957. An act for the relief of Isaac Thompson.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Navy yard, Boston, Mass.: Paving, to continue, $15,000; electrical system, extension, $5,000; railroad system, extension and equipment, $10,000; fireproofing of pattern shop, $22,000; remodeling building No. 40, $12,000; remodeling building No. 77 for boat storage, $15,000; power-plant improvements, $3,900; dredging, to continue, $10,000; sewers and drains, $3,600; moving boiler shop from building No. 42 to building No. 106, including necessary modifications in buildings, $25,000; additional oil storage, $5,000; extension to yard dispensary, $2,800; in all, navy yard, Boston, $129,300.

Mr. GREGG of Texas. Mr. Chairman, I move to strike out, in line 22, page 23, the words "paving, to continue, $15,000."

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 23, by striking out, in lines 22 and 23, the words: "Paving, to continue, $15,000."

Mr. CURLEY. Mr. Chairman, I would like to ask the gentleman a question. I would like to know if he is aware of how much money has already been expended there for paving of the yard to date?

Mr. GREGG of Texas. This is carried in all of these navy yards nearly every year. I do not know how much.

Mr. CURLEY. Do you know how long it has been carried?

Mr. GREGG of Texas. I could not tell you that, but ever since I have been here.

Mr. CURLEY. Then, you are not familiar with the item, are you?

Mr. GREGG of Texas. I am familiar with it, and know that they have been carrying this item repeatedly, and that they can do without the paving.

Mr. CURLEY. Is it 10 years or 20 years?

Mr. GREGG of Texas. I am unable to say.

Mr. CURLEY. I do not think it is fair to strike it out without knowing.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GREGG of Texas. Division, Mr. Chairman.

The committee divided, and there were—ayes 28, noes 56.

So the amendment was rejected.

Mr. WITHERSPOON. Mr. Chairman, I move to amend line 23, page 23, of the bill, by striking out the words "electrical system, extension, $5,000."

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 23, line 23, by striking out the words "electrical system, extension, $5,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. WITHERSPOON. Division, Mr. Chairman.

The committee divided, and there were—ayes 23, noes 66.

Mr. WITHERSPOON. Tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. PADGETT and Mr. GREGG of Texas.

The committee again divided; and the tellers reported—ayes 30, noes 78.

So the amendment was rejected.

Mr. WITHERSPOON. Mr. Chairman, I move to strike out the twenty-fourth line on page 23, which reads, "railroad system, extension and equipment, $10,000."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. WITHERSPOON].

The Clerk read as follows:

Amend, page 23, by striking out line 24.

Mr. WITHERSPOON. Mr. Chairman, this navy yard at Boston has existed for a long time. It has been doing its work, and it seems to have had sufficient facilities for transportation. The railroad that it already has has seemed to accomplish all necessary purposes, and here is a proposition to waste $10,000 in extending it.

I submit, Mr. Chairman, that this itself is a sufficient reason for striking this out of the bill, in addition to the fact, already disclosed to the House, that this navy yard may be abandoned. The Secretary of the Navy tells us that we need but three navy yards, and that the balance of them ought to be abandoned; yet here is a proposition to spend $10,000 in extending a railroad. I submit that it ought to be stricken out of the bill. [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. WITHERSPOON. A division, Mr. Chairman.

The committee divided; and there were—ayes 30, noes 45.

So the amendment was rejected.

Mr. WITHERSPOON. Mr. Chairman, I move to amend the bill by striking out the item on the first line of page 24, "fireproofing of pattern shop, $22,000."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. WITHERSPOON].

The Clerk read as follows:

Amend, page 24, by striking out, in line 1, the words "fireproofing of pattern shop, $22,000."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi.

The question was taken; and the Chairman announced that the noes seemed to have it.

Mr. WITHERSPOON. A division, Mr. Chairman.

The committee divided; and there were—ayes 34, noes 49.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. WITHERSPOON. Mr. Chairman, I move to strike out the item on the first and second lines of page 24, which reads, "remodeling building No. 40, $12,000."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi.

The Clerk read as follows:

Amend, by striking out, on page 24, lines 1 and 2, the words "remodeling building No. 40, $12,000."

Mr. WITHERSPOON. Mr. Chairman, here is a building that they already have, a building that has been used, a building that has answered every purpose. The proposition is to waste $12,000 to remodel it. It does seem to me as though the old building might last and serve every purpose until we determine whether we are going to need either the old one or the remodeled one. [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi.

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Navy yard, New York, N. Y.: Paving and grading, to continue, $15,000; yard railroad, extension and equipment, $25,000; dredging, to continue, $100,000, to be immediately available; improvement of water front, to continue, $100,000; raising freeboard of floating crane Hercules, $30,000; in all, navy yard, New York, N. Y., $270,000.

Mr. GREGG of Texas. Mr. Chairman, I move to strike out the paragraph.

Mr. FOSTER. Mr. Chairman, I make a point of order on the paragraph, on the words "to be immediately available."

The CHAIRMAN. Does the gentleman from Illinois [Mr. FOSTER] reserve a point of order?

Mr. FOSTER. I make the point of order on the words "to be immediately available."

Mr. PADGETT. Mr. Chairman, will the gentleman reserve his point of order so as to permit me to explain the necessity?

Mr. FOSTER. Yes; I reserve the point of order.

Mr. PADGETT. There is a contract under the appropriation of last year for dredging at about 30 cents a cubic yard. The price has now risen to where it is about 50 cents. Under the contract, if we can get this money now, we can continue to dredge and save 20 cents a cubic yard.

If we do not get it until July the contract will lapse and we will have to make another contract at a much higher price.

Mr. FOSTER. Let me ask the gentleman what has been done with the money appropriated last year?

Mr. PADGETT. They are using it for dredging now, but that was only for a part. We had a contract to take out the material at a cost of $3,000,000.

Mr. FOSTER. It is four months now to the 1st of July; have they exhausted all of the appropriation?

Mr. PADGETT. They will not have enough to last until July.

Mr. CALDER. Some of the battleships going into dry dock No. 4 have run aground, and the money appropriated last year is about used up. When the ship comes in to be overhauled, unless this bottom is taken out we will have the same trouble as we have had in the past two months.

Mr. FOSTER. How much money have they on hand?

Mr. CALDER. It is about exhausted, I am informed.

Mr. FOSTER. There ought to be a better statement than that.

Mr. PADGETT. The appropriation last year was for the purpose of dredging in front of the dry dock to make an entrance, and this money is alongside of the purpose of last year to dredge out the cob dock, a little island there, against which boats coming into the dry dock, if the tide is swift in any direction, as it often is, throws them against this obstruction. They want to get the benefit of the existing contract. If the money is immediately available so they can use it under this contract they will get it done for 30 cents. If it is not available until the contract lapses and a new contract is made, it will cost 45 to 50 cents.

Mr. FOSTER. Let me ask the gentleman from Tennessee, have they got a contract to spend this additional money?

Mr. PADGETT. It is in the contract. They stipulate that if the Government authorizes additional dredging they would do it at the same price as in their contract. In the meantime, the price has gone up. These men are bound by the contract, but the Government is not, because it is optional with the Government.

Mr. FOSTER. They do not say that they will agree to give them the contract immediately?

Mr. PADGETT. Well, it runs a certain time, and if we get the money before July we can get the dredging at a cheaper rate than if we do not get it.

Mr. GREGG of Texas. If the gentleman from Tennessee will pardon me, let me say to the gentleman from Illinois that if the appropriation remains in the bill, it ought to be made immediately available, because they are doing the work there now; they have not finished; but they want to make this contract now, and they can do it and get it done for the same price that they are now getting the work done at.

Mr. FOSTER. And if the money is made immediately available——

Mr. GREGG of Texas. It will save considerable money, because they can get it done at the old contract price.

Mr. FOSTER. Mr. Chairman, in view of what the gentleman from Tennessee and the gentleman from Texas has said, I shall not insist on the point of order.

Mr. SISSON. Mr. Chairman, I renew the point of order. This is clearly a deficiency.

Mr. PADGETT. It is not; it is a new appropriation. We are not asking for an appropriation to do work heretofore undertaken by the $50,000.

Mr. SISSON. Is all the work that this appropriation cares for to be done after the 1st of July?

Mr. PADGETT. It will be done after the 1st of July unless it is made available now.

Mr. SISSON. So much of the work is done in the last fiscal year, and will you not have a deficiency before the 1st of July?

Mr. PADGETT. No; if we did not have this authorization we would have no authority to do the work at all.

Mr. SISSON. Would the work stop now?

Mr. PADGETT. It would unless you give this money, and unless you authorize it and commence the contract will terminate. It is a question of whether we can get the contract done at 30 cents a yard or whether we shall have to pay 60 cents a yard.

Mr. HOBSON. Will the gentleman yield?

Mr. SISSON. Certainly.

Mr. HOBSON. I want to point out, in addition to what has been said, that the removal of this obstruction, the old cob dock, is one of the necessities of that yard. The currents are uncertain and swift, and it is one of the necessities that it must be removed. That has always been a most difficult harbor to enter.

Mr. SISSON. The only thing in my mind is this: If the gentleman can satisfy me that this is not a deficiency, I am going to withdraw the point of order, because the subcommittee on deficiencies is now in session.

Mr. PADGETT. This is not a deficiency.

Mr. MURDOCK. Mr. Chairman, what is before the House?

The CHAIRMAN. The gentleman from Mississippi is discussing a point of order.

Mr. PADGETT. Mr. Chairman, it is not a deficiency.

The CHAIRMAN. Is the gentleman going to make the point of order?

Mr. SISSON. Mr. Chairman, I am inclined not to make the point of order if it is not a deficiency. The gentleman assures me it is not and I withdraw the point of order.

The Clerk read as follows:

Toward the construction of a graving dry dock 1,700 feet long and 110 feet wide to connect the Delaware River and Reserve Basin (to cost not exceeding $3,000,000), $15,000; in all, navy yard, Philadelphia, $237,000.

Mr. SISSON. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. TURNBULL. Mr. Chairman, I make the point of order——

Mr. KINKEAD of New Jersey. Mr. Chairman, I reserve the point of order.

The CHAIRMAN. The gentleman from Virginia is recognized.

Mr. TURNBULL. Mr. Chairman, I make the point of order on the latter part of this paragraph, beginning on page 24, line 24, with the word "toward," and ending on page 25, line 5, with the figures "$15,000," as follows:

Toward the construction of a graving dry dock 1,700 feet long and 110 feet wide to connect the Delaware River and Reserve Basin (to cost not exceeding $3,000,000), $15,000.

Mr. SISSON. Mr. Chairman, I reserve the point of order on the entire paragraph.

The CHAIRMAN. The gentleman from Virginia was trying to get the attention of the Chair, and he is a modest gentleman.

Mr. SISSON. Mr. Chairman, I want to get the attention of the Chair——

The CHAIRMAN. But the gentleman from Virginia may desire to do the same thing.

Mr. SISSON. Mr. Chairman, I simply do not want to lose any of my rights.

The CHAIRMAN. The Chair assumes that other gentlemen also have rights. The gentleman from Mississippi reserves the point of order on the paragraph. The gentleman from Virginia makes the point of order on the words beginning with the word "toward," in line 24, page 24, and ending with the figures "$15,000," in line 4, page 25.

Mr. FOWLER. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. TURNBULL. Mr. Chairman, I make the point of order that it is not authorized by law.

Mr. LEE of Pennsylvania. Mr. Chairman, I will ask the gentleman to withhold his point of order.

Mr. TURNBULL. I will reserve the point of order.

Mr. FOSTER. Mr. Chairman, I make the point of order.

Mr. MOORE of Pennsylvania rose.

The CHAIRMAN. Does the gentleman desire to be heard on the point of order?

Mr. MOORE of Pennsylvania. I think my colleague, Mr. LEE, would like to be heard on the point of order.

Mr. TURNBULL. Mr. Chairman, I reserve the point of order at the instance of the gentleman from Pennsylvania [Mr. LEE].

The CHAIRMAN. The gentleman from Illinois has made the point of order.

Mr. FOSTER. Mr. Chairman, I will reserve the point of order.

Mr. LEE of Pennsylvania. Mr. Chairman, when the Secretary of the Navy appeared before the Committee on Naval Affairs on January 11, 1913, he stated:

I do not know whether this will stir up a discussion, but I want to go on record that there should be a 1,000-foot dock on the Atlantic and one on the Pacific coast.

In reply to a question from the chairman as to where the dock should be, the Secretary stated:

I would like to leave the location to the judgment of the committee.

Mr. Chairman, the question of a large dry dock on the Atlantic coast has been a matter of great discussion before the Committee on Naval Affairs for the past year, and on May 11, 1912, the Committee on Naval Affairs visited the Philadelphia Navy Yard for the purpose of ascertaining whether that yard would be the proper place to construct a dock of this kind. On that occasion the Secretary of the Navy requested Rear Admiral Stanford, the Chief Engineer of the Bureau of Yards and Docks, to accompany the committee for the purpose of pointing out the location and the necessity of this proposed dry dock. On Admiral Stanford's return the Secretary of the Navy requested that he and Capt. A. W. Grant, the commandant at the Philadelphia Navy Yard, report to him in writing the advisability of constructing this dock at the Philadelphia Navy Yard, and it was on the strength of this report, which appears in the hearings on page 146, that the Secretary of the Navy requested the Committee on Naval Affairs to designate the location of this proposed dock.

Mr. Chairman, the fact that the department has designated the Philadelphia Navy Yard as a reserve basin for our fleet makes it the chief naval base of the Atlantic coast. Nowhere along the entire stretch of our eastern seaboard is there to be found the advantages that are afforded at this yard. I wish to call attention to the natural security that the Philadelphia reserve basin affords our fleet. Situated as it is outside of the range of the most powerful guns, it has that protection which navy yards bordering along the Atlantic coast do not possess.

Another great advantage is the fresh-water basin, which prevents galvanic deterioration and barnacles of all kinds that form in salt water. Now, Mr. Chairman, the most essential feature of a navy yard is its dry docks. The importance of a yard can be measured by the capacity of its docks for handling naval vessels. The latest type of the battleships, the *Dreadnought*, has a beam of almost 100 feet. The two dry docks now at the Philadelphia Navy Yard have not the facilities for docking such great sea fighters as the *Wyoming*, the *Arkansas*, the *New York*, the *Texas*, the *Nevada*, the *Oklahoma*, and the *Pennsylvania*. There are only two dry docks on the Atlantic coast, one at New York and the other at Norfolk, that can receive those great sea fighters for repairs. Now, Mr. Chairman, Rear Admiral Stanford, in the hearings before the Committee on Naval Affairs, states that on account of the abundance of sand and gravel at League Island Navy Yard this proposed 1,700-foot dry dock with an intermediate caisson, making two dry docks in one, and also affording another and safer outlet from the great reserve basin to the Delaware River, can be built for less money than we can build a 1,000-foot dry dock in any other place in the United States. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. CURLEY. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. LEE of Pennsylvania. Now, Mr. Chairman, in regard to the point of order, I want to state that dry docks and battleships are interdependent and one is of no use without the other. A dry dock is simply one of the many tools employed by the department in building and repairing vessels, and no more requires a special act of Congress to authorize its construction or building than it does to buy the necessary tools to repair a collier, a torpedo boat, or a battleship.

I wish to call the Chair's attention to the naval bill of 1887 which carried two dry docks that were never authorized by law, but put into the bill by the Committee on Naval Affairs. In that case the committee requested the Secretary of the Navy to select the site; in this case the Secretary of the Navy has requested the committee to select the site.

I claim, Mr. Chairman, that if it is a continuation of public work to build battleships and repair them, it is likewise a continuation of public work to build a dry dock to repair them.

At this point, Mr. Chairman, I wish to insert the report of Rear Admiral H. R. Stanford, the Chief of the Bureau of Yards and Docks, and also the report of Capt. A. W. Grant, commandant of the Philadelphia Navy Yard, showing that the proposed 1,700-foot dry dock connecting the reserve basin with the Delaware River is a military necessity, and can be constructed for $3,000,000.

The report is as follows:

REPORT OF ADMIRAL STANFORD.

MAY 20, 1912.

From: Chief of Bureau.
To: Secretary of the Navy.
Subject: Additional dry dock, navy yard, Philadelphia, Pa.

1. A consideration of the subject of additional dry dock for the Philadelphia Navy Yard should be based primarily upon the present existing conditions and the special advantages which that station possesses for general navy-yard work and the service of the fleet. These facts, stated briefly, are as follows:

(a) The yard is located within the coast fortifications and may be considered safe from attack by sea.

(b) The climate of Philadelphia is temperate, neither extremely hot nor extremely cold—conditions which are most advantageous for continuous navy-yard work.

(c) The yard could not be better located with reference to material, supplies, and the labor market, and has excellent rail and traffic connections.

(d) The Philadelphia Navy Yard is the only fresh-water station, which is a matter of very great importance as affecting the fouling of ships' bottoms and galvanic deterioration.

(e) The navy yard is abundantly supplied at very low cost with a very high grade of potable water from the city's filtration plant, affording a service which can be safely utilized by vessels to such extent as they may desire.

(f) There are 16 berths—6 on the Delaware water front and 10 in the reserve basin—in which battleships may be secured, all within a radius of 1,700 feet, with the shops of the yard located almost at the center of the circle. This condition, which brings the vessels almost within a stone's throw of the repair shops, reduces transportation costs between shops and ships to a minimum and brings the cost of repairs to the lowest possible mark. The removal of a small projection on the west side of Pier No. 1 and the completion of a pier for which bids have

been received will add three additional berths to the Delaware water front, and the completion of the sea-wall extension in the reserve basin, which is now under way, will add one additional berth to the reserve basin, all of these additional berths being within the 1,700-foot radius. On the north side of the reserve basin there are four more berths for battleships, but at such a distance as to render these berths undesirable for general repair work.

(g) The berthing facilities may be indefinitely extended by the construction of additional sea wall and piers.

(h) The shops are modern in design, well located with reference to each other and to the docks and general yard facilities; all well equipped and can hardly be surpassed in the facilities which they afford for repair work.

(i) The yard is underlaid by a compact stratum of sand and gravel, which affords a solid and substantial support for buildings and equipment and which reduces cost of construction work, not only because of the excellent foundation which it affords, but also because of the supply of sand and gravel which it furnishes for use in the work.

(j) The area of the yard is ample for recreation purposes; for the large extension of barracks; for storehouses for advance base materials and general supplies; for hospital site; for prison site; for camp purposes for use in case of epidemic, or, if desired, for the accumulation of ships' crews; and, in general, has ample area for any additional buildings or constructions which may in the future prove desirable.

(k) There is a depth of 30 feet of water in the reserve basin at low tide. This depth will continue almost indefinitely without dredging operations, for the reason that the water of the basin carries very little silt, which would have to be periodically removed.

(l) The width and depth of the river in front of the navy yard is such that if desired a large number of vessels may be anchored in the stream.

(m) The ordnance stores at Fort Mifflin are a little over a mile distant from the yard, most conveniently located for the storage of ammunition and its distribution to the vessels at the yard.

(n) Large commercial coaling and oil-storage plants in the vicinity of the yard afford ample and convenient supply of fuel to meet the needs of the vessels, thereby avoiding the necessity for any considerable yard storage or coal-handling facilities.

2. The yard possesses three principal disadvantages:

First. Insufficient water at certain points between the Delaware Breakwater and the navy yard.

Second. The narrow and shifting channel which connects the Delaware River with the reserve basin and the rapid deposit of sediment in the channel, requiring frequent dredging operations and some considerable risk to vessels in passing from the Delaware River to the basin.

Third. Inadequate docking facilities. There are six vessels now under construction which will be unable to use the present largest dock. Two of these vessels, which are now being constructed at Philadelphia shipyards, will probably use the dock for preliminary cleaning before being fitted with their stores and accessories, a condition which obtains during processes of construction and which will not exist after the vessels are actually completed.

3. A number of the facilities and advantages of the yard as above noted are very unusual, and are not found at any other navy yard in the country, and are of such great value as to render the Philadelphia Navy Yard a conspicuously valuable adjunct of the service. The correction of the difficulty caused by shallow depth in the Delaware River approach to the yard is recognized by Congress and is being corrected, and in view of the commercial importance of the port of Philadelphia and its shipping facilities and of the large dimensions of the vessels which are operating in its commercial industries, it is safe to say that it is only a question of time before the Delaware River will be so improved as to withdraw all objections as to the safety and sufficiency of its channel. The natural difficulties caused by the Schuylkill River entrance to the reserve basin and by the inadequate docking facilities can readily be overcome by the construction of an additional dry dock as proposed. This dock would connect the reserve basin with the river and afford a reliable and independent connection between the river and the reserve basin. The dock would be divided into two parts by intermediate caisson. These parts could be used either singly or be merged into a single unit, a combination which would be sufficient for yard and port needs for many years to come. The division of the yard into two parts by the construction of a through dock, as above mentioned, will be obviated by so designing the dock caissons as to render them serviceable as crossings and also by a temporary structure spanning the dock which could readily be removed by the dock crane.

4. This recital of the advantages of the Philadelphia Navy Yard may seem a little enthusiastic, but I feel sure that it is not overdrawn in any way and that the advantages are all recognized and acknowledged by those officers who have been actually on duty at the yard and fully appreciate its resources. It is my opinion that the proposed dock would prove of inestimable value to the Navy and is really a military necessity.

H. R. STANFORD.

REPORT OF CAPT. A. W. GRANT.

[Copy of first indorsement of Capt. A. W. Grant, United States Navy, on letter of H. R. Stanford, United States Navy, Chief of Bureau of Yards and Docks, dated May 20, 1912.]

[First indorsement.]

No. 1105. MAY 27, 1912.

From: Commandant, navy yard, Philadelphia, Pa.

To: The Secretary of the Navy.

Subject: Additional dry dock, navy yard, Philadelphia, Pa.

1. With relation to the above-mentioned subject the following additional facts are submitted:

2. To show the yard's capacity in number of vessels that may be cared for it may be stated that at present there are berths on the Delaware water front of the navy yard for 6 battleships, and, upon the completion of Pier No. 5, there will be 2 additional, or 8 in all. There are at present in the reserve basin single berths for 14 battleships, and of this number 7 of the berths may be occupied by vessels lying double or treble banked.

3. In addition to the above, 12 battleships can be moored in the river abreast of the navy yard and Fort Mifflin. The river channel opposite the navy yard, about one-half mile in width, favors the handling of vessels at any stage of the tide.

4. This anchorage in front of the navy yard favors quick berthing and unberthing of vessels alongside of piers and permits of the movement to and from the sea of battleships in divisions or squadrons. This advantage is illustrated by the fact that a squadron of 8 vessels arriving off the breakwater at approximately low water can reach the navy yard in about 7 or 8 hours and the entire 8 vessels be berthed by using 2 tugs only in about 4 hours more time, or in 12 hours from the time of arrival off the Delaware.

5. Frequently mention is made of the depth of water in the Delaware as being an argument against the port, etc. All such arguments may be answered by the fact that merchant vessels of the American, Italian, and Hamburg-American steamship lines regularly visit Philadelphia. They are more than 500 feet long and draw in excess of 28 feet. The *Graf-Waldersee*, 561 feet long, drew 28 feet 2 inches on her latest trip when she left port. During the past 30 days 6 vessels drawing from 28 feet 2 inches to 29 feet have left the port and gone direct to sea.

6. One of the most pressing and urgent arguments for the construction of the dry dock from the reserve basin to the Delaware River lies in the fact that it will produce a channel of known width and depth to and from the reserve basin. The present entrance from the Delaware takes a course about one-half mile long through the mouth of the Schuylkill River; thence via a curved channel into the reserve basin. The Schuylkill River rapidly silts. In January, 1910, the depth was dredged to 30 feet. In August of that year it had silted in one spot, which was later dredged clear. At present the mouth of the Schuylkill has filled up about 4 feet, and was so reported to me in a letter from the director of wharves, docks, and ferries of the city of Philadelphia. The city expects to begin the operation of dredging the mouth of the Schuylkill July 1 this year. Any small obstruction in this channel would tie up the Government's entire reserve fleet for an unknown period of time. An instance in illustration is here given: In January or February during the past winter a coal barge was sunk in the Schuylkill River off the elevator at Girard Point. Its location was not determined. On the afternoon of April 24, 1912, engineers belonging to the department of wharves, docks, and ferries of the city were making a survey of the mouth of the river when the armored cruiser *Tennessee* was passing through the Schuylkill into the reserve basin. After she passed part of a hulk of a vessel was discovered in midchannel, and the remainder of the hulk was located in the Schuylkill and removed.

STRATEGIC POSITION.

7. Mention is frequently made of the military strategic value of navy-yard locations near Hatteras and Cape Cod. In the development of inland waterways, and in line with other great commercial undertakings, it may well be expected that in the near future the further development of the Delaware and Raritan Canal and the Delaware and Chesapeake Canal will place Philadelphia in ocean communication for large vessels via these routes, which will give the navy yard three routes to the sea,

which can not be equaled by any other location on the Atlantic coast.

8. In building such a structure as this dock, and to eliminate the first cost and upkeep of a floating derrick, it has been contemplated to lay on the east side of the foundations of the proposed dock the necessary foundation to carry a traveling swinging crane capable of taking weights of 150 tons from a vessel in the dock and landing them on the dock.

COST.

9. The present dry dock at this yard is approximately one-half the length of the proposed dock, and it cost less than $1,500,000. With the plant on hand for the construction, it is confidently believed that the proposed dock, although slightly larger in other dimensions, can be built for $3,000,000. This would include the foundation and track for the traveling crane. With this construction the Government would be saving the first cost and upkeep of the floating crane mentioned in the preceding paragraph.

A. W. GRANT.

Mr. LEE of Pennsylvania. I yield the balance of my time to the gentleman from Alabama [Mr. HOBSON].

The CHAIRMAN. The gentleman can not yield time. The Chair is ready to rule upon the point of order.

Mr. PADGETT. Mr. Chairman, I insist upon a ruling, we have not the time.

Mr. MOORE of Pennsylvania. Does the Chair decline to hear any further discussion on the point of order?

The CHAIRMAN. Not at all, but the Chair is ready to rule on the point of order.

Mr. TURNBULL. I make the point of order.

Mr. MOORE of Pennsylvania. I would like to say a word on the point of order.

The CHAIRMAN. The gentleman from Virginia makes the point of order.

Mr. MOORE of Pennsylvania. Will the Chair listen for one moment?

The CHAIRMAN. Yes.

Mr. MOORE of Pennsylvania (continuing). For a brief argument on the point of order. The gentleman from Pennsylvania [Mr. LEE] has very clearly stated what is in the mind of the delegation regarding the point of order. The Navy is building battleships increasing in size each year. We must necessarily have dry docks at the navy yards to accommodate these ships. The existing dry dock at Philadelphia, it is contended, is not sufficient in size to accommodate the modern *Dreadnoughts* which are being constructed, hence an appropriation for a dry dock of an increased size is in continuation of work already authorized by law. It seems clear the Chair can hold that an appropriation for a dry dock of a size sufficient to accommodate vessels that can not be accommodated in existing dry docks is in order. It seems to me the Chair would be justified in overruling the point of order, under rule 21.

Mr. VARE. Mr. Chairman, before the Chair rules upon the question I would ask unanimous consent to address the committee for two minutes upon the subject of dry docks in Philadelphia.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to address the committee for two minutes on the subject of dry docks in Philadelphia. Is there objection? [After a pause.] The Chair hears none.

Mr. VARE. Mr. Chairman, in May of last year the Committee on Naval Affairs made an extensive investigation into the merits of the proposed 1,700-foot dry dock at the navy yard in the city of Philadelphia, and as a Member of this House, in the district which I have the honor to represent, in which this great naval station is located, I accompanied that committee on that visit. They were accompanied by many distinguished Members of this House who were not members of that committee.

On that occasion, the chairman of the Rivers and Harbors Committee, the gentleman from Florida [Mr. SPARKMAN] said, and made it plainly known, that although he had not been on the congressional inspection party during the day, he was in favor of the League Island Navy Yard and the port in general.

The distinguished chairman of the Committee on Rules, the gentleman from Texas [Mr. HENRY], said:

> This great dry dock at the Philadelphia Navy Yard is a necessity. I am absolutely committed in favor of it and I will use every resource and every persuasion at my command to promote the bill providing for its speedy construction.

The gentleman from Alabama [Mr. CLAYTON], chairman of the Committee on the Judiciary, said:

> We are going to have this improvement because League Island is the best place on the Atlantic coast for a yard and a general fleet rendezvous. The Government now owns enough real estate. All it needs is to spend a few million dollars on improvements. We will have all these things. You Philadelphians have pleaded guilty too often to the charge of New York that you are asleep. I believe that you are now awake. You have here the best equipment for a navy yard that God ever gave.

Mr. MANN. Will the gentleman yield for a question? When were these remarks made?

Mr. VARE. On the 12th day of May, 1912.

Mr. MANN. Does the gentleman expect the Democrats will remember their promises that long?

Mr. VARE. I think gentlemen like these ought to keep their plighted faith to the people of Philadelphia.

Mr. KNOWLAND. Was it before or after the banquet?

Mr. VARE. I will say this was before the banquet.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Pennsylvania [Mr. VARE] have five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. VARE. Mr. Chairman, Philadelphia is a great city. It has always been liberal in its views. It is so liberal that 40 years ago it granted to this great Government the land, more than 900 acres, for the establishment of this great navy yard, and since that time as a municipality it has improved and made appropriations for a great public park on the outside of the yard, covering more than 310 acres, for which it has appropriated $3,000,000. It is building a great boulevard 300 feet wide to connect the navy yard with the city of Philadelphia. It has established a public plaza, covering four public squares of land, at a cost of $500,000. It has taken its filtered-water system under this entire boulevard, in order that the best possible quality of water might be furnished to the employees of the yard.

My friend from Massachusetts [Mr. MURRAY] a few moments ago spoke of the fact that only 300 of the employees in their navy yard out of a total population of 30,000 resided in his district. I want to say to this House that there is a shade larger percentage who reside in the district in which I live who are employed in the Philadelphia Navy Yard, and I am proud to say, whether it be a Democratic administration or whether it be a Republican administration, they all work for the advancement of the city of Philadelphia and for the entire State of Pennsylvania. Philadelphia is no mean city, and Pennsylvania is a great State. It furnishes one-twelfth of the entire membership of this House. It has been quite modest in its demands, and I want to say to my colleagues, with all due respect to my predecessor, whom I loved and respected, that so far as I am concerned I expect as one Member of Congress to do my utmost to see that Pennsylvania and the city of Philadelphia secure their just share of appropriations from the Public Treasury. [Applause.] I came here last fall, succeeding my distinguished predecessor, the Hon. Henry H. Bingham, who came to this Congress 34 years in succession, the longest continuous service of any Member who ever sat in this American Congress. I came here first by the nomination of the great Republican Party, and at that time I had the indorsement of my friends who represent the great Democratic Party.

I was returned at the November election with a majority of 15,000 over my Democratic opponent, and the people of the district I have the honor to represent gave President William Howard Taft the largest Republican majority he received in any congressional district in this great country. As to public economy, I am in favor of economy where it is well directed. And I might submit, in line with what my friend from Pennsylvania [Mr. LEE] has said, there is room for economy. And I want to say in that connection that we have a great fresh-water basin at the Philadelphia Navy Yard large enough to hold the entire fleet of the Navy of this great country, and the Navy Department might consider the policy of bringing many of these ships, probably now manned to their full capacity, and keep them with much reduced crews in reserve at this Philadelphia Navy Yard.

Mr. Chairman, I desire to ask unanimous consent to extend my remarks in the RECORD by inserting a letter from the South Philadelphia Business Men's Association and a communication from Admiral Stanford to the Secretary of the Navy; also a letter from Capt. A. W. Grant, commandant Philadelphia Navy Yard, in Philadelphia Press, February 20, and several letters from members on the Republican side of the Committee on Naval Affairs.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. VARE] asks unanimous consent to extend his remarks by the insertion of certain letters in the RECORD. Is there objection?

There was no objection.

Mr. LEE of Pennsylvania. Mr. Chairman, I would like to ask unanimous consent to revise and extend my remarks in the RECORD and to insert the report of Rear Admiral Stanford and the report of Capt. A. W. Grant, of Philadelphia.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania [Mr. LEE]?

There was no objection.

Mr. SAUNDERS. Mr. Chairman, has a point of order been directed to this paragraph, or reserved?

The CHAIRMAN. The point of order has been made against the paragraph.

Mr. SAUNDERS. It is admitted on the part of the Committee on Naval Affairs that it is subject to a point of order?

Mr. LEE of Pennsylvania. It has not been yet.

Mr. SAUNDERS. I thought so, on the authority of the committee.

Mr. MOORE of Pennsylvania. It has not been admitted.

The CHAIRMAN. It has been so stated to the Chair, and the Chair is ready to rule on it.

Mr. SAUNDERS. I do not care to argue it, Mr. Chairman, if the Chair is ready to rule.

Mr. LEE of Pennsylvania. I would like to state, Mr. Chairman, that this proposition was put on the naval bill by a vote of 12 to 5 in committee, and the Secretary of the Navy has recommended it since.

The CHAIRMAN. That has no bearing on the point of order. The Chair will state that this provision is obnoxious to clause 2 of Rule XXI:

No appropriation shall be reported in any general appropriation bill or be in order as an amendment thereto for any expenditure not previously authorized by law.

The same question has been passed upon a number of different times, and it has been expressly held that an amendment like this is not in order. I read:

On March 25, 1896, the House being in Committee of the Whole House on the state of the Union, considering the naval appropriation bill, Mr. Henry H. Bingham, of Pennsylvania, offered an amendment appropriating the sum of $200,000 for the construction of a dry dock at the League Island Navy Yard.

Mr. Nelson Dingley made the point of order that the proposed appropriation was for an object not authorized by law.

After debate, the chairman [Mr. Albert J. Hopkins, of Illinois] ruled that the point of order was well taken. The Chair will not take the time to read the ruling, but the same ruling has been made in other and like cases.

Mr. LEE of Pennsylvania. Can the Chair cite the authorities?

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The Chair can cite a number of authorities.

Mr. LEE of Pennsylvania. I would be glad if he would.

The CHAIRMAN. I read:

On April 10, 1890, the House was in Committee of the Whole House on the state of the Union considering the naval appropriation bill.

Mr. Theodore S. Wilkinson, of Louisiana, offered this amendment:

"For the purchase, under such regulations as the Secretary of the Navy may prescribe, of additional lands for a site for a navy yard and dry dock at or near the lands bought by the United States for a naval depot at Algiers, La., the establishment of which navy yard and dry dock at Algiers, La., was recommended by the commission of naval officers appointed under the act of Congress approved September 7, 1888, a sum not exceeding $75,000."

Mr. Charles A. Boutelle, of Maine, made the point of order against the amendment.

The Chairman ruled:

The Chair is of opinion that this amendment is obnoxious to clause 2 of Rule XXI. The proposition of the honorable gentleman from Louisiana is to make an appropriation for the purchase of a site and the establishment of a navy yard and dry dock, which is not an expenditure "previously authorized by law," nor is it an appropriation "in continuation of appropriations for such public works and objects as are already in progress." It does change existing law by authorizing that to be done which is not now authorized by law. It is in sympathy with the proposition contained in the bill against which the point of order was made, and the Chair thinks the point of order is well taken as against this proposition, both in the letter and the spirit of the rule.

That is in Volume IV of Hinds' Precedents, section 3729.

Then, again, on a point of order raised by Hon. William S. Holman, of Indiana, a similar ruling was made by Hon. BENJAMIN F. SHIVELY, of Indiana, in a case similar to this, which is found in section 3730, Volume IV, Hinds' Precedents.

A like ruling was made by Hon. James S. Sherman, of New York, in a similar case to be found in section 3732, Volume IV, Hinds' Precedents. And there were other rulings.

Mr. LEE of Pennsylvania. The item for the Louisiana dry dock was, as stated by the Chair, for the purpose of buying a piece of property.

The CHAIRMAN. The League Island Navy Yard case is on all fours with the one now pending, and this is for a dry dock in the very same navy yard.

Mr. SISSON. I reserved a point of order on the entire paragraph, and there is another item in it to which I desire to call attention.

The CHAIRMAN. The gentleman will indicate the item.

Mr. SISSON. In line 18, on page 24, the words—

To be immediately available.

It is—

To complete rebuilding building No. 7 for central offices, to be immediately available, $50,000.

Mr. PADGETT. The words "to be immediately available" are subject to the point of order.

Mr. SISSON. Then I will make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. SISSON. I will ask that the total be amended by deducting $50,000.

Mr. MOORE of Pennsylvania. Does the gentleman wish the $50,000 to go out, or only $15,000 for extension?

Mr. PADGETT. The gentleman ought not to strike out the building.

Mr. SISSON. There is only $15,000. I ask that the amount be reduced $15,000.

Mr. PADGETT. That is correct.

The CHAIRMAN. The point of order is sustained to the language—

To be immediately available—

in line 18, page 24.

Mr. SISSON. Then I offer an amendment to correct the total by deducting from the amount, in line 5, on page 25, the sum of $15,000.

The CHAIRMAN. The Clerk will correct the totals.

Mr. SISSON. Then that amendment is considered as agreed to?

The CHAIRMAN. The Clerk will correct the totals.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

Those who are talking economy in this House have stricken out of this item, so far as it relates to the Philadelphia Navy Yard, a total of $65,000. This is done without any regard whatever to the necessities of the situation. As I stand upon the floor of this House and observe the tendency of those who are preaching economy on the other side, gentlemen the population of several of whose States does not equal that of the single city of Philadelphia, some of whose States create no revenue for this Government, I am amazed at their undertaking to direct the trend of affairs and to cut down the institutions that are revenue-creating and that help to maintain this entire Government, and that provide even "the pork" that goes into your public-building bills, your river and harbor bills, and the other appropriation bills that you are watching with such avidity.

Pennsylvania has a population of nearly 8,000,000 people. To be accurate, according to the last census it has 7,665,000 people. That is one-twelfth of the population of the entire country. And yet the gentleman from Mississippi [Mr. SISSON], without regard to the great wealth and industry of the Commonwealth of Pennsylvania, without regard to the fact that his own State contributes scant revenue to the Government, knocks out item after item, in the interest of alleged economy, tearing down labor, tearing down the material men, and generally undermining the structures that have been reared, and all in the name of economy.

The city of Philadelphia has 1,500,000 people, according to the census of 1910, which is equal to the population of the entire State of Arkansas. It has a greater population than Arizona, than Connecticut, Delaware, the District of Columbia, Florida, Idaho, Maine, Maryland, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Vermont, Washington, West Virginia, or Wyoming. It is bigger than any one of those States, and yet we can not get consideration even to the extent of $50,000 to reconstruct a burned building at the navy yard at which the battleships of the Nation are repaired and provided for.

Mr. SAUNDERS. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I refuse to yield now. This city of Philadelphia, concerning which we hear so much said in the House, is, or ought to be, on a parity with other great cities of the United States. It has a population equal almost to that of Louisiana, of Mississippi, of South Carolina, or of Oklahoma. With the city of Pittsburgh thrown in, it has a population which is equal to that of the State of Alabama, which is now running this House, and which is directing the country to-day, in the matter of appropriations. It is one city of great wealth, with great manufactures, and is equal—and with its sister city of Pittsburgh—equal in population and greater in wealth than the whole State of Alabama, from which the affairs of this Government are being directed just now.

Mr. LINTHICUM. Will the gentleman yield?

Mr. MOORE of Pennsylvania. No; I can not, because I have something to say, and I want to say it.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MANN. I ask unanimous consent that the gentleman may have five minutes more.

Mr. MOORE of Pennsylvania. I ask unanimous consent to proceed for five minutes.

Mr. LINTHICUM. Reserving the right to object, if the gentleman will yield to me for a question——

Mr. MANN. Mr. Chairman, if a man can not have his time extended without entering into an agreement to answer a question, let the gentleman object.

Mr. LINTHICUM. I have not raised my voice during the discussion of this bill.

Mr. MANN. The gentleman has had plenty of opportunity.

Mr. LINTHICUM. I have the right to object.

Mr. MANN. The gentleman has the right; let him object.

Mr. LINTHICUM. I will not object, Mr. Chairman. I think the gentleman will yield to me.

Mr. MOORE of Pennsylvania. I will be glad to yield in a moment.

The CHAIRMAN. The gentleman from Pennsylvania will proceed.

Mr. MOORE of Pennsylvania. Mr. Chairman, regardless of the manner in which the revenue of this country is raised, by which we produce the money that you put into your public-building bills, and your river and harbor bills, and your "pork-barrel" bills generally, you are giving away in these bills, upon the testimony adduced from your own side, more money than we have been able as a Republican administration to produce and more than you can ever produce on your side under the policy you are advocating. And yet you find fault with the great cities and cut their appropriations; you want the money to dredge rivers that have no navigation, to put up public buildings in little towns with no population, and as you say the cities are robbing you—you keep taking it all. How much do you produce in comparison with what these cities produce? What do you contribute toward the receipts of this Government out of which you take your proportion. What do you contribute toward the receipts out of which the customhouses give you $311,000,000 a year? Of this vast sum, the city of New York gives you $206,000,000; Philadelphia, at her customhouse, gives you over $20,000,000; Massachusetts, out of her customhouse at Boston, gives you over $24,000,000; Maryland, at the Baltimore customhouse, gives you over $4,000,000. Out of the total of $311,000,000 these four ports give you $254,000,000, and you take it and put it in your pockets to scatter through the districts of your country and you do not even say, "Thank you, Mr. Republican Administration," for the manner in which we have given it to you.

Mr. SAUNDERS. Will the gentleman yield to a question?

Mr. MOORE of Pennsylvania. And yet you are to-day advocating a policy of free trade, and have already put it in the Panama Canal bill. You propose to tear down the revenues raised at the customhouses, and yet you want more money in order to build your little buildings and dig out your little streams all over the United States at our expense. Take the matter of internal revenue. You now get a great deal out of corporations throughout the country. They do not operate on the farms. You get a total of $321,000,000, all told, out of which New York contributes $43,000,000, Pennsylvania $26,000,000, Illinois $52,000,000, Indiana $30,000,000, Missouri—which is a great State with a great Speaker—$23,000,000, Ohio $12,000,000, and all told about 15 of the large States contribute the total of $321,000,000, and Mississippi and Alabama, largely, are now distributing it to their respective friends throughout the United States; and meanwhile you are trying to hold intact upon the other side a leadership which is fast falling to pieces. You are, by this means, undertaking to control the wild horses of Democracy that have come in from everywhere to get their little bit.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. SHACKLEFORD. Mr. Chairman, I desire to be heard in opposition to the gentleman.

Mr. MOORE of Pennsylvania. But I have not yet finished.

Mr. CALDER. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. Is there objection?

The was no objection.

Mr. MOORE of Pennsylvania. And out of the country districts, from the backwoods somewhere, comes the hue and cry against the internal-revenue system. The nonrevenue producing States are demanding prohibition and trying to enforce it everywhere, while the moonshine distilleries are running up in the mountains and the blind tigers are in full operation, and no revenue as a result of the business. Yet they are drawing upon the great States constantly for revenues that come in from the whisky and tobacco business and from the customhouses.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. You want prohibition. You want to suppress whisky and the whisky trade. You want to hold tobacco smoking and chewing as immoral and improper, but you like the money just the same, and you are taking it out of our navy yards and our customhouses and taking it away from our public institutions in order that you may still distribute your little piece of pork.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. [Cries of "Oh, no."] The Clerk informs the Chair that the gentleman's time has expired.

Mr. MANN. Mr. Chairman, but a request was made a moment ago, and we all thought that it was granted, to have the gentleman's time extended. The gentleman from New York [Mr. CALDER] made the request.

The CHAIRMAN. The Clerk informs me that he may be in error.

Mr. MANN. I should think he is.

Mr. SHACKLEFORD. Mr. Chairman, I ask that the gentleman have five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. No patriot coming from the Gulf or borders of the Great Lakes, coming from the East or the West, has greater desire than I to see that beautiful, balmy country down along the Gulf bloom and blossom as the rose. I want to see industry there and great prosperity. I would like to see your navy yard at Pensacola teeming with industry, building ships and repairing them, with thousands of skilled mechanics working round about; but I did not see them when I was down at Pensacola, and I believed it needed a little more money and a little more energy to put life and vim into that beautiful and delightful locality.

I do not wholly blame you now that you have control of this House, now that you have your hand upon the Treasury of the United States, for taking all the money you can get and putting it down where it will do you the greatest good. You have been waiting many years for this opportunity. The power is all yours. The money is within your grasp, and some of you, though you hesitate, seize it just the same. The gentleman from Georgia, in his somewhat heated remarks yesterday in his controversy with his fellow Member from Massachusetts, which he may or may not have regretted, let the cat out of the bag. You have come into your own; you are going to use it; you have been waiting a long while, and now you are going to build up your country. But do not build it up by tearing us down, for we will come back in two years, and we still want to continue in your good graces, as we hope you will in ours. Bear in mind that though some of your States are burdened with debt you have great wealth possibilities. Bear in mind that northern capital has come into Alabama and is going into the other States and that it is not fair the moment it comes to close the door upon it and tell those who have made their investments that they were bunkoed in the game. Give those who have energy and enterprise and willingness to work a chance to help, whether Democrats or Republicans control; but bear in mind when you begin to tear down the institutions from which your power comes, from which you draw your strength, your financial strength in particular, that you had better be careful about tearing down the internal-revenue system and the customhouses, because they are the bone and sinew that provide the means. And bear in mind also, in Alabama and elsewhere, where the debts of the States are a matter of regret, that in Pennsylvania we have cleared ourselves absolutely from debt and as a State institution owe no man anything. Bear in mind that this is the result of a Republican administration, of a policy of protection, of a policy of maintenance of law as superior to lawlessness, of a policy that has held the moonshiner in check and kept the illegal operator under the hand of the law. Bear in mind, down in Mississippi, too, whence you are bringing us the great lessons of economy preached to-day, that if you have been backward in the past and your population has not advanced, even beyond that of the great single city of Philadelphia, that the fact that you do not contribute $1 in internal revenues to this Government and only $16,000 in the matter of customs that we will bear you no ill will, but wish in justice to our institutions and yours that we may progress together. [Applause.]

Mr. PADGETT. Mr. Chairman, I move that all debate upon this paragraph and all amendments thereto close in 10 minutes.

Mr. HARDY. Before the chairman rose I desire to state to the Chair that I had addressed the Chair.

The CHAIRMAN. The question is not debatable. The question is on the motion of the gentleman from Tennessee that all debate on this paragraph and all amendments thereto be closed in 10 minutes.

The question was taken; and on a division (demanded by several Members) there were—ayes 84, noes 27.

So the motion was agreed to.

[Mr. SHACKLEFORD addressed the committee. See Appendix.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Navy yard, Washington, D. C.: Water-front improvements, to complete, $35,000; paving, to continue, $2,500; sewerage, to extend, $5,000; railroad, extension, $2,500; heavy gun scales, $8,000; in all, $53,000.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] moves to strike out the last word.

Mr. SISSON. Mr. Chairman, the gentleman from Pennsylvania [Mr. MOORE], in his criticism of me for exercising one of the rights of membership in this House, doth take the position of a mighty Colossus. He not only assumes to represent the city of Philadelphia, but he also assumes to represent the whole State of Pennsylvania, and utterly eliminates from that great State every other Representative that happens to be therein.

But if the gentleman will stop for one moment and consider this fact, his enlarged perspective will enable him to see himself in smaller proportions than those in which he now sees his mighty form [laughter], because he represents only one district, with about the same population that the districts of all these other men contain, and there is no reason why he should be so much greater than the other Representatives here.

But when he discusses the conditions down in my own State, I say to him that we produce there on the fertile cotton fields, without one dollar's protection to that industry, magnificent crops of cotton and send the product abroad and throughout the country, and produce corn and meats and lumber and all those other products natural to a great agricultural State, upon which we get no protection; and when the gentleman, in his great city, has the protection which his party has been giving it all these years, it comes with poor grace from him to say that he has given this to us, when every farmer who goes into the store and buys his plows and tools and other implements made from iron must pay not only the profit upon the manufactured article but must bear the additional burden imposed on him to support infant industries, which have grown so mighty and so great. [Applause].

The gentleman reminds me of a story which I heard the late lamented Bob Taylor tell of an old gentleman and an overgrown boy who was going with his mother down the road on one occasion. The boy weighed about 180 pounds, although he was only 18 or 19 years old. The boy was crying on the road. A gentleman rode up and said, "My boy, what in the world are you crying about?" The boy was sobbing as though his heart would break. The gentleman said, "What in the world is the matter with you? What are you crying about?" "My mother, my mother," sobbed the boy. The gentleman asked, "Is she sick?" The boy said, "No." The gentleman said, "Is she dead?" The boy replied, "No." "Then, what is the matter with you?" asked the gentleman. The boy said, "She has been trying to wean me for the last two or three weeks." [Laughter.]

The gentleman from Pennsylvania and his people have had all the advantages of all the protection that his great party could give to him and them. We have asked for none, and the public buildings in the gentleman's own city have cost three or four times as much as all the buildings that have been erected in my State. When the gentleman discusses the public buildings bill he ought not to shake his locks at me, because I voted against the public buildings bill.

Now, I hope that speeches like the one the gentleman from Pennsylvania has made will not be repeated here. The gentleman seems to be a little angry because I made a point of order against an item that went in the bill that happened to affect his city. I did not know that the item related to his district or to anybody else's district.

It was a point of order which I desired to make. It was a point of order which I did make, and the Chair sustained it, and I was absolutely within my rights in making the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

Mr. PADGETT. Mr. Chairman, I move to close debate upon the paragraph and all amendments.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. When two gentlemen take the floor and one addresses the Chair in advance of the other, is not that gentleman entitled to recognition?

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] is in charge of this bill, and as between the two the Chair will say that he is entitled to recognition.

Mr. MOORE of Pennsylvania. But I rose to make an amendment to the paragraph.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] moves that all debate on this paragraph and all amendments thereto be now closed.

The motion was agreed to.

The Clerk read as follows:

Navy yard, Norfolk, Va.: Railroad tracks, extensions, $10,000; repairs, buildings, St. Helena, $25,000; improvements to water front, to continue, $50,000; paving and grading, to continue, $10,000; heating system, extension, $5,000; 150-ton crane (limit of cost not exceeding $300,000), $100,000; dredging, to continue, $40,000; water system, extensions, $7,500; sewer system, extension, $5,000; lavatories and toilet facilities, $5,000; compressed-air system, extensions, $5,000; in all, navy yard, Norfolk, Va., $262,500.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

Mr. PADGETT. I should be glad to have the gentleman state what his point of order is.

Mr. FOWLER. Mr. Chairman, I desire to inquire of the chairman what is the occasion for increasing the appropriation for this year more than $100,000 above the appropriation of last year?

Mr. PADGETT. The cause of it is an appropriation toward the construction of a 150-ton crane to transact the business at the yard.

Mr. FOWLER. That is the item against which I had my point of order directed. Is this to be used in connection with the operation of this navy yard?

Mr. PADGETT. It is a part of the machinery in the operation of it, in order to have a lifting machine there which will lift the heavy guns off from the ships and on to the ships, and to handle other heavy loads at the yard.

Mr. FOWLER. How has this been done heretofore?

Mr. PADGETT. It has been done, as far as it could be done, by smaller cranes; but the guns are increasing in weight and size and the ships are increasing in width of beam, so that a larger crane is now required.

Mr. FOWLER. Have they any cranes there now sufficient to handle these large cannon?

Mr. PADGETT. They have not.

Mr. FOWLER. What are the largest size cannon that are now handled there?

Mr. PADGETT. Fourteen-inch; and then there are the turrets on the ships.

Mr. FOWLER. I am inclined to think, Mr. Chairman, that the point of order will not lie against the part of the paragraph I have indicated, if it is a portion of the navy yard and used in operating the same.

Mr. PADGETT. I know it is not subject to the point of order.

Mr. FOWLER. For that reason I withdraw the point of order.

Mr. MANN. I reserve the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, I reserve the point of order. I should like to ask the chairman of the committee if the item for a traveling crane, not to exceed $300,000 in cost, is new?

Mr. PADGETT. That is new. That is the one I am talking about; a 150-ton crane to cost not to exceed $300,000, toward the construction of which an appropriation of $100,000 is now made. That is a new crane, but it is to be a part of the machinery, an enlargement of the machinery of the yard.

Mr. MOORE of Pennsylvania. Mr. Chairman, this item providing for a new traveling crane at the Norfolk Navy Yard not to exceed in cost $300,000 is a very large item in comparison with the population, and so forth, at Norfolk, and it is clearly subject to a point of order. Mr. Chairman, I have been inveighed against, in terms not altogether gentle, by the ferocious gentleman from Missouri [Mr. SHACKLEFORD], who speaks in defense of a good-roads system of which he is the special Sir Knight and champion. I have also been condemned to a slight degree by the gentleman from Mississippi [Mr. SISSON] for exercising my prerogatives here as a Representative, in pointing out certain pitfalls into which the Democratic Party as at present constituted will fall if it does not provide means for keeping

up the revenue system of the country while it puts its hands into the Treasury and takes out everything and provides ways and means to take out more. In view of these attacks which have been made upon me by these gentlemen, I do not intend to insist upon the point of order against this paragraph which is for the benefit of the navy yard at the city of Norfolk, especially since the point of order against the Philadelphia Navy Yard came from the gentlemen from Virginia. The best evidence in the world that I can present that there is no malice, slander, or viciousness in my heart, as indicated by the gentleman from Missouri [Mr. SHACKLEFORD], and as evidence that I wish well to the State of Virginia, which has opposed the State of Pennsylvania in this instance, and that I do not wish ill to any section, I will not insist on the point of order to the item which gives to Norfolk the $300,000 for a traveling crane. If the Norfolk yard wants the crane it ought to have it; and Philadelphia can stand the loss.

Mr. MANN. I make the point of order against the paragraph for the Norfolk Navy Yard. I am inclined to think that the item for a 150-ton crane is subject to a point of order, but am not quite sure; the limitation of cost is clearly legislation, and hence subjects the paragraph to a point of order.

The CHAIRMAN. The Chair does not quite understand the gentleman.

Mr. MANN. The paragraph from line 11 down to line 20, on page 25, is subject to a point of order. I make the point of order against the paragraph because it is legislation. The limitation of cost upon the crane is legislation.

Mr. PADGETT. I do not think that makes it subject to a point of order.

Mr. MANN. It is clearly legislation.

Mr. PADGETT. It is a description and limitation of cost.

Mr. MANN. A limitation of cost has always been considered as legislation. I think the crane itself is subject to a point of order.

The CHAIRMAN. The language "limit of cost not to exceed $300,000" is the language to which the gentleman makes the point of order?

Mr. MANN. I call attention to that, but I make the point of order to the paragraph.

The CHAIRMAN. The point of order against the paragraph would hardly lie.

Mr. MANN. It will lie if any part of the paragraph is subject to a point of order.

The CHAIRMAN. The Chair is inclined to think that the language limiting the cost is subject to a point of order.

Mr. MANN. That makes the whole paragraph subject to a point of order.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer an amendment to the bill to reinsert the language embraced in line 11 to line 20, excluding the words "the limit of cost not exceeding" and the figures "$100,000," so that it will read a "150-ton crane, $300,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by inserting the following as a new paragraph:

"Navy yard Norfolk, Va.: Railroad tracks, extensions, $10,000; repairs, buildings, St. Helena, $25,000; improvements to water front, to continue, $50,000; paving and grading, to continue, $10,000; heating system, extension, $5,000; 150-ton crane, $300,000; dredging, to continue, $40,000; water system, extensions, $7,500; sewer system, extension, $5,000; lavatories and toilet facilities, $5,000; compressed-air system, extensions, $5,000; in all, navy yard, Norfolk, Va., $462,500."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken; and on a division (demanded by Mr. MANN) there were 57 ayes and 26 noes.

So the amendment was agreed to.

The Clerk read as follows:

Navy yard, Charleston, S. C.: Paving and grading, to continue, $1,000; locomotive and crane shed, $5,000; remodeling dispensary, building No. 19, $3,000; torpedo boat berths (to cost not exceeding $300,000), $150,000; in all, $159,000.

Mr. BATHRICK. Mr. Chairman, I make a point of order against the paragraph on the ground that the language in line 24, "to cost not exceeding $300,000," is legislation.

Mr. PADGETT. I want to say to the gentleman that these slips are old and worn out and it is necessary to have new slips.

Mr. BATHRICK. The gentleman can offer an amendment, and I desire to debate the amendment.

Mr. PADGETT. This really ought to be in; the slips are very much needed.

Mr. BATHRICK. I will reserve the point of order.

Mr. PADGETT. Will not the gentleman withdraw the point of order and let us debate the merits of the proposition?

Mr. BATHRICK. Mr. Chairman, I will withdraw the point of order.

Mr. COX. I renew the point of order in the interest of time. I am going to make the point of order on the paragraph.

The CHAIRMAN. The point of order is sustained.

Mr. ROBERTS of Massachusetts. Does the gentleman from Tennessee, chairman of the committee, intend to offer an amendment? If not, I have one prepared.

Mr. PADGETT. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 25, by inserting in lieu of the paragraph stricken out the following:

"Navy yard, Charleston, S. C.: Paving and grading, to continue, $1,000; locomotive and crane shed, $5,000; remodeling dispensary, building No. 19, $3,000; toward torpedo boat berths, $150,000; in all, $159,000."

Mr. BATHRICK. Mr. Chairman, I want to inform the House that I make this point of order for the purpose of attempting to prevent useless and unnecessary expenditure. I do not believe in that kind of economy which pulls down the shutters and locks the door and quits business. On the other hand, I believe that all the gentlemen in the House should join in excluding from this appropriation bill those items that are not necessary.

They have 10 piers in Charleston Harbor now that cost $100,000. This item was put into the bill last year and taken out in conference. That was the condition of it then. It reappears in this bill. What is the necessity that they claim for this $300,000 appropriation, with which they expect to build cement piers? They claim that the current of the stream where they anchor the torpedo boats is so swift that they can not handle the torpedo boats to good advantage without possibility of damage to them or to the piers, but on the same page the hearings state that there are 12 tugs, and those tugs are manned and fully equipped. Why do they not use the tugs to handle the boats instead of asking us for $300,000? In all the harbors of the United States there is hardly one where vessels without assistance can reach their moorings; but we have these tugs, we are maintaining them, and we are maintaining the men upon them, and still they want us to expend $300,000 so that the torpedo boats can float safely alongside the piers. Another objection I desire to call to the attention of the House is this: The harbor at Charleston is frequently referred to as lashed by storms. That being the case, what kind of a harbor is it? People who have been to Charleston know they do have very severe storms in that harbor. There are many other places upon the Atlantic coast where they can keep these torpedo boats without expending $300,000, and I maintain it is not necessary for them to expend it.

Mr. PADGETT. Mr. Chairman, I simply want to state that the Navy Department has made the Charleston yard the torpedo-boat base of the whole torpedo-boat flotilla, because it is free from ice and it is well adapted to the purpose. The gentleman speaks about having so many tugs. That is in the whole Navy Department. They are not at Charleston, I understand.

Mr. BATHRICK. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BATHRICK. Let us read what the hearings say. I read from page 162. Admiral Stanford, when before the committee, said:

Under the existing conditions it is practically impossible to avoid damage to both the piers and boats. There are frequently at these piers 5 effective destroyers and 15 torpedo boats, of a total value exceeding $5,000,000, to which may be added 9 boats of less military value but which would bring the total to more than $6,000,000. If to this be added 12 tugs, colliers, and other vessels stationed at Charleston—

What does that mean?

Mr. PADGETT. It means tugs and colliers and other vessels.

Mr. BATHRICK. They have 12 tugs.

Mr. PADGETT. No; it means that there are 12 vessels, composed of tugs, colliers, and other vessels.

Mr. BATHRICK. Then let that be the construction placed upon it. I want to say that if there are not 12 tugs they have enough tugs to operate these vessels.

Mr. COX. Is not this the same place where they built piers a few years ago?

Mr. BATHRICK. I do not know how long ago they were built, but it is not so very long ago since we expended $100,000 there for piers.

Mr. COX. And they failed because of some neglect or something of that kind?

Mr. PADGETT. They were piers that were located there. They were not properly located. They were wooden piers. They have been destroyed.

Mr. COX. How long ago were they constructed?

Mr. PADGETT. Ten years.

Mr. COX. That is not very long ago. They are surely not destroyed.

Mr. PADGETT. The teredos have eaten them up.

Mr. COX. It strikes me that if the Navy Department had exercised proper judgment and skill and built the right kind of piers in the first instance there would be no necessity for this.

Mr. BATHRICK. I do not think there is any necessity now for them. I want to say one thing more. If I understand it, that item in the paragraph did not pass the subcommittee, which is the appropriation committee of the Naval Affairs Committee, by unanimous vote.

When it came into the full committee I offered an amendment to strike out this $150,000 of this $300,000 expenditure, but it passed by a majority of only 1 in the full committee.

Mr. MANN. Mr. Chairman, I do not like to call the gentleman to order——

Mr. BATHRICK. I accept the call to order, but that is the fact.

Mr. MANN (continuing). But I think we ought not to get into the practice of reciting in the House the vote in the committee.

The CHAIRMAN. The Chair will call the attention of the gentleman to the fact that under the rules a Member is not permitted to state what transpired in a committee.

Mr. HOBSON. Mr. Chairman, I want to be heard on the merits of the case.

Mr. PADGETT. Mr. Chairman, I say debate is closed on this matter and I demand a vote.

Mr. HOBSON. Mr. Chairman, I desire to be heard.

The CHAIRMAN. The gentleman from Tennessee, chairman of the committee——

Mr. HOBSON. I am in favor of this amendment. If I were opposed to the amendment the Chair would hear me.

The CHAIRMAN. The question is on the amendment——

Mr. HOBSON. Mr. Chairman, I desire to be heard. I move to strike out the last word. I ask to be recognized. The chairman of the committee has nothing to say——

Mr. PADGETT. I move to close all debate on the amendment; we must make some progress on this bill.

The CHAIRMAN. The gentleman from Tennessee moves to close all debate on the amendment.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. BATHRICK) there were—ayes 52, noes 37.

Mr. BATHRICK. Tellers, Mr. Chairman.

The CHAIRMAN. Those in favor of taking this vote by tellers will rise and stand until counted. [After counting.] Seventeen gentlemen have risen, not a sufficient number.

So the amendment was adopted.

The Clerk read as follows:

Navy yard, Mare Island, Cal.: Grading and paving, $10,000; railway system, extensions, $5,000; salt-water flushing and fire-protection system, $25,000; reconstructing quay wall, $20,000; modernizing electric-power and light-distributing systems, $20,000; in all, $80,000.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word. I desire my position on the last paragraph to be understood. I am against the building of these new piers at that station until it is settled what we propose to do permanently with that station. We have already made large expenditures at Port Royal and have abandoned that station.

Mr. PADGETT. No; we are using it.

Mr. HOBSON. Abandoned it for the purpose for which it was intended.

Mr. PADGETT. And using it for a far better one.

Mr. HOBSON. I yield to the gentleman to state what we use the dock at Port Royal for. We have established a marine-instruction school ashore, but that has nothing to do with the expenditure of millions of dollars for a naval station there that has proved impossible, and a big dry dock. The hearings and statements show that currents run across there in front of this station, making it difficult, if not dangerous, for torpedo boats to come in and go up to their berthings, and I think it is a very questionable matter whether this shall be developed into a permanent torpedo-boat station. I believe some other site will be chosen, and, in my judgment, Pensacola will be the ideal station. The point I make is, we ought not to launch out upon a new construction that requires large expenditures until we settle definitely upon a policy for these stations and these navy yards. I may remark, in closing, that I am in hopes before very long we shall have an instrumentality or agency under which this whole question of policy of coaling stations and the policy of naval stations and navy yards and all other important policies of the department may be determined.

Mr. GREGG of Texas. I am glad the gentleman is converted at the eleventh hour; that is what we have been fighting for all day.

Mr. HOBSON. If the gentleman will use his memory, he will remember I have always been opposed to this proposition. Whenever there is proposed any meritorious measure that would actively bear upon the efficiency of the service and be a real economy, I think the gentleman would find me supporting it.

Mr. GREGG of Texas. But the gentleman always reserves the right to be the judge of what is meritorious and what is not, does he not?

Mr. HOBSON. Like the gentleman from Texas.

Mr. PAYNE. Mr. Chairman, I understood the gentleman from Alabama was explaining why he voted for this last amendment. I think perhaps I ought to explain to the committee why I failed to vote upon the subject. We have for a great many years been providing at Charleston Navy Yard money which might have as well been put upon some creek of South Carolina to dredge out a channel to take a ship into it, and when I looked over upon the other side and saw the two economists from Mississippi sitting there dumb and mute and not raising their voices in protest against this item, and I saw the other economist from Texas rise and vote for it, I was so mixed up on the question I could not make up my mind how or where to vote.

If I had voted I should have voted against the navy yard in Charleston because of my previous information on the subject. But because of lack of information from the three economists of the House upon this subject I did not vote at all. I think that is due to the committee in view of the fact that the gentleman from Alabama [Mr. HOBSON] saw fit, as a member of the committee, to take up so much time to explain his vote upon the last amendment.

Mr. BATHRICK. A parliamentary inquiry, Mr. Chairman.

Mr. SISSON. I will say that "the gentleman from Mississippi" voted against the item.

Mr. PADGETT. I make the point of order that there is nothing before the House, and will ask the Clerk to read.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

Navy yard, Puget Sound, Wash.: Ship fitters' shop, mold loft, and structural steel storage (to cost not exceeding $275,000), $120,000; power-plant extensions, $50,000; Pier No. 8, to extend, $10,000; paving and walks, $10,000; linseed-oil storage tanks, $4,000; sewer system, extensions, $30,000; telephone system, extensions and renewals, $2,000; heating system, extensions and renewals, $10,000; rebuilding Pier No. 1, $10,000; in all, navy yard, Puget Sound, Wash., $246,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the chairman of the committee the reason for this structural-steel storage plant?

Mr. HUMPHREY of Washington. If the gentleman will permit, I will be glad to give him some information on the question.

Mr. FOWLER. Yes; I will yield for a moment.

Mr. HUMPHREY of Washington. I want to furnish, if I can, the information which the gentleman asks. I am reading from the hearings. The chairman of the committee said:

The next item is "Ship fitters' shop, mold loft, and structural-steel storage, to cost $275,000, $120,000." Please explain that item, Admiral?

Admiral Stanford replied:

That is a new building which is desired to permit of the consolidation and concentration of tools, shops, and materials. It is desired not only for the purpose of effecting consolidation, but to provide increased shop facilities.

Mr. FOWLER. Where are the tools stored now?

Mr. HUMPHREY of Washington. Wait until I finish the reading.

Mr. FOWLER. I will be glad to take it as we go along. I do not care to hear all the reading.

Mr. HUMPHREY of Washington. There are only two lines more.

Mr. FOWLER. All right.

Mr. HUMPHREY of Washington. This is the line to which I want to call the gentleman's attention:

It is represented that the consolidation will not only very greatly increase the usefulness of the yard but also reduce the cost of shop operation.

Mr. FOWLER. Where are the tools stored now?

Mr. HUMPHREY of Washington. They are stored in smaller buildings there, I presume.

Mr. FOWLER. Do you speak from actual knowledge, or do you speak as a matter of imagination?

Mr. HUMPHREY of Washington. Unlike the gentleman, I am speaking from the record and not from imagination. I am simply quoting from the statement made by the admiral, who is supposed to know.

Mr. FOWLER. Have you ever been at that yard?
Mr. HUMPHREY of Washington. A great many times.
Mr. FOWLER. And do you know of your own personal knowledge where they store these tools?
Mr. HUMPHREY of Washington. I know of my own personal knowledge that they put the tools in buildings now in the yard.
Mr. FOWLER. What will be done with these buildings if new ones are erected?
Mr. HUMPHREY of Washington. Will the gentleman permit me again to quote the authority?
Mr. FOWLER. If it is directly on the use of these storage buildings, I have no objection.
Mr. HUMPHREY of Washington. It is directly upon that subject. It says:

This building would be used for shop purposes to increase their facilities.

In other words, this building proposes to incorporate the buildings now used for that purpose and increase facilities so as to increase economy of operation as well as to give them room in the extension of the yard.
Mr. FOWLER. Have you not any shops over there?
Mr. HUMPHREY of Washington. A great many of them.
Mr. FOWLER. Do you need any additional shops?
Mr. HUMPHREY of Washington. Why, surely. If there is anywhere in any yard of the United States where shops are needed. I know that every member of the Naval Committee will agree that that is the one place. There is no objection.
Mr. PADGETT. This is a new yard, in the course of construction.
Mr. HUMPHREY of Washington. It is the only yard on the Pacific Ocean where they can dock battleships, and no one has ever talked about abandoning this yard, and everybody agreed it ought to be increased, as this adds to the facilities.
Mr. FOWLER. Is it not a fact that you want this appropriation for the purpose of giving additional work over on the Pacific coast?
Mr. HUMPHREY of Washington. Not at all. I never have asked for that, and I would be ashamed to stand up before this committee, or anywhere else, and ask for an appropriation on such a theory.
Mr. FOWLER. You are quite a gentleman, and I must confess it on the floor of this House.
Mr. HUMPHREY of Washington. You never heard me ask for an appropriation of that kind, and you never will.
Mr. FOWLER. But it appears to me from what has been said that there is no great reason for the construction of such an elaborate storehouse for tools.
Mr. DYER. Has the gentleman read the hearings?
Mr. FOWLER. Only in so much as I have been able to glance over them during the debate on this bill. It came in one night, and the next morning it was dressed in a garb for hearing.
Mr. SIMS. If the gentleman will permit me, I wish to say that it was only said that it was represented to be needed. It was not claimed that it would really be needed.
Mr. FOWLER. Yes; I understand. The gentleman from Tennessee [Mr. SIMS] called my attention to the representation to the effect that the hearings purported to impart that information to the House. As a matter of fact, does not the gentleman really think that such an expensive building is useless for the mere storage of tools?
Mr. HUMPHREY of Washington. I think it would be a very great advantage to have it, for the reasons set forth, for purposes of economy and the supplying of needed room, and for the further purpose which they are trying to demonstrate there—the economy of consolidation. That is the one yard in the country where they are consolidating these buildings.
Mr. FOWLER. That is a deep-water yard, is it?
Mr. HUMPHREY of Washington. It is.
Mr. FOWLER. What is the depth of that water?
Mr. BUTLER. Sixty feet.
Mr. CALDER. One hundred feet in some places.
Mr. FOWLER. Mr. Chairman, I do not want to make the point of order unless it is necessary, but it appears to me that a point of order ought to be made against this paragraph, and therefore I now make it, not for the purpose of punishing any gentleman on the floor of this House, but in the interest of economy.
Mr. DYER. Regular order, Mr. Chairman.
The CHAIRMAN. The point of order is sustained.
Mr. PADGETT. Mr. Chairman, I offer the following amendment for navy yard, Puget Sound.
Mr. FOWLER. Mr. Chairman, I did not understand whether the Chair has sustained the point of order or not.
The CHAIRMAN. He has.
Mr. PADGETT. Mr. Chairman, I offer the following amendment.
The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].
The Clerk read as follows:

On page 20, after line 5, insert the following:
"Navy yard, Puget Sound, Wash.: Ship fitters' shop, mold loft, and structural steel storage, $120,000; power-plant extensions, $50,000; Pier No. 8, to extend, $10,000; paving and walks, $10,000; linseed-oil storage tanks, $4,000; sewer system, extensions, $30,000; telephone system, extensions and renewals, $2,000; heating system, extensions and renewals, $10,000; rebuilding Pier No. 1, $10,000; in all, navy yard, Puget Sound, Wash., $246,000."

Mr. DYER. Mr. Chairman, I move to strike out the last word.
The CHAIRMAN. The gentleman from Missouri [Mr. DYER] moves to strike out the last word.
Mr. DYER. I would like to ask the chairman of the committee a question. Is it not preferable that the limit of cost for these buildings should be fixed?
Mr. PADGETT. Very much so.
Mr. DYER. Is there any possible way that the Government can be benefited by striking out the limit of cost?
Mr. PADGETT. None that I know of.
Mr. DYER. And there is a possibility of its costing a great deal more if we do not limit it and fix the limit?
Mr. PADGETT. I think not. I think it will be properly taken care of.
Mr. SISSON. Mr. Chairman, I would like to ask one more question. I did not make the point of order, but I stated to the committee that I thought $275,000 was a considerable price to pay for a tool house.
Mr. PADGETT. This is not alone for a tool house, but for a combination of shops.
Mr. SISSON. I suppose the only information that the gentleman from Tennessee has is the information contained in the hearings? Is it?
Mr. PADGETT. Yes.
Mr. SISSON. The information in the hearings is very meager. I do not know but that $275,000 is necessary; but with this meager information contained in the hearings, it is quite possible that this item might go over till the next session of Congress, until we can get further information about it. You are building a new building there, and the committee has no information about the matter except what is given in the hearings. I have read that, and that gives no definite information about the necessity of this building except for the storage of tools.
Mr. PADGETT. Yes; it states the general purposes and the necessity for the consolidation of the work and the machine shops. It states that it is a consolidation work.
Mr. SISSON. I think the gentleman overstates what is stated in the hearings. That may be the purpose of it, but I do not recollect the hearings just in that way. Now, if the cost is limited to $120,000, I have no objection to the item going in.
Mr. PADGETT. It is to increase the shop facilities, and all of that.
Mr. SISSON. I understand. I comprehend the language that the gentleman read. I have read that myself.
Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman from Mississippi [Mr. SISSON] yield?
Mr. SISSON. Now, that language does not cover the item that the gentleman referred to a moment ago, as I take it. It does not seem to be a workshop.
Mr. PADGETT. Yes; it is intended for an enlarged workshop, to increase the facilities for work at the yard.
Mr CALDER. The ship fitters' shop is the principal shop in a navy yard. It manufactures most of the things that go into the ships.
Mr. SISSON. That may be absolutely true, but I am trying to get the information whether $275,000 would not be too much, and, if the appropriation is made, whether that will be the limit of the cost of the shop or not.
Mr. ROBERTS of Massachusetts. Does the gentleman yield for a question?
Mr. SISSON. I do.
Mr. ROBERTS of Massachusetts. I wish to ask the gentleman whether he knows what the ship fitters' shop is?
Mr. SISSON. I do not.
Mr. ROBERTS of Massachusetts. The ship fitters' shop is a great big machine shop filled with planers and drills and all sorts of machines for working iron, steel, and other metal. As the gentleman from New York has said, it is one of the principal machine shops in every navy yard.
Mr. SISSON. I am glad to get that information.
Mr. ROBERTS of Massachusetts. Now, with regard to the limitation that the committee placed on the cost of this build-

ing, if the gentleman will look back through other years he will find that the committee have been authorizing similar shops in other yards at a cost, in some instances, as high as $350,000. In this particular case not only will this building be a great big machine shop, but it will be a storage building. The upper part of it will probably be utilized for storage.

Mr. SISSON. I want to state to the gentleman that I had a conversation a moment ago with a member of the Naval Committee, who stated that he himself was not very well satisfied with the showing that was made in the hearing, and it was upon that information that I made the inquiry. Frankly, I do not know whether $275,000 is enough. It may be entirely too small an amount. I want the navy yard to have whatever is necessary, and if it is necessary to have this amount of money, I do not object to it.

Mr. ROBERTS of Massachusetts. Mr. Chairman, in the present form of the proposition there is no limit of cost on this building. The point of order made by the gentleman from Illinois struck out the limitation of cost, and the subsequent motion of the chairman of the committee will, if adopted, provide for a building without any limit of cost on it.

Mr. SISSON. Then, I think a proviso should be put in there.

Mr. ROBERTS of Massachusetts. That has been done in several instances, and this desperate effort on the part of Democrats to economize results in striking out the provisions that would insure economy.

Mr. SISSON. I will state to the gentleman that I will not do that. I want to offer this amendment, to insert the words—

Provided, That the ship fitters' shop, mold loft, and structural-steel storage plant shall not exceed in cost $275,000.

Mr. CALDER. Make it $250,000.

Mr. SISSON. I put it at $275,000, the amount that was asked for. I want that proviso at the end of line 14.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 26, amend the amendment by adding at the end thereof the following:

"*Provided*, That the ship fitters' shop, mold loft, and structural-steel storage plant shall not exceed in cost the sum of $275,000."

Mr. ROBERTS of Massachusetts. Mr. Chairman, I reserve a point of order.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the amendment.

Mr. ROBERTS of Massachusetts. Regular order, Mr. Chairman.

Mr. SISSON. Now, Mr. Chairman, if I may, I want to state my reasons for this.

Mr. ROBERTS of Massachusetts. Regular order, Mr. Chairman.

Mr. SISSON. I simply desire to state to the Chair that it is a limitation upon the appropriation.

Mr. ROBERTS of Massachusetts. If I understand correctly, when the regular order is demanded a point of order reserved must either be made or withdrawn.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. SISSON. Mr. Chairman, I would like to be heard.

Mr. FOWLER. Mr. Chairman, I have reserved the point of order.

Mr. ROBERTS of Massachusetts. I call for the regular order.

Mr. FOWLER. Well, Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is overruled. The question is on the amendment offered by the gentleman from Mississippi to the amendment.

The amendment to the amendment was agreed to.

The CHAIRMAN. The question now is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

Mr. AYRES. Mr. Chairman, I offer the following amendment, to be inserted in the bill as a new paragraph.

The Clerk read as follows.

Insert as a new paragraph the following:

"That the Secretary of the Navy shall appoint a commission, to serve without pay other than actual expenses incurred, to consist of three persons, one of whom shall be appointed from the line officers and one from the staff officers of the Navy and one from civil life, which commission shall consider and report to the next regular session of Congress upon the question whether it is advisable to sell any of the navy yards, and if so, which; and, as to each of said yards said commission shall report as to its cost, its area, its present value, including in separate items the value of the land, structures, machinery, and other personal property; the depth of water at the yard, and whether it remains and will remain at such depth or will require expense to keep open its water communication; its condition as to being in working order or otherwise; the condition and value of its 'plant' in the different departments; its advantages and disadvantages as a naval station, and for the construction of vessels; its probable value for other purposes in case the yard is discontinued; whether there is any demand for the yard for mercantile or other purposes; whether it can probably be sold, and at what price, in case of discontinuance; the annual cost during each of the past 15 years of maintaining it; the value of what it has produced during each of said years, so far as it can be ascertained; its value or necessity for purposes of defense on that part of the coast where it is situated or in general, and also as regards any city in its vicinity; and any other facts which such commission may deem useful or advisable to report in regard to this question."

Mr. SAUNDERS. Mr. Chairman, I reserve a point of order upon that. I will make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Naval station, Guantanamo, Cuba: Recreation building for enlisted men, $30,000.

Mr. TRIBBLE. Mr. Chairman, I make the point of order to the paragraph, or I will move to strike it out.

Mr. COX. Mr. Chairman, I make a point of order.

Mr. PADGETT. Will the gentleman reserve the point of order?

Mr. COX. No; I think we must be getting along on this bill.

Mr. PADGETT. On what ground does the gentleman make the point of order?

Mr. COX. There is no law to support the appropriation, no organic law.

Mr. PADGETT. There is a station there, and we have 16,000 men there, and this building is to take care of them. There is no place to take care of these men.

Mr. COX. The language of the bill is that it is for a recreation building.

Mr. PADGETT. That is what it is.

Mr. COX. Is there any law that authorizes it, any law upon which to hang the appropriation?

Mr. PADGETT. There is a law establishing the station, and that carries with it the right of Congress to appropriate for whatever buildings are necessary.

Mr. COX. It might be necessary to have buildings to sustain life and health.

Mr. PADGETT. This is for the health of the men. The officers there have a building already, but the men have none.

Mr. COX. Perhaps the officers ought not to have had a recreation building at public expense. I make a point of order on it.

Mr. PADGETT. Mr. Chairman, I do not think it is subject to a point of order.

Mr. DYER. It is a work in progress.

Mr. COX. It is not a work in progress.

Mr. HOBSON. Mr. Chairman, in a tropical country or a subtropical country, like Cuba or the Philippines, it is recognized as one of the necessities for the health to have such a building as this would be. This is as much of a necessity down there as any shop or other building would be in a navy yard or a naval station in a higher latitude. If anyone has ever stayed there in a rainy season and seen the constant rains and the depression of it all, they would recognize that it is absolutely essential for the health of the men that they should have this opportunity and convenience.

Mr. BATES. Will the gentleman yield for me to read what Admiral Stanford said upon this matter?

Mr. HOBSON. I should be glad to have the gentleman do it.

Mr. BATES. I will read:

Admiral STANFORD. As Guantanamo will probably be the permanent base of the Atlantic Fleet during the winter months, steps should be taken to equip the station with facilities for the entertainment and amusement of the enlisted men.

A building has already been provided for the use of commissioned officers and the erection of a building for warrant officers has been authorized. There is, however, nothing provided for the enlisted men except a small Young Men's Christian Association building on Deer Point, which is inadequate both in size and equipment. To the end that this deficiency may be corrected, the commander in chief recommends an appropriation of $30,000 for the purpose of erecting a suitable recreation building, such building to accommodate a large recreation hall, reading and writing rooms, billiard rooms, bowling alleys, etc. The construction need not be of an elaborate design, and it is thought that for the modest sum mentioned a most suitable building can be constructed; and the equipment can be supplied from the profits of the canteen.

Mr. Chairman, I think in the interest of the enlisted men that this ought not to be objected to.

Mr. HOBSON. Mr. Chairman, at nearly every military station you will find a post exchange. This is the counterpart of a post exchange, and no point of order would lie against an appropriation for a post exchange.

The CHAIRMAN. The Chair is prepared to rule.

Mr. BATES. Mr. Chairman, will the Chair permit me to read two or three lines further as to the character of the building proposed?—

Wood frame, covered with galvanized corrugated iron, with showers, toilet facilities, and lighting. No heat will be required.

The CHAIRMAN. How many men are there?

Admiral STANFORD. Probably 30 or 40 vessels, averaging 750 men each.

There are about 16,000 enlisted men.

Mr. TRIBBLE. Is it not a fact that they have shifted that station once since it was located there, and that they now propose to move it to a different place?

Mr. BATES. I think not.

Mr. PADGETT. Not at all.

Mr. TRIBBLE. Was not that in the hearings?

Mr. BATES. This is a part of the Naval Establishment.

Mr. TRIBBLE. Is it not a fact that on account of that shift there is no appropriation made for this station, and that this committee intends to start from here next week to see whether or not there ought to be a station at Guantanamo?

Mr. PADGETT. There is one there.

The CHAIRMAN. The Chair is of opinion that the paragraph is obnoxious to Rule XXI, paragraph 2, as new legislation, and calls attention to paragraph 3755 of Hinds' Precedents, volume 4, as a case in point:

The construction of barracks at a navy yard was held not to be the continuation of a public work or object. On May 17, 1902, while the naval appropriation bill was under consideration in Committee of the Whole House on the state of the Union, the paragraph was read making appropriation for various improvements and repairs at the navy yard, New York.

Thereupon Mr. JOHN J. FITZGERALD, of New York, offered the following amendment:

"On page 28, line 15, after the word 'dollars,' insert 'barracks for enlisted men to cost $500,000, $200,000.'"

Mr. GEORGE E. FOSS, of Illinois, made a point of order.

After debate the Chairman held:

"The rule invoked in this instance by the chairman of the committee is one which has not at all times and by all Chairmen been similarly interpreted. In the opinion of the present occupant of the chair a rather large hole was driven through the rule in order to permit the construction of battleships without special authorization; but it seems to the Chair that the entering upon the construction of barracks in the way suggested by this amendment is the entering upon a new line of work. It is not a necessary adjunct to the New York Navy Yard. It is not, in the opinion of the Chair, under a strict interpretation of the rule, a proper amendment. It is, in the opinion of the Chair, under a fair construction of the rule, obnoxious to it. The statute expressly provides, in reference to barracks for the Army, that they can not be constructed except after specific estimates therefor shall come to the House, and then only by a special act providing for them. Now, while that does not apply to the Navy, it seems to the Chair that in interpreting the rule it is fair to consider that provision. As the Chair intimated, the decisions have not been identical; but the notion of the Chair is borne out by ample precedents that this amendment is not in order, and the Chair therefore sustains the point of order."

The Chair thinks that case cited is in point, and sustains the point of order.

The Clerk read as follows:

Naval station, Pearl Harbor, Hawaii: Water-front development, $100,000; water system, $30,000; power distribution, mains and conduits, $65,000; railroad equipment, $30,000; boat landings, $5,000; two officers' quarters, $24,000; torpedo-boat slips, $50,000; ice plant and refrigerating system, $25,000; one dry-dock crane, $100,000; marine railway, $100,000; naval hospital, to continue, $100,000; in all, $629,000.

Mr. TRIBBLE. Mr. Chairman, I make the point of order against the words "two officers' quarters, $24,000."

Mr. ROBERTS of Massachusetts. Mr. Chairman, I do not think the point of order in this case will lie, because the organic act creating this naval station made provision and allowance for all the different classes of buildings that would be necessary for a fully equipped station, and all these other items come under that provision.

Mr. BATHRICK. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of Massachusetts. Yes.

Mr. BATHRICK. I desire to ask the gentleman if he does not think it a little strange that a point of order will lie against a building for enlisted men to cost $30,000 and will not lie against one for officers to cost $24,000?

Mr. ROBERTS of Massachusetts. It depends entirely upon the authorization.

Mr. TRIBBLE. Mr. Chairman, I will refer the Chair to volume 4 of Hinds' Precedents, section 3758:

An appropriation for officers' quarters at a navy yard is not in order on the naval appropriation bill as in continuance of a public work.

Mr. BATES. Mr. Chairman, may I read the organic law, which I had the honor to present in this House?

Pearl Harbor, Hawaii: The Secretary of the Navy is hereby authorized and directed to establish a naval station at Pearl Harbor, Hawaii, on the site heretofore acquired for that purpose, and to erect thereat all the necessary machine shops, storehouses, coal sheds, and other necessary buildings, and to build thereat one graving dry dock capable of receiving the largest vessels of the Navy, etc.

Now, I believe, Mr. Chairman, that a fully equipped naval station such as this act of Congress contemplated—and this was purely a piece of legislation, which included the words "with all necessary buildings"—would certainly include officers' quarters, because a naval station of the size contemplated for Pearl Harbor would be certainly incomplete without sufficient quarters for the officers who would be in charge of that station, and therefore it would clearly come under the express words "and other necessary buildings." It is the act of May 3, 1908, found on page 599 of the Navy Yearbook.

The CHAIRMAN. The Chair is of the opinion that the point of order made by the gentleman from Georgia is not well taken, in view of the statute establishing the naval station.

Mr. TRIBBLE. I move to strike out, on page 26, lines 20 and 21, the words and figures "water-front development, $100,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 26, lines 20 and 21, strike out the words and figures "water-front development, $100,000."

Mr. ROBERTS of Massachusetts. If the gentleman will yield, I would like to ask him a question. Does the gentleman from Georgia [Mr. TRIBBLE] think he could see any more in a navy yard or understand its operations any better if he went there in his official capacity rather than as a plain individual?

Mr. TRIBBLE. If I went there in an official capacity I would make an inspection. I would consult the officers and men in charge of the navy yard, and they would show me the courtesy of explaining the navy yard to me.

Mr. ROBERTS of Massachusetts. Let me say to the gentleman that if he will go to any navy yard of this country and tell them that he is a member of the Committee on Naval Affairs he will see as much of it as if he had gone there with every other member of the Naval Committee, and just as much courtesy will be shown him. What I asked the gentleman was, if he thought he could see any more in a navy yard or understand its operation any better if he went there in his official capacity than as a plain individual?

Mr. TRIBBLE. In what kind of an attitude does the gentleman think I would be if I went down to the Norfolk Navy Yard or to the Boston Navy Yard and said that I was a member of the Naval Committee and came there to inspect the yard?

Mr. ROBERTS of Massachusetts. If the gentleman really wanted information they would give it to him at first hand, and they would welcome him and show him courtesy in every yard he entered.

Mr. GARNER. Mr. Chairman, a parliamentary inquiry. What is before the House?

Mr. PADGETT. Mr. Chairman, I move that all debate on this paragraph and all amendments be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. TRIBBLE].

The question was taken, and the amendment was rejected.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent to return to line 18, page 26, for the purpose of correcting a misspelled word to which my attention has just been called. In the copy of the bill before me, which I understand is a copy that all Members have, the word "pontoons" is spelled with only one "o" in the second syllable. There should be an "o" added.

The CHAIRMAN. Without objection, the correction will be made.

There was no objection.

Mr. TRIBBLE. I move to strike out, on page 27, line 2, "marine railway, $100,000." As the chairman has cut off debate, I would like him to state what a marine railway is. I do not think the Members of this House know.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 27, line 2, strike out the words "marine railway, $100,000."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia [Mr. TRIBBLE].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Hereafter pilotage receipts at Pearl Harbor, Hawaii, may be applied by the Secretary of the Navy, so far as may be necessary, not exceeding $3,000 per year to payment of the salary of the harbormaster at said port.

Mr. TRIBBLE. Mr. Chairman, I make a point of order against that paragraph.

Mr. FOWLER. And I make a point of order against that paragraph.

Mr. PADGETT. It is good legislation, Mr. Chairman, but it is subject to a point of order.

Mr. TRIBBLE. Mr. Chairman, I think the statement of the gentleman is entirely unauthorized and out of order.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Buildings and grounds, Naval Academy: For the purchase of the necessary land for the location of the Naval Academy dairy, at some point in the vicinity of Annapolis, Md., convenient for communication and for the transportation of dairy products from the location of the

dairy to the Naval Academy, and for the transfer to new dairy site, and reerection thereon, of buildings belonging to the present dairy, the repair and alteration of such buildings as may be found on the land to be purchased, and for all other necessary purposes connected with the establishment of a dairy on such land, $100,000: *Provided*, That the cost of said land shall not exceed $75,000: *Provided further*, That the amount appropriated for this purpose shall be treated as an advance to the midshipmen's store fund at the Naval Academy, to be ultimately repaid to the United States.

Mr. TRIBBLE. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. The gentleman must wait until the Clerk has finished reading the paragraph. It is not in order to make the point now. The Clerk will proceed.

The Clerk read the remainder of the paragraph, as follows:

And provided further, That expenditures hereunder shall be reported by the Chief of the Bureau of Supplies and Accounts to the Secretary of the Navy in the same manner as now prescribed by law for the midshipmen's store fund; wharf and approach (to cost not exceeding $125,000), $50,000; in all, $150,000.

Mr. FOWLER, Mr. TRIBBLE, and Mr. HENSLEY, respectively, made a point of order against the paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER], the gentleman from Georgia [Mr. TRIBBLE], and the gentleman from Missouri [Mr. HENSLEY] make a point of order against the paragraph.

Mr. LINTHICUM. Mr. Chairman, I ask that the gentleman from Georgia [Mr. TRIBBLE] will reserve the point of order for a few minutes.

Mr. FOWLER. I make the point of order.

The CHAIRMAN. Will the gentleman from Georgia reserve the point of order?

Mr. TRIBBLE. No. I will not reserve it.

Mr. HENSLEY. I insist upon the point of order, Mr. Chairman.

Mr. BATES. I call for the regular order, Mr. Chairman.

Mr. TRIBBLE. I will reserve the point of order.

The CHAIRMAN. The regular order is demanded. The point of order is sustained.

Mr. LINTHICUM. Mr. Chairman, I understand the gentleman from Georgia [Mr. TRIBBLE] reserves his point of order.

The CHAIRMAN. The point of order is insisted upon.

Mr. TRIBBLE. I reserve the point of order, Mr. Chairman.

Mr. LINTHICUM. Mr. Chairman——

The CHAIRMAN. Three gentlemen have made the point of order.

Mr. PADGETT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PADGETT. Was the point of order made to the whole paragraph, or only down to the word "fund," on page 28, line 3?

The CHAIRMAN. The point of order was made against the paragraph.

Mr. PADGETT. Then, Mr. Chairman, I offer as an amendment a new paragraph.

Mr. LINTHICUM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LINTHICUM. I should like to know who made the point of order.

The CHAIRMAN. The gentleman from Missouri [Mr. HENSLEY].

Mr. LINTHICUM. I will ask the gentleman from Missouri to reserve his point of order for a moment, until I can explain the item.

The CHAIRMAN. It is now too late.

Mr. TRIBBLE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TRIBBLE. The gentleman from Tennessee [Mr. PADGETT] now proposes to use the words "wharf and approach, not to exceed $125,000." He proposes to appropriate $50,000. Now, the gentleman from Tennessee undertakes to save this paragraph by using that language. The Chair will recall that I made the point of order before the Clerk read that part.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] is recognized.

Mr. PADGETT. Mr. Chairman, I offer an amendment as a new paragraph: "Buildings and grounds, Naval Academy: Toward the construction of wharf and approach, $50,000." [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The Clerk read as follows:

After line 9, page 27, insert the following: "Buildings and grounds, Naval Academy: Toward the construction of wharf and approach, $50,000."

Mr. ROBERTS of Massachusetts. Mr. Chairman, I offer an amendment to the amendment adding, after the words of the amendment, the following: "And the cost of the same shall not exceed $125,000."

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Amendment to the amendment: After the figures "$50,000" insert the following: "And the cost of the same shall not exceed $125,000."

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the amendment to the amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] reserves a point of order against the amendment to the amendment.

Mr. ROBERTS of Massachusetts. Now, Mr. Chairman, I made that amendment for a purpose. When the last preceding item of this kind was stricken out on a point of order, where the cost was limited, after the gentleman from Tennessee [Mr. PADGETT] offered an amendment the gentleman from Mississippi [Mr. SISSON] offered an amendment to the amendment limiting the cost. That was in relation to the ship fitters' shop at Puget Sound, at Bremerton, to which the gentleman raised a point of order, and the Chair then overruled the point of order.

Now, I thought if the Chair was going to overrule points of order against these limits of cost, we had better restore them as fast as they go out.

Mr. SISSON. Mr. Chairman, my amendment was not of the same character nor in the language of the gentleman's amendment at all.

Mr. ROBERTS of Massachusetts. It does not make any difference what the wording of it was. It was a limitation on the cost of the building. The gentleman will not deny that, will he?

Mr. SISSON. I was endeavoring to help out the gentleman and his Naval Committee when I offered that one; but I think his amendment is clearly subject to the point of order if the paragraph is subject to the point of order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if the limitation of cost is subject to a point of order, it is just as much subject to it if you say "provided that the cost shall not exceed so much," as it is if you say "the cost shall not exceed so much." It is simply splitting hairs.

The CHAIRMAN. The Clerk will report the amendment again.

The Clerk read as follows:

Page 27, after line 9, insert the following as a new paragraph: "Buildings and grounds, Naval Academy: Toward the construction of wharf and approach, $50,000."

Amendment to the amendment: Add, after the words "$50,000," the following: "And the cost of same shall not exceed $125,000."

The CHAIRMAN. The question is on the amendment to the amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, a point of order has been reserved against that. I call that to the attention of the Chair, having in mind the decision of the Chair on the amendment offered by the gentleman from Mississippi [Mr. SISSON] limiting the cost of the ship fitters' shop at the Puget Sound Navy Yard.

The CHAIRMAN. The language in the amendment offered by the gentleman from Tennessee [Mr. PADGETT] is qualified. It says:

Toward the construction.

Mr. MANN. I take it that the question would be whether the original amendment was subject to a point of order. I did not hear the decision of the Chair on the Puget Sound item.

The CHAIRMAN. There was no point of order made against the original amendment.

Mr. ROBERTS of Massachusetts. If the Chair will pardon me, a point of order was made, because the limit of cost of the building had been fixed at $275,000, and the Chair ruled that out. Thereupon the chairman of the committee [Mr. PADGETT] offered an amendment, toward that building, so much money, and the gentleman from Mississippi [Mr. SISSON] offered an amendment to the amendment, again limiting the cost to $275,000, to which I made a point of order; and the Chair overruled my point of order, and the amendment to the amendment was agreed to.

The CHAIRMAN. The Chair did not understand that——

Mr. MANN. I think that ruling of the Chair was correct, because the item itself offered as an amendment was subject to a point of order. That was the amendment providing for a new building; and being subject to a point of order, it was in order to offer a limitation. Whether this wharf and approach item is subject to a point of order I do not know. That is another question.

The CHAIRMAN. The Clerk will again report the amendment.

The amendment and the amendment to the amendment were again read.

The CHAIRMAN. Did the gentleman from Illinois [Mr. FOWLER] reserve a point of order to the amendment offered by the gentleman from Tennessee?

Mr. FOWLER. I reserved a point of order upon the amendment to the amendment.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. FOWLER. I make the point of order.

Mr. MANN. Will my colleague yield a moment?

Mr. FOWLER. Yes.

Mr. MANN. If this limitation goes out, then there will be no limitation on the cost of this wharf; and if we authorize its commencement, it then becomes a work in progress, which will authorize an appropriation of any size hereafter. So there is nothing gained by cutting off the limitation of cost.

Mr. FOWLER. Yes; but $125,000 limitation was intended to be a limitation upon the establishment of a dairy farm and not a limitation upon the establishment of a wharf and approach.

Mr. MANN. Oh, no; it is upon the wharf and approach.

Mr. FOWLER. No; because the approach is proposed by the bill to be completed for $50,000.

Mr. MANN. I think my colleague is mistaken. If he will look at page 28 of the bill, which he has there, in line 3, he will see that it reads:

Wharf and approach (to cost not exceeding $125,000), $50,000.

So that that limitation was upon the cost of the wharf. Now, without any limitation in the bill upon the cost of the wharf, if we commence it, the authority is given to appropriate any sum of money hereafter to complete it, and there will be no limit on the cost.

Mr. ROBERTS of Massachusetts. Will the gentleman from Illinois yield to me for a moment?

Mr. FOWLER. Yes.

Mr. ROBERTS of Massachusetts. I want to point out what one of these points of order has resulted in where somebody on the other side raised a point of order against the limitation of cost. Take the item for the 150-ton crane in the Norfolk Navy yard, to cost $300,000. In this bill that was reported at $100,000. The crane was to cost $300,000. The point of order was made against the paragraph because the limitation of cost was placed in it. The chairman of the committee promptly offered an amendment providing for a crane to cost $300,000 in the bill, and the gentleman's point of order has increased the bill $200,000. That is economy, I suppose?

Mr. FOWLER. The gentleman from Massachusetts voted for it, did he not?

Mr. ROBERTS of Massachusetts. Certainly; why should not I?

Mr. FOWLER. That is his idea of economy.

Mr. ROBERTS of Massachusetts. The gentleman's idea of economy was by making a point of order and striking out the item to cause an increase in the bill of the amount appropriated $200,000. His object in so doing is far beyond my conception.

Mr. FOWLER. The gentleman's idea of economy is when points of order are sustained against illegal provisions in the bill by the genius of his jingo policy he proposes to double or treble the amount by amendments.

Mr. ROBERTS of Massachusetts. The motion to double or treble the appropriation came from the other side and not from this side.

Mr. FOWLER. The gentleman himself helped to furnish votes to put into the bill the $300,000.

Mr. ROBERTS of Massachusetts. But if the gentleman from Illinois [Mr. FOWLER] had not raised the point of order, there would have been no opportunity to increase the amount.

Mr. PADGETT. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The question is on the amendment to the amendment.

Mr. FOWLER. Mr. Chairman, I did not understand the ruling of the Chair.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. Why, Mr. Chairman, it is clearly permanent legislation, not authorized by law.

The CHAIRMAN. The point of order is overruled, and the question is on the amendment to the amendment.

The question was taken, and the amendment to the amendment was agreed to.

The CHAIRMAN. The question now is on the amendment as amended.

Mr. LINTHICUM. Mr. Chairman, I want to say regarding this clause that has been stricken out with reference to the Naval Academy that it is a most important item. In 1910 there was an epidemic of sickness at the academy, and after it abated the gentlemen in charge purchased 125 cows. This money was taken from the midshipmen's store fund, and after this purchase the intestinal trouble and typhoid fever almost entirely disappeared.

According to the report made by Paymaster Bryan, from October 1, 1910, to September 30, 1911, during the time the academy was purchasing milk, there were 1,598 cases of sick leave, an average of 123 per month, and during the year after they had purchased the cattle it was reduced to 296 sick leaves, or less than 25 per month.

This 100 or 125 head of cattle are pastured on 6 acres of land, a part of the campus of the Naval Academy. The object of this appropriation was to buy some land adjoining their present tract, or just across the water, and to remove the buildings from that point over there where they could pasture cattle and grow their own corn for a silo, and where better milk could be had for the boys. At present they have but 6 acres of land to graze upon. If we purchased this land they would possess ample pasturage for their stock, which would not only result in a gain of more milk, but at the same time it would be cheaper. These boys do not come from any one section, they come from all over the country; they come from your district and my district, from homes where they have had every accommodation and every facility, to this school. All this appropriation asked was that we might buy some land to pasture the cattle and give them better milk and a better supply.

Mr. HENSLEY. Will the gentleman yield?

Mr. LINTHICUM. Let me say first that this money was not to be given permanently by the Government, but was to be charged against the midshipmen's store fund.

The boys were to pay this money back to the Government, so that in the end it would cost the Government nothing.

Mr. HENSLEY. Where were the butter and milk purchased before they established the dairy?

Mr. LINTHICUM. They had a contract with some people in the neighborhood, and when they could not furnish all they bought part of it from other people.

Mr. HENSLEY. Where everybody else got their butter—on the market?

Mr. LINTHICUM. No; they had a contract with a certain farmer to furnish them milk, and when he could not furnish a sufficient supply he bought from other people to comply with his contract.

Mr. HENSLEY. Mr. Chairman, I want to state to the gentleman that my position is this: Here is a proposition to buy so many hundred acres of land, without any sort of an effort made by anybody to ascertain what the land will cost, a lump-sum appropriation of $75,000 to buy a tract of land. There is no option obtained upon the land, nobody has made any effort to ascertain what the land will cost. It may be worth $10,000, $15,000, or $20,000, but as soon as this appropriation is made in this fashion the land will immediately enhance in value and, of course, become worth the full amount of the appropriation, and that is the reason why I raised the point of order.

Mr. LINTHICUM. Mr. Chairman, I think the gentleman could have implicit confidence in the men in charge of the Naval Academy, who have conducted it so admirably, and he could leave it to them.

Mr. CANTRILL. Mr. Chairman, I would like to ask the gentleman from Maryland where these cows came from?

Mr. LINTHICUM. These cows were purchased under the supervision of the Bureau of Animal Industry.

Mr. PAYNE. I make the point of order that there is no question before the committee.

Mr. CANTRILL. As I understand the gentleman, he said that the 125 cows cost $40,000.

The CHAIRMAN. The gentleman from Maryland has the floor on a motion to strike out the last word.

Mr. PAYNE. But I understood the paragraph had already been adopted, and nothing else has been read, so that the amendment would not be germane.

Mr. LINTHICUM. The $125,000 was for the cattle, the buildings, and the silo. The money by which these cattle and buildings were acquired was paid for out of money which the boys saved.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. PADGETT. Mr. Chairman, I will ask the gentleman to extend his remarks in the RECORD. I would be glad under other circumstances to accommodate him, but that item has been passed and it is out of the bill.

Mr. LINTHICUM. Mr. Chairman, I have been helping to keep this quorum here for two days and have not taken up any of the time of this House. I ask unanimous consent for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Chairman, I want to say to the gentleman that these buildings were purchased and constructed out of the money saved from the midshipmen's store fund. It was the intention of those who asked for this appropriation to secure this loan of $75,000, the money to be repaid the Government out of the store fund. In reality it was to cost the Government nothing. The boys were to pay the entire cost. It was merely a loan from the Government to the Naval Academy.

Mr. HENSLEY. Does the gentleman think it is a good business proposition for the Government to appropriate $75,000 for the purchase of so many acres of land without ascertaining what the land can be purchased for, or anything of that kind? Would that appeal to the gentleman as a business proposition? Now, it was for this reason I made the point of order against the item to which the gentleman refers.

Mr. LINTHICUM. If I had agents in whom I had implicit confidence and I wanted to acquire certain land in a certain community I would not hesitate to trust those agents to buy it.

Mr. COOPER. Mr. Chairman, will the gentleman permit an interruption?

Mr. LINTHICUM. Certainly.

Mr. COOPER. Would it not be proper to suggest in reply to the gentleman's question that this land was to be taken by the United States Government for a public purpose? Could it not condemn the land for that purpose and not be held up by the owner of the land?

Mr. LINTHICUM. Mr. Chairman, I desire to say to the gentleman that in my experience in public life condemnations have been expensive. I believe this land can be bought reasonably. I believe it can be bought far more reasonably to-day than it can next year or in the next two or three years. I know the community. It is my native county. I know the people and I know the money would be expended wisely and judiciously. I know it would prove a splendid investment for our Naval Academy to secure this land.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Naval proving ground, Indianhead, Md.: Addition to facilities, $29,000; storehouse for nitrate of soda, $15,000; in all, naval proving ground, Indianhead, $44,000.

Mr. SISSON. Mr. Chairman, I would like to ask the gentleman from Tennessee in regard to "addition to facilities, $29,000."

Mr. PADGETT. It is an addition to the facilities there for the manufacture of powder.

Mr. SISSON. Is that item technically correct?

Mr. PADGETT. Yes; because it consists of a number of items, adding to others so as to enlarge the capacity and output.

Mr. SISSON. There is where they manufacture the powder, and it is called "facilities."

Mr. PADGETT. Well, it is facility to manufacture there. It is a powder manufacturing plant, and that consists of a number of facilities. We add others of this kind here and there, and instead of specifying each one of them we say "addition to facilities."

Mr. SISSON. Almost everything could be paid for out of that item.

Mr. PADGETT. Yes.

Mr. SISSON. Whether it is in reference to powder or not, it could be paid for with reference to anything about the building.

Mr. PADGETT. There is nothing there except the manufacture of powder and the testing of guns.

Mr. BURNETT. Is the nitrate of soda used in the manufacture of powder?

Mr. SISSON. Yes.

The Clerk read as follows:

The Secretary of the Navy is directed to investigate and report at the next regular session of Congress the most suitable location for a new firing and proving range for high-power guns of the Navy in the vicinity of the proving grounds, Indianhead, Md., or elsewhere, having a free and unobstructed range of not less than 18,000 yards, and the cost thereof, and the Secretary of the Navy is authorized to secure options for the purchase of said land and report said options to Congress for its future consideration and action.

Mr. TRIBBLE. Mr. Chairman, I make the point of order against that paragraph.

Mr. PADGETT. Mr. Chairman, it is subject to the point of order.

The CHAIRMAN (Mr. GARRETT). The point of order is sustained.

The Clerk read as follows:

Engineering experiment station, Annapolis, Md.: Concrete sea wall, $50,000.

Mr. SISSON. Mr. Chairman, I reserve a point of order against the paragraph for the purpose of asking the gentleman from Tennessee what is the authority for the construction of this sea wall at this experiment station?

Mr. PADGETT. We have an experiment station there, and we own the ground, and the buildings are right on the bank, and the grounds are washing away.

Mr. SISSON. Does the organic act give this authority to the Congress to build a sea wall?

Mr. PADGETT. Certainly. This is on the academy grounds there, and we have had one at another point. It is within the act to appropriate to erect walls to preserve the property.

Mr. SISSON. Well, it is not specifically stated in the organic act that they may build a sea wall?

Mr. PADGETT. No; I do not know.

Mr. SISSON. This has nothing to do with the ordinary building of a building and grounds in reference to a college or school.

Mr. PADGETT. I have not looked up the act establishing the Naval Academy and acts amendatory thereof, but they have been building a sea wall there for years. We are doing experimental work there.

Mr. SISSON. That does not necessarily mean this item is not subject to the point of order.

Mr. PADGETT. I know; but we are building one, and have been for years.

Mr. SISSON. I understand that, but necessarily it does not prevent this being subject to the point of order.

Mr. PADGETT. I said to the gentleman I had not looked up the act establishing the Naval Academy or the amendatory acts.

Mr. SISSON. Mr. Chairman, I make the point of order. I would like the gentleman from Tennessee to show the authority for this appropriation.

Mr. PADGETT. Just a moment, Mr. Chairman. The experiment building stations are on filled ground projecting into the Severn River from the shore opposite the Naval Academy. The site is at present protected by timber and plank bulkheads, the areas between the bulkheads and the building being paved with brick. The timber work, although creosoted, is very badly eaten by the teredo. Large areas of the filling have washed out and the pavement has fallen in.

Mr. SISSON. But a statement of the testimony does not give the authority.

Mr. PADGETT. This is simply a rebuilding of an old wall, practically. We have got a wall there that has given way, and this is simply to rebuild and repair the wall that is there.

Mr. SISSON. The wall that is there is made of wood, is it?

Mr. PADGETT. Yes, sir.

Mr. SISSON. That is the testimony?

Mr. PADGETT. Yes.

Mr. SISSON. Where is the act; that is what I do not know?

Mr. PADGETT. When we established the station——

The CHAIRMAN. Are the gentlemen discussing the point of order?

Mr. SISSON. Yes; I wanted to know what the authority is to build it.

Mr. PADGETT. We have an existing wall there that has given way, and this is to rebuild and repair an existing public work, and it is not subject to the point of order.

The CHAIRMAN. The Chair overrules the point of order. The Clerk will read.

The Clerk read as follows:

Naval magazine, Mare Island, Cal.: One magazine building, $15,000; two filling houses, $2,400; extension of sea wall, $2,500; in all, $19,900.

Mr. KNOWLAND. Mr. Chairman, I move to strike out the last word. This morning, when the gentleman from Mississippi was addressing the House, he took occasion to make an attack upon the Mare Island Navy Yard, located in California. I want to say in this connection that the Mare Island Navy Yard——

Mr. SISSON. I want to say to the gentleman that there were two "gentlemen from Mississippi" who addressed the House this morning. It was the other gentleman who referred to the Mare Island Navy Yard. I said nothing about it.

Mr. KNOWLAND. I referred to the other gentleman from Mississippi [Mr. WITHERSPOON]. The gentleman's apology is accepted.

While after March 4 I will no longer represent the Mare Island Navy Yard, I nevertheless feel there should not go into the RECORD statements such as he made without being refuted, particularly in view of the fact that they were misstatements——

Mr. SISSON. I will ask the gentleman to yield for just a moment. I notice that my colleague from Mississippi [Mr. WITHERSPOON] is not on the floor. I want that to be noted in the RECORD.

Mr. KNOWLAND. I wish he were on the floor, because I would like to have him hear what I have to say. I want to state in reference to the Mare Island Navy Yard that it is one of the oldest, the best-equipped and most efficient navy yards in the whole United States. We have only two navy yards on the Pacific coast, the Mare Island Navy Yard and the navy yard located at Puget Sound. Mare Island is the best equipped of any Government yard outside of the one at Brooklyn, and is one of the two navy yards in the country thoroughly equipped for shipbuilding. We have built there the training ship *Intrepid;* we have built there the collier *Prometheus* and the collier *Jupiter.* The records of the department show that of all ships built in Government yards no better record was made than was made at the Mare Island Navy Yard in the building of the ships just mentioned. There is only one criticism that can be made against that yard, and it is in regard to the depth of the channel, and I will admit that there has been some difficulty in that respect.

Mr. MURRAY. Is the gentleman familiar enough to give the committee the information as to the cost of equipping the Mare Island Yard for the shipbuilding facilities referred to?

Mr. KNOWLAND. I remember one item was the building of a cantilever crane, which cost $175,000, and then there were some other items for tools, and so forth, which has made it a thoroughly equipped yard for shipbuilding. Everyone realizes that the draft of vessels has been greatly increased, and there is scarcely a navy yard in the United States where it has not been necessary to expend money for dredging, in order that the larger battleships might be able to enter these yards. This has been true of nearly every harbor within the United States. To meet this condition at the Mare Island Navy Yard there was appointed by the President in 1907 a board of Army and Navy engineers to make a careful study of the hydraulics of the Mare Island straits and approaches with the idea of securing for the channel leading to that yard a sufficient depth of water. They made a report, which I now hold in my hand, known as House Document No. 1103, Sixtieth Congress, second session. Nothing was done in regard to those recommendations until 1911, when estimates were made by the Secretary of the Treasury touching the improvements of the hydraulics of the Mare Island straits and the dredging of the channel in San Pablo Bay, Cal., which are the approaches to this yard. Appropriations were made by Congress, which are continuing appropriations, providing for the improvements as recommended by this Government board.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. KNOWLAND. Appropriations were made to give sufficient depth of water in order that the largest battleship afloat might reach that yard. Now, this work is under way, and I have no doubt that when it is completed, and the money has already been provided for it, that we will have leading to the Mare Island Navy Yard a channel sufficiently deep to accommodate the largest vessels. There has been a great deal of money spent there. It is an ideal location for a navy yard because it is sufficiently far away from the Pacific Ocean to be safe from attack by a hostile fleet, and for this reason it has a special strategic advantage.

Mr. PADGETT. If the gentleman will permit, I can give him the amount expended, in answer to the question of the gentleman from Massachusetts [Mr. MURRAY].

The amount for the plant, buildings, and so forth, $17,644,057, and the amount for the maintenance, $17,363,162, making $35,000,000 all told.

Mr. KNOWLAND. That covers the period since the establishment of the yard in the seventies?

Mr. PADGETT. Yes; since its organization.

Mr. KNOWLAND. The question of the gentleman from Massachusetts [Mr. MURRAY], as I understood it, had reference only to what it has taken to equip the yard for shipbuilding, and I answered by giving the cost of a crane. In view of these facts, Mr. Chairman, it would seem unfair for anyone to rise on this floor and say that the Mare Island Navy Yard is useless because there has been some slight difficulty in regard to the depth of channel, when Congress has provided the money necessary to make the depth sufficient to accommodate any vessel afloat.

I have sat here, Mr. Chairman, during the consideration of this bill and have noted the most extraordinary situation which confronts this House. Never before during my nine years of service have I seen such a mix up. We have two Democratic factions among the members of the Committee on Naval Affairs, one faction attacking its own bill and the other faction defending it.

If I were to apply nautical language in describing this committee, I would compare it to a ship at sea with a mutiny aboard, the crew trying to displace the captain and scuttle the ship. The craft is drifting without rudder and without compass, and from present indications is likely to run on the rocks; and in the meantime the Navy of the United States must suffer.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] moves to strike out the last word.

Mr. SISSON. Mr. Chairman, in the absence of my colleague, Mr. WITHERSPOON, I desire to say that, while I did not note the exact language of my colleague, my recollection of what he said—and I have not looked at his speech since it has gone into the RECORD, either—is that these stations, many of them, ought to be abolished. He also said something about the conditions at Mare Island. But I am sure that it was not and never is the intention of my colleague to be unfair in any statement that he may make. [Cries of "Read!" "Read!"]

The CHAIRMAN. The pro forma amendment will be considered withdrawn. The Clerk will read.

The Clerk read as follows:

For naval magazine, navy yard, Puget Sound, Wash.: One building for storehouse and cartridge-bag factory, $15,000; clearing and grading ground, $3,000; quay wall, $15,000; one filling house, $1,500; one set of quarters for gunner, $6,000; in all, $40,500.

Mr. FOSTER. Mr. Chairman, I make a point of order on "one building for storehouse and cartridge-bag factory, $15,000."

Mr. PADGETT. Mr. Chairman, I will say to the gentleman that the factory part of it is simply just a little room in which to make the bags that go upon the shells and powder. It is only a small part of the item.

Mr. FOSTER. The reason I made the point was to ascertain if it was intended to start a factory there.

Mr. PADGETT. No, sir. The intention is only as I have stated.

Mr. FOSTER. This seems to be an authorization to start a factory. I did not know whether we ought to go into that.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. FOSTER. Yes.

Mr. ROBERTS of Massachusetts. The Chief of Ordnance tells our committee that it is desirable to have a small space at each of these magazines in which to sew up the cloth out of which these powder bags are made, because it is impracticable to make those bags at one central point and send them out through the country for the reason that each batch of powder, if I may so term it, will vary in its power and intensity, and the size of the bag must be varied according to the powder that goes into them. It is not a large establishment, and it would not be a large establishment, because it will handle only the powder that will be stored in this particular magazine.

Mr. FOSTER. It is not large to start with, but it might be developed into a large plant.

Mr. PADGETT. If the gentleman objects to that, just strike out the word "factory" and leave the item for the principal purpose for which it is intended.

Mr. FOSTER. I will state to the gentleman from Tennessee that I do not care particularly about that, but I do not believe, unless we have an absolute assurance against it, that it would be well to let this stand in a shape where a future Congress could take this up as a means of starting a factory out there.

Mr. PADGETT. There is no such intention or desire.

Mr. ROBERTS of Massachusetts. And I may add, in all human probability there will be no necessity for extending it.

Mr. PADGETT. It is only a small matter.

Mr. ROBERTS of Massachusetts. This is really a building with a small space in one end for the sewing of bags.

Mr. FOSTER. I make the point of order, Mr. Chairman.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

Mr. PADGETT. Mr. Chairman, I offer an amendment to insert the words "one building for storehouse, $15,000."

The CHAIRMAN. The gentleman from Tennessee offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 29, line 25, insert after the word "Washington" the words "one building for storehouse, $15,000."

The amendment was agreed to.

The Clerk read as follows:

Naval magazine, Hingham, Mass.: Magazine for smokeless powder, with railroad approach and extended fire main, $16,555; railroad track to filling house, $1,890; 1 detonator house, $1,250; 1 guncotton house, $1,250; 1 filling house, $1,500; in all, $22,445.

Mr. MANN. Mr. Chairman, I reserve a point of order on that paragraph. Is not this the naval magazine at Hingham that the gentleman from Massachusetts was trying to get rid of a short time ago?

Mr. ROBERTS of Massachusetts. Oh, no. If the gentleman will yield to me, this is a magazine that I had some part in having established at Hingham in order to get a magazine removed from my own city.

Mr. MANN. I know; but some time ago when we had the matter up did they not kick about having this magazine at Hingham?

Mr. ROBERTS of Massachusetts. Some of the people in Hingham kicked.

Mr. MANN. And the gentleman spoke for them?

Mr. ROBERTS of Massachusetts. Oh, no; I was not kicking about it.

Mr. MANN. I am afraid the gentleman's recollection is bad.

Mr. ROBERTS of Massachusetts. No, indeed. I have been perfectly satisfied to have the magazine there.

Mr. FOSTER. It seems to me that the gentleman from Massachusetts, when the people there were wanting to get half pay or one-third pay for that bridge, was very much opposed to this naval magazine.

Mr. ROBERTS of Massachusetts. No; I was not opposed to the magazine being there at all. You have got "the gentleman from Massachusetts" confounded with another gentleman.

Mr. MANN. I may be wrong, but my recollection is very distinct that the gentleman from Massachusetts [Mr. ROBERTS] was rather protesting against imposing upon the people there this dangerous naval magazine.

Mr. ROBERTS of Massachusetts. Oh, no; I never made any opposition on that score.

Mr. MANN. I wondered whether the gentleman wanted to enlarge it.

Mr. ROBERTS of Massachusetts. I got the dangerous magazine out of my city. Why should I complain?

Mr. MANN. If the gentleman says he wants it, for future reference at least I will withdraw the point of order.

Mr. ROBERTS of Massachusetts. The point of order would not lie against it, as the gentleman will see if he will read the organic act.

Mr. MANN. That is another question. I have withdrawn the point of order.

The Clerk read as follows:

Naval magazine, Olongapo, P. I.: Two sets of quarters, chemist and subinspector, $6,000; extension magazine, $1,300; filling house, $4,000; renewal of dock, $4,000; in all, $15,300.

Mr. SISSON. I notice here appropriations are made for certain expenditures in the Philippine Islands. Did the chairman and the committee take into consideration that there is a possibility of the abandonment of the Philippine Islands?

Mr. PADGETT. We will never abandon the naval station at Olongapo.

Mr. SISSON. You expect to keep the naval station there in any event?

Mr. PADGETT. In any event.

The Clerk read as follows:

Naval magazine, Kuahua, Hawaii: Two magazines, $50,000; railroad tracks and scales, $15,000; one gunners' quarters, $7,000; machinery and tools, $20,000; one shipping house, $60,000; building for torpedoes and mines, $50,000; two filling houses, $16,000; one segregation house, $10,000; one bombproof, $1,500; one unfusing roof, $500; building for marine guard, $2,500; compressed air locomotive plant, $18,000; in all, $250,500.

Mr. SISSON. I reserve a point of order against this paragraph for the purpose of making an observation. Will the chairman of the Committee on Naval Affairs tell us the reason for appropriating for one shipping house $60,000?

Mr. PADGETT. This is a part of the Pearl Harbor naval station. It is on a little island just a few yards from the docks, and so forth, and here they have a storage for powder, explosives, and things of that kind.

Mr. SISSON. Separated some little distance from the other?

Mr. PADGETT. Separated from the other. It is a part of the general plan that was authorized, for which the estimates were submitted in 1911.

Mr. SISSON. How far is the shipping house from the magazine?

Mr. PADGETT. I could not say. I have not been there.

Mr. SISSON. Is it a part of it?

Mr. PADGETT. No. You can only reach it by boat, and they must have a house to unload the cargoes into; and then, when they ship anything out they must have a house to handle it.

Mr. SISSON. Did the committee go into the question of the size of the house that was necessary at that place?

Mr. PADGETT. Yes. It is all gone over here.

Mr. SISSON. The committee were thoroughly satisfied that the size of the house was all right?

Mr. PADGETT. Yes.

Mr. SISSON. I notice a provision for a compressed air locomotive plant, $18,000. What do they want of a compressed air locomotive plant?

Mr. PADGETT. This is where they have the powder and the high explosives, and they have to use a compressed air locomotive instead of one that burns coal or gasoline or that uses electricity. They might explode the whole thing.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

Mr. MANN. I reserve the point of order. How many magazines will there be at this station?

Mr. PADGETT. This one.

Mr. MANN. There are two provided for in this bill.

Mr. PADGETT. Two magazine buildings.

Mr. MANN. I took my expression from the language of the bill, line 16, page 30, "two magazines, $50,000," and there is one already provided for by current law. How many will be required there?

Mr. ROBERTS of Massachusetts. The statement will be found on page 249 of the hearings.

Mr. PADGETT. Last year we appropriated for one magazine, and Admiral Twining says this is a part of the general scheme laid out years ago, and that this completes that general scheme.

Mr. MANN. I withdraw the point of order.

The Clerk read as follows:

Marine barracks, Boston, Mass.: Barracks, $100,000; officers' quarters, $48,000; in all, $148,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to inquire of the distinguished chairman of the committee if there has previously been established marine barracks at this place?

Mr. PADGETT. Yes.

Mr. FOWLER. It was not carried in the appropriation bill of last year for this purpose?

Mr. PADGETT. No.

Mr. FOWLER. Why should you have this large appropriation of $148,000?

Mr. PADGETT. The marine barracks for which $100,000 is appropriated and the officers' quarters is what $48,000 is appropriated for.

Mr. FOWLER. These are new buildings?

Mr. PADGETT. Yes; both new buildings.

Mr. FOWLER. Do the barracks need repairs?

Mr. PADGETT. They have an old building built many years ago, but it is worn out and very antiquated.

Mr. ROBERTS of Massachusetts. The building was built in 1823—90 years ago.

Mr. PADGETT. It has become insanitary, and in order to serve the meals to the marines they have to serve them in three courses; they have the first table, then the second table, and then the third table.

Mr. MANN. We have more than that while we have the naval bill under consideration. [Laughter.]

Mr. FOWLER. Is it intended to use $100,000 for repairing this building?

Mr. PADGETT. No; that is to build a new one.

Mr. FOWLER. What will you do with the old one?

Mr. PADGETT. Tear it down and build another in its place. The old one is all out of whack. Probably they will sell the old lumber in it and use the bricks.

Mr. FOWLER. Is it necessary to keep up these barracks?

Mr. PADGETT. Oh, yes.

Mr. FOWLER. Well, I think I will withdraw——

Mr. MANN. Will the gentleman first make an inquiry about the officers' quarters?

Mr. PADGETT. The officers' quarters are a part of the marine barracks; their quarters at present are in the old building that I have described.

Mr. COX. How many officers are quartered there?

Mr. PADGETT. I do not know; perhaps the gentleman from Massachusetts knows.

Mr. MURRAY. Twelve to twenty, as a regular thing, but frequently there are more than that, depending upon the number of men stationed there.

Mr. COX. In one building?

Mr. ROBERTS of Massachusetts. They are all in one building now.

Mr. FOWLER. I desire to ask the chairman why we could not provide for officers' quarters in the new building which he proposes to build at a cost of $100,000?

Mr. PADGETT. That will not be large enough to afford accommodation for a large number of marines and the officers in addition.

Mr. FOWLER. Is it proposed to build a building equally as large as the one they now occupy?

Mr. PADGETT. They propose to build a larger one.

Mr. FOWLER. And the old one accommodates the marines and also the officers, as I understand?

Mr. PADGETT. They are quartered there, but it is not satisfactory or sufficiently comfortable.

Mr. FOWLER. Does the gentleman think the new building would be sufficient to accommodate all of them for all purposes?

Mr. PADGETT. The officers in charge submitting the estimate said not.

Mr. FOWLER. Is it not a peculiar idea that the officers want a separate building—are they not rather aristocratic?

Mr. PADGETT. No; that is the practice at all barracks and quarters.

Mr. FOWLER. Mr. Chairman, I feel that the appropriation proposed here is large and might be cut down, but I do not desire to prevent their having quarters such as the men need. If I could believe a saving would be made, I would be glad to have it cut out, but I withdraw the point of order.

Mr. SISSON. Mr. Chairman, I renew the point of order. The gentleman has $48,000 for officers' quarters. I notice in the other paragraph that you provided for two officers' quarters at $24,000. What do officers' quarters generally cost—$12,000?

Mr. PADGETT. That depends upon the rank of the officer. There was a law passed by Congress regulating the price as to the Army, and we have adopted the same with reference to the Navy.

Mr. SISSON. Does the gentleman recollect what those are?

Mr. PADGETT. They run from $8,000 to $15,000, according to my recollection.

Mr. SISSON. Irrespective of the location, the cost of the ground, and the building itself to cost $8,000 to $15,000?

Mr. PADGETT. No; they are usually built on the ground owned by the Government.

Mr. SISSON. I understand; but it is exclusive of the cost of the land upon which it is built?

Mr. PADGETT. Yes.

Mr. SISSON. About $12,000; and I presume with $48,000 it is proposed to provide for four officers' quarters.

Mr. PADGETT. Oh, no; 12 or 15. A good many of them are for bachelors' quarters.

Mr. SISSON. And how many marines do you have there?

Mr. PADGETT. Two or three hundred.

Mr. SISSON. You appropriate $100,000 to take care of two or three hundred marines and $48,000 to take care of 10 or 12 officers. Is not that rather out of proportion?

Mr. PADGETT. No. Under the law an officer is entitled to commutation of quarters at a certain amount.

Mr. SISSON. An officer occupying these quarters will be entitled to commutation of quarters?

Mr. PADGETT. No; if there are no quarters furnished to him, he gets commutation according to his rank.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

Marine barracks, Isthmus of Panama: Erection of barracks, quarters, and other buildings for accommodation of marines, $400,000.

Mr. FOSTER. Mr. Chairman, I make the point of order on the paragraph.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. What is the point of order?

Mr. FOSTER. That this is not authorized by law.

Mr. PADGETT. Mr. Chairman, if the gentleman will permit me, I would like to make this statement: Col. Goethals appeared before our committee and stated that he had now about 600 marines down there. They are occupying quarters that were purchased from the French. They are being destroyed by the ants and insects. When the canal is completed the railroad will be placed on the opposite side of the canal from that on which it is running now. The marines will have to be transferred to that side. Col. Goethals said that he had all of his machinery, his cement, and all of his appliances there, and that if we would permit him to build the barracks now instead of later, while he has his plant all in operation, he could build it at a saving of about 40 per cent on the construction.

Mr. FOSTER. Mr. Chairman, in reply to the gentleman from Tennessee, I would say that I think we have already provided for the housing of something like 8,800 soldiers in Panama, and I think in view of that fact that these marines have not been necessary; that nobody would think for a minute that there has been any necessity for a great number of soldiers down there up to this time, and there possibly will not be for some time to come.

The CHAIRMAN. The Chair would suggest that the matter now pending is the point of order.

Mr. PADGETT. Mr. Chairman, I was simply submitting these matters to the consideration of the gentleman to see if he would not withdraw the point of order. He will bear in mind that the marines are used in many services where we do not use soldiers or others.

Mr. FOSTER. I understand that fully.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to submit something on the point of order, and I refer the Chair to the organic act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans, which was approved June 28, 1902, known as the Spooner Act. In section 5 of that act are to be found these words:

And the President is hereby authorized to cause to be entered into such contract or contracts as may be deemed necessary for the proper excavation, construction, completion, and defense of said canal, harbors, and defenses by the route finally determined upon under the provisions of this act. Appropriations therefor shall from time to time be hereafter made not to exceed in the aggregate, etc.

Now, the first clause of that act has heretofore been construed by Mr. MANN, of Illinois, in the chair on February 25, 1911, when a provision was under consideration providing for fortifications of the canal, and the gentleman in a long and exhaustive opinion ruled that under that organic act the President could police the canal and could cause to be erected the necessary buildings and fortifications, and so on, to carry out the purposes of the organic act. He said:

The Chair personally has been very much at sea in reference to the desirability of fortifying the canal, but in deciding the point of order the Chair does not pass upon that in any respect. It seems to the Chair that whereas it is provided that the United States shall preserve the neutrality of the canal for the benefit of all nations alike, and that the United States shall provide military police upon the canal to preserve it from disorder, and whereas Congress has provided that the Government shall construct, maintain, operate, and protect the canal, it is quite within the power of the House to determine in what way it should be protected, and whether fortifications are necessary. If fortifications are necessary for protection, then the items in the bill are in order. The Chair therefore overrules the point of order.

Now, the President and the House assenting, they decided it is necessary to keep marines on the Isthmus for police purposes. If we are to keep marines there, we must house them, and here is where we carry authority under the organic act to provide barracks for those police on the Canal Zone.

Mr. SISSON. Now, Mr. Chairman, the gentleman is at total variance with the testimony of Col. Goethals and Secretary of War Stimson when they appeared before the Committee on Appropriations in reference to this matter. Now, this is a matter not of policy, not of defense, so far as the canal is concerned, and is to be no part of the defense of the canal. It is not the policy that it shall be a part of the defense of the canal, and they specifically state that in the selection of this as a policy to put the marines on the Canal Zone, that they are not to be used in the defense of the canal, as I will show in a moment, but they are to be used or kept there so they could easily be transferred for the purpose of policing the South American countries. I read what Secretary Stimson said in answer to a question of the chairman. Mr. SHERLEY was chairman of the subcommittee——

Mr. FOSTER. That is, on fortifications?

Mr. SISSON. On fortifications; and they went over this entire policy of Congress advocated by the Army and by the Navy as to the number of troops that may be kept upon the Canal Zone. Col. Goethals was present at the time this testimony was delivered, and answered questions along at the same time that Secretary Stimson did. In answer to a question by the chairman Secretary Stimson said:

Secretary STIMSON. The Navy has simply asked for permission to put an advance post of their marines there as a convenient place, without reference to the defense of the Isthmus at all, but with reference to Navy operations pure and simple. It would be, of course, a military mistake of a very grave character to count on a force of two kinds, not under the same head, to defend any outpost. The plans for the defense of the Isthmus contemplate simply a defense by a force of troops from the Army.

In the defense of the canal this committee has absolutely no jurisdiction because the Appropriations Committee has juris-

diction of the fortifications and the defense of the Panama Canal entirely.

So Secretary of War Stimson and Col. Goethals both say that these marines are not to be used in the defense of the canal, and that they are no part of the canal establishment and will not be under the control of the——

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. SISSON. I will.

Mr. ROBERTS of Massachusetts. When did Col. Goethals make that statement?

Mr. SISSON. I read Secretary Stimson's statement, but Col. Goethals was there.

Mr. ROBERTS of Massachusetts. When?

Mr. SISSON. When they had the hearings.

Mr. ROBERTS of Massachusetts. When was that?

Mr. SISSON. During this present Congress. I have not looked up the date there, but it is in the hearings. You will find it in the hearings under estimates for the construction of the Panama Canal fortifications—fiscal year 1914.

Mr. ROBERTS of Massachusetts. Do not the hearings state this date?

Mr. SISSON. There is no date here showing exactly when they appeared. It is one continuous hearing. They had the hearings there from day to day.

Mr. ROBERTS of Massachusetts. Now, I would like to ask the gentleman one further question. Do I understand the gentleman from Mississippi [Mr SISSON] to say that he is quoting the Secretary of War and not Col. Goethals?

Mr. SISSON. What is that?

Mr. ROBERTS of Massachusetts. Do I understand the gentleman to state that he is quoting the Secretary of War and not quoting Col. Goethals?

Mr. SISSON. I am quoting Secretary Stimson. The hearings were commenced on November 18, 1912.

Mr. ROBERTS of Massachusetts. When were they finished?

Mr. SISSON. I do not recall.

Mr. ROBERTS of Massachusetts. And the gentleman is not quoting Col. Goethals at all?

Mr. SISSON. On page 266, if the gentleman has the Panama Canal hearings——

Mr. ROBERTS of Massachusetts. I have not those hearings. I have some others which I want to read in a moment.

Mr. SISSON. Now, Col. Goethals, just before that, was discussing with the Committee on Naval Affairs the permanent camp sites. Now, Col. Goethals was present during the time that Secretary Stimson was there, and their testimony was given together, and they frequently interrupted each other in reference to this matter. But I do not find in the hearings where Col. Goethals has said anything that was applicable to the question at issue now. The Secretary of War, his superior in the department, does make that statement, which is conclusive.

Mr. COX. He never denied the Secretary's statement, did he?

Mr. SISSON. No.

Mr. MADDEN. Does the gentleman know whether the marines belong to the Army or the Navy?

Mr. SISSON. To the Navy.

Mr. MADDEN. Would not this item be properly in this bill, then?

Mr. SISSON. He is contending it is a part of the defense of the canal, and, if it is, it must be a part of the defense of the canal before it can be in order, and it would not be in order on this bill, but on another bill.

Mr. MANN. Will the gentleman yield?

Mr. SISSON. I will.

Mr. MANN. If there was desired to insert an item relating to the Navy for the defense of the canal, does the gentleman contend that the Appropriations Committee would have jurisdiction over a naval item for the defense of the canal?

Mr. SISSON. I do not contend that that would be true, but they must have some specific law authorizing this appropriation, aside from that organic act, before they can hold that this naval bill can carry under that law, as it now exists, a part of the defense.

Mr. MADDEN. Does the gentleman know how many buildings have been erected on the Isthmus of Panama for the quarters of the marines?

Mr. SISSON. I was on the zone, but my information is that they are occupying buildings that were constructed there perhaps for other purposes.

Now, there were a great many buildings improved there for other purposes, and the marines came down without much notice, I understand from Col. Goethals, and he had to put himself to some little trouble to get quarters for them.

The CHAIRMAN. Will the gentlemen permit the Chair to engage the attention of the gentleman from Massachusetts [Mr. ROBERTS] in a little heart-to-heart talk for a moment?

I understand the gentleman read in justification of this clause the word "defense." Now, coupled with that is the language that goes before it. Has the gentleman——

Mr. ROBERTS of Massachusetts. I have not a copy. This is the only one we have on the floor.

The CHAIRMAN (reading)—

And the President is hereby authorized to cause to be entered into such contract or contracts as may be deemed necessary for the proper excavation, construction, completion, and defense of said canal—

And so forth.

Mr. ROBERTS of Massachusetts. Now, right on that question——

The CHAIRMAN. Now, will the gentleman permit? Has there been any contract entered into for the marine barracks here?

Mr. ROBERTS of Massachusetts. Not for these proposed barracks; but if the Chair will pardon me a moment, right on the point that the gentleman from Mississippi spoke of, the use of the marine barracks for defense, let me say, in the first place, that the War Department has set aside a location for these barracks for occupation by the marines. A certain tract of land has been set aside expressly for the marines who are to remain on the Isthmus. On January 18 of this year Col. Goethals appeared before the Committee on Naval Affairs, urging the committee to provide for barracks on that location which had been set apart by the War Department for occupation of marines. The gentleman from Pennsylvania [Mr. BUTLER] asked him:

About how many acres were set apart, do you recall?

Col. GOETHALS. No, sir; I do not recall. It is ample for all their needs.

Mr. BUTLER. How far is it from the Miraflores Lock?

Col. GOETHALS. About 5 miles.

Mr. BUTLER. Is it located so that the marines at that point could furnish such protection as might be necessary for this dock?

I want the gentleman from Mississippi to observe this language.

Mr. SISSON. I will.

Mr. ROBERTS of Massachusetts. The answer of Col. Goethals is:

Yes, sir.

Mr. BUTLER. And you had that in view at the time of the selection?

Col. GOETHALS. No, sir; the site had in view more the location of Panama. The marines are camped within a thousand feet of the dry dock.

Mind you, this land was selected by Col Goethals, having in view the defense of these locks by the marines. You see they are to defend not only the locks but the dry dock as well, and this location was selected with that in view.

Mr. SISSON. I will give you what Col. Goethals said before the Committee on Appropriations about it, in answer to the chairman's question about the $400,000 item for the marine camp, the very item which is carried in this bill.

Mr. ROBERTS of Massachusetts. What committee hearing is the gentleman about to read from?

Mr. SISSON. From the hearings before the subcommittee of the Committee on Appropriations on the fortifications appropriation bill. After hearing the chairman's question in reference to the $400,000 marine-camp item, Col. Goethals replied as follows:

Col. GOETHALS. When the joint board came to the Isthmus in 1909 or 1910, they selected certain sites for Army uses and certain sites for naval uses, and one of the sites selected for naval uses was the Quarry site at Ancon Hill for the marines; and if I remember correctly, the naval members of the board then thought it was to have 1,200 marines located there for dealing with problems that might arise in Central and South America, and for advance base duty in time of war. The estimate of $400,000 is for barracks and quarters for 500 marines. Now, I do not know whether they intend to extend that to include the 1,200 they figured on in 1909 or 1910.

Then Secretary Stimson said:

The Navy has simply asked for permission to put an advance post of their marines there as a convenient place, without reference to the defense of the Isthmus at all, but with reference to Navy operations pure and simple. It would be, of course, a military mistake of a very grave character to count on a force of two kinds, not under the same head, to defend any outpost. The plans for the defense of the Isthmus contemplate simply a defense by a force of troops from the Army.

And that settles it, because there is the testimony, both of Secretary Stimson and of Col. Goethals; and they both say that these marines are not to be used, and were never intended as a part of the defense of the canal.

Mr. ROBERTS of Massachusetts. Later than that, Mr. Chairman——

Mr. FOSTER. The chairman of the committee stated about the same thing in his remarks a few moments ago.

The CHAIRMAN. The Chair is ready to rule. The Chair has read carefully the paragraph of the organic act cited by the gentleman from Massachusetts which says:

And the President is hereby authorized to cause to be entered into such contract or contracts as may be deemed necessary for the proper excavation, construction, completion, and defense of said canal, harbors, and defenses—

And so forth. The Chair has also read section 2 of that act, as well as the ruling made by Mr. Chairman MANN, which has been referred to.

It does not seem to the Chair that the ruling of Mr. Chairman MANN or the wording of section 2 apply to the particular point of order that is now before the House. It seems to the Chair that the only question is whether a contract has been entered into by the President of the United States. There is no suggestion that such a contract has been entered into, and the Chair therefore sustains the point of order. The Clerk will read.

The Clerk read as follows:

Total public works, navy yards, naval stations, naval proving grounds and magazines, Naval Academy, Naval Observatory, and Marine Corps, $4,433,945, and the amounts herein appropriated for public works, except for the Naval Observatory and for repairs and preservation at navy yards and stations, shall be available until expended.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] reserves a point of order on the paragraph.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the language in line 19, page 31, of the bill, down to and including line 22, reading, "and the amounts herein appropriated for public works, except for the Naval Observatory and for repairs and preservation at navy yards and stations, shall be available until expended."

Mr. PADGETT. Not all of it?

Mr. SISSON. I say, except those items that are excepted in the language.

Mr. PADGETT. That is, except the Naval Observatory and repairs and preservation at navy yards and naval stations—those works that were discussed by the gentleman from Illinois [Mr. MANN] and others this morning, with reference to contracts.

Mr. SISSON. Why is it that gentlemen on some of these specific items provide that the item shall not be available until expended, and then put the "shotgun clause" in it?

Mr. MANN. I do not think that is the case under the head of "Public works."

Mr. SISSON. Is this usual to carry this in all the bills? Is this the first time it has been done?

Mr. PADGETT. It is put in the bill this time for the first time, on account of a ruling made by the comptroller and on account of a provision in the legislative act of last year, requiring that all appropriations should be considered as annual unless they were excepted in the act carrying them, or in the legislative act.

Now, then, with reference to these particular ones, where they are of such a character as that, a contract can not be made and performed within a year; we are providing here so that there may be no quibble or misunderstanding about it. It is along the line in which they have been treated heretofore; but this is required, as I say, because of the provisions of that act.

Mr. SISSON. The gentleman will recall that there has been a great deal of controversy between the departments and various committees as to making these appropriations, when once made, available until used. It has caused quite a good deal of trouble, because Congress can not keep up with an appropriation that lies out from year to year. You can not tell what the balances are. It is utterly impossible to tell how much money has been expended unless you go up to the Secretary of the Treasury and get the vouchers. But where the money is covered back into the Treasury that is not the case, and in such cases these people have to come back to Congress and ask for a further appropriation—these people who are doing this work—and they have to get an authorization to continue. I think it is a very bad practice to make appropriations available until expended.

Mr. PADGETT. I am in full sympathy with the gentleman as to general legislation, but there are exceptions, as he can realize, in work of this nature, and the gentleman will notice here that in this provision we except those items and those appropriations which can be and are properly annual, and we limit the exception to those where the nature and the character of the work are such that the money available must necessarily extend beyond the time.

Mr. SISSON. There are many items in the bill, and it would take quite a good deal of time to go back over each item and compare them.

Mr. MANN. After all, if the gentleman will permit, the language is "Total public works," and so forth, and that looks as if it were all the public works provided in the bill. But there is a heading on page 23 that covers public works under the Bureau of Yards and Docks.

Mr. SISSON. It includes everything down to that item at the bottom of page 31?

Mr. MANN. Navy yards, naval stations, proving grounds, magazines, and so forth; from that down to this. But it does not include those other items that we were discussing this morning.

Mr. SISSON. Can the chairman of the committee give me any idea as to how much is exempt in this proviso and how much will be exempted from the general law passed last year?

Mr. PADGETT. The total amount here.

Mr. SISSON. I understand that; but what part of this appropriation? How many million dollars can they use without turning it back into the Treasury?

Mr. PADGETT. Eight hundred thousand dollars, the item right above there, would be excepted. That would be annual.

Mr. MANN. That is the only one besides the Naval Observatory.

Mr. SISSON. In other words, there would be something like three and one-half million dollars of this appropriation for public works that would be exempt from that provision in the legislative act?

Mr. PADGETT. Something between three millions and three and one-half million dollars.

Mr. SISSON. Mr. Chairman, I reluctantly withdraw the point of order, owing to the insistence of the chairman of the committee that it be permitted to remain in the bill, in order to see how it works.

Mr. PADGETT. Mr. Chairman, I wish to ask permission that the Clerk may change the totals in the bill. That is customary.

The CHAIRMAN. Without objection, that will be done.

There was no objection.

Mr. SAMUEL W. SMITH. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The Clerk read as follows:

BUREAU OF MEDICINE AND SURGERY.

Medical Department: For surgeons' necessaries for vessels in commission, navy yards, naval stations, Marine Corps, and for the civil establishment at the several naval hospitals, navy yards, naval medical supply depots, Naval Medical School, Washington, and Naval Academy, $510,000.

Mr. SISSON. Mr. Chairman, I notice there is quite an increase in this item. Can the gentleman tell me why this is increased from $430,000 to $510,000?

Mr. PADGETT. Last year we authorized 4,000 additional men and 400 marines. They have to be looked after and medicine provided for them, and other items. Here is the testimony of Dr. Stokes, the Surgeon General. We went into it very thoroughly.

Mr. SISSON. Did you give him what he asked for?

Mr. PADGETT. He asked for $510,000 and we gave him $510,000. He has had no increase for quite a while. He says that in 1912 there was an appropriation of $460,000, and last year we reduced it to $430,000.

Mr. SISSON. Did they have a deficiency?

Mr. PADGETT. No; he had no deficiency, but he said he had to deny them many things that should have been done.

Mr. SISSON. I will state to the gentleman that in an item of this kind I do not object myself personally to the committee being rather liberal, because in questions of medicine and treatment of the sick we ought not to be too close.

Mr. PADGETT. We went into it carefully, and very much in detail.

Mr. SISSON. This is an $80,000 increase.

Mr. PADGETT. Really it is only a $50,000 increase, because last year we reduced it.

Mr. RODDENBERY. Mr. Chairman, I make the point of order that no quorum is present.

The CHAIRMAN. The gentleman from Georgia makes the point of order that no quorum is present. The Chair will count. [After counting.] Sixty-two gentlemen are present; not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Ames	Anthony	Barchfeld	Berger
Anderson	Ashbrook	Barnhart	Borland
Andrus	Austin	Bartholdt	Bradley
Ansberry	Ayres	Bates	Brantley

Broussard	George	Lever	Rees

Fuller	Lawrence	Rauch	Young, Kans.
Gardner, Mass.	Lee, Ga.	Redfield	Young, Tex.

The committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee finding itself without a quorum he had directed the roll to be called, that 150 Members had answered to their names, a quorum, and he reported the names of the absentees.

Mr. RODDENBERY. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The Chair will ask the gentleman to withhold that for a moment or two, because there is a message from the President here that he would like to lay before the House.

Mr. MANN. I do not see how the Chair can do that under the rule.

The SPEAKER. The gentleman from Illinois is correct.

Mr. RODDENBERY. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The Chair would like to lay the message before the House, if it were possible.

Mr. MANN. Mr. Speaker, I think it is not advisable to go any further than we did the other day, after what the Speaker said. I think probably that was not advisable, although I was the one who broke the rule.

The SPEAKER. The gentleman from Illinois is correct. The question is on the motion of the gentleman from Georgia, that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. RODDENBERY) there were—ayes 8, noes 87.

Mr. RODDENBERY. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. MANN. Mr. Speaker, it does not require a quorum to automatically go back into the committee.

Mr. RODDENBERY. But we are in the House, and I make the point of order that a quorum of the House is not present.

The SPEAKER. When the committee rises, upon the failure of a quorum, and it turns out on the roll call that there is a quorum of the committee present, the House automatically goes back into committee.

Mr. RODDENBERY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RODDENBERY. If the motion be made that the House do now adjourn, and on a division it appear that a quorum of the House is not present, and a point of no quorum is raised, does it not require a quorum to be present?

Mr. MANN. Oh, no.

The SPEAKER. The Chair thinks that really he ought not to have recognized the gentleman to make the motion to adjourn; but he is not passing upon that now.

Mr. MANN. I think the motion to adjourn was in order.

The SPEAKER. The motion to adjourn is rejected, and the committee will resume its sitting.

The committee resumed its sitting.

The Clerk read as follows:

Section 4810 of the Revised Statutes of the United States is hereby amended so as to read as follows:

"SEC. 4810. The Secretary of the Navy shall procure at suitable places proper sites for Navy hospitals, and if the necessary buildings are not procured with the site shall cause such to be erected, having due regard to economy, and giving preference to such plans as with most convenience and least cost will admit of subsequent additions when the funds permit and circumstances require, and shall provide at one of the establishments a permanent asylum for disabled and decrepit Navy officers, seamen, and marines: *Provided*, That hereafter no sites shall be procured or hospital buildings erected or extensions to existing hospitals made until after Congress shall have approved estimates therefor regularly submitted to Congress through the Treasury Department."

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph. This provision, which is a proposed amendment to the law, provides that no sites shall be procured for hospital buildings erected or extensions to existing hospitals made until after Congress shall have approved estimates therefor, regularly submitted to the Congress through the Treasury Department. I would like to inquire what is the process by which Congress approves an estimate? I never have heard of that method of procedure during my service in the House.

Mr. ROBERTS of Massachusetts. Mr. Chairman, it seems to me that we are approving estimates in every appropriation bill.

Mr. MANN. We are not. We are appropriating money, following the estimates.

Mr. ROBERTS of Massachusetts. That is approving the estimates.

Mr. MANN. I think not.

Mr. ROBERTS of Massachusetts. The purpose of the amendment is to prevent a practice which has grown up with regard to this naval hospital fund in years past. When the present Surgeon General of the Navy came into office he found the naval hospital fund overobligated $1,800,000 by his predecessors.

Mr. MANN. I am not raising any question in regard to that. I want to know what the meaning of the language is that the gentleman is seeking to use. How will we approve the estimates?

Mr. PADGETT. This money is not appropriated, because it is not in the Treasury. This is a separate fund. It is a fund contributed by the sailors and officers of 20 cents each a month, known as the hospital fund.

Mr. MANN. What will be the basis by which you will have Congress approve these estimates?

Mr. ROBERTS of Massachusetts. A provision in the naval appropriation bill authorizing the Secretary to carry out the plans and propositions through estimates sent up for approval.

Mr. MANN. If the gentleman wants to do that, it will be easy to say hereafter no site shall be secured or hospital buildings erected or extension to existing hospitals made until hereafter authorized by Congress. That is a simple proposition.

Mr. ROBERTS of Massachusetts. I would suggest that as an amendment, then. The only object is to compel the Navy Department to advise Congress before they establish new hospitals.

Mr. MANN. Well, I have no objection to that, but the gentleman can see that we have no process by which we approve estimates.

Mr. ROBERTS of Massachusetts. I will offer the language the gentleman gives as an amendment. We have no pride of diction in the make-up of this appropriation.

Mr. MANN. I understand; I am not criticizing the committee. I will withdraw the point of order.

Mr. SISSON. Mr. Chairman, I renew the point of order. I make the point of order against that.

Mr. ROBERTS of Massachusetts. Will the gentleman reserve the point of order?

Mr. SISSON. I will.

Mr. ROBERTS of Massachusetts. For an explanation.

Mr. SISSON. I will hear the gentleman.

Mr. ROBERTS of Massachusetts. Mr. Chairman, this naval hospital fund was provided by an act passed prior to 1811, which deducted from the pay of every officer and enlisted man in the Navy and Marine Corps 20 cents per month to be placed in that fund. In 1811 the Secretary of the Navy was made the trustee of that fund, and he was given power to secure sites and erect buildings for hospital purposes. The 20 cents per month was substantially retained to provide the land and the hospitals and the maintenance of those hospitals wherein the

officers and enlisted men of the Navy and Marine Corps should be treated free of expense. At the present time the fund amounts to something over $1,000,000 a year. It is not wholly made up now from the 20 cents per month deducted from pay, because some 8 or 10 years ago by an act of Congress the fines and forfeitures imposed upon officers and enlisted men in the Navy and Marine Corps were added to this fund. Now, at that time the fund was running something like $200,000 a year and the fines and forfeitures make that fund a little over a million dollars a year. That million dollars, under the terms of the law creating the fund, must be devoted to the maintenance of these hospitals, and if there is any money left it might then be used for extensions or additional hospitals, but, beginning in 1883, and I do not know how much further back, Congress appropriated in that year $30,000 under the head "Naval hospital fund" for the maintenance and repair of those hospitals which were supposed to be maintained out of this naval fund, and at the same time they were given $15,000 a year for repairs. Now, that went on, and in 1885 we dropped to $15,000 for the hospital fund and $2,500 for repairs, and in——

Mr. SISSON. Has the gentleman the original statute?

Mr. ROBERTS of Massachusetts. It is quoted in the first part of the section under consideration.

Mr. SISSON. The proviso is the only new provision in the bill.

Mr. ROBERTS of Massachusetts. Yes. Now, beginning in 1885, they went back to $30,000 for maintenance and $10,000 and $15,000—and in 1885, $20,000—for repairs, and this is in addition to the naval fund that was coming in.

Mr. SISSON. Mr. Chairman, I do not care, unless the gentleman cares to speak further——

Mr. ROBERTS of Massachusetts. If the gentleman will pardon me for a moment, I want to give some details.

Mr. SISSON. I will withdraw the point of order.

Mr. MANN. Mr. Chairman, I move to strike out all of lines 18 and 19, and strike out the words "until after," in line 17, and insert in lieu thereof "unless hereafter authorized by," and I would ask the Clerk to report it as it would read after he reports the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 32, strike out all of lines 18 and 19. In line 17 strike out the words "until after" and insert in lieu thereof "unless hereafter authorized by," so that it will read: "Buildings erected or extensions to existing hospitals made unless hereafter authorized by Congress."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Contingent, Bureau of Medicine and Surgery: For tolls and ferriages; care, transportation, and burial of the dead; purchase of books and stationery, binding of medical records, unbound books, and pamphlets; hygienic and sanitary investigation and illustration; sanitary and hygienic instruction; purchase and repairs of wagons, automobile ambulances, and harness; purchase of and feed for horses and cows; trees, plants, garden tools, and seeds; incidental articles for the Naval Medical School and naval dispensary, Washington; rent of rooms for naval dispensary, Washington, D. C., not to exceed $1,200; naval medical supply depots, sick quarters at Naval Academy and marine barracks; washing for medical department at Naval Medical School and naval dispensary, Washington; naval medical supply depots, sick quarters at Naval Academy and marine barracks, dispensaries at navy yards and naval stations, and ships; and for minor repairs on buildings and grounds of the United States Naval Medical School and naval medical supply depots; for the care, maintenance, and treatment of the insane of the Navy and Marine Corps on the Pacific coast; for dental outfits and dental material, not to exceed $38,000, and all other necessary contingent expenses; in all, $142,000.

Mr. SISSON. Mr. Chairman, I want to ask the chairman of the committee one question. I notice an appropriation of $38,000 for the care of outfits this year that you did not have to care for in the last appropriation.

Mr. PADGETT. Last year we appropriated $97,000. This year there is an addition of $7,000, the general expense incident to the 4,400 men, for dental outfits not provided by the act of 1913. Then the $7,000, and then the appropriation of last year for the previous expenses, makes $142,000.

Mr. COX. Last year did you not appropriate $14,000 for the dental outfit?

Mr. PADGETT. No, sir. You see, we increased the dental corps last year.

Mr. COX. Did you appropriate anything last year for dental outfit?

Mr. PADGETT. We established last year the dental corps, but only appropriated——

Mr. COX. How much was that?

Mr. PADGETT. I think it was $15,000. That is my recollection, and this $15,000 is for the full dental corps, making $30,000.

Mr. COX. As I understand, the $15,000 apropriated last year was for one-half the corps and this year it is for the full corps?

Mr. PADGETT. Yes; and that $15,000 was embraced in the $97,000.

Mr. COX. What does the gentleman have to say in regard to the trees, plants, and seeds, and things like that?

Mr. PADGETT. They are around the hospital grounds.

Mr. COX. Do we do any gardening there?

Mr. PADGETT. I reckon not. They plant flowers for these sick soldiers and look after some shade trees and the grass.

Mr. COX. How many cows do they maintain there?

Mr. PADGETT. I do not know. But this is for the purchase of feed for the horses and cows. I do not know how many they have. It is an item that has run time out of mind in the bill.

Mr. MANN. Mr. Chairman, to correct a typographical error, I move to insert the word "and" in line 1, before the word "cows."

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BUREAU OF SUPPLIES AND ACCOUNTS.

Provisions, Navy: For provisions and commuted rations for the seamen and marines, which commuted rations may be paid to caterers of messes, in case of death or desertion, upon orders of the commanding officers, commuted rations for officers on sea duty (other than commissioned officers of the line, Medical and Pay Corps, chaplains, chief boatswains, chief gunners, chief carpenters, chief machinists, and chief sailmakers) and midshipmen, and commuted rations stopped on account of sick in hospital and credited to the naval hospital fund; subsistence of officers and men unavoidably detained or absent from vessels to which attached under orders (during which subsistence rations to be stopped on board ship and no credit for commutation therefor to be given); and for subsistence of female nurses, and Navy and Marine Corps general courts-martial prisoners undergoing imprisonment with sentences of dishonorable discharge from the service at the expiration of such confinement: *Provided*, That the Secretary of the Navy is authorized to commute rations for such general courts-martial prisoners in such amounts as seem to him proper, which may vary in accordance with the location of the naval prison, but which shall in no case exceed 30 cents per diem for each ration so commuted, and for the purchase of United States Army emergency rations as required; in all, $7,593,441.75, to be available until the close of the fiscal year ending June 30, 1915.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the paragraph. First, I want to know why the change is made in this legislation?

Mr. PADGETT. I will call to the attention of the gentleman that there is really no change. It is simply a readjustment of the language. Under the old law, under the head "Provisions, Navy," was embraced both the item of provision and payment of maintenance, and then the other section was "contingent," and under "contingent" it ceased to be contingent and got to be maintenance, and was carrying maintenance under the head of "contingent." We struck out the word "contingent" and put in what it is, namely, "maintenance," and we took out the language which applies to maintenance, that was under "provisions," and transposed it under "maintenance," so that the substance is the same and the appropriation is the same.

Mr. SISSON. You make this appropriation available until 1915?

Mr. PADGETT. That is new language. I was going to call attention to that.

Mr. SISSON. Where are you going to make provisions for the Navy, which is, I presume, a one-year appropriation? This is not intended to feed the Navy for longer than 12 months, is it?

Mr. PADGETT. No. The Paymaster General, though, stated this: That a great many items are provisions which he necessarily has to buy in large quantities and by contract and put in cold storage when delivered; that he makes his contracts for them before the termination of the fiscal year, but they are not delivered until after the end of the fiscal year. For instance, he will make a contract for butter in large quantities for the ensuing year and he makes that contract in this year, but it is not delivered and completed so that he can make his payment until after the 30th of June. He wanted it extended in such a way as to make it good for the second year.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. SISSON. One moment. They are always making excuses of that character to get these appropriations extended. That does not seem to me to be a sufficient reason at all.

Mr. MANN. Is it not a fact that if he makes a contract for butter and it is delivered before the 30th day of June, it can be paid for at any time in the year following, under the existing law?

Mr. PADGETT. He says it can not be done until afterwards.

Mr. MANN. Then it has no business to be charged to the appropriation of that fiscal year, because he has another appropriation bill for the next fiscal year.

Mr. SISSON. Mr. Chairman, of course I can not tell, not having the original language before me, what changes have actually been made in the entire section.

Mr. PADGETT. If the gentleman will get the law of last year, he will find that the language is the same, except some items are transferred from one to the other.

Mr. MANN. I can tell the gentleman. If he will take the language on page 35, line 11, "labor in general storehouses," down to the end of the paragraph, that language, or practically the same language, was included last year in the provision following the word "commuted" in line 26 of page 34.

Mr. SISSON. Then the language is practically the same, except that that clause is transposed?

Mr. MANN. Yes; transposed from one to the other.

Mr. SISSON. Mr. Chairman, I have no disposition to make a point of order against the entire paragraph, but I do make the point of order against the language on page 35, in line 2, beginning with "to be available" and concluding with "1915," in line 3. I make the point of order against that language, "to be immediately available until the close of the fiscal year ending June 30, 1915."

Mr. PADGETT. That is subject to a point of order.

Mr. SISSON. All after the amount, "$7,593,441.75."

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

BUREAU OF CONSTRUCTION AND REPAIR.

Construction and repair of vessels: For preservation and completion of vessels on the stocks and in ordinary; purchase of materials and stores of all kinds; steam steerers, pneumatic steerers, steam capstans, steam windlasses, aeroplanes, and all other auxiliaries; labor in navy yards and on foreign stations; purchase of machinery and tools for use in shops; carrying on work of experimental model tank; designing naval vessels; construction and repair of yard craft, lighters, and barges; wear, tear, and repair of vessels afloat; general care, increase, and protection of the Navy in the line of construction and repair; incidental expenses for vessels and navy yards, inspectors' offices, such as photographing, books, professional magazines, plans, stationery, and instruments for drafting room, and for pay of classified force under the bureau, $8,250,000: *Provided*, That no part of this sum shall be applied to the repair of any wooden ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 10 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That no part of this sum shall be applied to the repair of any other ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 20 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That nothing herein contained shall deprive the Secretary of the Navy of the authority to order repairs of ships damaged in foreign waters or on the high seas, so far as may be necessary to bring them home. And the Secretary of the Navy is hereby authorized to make expenditures from appropriate funds under the various bureaus for repairs and changes on the vessels herein named, in an amount not to exceed the sum specified for each vessel, respectively, as follows: North Dakota, $250,000; Minnesota, $250,000; submarine C–1, $100,000; submarine C–2, $100,000; submarine C–3, $100,000; submarine C–4, $100,000; submarine C–5, $100,000; submarine D–1, $100,000; submarine D–2, $100,000; submarine D–3, $100,000; Hannibal, $75,000; Leonidas, $100,000; Justin, $50,000; Nanshan, $75,000; in all, $1,600,000, as per letter of the Secretary of the Navy dated November 19, 1912: *Provided further*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, and messenger service in navy yards, naval stations, and offices of superintending naval constructors, for the fiscal year ending June 30, 1914, shall not exceed $858,039.

Wrecking pontoon: For construction or purchase of a testing and wrecking pontoon for submarines, to be available until expended, $200,000.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] moves to strike out the last word.

Mr. MADDEN. I wish to ask the gentleman from Tennessee [Mr. PADGETT] what becomes of the ships where they are not repaired under the provision that reads, "No part of this sum shall be applied to the repair of any wooden ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 10 per cent," and so forth?

Mr. PADGETT. We come to Congress, just as we do on this bill, and get the authority to make the repairs. That is what this is.

Mr. MADDEN. In the meantime what becomes of the ship?

Mr. PADGETT. It stays in the service. Whenever a ship gets in need of repairs, or whenever it is anticipated that it will need repairs amounting to more than 10 per cent the Secretary submits his estimates under the law, and, if approved, they are incorporated in the bill, as you will find on page 37, where authority is given to make improvements on these ships. That is not an appropriation, however. It is only an authorization to make that improvement out of appropriations elsewhere made.

Mr. MADDEN. In the case of the ships enumerated on page 37, do the figures go above 10 per cent, or 20 per cent, provided on page 36?

Mr. PADGETT. Yes, sir.

Mr. MADDEN. So that where a ship needs repairs amounting to more than 10 per cent in the case of a wooden ship or more than 20 per cent in the case of other ships, that ship is laid up in dock until Congress authorizes an additional appropriation from which it can be repaired? Is that it?

Mr. PADGETT. These repairs are anticipated before it is necessary to get the vessels into commission or to put them into cold storage, as it were.

Mr. MADDEN. What do you mean by "anticipated"?

Mr. PADGETT. They keep them in condition, and they estimate that this ship, in the ordinary course of time, will need repairs. For instance, they say, "This ship in the next fiscal year will need repairs not exceeding this amount."

Mr. MADDEN. Has it not sometimes happened that the Secretary of the Navy has assumed the responsibility of making repairs above the percentage provided for in this bill, without authority from Congress?

Mr. PADGETT. Not that I know of, since the passage of the act six or eight years ago, requiring this procedure.

Mr. SAMUEL W. SMITH. Mr. Chairman, I should like to ask the gentleman from Tennessee a question. In line 9, page 36, it says:

Carrying on work of experimental model tank.

I should like to ask the gentleman to explain what that is.

Mr. PADGETT. The experimental model tank is down here at the Naval Gun Factory at Washington. In preparing the design of every ship, they make a model and test it in that experimental tank, and in that way they can calculate the displacement of the greatest battleships, or any other ships, with great precision.

Mr. SAMUEL W. SMITH. Is there a model tank of this kind at every navy yard?

Mr. PADGETT. No; the only one is here at Washington.

Mr. COX. Mr. Chairman——

Mr. PADGETT. If the gentleman will allow me, I desire to offer an amendment in line 15, page 37, after "$75,000." I send the amendment to the Clerk's desk. It is the authorization for the conversion of a ship.

The Clerk read as follows:

After line 15, page 37, insert: "*Prometheus:* To convert to a repair ship, $350,000."

In line 16, page 37, strike out "$1,600,000" and insert "$1,950,000."

Mr. PADGETT. That is not an increase of appropriation. It is only an increase of authorization.

Mr. MADDEN. I wish to ask the gentleman from Tennessee one more question, in line with the questions I was asking a few moments ago.

Mr. PADGETT. Yes.

Mr. MADDEN. How does anybody know that the repairs to the ship authorized to be repaired in this paragraph can be made within the sum fixed in the paragraph?

Mr. PADGETT. Those matters are estimated by the Chiefs of the Bureau of Construction and Repair and the Bureau of Steam Engineering, after a survey has been made by the inspection officers, who report that the ship is in this condition, with reference to this part and that part, and that it will need such and such repairs, which will cost so much money.

Mr. MADDEN. Is there any man alive who can tell what it will cost to repair the ships before the planks are taken off? Who can tell whether the timbers inside the planks are rotten or sound? And does it not frequently happen that after the ship is stripped it is found that the necessary repairs will cost more than the estimate?

Mr. PADGETT. This is ordinarily not for the outside timbers. This is usually for machinery and internal repairs.

Mr. MADDEN. I understood that this was for repairs of the ship, not of the machinery.

Mr. CALDER. These are steel ships, are they not?

Mr. PADGETT. Most of them.

Mr. MADDEN. Even if they are steel ships nobody can tell how badly the material inside of the outer covering is worn out before the outer covering is taken off.

Mr. PADGETT. Let me give you the estimates here.

Mr. MADDEN. I have had some experience in this kind of thing myself, and I frequently find that it costs about three times as much to do the repairing as it is estimated it will cost.

Mr. PADGETT. They can not go over the authorization.

Mr. MADDEN. Frequently they do not make the necessary repairs if they do not go beyond the estimate.

Mr. COX. They estimate high enough to cover it.

Mr. PADGETT. Take the *North Dakota*. Installation of combined fire control and conning tower and changes in bridge arrangement and structural work in connection with tube hoist.

Mr. MADDEN. Does the gentleman call changes in the bridge system repairs?

Mr. PADGETT. Yes.

Mr. MADDEN. That is a change in the construction, is it not?

Mr. PADGETT. Yes.

Mr. MADDEN. It is not a necessary repair.

Mr. PADGETT. Certainly; it is an improvement and a repair, to keep the ship up to date.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

Mr. COX. I move to strike out the last word. I want to call the chairman's attention to the word "aeroplanes," in line 6, page 36. Last year there was a limit to that appropriation and the amount which could be expended was $35,000. In this item there is no limit whatever.

Mr. PADGETT. The chief of the bureau and the Secretary in his annual report asked us not to place a limit on it; but they stated that they did not expect to spend exceeding $50,000, even in an emergency.

Mr. COX. How did they get along with the $35,000 last year? Did they expend all of it?

Mr. PADGETT. They said they would, and they felt that that would answer their purpose.

Mr. COX. Without any limitation here it is within the power of the Secretary to spend $100,000 for aeroplanes.

Mr. PADGETT. They might do it, but they have to take care of so many things that they could not dispense with that they would not do it.

Mr. COX. Does the Government construct the aeroplanes or buy them?

Mr. PADGETT. It does both; it constructs the engines and the planes in its experiment stations for trial, and then it purchases a few. I believe that we have about eight.

Mr. COX. What do they cost apiece?

Mr. PADGETT. About six or seven thousand dollars.

Mr. COX. Then the department is both buying and building aeroplanes?

Mr. PADGETT. Yes; but the department is going very slowly and cautiously.

Mr. COX. They are going on a limited scale, both the buying and the building?

Mr. PADGETT. Yes.

Mr. COX. Without any limitation it would be within the power of the Secretary of the Navy to spend any sum that he wished in aeroplanes?

Mr. PADGETT. Yes; if it were available; but the other things they need will not allow them to spend a great deal. But we have not increased the appropriation by virtue of the aeroplanes.

Mr. COX. The sum is increased $50,000.

Mr. PADGETT. No. We cut it down $224,000.

Mr. MADDEN. Will the Members on the Democratic side be kind enough to speak louder, so that we over here on the outskirts can hear?

Mr. PADGETT. We reduced it from $8,479,144 to $8,250,000.

Mr. COX. I wish the gentleman would consent to put a limitation on it.

Mr. SISSON. Mr. Chairman, I would like to ask a question right there. Eight million two hundred and fifty thousand dollars is appropriated. Of course it would be an absurd thing for the Secretary of the Navy to do, but legally he could expend the whole $8,250,000 for aeroplanes and violate no law.

Mr. PADGETT. Yes; but he would not discharge his duty in taking care of the other things.

Mr. SISSON. That would be true; but, to make the thing absurd, he could do it without a violation of law. Does the gentleman believe he should leave it to the Navy Department to expend as much as they please for aeroplanes? It goes further to enforce what I said yesterday that these items ought to be itemized more specifically.

Mr. PADGETT. The same suggestion that the gentleman from Mississippi makes as to aeroplanes applies to every other thing mentioned in this item. The Secretary and chief or superintendent of aeroplanes all insist that they shall go slow, and said to the committee that they would go slow.

Mr. SISSON. How much did they ask for?

Mr. PADGETT. They did not ask for any specified amount.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. MADDEN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MADDEN. What is before the House?

The CHAIRMAN. The gentleman from Indiana moved to strike out the last word.

Mr. MADDEN. I thought it was the gentleman from Indiana before the House. I did not hear anything else.

Mr. PADGETT. I do not think there is any necessity for fixing it. I did last year, on my own motion, put in the $35,000.

Mr. COX. Why does not the gentleman feel that $35,000 ought to go in there now?

Mr. PADGETT. I think it ought to be a little more this year.

Mr. COX. How much does the gentleman think it ought to be?

Mr. PADGETT. They say it would not exceed $50,000.

Mr. COX. Does the gentleman agree with them all of the time?

Mr. PADGETT. No; I did not last year, because I insisted that it should be limited, but after I had looked into the matter and saw how cautious they were and that they rather had to be goaded on instead of held back, I did not think it was necessary to single out that item.

The Clerk read as follows:

Wrecking pontoon: For construction or purchase of a testing and wrecking pontoon for submarines, to be available until expended, $300,000.

Mr. HENSLEY. Mr. Chairman, I make the point of order on that.

Mr. PADGETT. Mr. Chairman, I will ask the gentleman not to do that.

Mr. HENSLEY. I reserve the point of order for an explanation.

Mr. PADGETT. Mr. Chairman, the department asked for two of these wrecking pontoons, and we gave them only one this year. Under the present method of contracting in the construction of submarines they are required to be tested, and they are sent out to deep water and submerged to a depth of 200 feet. It was shown that it often costs from $10,000 to $20,000 to make these tests. That is such an item of expense that it is always added in the contract bid and the price. If we could have these pontoons we could make the test, instead of going down 200 feet. They would be subjected to the same water pressure in the pontoon at a nominal cost, and, of course, we could then get the benefit of that reduction in the purchase price of the submarines.

Mr. HENSLEY. This is a new item?

Mr. PADGETT. Yes. Then, another thing, it serves for docking. Instead of the little submarine being taken into a big dock and having to be pumped out, and handled with expensive machinery, it could be put into this pontoon and docked at a nominal cost. Then the pontoon could be used for wrecking purposes. If for any reason a mishap occurred to the submarine and it sank, this pontoon could be used for the purpose of lifting it and restoring it, so that it serves a very valuable purpose, and will be an instrument of great economy and saving hereafter.

Mr. HENSLEY. How did they get along heretofore?

Mr. PADGETT. Just as I have explained; just like the old farmer got along with a scythe blade.

Mr. HENSLEY. Have not they another fund to draw from?

Mr. PADGETT. No; they have not. They have been testing these submarines by actually sending them out to 200 feet depth of water and sinking them 200 feet deep, to get the water pressure.

Mr. ROBERTS of Massachusetts. Mr. Chairman, this wrecking pontoon I think I can explain. The gentleman asked how the department got along without one of these before. I will say for his benefit, and for the benefit of the committee, that this wrecking pontoon is an entirely new device, a new invention. With the development of submarines this has come about. Until this thing came into existence everybody was in the same position in regard to testing submarines. This is a modern, new invention for subjecting the submarines to these tests that the Government demands, and the cost of conducting which is always included in the price of the boat.

Mr. CURLEY. Mr. Chairman, I would like to ask the chairman a question and that is—if any of these testing and wrecking pontoons are now in use in any of the continental navies?

Mr. ROBERTS of Massachusetts. They are.

Mr. PADGETT. I understand they have some in the Italian navy.

Mr. CURLEY. And we have none in the American Navy?

Mr. PADGETT. No.

Mr. CURLEY. How many submarines have we?

Mr. PADGETT. I think we have forty and odd completed; and completed, building, and authorized, 63.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I think the gentleman is mistaken in the number of submarines. There are 47 submarines building and built.

Mr. MANN. Mr. Chairman, will the gentleman from Massachusetts yield?

Mr. ROBERTS of Massachusetts. Yes.

Mr. MANN. How much royalty do we pay for this patented device?

Mr. ROBERTS of Massachusetts. There is no evidence before the committee that we are to pay any royalty.

Mr. MANN. But it is perfectly safe to say that if it is a patented device we will have to pay royalty.

Mr. ROBERTS of Massachusetts. This provides for the construction of the apparatus——

Mr. MANN. But there must be royalty paid for constructing them.

Mr. ROBERTS of Massachusetts. There may and there may not.

Mr. MANN. Oh, we know that if it is a patented device we will have to pay royalty.

Mr. ROBERTS of Massachusetts. There has been no evidence before the committee as to royalty.

Mr. MANN. They ought to have had evidence before the committee, because if they propose to construct a patented device we will have to pay the patentee for the privilege.

Mr. ROBERTS of Massachusetts. If it is patented in this country; yes.

Mr. MANN. Well, the gentleman stated it is a patented device. Then it is perfectly safe to say it is patented in this country, if it is patented anywhere, and I think we ought to know how much of this amount is to pay for the cost of the work and how much for the profit to the inventor. A naval officer, was it?

Mr. ROBERTS of Massachusetts. I do not know; some one suggested it was a naval officer.

Mr. SAMUEL W. SMITH. I asked the question whether it was patented by a naval officer.

Mr. ROBERTS of Massachusetts. Then we would not have to pay.

Mr. MANN. Why not?

Mr. ROBERTS of Massachusetts. It is a provision of law, a Navy Department regulation.

Mr. MANN. I have not discovered that law yet.

Mr. HENSLEY. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. RAKER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment:

The Clerk read as follows:

Insert at the end of line 23, page 37, the following as a new paragraph:

"That the U. S. S. *Portsmouth* be, and hereby is, transferred to the State of California, upon condition that the said State of California, by and through its governor, accepts said vessel, U. S. S. *Portsmouth*, for said State, after having been first duly authorized by the Legislature of said State of California, and upon the further condition that said vessel remain the property of said State, to be preserved and cared for by the said State of California at its own cost and expense."

Mr. FOSTER. Mr. Chairman, I make a point of order.

Mr. MANN. Mr. Chairman, I reserve a point of order. I desire to ask the gentleman if this matter has been called to the attention of any committee of the House?

Mr. RAKER. That is what I want to explain. I am offering this at the suggestion of the chairman of the Committee on Naval Affairs.

Mr. MANN. Was it called to the attention of the Committee on Naval Affairs?

Mr. RAKER. It was taken up in a hearing on the matter.

Mr. MANN. Then why have they not reported a bill?

Mr. RAKER. They conceived it not necessary to do it.

Mr. MANN. We differ about that.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I think I can throw some light on that. The proposition when it first came before the committee was for the Government to fit this vessel up at an expense of about $100,000 and take it around to San Francisco and give it either to the city or the State. A suggestion was made to the gentleman from California, who has just made the motion, that, so far as donating it was concerned, we would look with favor upon the proposition to give the vessel where she now lies to the State if the State would take her away, and the gentleman informed the members of the committee he would communicate with the officials of the State of California and see if that proposition met with their favor. Before he got a reply the naval bill was framed and reported, and that is one reason at least why the committee took no action about putting a similar item in our bill.

Mr. MANN. I suppose this vessel has been the property of the Government of the United States for many years?

Mr. ROBERTS of Massachusetts. I will say that this is an old vessel, and if not given to California it will be sold and bought by somebody for the old junk in her. She is a very old vessel and has been used as a receiving ship.

Mr. MANN. I think we have the right to have these matters brought before the House in a proper way.

Mr. RAKER. I want to say to the gentleman the matter has been before the House and in the Senate——

Mr. MANN. Where has it been brought before the House?

Mr. RAKER. I will answer the inquiry as soon as I get an opportunity.

Mr. ROBERTS of Massachusetts. She was a vessel that was used when the Navy went around to the Pacific coast, at the time we acquired California from the Mexicans. She is a vessel apparently 60 or 70, or more, years old now.

Mr. RAKER. She was built in 1843.

Mr. KAHN. The sloop of war *Portsmouth* is the vessel that sailed into San Francisco Bay on the 6th of July, 1846, and her commander, John B. Montgomery, raised the American flag and took possession of California in the name of the Government of the United States. The flag was raised on the old Spanish plaza in the village of Yerba Buena, and the name of the plaza was changed to "Portsmouth Plaza." It is known as "Portsmouth Plaza" to this day. The officers of the village rechristened the village San Francisco. The Navy Department has been desirous of having the old ship taken to the Bay of San Francisco.

I may say, as a matter of history, that within three days after the *Portsmouth* had sailed into San Francisco Bay a British frigate sailed into that bay and found the United States already in possession of the territory. After remaining two or three days the British frigate sailed away, and it is believed by the officers of the Navy Department that the presence of the *Portsmouth* in the Bay of San Francisco three or four days before the British frigate arrived resulted in the elimination of any complications that might have ensued if the British frigate had arrived first. [Applause.]

Mr. MANN. They will have to revise their history, I think, for they have not any basis for such belief.

Mr. KAHN. They have records, which I saw myself, indicating that that is a fact. They showed them to me. I was at the department and took the matter up a year or so ago. The Senate has already passed a bill to allow the ship to be taken around Cape Horn to San Francisco.

Mr. MANN. At whose expense?

Mr. KAHN. I think it was at the expense of the Government.

Mr. MANN. That is it, and that is what is intended to be done here now.

Mr. ROBERTS of Massachusetts. Oh, no.

Mr. KAHN. The gentleman will find that this amendment is different.

Mr. MANN. Of course, not here, but the Senate has passed a bill to do so and so, and the item is proposed to be inserted here. It looks harmless, but it is inserted with the knowledge that it will be changed in the Senate.

Mr. KAHN. Has the gentleman any knowledge that it will be changed in the Senate? There is no disposition on the part of any gentleman from California, that I know of, to change it in the Senate.

Mr. MANN. There is not any intention on the part of any gentlemen from California here to change it in the Senate, although they would like to have that privilege.

The CHAIRMAN. The time of the gentleman from California [Mr. RAKER] has expired.

Mr. RAKER. I have not had an opportunity to say a word on this matter. [Laughter.]

Mr. SISSON. Mr. Chairman, I ask unanimous consent that the gentleman from California have five minutes. They took his time all away from him.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAKER. Mr. Chairman, I want to say to the gentleman from Illinois and to other members of the committee that a bill providing for the repair of the *Portsmouth* passed the Senate, making an appropriation to repair to the extent of $25,000. I was corresponded with, and the other gentlemen from California as well, in regard to the matter, and a bill introduced and the matter taken up before the committee. When the matter was taken up before the committee I called the committee's attention to the reasons the Navy had for this, which are as follows:

The custom of selling unserviceable vessels will before long dispose of the *Constellation, Portsmouth, Hartford,* and *Olympia,* unless their

preservation be specially authorized. Some of these vessels could be preserved almost indefinitely with a small expenditure for occasional repairs, and their names would be a constant inspiration to the Navy and to the country at large to live up to their noble traditions.

I want to read now the statement of the department in regard to the bill for the repair of this vessel that has been sent to this committee, dated April 2, 1912, and is in the closing of the report of the Secretary:

If in place of this provision one could be inserted which would transfer the vessel to the State of California outright, it would probably best meet the demands of California and the wishes of this department.

After this letter was presented to this committee it was taken up directly with the Legislature of California, and I hold before me a copy of the proceedings wherein the resolution was passed unanimously taking the vessel over in response to the Secretary and to the suggestion of the committee.

A bill is now pending in the legislature to provide means by which this historic vessel may be taken over by the State of California, and be provided for and stationed in the State of California at its expense, because of its historic nature, which will be found in part on page 353 of the report, as follows:

First cruise, 1844–1848, in the Pacific under command of Commander J. B. Montgomery, squadron of Commodore J. D. Sloat. Took a prominent part in the operations on the coast of California during the War with Mexico.

June 3, 1846, arrived in the harbor of San Francisco, Cal.

July 5, 1846, landed a party of seamen and marines, under command of Lieut. J. S. Missroon, United States Navy, for the protection of the American consul and citizens at San Francisco. Lieut. H. B. Watson, United States Marine Corps, was in charge of the marines. July 9, 1846, war having been declared between the United States and Mexico, by order of Commodore Sloat a force was landed at Yerba Buena from the *Portsmouth*, which took possession of San Francisco, and at 8 a. m. hoisted the United States flag in front of the customhouse. Detachments of officers and men were sent to hoist the flag at Sutter's Fort, Sausalito, Sonoma, and Bodega.

The record shows that this vessel, whether sailing, steering, working, scudding, lying to, or riding at anchor in a seaway, has one of the best records of any vessel ever built by this Navy, a vessel that by virtue of its being in San Francisco at the proper time made it possible for this country to take the western part of the United States and make California and the West a part of this country.

This amendment provides that the Government shall be at no expense; that, instead of driving this vessel out to sea, with its historic record, which is a page and a half in length here, to be shot to pieces, the State of California can have this vessel and maintain it with the men necessary to man it. California asks this Congress to turn that vessel over to the State in order that she may preserve it for all time at her own expense. That is the recommendation of the department and the recommendation of the committee, and I trust that the Members will not object to this amendment being placed on the bill at this time.

Mr. MADDEN. Does the gentleman state that there will be no expense to the United States Government?

Mr. RAKER. That is the provision of the bill. I put it in for that purpose, and it is my intention and the intention of the legislature, as I gather through correspondence and telegrams, that the Government shall be put to no expense for the maintenance and preservation of this vessel for all time, and unless this act thus provides, the Secretary of the Navy shall not turn it over.

Mr. MADDEN. Will the gentleman state what will happen to this provision when it leaves this body?

Mr. RAKER. So far as I am concerned, I will ask the Senators from my State to urge the Senate to retain this provision, with the proviso that the Government shall be put to no expense.

Mr. BUTLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BUTLER. I understand that the gentleman from Illinois [Mr. MANN] has reserved a point of order against this amendment?

The CHAIRMAN. Yes.

Mr. BUTLER. I call for the regular order.

Mr. MANN. If the gentleman from California [Mr. RAKER] desires to ask unanimous consent to have his amendment considered later on, with a point of order pending, I shall not object. If the gentleman now desires to ask unanimous consent to have his amendment passed over and taken up later, I have no objection.

Mr. PADGETT. Mr. Chairman, on that I want to make an explanation. If the gentleman from California will make his request for unanimous consent to offer his amendment at a point later on in the bill, I shall not object; but the engrossing clerks are preparing the bill for presentation to the Senate as we pass along through it, and this would interfere with their work. I suggest, therefore, to the gentleman to ask unanimous consent to offer his amendment later on, so as not to compel a return to this place in the bill, and thus not make it necessary for the engrossing clerks to do this work over.

The CHAIRMAN. Is there objection?

Mr. MANN. What is the request, Mr. Chairman?

The CHAIRMAN. The request is that the gentleman from California [Mr. RAKER] be authorized to offer this amendment at some point later on in the bill.

Mr. MANN. I do not make any objection if it is offered subject to the right to make a point of order against it. Otherwise it would not be right.

The CHAIRMAN. It will be subject to a point of order.

Mr. MANN. I understand that the gentleman from California asks leave to withdraw his amendment at this place.

Mr. RAKER. Yes; I ask leave to withdraw it now and offer it later.

The CHAIRMAN. Without objection, that will be done.

There was no objection.

Mr. SHARP. Mr. Chairman, before we proceed to read the next page, I beg the courtesy of the chairman of the committee to permit me the privilege of an interruption for just a moment, so that I can ask unanimous consent to extend my remarks in the RECORD by having printed therein a copy of House joint resolution 402, and a copy of a letter containing an opinion in reference thereto by Gen. Bixby, Chief of Engineers, United States Army; also the approval thereof by the Secretary of War.

I make this request in the interest of a subject which is of vital importance to the people of the entire country, and because of the critical situation in which it may be placed by failure on the part of Congress to take favorable action in the matter. This opinion, coming from the highest source of authority—an expert on such problems—leads me to believe that the urgent need of the prompt enactment of this resolution will appeal to the membership of the House.

Mr. FOSTER. May I inquire of the gentleman what is that resolution?

Mr. SHARP. It is in relation to Niagara Falls.

The CHAIRMAN. The gentleman from Ohio [Mr. SHARP] asks leave to extend his remarks in the RECORD by the insertion of a resolution and certain letters. Is there objection?

There was no objection.

Following are the resolution and letters referred to:

Joint resolution (H. J. Res. 402) extending the operation of the act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes.

Resolved, etc., That the provisions of an act entitled "An act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes," be, and they are hereby, extended and reenacted from March 4, 1913, being the date of the expiration of the operation of said act, to March 4, 1914.

OFFICE OF CHIEF OF ENGINEERS,
February 21, 1913.

To the SECRETARY OF WAR:

1. Returned.

2. Hon. W. G. SHARP incloses a copy of House joint resolution 402, Sixty-second Congress, third session, to extend the operation of the act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes, and he requests an expression of views in the matter, more particularly in regard to the time of extension.

3. Unless the act in question is extended or replaced by like legislation, the question of control over water diversion and power development at Niagara Falls will be left in a state more or less chaotic. If the act expires by limitation it is probable that all permits granted thereunder will immediately terminate. At any rate, the War Department will find it difficult, if not impossible, to exercise any control over such permits or over the disposition of any unused or unallotted water power; and no executive will be specifically charged with the duty of supervising the use of water for power development on the American side, or the transmission of electrical power from or to Canada.

4. The proposed time of extension is considered judicious.

5. It is therefore the view of this office that if other legislation is not to be enacted on the subject, the proposed resolution should be passed.

W. H. BIXBY,
Chief of Engineers, United States Army.

WAR DEPARTMENT,
February 24, 1913.

Respectfully returned to Hon. W. G. SHARP, House of Representatives, inviting attention to the foregoing report of the Chief of Engineers, United States Army, in whose views the department concurs.

HENRY L. STIMSON,
Secretary of War.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Improvement of construction plants: For repairs and improvement of machinery and implements at plant at navy yard, Portsmouth, N. H., $10,000.

Mr. SISSON. Mr. Chairman, I do not know what the sentiment of the committee is in reference to this matter, but this is one of the navy yards that were discussed at some length to-day. I make a motion to strike out the paragraph.

Mr. PADGETT. This is not for the improvement of the yard. This is to repair the machinery that is in operation there now.

Mr. SISSON. I understand that; but why is it necessary to do that, if it is in the contemplation of the Navy Department finally to abolish this yard?

Mr. PADGETT. It is a current improvement; keeping up the machinery as we go along.

Mr. SISSON. Why do you want to keep up the machinery if you expect to abandon the yard?

Mr. PADGETT. We do not expect to abandon it that I know of; but, if 10 or 15 years from now we should abandon the yard, we want to keep up the machinery during the next fiscal year so as to go on with the work.

Mr. SISSON. The gentleman, of course, has heard all the discussion to-day, and he knows a great deal more about the intentions of the Navy Department than I do, except what I have gathered from the discussions to-day; but does the gentleman believe that it is not possible for Congress now to abolish some of these navy yards?

Mr. PADGETT. It may do it. I do not know; but it is not going to do it this year.

Mr. SISSON. Does not the gentleman believe this to be one of the yards that would be abolished?

Mr. PADGETT. Perhaps it is, but it is not going to be abolished this year, and this is just to pay for repairs to the operating machinery used there in the manufacturing plant during the next year.

Mr. SISSON. I withdraw my motion, Mr. Chairman.

The CHAIRMAN. The gentleman asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Boston, Mass., $20,000.

Mr. MANN. I move to strike out the last word. Where were these items carried last year for repairs and improvement of machinery and implements?

Mr. PADGETT. Last year all that was carried was in one appropriation for Pearl Harbor. We omitted all of the others last year. There was no appropriation made for these yards last year. We only made an appropriation for Pearl Harbor.

Mr. MANN. Here are eight yards now that have repairs and improvement of machinery and implements. Does the gentleman say that they needed no repairs during the current year and no improvement of implements during the current year, so that nothing was carried in the last appropriation bill?

Mr. PADGETT. Nothing was carried last year.

Mr. MANN. I take it that was because we were approaching a presidential election; and I suppose our distinguished friends on the other side of the aisle were attempting to make a record for economy, and so left out provisions for repairs of machinery at these eight or nine naval stations, knowing that the plants would run down. Now they come in this year with a large appropriation for that purpose.

Mr. PADGETT. I will say to the gentleman——

Mr. MANN. I shall be glad to get the information.

Mr. PADGETT. On the contrary the department last year did not submit any estimates for any of these places, but withheld the estimates and concentrated them all at Pearl Harbor.

Mr. MANN. The department knew what would happen if they put in estimates. They were wise. Even the naval officers and the Army officers knew how you were going to cut into them last year.

Mr. PADGETT. Not at all. They could not prophesy.

Mr. GREGG of Texas. Mr. Chairman, I want to ask a question concerning lines 14 to 16, inclusive, on page 31.

Mr. PADGETT. We passed that item long ago.

Mr. GREGG of Texas. I know, but it is for repairs and preservation at navy yards and stations, $800,000.

Mr. PADGETT. Yes.

Mr. GREGG of Texas. Now, over here we have for repairs at these different navy yards, $115,000.

Mr. PADGETT. The $800,000 applied to buildings and grounds, and this applies to the machinery at operating plants.

Mr. GREGG of Texas. I wanted to make plain the fact that provision was made for the repairs and preservation of buildings in all these navy yards, separate and independent of the provisions that we moved to strike out to-day.

Mr. PADGETT. That is correct. We put buildings in one item and machinery in another.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Puget, Sound, Wash., $10,000.

Mr. SISSON. I suppose the chairman of the committee, the gentleman from Tennessee, did not by his silence mean to admit that the officers of the Navy Department withheld the estimates because an election was approaching?

Mr. PADGETT. I did not.

Mr. SISSON. The fact that they were Republican Cabinet officers and withheld the estimates had nothing to do with the approaching election?

Mr. PADGETT. No.

The Clerk read as follows:

That the unobligated balances under the appropriation "Steam machinery" for the fiscal years ending June 30, 1912, and June 30, 1913, not exceeding $250,000, are hereby reappropriated and made available for the development of a type of heavy-oil engine suitable for use in one of the fuel ships authorized by the act approved August 22, 1912, and the expenditure thus incurred shall not be a charge against the limit of cost of such vessel.

Mr. FOSTER and Mr. SISSON reserved points of order.

Mr. SISSON. Mr. Chairman, I would like for the gentleman from Tennessee to explain, first, why this is not a direct appropriation instead of permission to construct it out of unobligated balances?

Mr. PADGETT. There was an unobligated balance of something like $300,000.

Mr. SISSON. Where was it; why was it not turned into the Treasury?

Mr. PADGETT. It was turned back into the Treasury, and we have reappropriated it; that is, we are making it available, but we use the word reappropriate.

Mr. SISSON. What about the balances; how much did they amount to?

Mr. PADGETT. It was about $300,000, but we say not to exceed $250,000. We wanted to appropriate $250,000 for the purpose of developing a direct internal-combustion engine which they need on our ships and which the gentleman discussed the other day with reference to using oil instead of coal. The time is coming when we ought to take some positive steps toward developing an engine that will use the oil in the cylinders instead of using it as fuel.

Mr. SISSON. I will state to the gentleman that it may be my own dullness that maks me incapable of understanding the language of the bill. He speaks of "unobligated balances under the appropriation 'Steam machinery' for the fiscal years ending June 30, 1912, and June 30, 1913, not exceeding $250,000 is hereby reappropriated." Now, were there two balances?

Mr. PADGETT. There is an unobligated balance if there is any at all for each year, because the accounts are kept separately.

Mr. SISSON. Were there two balances each year, and would the two balances amount to more than $250,000?

Mr. PADGETT. Yes; $300,000.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

Mr. SAMUEL W. SMITH. Mr. Chairman, I want to ask the gentleman a question. In line 26 you speak of it as a type of heavy-oil engine. What do you mean by heavy oil; crude oil?

Mr. SISSON. It is crude oil.

Mr. CALDER. Let me say that it is expected when this is worked out that we can operate ships much more cheaply.

Mr. PADGETT. Yes; and require much less space. Instead of having engines that occupy a great deal of space and large bunkers for coal, they will have a smaller engine and a small space for the oil.

Mr. MADDEN. Does the gentleman know that it costs a good deal more to use oil than it does coal?

Mr. PADGETT. That depends; it does on one coast, but not on the other.

Mr. MADDEN. How much of the money appropriated by this paragraph goes to the reconstruction of the boilers which are to be used for heavy oil?

Mr. PADGETT. I can not give the gentleman the separate items.

Mr. MANN. Can the gentleman say what the limit of cost is of this vessel?

Mr. CALDER. $1,000,000.

Mr. PADGETT. It is not a vessel; it is an engine.

Mr. MANN. I am more familiar with the bill than the gentleman is.

Mr. PADGETT. I misunderstood the gentleman; I thought he was asking about the engine.

Mr. MANN. I said vessel.

Mr. PADGETT. My understanding is that there was a limit placed on the cost of the ship, and the authorization last year was $1,000,000.

Mr. MANN. Will this result in building a larger ship?

Mr. PADGETT. No, sir. It is only for the purpose of building the engine.

Mr. MANN. I understand; but you appropriate $250,000 for the engine, and that saves building other engines and boilers for this ship?

Mr. PADGETT. Yes.

Mr. MANN. So that you have $1,250,000 instead of a million dollars. It is designed to build a larger ship?

Mr. PADGETT. No; but it is supposed that in the development of this engine a great deal of experimental work will be done, and it is to cover the experiment.

Mr. SAUNDERS. In effect you would get a larger ship, because you would get more ship room, requiring less engine space.

Mr. PADGETT. Yes; but the dimensions of the ship will be the same.

The Clerk read as follows:

Ten instructors, at $1,800 each.

Provided, That no commissioned officers of the Navy shall be detailed for duty as instructors at the United States Naval Academy to perform duties which were performed by civilian instructors on January 1, 1913.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. POWERS. Mr. Chairman, I would like to ask the chairman of the committee how many civilians were employed as instructors at the Naval Academy on the 1st of January of this year?

Mr. PADGETT. Twenty-two or twenty-three, I believe, all told.

Mr. POWERS. If for any reason these men should die or resign, as the matter is now framed, the places now filled by them could not be filled by naval officers.

Mr. PADGETT. No; they would get a civilian professor. I will state to the gentleman the issue is this: In certain academic branches, such as mathematics, the languages, and English they have always had civilian instructors. The department has recommended that they should be dispensed with, and they are going to supplant them with naval officers whose salaries would be much higher than those instructors, and make it much more expensive. We believe that for these academic branches it is much better to have these regular instructors who make it a life work, rather than to detail a naval officer from a ship to go there for a couple of years and to go away and another officer to take his place. The department has already given notice to a number of these civilian instructors that they should not be employed after the 30th of June. In order that the civilian instructors shall be retained we have incorporated this provision. It is for the purpose of retaining the civilian instructors at the academy and to prevent supplanting them with naval officers at a greater cost.

Mr. MURDOCK. And it is cheaper?

Mr. PADGETT. Oh, far cheaper; yes.

Mr. HAY. I would like to ask the gentleman how it is cheaper, because you have to pay these naval officers anyway, whether at Annapolis or anywhere else.

Mr. PADGETT. That may be, but we need them in other places. We need them on the ships.

Mr. HAY. That may be; but so far as it being cheaper is concerned, it is cheaper to employ the naval officers than the civilian instructors. You would pay both of them then, and otherwise you would be paying only one.

Mr. PADGETT. Assuming we had nothing for the naval officer to do; but where we have service for him and he is needed, and we are short of naval officers, we did not feel it was proper to withdraw these officers from the actual naval service and use them in the place of civilian instructors.

Mr. POWERS. At what salary are these civilians employed?

Mr. PADGETT. There are 10 of them, at $1,800.

The CHAIRMAN. Does the gentleman from Illinois withdraw his point of order?

Mr. MANN. I do not. Will the gentleman from Tennessee yield?

Mr. PADGETT. Yes.

Mr. MANN. Do I understand it is the intention of the Navy Department, being short of officers and needing them for service at sea, to discharge the civilian instructors over there and deprive the Navy vessels and the Navy of the use of these officers by putting them in to do the teaching?

Mr. PADGETT. That is true.

Mr. MANN. If the Navy Department is so asinine as that, I think we should let them try it.

Mr. ROBERTS of Massachusetts. Not all, but only six of them.

Mr. MANN. Mr. Chairman, a few years ago the Naval Committee reported the bill to put all of these professors on the retired list. I suppose that will follow this provision if it stays in the bill. Here the committee reports to keep the instructors in one paragraph as instructors, and in the next to make the swordmaster a naval officer.

Mr. ROBERTS of Massachusetts. That is for a special purpose.

Mr. FOSTER. That is to take care of some particular man, I suppose.

Mr. MANN. That is consistency. I make the point of order, and I am going to make the point of order against the next paragraph.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Page 41, in line 2, in lieu of the matter stricken out, insert the following:

"That no part of any sum in this act appropriated shall be expended in the pay or allowances of any commissioned officer of the Navy detailed for duty as an instructor at the United States Naval Academy, to perform duties which were performed by civilian instructors on January 1, 1913."

Mr. FOSTER. I make a point of order on that.

Mr. TRIBBLE. I make a point of order.

Mr. PADGETT. That is merely a limitation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

The President is hereby authorized to appoint, by and with the advice and consent of the Senate, a swordmaster at the United States Naval Academy, to be a first lieutenant in the United States Marine Corps as an extra number, not in the line of promotion: *Provided*, That no person shall be so appointed who has had less than 25 years' continuous service as swordmaster at that institution.

Mr. MADDEN. Mr. Chairman, I make a point of order on the first paragraph and the proviso.

Mr. TRIBBLE. Mr. Chairman, I make a point of order against the whole paragraph.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

One swordmaster, $1,600; 1 assistant, $1,200, and 2 assistants, at $1,000 each; 2 instructors in physical training, at $1,500 each, and 1 assistant instructor in physical training, at $1,000; and 1 instructor in gymnastics, $1,200; 1 assistant librarian, $2,160; 1 cataloguer, $1,200, and 2 shelf assistants, at $900 each; 1 secretary of the Naval Academy, $2,400; 2 clerks, at $1,500 each; 4 clerks, at $1,200 each; 4 clerks, at $1,000 each; 4 clerks, at $900 each; 2 clerks, at $840 each; 1 draftsman, $1,200; 1 surveyor, $1,200; services of organist at chapel, $300; 1 captain of the watch, $924; 1 second captain of the watch, $828; 22 watchmen, at $732 each; 10 instructors, at $1,800 each.

Provided, That no commissioned officers of the Navy shall—

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the chairman of the committee why the dentist is left out in making up the bill?

Mr. PADGETT. If the gentleman will turn to the first page of the bill he will find he is transferred over under "Pay of the Navy."

Mr. FOWLER. That is in the first part of the bill.

Mr. PADGETT. That is under "Pay of the Navy."

Mr. FOWLER. I see the gentleman's bill carried in this same paragraph a year ago a provision for a dentist, at $2,550.

Mr. PADGETT. That is true, but the law last year was changed so that he is put under "Pay of the Navy" instead of under the Naval Academy appropriation.

Mr. FOWLER. I withdraw the point of order.

Mr. HAMLIN. One moment. I desire to ask a question for information purely. Are any of these employees provided for midshipmen?

Mr. PADGETT. No.

Mr. HAMLIN. They are all civilians employed from the outside?

Mr. PADGETT. Yes.

The Clerk read as follows:

Department of electrical engineering and physics: Two electrical machinists, at $1,000 each; two mechanics, at $1,000 each; in all, $4,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. The bill carried last year a provision for one mechanic at $720, and I see you have in this bill a provision for two mechanics at $1,000 each.

Mr. PADGETT. Yes.

Mr. FOWLER. That is an increase of salary to one mechanic?

Mr. PADGETT. Yes.

Mr. FOWLER. Is it an increase for both mechanics or only for one?

Mr. PADGETT. It is an increase for one and an authorization for another.

Mr. FOWLER. That is what I thought. What is the reason for the additional mechanic?

Mr. PADGETT. I will read you:

Albert Knackstedt has been employed in the department of physics and chemistry at the Naval Academy since 1897, and is now receiving a yearly salary of $730. He is an efficient workman.

Harry F. Le Tournear has been employed as a mechanic in care of scientific apparatus in the department of physics and chemistry since 1909. He is also a skilled workman, salary $730 per annum.

The head of the department recommended that the salaries of the above-named men be increased at least to $1,000 per annum, which recommendation is approved by the superintendent.

The department believes that the salary of $730 per annum is inadequate for work of this character, and is strongly in favor of increasing the pay of these employees. If the estimates had not already been sent in when the matter was called to the department's attention, an increase in the pay of these positions would have been asked for in the regular estimates.

I was mistaken in my statement. It is an increase to two mechanics, not an authorization of one.

Mr. FOWLER. I was not sure about it, and that is the reason I asked the question. Are these men constantly employed?

Mr. PADGETT. Yes.

Mr. FOWLER. About how many hours per day are they engaged?

Mr. PADGETT. Under the Government law they can be employed only eight hours.

Mr. FOWLER. What I desired to know was whether they had regular employment.

Mr. PADGETT. Oh, every day.

Mr. FOWLER. I do not think $1,000 is too much salary, and I withdraw the point of order.

Mr. PADGETT. Mr. Chairman, I wish to offer an amendment, on page 42, line 7, to strike out the word "department" and insert the word "departments." It should be plural.

The CHAIRMAN. If there is no objection, the amendment will be agreed to.

The amendment was agreed to.

The Clerk read as follows:

Commissary department: One chief cook, $1,200; 4 cooks, at $600 each, and 8 assistants, at $300 each; 1 steward, $1,200, and 1 assistant, $600; 1 head waiter, $720, and 2 assistants, at $480 each; 2 pantry men, at $420 each; 1 chief baker, $1,200; 1 baker, $600; 2 assistants, at $540 each, and 1 assistant, $420; necessary waiters, at $16 per month each, $13,440; 1 messenger to the superintendent, $600; 27 attendants, at $300 each; in all, $35,760: *Provided*, That hereafter such additional payments from the midshipmen's commissary fund as the superintendent of the Naval Academy may deem necessary may be made to the servants authorized in the commissary department.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the proviso on page 43. I call the attention of the chairman of the Committee on Naval Affairs to that. Do you propose, out of this midshipmen's commissary fund, to permit them to hire certain servants? What are these servants to do?

Mr. PADGETT. They wait on the boys.

Mr. SISSON. Are they authorized in the commissary department to wait on the table, or to shine shoes, or what?

Mr. PADGETT. To wait on the table.

Mr. MANN. If the gentleman will permit, at the Military Academy the boys pay all the expenses, and here they pay $16 a month out of the Treasury and they pay the balance out of the commissary fund. It is put in as a permanent item this year instead of as a current item.

Mr. SISSON. I see this becomes a part of the permanent law.

Mr. MANN. It is intended to have them pay part of the expense.

Mr. SISSON. You mean the boys?

Mr. MANN. Yes; as they do at the Military Academy.

Mr. PADGETT. Under the law——

Mr. SISSON. This proviso simply authorizes the president of the Naval Academy to employ these servants out of these funds when he sees fit to do so?

Mr. PADGETT. When he needs them, or sometimes in order to get satisfactory service for the boys they have to pay them more than they can pay under the law, and this is to allow them to pay this addition.

Mr. SISSON. I have no objection to that, and I withdraw the point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] withdraws the point of order, and the Clerk will read.

The Clerk read as follows:

Hereafter the Board of Visitors to the Naval Academy shall consist of five members of the Committee on Naval Affairs of the United States Senate and seven members of the Committee on Naval Affairs of the House of Representatives, to be appointed by the respective chairmen thereof, and the members so appointed shall visit the Naval Academy annually at such time as the chairman of the Board of Visitors shall appoint, and the Members of each House of Congress of said board may visit said academy together or separately as the said board may elect during the session of Congress. The expenses of the members of the board shall be their actual expenses while engaged upon their duties as members of said board, not to exceed $5 per day and their actual expenses of travel by the shortest mail routes: *Provided*, That so much of chapter 68, Statutes at Large, volume 20, page 290, as is inconsistent with the provisions of this act is hereby repealed.

Mr. MOORE of Pennsylvania. Mr. Chairman, I reserve a point of order on this paragraph. I would like to know something about what the members of this commission do.

Mr. PADGETT. This is putting the Naval Academy upon the same basis as the Military Academy. Heretofore they have been having a mixed board. The House appointed 3, the Senate 2, and the President 7, making a board of 12, and the annual expense has been about from $2,500 to $3,000 for the last few years.

Mr. MOORE of Pennsylvania. Is this a change in the existing law?

Mr. PADGETT. Several years ago the Congress changed the Board of Visitors as to West Point. This is making Annapolis the same as West Point, and makes a reduction in the expenses of from $2,000 to $2,500 a year.

Mr. MOORE of Pennsylvania. May I inquire whether there is any law authorizing the payment of these visitors?

Mr. PADGETT. Oh, yes; and this changes it.

Mr. MOORE of Pennsylvania. Who recommended the insertion of this particular paragraph?

Mr. PADGETT. The Naval Committee.

Mr. MOORE of Pennsylvania. Does the Navy Department stand for it?

Mr. PADGETT. I do not know whether they do or not. They were not consulted.

Mr. HENSLEY. Mr. Chairman, I desire in that connection to say to the chairman of the Committee on Naval Affairs that under this same law the expenses of this board in connection with the Military Establishment were $216.15.

Mr. PADGETT. It will save $2,000 or $2,500.

Mr. KAHN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield.

Mr. KAHN. The Board of Visitors to the Military Academy is now composed of seven Members of the House and five Members of the Senate. Up to about four or five years ago the Board of Visitors to the Military Academy was similar to the board, under existing law, to the Naval Academy.

Mr. PADGETT. Yes.

Mr. KAHN. Under that law visitors are appointed from various sections of the Union, and they all get mileage, which runs the expense to a considerable amount. The experience of the Military Academy has been this: Members of the House who are appointed as visitors—and they are all members of the Military Committee—go to the academy during the early part of the year and personally learn the requirements of the academy. They get information at first hand.

Mr. PADGETT. They go there during the working period.

Mr. KAHN. Exactly. And all that is paid is the actual expense of going and coming.

Mr. MOORE of Pennsylvania. What is the actual result?

Mr. KAHN. The actual result has been this: That they are better able to legislate for the academy because they have seen with their own eyes what is required at the academy.

Frequently estimates have been submitted for repairs at the Military Academy that the visitors under the existing law thought were unnecessary for the time being, and in that way money has been saved to the Government. Other repairs were found to be absolutely necessary, and in that way we were able to legislate to better advantage for the academy. I believe that the innovation has been a very good one, and I think it would be a good idea to have a board for the Naval Academy similar to the one we have for the Military Academy.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

Mr. KAHN. Yes.

Mr. HENSLEY. If it costs this board under the law only $216.50——

Mr. KAHN. It was something of that sort. I think the expenses of the individual members of the Board of Visitors are about $25 or $26 for a visit.

Mr. HENSLEY. I have a letter from the Quartermaster General showing that it should not cost more than $500 to visit the Naval Academy, which is much nearer than West Point.

Mr. KAHN. My figures are that it costs a member of the board about $25 to visit the Military Academy and return.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman from Tennessee [Mr. PADGETT] state whether or not it is within the province of the Committee on Naval Affairs occasionally to visit this academy on its own account, rather than to have independent Members of Congress going there as they may see fit, thus becoming subject to such criticism as might be made as a result of their expenditures for personal expenses, and so forth?

Mr. PADGETT. I do not think that, as an institution, you could depend on the Members going.

Mr. MANN. Mr. Chairman, would the gentleman from Pennsylvania yield for an illustration?

Mr. MOORE of Pennsylvania. Yes.

Mr. MANN. As a result, possibly, of the change in the law concerning the Military Academy, we passed the Military Academy bill this year in the House in the shortest time any appropriation bill has ever been passed during my service in the House. I think it was half an hour, and when it went to the Senate, I believe in the Senate committee there were only two inconsequential amendments inserted. I have the bill in my desk. I take it that it was largely the result of the visits which Members of the Senate and of the House made to the academy.

Mr. OLMSTED. Mr. Chairman, I would like to ask the gentleman from Tennessee a question. I notice in a proviso here, on page 44, it is worded—

Provided, That so much of chapter 68, Statutes at Large, volume 20, page 290, as is inconsistent with the provisions of this act is hereby repealed.

Mr. PADGETT. That is the law authorizing the present Board of Visitors.

Mr. LOUD. That is civilians.

Mr. OLMSTED. I looked through that chapter hastily, and I found only $26 for expenses.

Mr. PADGETT. That, I understand, is the act which authorizes the Board of Visitors, and this is to repeal it.

Mr. OLMSTED. It is a long act, and perhaps I did not study all of its provisions carefully, but I did not see anything of the kind in it.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. MOORE] has expired. The Clerk will read.

Mr. MOORE of Pennsylvania. I reserved a point of order with a view of getting a little further information. I may make the point later on. I would like to know to what extent the Navy Department is interested in this proposition?

Mr. PADGETT. I do not think they are interested in it at all. This is for the information of Congress.

Mr. MOORE of Pennsylvania. It did not originate with the department? It originated either with the Senate committee or with the House committee?

Mr. PADGETT. It originated with the House committee.

Mr. MOORE of Pennsylvania. I make the point of order against the paragraph, Mr. Chairman.

Mr. PADGETT. Mr. Chairman, it is not subject to a point of order. It is clearly within the provisions of the Holman rule. It reduces expenses by abolishing offices and curtails expenditures. It reduces expenses from $3,000 to less than $500.

Mr. MURDOCK. Mr. Chairman, may I ask the gentleman a question?

Mr. PADGETT. Yes.

Mr. MURDOCK. Is there any limitation in this paragraph as to the amount of money any individual Member of this body can expend in making trips over there?

Mr. PADGETT. Yes; it says he shall have his actual railroad expenses.

Mr. MURDOCK. And $5 a day expenses.

Mr. PADGETT. And $5 a day.

Mr. MURDOCK. He can make just as many trips as he chooses.

Mr. PADGETT. No; because under the $500 limitation he would not make very many.

Mr. MURDOCK. I did not know about the $500 limitation. Where is that?

Mr. FOWLER. In the next paragraph.

Mr. MOORE of Pennsylvania. Mr. Chairman, I think this is in conflict with existing law and is new legislation. It proposes to repeal portions of the old act that may be inconsistent herewith. It is clearly new legislation.

The CHAIRMAN. Under the statement of the chairman of the Committee on Military Affairs it reduces expenditures and comes within the Holman rule. The point of order is overruled.

Mr. MOORE of Pennsylvania. I do not think the gentleman from Tennessee will contend that the old law fixes a limitation. This clearly provides for an expenditure over and above that provided by existing law.

The CHAIRMAN. Under the old law the expense might be $2,500.

Mr. PADGETT. The appropriation in the old law is $3,000.

The CHAIRMAN. The old law appropriates $3,000, and under the proposed amendment the expenditure will be about $250.

Mr. MOORE of Pennsylvania. Does the gentleman from Tennessee assure the Chair that the old law fixes a limit of expenditure?

Mr. PADGETT. Yes.

Mr. BOEHNE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOEHNE. The Chair has ruled on this point of order, has he not?

The CHAIRMAN. The Chair has ruled on the point of order.

Mr. CAMPBELL. Regular order!

Mr. MOORE of Pennsylvania. I did not understand the ruling of the Chair.

The CHAIRMAN. The Chair overruled the point of order on the ground that the paragraph reduces expenditures and comes within the Holman rule.

The Clerk read as follows:

Expenses of the Board of Visitors of the Naval Academy, being actual expenses while engaged upon duties as members of the board not to exceed $5 a day and actual expenses of travel by the shortest mail routes, and for clerk hire, and other incidental and necessary expenses of the board, $500.

Mr. COX. Mr. Chairman, I reserve a point of order on the words "and for clerk hire," in line 17.

Mr. MANN. That is for actual expenses.

Mr. COX. I want to know the necessity of taking a clerk down there.

Mr. MANN. They need a clerk, of course.

Mr. COX. I do not suppose this board do very much that calls for a clerk.

Mr. PADGETT. It is not for clerk hire to the board. There is a permanent clerk at the academy, and he records the meetings of the board.

Mr. COX. What do the board do there? Do they hold meetings?

Mr. PADGETT. They hold meetings twice a day.

Mr. COX. For how long?

Mr. PADGETT. They meet in the morning about 10 o'clock, and sit until between 12 and 1, get their lunch, and then they are in session until about 5; and several times when I have been there they have held meetings after dinner.

Mr. COX. As I understand, this clerk is a permanent employee at the academy?

Mr. PADGETT. Yes.

Mr. COX. He is already paid on some other roll, is he not?

Mr. PADGETT. He is a detailed officer, and I do not know that he gets anything for that, but this is put in there so that if we did not have a detailed officer we could have a clerk to attend the meetings.

Mr. COX. What has been your practice heretofore? Do you take a clerk over with you?

Mr. PADGETT. We do not.

Mr. COX. Does the gentleman know whether any part of this appropriation goes to the pay of that clerk over there?

Mr. PADGETT. I do not.

Mr. COX. The gentleman does not know?

Mr. PADGETT. I do not.

Mr. HAMLIN. Will the gentleman explain the meaning of the words "travel by the shortest mail routes"? In the law relating to the mileage of Members I think it reads "over the route usually traveled."

Mr. PADGETT. This is the same language that is used in the military bill.

Mr. COX. Is there any law for making this allowance for this clerk?

Mr. PADGETT. Yes; it is in the old law, and we just incorporated it here, but reduced the amount from $3,000 to $500.

Mr. CAMPBELL. I want to suggest to the gentleman from Indiana that the hide and tallow, when you get them in this case, will not be worth the time it takes to skin the flea and get the tallow rendered.

Mr. COX. That may be the idea of the gentleman from Kansas. I am trying to get information.

Mr. CAMPBELL. It is the idea of any gentleman who will look into the matter for two seconds.

Mr. COX. Oh, well!

Mr. MANN. Will the gentleman yield?

Mr. COX. Certainly.

Mr. MANN. Considering the fact that the committee has left out free carriages in this item, does not the gentleman think we can afford to give them a dollar or two for a clerk?

Mr. COX. I think so; and I was doing my best to get the information.

Mr. MANN. Before this they had carriages at the expense of the Government.

Mr. COX. I think there was a permanent statute authorizing——

Mr. MANN. I note with almost regret that our Members, when they go there, will have to walk or pay their own carriage fare.

Mr. KAHN. Will the gentleman yield for a statement?

Mr. COX. Yes.

Mr. KAHN. It has been the experience of the visitors to the Military Academy that a stenographer must be brought to the

Academy to do the work of the Board of Visitors. The testimony is taken in shorthand and subsequently transcribed.

Mr. COX. Is that the practice now?

Mr. PADGETT. That is the practice at Annapolis.

Mr. KAHN. I assume that the Naval Board of Visitors will do the same.

Mr. COX. I understand the gentleman from California to say that the visitors to the Military Academy take a stenographer with them?

Mr. KAHN. No; the academy sends to some village near by West Point and brings a stenographer and typewriter to the academy for the express purpose of taking down the hearings during the visit.

Mr. PADGETT. We do the same at Annapolis; we employ a stenographer there.

Mr. COX. Mr. Chairman, I reserved the point of order for the purpose of getting information. I am going to withdraw the point of order, and I feel in withdrawing it that the Naval Committee in this instance should be complimented. In looking at the section of the statute in the preceding paragraph, they can allow themselves $2,600 for this business, and I think the committee has shown in this particular instance economy, and I compliment them for it. I withdraw the point of order.

The Clerk read as follows:

For contingencies for the superintendent of the academy, to be expended in his discretion, $2,000.

Mr. HAMLIN. Mr. Chairman, I move to strike out the last word, and I would like to ask the gentleman from Tennessee if this has been carried in previous bills.

Mr. PADGETT. Time out of mind.

Mr. HAMLIN. What are the contingent expenditures?

Mr. PADGETT. The superintendent, by virtue of his official position, is called upon to entertain the Board of Visitors and dignitaries. Visitors from abroad and different parts of the country are entertained and paid for out of this contingent fund. It is like the fund that goes to all large institutions, so that the superintendent can have some fund to meet the contingent and general expenses.

Mr. HAMLIN. I supposed that that was it. Does the superintendent report each year how the money was expended?

Mr. PADGETT. I can not tell you; I never looked into it. It is a small amount.

Mr. HAMLIN. Not very small.

Mr. PADGETT. The superintendent does an immense amount of entertaining, and necessarily must do it. I have been there with the board three different years, and I was on a special committee that spent 10 days there at one time. I have gotten very familiar with matters there. I think that this is an entirely proper expenditure.

Mr. HAMLIN. Has the gentleman ever examined any reports of the superintendent to see whether he uses the full $2,000?

Mr. PADGETT. I have not.

Mr. HAMLIN. Does not the gentleman think it would be well to look into it?

Mr. PADGETT. He reports; but whether he uses it all I do not know. He reports to the Navy Department, and reports his vouchers for the use of it.

Mr. HAMLIN. That is the point I was trying to find out, whether the gentleman knew whether he did make an itemized report.

Mr. PADGETT. I do not know to what extent it is itemized, but he makes a report.

Mr. HAMLIN. I have had occasion to realize the absolute necessity where lump-sum appropriations are given to be expended at the discretion of any officer the great importance of requiring the officer to make an itemized report, so that we who are called upon to make the appropriations may know how the money is being expended, how much of it, or whether all or a part of it is used, and from which we can judge whether or not the money is properly appropriated and properly expended. I believe that the committee—I am not offering a suggestion—but I believe that the committee ought to find out whether or not he does make a report and whether or not it is an itemized report. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

Maintenance and repairs, Naval Academy: For general maintenance and repairs at the Naval Academy, namely: For necessary repairs of public buildings, wharves, and walls inclosing the grounds of the Naval Academy, improvements, repairs, and fixtures; for books, periodicals, maps, models, and drawings; purchase and repair of fire engines; fire apparatus and plants; machinery; purchase and maintenance of all horses and vehicles for use at the academy; seeds and plants; tools and repairs of the same; stationery; furniture for Government buildings and offices at the academy; coal and other fuel; candles, oil, and gas; attendance on light and power plants; cleaning and clearing up station and care of buildings; attendance on fires, lights, fire engines, fire apparatus, and plants, and telephone, telegraph, and clock systems; incidental labor; advertising, water tax, postage, telephones, telegrams, tolls, and ferriage; flags and awnings; packing boxes; fuel for heating and lighting bandsmen's quarters; pay of inspectors and draftsmen; music, musical and astronomical instruments; and for the pay of employees on leave, $350,000.

Mr. SISSON. Mr. Chairman, this is apparently an increase from $240,000 to $350,000, with $50,000 for the sea wall, which makes a total appropriation this year for repairs over there of $400,000.

Mr. PADGETT. There is an increase in this item, but it is a consolidation of two items. Heretofore it has been two items.

Mr. SISSON. Maintenance has been carried in a separate item?

Mr. PADGETT. Maintenance is carried in one item and repairs in another. Last year the appropriation for maintenance was $215,000 and for repairs $125,000.

Mr. SISSON. So there has been a reduction of over $100,000 in the item?

Mr. PADGETT. No; we consolidate the items, because one is maintenance and one repairs. There is an increase of $10,000.

Mr. MANN. Last year it was $344,166 for the two items and this year it is $350,000 plus $4,416.

Mr. SISSON. That is not such an increase as shows on the face of it. On the committee copy which I have it shows $240,000 last year and $350,000 this year. I withdraw the point of order.

Mr. HAMLIN. Mr. Chairman, I renew the point of order. How much leave each year have these employees?

Mr. PADGETT. I understand they have 15 days.

Mr. HAMLIN. And this item includes the pay for employees on leave?

Mr. PADGETT. Yes; they are the per diem employees there.

Mr. HAMLIN. And they have 15 days' leave each year?

Mr. PADGETT. Yes.

Mr. HAMLIN. With pay?

Mr. PADGETT. Yes.

Mr. HAMLIN. I withdraw the point of order.

The Clerk read as follows:

That after June 30, 1913, and until June 30, 1919, there shall be allowed at the Naval Academy 2 midshipmen for each Senator, Representative, and Delegate in Congress, 1 for Porto Rico, 2 for the District of Columbia, and 10 appointed each year at large: *Provided*, That midshipmen on graduation shall be commissioned ensigns in the Navy, or may be assigned by the Secretary of the Navy to fill vacancies in the lowest commissioned grades of the Marine Corps or Staff Corps of the Navy.

Mr. SISSON. Mr. Chairman, on that I reserve the point of order.

Mr. MANN. I make the point of order, Mr. Chairman.

Mr. SISSON. Mr. Chairman, I reserve the point of order for the purpose of asking the gentleman a question.

Mr. MANN. I make the point of order without asking any question.

The CHAIRMAN. The point of order is sustained and the Clerk will read.

The Clerk read as follows:

MARINE CORPS.

Pay, Marine Corps: For pay and allowances prescribed by law of officers on the active list, including clerks for assistant paymasters, five in all, $956,598.

Mr. FOWLER. Mr. Chairman, I reserve the point of order on the paragraph. I would ask the chairman of the committee if this is an increase in the allowance. I see that last year only $936,278 were appropriated for five officers.

Mr. PADGETT. Not for five officers, but for all of them.

Mr. FOWLER. This includes the clerks the same as it did a year ago?

Mr. PADGETT. It is for the pay and the allowances prescribed by law of officers on the active list, including clerks for assistant paymasters. The assistant paymasters are five, but all of the officers in the Marine Corps are included, and last year we increased the officers by 13.

Mr. FOWLER. Is that the reason for the increase here?

Mr. PADGETT. Exactly. It is a mathematical calculation.

Mr. FOWLER. And no increase in the amount paid to anyone?

Mr. PADGETT. Not at all.

Mr. FOWLER. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

For pay and allowances prescribed by law of enlisted men on the retired list: For 3 sergeants major, 1 drum major, 26 gunnery sergeants, 27 quartermaster sergeants, 36 first sergeants, 63 sergeants, 18 corporals, 20 first-class musicians, 1 drummer, 1 trumpeter, 1 fifer, and 26 privates, and for those who may be retired during the fiscal year, $150,759.

Mr. SISSON. Mr. Chairman, I reserve the point of order. How many increases are there here?

Mr. PADGETT. I have not compared them.

Mr. SISSON. I would have to go back to the original bill, which I have not here.

Mr. PADGETT. The gentleman would have to go back to the law of last year. This is a changeable thing.

Mr. MANN. Mr. Chairman, I can give the gentleman the increase. There is 1 increase in the sergeant major, 1 increase in gunnery sergeant, 2 increases in quartermaster sergeant, 1 increase in first sergeant, 11 increases in sergeants, 4 increases in corporals.

Mr. SISSON. That is 19. So the number of officers is increased by 19?

Mr. PADGETT. They go on the retired list under the law. It is an automatic proposition. The law provides that when they reach a certain age they go onto the retired list.

Mr. SISSON. To all of which I am opposed, but I can not help it. I withdraw the point of order.

The Clerk read as follows:

In the office of the quartermaster: One chief clerk, at $2,000; 1 clerk, at $1,500; 2 clerks, $1,400 each; 2 clerks, at $1,200 each; 1 draftsman, at $1,800.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the chairman the reason for increasing the number of clerks at $1,600 each from one to two.

Mr. PADGETT. What page and line?

Mr. FOWLER. Page 48, line 10. The bill a year ago carried only one clerk at $1,400, and now it carries a provision for two at $1,400.

Mr. PADGETT. Yes. He is changed, if I remember, from a $1,200 clerk. There is one clerk at $1,500 instead of two, as were recommended, and then there are two clerks at $1,400 instead of one clerk at $1,400, as recommended.

Mr. FOWLER. What did the other clerk get, or is that a new position created?

Mr. PADGETT. The clerk is getting $1,400. There was one clerk getting $1,500, and there was one clerk getting $1,400. We have kept one clerk at $1,500, and we have increased the $1,400 clerk to two.

Mr. FOWLER. I see also you have increased the draftsman salary from $1,600 to $1,800 by the provisions of the bill.

Mr. PADGETT. Yes; that is because we have got a draftsman who is a very valuable man, and he can get outside employment, and the department said they could not hold him unless he should get $1,800, and he was such a valuable man that they recommended we give him that increase.

Mr. FOWLER. You have been hiring a draftsman at $1,600 heretofore.

Mr. PADGETT. We have had this man, and we have had, I think, 10 changes in seven years.

Mr. FOWLER. Does not the gentleman think another man could be secured if he leaves?

Mr. PADGETT. Yes; but I do not think we could get near so good a one.

Mr. FOWLER. Mr. Chairman, I make the point of order against the increase for the draftsman.

Mr. PADGETT. I hope the gentleman will not do that. This is an important matter and here is a very valuable man that the department will lose and it will embarrass the department. It is not economy. When we have a very valuable man that the people on the outside want we ought to hold or at least to give him something near what he is worth on the outside.

Mr. FOWLER. Mr. Chairman, I make the point of order.

The CHAIRMAN. Does this involve an increase of salary?

Mr. FOWLER. Yes; it involves an increase of salary from $1,600 to $1,800.

Mr. BOEHNE. Mr. Chairman, I hope the gentleman will not press his point of order. It seems to me that a competent draftsman is not overpaid at $1,800.

Mr. PADGETT. This man is actually underpaid at this price.

Mr. BOEHNE. I believe a competent draftsman who can do the work this gentleman has to perform is worth $2,000 instead of $1,600, and I hope the gentleman from Illinois will not insist upon his point of order.

Mr. PADGETT. It will really embarrass the department for the gentleman to do so and instead of economy it is just the opposite.

Mr. FOWLER. I insist on the point of order.

The CHAIRMAN. The Chair desires to ask the gentleman from Tennessee, does this simply involve an increase in the number of clerks or an increase of salary as well.

Mr. PADGETT. It increases his salary.

The CHAIRMAN. Then the point of order will be sustained.

Mr. PADGETT. Mr. Chairman, I move to amend in lieu of the language stricken out by inserting, "one draftsman at $1,600."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 48, line 11, after the word "at," insert, where it occurs the second time in that line, the figures "$1,600."

The question was taken, and the amendment was agreed to.

Mr. MADDEN. That saves how much?

Mr. BUTLER. Two hundred dollars on a poor clerk.

The Clerk read as follows:

In the office of the assistant quartermaster, San Francisco, Cal.: One chief clerk, at $1,800.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph that there is an increase of salary there from $1,400 to $1,800.

Mr. PADGETT. From $1,600——

Mr. FOWLER. From $1,400, as carried in the bill of last year.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 38, line 13, insert in place of the figures stricken out "1,400."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

In the office of the assistant quartermaster, Philadelphia, Pa.: One chief clerk, at $1,800; one messenger, at $840; in the Quartermaster's Department, for duty where their services are required, four clerks, at $1,400 each.

Mr. FOWLER. I make a point of order against the paragraph.

Mr. MOORE of Pennsylvania. Mr. Chairman, I make a point of order that the point of order comes too late. The Clerk had proceeded to read the next paragraph.

Mr. FOWLER. The salary of the chief clerk is increased from $1,600 to $1,800.

Mr. MOORE of Pennsylvania. What is the point of order, Mr. Chairman?

The CHAIRMAN. That the salary of the chief clerk is increased from $1,600 to $1,800—an increase of salary.

Mr. MOORE of Pennsylvania. And the gentleman makes that point of order against an increase of $200 for a clerk?

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer an amendment that in lieu of the figures stricken out we insert "1,600."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Line 15, in place of the figures stricken out, insert "1,600."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

In all, for pay of civil force, $35,711.28, and the money herein specifically appropriated for pay of the Marine Corps shall be disbursed and accounted for in accordance with existing law as pay of the Marine Corps, and for that purpose shall constitute one fund.

Mr. RAKER. Mr. Chairman——

Mr. BUTLER. Mr. Chairman, I rise to ask the chairman of the committee whether we can not go home now?

Mr. PADGETT. The gentleman from California [Mr. RAKER] has a motion to offer.

Mr. RAKER. First, Mr. Chairman, I move to strike out the last word. I wish the gentleman from Illinois [Mr. MANN] would give me his attention for just a moment upon the amendment that was offered a moment ago. I desire to place at the end of that provision the following:

And the said vessel be turned over to the State authorities of California without any expense to the Government.

So that the amendment will read:

Amend, by inserting at the end of line 24, on page 48, the following as a new paragraph:

"That the U. S. S. Portsmouth be, and hereby is, transferred to the State of California upon condition that the said State of California, by and through its governor, accept said vessel, U. S. S. Portsmouth, for said State, after having been first duly authorized by the Legislature of said State of California, and upon the further condition that said vessel remain the property of said State, to be preserved and cared for by the said State of California at its own cost and expense, and the said vessel be turned over to the State authorities of California without any expense to the Government."

The CHAIRMAN. The Clerk will report the amendment.

Mr. MANN. It seems to me it is quite late, it being 10 o'clock. I thought we had an understanding that we would quit at this time.

Mr. RAKER. I did not understand the gentleman.

Mr. MANN. I said I thought we had an understanding that we would quit at this time. Gentlemen had been given that information.

Mr. RAKER. I wish to offer the amendment.

Mr. MANN. I make a point of order against it at this hour.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk proceeded to read the amendment.

Mr. MANN. I am going to make a point of order, if you insist on going ahead to-night.

Mr. RAKER. I did not understand the gentleman. I thought you would take it up if it was read at this time.

The CHAIRMAN. The Clerk will proceed to read the amendment.

Mr. RAKER. To avoid any complications, I understood, when the proper paragraph came, we might offer it. I do not care to take the time of the committee. I will be perfectly satisfied with any time that suits the members of the committee. I did not know we were going to quit now.

Mr. MANN. I do not know whether we are going to quit or not.

Mr. BUTLER. There are only about 75 Members here.

Mr. RAKER. The battleship proposition comes on later, and I do not want a small matter like this to fall into the maelstrom of that fight, and I thought we could get it through at this time. I hope the gentleman from Illinois [Mr. MANN] will see his way clear. The last part of the amendment says that it shall be at the expense of the State of California, and, next, that the turning over of it shall be entirely without any expense to the Government. I trust the gentleman may see his way clear not to object.

Mr. MANN. May I ask the gentleman from Tennessee [Mr. PADGETT] when he intends to quit?

Mr. PADGETT. I would like to go ahead. I said to the gentlemen that when we got to this point we would quit. The floor leader [Mr. UNDERWOOD] desires that we continue down to the "Increase in the Navy."

Mr. MANN. I have been here since 10.30 o'clock this morning, and am willing to sit until 10.30 to-morrow morning, if necessary. A good many understood that the committee would rise when we got to the top of page 49. Some gentlemen have gone away who have been watching this bill.

Mr. UNDERWOOD. Mr. Chairman, this is an important supply bill. I have not attempted to interfere with it, and I think every effort has been given in this House for every Member to exercise his right to amendment and discussion. The supply bills have got to go through, even if they have to go through under a rule, and I hope the committee will stay here patiently for a few minutes longer. There are no contested items between here and the battleships.

Mr. MANN. There will be if you stay.

Mr. UNDERWOOD. Let us read down to the battleships and try and agree upon a time for debate to-morrow, and take it up to-morrow.

Now, I am not a two-battleship man. I will vote for one battleship, but I want to get the bill through. I think, whether it goes through with one battleship or two battleships, the bill is entitled to become a law, and I think we are entitled to run this bill a while longer. I hope that gentlemen on that side of the House will not interfere with a reasonable request.

Mr. MANN. Mr. Chairman, I make a point of order against everything. I make a point of order that there is no quorum present. We had an agreement as to when the committee would rise. If the gentlemen on that side do not want to keep their agreements we can not reach an understanding.

The CHAIRMAN. The point of no quorum is made. The Chair will count to see if there is a quorum. [After counting.] One hundred and nine Members are present, a quorum.

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

Mr. RAKER. Will the gentleman just withhold for a moment?

Mr. MANN. No; I will not agree to anything.

Mr. RAKER. Let me ask unanimous consent to address the House.

Mr. MANN. No; I will not agree to anything.

SEVERAL MEMBERS. Regular order!

The CHAIRMAN. The regular order is demanded. The Clerk will read.

Mr. RAKER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. What is the inquiry?

Mr. RAKER. May I not have opportunity to ask unanimous consent to address the House for five minutes?

Mr. MANN. I object.

The CHAIRMAN. The gentleman can make his request, of course.

Mr. RAKER. I make the request.

The CHAIRMAN. Is there objection?

Mr. MANN. I object as long as gentlemen will not preserve any of the amenities.

The CHAIRMAN. Objection is made. The Clerk will read.

The Clerk read as follows:

MAINTENANCE, QUARTERMASTER'S DEPALTMENT, MARINE CORPS.

Provisions, Marine Corps: For noncommissioned officers, musicians, and privates serving ashore; subsistence and lodging of enlisted men when traveling on duty, or cash in lieu thereof; commutation of rations to enlisted men regularly detailed as clerks and messengers; payment of board and lodging of applicants for enlistment while held under observation, recruits, and recruiting parties; transportation of provisions, and the employment of necessary labor connected therewith; ice for offices and preservation of rations, $890,000; and no law shall be construed to entitle marines on shore duty to any rations, or commutation thereof, other than such as now are or may hereafter be allowed to enlisted men in the Army: *Provided*, That hereafter so much of this appropriation as may be necessary may be applied for the purchase, for sale to officers, enlisted men, and civilian employees, of such articles of subsistence stores as may from time to time be designated and under such regulations as may be prescribed by the Secretary of the Navy.

Mr. MANN. Mr. Chairman, I make a point of order against the paragraph.

The CHAIRMAN. The gentleman from Illinois makes a point of order against the paragraph.

Mr. PADGETT. What is the point of order?

Mr. MANN. Well, if the gentleman does not recognize it, I shall be glad to state it. The provision—

Provided, That hereafter so much of this appropriation as may be necessary may be applied for the purchase, for sale to officers, enlisted men, and civilian employees, of such articles of subsistence stores as may from time to time be designated and under such regulations as may be prescribed by the Secretary of the Navy—

is legislation, in my judgment. I do not know whether or not the gentleman from Tennessee recognizes it as such. But it is not in order under the Holman rule, and it is in violation of Rule XXI of the rules of the House.

Mr. PADGETT. Let the Chair rule.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer as a new paragraph, in lieu of the language stricken out, the language contained in the bill from line 1, page 49, down to and including the word "Army," in line 15.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The Clerk read as follows:

Amend by inserting in lieu of the matter stricken out the following:

"MAINTENANCE, QUARTERMASTER'S DEPARTMENT, MARINE CORPS.

"Provisions, Marine Corps: For noncommissioned officers, musicians, and privates serving ashore; subsistence and lodging of enlisted men when traveling on duty, or cash in lieu thereof; commutation of rations to enlisted men regularly detailed as clerks and messengers; payment of board and lodging of applicants for enlistment while held under observation, recruits, and recruiting parties; transportation of provisions, and the employment of necessary labor connected therewith; ice for offices and preservation of rations, $890,000; and no law shall be construed to entitle marines on shore duty to any rations, or commutation thereof, other than such as now are or may hereafter be allowed to enlisted men in the Army."

Mr. MANN. Mr. Chairman, I make a point of order against the amendment. It is a change of existing law. I think it does not come under the Holman rule. The last part of the amendment is that—

No law shall be construed to entitle marines on shore duty to any rations, or commutation thereof, other than such as now are or may hereafter be allowed to enlisted men in the Army.

Mr.. PADGETT. Mr. Chairman, that is usually carried in the law, and has been.

Mr. MANN. It undoubtedly has been and usually is, and perhaps ought to be. I do not know. The gentleman from Tennessee awhile ago made an agreement with me as to when the committee would rise.

Mr. PADGETT. Yes; I did.

Mr. MANN. If these agreements are not to be kept, if the gentleman from Alabama [Mr. UNDERWOOD], who does not stay in the House while we are considering the bill, comes in and asks gentlemen to violate their agreements, I do not propose to waive any points of order.

Mr. UNDERWOOD. Mr. Chairman, as to the point of order, the first point of order is that the gentleman from Illinois [Mr. MANN] overlooks one question in this House. I have notified him several times that when I make an agreement with that side of the House I shall make the agreement with the gentleman from Illinois. This side of the House is entitled to that degree of respect from the gentleman from Illinois that when he wants to make an agreement as to the conduct of business on this side of the House he consult with the man whom this side of the House have selected to represent them. [Applause on the Democratic side.] As to the gentleman's statement that I have not been on the floor, I have been on the floor this entire day except when called out of the Hall temporarily. It is not my desire to interfere with this bill, but I do say that in this late hour of the session, when the great supply bills have got to be passed and become laws, it is the duty of every man who represents a constituency on this floor to make an earnest and a proper effort to supply the necessary funds to run this Government.

I know that when we reach the battleship item to-morrow morning it will bring on a great deal of debate. I think that debate ought to occur early. We should have this bill out of the way to-morrow. I am told by members of the committee

that the next few pages in the bill do not involve points of any great interest, and I think it is proper and right, in the expedition of the public business, that we should read down to that point. It meets with the approval of the gentlemen on this side of the House who are fighting this bill. Many gentlemen on that side of the House want the bill to pass. It can not be contrary to their wishes that we proceed with the consideration of the bill; and I say again to the gentleman from Illinois—I have said it to him privately before and I say it to him publicly now, so that he may make no mistake about it in the future—there is but one man commissioned on this side of the House to act for the leadership of this House, and when he wants to make an agreement he will find me here to make it with him.

Mr. MANN. The trouble with the gentleman from Alabama is that we do not find him here to make it with him.

Mr. UNDERWOOD. Well, he is here.

Mr. MANN. And when the chairman of a committee, representing the Democratic side of the House, has a bill in charge on the floor of the House, I do not propose to go to the gentleman from Alabama, who is not in charge of the bill, to make an agreement concerning the bill. If the gentleman from Alabama proposes to run that side of the House, I hope he will do so. He ought to have been here to-day, when that side of the House was filibustering against the bill, attempting to defeat the Democratic committee which brought in the bill and which this side of the House helped to defend. The gentleman from Alabama was conspicuously absent when that contest and filibuster were going on, and the gentleman from Tennessee found it very convenient to receive the support of this side of the House. The gentleman from Tennessee [Mr. PADGETT] is in charge of this bill, placed there by the Democratic majority of the House; and if I wish to make an agreement with some one concerning the bill or its progress, I shall continue to go to the gentleman in charge of the bill who is on the floor, rather than to the distinguished gentleman from Alabama. [Applause on the Republican side.]

Mr. UNDERWOOD. Mr. Chairman, I have protected the gentleman's rights many times in this Congress, and have recognized his leadership on that side of the House. I have been here all day. It is not my place to lead the fight on this bill; but if the gentleman from Illinois prefers to run the House without agreements with me, he is entirely welcome to do so. I will try to get along without making agreements with the gentleman from Illinois; and I now ask for the regular order.

The CHAIRMAN. The point of order made by the gentleman from Illinois is sustained.

Mr. PADGETT. Mr. Chairman, I offer an amendment containing the language beginning with line 3, on page 49, down to line 12, including the words "$890,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 49, by inserting in place of the language stricken out the following:

"Provisions, Marine Corps: For noncommissioned officers, musicians, and privates serving ashore; subsistence and lodging of enlisted men when traveling on duty, or cash in lieu thereof; commutation of rations to enlisted men regularly detailed as clerks and messengers; payment of board and lodging of applicants for enlistment while held under observation, recruits, and recruiting parties; transportation of provisions, and the employment of necessary labor connected therewith; ice for offices and preservation of rations, $890,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Transportation and recruiting, Marine Corps: For transportation of troops, and of applicants for enlistment between recruiting stations and recruit depots or posts, including ferriage and transfers en route, or cash in lieu thereof; toilet kits for issue to recruits upon their first enlistment and the expense of the recruiting service, $317,000: *Provided*, That authority is hereby granted to employ the services of an advertising agency in advertising for recruits under such terms and conditions as are most advantageous to the Government.

Mr. MANN. Mr. Chairman, I make a point of order against the paragraph.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. Mr. Chairman, I offer the following amendment to take the place of the language stricken out.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Insert, in place of the paragraph stricken out, the following:

"Transportation and recruiting, Marine Corps: For transportation of troops, and of applicants for enlistment between recruiting stations and recruit depots or posts, including ferriage and transfers en route, or cash in lieu thereof; toilet kits for issue to recruits upon their first enlistment and the expense of the recruiting service, $317,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

INCREASE OF THE NAVY.

Mr. PADGETT. Mr. Chairman, I would like to ask if we can make an agreement for a limit of time for general debate on the increase in the Navy.

Mr. MANN. I ask for the regular order, Mr. Chairman.

Mr. PADGETT. I move to correct the punctuation on line 10, page 53, where there is a period instead of a comma after the word "fees," by striking out the period and inserting a comma.

The amendment was agreed to.

Mr. PADGETT. I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28812, the naval appropriation bill, and had come to no resolution thereon.

Mr. SPARKMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 28180, disagree to the Senate amendments, and ask for a conference.

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 8439. An act restricting the issuance of interlocutory injunctions to suspend the enforcement of the statute of a State or of an order made by an administrative board or commission created by and acting under the statute of a State; to the Committee on the Judiciary.

S. 8182. An act granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River; to the Committee on Interstate and Foreign Commerce.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 20102. An act relating to proof of signatures and handwriting; and

H. R. 26279. An act granting the Fifth-Third National Bank of Cincinnati, Ohio, the right to use original charter No. 20.

TREATY WITH THE REPUBLIC OF PANAMA.

The SPEAKER laid before the House the following message from the President of the United States, which was read, ordered printed, and referred to the Committee on Appropriations:

To the Senate and House of Representatives:

With reference to the appropriation asked in the letter of the Secretary of State of January 4, 1913, to the Secretary of the Treasury (H. Doc. 1262, 62d Cong., 3d sess.), it is now necessary for me to reiterate, as most urgent, the recommendation that there be appropriated and made immediately available the sum of $250,000 to be payable to the Republic of Panama when directed by the Secretary of State under article 14 of the convention between the United States and Panama for the construction of a ship canal, dated November 18, 1903, the ratifications of which were exchanged February 26, 1904, and which was proclaimed on the same date.

Article 14 of the aforesaid treaty provides as follows:

As the price or compensation for the rights, powers, and privileges granted in this convention by the Republic of Panama to the United States, the Government of the United States agrees to pay to the Republic of Panama the sum of $10,000,000 in gold coin of the United States on the exchange of the ratification of this convention and also an annual payment during the life of this convention of $250,000 in like gold coin, beginning nine years after the date aforesaid.

The provisions of this article shall be in addition to all other benefits assured to the Republic of Panama under this convention.

The sum which the Congress is now asked to appropriate becomes payable beginning February 26, 1913, under the provisions of the convention of 1903. It will be recalled that in 1909 a tripartite arrangement was made between the United States, the Republic of Colombia, and the Republic of Panama by means of three interdependent treaties. Among the various provisions of this arrangement was one whereby the Government of the United States was to begin the payments of this annuity of $250,000 five years earlier than provided for in the convention of November 18, 1903, namely, February 26, 1908. The Republic of Panama agreed, with the consent of the United

States, to assign to the Republic of Colombia the first 10 installments, and the Government of the United States agreed to make these first 10 payments to the Republic of Colombia for the account of the Republic of Panama. The advice and consent of the Senate of the United States to the ratification of the treaties to which the United States is a party was given unconditionally as to the treaty with Colombia and conditionally as to the treaty with Panama; the Government of Panama has unconditionally approved the treaties to which Panama is a party and later indicated its willingness to ratify the treaty with the United States as modified by the Senate; but the Government of Colombia having failed to give its assent to the ratification of the treaties to which Colombia is a party, and the treaties being interdependent, the ratifications thereof have never been effected.

Inasmuch as one or all of the signatory parties may at any time withdraw from the unconsummated and, therefore, for the time being, inoperative arrangement contemplated by these unconcluded treaties of 1909, and inasmuch as the Republic of Colombia has failed to ratify the treaties of January 9, 1909, to which it is a party, these three interdependent treaties are left inoperative and the original stipulation of the convention of 1903, whereby the Government of the United States was to make payments to Panama under article 14 thereof, becomes effective. It is evidently necessary, therefore, that the Executive be forthwith placed in position to respond at the proper time to the obligation of the United States under the convention of 1903 with Panama for the construction of a ship canal. I therefore most earnestly urge immediate action as absolutely necessary to place this Government in position to respond at once to its treaty obligation.

WM. H. TAFT.

THE WHITE HOUSE, *February 25, 1913.*

Mr. TAYLOR of Colorado. Mr. Speaker, I want to move to suspend the rules and pass the resolution which I send to the Clerk's desk.

Mr. MANN. The gentleman will have to have a quorum to do it. I make the point of order that no quorum is present.

The SPEAKER. There is no quorum present.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 40 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 26, 1913, at 10.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting communication from the Secretary of the Interstate Commerce Commission containing statement of machines, equipment, etc., transferred to the Government Printing Office as required by act approved August 23, 1912 (H. Doc. No. 1423); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the presiding judge of the Commerce Court submitting a deficiency estimate of appropriation for the board of arbitration, interstate commerce controversies (H. Doc. No. 1422); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. COX, from the Committee on Expenditures in the Treasury Department, submitted a report (No. 1572) on an investigation as to the rate of tax on oleomargarine, which was referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. TILSON, from the Committee on Military Affairs, to which was referred the bill (S. 6244) to restore Capt. Harold L. Jackson, retired, to the active list of the Army, reported the same without amendment, accompanied by a report (No. 1573), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH of Texas: A bill (H. R. 28852) to prescribe the conditions under which corporations may engage in interstate commerce and to provide penalties for otherwise engaging in the same; to the Committee on Interstate and Foreign Commerce.

By Mr. CRAVENS: Resolution (H. Res. 869) providing for clerical assistance to the Committee on Enrolled Bills; to the Committee on Accounts.

By Mr. HAYDEN: Memorial from the Legislature of the State of Arizona, asking that Congress appropriate $25,000 to pay one-third of the cost of a bridge across the Colorado River at Yuma; to the Committee on Indian Affairs.

By Mr. MONDELL: Memorial from the Legislature of Wyoming, relative to restoring to entry lands now withdrawn in Wyoming under the North Platte project of the United States Reclamation Service; to the Committee on the Public Lands.

Also, memorial from the Legislature of the State of Wyoming, regarding damage done Cody municipal water supply by the construction of certain public works; to the Committee on the Public Lands.

Also, memorial from the Legislature of the State of Wyoming, requesting Congress to set aside certain lands for grazing purposes for the aid, protection, and relief of homesteaders and residents of the old Fort Bridger Military Reservation and those adjacent thereto; to the Committee on the Public Lands.

Also, memorial from the Legislature of the State of Wyoming, relative to the expenditure of 25 per cent of the receipts of the national forests for the construction and maintenance of roads and trails within the national forests from the States in which such proceeds are derived; to the Committee on the Public Lands.

Also, memorial from the Legislature of the State of Wyoming, favoring the cessions by the Government of the United States to the States of all vacant and unappropriated lands; to the Committee on the Public Lands.

Also, memorial from the Legislature of the State of Wyoming, favoring the enactment of a law giving ample protection to migratory game birds; to the Committee on the Public Lands.

By Mr. ASHBROOK: Joint resolution adopted by the Legislature of the State of Wyoming, favoring an amendment to the Constitution of the United States granting Congress power to levy a tax on incomes; to the Committee on Ways and Means.

By Mr. WHITE: Joint resolution of the General Assembly of Ohio, memorializing Congress relative to the construction of levees, flood walls, etc., along the Ohio River; to the Committee on Rivers and Harbors.

Also, joint resolution of the Legislature of the State of Ohio, memoralizing Congress relative to a system of national highways; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred, as follows:

By Mr. JACOWAY: A bill (H. R. 28853) granting an increase of pension to Eliza J. Adams; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 28854) for the relief of J. W. Miller, administrator of the estate of Isaac C. Miller, deceased; to the Committee on War Claims.

By Mr. McCALL: A bill (H. R. 28855) granting a pension to Mary J. Phinney; to the Committee on Pensions.

Also, a bill (H. R. 28856) granting a pension to Annie G. Nagle; to the Committee on Pensions.

Also, a bill (H. R. 28857) granting an increase of pension to Annie C. Small; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMSON: Petition of citizens of Peterson, Minn., favoring the passage of legislation compelling concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. AIKEN of South Carolina: Petition of the order of Daughters of the American Revolution, Charleston, S. C., favoring the passage of legislation for the preservation of the Old Colonial Exchange, Charleston, S. C.; to the Committee on the Library.

By Mr. DRAPER: Petition of owners of grain elevators, Buffalo, N. Y., protesting against the passage of House bill 28180, with reference to securing a channel from the outer harbor to connect with the Buffalo River and for the enlargement of the anchorage basin in the outer harbor; to the Committee on Rivers and Harbors.

By Mr. DYER: Petition of Joel Hillman and the Washington Mercantile Co., Washington, D. C., protesting against the passage of the Jones-Works liquor bill for the regulation of the liquor traffic in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Missouri State Bottlers' Protective Association, Kansas City, Mo., favoring the passage of legislation for the removal of all duties on sugar; to the Committee on Ways and Means.

Also, petition of the International Reform Bureau, Washington, D. C., favoring the passage of the Jones-Works excise bill for the regulation of the liquor traffic in the District of Columbia and suggesting an amendment for same; to the Committee on the District of Columbia.

Also, petition of W. L. JONES and JOHN D. WORKS, Washington, D. C., favoring the passage of the Jones-Works excise bill, for the regulation of the liquor traffic in the District of Columbia, in its present form; to the Committee on the District of Columbia.

Also, petition of the International Reform Bureau, Washington, D. C., favoring the passage of the Kenyon "red-light" injunction bill for the cleaning up of Washington for the inauguration; to the Committee on the District of Columbia.

Also, petition of Carrie C. Ware and the American Sign Co., St. Louis, Mo., favoring the passage of House bill 25685, providing for the tagging and labeling of all fabrics and articles of clothing intended for sale under interstate commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. LINDSAY: Petition of Eugene V. Murphy, Brooklyn, N. Y., favoring an amendment to the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the National Liquor League of the United States, New York, N. Y., favoring the passage of legislation to repeal the clause making an appropriation of $5,000 for the purpose of sending delegates to the International Congress on Alcoholism; to the Committee on Appropriations.

By Mr. NYE: Petition of the Minneapolis Retail Grocers' Association, Minneapolis, Minn., favoring the passage of House bill 27567, for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. RAKER: Petition of the Whittier Board of Trade, Whittier, Cal., favoring the passage of the Weeks bill (H. R. 27567) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

Also, petition of the A. H. Hitchcock Publishing Co., Chicago, Ill., protesting against the passage of legislation extending the parcels post to include the third-rate postage; to the Committee on the Post Office and Post Roads.

SENATE.

WEDNESDAY, *February 26, 1913.*

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

Mr. GALLINGER took the chair as President pro tempore under the previous order of the Senate.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (H. J. Res. 398) to direct and empower the Commissioners of the District of Columbia to revoke licenses under certain conditions, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 3947) to provide for a bridge across Snake River, in Jackson Hole, Wyo.

PETITIONS AND MEMORIALS.

Mr. BRANDEGEE presented resolutions adopted by the Trades Council of New Haven, Conn., favoring the strict enforcement of the law providing for the inspection of locomotive boilers and safety appliances, etc., which were referred to the Committee on Interstate Commerce.

Mr. CRAWFORD presented memorials of sundry citizens of Chamberlain and Harding County, in the State of South Dakota, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. TOWNSEND presented memorials of sundry citizens of Battle Creek and Berrien Springs, in the State of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. POMERENE. I present a joint resolution passed by the Legislature of the State of Ohio, which I ask may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the joint resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

Senate joint resolution 6.

Joint resolution memorial to Congress relative to system of national highways.

Whereas the question of transportation has been paramount to all other questions since the dawn of civilization; and

Whereas until the end of time there will be three methods of transportation, namely, railroad, water, and wagon roads; and

Whereas two of our great systems of transportation, namely, railroad and steamship lines, have been aided by the Government and then taken over and controlled by individuals and corporations and are now operated for pecuniary gain and to which all contribute; and

Whereas transportation by wagon over public roads has been taken over by the several States of the Union and their common use accorded to all people of the Nation free of charge; and

Whereas Congress of the United States has appropriated, in aid of railroad construction, public lands to the value of at least $1,000,000,000; for rivers and harbors since 1875, $592,395,000; for improvement of the Mississippi River since June 30, 1902, $16,582,000; for public buildings since June 30, 1911, $213,376,000; for public roads in Alaska, Philippines, Porto Rico, Guam, and the Canal Zone, $8,300,000, and estimated appropriation of $400,000,000 for the Panama Canal; and

Whereas the United States has 2,198,645 miles of public roads, of which only 190,679, or 8.66 per cent of the total, are improved; and

Whereas it is estimated by the Office of Public Roads at Washington, D. C., that 90 per cent of travel is confined to 20 per cent of the roads of the United States and that the improvement of 440,000 miles of public roads would practically meet the present demand throughout the country; and

Whereas the exigency of the present times makes necessary a system of national highways: Therefore be it

Resolved by the Senate and the House of the Eightieth General Assembly of the State of Ohio, That we urge upon Congress of the United States the necessity of the early designation, construction, and maintenance of a system of national highways; be it further

Resolved, That the secretary of the State of Ohio is hereby instructed to forthwith transmit certified copies of this resolution to all Ohio Members of the Senate and House of Representatives of Congress of the United States and the Clerks of these respective bodies at Washington, D. C.

Adopted January 30, 1913.

C. L. SWAIN,
Speaker of the House of Representatives.
HUGH L. NICHOLS,
President of the Senate.

Mr. WILLIAMS presented a memorial of sundry citizens of Jackson, Miss., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. WARREN. I present a joint memorial of the Legislature of the State of Wyoming, which I ask may lie on the table and be printed in the RECORD.

There being no objection, the memorial was ordered to lie on the table and to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following copy of house joint memorial No. 3, adopted by the Legislature of the State of Wyoming, has been carefully compared with the original, filed in this office on the 18th day of February, A. D. 1913, and is a full, true, and correct copy thereof:

House joint memorial 3.

Whereas there have been introduced in Congress three bills (H. R. 36, H. R. 4428, S. 2367) to afford Federal protection to migratory game birds; and

Whereas there is a very general sentiment in this State in favor of such protection, and an urgent request for the enactment of such a law has been made, as appears by the numerous petitions received: Now therefore

Resolved (the senate concurring), That Congress be, and hereby is, requested to enact a law giving ample protection to migratory game birds.

Resolved, That the legislatures of all the States of the United States, now in session or when next convened, be, and they are hereby, respectfully requested to join in this request by the adoption of this or an equivalent resolution.

Resolved further, That the secretary of state be, and he hereby is, directed to transmit copies of this resolution to the Senate and the House

of Representatives of the United States, and to the several Members of said body representing this State therein; also, to transmit copies hereof to the legislatures of all other States of the United States.

MARTIN L. PRATT,
Speaker of the House.
BURNEY H. SAGE,
President of the Senate.

Approved February 17, 1913.

JOSEPH M. CAREY, *Governor.*

In testimony where I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 18th day of February, A. D. 1913.

[SEAL.]

FRANK L. HOUX,
Secretary of State,
By F. H. WESCOTT,
Deputy.

REPORTS OF COMMITTEES.

Mr. TOWNSEND, from the Committee on Claims, to which was referred the bill (S. 4957) for the relief of Simon M. Preston, reported it without amendment and submitted a report (No. 1319) thereon.

Mr. CUMMINS, from the Committee on the Judiciary, to which was referred the bill (H. R. 28635) to amend section 81 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes, reported it without amendment.

Mr. BURTON, from the Committee on Foreign Relations, to which was referred the joint resolution (S. J. Res. 163) amending and extending the operation of the act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes, reported it with an amendment and submitted a report (No. 1320) thereon.

Mr. BURNHAM, from the Committee on Pensions, to which was referred the amendment proposing to appropriate $1,200 to pay Robert W. Farrar for indexing and extra services as clerk to the Committee on Pensions, Sixty-second Congress, third session, and $1,200 to pay Dennis M. Kerr for services as assistant clerk by detail to the Committee on Pensions, Sixty-second Congress, third session, intended to be proposed to the general deficiency appropriation bill, reported favorably thereon, and moved that it be referred to the Committee on Appropriations and printed; which was agreed to.

JUDICIAL DISTRICTS OF ALABAMA.

Mr. CULBERSON. From the Committee on the Judiciary I report back favorably without amendment the bill (H. R. 27827) to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911. I call the attention of the Senator from Alabama [Mr. JOHNSTON] to it.

Mr. JOHNSTON of Alabama. I ask for the present consideration of the bill. It is a House bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

IMPEACHMENT OF ROBERT W. ARCHBALD.

Mr. SMOOT. From the Committee on Printing I report back favorably, with amendments, Senate concurrent resolution No. 36, to print copies of the proceedings in the Senate in the matter of the impeachment of Robert W. Archbald submitted by Mr. CLARK of Wyoming January 23, 1913. I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The amendments were, in line 2, after the word "bound," to strike out "ten thousand" and insert "one thousand five hundred"; in line 8, after the word "which," to strike out "four thousand" and insert "five hundred"; and in line 9, before the word "thousand," to strike out "six" and insert "one"; so as to make the concurrent resolution read:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 1,500 copies of the proceedings in the Senate of the United States and in the House of Representatives and before the Judiciary Committee thereof in the matter of the impeachment of Robert W. Archbald, additional circuit judge of the United States from the third judicial circuit, and designated a judge of the Commerce Court, of which 500 shall be for the use of the Senate and 1,000 for the use of the House of Representatives.

The amendments were agreed to.

The resolution as amended was agreed to.

BILL INTRODUCED.

A bill was introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCUMBER:

A bill (S. 8581) granting a pension to Louise Capehart (with accompanying papers); to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JOHNSON of Maine (for Mr. GARDNER) submitted an amendment proposing to appropriate $23,620 to increase the limit of cost for increased quarantine facilities at the port of Portland, Me., etc., intended to be proposed to the sundry civil appropriation bill, which was ordered to lie on the table and be printed.

Mr. JOHNSON of Maine submitted an amendment proposing to grant a leave of absence for 60 days to Mrs. Adelaide E. Grant, a clerk in the assessor's office of the District of Columbia, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CATRON submitted an amendment proposing to appropriate $32,000 to be expended in the survey and establishing of boundaries of small-holding claims in the State of New Mexico, now listed in the surveyor general's office of the State of New Mexico, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to lie on the table and be printed.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $500 for moving weather ball from customhouse at Portland, Oreg., to a point where it can be readily seen by shipping, intended to be proposed by him to the sundry civil appropriation bill, which was ordered to lie on the table and be printed.

Mr. PENROSE submitted an amendment proposing to appropriate $400,000 for the erection of barracks, quarters, and other buildings for the accommodation of marines, Isthmus of Panama, intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

Mr. McCUMBER submitted an amendment proposing to appropriate $390 to pay J. G. Hamilton for services actually rendered and performed as Doorkeeper of the Senate from December 14, 1911, to March 1, 1913, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment authorizing the Secretary of the Senate to pay to the officers and employees of the Senate borne on the annual and session rolls on the 30th day of June, 1912, a sum equal to one-twelfth of the annual compensation paid them by law, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. SMITH of Arizona submitted an amendment proposing to grant relief to certain American citizens in El Paso, Tex., and Douglas, Ariz., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to lie on the table and be printed.

Mr. CRAWFORD submitted an amendment proposing to appropriate $250 to pay Harry B. Straight for extra clerical services rendered in connection with the preparation of the omnibus claims bill, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. McLEAN submitted an amendment relative to the protection of migratory game and insectivorous birds in the United States, intended to be proposed by him to the Agriculture appropriation bill, which was ordered to lie on the table and be printed.

Mr. BROWN submitted an amendment proposing to appropriate $3,000 to pay for the compilation, annotation, and indexing of volume 3 of the Indian Laws and Treaties, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

THE CONSTITUTION (S. DOC. NO. 1108).

Mr. BROWN. I send to the desk a copy of an address by Franklin W. Collins, of the Department of Justice, on "The Constitution of the United States—Its Friends and Foes." I ask that the address be printed as a public document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

URGENT DEFICIENCY APPROPRIATIONS, STATE DEPARTMENT.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Appropriations and ordered to be printed:

To the Senate and House of Representatives:

With reference to the appropriation asked in the letter of the Secretary of State of January 4, 1913, to the Secretary of the Treasury (H. Doc. 1262, 62d Cong., 3d sess.), it is now necessary for me to reiterate, as most urgent, the recommendation that there be appropriated and made immediately available the sum of $250,000 to be payable to the Republic of Panama when directed by the Secretary of State under article 14 of the convention between the United States and Panama for the construction of a ship canal, dated November 18, 1903, the ratifications of which were exchanged February 26, 1904, and which was proclaimed on the same date.

Article 14 of the aforesaid treaty provides as follows:

As the price or compensation for the rights, powers, and privileges granted in this convention by the Republic of Panama to the United States, the Government of the United States agrees to pay to the Republic of Panama the sum of $10,000,000 in gold coin of the United States on the exchange of the ratifications of this convention and also an annual payment during the life of this convention of $250,000 in like gold coin, beginning nine years after the date aforesaid.

The provisions of this article shall be in addition to all other benefits assured to the Republic of Panama under this convention.

The sum which the Congress is now asked to appropriate becomes payable beginning February 26, 1913, under the provisions of the convention of 1903. It will be recalled that in 1909 a tripartite arrangement was made between the United States, the Republic of Colombia, and the Republic of Panama by means of three interdependent treaties. Among the various provisions of this arrangement was one whereby the Government of the United States was to begin the payments of this annuity of $250,000 five years earlier than provided for in the convention of November 18, 1903, namely, February 26, 1908. The Republic of Panama agreed, with the consent of the United States, to assign to the Republic of Colombia the first 10 installments, and the Government of the United States agreed to make these first 10 payments to the Republic of Colombia for the account of the Republic of Panama. The advice and consent of the Senate of the United States to the ratification of the treaties to which the United States is a party was given unconditionally as to the treaty with Colombia and conditionally as to the treaty with Panama; the Government of Panama has unconditionally approved the treaties to which Panama is a party and later indicated its willingness to ratify the treaty with the United States as modified by the Senate; but the Government of Colombia having failed to give its assent to the ratification of the treaties to which Colombia is a party, and the treaties being interdependent, the ratifications thereof have never been effected.

Inasmuch as one or all of the signatory parties may at any time withdraw from the unconsummated and, therefore, for the time being, inoperative arrangement contemplated by these unconcluded treaties of 1909, and inasmuch as the Republic of Colombia has failed to ratify the treaties of January 9, 1909, to which it is a party, these three interdependent treaties are left inoperative and the original stipulation of the convention of 1903, whereby the Government of the United States was to make payments to Panama under article 14 thereof, becomes effective. It is evidently necessary, therefore, that the Executive be forthwith placed in position to respond at the proper time to the obligation of the United States under the convention of 1903 with Panama for the construction of a ship canal. I therefore most earnestly urge immediate action as absolutely necessary to place this Government in position to respond at once to its treaty obligation.

WM. H. TAFT.

THE WHITE HOUSE, *February 25, 1913.*

MESSAGE FROM THE PRESIDENT—THE BUDGET (S. DOC. NO. 1113).

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Appropriations and ordered to be printed:

To the Senate and House of Representatives:

Under the Constitution, the power to control the purse is given to the Congress. But the same paragraph which makes it the duty of the Congress to determine what expenditures shall be authorized also requires of the administration the submission of "a regular statement and account of the receipts and expenditures"—i. e., an account of stewardship. The Constitution also prescribes that the President shall "from time to time give to the Congress information of the state of the Union and recommend to their consideration such measures as he shall judge necessary and expedient." Pursuant to these constitutional requirements I am submitting for your consideration a concise statement of financial conditions and results as an account of stewardship as well as certain proposals with estimates of revenues and expenditures in the form of a budget.

THE BUDGET AS A MEANS FOR LOCATING RESPONSIBILITY.

The fact that ours is the only great Nation whose Government is doing business without a budget has not been a dominant reason for departure from 123 years of precedent. Such procedure is based on common experience and common sense. It is supported by the best judgment and experience that has obtained in the management of corporate bodies, both public and private. While officers of private corporations are not ordinarily limited by law in such manner as to make it necessary for them to act under formal appropriations, it is the ordinary method of transacting business to have the president of a corporation lay before its board at its annual meeting a report which is also made available to all persons who may be interested; it is common experience for the president, as the responsible head of the executive branch, to set forth what has been done during the past year and what it is proposed that the corporation shall do during the next year; it is common experience for the president as the head of the administration to accompany his proposals with estimates; it is common experience for the president as the head of the executive branch to submit with such estimates recommendations as to how proposed expenditures shall be financed.

In a Government such as ours, in which the legislative branch is made up of some 500 Members, it is not to be assumed that each Member or any committee of such a body is familiar with the many details which go to make up the public business. The increasing need for an Executive account of stewardship is apparent. The President is the constitutional head of an organization that is continental in the scope of its operations. Executive officers under him, for whom he is responsible, must manage and direct the details of hundreds of essentially different businesses that are highly complex and technical in their requirements. These officers must be held accountable for efficiency as managers; they must be held accountable for economy in the expenditure of public funds; they must be made to feel responsible for the fidelity of employees who are charged with money transactions aggregating more than $5,000,000,000 each year, or $16,000,000 each business day, of which vast amount nearly $2,000,000,000 are in the nature of receipts and disbursements for current expenditures of the Government, while about $3,000,000,000 are in the nature of trust receipts and disbursements, including currency trusts, Indian trusts, and other sacred obligations of the Government that have been undertaken by the Government for the welfare of those who have been designated as legal beneficiaries.

The recommendation of such measures as may be thought to be necessary and expedient and requests for support, in the form of estimates of future expenditures, should be premised on a knowledge of service needs. The needs of the service can only be known to those who are in charge of administrative detail. Representation of what has been done, as well as what should be undertaken in the future, must come from those who are acquainted with technical requirements. A sense of proportion, however, can come only from those who must assume responsibility for the administration as a whole. In the discharge of his duties the President has submitted annual reviews of the conditions affecting the national welfare and also many special recommendations for legislation; but the Chief Executive has never undertaken to lay before the Congress the facts necessary to the determination of questions of policy pertaining to that phase of public business which is his special responsibility, namely, the carrying on of the current work of the Government during the succeeding year.

ADVANTAGES TO CONGRESS OF A BUDGET.

The advantage to the Congress of having placed before it a definite statement and proposal, one which is submitted by the responsible head of the administration, must also be apparent. Such a statement will greatly facilitate the adoption of a procedure whereby the deliberating branch of the Government may determine the gross amount to be appropriated in advance of decision as to what amount shall be allowed for each detail of the Government's business, rather than leave the relations of income and outgo to be computed after action has been taken on the many matters which are brought before the Congress for determination.

THE NEED FOR KNOWLEDGE OF DETAIL AS WELL AS FOR PERSPECTIVE.

Size and complexity of the problem make it necessary for officers to have the advantage of seeing the business of the Government in perspective. But judgment with respect to the requirements of particular services requires that exact information be made available for the consideration of detail. This budget is submitted therefore not only as an instrument through which a perspective may be gained, but as an index through which Members of Congress and the public may obtain ready reference to supporting reports and detailed records of account.

The need for such an index through which exact information may be obtained as a basis for judgment about problems of public business is evident to one familiar with the governmental problems.

The highly complex and technical character of questions that must be decided by executive heads of departments is suggested by the complexity of departmental organization. In the Department of the Navy, for example, there exist at present 34 navy yards and stations, 31 naval coaling plants, 43 naval wireless stations, 12 naval magazines, 14 purchasing, pay, and disbursing offices, 9 inspection districts, 16 hydrographic offices, 20 hospitals, 20 dispensaries, 14 naval schools, 3 schools for the Marine Corps, 7 naval medical schools, 4 naval training stations, 13 target ranges (naval), 1 target range and permanent camp of instruction for the Marine Corps, 3 medical supply depots, 13 recruiting stations, 48 marine posts and stations and a Naval Militia, besides the fleet, which is the actual fighting machine of this branch of the military establishment. More concretely, the administrative requirements may be shown by reference to a single station such as the proving grounds at Indianhead. Here, under the jurisdiction of the senior assistant, are a police force, office buildings and grounds, living quarters, a water-supply system, boats and wharves, a railroad, a power plant, a carpenter shop, an electrical shop, a tin shop, a repair and pipe-fitting shop, and a storehouse; and under the jurisdiction of an officer known as the powder expert is a chemical laboratory, a sulphuric-acid factory, ether factory, dry house, boiling tubs, dehydrating house, an intensifier house, a solvent recovery house, a reworking house, a nitric-acid factory, a poaching and pulping house, a mixing house, a press house, a blending and packing house, a powder factory and magazines, a signal house, a rocket house, and a storehouse. These may be taken as illustrative of the character of administrative attention required in directing and controlling the activities of one of the many institutional subdivisions of one department of the Government.

THE LACK OF ACCURATE AND PROMPT INFORMATION.

Notwithstanding the breadth and scope of the many-sided business which is transacted by the Government, legislative and executive officers have been required to make decisions without having before them the essential facts. Inadequate organization is provided for the assembling and classifying of information needed by the Executive as a means of making available to Congress and the country a carefully prepared statement about what has been done and what are the Government's future needs. Lack of adequate information about what the administration is doing has led Congress to make over 100 special investigations of the executive branch within as many years, besides the inquiries that have been conducted by its standing committees. Like difficulty has been experienced by the Chief Executive. His effort to obtain information as a basis for Executive action and for concrete recommendation has not infrequently resulted in failure. Illustration of the difficulties experienced both by the Congress and the President is found in the fact that it was necessary to institute a special inquiry for the purpose of obtaining each of the several classes of data submitted with this budget. The disadvantages under which officers labor when forced to rely on special investigation for information that should be regularly produced and made available is shown by the fact that instead of having the information at hand at or near the close of the fiscal year, the President and his Cabinet were required to wait months before, even in crude and uncertain form, the ordinary business statements such as a balance sheet, an operation account, and a surplus account for the Government could be produced and summaries of revenues and expenditures could be made which would serve as a guide to future financial policy.

GOVERNMENT WITHOUT A PLAN OR PROGRAM.

Not only have we been without adequate information but, as a result of this and other causes, the Government, with its multiplied activities and with expenditures that within the last 123 years have mounted up from less than three millions to more than one thousand million dollars each year, may be said to be without a plan or program.

Although we are annually spending $400,000,000 for military purposes, including pensions, we have never had a comprehensive or consistent military policy. Nor have we as a Nation had any plan for developing the many services which have been created to provide for the economic and social welfare. Bureau after bureau, service after service, has been organized, but neither the executive branch nor the Congress has been consciously working to a consistent, well-defined purpose.

Not only have we not had a definite program for determining each year what welfare work should be undertaken, or what should be the next step in promoting or conserving economic and social interests, but there has been the same lack of program in regard to our national finances and proposed expenditures.

A DEFICIT TO BE FACED.

In December last a condition arose which made it my duty under the statute of March 4, 1909, to submit to Congress definite recommendations either for decreasing the estimates for appropriations or for increasing the revenue. The Secretary of the Treasury in his annual report, which was submitted concurrently with the Book of Estimates, said:

> The estimates of appropriations for ordinary purposes for 1914 are $22,556,023.03 in excess of the estimated revenues. The estimated expenditures for the Panama Canal are $30,174,432.11; and if these expenditures should be paid from the general fund instead of from sales of bonds, the total estimates of appropriations for 1914 are $52,730,455.14 in excess of the estimated receipts.

Anticipating that such a situation might follow the legislation of last session calling for largely increased expenditures without providing for a corresponding increase in revenue, and at the same time seeking, so far as practicable, to develop methods of accounting and reporting adequate to inform the Congress and the Executive, and to enable them to plan intelligently for the future, on July 10 last I issued a request to the head of each of the departments and other Government establishments to depute some officer whose duty it would be to see that the estimates and summaries of estimates for the fiscal year ending June 30, 1914, were prepared in accordance with the recommendations contained in my message to Congress on June 27 last; that is to say, the head of each department and each independent establishment was directed, in addition to those estimates which are included in the Book of Estimates for appropriations as now required by statute and as sent to Congress, also to make return to the office of the Chief Executive of estimates of the actual expenditures for the same fiscal year, whether derived from old appropriations, proposed appropriations, or deficiency appropriations.

THE BUDGET SUBMITTED.

My instruction, therefore, to the Secretary of the Treasury was—

> to print and send without delay to Congress the forms of estimates required by it of officers; also to have sent to me the information asked for * * *. This will be made the basis for review, revision, and summary statement in the form of a budget with supporting documents which may be sent to Congress by special message as the proposal of the administration.

Conformably to this request the financial statements and the analyses and summaries of revenues and expenditures were prepared which are attached. The lateness of their submission to me has made it impossible to get them before you at the beginning of the present session, but their significance is so great that I am now submitting them for your information.

OUTLINE OF THE BUDGET SUBMITTED.

The budget, which is transmitted herewith, carries the following summaries:

1. Summaries submitted as a basis for considering the present and also the prospective fiscal condition:
   - *Budget statement No. 1.* Comparative current balance sheet, showing the fiscal condition of the Government as of June 30, 1911, and June 30, 1912.
   - *Budget statement No. 2.* Fund statement, showing the condition of the general fund and of other funds and appropriations as of June 30, 1912.
   - *Budget statement No. 3.* Comparative account of operations, showing the revenues and expenditures of the Government for the fiscal years 1911 and 1912, and the estimated revenues and expenditures for 1913 and 1914, with the resulting annual surplus or deficit.
   - *Budget statement No. 4.* Treasury surplus account, showing the cumulated deficits as of June 30, 1911, and June 30, 1912, and the estimated deficits June 30, 1913, and June 30, 1914.

2. Summaries submitted as a basis for considering revenues and expenditures in relation to questions of Government policy:

a. Summaries of revenues:

Budget statement No. 5. Comparative statement of revenues for the fiscal years 1910, 1911, and 1912, classified by sources and statutory authorities, with the estimates of the Secretary of the Treasury for 1913 and 1914.

Budget statement No. 6. Comparative statement of revenues for the fiscal years 1911 and 1912, classified by organization units.

b. General summaries of expenditures:

Budget statement No. 7. Comparative summary of estimated and actual expenditures of Government funds, classified by organization units.

Budget statement No. 8. Comparative summary of estimated and actual expenditures of Government funds, classified by functions or classes of work.

Budget statement No. 9. Comparative summary of estimated and actual expenditures of Government funds, classified by character of expenditures, i. e., to show current expenses and fixed charges as distinguished from capital outlays and debt payments.

Budget statement No. 10. Comparative summary of estimated and actual expenditures of Government funds, classified by acts of appropriation.

Budget statement No. 11. Comparative summary of estimated and actual expenditures of trust and private funds, classified by organization units and acts of appropriation.

c. Analyses of expenditures to show relations between organization units, functions, character of expenditures, and acts of appropriation:

Budget statement No. 12. Comparative analysis of estimated and actual expenditures of Government funds for each organization unit, classified by acts of appropriation.

Budget statement No. 13. Comparative analysis of estimated and actual expenditures of Government funds for each organization unit, classified by functions.

Budget statement No. 14. Comparative analysis of estimated and actual expenditures of Government funds for each organization unit, classified by character of expenditure.

Budget statement No. 15. Comparative analysis of estimated and actual expenditures of Government funds for each function, classified by organization units.

d. Analyses of expenditures to show objects:

Budget statement No. 16. Summary of results of governmental contracting and purchasing relations.

3. A summary of proposed changes of law—setting forth what legislation it is thought should be enacted in order to enable the administration to transact public business with greater economy and efficiency.

THE PROBLEM OF FINANCING GOVERNMENT NEEDS.

Any business forecast must proceed from a statement of present condition. The purpose of the first four of these summaries is not only to bring before the Congress information, but also to show the result of estimated revenues and expenditures, if authorized.

THE CONDITION OF THE TREASURY JUNE 30, 1912 (STATEMENT NO. 1).

More concretely, the purpose of the first budget statement is to show the condition of the Treasury as of the beginning of the current fiscal period, and also to give information with respect to the amount of the cash in the Treasury which is available for general governmental purposes. The Treasury is both the agent of the Government for providing money with which to meet its obligations and the guardian of very large trust funds upon which our currency system rests, as well as being the depository for other cash that can not be utilized in meeting ordinary obligations. The balance of cash in the Treasury and subtreasuries as of June 30 last was $1,872,964,358.26. Of this amount $1,674,535,369 was held in trust for the protection of currency obligations, leaving a balance of $198,428,989.26 cash for other purposes. To this amount is to be added $65,486,517.33, representing balances in banks, subject to draft of the Treasurer and other fiscal officers, and cash in transit, making a cash total, other than for trust funds to secure currency obligations, of $263,915,506.59. As against this, however, it is necessary to reserve $96,763,027.60, representing disbursing officers' balances, the national banks' 5 per cent fund, etc. This leaves a cash balance of $167,152,478.99 available for current operations. In addition to the reserves above described there are outstanding current liabilities reported amounting to $21,431,236.56. As against these liabilities, however, disbursing officers were carrying balances amounting to $60,461,012.48, leaving a net cash balance available for general-fund purposes of $206,182,254.91, if sinking-fund obligations are entirely ignored.

If the provisions of law with respect to providing a fund for the purpose of sinking the national debt were deemed binding, then a readjustment of the Treasury statement of available cash balances would be necessary. Taking into consideration the fact that during the period from 1870 to 1890 bonds were retired from surplus revenues far in excess of sinking-fund requirements, and during the period from 1890 to date payment of the bonded debt has been halted from considerations of public policy—the issues being used as security for bank-note circulation—I am recommending that the sinking-fund law be amended, as hereinafter stated.

The sinking-fund act should either be repealed or be superseded by a law whose provisions are clear and possible of enforcement.

The sinking fund was established by the act of February 25, 1862; amended by the act of July 14, 1870; and later carried into the Revised Statutes as sections 3688, 3689, 3694, 3695, 3696, and 3697.

Prior to the Civil War period our Government had not provided for a methodical accumulation of a fund to be applied to the redemption of the public debt. No attempt was made to apportion equitably over a term of years the repayment of money borrowed to meet extraordinary demands.

The first act designed to create a sinking fund was passed during the Civil War as a means of buttressing the public credit. It required the payment of customs duties in gold or in demand notes made by law receivable for public dues, and provided that so much thereof as was necessary should be applied to the payment of the interest on the public debt, and that in each fiscal year a fund should be set apart for the purchase or payment of 1 per cent of the entire debt. The residue of customs receipts was to be paid into the Treasury.

When the law was passed the Government was a borrower and the public debt was rapidly increasing. Secretary Chase reported that he was unable to create a sinking fund. In March, 1864, a considerable amount of gold had accumulated in the Treasury. Gold was then selling in New York around 160. Congress sought to deal with the situation by passing a joint resolution authorizing the Secretary of the Treasury to sell any gold not necessary for the payment of interest on the public debt. Subsequently it was held that this resolution was inconsistent with the law of 1862, which required that in addition to the payment of the interest a sum equal to 1 per cent of the total debt should annually be set apart for debt reduction.

Secretary McCulloch reported to the Congress in 1867 that no special fund had ever been actually set apart in pursuance of the act. Continuously since then the law has been consciously and openly evaded. The fund has had a legal existence, but the legal requirements have merely been shown on the books. Notwithstanding this, the public debt has been reduced with amazing rapidity, for from time to time the annual surpluses have been applied to this purpose, and we have retired bonds since 1862 considerably in excess of the requirements of the law. On February 1, 1911, Secretary MacVeagh reported that we had paid off bonded debt amounting to $280,000,000 more than the calculated requirements of the sinking fund. But a part of this was accomplished through refunding operations. Because of the lax enforcement of the law and contradictory and confusing interpretations which have been placed upon it, and because its provisions could not be enforced except in periods of surplus revenue, it was proposed by Secretary MacVeagh to permit the use of surplus moneys for the redemption of the public debt.

A true sinking fund postulates an excess of revenue over current expenses. It is the simple truth that such excess of revenue over expenditure is the only real fund by which the public debt may be sunk. The object of a sinking fund is to reduce and gradually to discharge debt. In times of actual loss in current fiscal operations any scheme to reduce the aggregate liabilities is illusory and fictitious. It is because of this that when war is declared in which the British Government is involved one of the first steps taken by that Government is to suspend the sinking fund. One expert has said that the extinction of a small amount of debt with one hand while creating a large amount with the other is not practical; in fact, it is wasteful and a sham.

While we have kept the faith with our creditors and discharged our obligations promptly, out methods have been haphazard and our sinking fund act has become a dead letter. It should be revised at a time like this, when the state of our finances is normal, and revised on a basis that will compel the respect of administrative officers. I shall take this matter up again in considering the method of meeting the deficit.

THE CONDITION OF THE GENERAL FUND (STATEMENT NO. 2).

The purpose of the second budget statement is to show the condition of funds and appropriations as of June 30, 1912. Carrying into the general-fund account the cash deficiency which would result from including the sinking-fund requirement in the statement as a reserve, as shown by budget statement just described, and setting up as a resource the net amount that has been advanced on account of the Panama Canal ($137,897,497.28), taking into account also the balance of appropriations which had not been expended and under which vouchers may be drawn for payment by the Treasury ($257,328,302.45), the condition of the general fund as of June 30 last is shown; that is, before the appropriations of the current fiscal year became operative the general fund was in the condition of having been overappropriated to the extent of $722,586,550.26. Leaving out of consideration entirely the sinking-fund requirements, however—in other words, ignoring altogether the appropriations which have been made by Congress for sinking-fund purposes—the statement would show an excess of general-fund resources over general-fund appropriations outstanding amounting to $86,751,449.74. But even this balance is to be accepted with a very serious qualification, for the statement further shows that in addition to the appropriations that had already been authorized, and which, therefore, would operate as charges against the general fund, there were other authorizations to undertake work, for which necessary appropriations had not been provided, amounting to $256,547,150.45. In other words, from the reports, incomplete as they are, which have been made by departments, it appears that uncompleted work has been authorized in excess of $718,000,000, for which only about 60 per cent of the necessary amount had been appropriated. As against these authorizations contracts had actually been entered into, the amount of which could not be ascertained within the time available for the preparation of this statement. Assuming the correctness of the figures given—and they are taken upon report, without verification, as the best information which could be obtained within the time available and without taking into consideration the appropriations for this year, it appears that Congress had prior to the beginning of the current fiscal year already mortgaged the future of the general fund to the extent of $169,795,700.71 over and above all sinking-fund requirements.

THE RELATION BETWEEN REVENUES AND EXPENDITURES (STATEMENT NO. 3).

The most notable fact about Government revenues and expenditures of the past is that we have had very little accurate information about them. What have been called "revenues" were receipts, and in this class have been commingled amounts realized from sales, trust funds, and refunds. What have been called "expenditures" have been either advances from the Treasury to disbursing officers, or disbursements, and in them not only have trust payments been commingled with those in liquidation of ordinary governmental liabilities, but no effort has been made to distinguish current expenses from capital outlays. What is quite as serious, from the viewpoint of both of the purposes served by these data—in the making of future plans and for guidance in administration—is that there is no present means for knowing whether all the revenues and expenditures have been included in the totals given, due to the fact that there are no true revenue or expense accounts kept and that certain appropriations are reimbursable from revenues. When seeking to obtain information from appropriation accounts many of the reimbursable items have been lost sight of, expenditures being shown as net. The amount of receipts reimbursable to appropriations, as reported for the last fiscal year by departments in answer to special requests for this information, is in excess of $32,000,000. The unsatisfactory character of the information which has been made available in the past is also shown by the difference in the prospective Treasury condition as deduced on the one hand from totals shown by the Treasury statement for the year 1913 and the congressional Book of Estimates for 1914 and, on the other, as deduced from the total estimated expenditures for the years 1913 and 1914 that have been sent by the executive departments and establishments by my order to the Executive Office for use in the preparation of this budget. The estimated and actual revenues and expenditures for the four years, as shown by the statements which are transmitted herewith, by totals, are as follows:

	1914	1913	1912	1911
Revenues	$970,471,000	$950,395,480	$916,540,895	$915,983,134
Estimated and actual expenditures of Government funds (other than debt redemptions and sinking-fund requirements)	1,049,355,577	1,006,414,753	912,432,365	888,702,956
Excess of revenues			4,108,530	27,280,178
Excess of expenditures	78,884,577	56,019,273		
Principal of public debt:				
Receipts from the sale of bonds—				
Panama Canal loan			33,189,104	18,102,170
Postal savings bonds			459,280	
National bank note fund—excess of receipts over redemptions				5,255,715
Total proceeds of bond sales and excess of national bank note receipts over redemptions			33,648,384	23,357,885
National bank note fund—excess of redemptions over receipts			8,449,346	
Other debt redemptions			120,616	245,495
Sinking-fund requirements in excess of debt redemptions	60,685,000	60,650,000	60,050,433	59,929,038
Total public debt redemptions and requirements	60,685,000	60,650,000	68,620,395	60,175,534
Excess of public debt redemptions and requirements over receipts	60,685,000	60,650,000	34,972,011	36,817,649
Net expenditures of trust and private funds	4,223,403	1,569,090	7,571,463	5,882,614

The foregoing indicates a deficiency for the year 1914 of more than $83,000,000 (ordinary $78,884,577 and trust $4,223,403) besides sinking-fund requirements, or $143,000,000 if the sinking-fund requirements be included. This statement also indicates a deficiency for the year 1913 amounting to $57,000,000 (ordinary $50,019,273 and trust $1,569,090), a total deficiency for the two years of $140,000,000, ignoring sinking-fund requirements.

This $140,000,000 would be reduced by issuing bonds to meet the probable expenditures for the Panama Canal, amounting to $85,000,000, to a deficiency for the two years of $55,000,000.

As has already been said, the Secretary of the Treasury in his annual report submitted to Congress in December last, estimated a revenue deficiency of $22,000,000 for the fiscal year 1914. This was on the following most favorable assumptions, namely, that ignoring the sinking fund, expenditures would exactly equal the amount shown in the Book of Estimates, and that bonds would be issued for the full amount of the Panama Canal expenditures during the next fiscal year. The Secretary of the Treasury, on the same assumptions, estimated a deficiency for the current year (1913) amounting to $1,800,000, except that he included Panama Canal expenditures as a charge against the general fund. Altogether, therefore, for the current and ensuing fiscal years he estimates a deficiency of $23,800,000, or, in case all Panama expenditures are charged against the general fund, the amount of the estimated deficiency for the two years would be $53,800,000.

In making the foregoing estimates, however, the Secretary of the Treasury did not take into account a prospective excess of pension requirements under the new law over appropriations for 1913 amounting to $20,000,000, for $15,000,000 of which a deficiency estimate has already been submitted, to meet the demands on the Treasury for claims examined, without taking into consideration the accruals on claims which will not have been examined before July 1, 1913; nor did he take into account a probable deficiency in the pension estimate for the fiscal year 1914 of not less than $10,000,000; furthermore, in his estimated deficiency for 1914 no account was taken of the emer-

gency and regular deficiency bills that are customarily introduced, estimates for which for 1913 have already reached $3,300,000 (exclusive of the pension deficiency above referred to) and which for 1912 amounted to $9,700,000. Subsequent to the making of the estimate by the Secretary of the Treasury there have also been filed supplementary estimates for appropriations which amount to $6,600,000, chiefly to cover additional public buildings and other local works, requested for the most part by committees of Congress. Assuming that there will be increased demands for cash corresponding to these estimates, the prospective deficiency would be increased $39,900,000. As the estimate submitted by the Secretary of the Treasury and that prepared from the data sent to the Executive Office for the budget are on an entirely different basis, they are stated below in such manner that they may be compared.

Estimated decreases in cash, on basis of report of the Secretary of the Treasury, from June 30, 1912, to June 30, 1914, making allowances for deficiencies and supplemental estimates.

	Amount.	Cumulated totals.
Excess of revenues over expenditures for fiscal year 1913, exclusive of Panama Canal payments	$40,200,000	
Excess of expenditures over revenues for fiscal year 1914, after deducting estimates for Panama Canal	22,600,000	
Surplus as per Secretary's estimates in case canal bonds are issued for both years		[1] $18,200,000
Estimated requirements for Panama Canal:		
For 1913	42,000,000	23,800,000
For 1914	30,000,000	53,800,000
Estimated deficiencies and supplementary estimates not included in Book of Estimates:		
For pensions—1913	20,000,000	
For pensions—1914	10,000,000	
For other purposes—1913	3,300,000	
For other purposes—1914	6,600,000	
Total not included in Book of Estimates	39,900,000	
Net deficiency in case canal bonds are issued for both years		21,700,000
Net deficiency in case canal bonds are issued for neither year		93,700,000

[1] Surplus.

Estimated decreases in cash, on basis of reports to the President, from June 30, 1912, to June 30, 1914, making allowances for deficiencies and supplemental estimates.

	Amounts.	Cumulated totals.
Excess of expenditures over revenues exclusive of Panama Canal payments:		
For fiscal year 1913	$2,000,000	
For fiscal year 1914	53,000,000	$55,000,000
Estimated requirements for Panama Canal:		
For fiscal year 1913	55,000,000	110,000,000
For fiscal year 1914	30,000,000	140,000,000
Estimated deficiencies not included in reports to President:		
For pensions—1913	20,000,000	
For pensions—1914	10,000,000	
Total not included in estimates [1]	30,000,000	
Net deficiency in case canal bonds are issued for both years		84,100,000
Net deficiency in case canal bonds are issued for neither year		170,000,000

[1] Under the instructions both deficiencies and supplementary estimates would have been included in the reports submitted; in case of the pension deficiencies, however, it is known that these were not.

The estimated expenditures for 1914, as shown above, are some $31,000,000 in excess of the amount of the estimates submitted to Congress in the Book of Estimates for the same year. This difference is accounted for very largely by the fact that the estimates submitted to Congress were for appropriations, whereas the estimates which were submitted for the purpose of this discussion were for expenditures, without taking into consideration whether chargeable against new or old appropriations. In these were included over $22,000,000 of estimated expenditures in excess of estimates for appropriation, without taking into consideration $7,000,000 to be accounted for by the fact that in the Book of Estimates the item for the Reclamation Service was shown as $7,000,000, whereas the officers in charge of this work estimate the expenditures at more than $14,000,000. This service is financed entirely out of revenue appropriations; the difference in estimated expenditures would make a net difference in the demands on the Treasury only to the extent that it was not covered by reclamation revenues and repayments. These and other elements of difference, which are more fully explained in schedule 5, supporting budget statements, account for the large discrepancy between the deficiency as shown by preceding table and as estimated by the Secretary of the Treasury.

The difference between the estimates of expenditures reported to the President for 1913 and the estimates shown in the report of the Secretary of the Treasury for that year is about $55,000,000. This discrepancy is partly accounted for by a difference in the estimated expenditures for the Panama Canal, amounting to $13,000,000; the other elements of difference were not disclosed by the analyses which were made, as the basis for the Secretary's estimate is not stated in his report.

THE CUMULATED DEFICIT (STATEMENT NO. 4).

The purpose of statement No. 4 is to show the manner in which expenditures corresponding to the estimates would affect the Treasury surplus in case there were no change in revenue laws. This statement shows that in case Congress grants the full amount of appropriations requested in the Book of Estimates, without a change in revenue laws, and, further, if the drafts against past appropriations are as estimated, the result will be, ignoring sinking-fund requirements as well as deficiencies, that an accumulated Treasury surplus of $206,182,254.91, as of the end of the fiscal year, June 30, 1912, will have been reduced by the end of the next fiscal year (June 30, 1914) to $67,303,263.47. This will be an inadequate balance of general-fund cash, for the reason that the customary working balance which is carried by disbursing officers, plus the needed working balance in the Treasury proper, is largely in excess of this amount. Subtracting the estimated pension deficiencies of $30,000,000, which were not included in the statement, even though all canal expenditures for 1914 are against borrowings and all sinking-fund requirements are ignored, advances of the usual amounts carried by disbursing officers would leave not a penny in the Treasury available for the meeting of current governmental demands.

THE RESULT OF GRANTING APPROPRIATIONS REQUESTED WITHOUT INCREASING REVENUES.

From all these data it is apparent that the estimates submitted by departments and establishments on the one hand and the probable revenues on the other should receive serious consideration; that as officers of the Government we should not go ahead blindly, passing and signing one appropriation bill after another without knowing where the money is coming from or how the obligations of the Government are to be met. Such a condition as this obtained in 1893, when a newly elected President found it necessary to go into a very unfavorable money market and borrow over $260,000,000 in order to meet the Treasury needs of the Government and protect the currency obligations, with the result that his whole administration was handicapped, and the credit system of the country was seriously impaired.

ESTIMATES OF REVENUES AND EXPENDITURES.

A second set of summaries has been prepared for the purpose of considering questions of future policy. This is made up of analyses of estimated and actual revenues and expenditures.

ESTIMATED AND ACTUAL REVENUES (STATEMENTS NOS. 5 AND 6).

In order that a basis may be laid for determining where adjustments may be made to obtain the revenue needed, as well as for considering the result on the finances of the Government of making any proposed change in revenue law, each class of receipts has been separately shown, with a reference to the law which governs its accrual. There has also been prepared a summary of revenues by departments or establishments to enable officers to compare revenues and expenditures in any project which should be regarded as self-supporting.

ESTIMATED AND ACTUAL EXPENDITURES.

The summaries presented herewith cover the estimates submitted by departments. This has been thought desirable because under the act of March 9, 1909, it is my duty to submit recommendations with respect to the departmental estimates transmitted by the Secretary of the Treasury, rather than to present estimates such as would have been submitted to Congress if there had been opportunity for Executive review. As shown by the list of budget statements (pp. 10 and 11), the estimates have been summarized in such manner as to show expenditures in four different relations, namely: (a) The cost and estimated cost of the business done by each organization unit (statement No. 7); (b) the cost and estimated cost of each general class of work performed (statement No. 8); (c) the cost and estimated cost of each class of expenditures, such as operating expenses, fixed charges, capital outlays, etc. (statement No. 9); (d) the cost and estimated cost classified by acts of appropriation in which authorizations to spend customarily

appear (statement No. 10). The remaining statements (11 to 16) show the same facts arranged in such manner as to reflect results in still other relations bearing on questions of policy.

Such inaccuracies as may obtain in the summaries are due to the fact that this is the first time that a systematic statement pertaining to the business of the Government has been attempted; that it is the first time that a statement has been prepared and submitted in the form of a budget; that since its figures have been prepared as a result of a special investigation, rather than from direct accounting results, there has been no means of verification. If every other reason were wanting, the present lack of facilities for obtaining information pertaining to subjects that are essential to any intelligent consideration of the business of the Government, and for knowing that the information when obtained is accurate, would be sufficient to make an annual budget desirable. Had accounts been kept in a form that would permit their use in the preparation of a budget, complete and accurate information would have been available for administrative and executive consideration some months before Congress assembled. Instead, I have been put to the necessity of going out with a dragnet for the essential facts, and then of being required to wait until after January 1 before all of the subjects concerning which data were asked could be reported on—in the end also being required to accept statements sent in without proof and knowing that, in some instances at least, they were incomplete. I do not wish to be understood as criticizing or intending to criticize the heads of departments in whose transactions and in whose books of accounts the material to be used in such a budget must be found. The truth is that they have all been laboring as much as possible, during the last four years, to improve the method of keeping and stating their several department accounts; but the confusion and unbusinesslike condition that have prevented a thorough reform and simplifying of our financial and operating statements have been the result of a century of neglect.

ANALYSIS OF INCREASES AND DECREASES BY DEPARTMENTS (STATEMENT NO. 7).

In most summary form the analysis of the data reported by organization units through which expenditures are made is as follows:

Branches of the Government.	Estimated expenditures for—		Actual expenditures for—	
	1914	1913	1912	1911
The Congress	$9,967,463	$10,496,325	$10,695,468	$11,063,547
The President (including Executive boards and commissions)	449,040	296,057	621,484	457,803
The judiciary	5,408,101	5,234,004	5,119,918	4,979,750
Executive departments (other than sinking-fund estimates and appropriations and debt payments)	994,090,557	927,479,221	852,667,884	831,140,986
Other establishments	33,890,702	58,277,125	37,993,030	36,092,385
Districts and Territories	6,124,509	5,134,223	5,814,309	5,385,489
Total (excluding sinking-fund requirements and debt payments)	1,049,939,372	1,006,916,955	912,852,093	889,119,960
Less amounts payable from revenues of the District of Columbia	583,795	502,202	419,728	417,004
Total payable from Federal revenues, except sinking-fund requirements and debt payments	1,049,355,577	1,006,414,753	912,432,365	888,702,956
Sinking-fund requirements and debt payments	60,685,000	60,650,000	120,616	246,496
Total payable from Federal revenues.	1,110,040,577	1,067,064,753	912,552,981	888,949,452

DECREASES BY CONGRESS.

In the figures representing appropriations for 1913 and estimates for 1914 for the Congress it will be noted that there is a decrease indicated. This, however, is to be accepted with qualifications, for the reason that not all of the customary items are shown in the estimates for 1914 and no deficiencies are included for either year. Moreover, it is to be noted that for the year 1914 no estimate has been made for outlays for buildings and grounds. The appropriation for the Superintendent of Capitol Building and Grounds was $951,757 for 1913, whereas only $178,900 are estimated for 1914.

ESTIMATES AND EXPENDITURES IMMEDIATELY UNDER THE PRESIDENT.

In the Executive Office proper practically no differences appear. The differences in total expenditures directly under the President during the years 1911 and 1912 and in the totals of estimated expenditures for 1913 and 1914 are due to the amounts expended, appropriated, or estimated for the Tariff Board and the Commission on Economy and Efficiency.

INCREASES FOR THE COURTS.

The increase in the cost of the judiciary is almost entirely to be found in the circuit courts of appeals and the district and Territorial courts. For these there has been a gradually increasing cost corresponding to an increasing business.

INCREASES FOR DEPARTMENTS AND INDEPENDENT ESTABLISHMENTS.

With respect to executive departments, the totals for each of the four years reported, exclusive of sinking-fund requirements and debt payments, are as follows:

	1914	1913	1912	1911
Executive departments	$994,090,557	$927,479,221	$852,667,884	$831,140,986
State	4,053,373	4,559,768	4,258,409	4,478,977
Treasury	75,621,558	84,132,144	78,771,378	75,789,906
War	199,195,018	189,465,658	155,132,662	153,973,875
Justice	5,768,098	5,141,764	5,120,349	4,947,705
Post Office	284,141,018	271,608,550	250,154,310	240,208,411
Navy	152,626,008	126,836,305	134,299,251	118,987,722
Interior	230,216,066	204,528,564	189,887,027	193,075,298
Agriculture	24,706,013	25,422,263	19,669,339	18,793,633
Commerce and Labor	17,163,405	15,784,205	15,375,759	20,885,519

From these figures it will be seen that there is a net increase of only $21,000,000 between 1911 and 1912, and this is very largely accounted for by an increase of $10,000,000 in the cost of the postal service, which is reimbursable, and increases in the Navy. Leaving out of consideration the sinking fund, the estimated net increase for 1913 over 1912 amounts to $75,000,000, more than $67,000,000 of which is accounted for by increases for the War Department, chiefly rivers and harbors, for postal service, and for pensions. As between the estimated expenditures for 1913 and for 1914 there is a net increase of $66,000,000. This, however, is $30,000,000 more than the increase indicated by the estimates submitted to Congress for appropriation in the Book of Estimates, although requests for appropriations amounting to more than $24,000,000 have subsequently been sent in as supplementary and to cover deficiencies. The increases in estimates for expenditures for 1914 are accounted for by still further increases for rivers and harbors, in the War Department, and for the Post Office and increases for the Navy and for pensions. Leaving out of consideration the sinking fund as between 1912 and 1914, the difference of $142,000,000, exclusive of sinking fund, is accounted for as follows: War, $44,000,000, largely for river, harbor, and other improvements; Navy, $18,000,000; Post Office, reimbursable, $34,000,000; pensions, $32,000,000; all others, net, $14,000,000.

In the independent establishments the decrease in cost for 1914 is largely explained by the decreasing needs for the completion of the Panama Canal.

ANALYSIS TO SHOW COST OF EACH CLASS OF WORK (STATEMENT NO. 8).

The same estimates and expenditures have been analyzed and summarized in such manner as to show the cost to the Government of each class of work which is now being done, as well as the estimated cost of work projected for the next fiscal year. From this it will be noted that the estimated cost of functions which are general in character, such as legislation, executive direction and control, adjudication, administration of the national finances, etc., for the next fiscal year is $166,000,000, whereas the estimated direct cost of service to the public is $936,000,000. It also shows that the estimated cost for the next year of military services is $452,000,000 as against a total of $484,000,000, the estimated cost of all civil services. Again, the total cost of civil service is divided so as to show the amount spent for the promotion of friendly relations and the protection of American interests abroad, $4,200,000 a year, and the amount spent for the promotion of welfare within the United States, $479,600,000. This latter amount is further subdivided to show the cost of protection to economic interests, $445,000,000, and the cost of the promotion of individual welfare, $34,600,000. A still further analysis is made to show the welfare interests which are served. The $445,000,000 estimated for 1914 expenditures for the promotion of economic welfare, together with the amount estimated for the current year and the actual expenditures of the last two completed fiscal years, is accounted for as follows.

	1914	1913	1912	1911
Promotion of agriculture, forestry, fisheries, and the care and utilization of the public domain	$37,372,040	$37,391,089	$29,736,440	$27,892,521
Promotion of trading, manufacturing, and mining	930,439	549,962	433,070	404,888
Providing facilities for transportation	116,844,539	134,564,906	82,517,834	77,347,590
Postal and other communication service (reimbursable)	276,983,944	265,001,879	244,460,742	234,185,955
General:				
Regulation of commerce and banking	3,023,658	3,043,089	2,677,452	2,465,128
Providing a medium of exchange	4,584,554	5,168,325	5,188,261	4,998,012
Meteorological research and weather forecasting	1,712,490	1,666,680	1,618,098	1,515,005
Granting patents and copyrights (reimbursable)	2,242,691	2,070,609	2,159,126	2,083,668
Collection of data pertaining to population and other general statistical information	765,060	1,069,310	1,990,398	7,544,949
Fixing standards of measurement	612,395	473,849	573,692	342,062
Total	445,071,809	450,909,698	371,355,113	358,779,778

The $34,000,000 estimated 1914 expenditures for the promotion and conservation of individual welfare, together with the estimated cost for the current fiscal year and the actual cost for the last two completed fiscal years, is subdivided to show:

	1914	1913	1912	1911
Promotion of the special interests of the laboring classes	$4,372,805	$4,134,880	$3,529,157	$3,626,378
Promotion of public health, education, and recreation:				
Promotion and protection of public health	7,817,343	6,572,860	6,347,603	5,989,477
Promotion of public education and recreation and of art and pure science	5,736,545	4,844,242	4,346,185	4,262,921
Care and education of dependent, defective, and delinquent	2,622,487	1,826,064	2,734,197	1,867,090
Care and education of the Indians and other wards of the Nation	11,018,907	11,121,186	11,339,716	11,865,353
Total	34,568,087	28,499,232	28,296,858	27,611,219

It is thought that such analyses will be of great value in considering questions of policy bearing on the future work program of the Government.

ANALYSIS TO SHOW CHARACTER OF EXPENDITURES (STATEMENT NO. 9).

Analyzing the estimates and expenditures in such manner as to show the amount of the estimated and actual current expenses, as distinguished from capital outlays and debt payments, the totals for the four years are as follows:

	1914	1913	1912	1911
Current expenses and fixed charges (except principal of debt)	$821,131,982	$779,892,645	$742,293,621	$738,419,108
Overhead and operating expenses	565,798,628	545,343,691	520,454,692	513,410,284
Upkeep of property	22,764,889	25,463,755	22,013,896	22,751,305
Fixed charges, except principal of debt (including interest, court awards, pensions, subsidies, contributions, indemnities, etc.)	232,568,465	211,085,199	199,825,033	202,257,519
Acquisition of property	190,196,406	199,585,979	153,189,441	134,280,159
Unclassified	38,610,984	27,438,334	17,369,031	16,420,093
Total current expenses, fixed charges, expenditure for property and undistributed expenditures	1,049,939,372	1,006,916,955	912,852,093	889,119,960
Deduct amounts chargeable to revenues of the District of Columbia	583,795	502,202	419,728	417,004
Total expenditures other than principal of debt	1,049,355,577	1,006,414,753	912,432,365	888,702,956
Payment of debt	60,685,000	60,650,000	120,616	246,496
Total	1,110,040,577	1,067,064,753	912,552,981	888,949,452

Considering first the total for overhead cost and operation, it will be seen that this represents only about one-half the total for the Government. Including upkeep, the current expenses for the last completed year, 1912, reached $542,468,588 out of a total of $912,552,981. To give perspective to the problem of financing the next fiscal year the estimated expenditures may be grouped as follows:

Current expenses and fixed charges other than sinking fund	$821,000,000
Acquisition of property	190,000,000
Unclassified expenditures (most of which are known to be expenditures for property)	38,000,000
Payment of principal on the public debt	60,000,000

Subdividing the current expenses and fixed charges, as distinguished from acquisition of property, the estimated amount of overhead and operating expenses is $566,000,000, of upkeep costs $23,000,000, and of fixed charges $232,000,000.

SIGNIFICANCE OF ANALYSIS IN DETERMINING FINANCIAL POLICY.

The special significance of this analysis is to be found in its use as a guide to the determination of financial policy.

In my opinion current expenses and fixed charges, including sinking-fund requirements, should be financed entirely out of revenues; that is, in planning to meet the Treasury needs of the Government it would be a mistake to provide the means for carrying on the current business and for liquidating the debt by incurring additional indebtedness. By this standard the least amount of revenue which would be required for the next fiscal year (assuming that the estimates sent in are approved by the Congress and incorporated in appropriations) would be $881,000,000. This conclusion is based on the assumption that all estimates for "acquisition of property" and all "unclassified" estimates would be initially financed by the Government out of borrowings; that is, that all of these estimated expenditures are properly classified as capital outlays. It is to be observed, however, that in the estimated appropriations and expenditures for acquisitions of property during the four years reported all replacements of obsolete or condemned equipment or other property are included. These should be charged against current revenues. The estimates sent to me as for capital outlays, with corresponding expenditures for preceding years, are as follows:

Character of expenditure.	Estimates for 1914.	Appropriations for 1913.	Expenditures for—	
			1912	1911
Total expenditures for acquisition of property	$190,196,406	$199,585,976	$153,189,441	$134,280,159
Land	2,531,825	6,596,696	4,223,338	2,849,445
Buildings	20,958,273	20,896,897	15,947,814	14,900,947
Other improvements to land and waterways	74,974,140	108,486,547	72,339,558	69,708,285
Equipment	73,542,150	51,343,856	54,607,061	40,939,301
Stores (increases)	7,268,549	6,675,373	4,886,730	5,405,233
Work in progress (increases or decreases)	115,522	[1] 202,721	[1] 1,072,858	[1] 1,126,358
Unclassified capital outlays	10,805,947	5,789,328	2,257,798	1,513,306
Unclassified expenditures	38,610,984	27,438,334	17,369,031	16,420,093

[1] Decreases of stores; deduction from total expenditures.

In order to determine what amount of these expenditures may properly be financed from the proceeds of bond issues and what amount would be considered as expenses to be financed out of revenues, it is necessary to clearly distinguish those expenditures which are for the acquisition of additional properties and those which are for replacement of old. From the present state of the records and reports these data are not available. With respect to the $73,500,000 estimated for equipment, however, this may be said: That a greater portion of the estimate is for battleships, ordnance, etc. It is doubtful if the amount asked for is more than is needed to cover the wear and tear and the depreciation due to obsolescence of equipment already owned by the Government. Assuming that all of the $98,400,000 for land, buildings, and other improvements on land, and the $10,800,000 "unclassified capital outlays," as well as the $38,600,000 of other "unclassified expenditures," are for new properties, the conclusion that these are additions or betterments should not be accepted without qualification for the reason that no provision is made for estimating structural depreciation. In fact, there is not at present any means for knowing what amount of property the Government owns against which depreciation must be estimated. From the inadequate data at hand it appears that the Government has acquired buildings and other improvements on land during the last 50 years

the cost of which is considerably in excess of $1,500,000,000. If it be assumed that the average life of such structures is 50 years, then not less than $30,000,000 should be included in current expenses for depreciation due to obsolescence. This would leave about $115,000,000 of the expenditures for the acquisition of property to be capitalized.

THE EXCESS OF ESTIMATED CURRENT EXPENSES AND FIXED CHARGES OVER ESTIMATED REVENUES FOR 1914.

From the foregoing it would appear that the amount of the revenues required to meet current expenses and fixed charges (including current upkeep of property and depreciation from obsolescence) is approximately $995,000,000.

The amount which the Secretary of the Treasury estimates will accrue in revenues during the next fiscal year is $970,000,000 (excluding refunds of revenues and trust-fund receipts), leaving a revenue deficiency of $25,000,000. From any angle of approach, therefore, either the estimates for appropriations must be cut down or provision must be made for increasing the revenue.

RECOMMENDATIONS FOR THE REDUCTION OF CURRENT EXPENSES.

In submitting recommendations under the requirements of the act of March 4, 1909, it seems evident that the overhead and operating expenses and capital outlays should be clearly distinguished from expenditures in the nature of fixed charges and debt payments. The amount of expenditures for these latter purposes is not to any considerable extent affected by economy or efficiency of administration, but is the result of established policy expressed in terms of law. With respect to capital outlays the Congress determines whether buildings shall be constructed or rented, whether improvements shall be authorized. With respect to fixed charges the President has no control except through approval or disapproval of bills of Congress submitted for his signature. The executive branch can have little responsibility for nearly one-third of the total estimated expenditures.

If the executive branch is not handicapped by legislation that robs the service of the benefits of the proper exercise of administrative discretion, the economy and efficiency with which the many services of the Government are operated are primarily the responsibility of this branch. It is with respect to this portion of Government expenditures—the estimates for which amount to about $566,000,000 for the year 1914—that the following recommendations are made. In submitting recommendations, however, I am suggesting such reductions only as it is thought may result from beneficial changes in policy.

RECOMMENDATIONS WITH RESPECT TO APPROPRIATIONS FOR PERSONAL SERVICES.

With respect to the cost of personal service the estimates may be divided into two classes, namely, (1) those for the payment of the salaries of persons appointed by the President, with the advice and consent of the Senate, and (2) those for the payment of salaries to all other employees of the Government. The reductions which, in my opinion, may be made in these estimates without injury to the service are:

Reductions in estimates for salaries of local officers appointed by the President, with the advice and consent of the Senate	$4,500,000
Reductions in estimates for all other salaries	2,000,000

REDUCTIONS BY ELIMINATION OF SINECURES.

With respect to the first class I have already submitted recommendations to Congress in several messages transmitting reports in which it is estimated that the direct salary cost of the Government may be reduced not less than $4,500,000 a year—this to be done by placing a large proportion of presidential appointments in the classified service. The salaries of postmasters of the first and second classes amount to over $6,000,000, while the salaries of assistant postmasters of the same classes amount to $2,820,000. If the position of postmaster were placed in the classified service and these officers were given salaries equal to 20 per cent more than the salaries now given to assistant postmasters, the latter positions being no longer required, there would be a saving of $4,512,000. Besides this direct reduction that might be immediately made in the estimates, there would also be very large indirect reductions of cost that might be availed of in future estimates—reductions that can not be realized so long as appointments are on a partisan basis. These unnecessary indirect costs are due to the fact that a considerable part of the services outside of Washington can not be properly brought within the discipline of administrative officers. So long as high-salaried local officers owe their appointments to local influence it may be assumed that their tenures will be fairly secure, regardless of their efficiency. This is discouraging to those in equally responsible positions who are rendering efficient service, but who, by reason of the nonpartisan character of the appointment, receive not more than half the amount of salary; it tends to destroy the esprit de corps, especially with subordinates; it carries with it expenditures that in many instances are unwisely made. Altogether, in the opinion of those who are best acquainted with the service, the indirect saving to the Government amounts to more than the direct saving indicated. A list of presidential appointments, requested from departments, is attached (Appendix 5). [Omitted in RECORD.]

REDUCTIONS BY RECLASSIFICATION OF CIVIL SERVICE.

With respect to the other employees in the service, their salaries are either what are known as "statutory" (that is, specified in the acts of appropriations) or "nonstatutory" (the designation given to salaries paid out of lump-sum appropriations). With respect to these my recommendation is that the total appropriations for salaries be established at an amount sufficient to cover the pay-roll requirements of the present fiscal year, but that authority be given to make a complete executive reclassification of civil-service employees, to become effective by Executive order. Such a provision would reduce the estimates for current expenses not less than $2,000,000, and, in my opinion, would result beneficially to employees as well as to the Government. In other words, I am of the opinion that an annual salary roll of $2,000,000 less than the estimates for salaries for the year 1914, if properly distributed, would adequately provide for the personnel necessary to do the Government's present work. At present each statutory salary is fixed by Congress; this means that it is fixed by one or another of nine committees of Congress. Each nonstatutory salary is fixed by one or another of the nine heads of departments. The result is not only great confusion in service designations and service classification, but also great disparity in salaries for doing similar work. Furthermore, the fate of each individual employee in the matter of promotions, etc., so far depends on action that can not, under present conditions, be premised on merit or adjustment of compensation to work, that one of the serious embarrassments to the service is a constant request for transfers.

This embarrassment Congress has sought to overcome through laws the practical operation of which is to make details and transfers difficult; and committees on appropriations have usually looked with suspicion upon all requests for salary increases. Under the laws governing transfers, entry into the civil service in certain departments amounts to a three years' enlistment with very little hope for promotion. The obstructions to details of employees hamper the work of certain divisions and add unnecessarily to the cost of others. The impossibility of giving fair consideration to the question is shown by the fact that each year hundreds of increases are proposed in estimates to Congress, whose committees are supposed to pass on their merits. One committee may pursue a fairly liberal policy, and another may pursue a policy of restriction; but each must act with very little knowledge of their problem. One person whose position is proposed for increase may have a strong or influential advocate before a committee, while another, equally competent, may not. The whole subject of salaries is chaotic.

In the present situation many men at the bottom are receiving larger salaries than would be obtained for similar work in outside employment, whereas men in higher positions carrying great responsibility and the success of whose performance depends on training and long experience are inadequately paid. The Government suffers from both conditions. From the viewpoint of the rank and file, there is little hope of reward for merit. Instead of establishing a well-considered classification of positions and salary grades which will admit of promotions and increased compensation with added experience and ability to render valuable service, instead of holding out to the employee a career, a premium is placed on getting into the service, after which little inducement is offered to effort. There is little incentive to increasing efficiency, because as a rule initial salaries are placed too high and terminal salaries too low. The operation of such a salary scheme is to encourage application for appointment from persons who have already assumed large social or other responsibilities, and who are out of employment; at the same time by providing low terminal salaries the service is to this extent made unattractive to those who have spent years in preparation or who after long experience have become expert in the handling of the many technical problems involved in the economical and efficient transaction of public business.

The foundation for a reclassification of salaries has already been laid. An analysis of the service designations and salary grades has been made for the entire service. This is now being summarized in such manner that if the subject is pursued with vigor a reclassification may be completed within the next few months. In my opinion, such a reclassification would enable the Government to pay higher salaries to those from whom experi-

ence, training, and initiative are required, and make the saving of $2,000,000 as already stated. It would hold out to the whole service a hope for better things instead of leaving each individual in it the victim of chance.

REDUCTIONS THAT WOULD FOLLOW MAKING CERTAIN SERVICES REIMBURSABLE.

In my opinion a considerable reduction in expenditures may be made without injury to the service by making certain expenditures reimbursable. Generally speaking, the reason for making Government expenditures reimbursable is either (1) that the benefits of the service inure mainly to those who use it rather than to the general public, and that therefore the entire cost should be paid by the users, or (2) that the service provided by the Government may better serve its purpose if the person for whose benefit it is performed pays at least a part of the cost incurred. Among the most obvious items of expenditure which should be placed on a reimbursable basis are those for certain publications of the Government that are distributed to the public.

ELIMINATION OF WASTE IN DISTRIBUTION OF PUBLIC DOCUMENTS.

The estimates for appropriations for the next fiscal year for printing and binding at the Government Printing Office amount to nearly $6,000,000 besides the printing and binding that is done elsewhere. Of this amount a considerable part is for publications that are distributed to the public. As at present distributed it is known that a relatively small part of such publications gets into hands of persons who are really interested in them, and such persons could well afford to pay cost price for them. The other documents are sent simply as a reminder that there is some one in Washington who has the recipients' names on the list. The adoption of such a principle as is recommended would, in my opinion, change the entire character of the publication activities of the Government. At the present time many valuable documents of the Government are not obtainable at any price, since the issue is exhausted very shortly after publication. The practice is that such a number of documents is printed as is necessary to supply the public libraries and furnish the copies which, under the law, go to Members of Congress. Unless provision is made for distribution to the public anyone interested in a particular publication may be fortunate to receive the one or more copies that may be allowed the Representative of the congressional district in which he lives. Further than this he must depend largely upon exchange of courtesies between Representatives. Even those editions that are for public distribution, being given away, are soon exhausted. In order to make a supply available to persons who may not have the facilities for obtaining a desired volume or volumes at the time of the issue it is necessary to have a publication authorization that will place a stock in the hands of the superintendent of documents for sale. With respect to certain publications this principle of sale has already been adopted. It is urged that it be made general in its operation, thereby enabling Congress to reduce the estimate for printing and binding by the amount which it is thought will be realized from the copies distributed to the public.

REIMBURSEMENT FOR POSTAGE.

A further reduction in expenses may be made by applying the same principle to postage—that is, a part of the cost of distributing documents is the expense of handling them in the post office. In preparing the catalogue lists of publications to be paid for it is recommended that the cost of postage be included in the price to the public. This would be represented by special stamps issued by the Post Office Department to the departments and establishments through which the distribution would be made.

MINTS AND ASSAY OFFICES.

The estimated cost of maintaining the independent assay offices carried in the estimates for the legislative, executive, and judicial bill is $305,740. This is not the whole cost, as it does not include such as is carried in estimates for public buildings. The Secretary of the Treasury has recommended their discontinuance. By such action it is thought that the saving would be at least as much as the amount shown above. In this relation I wish to raise the question for the consideration of Congress as to whether it would not still further add to the economy with which the public business may be done, and at the same time increase efficiency, if the five Government mints located at Carson, Denver, New Orleans, Philadelphia, and San Francisco were consolidated. The cost of plant is very large. The added cost due to scattered work is also an element to be considered. The estimates for operating the mints amount to more than $915,000. Besides this, there are large items of cost contained in the estimates for public buildings. It is thought that, aside from the saving of $305,740 which might be effected by closing the detached assay offices as has been recommended, there could also be realized a saving in overhead and other costs of not less than $100,000 a year by the consolidation of the mints at some point of manufacture where the equipment is large and transportation facilities are good. The buildings in the cities where the mints were closed could be utilized for other governmental purposes, or sold.

REDUCTIONS OF EXPENDITURES PROPOSED BY THE COMMISSION ON ECONOMY AND EFFICIENCY.

To the present time 24 reports of the Commission on Economy and Efficiency have been sent to Congress by me, most of which contain constructive recommendations. It is thought that if these recommendations were acted upon affirmatively a saving amounting to several million dollars might be effected without impairing the efficiency of the several services which have been made the subject of inquiry. As these reports are specific, and a number of them have been under consideration by committees in Congress, it does not seem necessary to do more than to refer to them at this time.

RECOMMENDATIONS IN RELATION TO ESTIMATED FIXED CHARGES.

As has been said, fixed charges are the result of legislation over which the executive branch can not exercise control and with respect to which it has no responsibility. To this general statement, one exception is to be taken, viz, the administration of the public debt. Not only is the executive branch made responsible for the management of the sinking fund, but upon it has also been placed responsibility for borrowing to meet the needs of the Treasury.

SINKING-FUND REQUIREMENTS.

The amount of sinking-fund requirements depends on three factors, namely, (1) the amount of the debt to be sunk, (2) the time during which the obligations are to be permitted to run, and (3) the conditions attached to the investment of fund cumulations.

As bearing on the amount of the national debt to be sunk, I am of the opinion that the policy of the Federal Government should be to remain as nearly debt free as good financing and the equitable distribution of capital outlays over a series of years will warrant. Our governmental establishment is made up of three kinds of public corporations—municipal, State, and national. Any program for the protection and promotion of the welfare of the country must include them all. The burden of taxes laid by them all falls upon, and must be supported by, private business or by the private resources of the people. The debt burden of all must be considered as an incumbrance on our national wealth. Considering the fact that many municipalities and States have already reached the constitutional limit of indebtedness; considering that the total bonded debt of New York City alone exceeds the bonded debt of the National Government, and that the total municipal indebtedness is many times greater; considering that the Constitution places the burden of national defense on the National Government, it would seem to be the part of wisdom for the Federal Government to keep as nearly debt free as is practicable. Not only does reason suggest that this is one of the most effective precautions that can be taken to fortify the Nation, but history supports this conclusion. Both in our conflict with Great Britain and in the Civil War, the fact that the Federal Government was practically debt free at the time that resort was had to arms must be assigned an important place in considering the factors which made for success.

THE CIVIL WAR DEBT STILL UNPAID.

Notwithstanding the fact that the Civil War was begun practically debt free, the Government was forced to the last extreme to obtain funds with which to carry on the conflict.

At the end of the war the meeting of this debt was one of our most serious problems. That we have gone along for over half a century since the Civil War, carrying the large part of this war debt, when during the latter part of this period the revenues of the Government far exceeded expenditures, has been due largely to the fact that our public debt has been a part of an admittedly vicious system of banking and currency. As a matter of public policy, definite provisions should be made for retiring this several-times-refunded balance of more than a thousand million dollars, and in such manner as to do no injustice to those who have purchased the bonds as collateral for bank-note issue.

And in making provisions for this refunding, the first obligations to be retired are the demand notes that were issued during the war and given currency through being made legal tender. Every objection to the retirement of the greenback that in the past has obtained is now without force. These outstanding obligations of the Government (the legal-tender notes) are a constant menace to both Government and private credit—a menace which has operated adversely to the successful financing

of Treasury deficits in periods of business depression by draining the Treasury of its gold—one which would be found even more serious in case the Nation should need again to fall back on its credit as a matter of military necessity.

At the present time the total bonded debt outstanding is approximately $964,000,000. To this should be added $346,000,000, the amount of the demand Treasury notes. This makes a total indebtedness to be sunk of $1,310,000,000. Taking into the sinking fund the $150,000,000 gold reserve against greenbacks outstanding and the $137,000,000 advanced from the general fund for the building of the Panama Canal, gold certificates could be issued in place of greenbacks to the extent of $287,000,000. It would be necessary to issue only $59,000,000 more bonds to retire the balance of the outstanding Treasury notes, leaving an interest-bearing debt of the Government amounting to $1,160,000,000 of all maturities, against which sinking-fund requirements would be calculated. Assuming that it is determined to retire the present debt in 20 years after July 1, 1914, and further that authority is given to invest the sinking-fund cumulations in new issues of Government bonds for future capital outlays which will bear an average rate of 3 per cent, it would require about $45,000,000 to be set aside each year to retire the old debt, or about $15,000,000 less than the present legal requirement. This sum for sinking-fund requirements would have to be increased to make provision of each new bond issue as fast as necessary.

PRESENT SINKING-FUND RESOURCES.

At the present time the only sinking-fund resource is a claim on the general fund amounting to $809,000,000. This is now become a mere bookkeeping entry without real obligation or meaning. I recommend that the present law be amended so as to adapt the annual charge against the revenues to the actual requirements and that the book balance be canceled. To provide gold with which to retire the greenbacks, I recommend that authority be given to transfer the $150,000,000 general-fund gold reserve to the sinking fund as well as the $137,000,000 advanced for the Isthmian Canal from the general fund, the latter amount to be obtained by issue of 20-year bonds of the National Government.

CREATION OF A SINKING-FUND COMMISSION.

And to insure the independence of the administration of the sinking-fund law in the future it is also recommended that the chairman of the Finance Committee of the Senate, the chairman of the Ways and Means Committee of the House of Representatives, the Attorney General, and the Secretary of the Treasury be made ex-officio a sinking-fund commission, and that the comptroller shall be required each year to audit and state the sinking-fund account to the President and the Congress.

CONDITIONS TO BE ATTACHED TO NEW ISSUES.

In the making of future issues of national bonds I assume the adoption of a new banking and currency system, which will retire the 2 per cent United States bonds now used to secure circulation under a plan which places the price of the bonds on a false basis by making these alone authorized securities for the issuing of bank notes. While this provision has enabled the United States Government to float most of its securities on a low interest charge, it has so commingled problems of national currency and private debt with questions of public debt as to hamper the Government in its dealings by placing a barrier of investment interest in the way of every effort to retire outstanding obligations. The proposal would give 20 years, if need be, within which to adjust bond issues to an investment basis.

CONDITIONS TO BE ATTACHED TO THE SINKING FUND.

To the end that the sinking fund may be used to advantage prior to the time when the present outstanding indebtedness may mature or may be redeemed, it is recommended that, in so far as cash may accumulate in the fund in excess of the demands for meeting current maturities, this cash be made available for the purchase of subsequent bond issues authorized for public improvements or other purposes, and that the sinking-fund commissioners be authorized, with proper restrictions, to sell such purchases at any time that money may be desired to carry out the purposes of the fund.

SUMMARY OF RECOMMENDATIONS FOR REDUCTIONS IN ESTIMATES FOR EXPENSES AND FIXED CHARGES.

From the foregoing it is evident that the estimates for expenses and fixed charges may be reduced $25,000,000 without injury to the service. In fact, the results, in my opinion, would be beneficial, provided changes in law also be made as indicated. This could be accomplished by a reduction of not less than $10,000,000 in estimates for overhead and operating expenses and by a reduction of $15,000,000 by changing the sinking-fund law so that it would release the present cumulated reserve and provide only for an amount adequate for the retirement of the present national debt within 20 years from July 1 next and for the retirement of future bonded debt within 20 years from the date of issue. This would reduce the total of estimated expenditures which should be met by revenue from $995,000,000 to approximately $970,000,000 for the fiscal year 1914, as against which there is an estimated revenue of $970,000,000 (exclusive of trust funds, refunds, etc.).

CONSTRUCTIVE RECOMMENDATIONS PERTAINING TO PUBLIC IMPROVEMENTS.

Not only should every public improvement bear a definite relation to a plan or program which has reference to the needs of the Nation, but provision should be made for completing the improvement at such time as it will be most useful or serviceable in the carrying out of such a plan. In my opinion it is desirable that the Government at Washington should be housed in public buildings which should be built in such manner as to conform to a general plan of public buildings for the Government within the city. In order to carry out such a program it might be good business judgment to provide for spending fifteen or twenty million dollars within the next two years. As a matter of fact it would be advantageous for the Government to invest nearly $100,000,000, if need be, to save the rent which it is at present paying within the District of Columbia. By first developing a plan and then working to it, whatever part might be approved might be financed through loans which would enable the Government to apportion the investment burden over a period of, say, 20 years. Such a method of financing, applied to all its permanent improvements, would enable the Government to make contracts on the most favorable basis, to avail itself of having its buildings provided at an early date, and at the same time to proportion the burden on revenue equitably over a period of years, through annual appropriations to the sinking fund.

Applying the same theory to internal improvements: A definite plan may be adopted for the damming of streams which periodically flood the Ohio and Mississippi River Valleys, thereby enabling the Government to operate these dams for the retention of water at times of flood and also to operate the dams for the production of power or other industrial or commercial uses. Such a plan, however, would require a large initial outlay, which should be proportioned over a period of years.

Briefly stated, my suggestion is that the Government first plan for its land purchases, buildings, and public works, then borrow money to acquire and to construct them, proportioning the cost over a period of 20 years and making the bonds issued to meet the cost payable out of an adequate sinking fund.

Following these suggestions, I not only question the desirability of continuing to appropriate for new projects without a definite plan and before provision is made for financing them either by increased revenues or bond issues, but assert, further, that without a plan there is necessarily a large element of waste. For example, it would seem to be wasteful use of public money to appropriate for the location of military posts and buildings at various local points and for the building of barracks and quarters, whether for the Army, Navy, or Marine Corps, until a definite military program has been settled upon which will determine the question as to whether or not it is desirable as a matter of military expediency to maintain several hundred posts, scattered over the length and breadth of the country, for the quartering of troops, or to have quarters located at such points as to provide more adequately for the element of maneuver and military instruction which is the primary purpose of maintaining an army in time of peace. As has been said, in the past military posts and establishments have been located largely as a result of local pressure rather than from a consideration of military need. Many of the requests for appropriations above listed are based on this theory. Within the list are not only to be found the appropriations for military improvements, but also those civil in character, such as public buildings, improvements to rivers and harbors, etc., all of which should be subject to the same scrutiny before new projects are financed.

RECOMMENDATIONS FOR CHANGE IN POLICY PERTAINING TO APPROPRIATIONS.

The analyses which have been made suggest quite a different handling of the subject of authorizations and appropriations than has obtained in the past. Considering this from the viewpoint of the needs of the service, it is suggested that appropriations should be of the following general classes:

1. Appropriations to cover overhead and operating cost.
2. Appropriations for upkeep of property.
3. Appropriations for fixed charges, including sinking fund.
4. Appropriations for permanent improvements.

CHARACTER OF APPROPRIATIONS TO COVER OVERHEAD AND OPERATING COSTS.

With respect to the form of appropriations for current expenses, I am of the opinion that a sharp line should be drawn between appropriations for overhead and expenses of operation

and those for other current purposes. Appropriations authorizing expenditures for overhead expenses and operation should be annual, biennial, triennial, quadrennial, or quinquennial, as by the terms and conditions may be best adapted to the management of the public business to greatest advantage. These are subjects concerning which questions of policy must be currently determined. On the other hand, I am of the opinion that provision for repairs, replacements, and depreciation, interest on the public debt, pensions, subsidies, grants, judgments, awards, indemnities, and sinking-fund requirements should not be left to current or annual determination. With respect to these expenditures every question of policy should be decided at the time the law is passed authorizing them. Appropriations for such purposes, in my opinion, should not be taken up by an appropriation committee, except to ascertain what amount will be required under a funding measure that would be passed by the Congress as a part of the original authority. Under such a law the amount required should be a matter for administrative or judicial determination.

UPKEEP SHOULD BE FINANCED THROUGH A REPLACEMENT FUND CREATED BY PERMANENT APPROPRIATION.

When buildings are constructed it should be assumed that they are to be kept in repair—unless they are of a temporary character, in which case the construction should be treated as a current expense—and the cost of such construction should be amortized completely over the period of each building's use. To the end that a definite basis may be established for determining what appropriations are needed for upkeep of property, I recommend the appointment of an appraisement board in each department to determine what is the present investment or net cost to the Government of properties against which a maintenance reserve should operate. Such board or commission, under central direction and control, should be instructed also to prepare as a basis for future appropriations actuarial tables on all buildings and other improvements to land which are subsequently acquired. In other words, when new battleships are authorized, definite provision should be made for upkeep; when buildings and other improvements on land are authorized, a calculation should be made with respect to the maintenance requirements, and the amount so determined should be authorized as a permanent appropriation. With respect to industrial property—that is, property which is currently used for purposes of manufacture or other production—estimates for maintenance, including depreciation, should also be made. These estimates, however, should not be made as a basis for appropriation, but for the purpose of establishing a reserve for upkeep, including depreciation, which may be ratably charged to the operations or work on which equipment or industrial property is used, thereby making unnecessary any appropriation for this purpose other than as included in appropriations to cover the cost of work. Having established a replacement fund, the annual estimated requirements for each department should be met by permanent appropriations, and from this fund allotments should be made to provide for the repairs and replacements needed. By requiring an accurate account to be kept of actual repairs and replacements, by classes of property, the actuarial estimates may be corrected from time to time as experience would indicate.

PENSIONS SHOULD BE MET BY PERMANENT ANNUAL APPROPRIATIONS.

Fixed charges are on quite a different basis. There is no greater reason for current acts of appropriation to cover pension rolls than there is for an annual appropriation to cover interest on the public debt. A present situation fairly illustrates what may regularly happen when the amounts required to make payment on pension claims authorized are included in an annual appropriation bill. The appropriation for the current year is not less than $20,000,000 short of what it should be to meet pension claims. The result is that in the estimates for pensions for the next year a request is made for an appropriation to be made immediately available, but in case this is done the same situation must be faced the year following. It is probable that the appropriation already made, together with the pension item in the Book of Estimates, will not cover claims filed before June 30, 1914, by $30,000,000. In my opinion, what should be done is to carefully compute the demands which will probably be made under a pension law before it is passed—a precaution that has heretofore never been taken. After such an estimate has been prepared, then estimates would be made annually on the basis of experience for the consideration of Congress in providing revenues to meet Treasury demands, but the pension law should carry with it a permanent appropriation.

JUDGMENTS AND AWARDS SHOULD BE FINANCED BY PERMANENT LAW.

The same may be said of indemnities and court awards. When a judgment or award has been made it should be considered as an appropriation payable out of funds in the Treasury, unless the award should be so large in amount as to threaten the credit of the Government, in which case the Secretary of the Treasury should be permitted to withhold payment until provision could be made by borrowing or through increasing revenues for meeting the demand. Instead of this the present practice is to permit the courts to make awards for payments of claims and then to require the payment to await the slow process of a special appropriation. This is not only unjust, but it leads to a kind of trafficking which should not be encouraged. The only reason for requiring judgment creditors to wait for further congressional action would be in case payment of a large judgment would embarrass the Treasury or was in excess of an estimated annual requirement, when authority should be given to the Executive to defer payment till adequate revenues had been provided or bonds were issued for the purpose.

THE PRESENT LIST OF PERMANENT APPROPRIATIONS SHOULD BE REVISED.

As has been said, after a law has been passed providing for the borrowing of money on public credit, thereby authorizing the payment of interest, or for the payment of pensions, subsidies, indemnities, or the setting aside of revenues for the payment of the principal of the public debt, there is no further question of policy for Congress to consider until it may be found desirable to repeal the law or to deny the obligation. In general, this policy has already been followed. The list of permanent appropriations is a long one. For the current year the estimate reaches nearly $134,000,000. In the list of permanent appropriations for 1913 are included such items as $3,000,000 for meat inspection; $1,700,000 for the operation and care of canals and other works of navigation; $125,000 for the removal of obstructions in the Mississippi, Illinois, and other rivers; $100,000 for the maintenance of channels, South Pass, Miss.; $5,500,000 for the collection of customs. These are not proper subjects for permanent appropriations, whereas the expenditures of the character indicated above should, in my opinion, be thus provided for.

CURRENT APPROPRIATIONS FOR A LONGER PERIOD THAN ONE YEAR.

Both the expenses of current administration and operation and the acquisition of property for the continuing use of the Government should, in my opinion, be subjects for current consideration of questions of policy. To this end the administration should be held responsible for preparing and submitting each year carefully prepared estimates of needs, together with such collateral data as may be needed to consider what amount should be appropriated and what conditions should be attached. This does not mean that appropriations for overhead expenses and operation may not be for a longer period than one year. In many instances appropriations made to cover a period of years would result in largely increasing the economy and efficiency with which the service may be performed. It was, doubtless, with this end in view that the meat-inspection service was placed upon a basis of permanent appropriations. In my opinion this service should have been placed on a three-year or five-year appropriation basis until the service had become established and its current needs had been determined. There are many services the current expenses of which can, with advantage, be financed on a two, three, or five year basis. This would be of especial value in cases where a definite plan or policy is to be followed or worked to—as a military program or a plan for the development of public roads—in which the Government is to cooperate with States and other local bodies. For constitutional reasons, military appropriations can not be for a longer period than two years, but there is no such inhibition against funding the needs of civil service.

APPROPRIATIONS FOR PERMANENT IMPROVEMENTS.

With respect to the acquisition of permanent property, I would recommend, as a matter of financial policy, that no appropriation be made except pursuant to a plan which shall first have been approved by Congress in a bill separate and apart from the act making the appropriation. The formulation of a definite plan for improvements would enable committees of Congress, or, for that matter, Congress in committee as a whole, to consider what the Government shall undertake to do for a period of years before the requests for appropriations are taken up. This would be the alternative to the present method of having a large number of questions of organic law and questions of authorization to incur liabilities—which at the present time run some $300,000,000 ahead of appropriations—settled in a committee on appropriations and brought in as riders on the appropriation bills at the end of sessions, when no one has time or opportunity to consider, even in general, what the thousands of items in appropriation acts contain. After the question had been settled as to what work would be undertaken during a definite period, the appropriation bill authorizing it, in my opinion, should indicate what part or what project or improvement would be financed out of bond issues and what part would be

financed out of the general fund. In so far as projects are to be financed out of the general fund, there should be a limitation placed on the appropriation so made, to the effect that no contract shall be let by the administrative officer under whose jurisdiction the improvement is to be made unless the estimated revenues of the year, together with the surplus and the general fund, after providing for legal reserves and estimated current expenses and fixed charges, as determined by the Secretary of the Treasury, are adequate to meet the obligations to be incurred under such contract. This would admit of administrative curtailment of contracts against revenues automatically in case, from loss of expected revenues, the general-fund cash surplus of the Treasury should disappear.

CHANGES IN ORGANIZATION NEEDED TO PREPARE AND CONSIDER A BUDGET.

The Government is not only in the position of having gone along for a century without a budget, but, what is at this time even more to the point, it has not the organic means either for preparing or for considering one. In the executive branch there is no established agency which may be utilized for assembling the data required for the preparation of budget summaries. The law governing estimates requires that they be prepared and submitted by various heads of departments and independent establishments without executive review or revision; this makes it impossible to submit a budget unless the President does it on his own initiative. In Congress nine standing committees are charged with formulating bills for appropriation; a tenth committee is charged with formulating plans for raising revenue; still other committees, with an entirely different membership, are organized for reviewing the Government expenditures. There is little provision made for giving coincidence of time to their action or for correlating the results of their work, and in many instances what is attempted to be done through appropriation bills prepared by one committee is undone through the appropriation bills prepared by another.

RECOMMENDATION FOR A BUREAU OF CENTRAL ADMINISTRATIVE CONTROL.

First in the list of proposed changes in law setting forth what legislation should be enacted in order to enable the administration to transact the public business with greater economy and efficiency is a recommendation for the establishment of a bureau of central administrative control, with a comptroller at the head who would be responsible to the President and to Congress. Concretely, the proposal is to consolidate the six auditors' offices as well as the office of the Comptroller of the Treasury and the other central accounting offices of the Government in one executive bureau, and thereby, without increasing cost, to provide for a central accounting, auditing, and reporting organization which would include among its activities the preparation of a budget supported by a book of estimates and a consolidated financial report for the Government. This agency would also serve in the capacity of an independent agency for the preparation of special reports when requested either by the Congress or by the President.

THE NEED FOR A BUDGET COMMITTEE.

While it is with much hesitation that I suggest any change in committee organization in Congress, it seems to me to be highly desirable to have some provision, such as has been frequently suggested by Members on the floor, whereby a budget committee may be established as a final clearing house through which all the recommendations of the committees having to do with revenues and expenditures shall pass before they take the form of a definite bill. The special reason which I have for urging such a committee is that at present the administration is seriously handicapped by not being able to take up proposals or constructive measures affecting any particular department with any one body or committee which will undertake to consider them in all their aspects. For example, the War Department finds it necessary to deal with committees and subcommittees which have charge of the legislative, executive, and judicial bill, the sundry civil bill, the Army bill, the fortifications bill, the Military Academy bill, the river and harbor bill, besides committees in which various special bills and resolutions and the various recurrent appropriations may originate. The Interior Department finds it necessary to deal with committees which have in charge the legislative, executive, and judicial bill, the sundry civil bill, the Indian bill, and the pension bill. The Navy Department finds it necessary to carry its estimates before two different standing committees to be considered in three different bills. Neither do officers of the administration find it possible to get the whole of a particular subject before any one committee. The subject of transportation and communication (other than postal service) must be considered by the Appropriations Committee, Agricultural Committee, Committee on Foreign Affairs, Committee on Military Affairs, Committee on Naval Affairs, Rivers and Harbors Committee, and the Committee on Post Offices and Post Roads. Estimates for public health must go before three different committees, etc. For these reasons I am recommending not only that the administration be provided with adequate means for obtaining the information necessary to the executive direction and control of public business and the formulation and submission of a budget, but that Congress also make some organic provision whereby the administrative and legislative branch may coordinate their efforts in the development of the future activities of the Government as well as for the determination of the expenditures needed for the current transaction of its business.

WM. H. TAFT.

THE WHITE HOUSE, *February 26, 1913.*

INTERFERENCE WITH COMMERCE.

Mr. SMITH of South Carolina. Mr. President, a few days ago I gave notice that I would move to discharge the Judiciary Committee from the consideration of a bill pending before that committee (H. R. 56) "to prohibit interference with commerce among the States and Territories and with foreign nations, and to remove obstructions thereto, and to prohibit the transmission of certain messages by telegraph, telephone, cable, or other means of communication between States and Territories and foreign nations."

In pursuance of that notice, I call the attention of the Senate to the provisions of this bill. I recognize the fact that we are in the midst of legislation that is necessary, but I particularly desire to call attention to what the Senator from Wisconsin [Mr. LA FOLLETTE] said the other day; he said that unless he got recognition on a bill that he thought is of paramount interest to the people, some of these appropriation bills would have to stand aside. I do not care to make this threat in reference to this bill, but I consider it of greater importance than any before the Senate. I respectfully invite the attention of the Senate to this measure because it is of as far-reaching importance, not only to one section of this country, but to the Nation at large, as any rate bill or any appropriation bill or any other bill that has ever been before this body.

There is no commodity produced in this country of more importance to the welfare of the people of America and the world than the American cotton crop. This is true both from the standpoint of domestic use and financial interest. The comfort of the entire population of this country and the civilized world depends upon it. Its uses as a textile article are almost unlimited. In almost every conceivable form in which a textile can be used cotton adapts itself. From the coarsest cordage to the finest thread or laces it is equally adaptable. It practically has no competitor in the field of textiles. The only competitors are flax, wool, and silk. The nature of wool is such that it can only be used to produce woolen fabrics. Flax has a limited field. Silk likewise.

Cotton, on the other hand, under the modern weave and analine dyes, is a substitute for wool. And in fact it is largely used as a component part of all the woolen manufactures of the world. Under modern processes of spinning and weaving cotton has practically taken the place of flax. Under the mercerizing process it has entered the domain of silk and is rapidly becoming a substitute for it.

As a producer of revenue it alone, as an article of export in its raw form, has held the balance of trade in favor of America, bringing into this country approximately a half billion dollars annually.

The demand for American cotton is constant and world-wide. Its uses have continually widened. The number of spindles and looms from year to year has steadily increased.

The consumption has outstripped and is now outstripping production.

In 1900 the number of spindles in the world was 105,681,000; in 1912, 140,996,000. In 1900 the number of bales produced was 10,245,000 and in 1911, 11,965,000. In 1900, 105,000,000 spindles consumed a crop of 10,000,000 bales. In 1910 there were 140,000,000 spindles to consume a slightly increased production. In proof of the fact that cotton is a world-wide necessity, 900,000,000 people consume it. America holds a monopoly of this article. In proof of this I read some extracts from the proceedings of the International Congress of Master Spinners and Weavers, held in Brussels in 1910.

In the official report of the Seventh International Cotton Congress, held in June, 1910, at Brussels, Mr. F. Guillemin, a French spinner, said:

> We are in a very bad position in France just now. We have been trying to find new places in which to grow cotton and, so far, we have succeeded in producing in them about 40,000 bales a year. We are in the hands of the Americans; there is no doubt about it.

Mr. J. Hilton, of England, at this meeting, when it was intimated that possibly India might produce 10,000,000 bales, said:

> It has been suggested that it would be possible to get 10,000,000 bales from India. We want cotton, and we want to know where we can get it.

Mr. J. R. McCall, of America, in the same meeting, said:

I invite the attention of those who profess to legislate for the welfare of the people of America to this statement coming from the American member of the Spinning and Weaving Federation of this country.

It is the opinion of many intelligent men in America to-day that if the crop of this coming season should be less than 12,000,000 bales, cotton may see 20 cents a pound instead of 15 cents. It looks a reasonable proposition. The world can not go on continually curtailing. The markets are getting bare. The people are needing more shirts and clothes. They will be ready to pay 20 cents if they have to pay it.

Mr. C. W. Macara, of England, said:

It matters little to us where the cotton is grown; whether in India, Africa, or in any other part of the world. All we want is a sufficient supply.

These quotations are sufficient, coming as they do from the spinners and weavers of the world, to establish the fact that there exists a demand—a world-wide demand—for American cotton.

Is it not a monstrous proposition that with this world-wide demand and a restricted area of supply, with a steadily increasing consumption, that the sale of this article should be left in the hands of a few speculators and gamblers, who, by the rule of their exchanges, arbitrarily fix from day to day the price, regardless of the law of supply and demand? In place of the price being uniform after the amount of a year's production is known, the fluctuations in the market are so absurd, so violent, that the producer of the raw material and the manufacturer of the finished product may not even guess from day to day anywhere within a reasonable limit what the price may be.

If cotton was produced from day to day and buyers and sellers might not know from day to day what the production was likely to be, there might be some justification for an unusual fluctuation in the price; but in view of the fact that by the 1st day of December the entire supply of the American production of cotton until the first day of the next December is known, there is no justification in its fluctuating from day to day in a manner which is so disastrous.

These fluctuations not only demoralize to a large degree the manufacturer, but leave the producer absolutely at sea as to what his crop will reasonably bring and leave him at the mercy of the speculator and the manipulator of the market.

These speculators and manipulators neither grow the cotton nor do they spin the cotton nor do they handle the cotton in fact. They sell hundreds of thousands of bales that they never saw and never intend to handle.

So violent and unreasonable are these fluctuations that a resolution was introduced and passed in the House of Representatives on the 4th of February, 1907, regarding the methods in dealing in futures on cotton exchanges, which was phrased as follows:

Resolved, That the Secretary of Commerce and Labor, through the Bureau of Corporations, be, and is hereby, requested to investigate the causes of the fluctuations in the price of cotton and the difference in the market price of the various classes of cotton, and said investigation shall be conducted with the particular object of ascertaining whether or not said fluctuations in the prices have resulted in whole or in part from the character of contracts and deliveries thereon made on the cotton exchanges dealing in futures or is the result of any combinations or conspiracy which interferes or hinders commerce among the several States and Territories or with foreign countries.

Commissioner Smith, in submitting his report of investigation to Congress, says:

However this may be, the New York Cotton Exchange, if it can not exist under a just and equitable system, has no excuse for existence at all. The present New York system of fixed differences is uneconomic, in defiance of natural law, unfair, and, like all other attempts to defy natural law, results in such complex and devious effects that the benefits of its transactions accrue only to a skilled few.

The market that practically fixes the price of cotton in this country is New York.

The nature of the contract by which the price of cotton is controlled, especially in New York, is so unjust, so unfair as to call for action on the part of Congress for the relief of those who produce the raw material out of which the clothing of the American people is made, and upon which the world is dependent and upon which the balance of trade is dependent. They are entitled to the consideration of this body from every standpoint; from the standpoint of laborers—from the standpoint of labor, of which we hear so much in this body theoretically, principally, and practically null and void; I say from the standpoint of labor; from the standpoint of American income; from the standpoint of justice and equity they demand a hearing in this body. Congress has no right longer to disregard their repeated petitions for and attempts at relief.

I shall undertake to show that they are at the mercy of the exchange rules and regulations.

Commissioner Smith states this dependence in part, perhaps, better than I may. In reply to the contention that if the rules and regulations of the New York Cotton Exchange are considered by the producer and others as unfair and oppressive, that they may stay out of the market, and that those who patronize it patronize it with a full knowledge of the rules that govern it, says:

The reply of certain interests in the New York Exchange is that a contract is a contract; that men who come there of their own will are supposed to understand the game. This position can not commend itself as sound business ethics. Practically, also, it is not true that cotton interests are wholly at liberty to stay out of the exchange. As shown above, certain interests must have a hedging place. Furthermore, financial connections with New York are so close that New York must be the place for many of them. Still further, the New York Cotton Exchange practically owes its existence to the volume of business made possible by the participation of outside interests. Both the duty of a private business man to his customers and the duty of a concern which is to a certain extent a public utility demand fair dealing.

I shall read a New York Cotton Exchange contract. I suppose there are Senators here who have never taken the time to read such a contract, and for the benefit of those who may do me the honor to read this speech in the RECORD I am going to read this contract and incorporate it in my remarks. It is as follows:

In consideration of $1 in hand paid, receipt of which is hereby acknowledged, blank have this day sold to or bought from blank 50,000 pounds in about 100 bales of cotton, growth of the United States, deliverable from licensed warehouse in the port of New York, between the first and last days of blank month next inclusive. The delivery within such time to be at seller's option in one warehouse upon notice to buyers as provided by the by-laws and rules of the New York Cotton Exchange. The cotton to be of any grade from good ordinary to fair, inclusive, and if tinged, not below low middling tinged, or if stained, not below middling stained. New York Cotton Exchange inspection and classification at the price of blank cents per pound for middling, with additions or deductions for other grades, according to the rates of the New York Cotton Exchange on the day previous to the date of the transferable notice of delivery.

Now, just a word of comment on this contract and a suggestion so that you may keep the connection. If you will observe, the contract is made "basis, middling." The difference between the price of "middling" and the grades below and the grades above "middling" is fixed arbitrarily by the grade committee, and the seller of this contract has the option to deliver any one or some of all of the grades above and below, at his option. I shall discuss that more fully, and, I think, to the satisfaction of the Senate.

It will be seen from this contract that the seller of a contract has the option of delivering, at the expiration of the contract, cotton of any or all of the grades tenderable under the rules of that exchange on the contract. This would give him advantage enough if the price at which he delivered such grades as he did deliver was in accordance with the price as fixed by the law of supply and demand for that grade or those grades. But this he does not do. The price is fixed upon what is known as "basis" contract; that is, middling cotton having a certain whiteness and a certain per cent of foreign matter, such as leaf and dirt, is the middle grade. There are a certain number of grades below this and a certain number above it. A committee of the exchange meets once or twice a year and fixes arbitrarily the difference in price of the grades below and the grades above relative to middling.

For the grades above there is a certain number of points computed in hundredths of cents "on"—that is, above the price of middling; and for the grades below a certain number of points "off"—that is, for the grades below middling. So that one buying a contract buys it "basis, middling." He contracts for 100 bales of cotton—the minimum amount allowed to be sold on any one contract—let us say, at 10 cents a pound. Now, he has not bought a hundred bales of middling, but he has bought a hundred bales of cotton the standard of comparison of which is middling. What grades he is to receive is at the option of the seller. Suppose the fixed difference between middling and good ordinary, the lowest grade now supposed to be tenderable on the New York exchange, is fixed arbitrarily by the grade committee at 1 cent a pound less than middling.

If the party purchasing bids 10 cents basis middling and the fixed difference between it and good ordinary is 1 cent, and good ordinary is tendered to him on the contract, it is tendered to him at 9 cents. Suppose the real difference in the trade at large, according to the law of supply and demand, is 2 cents, therefore, he has lost 1 cent, which is $5 on a bale, or $500 on his contract. The next time he buys, realizing that that condition exists, he bids 9 cents for middling without any regard to the intrinsic value of the middling or its scarcity or its abundance, in order that when he comes to receive this lower grade at a fixed price he shall have closed the margin and can save himself from a loss by disposing of it under the law of supply and demand.

What is the result? The result is that middling cotton is fictitiously quoted 1 cent, or perhaps 2 cents, below what it is intrinsically worth, and the rank and file of the producers of

cotton, deceived thereby, are placed at the mercy of the speculator.

In this connection Commissioner Smith says:

FIXED DIFFERENCES UNJUST TO THE BUYER.

The main argument in favor of fixed differences, as above presented, considers only the position of the seller of future contracts. The answer to it is that, in return for any such additional security to the seller, the insecurity of the buyer is correspondingly aggravated. The injustice of thus adding to the disadvantage of the buyer is all the more indefensible, because, by the very nature of a basis contract, his disadvantage is necessarily great. That a basis contract, in connection with fixed differences, throws the risk of fluctuations in grade differences upon the buyer is apparent. Advocates of the fixed-difference system frankly admit this, but contend that it is altogether proper. Their argument is that the buyer of any commodity necessarily takes the risk of fluctuations in its value subsequent to the date of purchase. This argument overlooks the vitally important distinction between a basis contract and a specific contract. It is unquestionably true that in ordinary contracts for specific property, such as a piece of real estate, the buyer who agrees to take such property at a future date at a fixed price has no just reason to complain because, after he enters into such a contract, its value declines. It is his business to take the risk of such subsequent change in value. The argument that he should take the entire risk of change in value under a basis contract, however, by no means follows. The option of the seller, under a basis contract, of tendering such grades as he may desire creates a fundamental distinction between such basis contract and a specific contract. The buyer is absolutely unable to know with any degree of certainty what grades of cotton he will be compelled to take. If, in addition, he is compelled to take such unspecified grades at arbitrary values relative to middling, then the contract really assumes much of a gambling character. A contract of this sort, while extremely advantageous to the seller, becomes for the buyer almost a lottery. The seller not only has the privilege of selecting any grades which he may desire to tender, without notifying the buyer what they are, but also has the obvious inducement to select those grades which it will be of the greatest advantage to himself to deliver and usually of the greatest disadvantage to the buyer to receive.

Again, he says, in reference to this matter of fixing differences as compared with the relative values of the various grades as fixed by the law of supply and demand, the following:

The relative values of the various grades of cotton, and therefore the differences between those grades and middling, vary as the result of natural laws. This fluctuation in the differences is as natural a feature of the cotton market as are fluctuations in the price of middling cotton itself. This being the case, there is no sound reason why an exchange should arrogate to itself the power to "fix" these differences any more than it should assume to regulate or fix the price of middling cotton itself. Any such "fixing" of differences clearly is a defiance of the natural laws of trade. It is doubly objectionable because such fixing of differences is left to a committee of men who may be, and some of whom usually are, heavily interested in the future market, and who thus are subjected to the temptation to fix differences improperly in order that they may reap inordinate gains.

That is what Commissioner Smith says in his report on exchanges. His intimation that self-interest may be at the bottom of this remarkable custom of fixed differences is not the only objection. I shall read what he says in reference to this matter.

This is really the heart of the matter, involving the comfort of millions of people who are not noticed by legislation, who, in spite of the stupendous wealth that they give this country, receive such recognition as we know they have received at the hands of this body. Here is what he says:

Even if this question of self-interest could be eliminated, however, the New York system would be scarcely less objectionable. In the first place, even when the differences established by the committee in the first instance are in accord with commercial differences, they are almost certain to become out of line during the period, whether 2 months or 10 months, before the next revision. Since commercial differences are subject, under the influence of supply and demand, to constant change, there can be no possible certainty that the differences fixed on the third Wednesday of November, on the basis of the commercial differences then existing, will agree with the commercial differences three months or six months later. If they do agree, it is a mere chance. In the second place, if the committee attempts to establish differences, not on the basis of the commercial differences at the time of the revision, but on the basis of an anticipated average of differences for the period covered, its action becomes, by the very nature of things, little more than sheer guesswork. Furthermore, since the New York revision committee is practically unfettered by any restrictions—that is, since there is no established rule or standard to govern its action—the cotton trade is compelled to guess what theory the revision committee will adopt as to its duty; and in case it is believed that the committee will base its action on the probable average commercial differences of the ensuing period rather than on the current differences, the trade must guess what the committee's guess of that average will be. That a great business like the cotton business, affecting, as it does, millions of producers and tens of millions of consumers, should be conducted on the basis of guesswork is preposterous.

This is the statement of the chairman of the committee appointed by this Congress to investigate the conditions that have robbed my section and made it the poorest, while it is producing that out of which the most stupendous fortunes of the world have been made. For 50 years we have been clamoring at the doors of Congress, asking not for protection, but that the hard hand of oppression shall be lifted and the God-given law of supply and demand shall obtain in their favor. Shall we plead in vain? We are dismissed with indifference, and sometimes with worse.

I hope that the technical features of this bill will not cause the Members of the Senate to miss the main point. I will at this time take occasion to explain, so that you may follow me clearly. Cotton naturally divides itself, on account of the nature of the plant, into different commercial grades; that is, the staple. It bears until frost stops it. It is gathered from about the 1st of August, according to the openness of the season, if the crop is unusually abundant, sometimes until March. On account of cotton being open and lying in the field, necessarily it becomes discolored. The carelessness of picking incorporates into it a certain amount of trash and leaf. The grades that contain the foreign matter and are discolored are the off grades; that is, the grades which are below middling. The grades that are picked without being weather-beaten, having a more or less creamy color, are graded above.

The method of selling cotton is to take middling as a standard of comparison and rate all the grades below, according to color and foreign matter. They are priced off about a quarter of a cent for strict low middling, which is the first grade below middling; another quarter for low middling, a half to 1 cent for ordinary, and a cent or 2 cents for good ordinary, which last grade is the lowest under the present classification. Above, we have strict middling, good middling, strict good middling, and middling fair. That is as high as it goes—nine grades, four above and four below. For the grades above about a quarter of a cent "on" middling for each grade. I am contending that the trade should recognize each grade upon its merits; price it according to the demand for that specific grade, thus giving the grower the benefit of the value of each and every grade he may have to sell. But instead of doing this, the New York Exchange fixes arbitrarily the relative value of all the grades to the basis middling. They overvalue the lower grades, stack their warehouses with these undesirable grades. Then, through this overvaluation of the lower grades, they can force the price down by offering to deliver this junk on contract at a price beyond its value, forcing the purchaser of a contract to accept this undesirable cotton at a loss or to settle on margin; that is, to settle according to the difference between the price of middling when he bought and the price of middling on the day of settlement, which is nothing more nor less than gambling. This is what I am proposing to prevent.

Thus much has been said in reference to the unfair and preposterous rules of the exchange. What effect now has it upon the price of cotton? In the first place, it is universally true of the law of matter, as well as of trade, that it is easier for a thing to fall than it is to rise. It is easier, therefore, everything being equal, for a market to decline than for a market to rise. And whatever artificial and powerful laws are invoked for the depression of prices, the natural tendency is greatly accelerated. If, in buying a contract for the delivery of a given article, and that article is divided into different grades and these different grades are of different values, and the value of these different grades are not fixed by the law of supply and demand as to the different grades, but by an arbitrary law "fixing these differences" and giving to the seller of that contract the right to deliver any grade on that contract which he may deem of the best interest to himself, the natural result will be, as in the case of the cotton market, where the buyer has to buy "basis," that is, one specific grade as a standard of comparison, he (the buyer) will make this "basis" as low as possible so that whatever grade he receives may, by comparison to the basis he purchases on, conform as profitably as possible to the natural law of supply and demand of the grade he receives.

The natural result of this arbitrary fixing of differences and the unusual power given the seller has caused New York practically to cease to be a spot market and become what is known as a "hedging and speculative" market.

The overvaluation of the undesirable grades attracts to this market a class of undesirable cotton which is held in stock for delivery on contracts. In this connection Commissioner Smith, the impartial investigator appointed by Congress to go through this matter and to bring the facts to the attention of Congress, which he has done very exhaustively in six volumes, says:

The privilege enjoyed by the seller of the basis future contract, as previously described, of tendering a variety of grades or any grade, instead of a specific grade, has a tendency to depress the price of middling contracts, as compared with the price of middling cotton in the spot market.

In proof of the fact that this abnormal condition, tending as it does to inevitably depress the price of the future basis contract, also depresses the price of the spot cotton in the hands of the producer, Commissioner Smith says in Volume IV in his report on "Cotton Exchanges":

Whenever the future price is distorted, either by wrong differences or by any other cause, it is obvious that, instead of eliminating risks

from the transactions of the cotton merchant, a new element of risk is injected into them. There is no just reason why the cotton merchant should be forced to bear any such unnecessary risk. The inevitable risks of his business, strictly as a merchant, are great. The mere fact that the merchant is obliged to vary his limits simply because of some abnormal fluctuation in the contract price, due wholly to an arbitrary and improper method of conducting future trading, is in itself objectionable. The great injury inflicted upon cotton merchants by the fixed difference system was discussed in Part I. It is also referred to in succeeding chapters. From the evidence presented in this chapter it is apparent that that system has also worked to the serious disadvantage of the cotton producer.

After investigating fully and impartially the rules of the cotton exchanges in this regard, he reaches this conclusion:

The effect of a difference system upon the business of the New York market alone is not the proper basis for framing the rules of an exchange. The first consideration is that these rules shall be equitable and commercial. If the New York Cotton Exchange can not exist under such rules, then it has no right to exist at all.

This is the indictment that Commissioner Smith brings as the result of his investigation.

Before proceeding further in summing up the personal experience of those who are actually engaged in the production of cotton I want to quote a letter put in evidence before the committee of investigation, which speaks for itself. It was dated Waco, Tex., and is as follows:

WACO, TEX., *November 11, 1906.*

Mr. ATWOOD VIOLETT, *New York.*

DEAR SIR: I beg to acknowledge receipt of your circular letter of the 14th instant, relative to duty of revision committee, that is to meet within the next few days, to adjust differences on cotton contracts. I fully concur in every statement made by the minority members of that committee, and I unhesitatingly agree with every argument and suggestion made by you on behalf of adjustment of such differences; i. e., on basis of commercial differences existing in spot markets.

From the standpoint of a broker I think I can state without denial that under the existing differences now in effect in the New York exchange no exporter or spinner would under any circumstances accept or hold a contract for delivery in the New York market.

The whole truth of this matter as it appears to me is that instead of the New York exchange making some effort to make the New York market a spot market, and by so doing increase largely its spot business as well as enhancing the value of its membership seats, it is instead a mere dumping ground for all the low-grade trash that the South can not sell or use and the other markets of the world will not have.

Mr. President, I should like to insert the balance of this letter in the RECORD without reading it.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

I suppose I would be safe in assuming that out of your certificated stock to-day, say 69,000 bales, not more than one-third of this amount would be tenderable on contract as defined by the New Orleans Exchange. Another important matter, it seems to me, is that the New York Exchange is losing a large amount of its hedge business on this account solely; I know this from our own business, for much of our hedge business is now going to New Orleans where it formerly went to New York. I trust you (or the minority of committee) will be successful in convincing the entire revision committee in adjusting differences on basis of your suggestion. I should be glad to add my vote to accomplish this object if it be needed.

In conclusion I desire to congratulate you on the clear and concise manner in which you have placed the matter before the board of managers.

Very truly, yours, ——— ———.

Mr. SMITH of South Carolina. I call particular attention to the last part of the letter I have quoted, that the New York market is——

a mere dumping ground for all the low-grade trash that the South can not sell or use and the other markets of the world will not have.

It has been contended for a long time that these low-grade cottons were held in stock by the New York Cotton Exchange for the purpose of delivering on contract; that they were so overvalued as to make it impossible to resell them if accepted on contract, or were of such a character as to be entirely undesirable as a commercial article.

Mr. GRONNA. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from North Dakota?

Mr. SMITH of South Carolina. I do.

Mr. GRONNA. Will it disturb the Senator if I interrupt him for a question?

Mr. SMITH of South Carolina. No.

Mr. GRONNA. I should like to know how this cotton is standardized or graded when in the hands of the farmer, before it leaves the producer's hands.

Mr. SMITH of South Carolina. In reply to that question, I will state that one of the means by which the cotton grower has been mercilessly fleeced and robbed is the so-called classification of cotton by the average buyer, through his agent at the local selling points throughout the South.

Mr. GRONNA. Then, would it not be a benefit to the producer if the standardization were fixed, if it were possible to have the cotton standardized?

Mr. SMITH of South Carolina. That is one of the things my bill contemplates—that the Department of Agriculture shall make a careful study of the different grades, classify them according to their intrinsic value, and give those grades to the farmer and to the trade at large, and demand that they shall be the standard, just as 12 inches make a foot or 36 inches a yard.

Mr. GRONNA. I know absolutely nothing about cotton.

Mr. SMITH of South Carolina. You are in the same fix with reference to your wheat in the West.

Mr. GRONNA. I do know something about grain; and I will state that in the case of grain the price is based upon a certain particular grade. Number one northern is the grade upon which the contract is based.

Mr. SMITH of South Carolina. Yes.

Mr. GRONNA. It seems to me, and in fact I know, that whenever there is a surplus of the lower grades of grain there is a large spread; the grain has been contracted for as number one northern, but of course there is a vast difference between the price of number one northern and the price of the lower grades, and of course the farmer or the producer has to stand the loss. I presume that is true in cotton the same as in wheat.

Mr. SMITH of South Carolina. To be sure; that is it. And is it not shrewdly suspected that when the buyer demands the specific fulfillment of his contract from the producer he will accept nothing but an absolute number one northern, and then he mixes it with number two and exports it and sells it as number one?

Mr. GRONNA. I will say to the Senator that that is the complaint that has been made.

Mr. SMITH of South Carolina. I do not charge it as a fact, but I have heard the same complaint.

A careful investigation of the report by the commissioner shows that even this investigation, so painstaking and so full of facts, does not go into the details of the effect that this system has on the producer. In a few pages some letters are given, some comparison of date and prices, to show that when the future market is depressed that the spot price is likewise in a degree depressed. But it is apparent that the bulk of the investigation relates entirely to what effect it has upon the cotton merchant and the manufacturer.

It is the same story that is repeated in nearly every department of our economic life. Those who are able by their wealth and personal influence to force a hearing and force a modification of law and rules and customs get that hearing. Those who have not individual wealth, individual influence, no matter what service they render the State and society in general, or what the aggregate wealth they produce, are disregarded.

The merchant and miller by their advantageous equipment, both as to time and money, have devised plans through what is known as the hedging process to protect themselves in a measure against the disastrous practices of the exchange.

When a cotton merchant sells a contract to a mill, for instance, for future delivery and intends to deliver the actual cotton at the time specified in the contract, at a price specified in the contract, of grades specified in the contract, he immediately buys a contract on the exchange as a "hedge," or an insurance against loss. By virtue of his study, his opportunities to study the machinations of the speculator, he has been in a measure enabled to protect himself. He "hedges." Let us take the case of a merchant who, for instance, sells to a mill a thousand bales that he does not own at the time of the sale, at a fixed price, to be delivered on a certain day in the future. He immediately buys a contract on the New York Exchange or the New Orleans Exchange as a hedge. It protects him, if things are equal, for the reason that if the price of the raw material goes up before the day of delivery the price of his "futures" have gone up likewise, and what he makes on the contract offsets what he loses on the spot, and he still has the profit in the original contract. On the other hand, if the price of contract cotton goes down and the spots go down, what he loses on his contract he makes up in the less price he has to pay for the spots, so that if the thing moves *pari passu* he is in a bombproof. But what about the 5 and 10 and 15 bale farmer, who produces the bulk of the crop out of which the spindles of America and of Europe get their raw material, and upon which the clothing of the world is dependent? What about him, defenseless and alone? He has to stand the speculation and gambling in this product.

Mr. LA FOLLETTE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Wisconsin?

Mr. SMITH of South Carolina. I do.

Mr. LA FOLLETTE. I simply wanted to inquire to which of the bills the Senator is addressing himself?

Mr. SMITH of South Carolina. I am addressing myself to my bill, which I propose to offer as a substitute. It is No. 4654.

Mr. LA FOLLETTE. The Senator proposes to offer it as a substitute for House bill 56?

Mr. SMITH of South Carolina. For House bill 56; yes.

Mr. President, the small farmer does not understand the hedging process, nor does he understand the machinations of the market. He does not know anything about "longs" and "shorts" and "puts" and "calls." All he knows is industriously to take the chances that God in His wisdom sends him in the seasons, and to make that for which the world is clamoring. He expects his lawmakers, in the exercise of their functions as the guardians of the best interests of the people, to see that no injustice shall be done him in the operation of the law of supply and demand.

I am standing here to-day pleading for him. I would plead for any man, rich or poor, if by circumstances he was being unjustly dealt with. But how much more will I plead for the man who is dependent upon me for a square deal? I wish the Senate could know and realize, as I know and realize, the conditions that exist in my section of the country; how men stand—God help them—hungrily watching, not the operations of the legitimate law of supply and demand, but watching with fevered interest the markings on the board, upon which markings hang the welfare of his home, the education of his children, the putting of carpets on the floors and pictures on the wall, and the possibility of enjoying some of the decencies and comforts of life. Under this miserable system he is forced to be dependent, not on the law of supply and demand, but on the dice in the box of the gambler, who recks not of his hopes and aspirations, but is simply trying to cast a lucky number to fill his pockets with gains that he has not wrought for, and that wreck the hopes and aspirations of thousands engaged in legitimate business.

I venture this prediction: Were the cotton growers of America sufficiently few in number, of sufficient individual wealth, the rules and customs of the exchanges that are practiced to-day would have been long ago either abolished and denounced as iniquitous, or modified to a point where the grower would get a just and righteous deal.

In view of what the cotton grower of America contributes to the general welfare, in furnishing the raw material out of which the textile industry in this country gets its supply, he is entitled to every consideration and protection that the laws of the States and the National Government may throw about him. He practically produces that upon which the currency, the capital, the circulating medium of nine sovereign States of America are dependent.

My own State, South Carolina, produces an average of about a million bales of cotton a year. At 10 cents a pound, or $50 a bale, there is an income to that small State of $50,000,000. Texas, with an average production of 3,000,000 bales, has an income upon that basis of $150,000,000, the other cotton-growing States receiving like large incomes according to the cotton produced. The total value of the cotton crop is about a billion dollars annually, yet the cotton grower is left to the mercy and caprice and greed of a handful of speculators on the exchanges of this country.

Not only is this true as to the cotton grower providing the circulating medium for the Southern States in which cotton is grown, but I invite the attention of the legislators of this body, grappling with the question of a sufficient income for America, to this point: A study of the Statistical Abstract reveals the fact that our income from all the exports to this country, manufactured, raw, and otherwise, is two billion of dollars.

Raw cotton alone—not counting the manufactures of cotton, not counting the seed, which is now a great commercial product—raw cotton alone brings a fourth of all the exports for the whole continent of America—one-half billion dollars annually. Yet it is to be disregarded. Listen! Two bales out of every three are exported. Every time you raise the price of cotton a cent a pound you add $5 a bale, and out of an average export of 8,000,000 bales you add $40,000,000 to American wealth annually in the exchange of American cotton for European gold.

I quoted to you where the manufacturer in Brussels said that, according to the law of supply and demand, cotton in 1910 was worth 20 cents a pound, or $100 a bale.

Suppose the export cotton were to reach the magnificent price, which is a legitimate price in comparison with other products, of 20 cents a pound—$100 a bale—it would bring in the vast sum from the exportation of 8,000,000 bales of $800,000,000. It reached the high watermark in 1911 and 1912 of 10,000,000 bales export. At 20 cents a pound this would mean $100,000,000 in exchange of our cotton in the form of European gold.

Yet we must sit supinely by and under the operations of a law of protection see steel double in price and hear no complaint, see shoes double in price and hear no complaint, see the protected articles double in price and hear no complaint, but it is actually a thing to congratulate ourselves upon. It is the home market for home capital invoking the law of man against the law of God to bring it about, erecting an artificial barrier around the coast of America and defying the law of supply and demand for the enrichment of the American manufacturer.

Nature has erected a wall about the cotton growers of America and given them a monopoly of a human necessity. We do not desire to take advantage of this natural monopoly to extract an unjust return from those dependent upon us for it, but we do demand a fair and legitimate price. We do not want your high protection even if it could be given. But we do not want to be robbed. If you legislators throw the strong arm of the law about a few in defiance of the law of supply and demand for their benefit, in the name of the God of justice see that the hand of the robber, the selfish, and the greedy shall not despoil those who are producing the wealth of this country.

As cited elsewhere in my speech, in 1910 the spinners and weavers of the world in convention assembled at Brussels declared that America was the only source of the cotton supply of the world; that the price had reached 15 cents a pound; and that if the crop then growing should be less than 12,000,000 bales cotton would be worth 20 cents a pound. There was no reason why it should not bring 20 cents; no reason in trade, no reason in intrinsic value, no reason in its relation to the price of other commodities, but it didn't bring 20 cents. Why? Not because it was not worth it; not because the purchaser of cotton goods and the manufacturer of cotton goods did not realize that according to the law of supply and demand it justified that price, but because the manipulators of the market did not propose that the margin in which they were to reap their millions should be jeopardized for the benefit of those rightfully entitled to the full price.

What did actually happen? The mill men of this country, and particularly of the South, realizing a prospective short crop and knowing the condition under which cotton was produced, began to prepare themselves for what seemed to be the inevitable. Certain cotton speculators, realizing that the world was short of cotton, went on the New York market and began to buy contracts for the future delivery of cotton at a price which they knew that, if the law of supply and demand could be brought into operation, that if the legitimate laws of trade could be brought into operation, would yield them a splendid and legitimate profit. The sellers, this very class of men who, under the rules of the New York Cotton Exchange, Commissioner Smith has so clearly shown had such an extraordinary advantage, began to sell. To sell at a price which was, at the time of selling, below the legitimate value of the spot cotton, and certainly for the distant months, if the crop should be short, absurdly out of line with what the world recognized would be a fair price. They were depending upon their overvaluation of low grades, their undesirable stock in their possession, to offset any risks that might be involved in selling this market short, and in the hope ultimately of forcing the market down by their old practice of tendering these undesirable grades on their contracts.

According to my understanding, these gentlemen who were buying this cotton sold it in turn to the millers of the country, with the understanding that they were to take up the cotton as the contracts came due and deliver it to these manufacturers. When "notice" day came, according to their custom, there was tendered to these buyers this low-grade cotton. It was taken up, absorbed. The breastwork was torn down. Other months were sold short by the bears. Here they were, with their overvalued, their undesirable stock, their hope and defense gone. And their only chance of filling their outstanding contracts was to go into the open market, buy cotton where they might, and deliver it. This meant, of course, competition with other buyers. This meant a legitimate price. This meant the realization of the right of the producer to realize a fair profit, a fair price. What happened? Realizing that they were unable to fill their contracts, they practically repudiated them and rushed into court, invoking the law against combinations in restraint of trade to indict the men who had taken them at their word and bought from them cotton that they did not have and at a price they could not purchase it at without a loss. The case is still pending. One member of that number indicted has plead guilty to a technical breach of the law. Thank God the southern men who bought that cotton are standing firm and declaring that in good faith they bought, in good faith they demanded delivery, and in good faith will they demand a fair trial.

The parties who sold this cotton sold thousands of bales, depending upon the low grade of the cotton in stock to protect them against the day of delivery. Now, what happens? I state without fear of contradiction that of all the pusillanimous exhibitions of cowardice, of greed, was exhibited by these men on

the New York market in 1910. What happened? When the time for the first delivery of the cotton came, these sellers tendered to the buyers the low-grade over-valued cotton they had in stock. The buyers in the meantime had made arrangements to accept this low-grade cotton and dispose of it where it would not get back in the hands of those trying to depress the market. This practically exhausted the stock of low-grade cotton by means of which the sellers had hoped to save themselves.

There were still other contracts outstanding to be filled. With their stocks gone, their defense gone, what were they to do? To go into the markets of the South to buy cotton to fill these contracts meant competition with other buyers. That meant a loss, perhaps ruin. That meant, perhaps, 20-cent cotton. That meant that the producer, by the law of competition and supply and demand would get the real value of his cotton. What did these bears do? In place of buying cotton and filling their contracts like men they rushed into court and indicted the men to whom they had sold this cotton.

One of those men indicted has plead guilty to a technical offense. The others, speculators though they may be, have the right blood in them, and reject any compromise. They declare they bought the cotton in good faith, sold it to the mills in good faith, and demand that those who sold it to them shall deliver the cotton, and that they will stand in the court and plead their right to do this.

I introduced a resolution in the Senate at the time these men were indicted, calling upon the Attorney General to inquire as to who sold the cotton, how much actual cotton they had at the time of the sale, what was the price at which they sold, as compared with the price of cotton in the South upon the date of sale. The Attorney General's reply was tantamount to telling the Senate that he knew his business and that the Senate did not and that he was not going to make an investigation; but we are going to make one.

We are reckoning with a force to-day that the law of heredity and habit and the consequent inertia make us slow to realize. We are living in an age unparalleled by any other age; not that human nature has changed, and I am glad that it has not, but the means of expressing the desires and hopes and ambitions of each heart are more perfect than ever. The facilities for transportation and communication and education are so perfect that the man in the woods who has been the victim of the shrewd and the heartless has become as cosmopolitan as the man who walks the streets of the city. With better training at honest work, with a virtuous mother and honest father, he has had ground into his bones the intrinsic principles of honesty and integrity. Justice must be done him. He demands no more; he will accept no less; and the Government has yet to reckon with that class of our people who established it.

The bill that I propose, reduced to its simple terms, means that a buyer and seller shall have the same chance; that what a seller proposes to sell shall be specifically and definitely named, both as to quality and price, and that he shall deliver that, and shall deliver it at the price agreed upon and of the grade agreed upon; that the setting aside of fair competition shall cease, and that so far as interstate commerce is concerned, and in so far as Congress can regulate that commerce, the law of supply and demand shall obtain.

It is an easy matter, it seems, to dismiss this question and leave the farmer to take care of himself. It seems to be the sentiment of some that he is doing very well; that he ought to be satisfied with what he has and thank God that it is no worse. One reason that this sentiment is prevalent is because the farmer has not yet realized that one reason that he is in the condition that he is, is because the legislators of this country have been really indifferent to his welfare.

It is an easy matter for a man in easy circumstances to take an optimistic view of things in general and of the individual or people who are in a bad fix particularly; but we are going to have this legislation.

Mr. President, in conclusion I desire to say that the Senator from Massachusetts [Mr. LODGE] the other day stated a thing that struck me as being very forceful. He said that the poet by virtue of his genius and his intuition saw deeper into the heart of things than another, and in verse he was very often able to express it more clearly and tersely and powerfully than another. Since the Senator made this remark I came across this verse, and it was so appropriate that I shall quote it. We sit here in better circumstances and do not hear the cry of poverty nor feel the humility of its attendant evils. We are optimistic, and we are forgetful of our more unfortunate fellows. These are the lines that illustrate that:

> The toad beneath the harrow knows
> Exactly where each tooth point goes—
> The butterfly upon the road
> Preaches contentment to that toad.

Mr. President, I said I would ask to discharge the Committee on the Judiciary having in charge the bill that passed the House. The motion having under the parliamentary rule laid over, I now move, without any prejudice to the committee, for I know they have been hard worked and this was a subject by the very nature of which they could not give it proper attention, and it is not in prejudice to them—I now move the discharge of the committee and the bringing of the bill to the Senate.

The PRESIDENT pro tempore. The Senator from South Carolina makes a motion, which will be stated.

The SECRETARY. The Senator from South Carolina moves to discharge the Committee on the Judiciary from the further consideration of the bill (H. R. 56) to prohibit interference with commerce among the States and Territories and with foreign nations, and to remove obstructions thereto, and to prohibit the transmission of certain messages by telegraph, telephone, cable, or other means of communication between States and Territories and foreign nations.

Mr. CLARK of Wyoming. Mr. President, I do not know that personally I have any objection to the Senate taking this bill from the Committee on the Judiciary. I do not, however, believe that that is a good practice, especially at this time of the session of Congress and without some sort of a showing that the committee has deliberately failed in duty or that there is an effort to suppress the legislation which is incorporated in the bill.

Mr. SMITH of South Carolina. Will the Senator from Wyoming allow an interruption? I understand the nature of the case thoroughly, and I desire that the statement shall go into the RECORD that I do not charge or attach any blame whatever to the Judiciary Committee for its failure to report the bill. I have simply tried this morning to show from just what we were suffering, and if I could get the bill before the Senate I would simply offer mine as a substitute and let it take its chances upon its merits.

Mr. CLARK of Wyoming. As I was saying, Mr. President, I myself do not feel that the Senate ought at this time to bring the bill before the Senate without the consideration of the committee. The bill is fully as important as the Senator from South Carolina in his very eloquent address has indicated, and to my mind much more important, because it involves constitutional questions which we may laugh at in public addresses, but which we must consider carefully when we come to consider legislation of this character.

The bill came before the Judiciary Committee in July of last year. We all know that there was no time for the committee or the Senate to consider the bill during the balance of the special session. It has been before the Judiciary Committee during the present session. It perhaps should have been acted upon, but other matters consumed the attention of the committee, and other matters of very grave importance.

I know of no session of the Senate since I have been a member of that committee, which has been for a good many years, when the committee has considered so many questions of far-reaching public importance as the committee has considered, or has attempted to consider, this year. Certainly, in my judgment, bringing this bill before the Senate at this time would have no effect. Even the most ardent advocates of the bill could not hope to secure its passage without considerable debate upon the floor of the Senate. That debate, of course, can not be had now. It is simply bringing the bill from the committee.

Mr. SMITH of South Carolina. May I ask the Senator from Wyoming a question?

The PRESIDENT pro tempore. Does the Senator from Wyoming yield to the Senator from South Carolina?

Mr. CLARK of Wyoming. Certainly.

Mr. SMITH of South Carolina. The time is limited, it is true, but the bill that I proposed to substitute is very marked. My object was to get this bill before the Senate and substitute mine. I did not state and I hesitate now to state that this bill would have been called up earlier if it had not been for certain conditions that affected me personally in my home and made it impossible for me to be here; hence this delay.

I have not taken up very much of the time of the Senate. I have been content to watch the proceedings and to vote. But this touches my section of the country so vitally that I am a little disposed not to have it sidetracked without a hearing. I do not want to make any threats about having my rights asserted, because I recognize that it is late in the session. All I ask is just a vote as to whether the Senate will discharge the committee from the further consideration of the bill; that is all.

Mr. CLARK of Wyoming. Of course, the Senator does not insinuate that any measure has been sidetracked; and, of course,

the Senator would make no threat as to what would be done. But I was simply stating a fact which the Senator knows as well as I, that the passage of this particular bill through the Senate at the present session of Congress is absolutely impossible, and that not because of opposition to the bill, but because of the absolute necessity of a thorough investigation as to its terms and a thorough knowledge as to its effect. It is one of those bills which are sweeping in their importance. The Senator himself, in his speech this morning, recognizes that fact when he says it may mean millions of dollars annually to the people of his section——

Mr. SMITH of South Carolina. And to the United States.

Mr. CLARK of Wyoming. And to the United States. I have no doubt of it. The Senator can readily recognize the fact that a bill of that importance could not be disposed of in this Chamber without discussion, and discussion simply means that it can not be acted upon.

As I said, personally I sympathize with the Senator from South Carolina in his desire to have action upon this bill; personally I have no pride in having it retained in the Committee on the Judiciary, but I do think that a motion of this kind prevailing at this time of the session would establish an unwise and an unfair precedent.

Mr. SMITH of South Carolina. Mr. President, I insist on the motion.

Mr. CLARKE of Arkansas. Mr. President, I hope the motion to discharge the Judiciary Committee from the further consideration of this bill will be adopted, if for no other purpose than as a formal expression of opinion on the part of the Senate that the bill was sent to the wrong committee in the first instance. It does not involve a constitutional question at all. Every disputed feature about it, so far as its legality is concerned, has been settled so completely that that usually troublesome aspect has become obsolete. It is in the present state of developed law simply a question of policy as to whether or not the Congress of the United States shall deny to persons engaged in this nefarious business the facilities of interstate commerce to aid them in carrying on the business. It is a practical question, an economic question, and one that could be more properly disposed of by any one of two or three committees of the Senate than by the Judiciary Committee. When it was sent to the Judiciary Committee, I believe it was inadvertently done. Some of the friends of the measure failed to observe the fact that it had been done until it was too late to do anything effective about it. I admit that at this time it is perhaps rather late to make the motion that has been made; but it should be made, that notice may be given to those who are interested in the enactment of such beneficent legislation as well as to those who are interested in opposing the adoption of this remedy that the people who are behind the demand for this relief are in earnest, because they believe that they are the victims of a most grievous commercial outrage, to the consummation of which the Government of the United States is lending its functions.

I am not so certain about substituting the bill of the Senator from South Carolina [Mr. SMITH] for the bill that is now pending, and for several reasons. In the first place, the bill that is pending is a House bill; it goes upon the principle that that business is nefarious and should be suppressed. The bill introduced by the Senator from South Carolina fundamentally departs from that central idea, and proposes a modification of existing practices to the extent of permitting the delivery of any one of three grades of cotton upon one of these future gambling contracts. So far as I am concerned, I see no reason why that should be done. It is capable of very great abuse, for the reason that in more than 99 per cent of the transactions on the organized cotton exchanges there are no deliveries at all, and it is not outside of the range of human probability that the same ingenuity that built up that great system of spoliation, that has robbed one of the great industries of the South of untold millions, could find some way by which the whole purpose of this remedial legislation could be rendered inoperative. I prefer to say that the seller shall describe exactly what he is going to sell and the purchaser understand definitely what he is going to buy. I have no objection to future sales and deliveries upon that basis, but the more leeway you give them the wider door you leave open for abuses.

Mr. SMITH of South Carolina. Mr. President, I want to suggest to the Senator from Arkansas that the only reason why I submitted to any modification was because those who were as much interested as I was argued that we had better get a modified form as a beginning. I myself would vote for the passage of the House bill.

Mr. CLARKE of Arkansas. I am sure the Senator from South Carolina is entirely sincere in his attitude on this question, and I did not intend to imply in the slightest degree that he was not; but I believe he has conceded more than the fair justice of the case requires.

Then, the House bill has been worked out in that body very thoroughly; a similar bill has been passed by the House several times; it has undergone the scrutiny of debate and investigation in that body. Whilst it is not probably perfect, as no proposition of legislation generally is perfect, it does deal drastically and effectively with the question, and if it were put upon our calendar now I feel satisfied that the justice of its provisions would justify the Senate in passing the House bill and at once giving us effective legislation upon that subject, whereas I fear that if we should substitute the bill offered by the Senator from South Carolina, we might find ourselves in the condition in which the friends of such legislation found themselves 25 years ago, when, while each House had recorded its opposition to the business generally, it had done so in a different way, and there was that failure of unity of action that is necessary to make a law.

I therefore think that the motion to discharge the Committee on the Judiciary from the further consideration of the bill ought to be adopted, first, because the bill ought never to have gone to the Judiciary Committee. The crowded condition of business before that committee and the technical character of that business require so much discussion there that there was no time to consider the bill, it being true that the committee possesses no special equipment to consider it well. So, I think, that as a mere matter of selection the Judiciary Committee ought to be discharged from the further consideration of the bill.

Then again, the bill pending there is a House bill, and when it gets on this calendar a single vote of the Senate will put it well on its way to the statute book.

Mr. LODGE. Did I understand the Senator from Arkansas to say that the bill is a House bill and is on the calendar?

Mr. CLARKE of Arkansas. The House bill is not on the calendar, but it is before the Judiciary Committee.

Mr. LODGE. Is the Senate bill on the calendar?

Mr. CLARKE of Arkansas. Yes, sir.

Mr. SMITH of Georgia. I should like to ask the Senator how long has the House bill been before the Judiciary Committee?

Mr. CLARKE of Arkansas. Since last July, I am advised by the chairman of the committee; or, at least, I thought I understood him to make that statement. It has been in the hands of that committee what has usually been considered a sufficient time to have been discussed and reported—I would not say that has been improperly done, because I myself know how crowded is the business of that great committee—but I see no reason for the bill having gone there at all. There was no reason why it should have gone there. The legal propositions involved in it are pretty well settled from a constitutional standpoint.

It is merely a question of policy as to whether such legislation shall find its way to the national statute book. I think it ought to do so. I think now that the Senate ought to discharge the Committee on the Judiciary from the further consideration of this bill, and by thus placing it on the calendar give us an opportunity to consider and dispose of it at an early day. Even if we could not dispose of it; even if the pressure of business having priority here be so great that the measure can not receive consideration, and from entirely legitimate causes, and not because of obstructive delays, then we will at least demonstrate the fact that the Senate are willing to take notice of the great evil under which one of the principal industries of this country rests, and are willing to do something to relieve that condition as effectively and promptly as an orderly disposition of the business pending will permit.

Mr. LODGE. Mr. President, I send to the desk, and ask that it may be read, a letter which I have received in regard to this bill.

The PRESIDENT pro tempore. In the absence of objection the letter will be read.

The Secretary read as follows:

NEW YORK COTTON EXCHANGE,
New York, February 24, 1913.

HON. HENRY CABOT LODGE,
United States Senator from Massachusetts, Washington, D. C.

DEAR SIR: I confirm telegram sent you to-day, as follows:

"Reports from Washington state Senator SMITH will ask Senate to-morrow to take Beall House Calendar bill 199 from Senate Judiciary Committee and discharge committee from hearing said bill, and bring it direct before the Senate to a vote. As president of the New York Cotton Exchange representing a membership residing in each cotton-producing State, as well as this and the New England States, I protest. This is too important to be treated so flippantly, as the economical distribution of the cotton crop will be greatly interfered with, and I respectfully request that you use your best efforts to see that this measure is not rushed through. The right of a hearing is a privilege of which American citizens, in fairness, should not be deprived, especially as we were promised by the chairman of the Judiciary Committee that we would be given a hearing on this bill."

I would welcome a discussion of the merits of this bill before the Senate Judiciary Committee, and when this bill was referred by the Senate to its Judiciary Committee I immediately communicated with its chairman and was advised that I would be notified when hearings were held.

I wish to state that through the cotton exchanges, that trade in contracts for the future delivery of cotton, the cotton crop of the United States is distribued from the farmer to the cotton spinner at the smallest expense of any agricultural crop raised in this country, and without the facilities provided by such exchanges the expense of distribution would be greatly increased.

Apologizing for the length of this communication, but assuring you that the importance of the matter is much greater than is conveyed in this letter, I remain,

Yours, very sincerely, GEO. W. NEVILLS, *President.*

Mr. LODGE. Mr. President, I have not examined this bill with any care, but the statement of the president of the New York Cotton Exchange is that, as soon as the bill was introduced, they asked for a hearing before the committee and were informed that they would be heard when the committee took up the bill. I suppose the reason they have had no hearing is that the committee has not had an opportunity to take up the bill and give it consideration. It seems to me, Mr. President, that it is only fair that those who are opposed to the bill should at least have an opportunity to present their argument, no matter how meritorious the bill may be, and I think the motion to discharge the committee, in view of the fact that they have not had an opportunity to consider this bill, which is a very important measure, is rather premature.

The Committee on the Judiciary, as we are all aware, is loaded with work, loaded with bills of the utmost importance. I am certain that they have endeavored to do everything they could to dispose of the many matters before them, but it seems to me that it is hardly fair to those who are opposed to the bill, and who certainly have the right to be heard, that they should be cut off without any opportunity, at least, to present their arguments.

Mr. GRONNA. Mr. President, I will not state that the members of the New York Cotton Exchange have had an opportunity to be heard on this particular bill, but the New York Cotton Exchange has been heard on a bill similar to the House bill that is pending before the Committee on Agriculture.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from South Carolina?

Mr. GRONNA. I do.

Mr. SMITH of South Carolina. I should like to say to the Senator from North Dakota that the hearings before the House committee on the bill which passed the House were more exhaustive than the hearings had before the Agricultural Committee of the Senate. They covered a longer period, and ample opportunity was given all the interests involved to be heard. The hearings were printed, and upon them the Committee on Agriculture made its report. The bill went to the House, it was discussed, and it passed that body last July, if I am correct. Through a misapprehension or an oversight on my part when the bill was transmitted to the Senate it was not referred to the proper committee. It originated in the House and was referred to the Committee on Agriculture in that body, and should have been referred to the Committee on Agriculture in the Senate.

There has been no attempt, and there is no disposition on my part or on the part of those who are in favor of this legislation, to criticize the Judiciary Committee at all. It is a matter somewhat technical in its nature, but those who dealt with it in the other House exhausted it completely, so far as the hearings were concerned. Those hearings have been available for all those who are interested in the subject, but the bill has quietly lain in the committee, and, as I have said, on account of my inability to be here from January on it has been postponed until this time. It is of such importance that I hope, without prejudice or without casting any reflection or any Senator thinking that a reflection is being cast upon the Judiciary Committee, that the committee may be discharged, and, as the Senator from Arkansas has said, let this matter come before the Senate.

Mr. GRONNA. My recollection is that the gentleman who has sent the letter which has been read at the desk appeared before the Agricultural Committee of the Senate. Am I right in that?

Mr. SMITH of Georgia. If the Senator will allow me, he certainly did appear. He was heard for quite a length of time, and had all the hearings before the Committee on Agriculture that he desired in the discussion of this subject.

Mr. GRONNA. I thought I recognized the name.

Mr. SMITH of Georgia. He brought others with him, and we gave them all the time they wished in which to present their views before the Committee on Agriculture of the Senate, and their views were all reported and have been printed.

Mr. PERCY addressed the Senate. After having spoken for 15 minutes,

Mr. CLARK of Wyoming. Mr. President——

The PRESIDENT pro tempore. Will the Senator from Mississippi yield to the Senator from Wyoming?

Mr. PERCY. Certainly.

Mr. CLARK of Wyoming. I desire to say at this point what I should have said before, that under the rules I shall ask before the morning hour is closed, if I have the opportunity, that the motion to discharge the committee shall lie over.

Mr. PERCY. Do I understand the Senator to make a motion?

Mr. CLARK of Wyoming. I shall make the point that under the rules I shall object to the motion being acted upon to-day, and it will of necessity lie over.

Mr. SMITH of South Carolina. Mr. President, on the day before yesterday, the calendar day, I gave notice that I would, on the day following, make a motion; or, as I understood it, I made the motion to discharge the committee from the further consideration of the bill, and gave notice that I would make some remarks on it. I knew that the rule required that I should make a motion the day previous, and that under the rule it would lie over. I made the motion, but I see that it was printed—I noticed it immediately when I saw the calendar—that I gave notice that I would make a motion. What I really did was to move that the committee be discharged, and I then gave notice that I would speak on the matter. That was the way I intended to do it; but I suppose I may have inadvertently said that I gave notice that I would make the motion.

The PRESIDENT pro tempore. The RECORD discloses the fact that the Senator from South Carolina gave notice of a motion which he has made to-day. The point made by the Senator from Wyoming, if insisted upon, will necessarily postpone the matter until to-morrow.

Mr. SMITH of South Carolina. A parliamentary inquiry, Mr. President. If that be the fact, then this will come in its order to-morrow?

The PRESIDENT pro tempore. The Senator will, under the rule, have the privilege of making the motion if he gets an opportunity to make it to-morrow.

Mr. SMITH of South Carolina. I have already made the motion, and it has been discussed; it has been entertained by the Chair.

The PRESIDENT pro tempore. The Senator can call up his motion to-morrow.

Mr. SMITH of South Carolina. That is a different proposition.

Mr. PERCY. I will yield to the Senator from Wyoming for the purpose of submitting that motion to the Chair if he wishes.

The PRESIDENT pro tempore. What the Chair meant to say was that the Senator would have to find his opportunity to call up the motion to-morrow. The Chair, of course, will not in advance determine what may be before the Senate.

Mr. WARREN. Mr. President, I do not wish the Senator to understand that a motion of that kind will give him the floor to-morrow. Notices have been given here of appropriation bills that certainly must have the right of way if we are to proceed as we have always done, and as we must do to conclude our business. I do not think we should permit the idea to prevail that a notice of any other kind can take precedence over the privileged business of the Senate.

Mr. SMITH of South Carolina. Mr. President, if the Senator from Wyoming will allow me an interruption, there is a difference between giving a notice and making a motion to consider, which under the rule must go over until the next day. I am contending that the motion has already been made, and that it is now before the Senate, and that therefore no subsequent motion is necessary to consider it. The motion has been entertained, and we are now considering it. Of course, if the Chair rules, under the motion made by the Senator from Wyoming [Mr. CLARK], that at 12 o'clock this matter will have to be laid aside, I will not have to make a motion to-morrow to consider it; but under the ruling of the Chair, if I get an opportunity, I can move to take up the matter.

Mr. WARREN. Mr. President, in this connection, if I may be permitted, I desire to say that the appropriation bills are now entirely up to the kindly disposition of the Members of the Senate. It is entirely within the power of any Senator or number of Senators to occupy the floor, so that all appropriation bills must go over. On the other hand, in my judgment, there is plenty of time, if we will be economical with it, to dispose of the business. But in order to do that I beg Senators to understand that we must first get the appropriation bills into the hands of conferees, where the real struggle occurs, and where time is necessarily consumed.

Unless we do that, of course it is useless for me or other members of the Appropriations Committee to struggle any longer

with appropriation bills; we will simply have to lay them aside. The Senate must, in its good nature and judgment, allow the appropriation bills to have almost exclusive consideration for a couple of days or more, until we can get them moved along.

We have still on hand—on the calendar and in committee—some of the largest supply bills for the support of the Union, carrying not only funds for the next fiscal year but also funds for the work between now and July 1. There are branches of the Government where employees are now waiting because there is no money now available to pay them. They will have to be paid for this time, without doing work, perhaps, in some cases. We must get these bills along, or else we shall fail to provide for the Government, and shall have to commence all over again with the appropriation bills at the next session.

Mr. PERCY. I believe I have the floor, Mr. President.

The PRESIDENT pro tempore. The Senator from Mississippi has the floor.

Mr. PERCY. I desire to say that if this motion is laid on the table now, when it is taken up I shall complete my remarks on it.

The PRESIDENT pro tempore. Under the objection made by the Senator from Wyoming the motion will go over until to-morrow.

EXECUTIVE SESSION.

Mr. LODGE. For the sole purpose of disposing of a small treaty, unanimously reported from the Committee on Foreign Relations, which ought to be disposed of, and which will take but five minutes, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session, the doors were reopened.

ORDER FOR RECESS.

Mr. WARREN. Mr. President, in view of the state of the public business, I ask unanimous consent that at 6 o'clock the Senate take a recess until 8 o'clock this evening, and then continue its session.

The PRESIDENT pro tempore. The Senator from Wyoming asks unanimous consent that at the hour of 6 o'clock the Senate shall stand in recess until 8 o'clock this evening. Is there objection? The Chair hears none, and it is so ordered.

DEPARTMENT OF LABOR.

Mr. GRONNA obtained the floor.

The PRESIDENT pro tempore. Will the Senator from North Dakota permit the Chair to interrupt him for the purpose of making a brief statement?

Mr. GRONNA. I shall be very glad to yield for that purpose.

The PRESIDENT pro tempore. Senators doubtless have read the RECORD and know the status of the bill the Senator from Idaho [Mr. BORAH] has in charge. In an effort last evening to properly interpret the rules and preserve the dignity of the Senate during the progress of a so-called filibuster the Chair was somewhat uncertain as to the status of House bill 22913 upon adjournment, and suggested to the clerks that it be not placed upon the calendar as unfinished business, the Chair desiring to think over the matter a little further. The Chair is of the opinion that the bill did become the unfinished business, and now asks that it be laid before the Senate.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 22913) to create a Department of Labor.

Mr. GRONNA. I was about to ask unanimous consent that the bill be laid before the Senate.

The PRESIDENT pro tempore. The Senator from North Dakota will proceed.

Mr. GRONNA. Mr. President, when the Senate took an adjournment yesterday I was about to discuss some of the phases of the bill introduced by the Senator from Idaho [Mr. BORAH], but in view of the statement which has been made by the chairman of the Committee on Appropriations [Mr. WARREN], and in view of the fact that I know much important business is pending before the Senate that must be taken up immediately if those bills are to become law, I shall not delay the Senate more than a very few moments.

I want to emphasize what I stated yesterday, that I am not opposed to the creation of the Department of Labor. My opposition is simply directed to some of the phases of this measure. I do not believe that the Bureau of Immigration should be changed, and if changed at all it should go to the Department of State. I believe that I can state without any successful contradiction that ever since I came to Congress every vote I have recorded has been in the interest of the wage earner and friendly rather than unfriendly to labor. I wish to say further that my action in the future will demonstrate the fact that I want to see labor treated not only fairly but put upon a higher plane if possible than it is to-day.

With these few remarks I shall close. I hope that this bill when it becomes a law will be what the friends of the measure hope and expect it to be.

There is another thing I wish to state before I take my seat, and that is that no one has advanced any good reason why this bill should be passed in this particular form. I was anxious on yesterday to have some friend of the measure discuss the different provisions of the bill. I do not criticize anyone for not doing so at all. I have the utmost confidence in the judgment of the Senator who has the bill in charge, and I think I may be permitted to state that he knows in this matter I am acting in good faith in addressing myself to and opposing one particular phase of the bill.

As I stated, I do not wish to delay the passage of the bill for a single moment, nor do I expect when it comes up to vote against it.

Mr. SHIVELY obtained the floor.

Mr. BORAH. Will the Senator from Indiana yield to me for just a moment?

Mr. SHIVELY. Certainly.

Mr. BORAH. Before the Senator begins his remarks, as I understand he is going to address himself to the pending bill, I wish to ask the Senate to consider a brief amendment. In lines 5 and 6, on page 1, I move to strike out the words "and a member of the Cabinet."

Mr. SHIVELY. Is the Senator just laying that amendment before the Senate for action later in the day, or does he desire a vote now?

Mr. BORAH. I wish to present it and ask for a vote. I do not think there will be any objection to it.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 1, in lines 5 and 6, strike out the words "and a member of the Cabinet."

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Idaho.

The amendment was agreed to.

Mr. GORE. Mr. President, I move an amendment to the pending bill. On page 3, line 14, after the word "Labor," I move to insert the words "children's bureau."

The PRESIDENT pro tempore. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 3, line 14, after the word "Labor," it is proposed to insert the words "children's bureau."

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Oklahoma.

Mr. BORAH. So far as I am personally concerned, I have no objection to the amendment.

The amendment was agreed to.

Mr. SHIVELY. Mr. President, the amendment just adopted detracts in no way from the efficiency of the pending measure. What is commonly known as the President's Cabinet is neither a creation of the Federal Constitution nor of congressional enactment. In the written law there is no corporate entity, no body politic, no collective agency known as the President's Cabinet. The Constitution having vested the executive power in the President, the Congress, as from time to time seemed necessary and proper, created certain executive departments as instrumentalities in the administration of such power. In each organic act the Congress provides for an official head of the department, designates his official title, and prescribes the jurisdiction and duties of the new organization. By reason of his title as head of the department, the official may fall within the category of Cabinet officer, but the category itself is purely a creature of custom and not of constitutional ordainment or statutory origin. This fact in no sense detracts from the value of the system. It rather augments it. Under the custom there is opportunity to the heads of the several departments for the widest mutual and collective counsel and cooperation among themselves and with the President, while under the law each separately is responsible for the conduct of his own department. The effect is to combine the salutary influence of voluntary and unrestrained common counsel with individual official responsibility.

It becomes noticeable, therefore, Mr. President, that the use of the words "and a member of the Cabinet," in the first section of the pending bill, was a departure from the language employed in the creation of any of the present executive departments. By their own force the preceding words of the section designating the head of the proposed department as the "Secretary of Labor" place that official in the class which the language of custom designates as a member of the Cabinet. It

might be inferred that these words were used in fear or in doubt lest without them the new department might not rank in parity of dignity with the other great executive departments, but I draw no such inference. The relations of the official head of the new department to the President and to the public, and his powers and duties in all respects, would be precisely the same with or without this designation to membership in a body having no existence in positive law. The additional title would have added no function to his relations to any other department of the Government, and the absence of it subtracts nothing from his individual responsibility for the conduct of his own.

The organization having charge of our foreign relations was created as the Department of Foreign Affairs by act of July 27, 1789, and changed in name to that of the Department of State by act of September 15, the same year. The Department of War was created by act of August 7, 1789, and the Department of the Treasury by act of September 2, the same year. The Department of Justice was created by act of September 24, 1789. The office of Postmaster General was created by act of September 22, 1789, and the general Post Office was established at the seat of government by act of May 8, 1794, and raised to the dignity of what is now the Post Office Department by act of June 8, 1872. The Department of the Navy was created by act of April 30, 1798, and the "Home Department" by act of March 3, 1849, which designation was subsequently changed to the Department of the Interior. The Department of Agriculture was established by act of May 15, 1862, with a chief entitled Commissioner of Agriculture, which designation was changed to Secretary of Agriculture by act of February 9, 1889. The Bureau of Labor was created by act of June 27, 1884, the head of which was entitled Commissioner of Labor, which bureau was, by act of June 13, 1888, made the Department of Labor, and which department was, by act of February 14, 1903, incorporated in a new and enlarged executive organization entitled the Department of Commerce and Labor, whose head is entitled the Secretary of Commerce and Labor.

Of the first seven of these executive departments, each is charged with the execution of some specific power or powers, whether pertaining to foreign relations, Federal taxation and finance, the national defense, the national justice, the custody, transmission, and delivery of the mails, promotion of the "progress of science and useful arts" by copyrights and patents, the administration of the public domain, or any other subject matter confided by the Federal Constitution to the control of the executive power of the Federal Government. Each of these departments has functions distinctly public, governmental, and Federal in character. The creation of an executive department whose function related to agriculture was the first marked exertion of Federal power on the field of enterprise private in its employments and purposes, and public only in the sense that the industry sought to be fostered is so primary to the daily life of society that its vicissitudes are always of anxious and universal public concern. The functions assigned to the Department of Commerce and Labor relate to a wide variety of subject matter, some of which is directly within the purview of Federal power and other of which is only remotely incidental to it.

In creating the Department of Labor the pending bill declares the function of such department to be "to foster, promote, and develop the welfare of the wage earners of the United States; to improve their working conditions, and to advance their opportunities for profitable employment." To not be futile, this language, of course, must be found not to involve derogation from that vast department of power expressly reserved by the Federal Constitution against the Federal Government to "the States, respectively, or to the people." But it is rather to the policy of the bill that I address myself, and in doing so direct a glance at the historic attitude of government toward and in relation to the class of workers denominated by the bill as "wage earners."

When Aristotle set himself to the task of writing his book on "Politics," he had before him 158 political constitutions. Each of these constitutions was an organism through which power had circulated in a scheme of government. After all of his research and reflection, Aristotle concluded that stable and efficient government is founded on two classes. The first he denominates the Leisure class, born to the arts and graces of life, the honors and emoluments of government, and control of the movements of society. The other he denominates the Servile class, born to do the work of society and bear the burdens of government and, in the discretion of the superior class, to fight the battles of the country. The great philosopher honestly believed that stability and efficiency in government require that the inequalities among men in a state of nature must be reflected in the form and structure of government, and conceived that the division of society into these two classes was a sufficient approximation to the principle.

However disguised, this class principle was dominant in the composition of the governments of the earth from the earliest dawn of recorded history down to the eighteenth century of the Christian era, and is still dominant in a large portion of the statecraft of the world. There are here and there instances of slaves rising to the dignity of poets, orators, and statesmen, but this was in spite of a principle that left the toiler without a place in history. The ancient historian tells us of the rise and fall of dynasties, the birth, reign, and death of kings, the victories and defeats of great captains, but naught of those whose labor supported the dynasties, embellished the thrones, and fed the armies.

What know we of those whose labor builded the Pyramids by the Nile? Who has told the story of the toiler on the Hanging Gardens of Babylon? What manner of men built the old Coliseum by the Tiber? The traveler stands in dumb amazement before the splendid ruins of the Acropolis, near Athens, but who tells him the story of the sweat and blood and tears wrought into the masonry of its walls? The well-nigh universal silence of history on the struggles of the great multitude of the world's workers is the most pathetic fact in that history, and defines with a precision sharper than words the low status assigned to labor in the society of those times.

The gentle Galilean in His youth and early manhood, at His work as a carpenter, and St. Paul, amid his busy ministrations as evangelist of the new faith, and at his craft as a tentmaker, earned their daily bread and placed their stamp of nobility on useful toil. In after centuries, when the civilization of the West faded into the gloom of the Dark Ages, there were institutions here and there consecrated by pious spirits to noble ends wherein the toiler found a welcome and adequate requital of his service. But rarely did this stamp of nobility or these institutions move the pulse or have the patronage of government.

From the thirteenth to the eighteenth century the fortunes of the wage earner in Europe varied, but seldom rose above the level of hopeless degradation. Thousands of years before, the humanity of Moses had commanded "Thou shalt not muzzle the ox that treads the corn." In central Europe it was customary to so fasten a board about the neck of the treadmill worker as to prevent him carrying meal to his mouth with his hand. The whole tide of legislation and local regulation was toward longer hours and the lower wage. Governments prescribed a maximum wage and harsh prosecution and punishment for the humane employer who should pay more than the wage prescribed. There was no minimum wage. Even in the reign of Elizabeth, Parliament enacted that the master who paid the highest wage should be subjected to 10 days' imprisonment and the apprentice who received the highest wage should suffer 21 days' imprisonment. I mention this as illustrating the trend of labor legislation in those days and the attitude of government toward the wage earner, which was almost uniformly repressive, oppressive, and heartless.

The struggle was accentuated and embittered from a most unexpected source. The first invention of labor-saving devices was hailed by the philosophers and poets as the evangel of emancipation of labor from excessive length of the workday and assurance of increase in time for rest, recreation, and family companionship. But as capital in the idle machine was dead capital, invention set the current of industrial forces toward longer rather than shorter hours. The struggle against this tendency raged fiercely in Europe through five centuries, during which the forces of government were arrayed with singular unanimity against the wage earner.

The more general diffusion of knowledge, the wider assertion and discussion of the natural rights of man, and the consequent increase in the popular spirit in government in the later years of the eighteenth century arrested the adverse tide and gave to labor at least a hearing for its cause. The American Declaration of Independence was an unqualified challenge to the whole political doctrine and philosophy of Aristotle. That some of those who subscribed to that instrument were not entirely free from the spirit of caste we can easily believe. Yet it was issued at a time when then existing institutions and dogmas were under the white heat of a remorseless intellectual and moral inquisition, and many cherished idols of power were being cast down and melted away in the flame of a revolution that signalized a new conception of the true form and functions of government. It is easily conceivable that in the fervor and enthusiasm of that revolution the sponsors of the great declaration regarded the humblest toiler in the Colonies as of more value to society than the whole tribe of titled parasites bred at princely courts of kingly power.

The Americans of that generation were profounder students of the history and philosophy of government than any generation that preceded or succeeded them. They knew that the democracies and republics of antiquity had been compromised with the class principle and that they descended into inglorious graves under a system that spelled luxurious splendor and decadence, on the one hand, and hopeless squalor and misery on the other. The Declaration of Independence was a labor document as well as a political document. Under its pledges was baptized into the family of nations a republic of republics, within which sovereignty reposes in the people, to be exercised through their chosen agencies, and no artificial order or class is permitted as an institution or instrument of government. By the new system the toilers in increasing number became separate and independent units of political power, partakers in government, clothed with the duties of citizenship and obligations to the faithful performance of them. The natural effect was to lift labor out of the category of mere ticketed merchandise in the market, recognize it as of living flesh and blood, of mind and conscience, inseparable from and bound up with the highest interests of home, family, society, and the state. The process involved less the creation of conventional rights than a recognition of the inherent right to pursue happiness, for security to which all just government is ordained.

In this spirit the Federal Government has enacted and enforced measures prohibiting the importation of alien labor under contract, regulating the working hours of laborers and mechanics in Federal employment and in certain cases of private production for Federal use, regulating the conditions of employment of seamen in the merchant marine, modifying or withdrawing in whole or in part the common-law defenses of assumption of risk, fellow-servant liability, and contributory negligence in suits for personal injury suffered in certain employments, and other measures protective of rights falling within its jurisdiction. In the same spirit the several States in varying degree have enacted laws by which the power of the State is exerted to fix maximum hours of the workday in certain occupations; to secure the laborer from the exactions of "pluck-me stores" by requiring that his wages be paid in the current money of the country; to give him a lien for his wages on the product of his toil; to require safeguards to his life, limb, and health on railways, in store and factory and mine, and by various other measures to preserve the fair course in the race of life essential to his status as a citizen and his rights as a man.

Primitive and pioneer industry, with its household and modest shop production and its rude forms of transportation and distribution, was one thing. Modern industry, with its colossal plant and systems of transportation and distribution continental in their operations, is quite another. In the one the laborer operated singly or as one of a small group; his task was simple and his environment safe. In the other he finds himself operating as one of thousands in a huge establishment filled with machinery propelled by steam or electricity, and amid the dangers that attend crowded conditions and the use of high forms of mechanical power. In changes so revolutionary, displacement and readjustment attended the transition, and naturally new rules of law became necessary, not as creative of new rights, but as preservative of old ones.

There are, however, Mr. President, features of jar and maladjustment attending the swift development of industry in this generation that are not so readily susceptible of correction by inflexible rules of law, and the nature of which suggests some agency of mediation and conciliation. The vast physical change in the magnitude and methods of modern industrial enterprise is scarcely more marked than the moral dislocation in certain lines of relations between capital and labor that came with and as incidental to it. This is illustrated in the case of the enterprise controlled by directors sitting a thousand miles from the operations of its wage employees, to whom directors and stockholders are alike total strangers. In the change, the close personal and mutually sympathetic relation of employer and employee born in the course of common toil in the modest shop was broken, to be succeeded by an impersonal, isolated, and purely pecuniary interest. In the cold struggle between dividends and wages the antithesis of viewpoints becomes so sharp that too often when disputes arise as to wages or other conditions of employment no common starting point is available from which to approach disentanglement of the controversy, and the contest sinks into prolonged, wasteful, and embittered strife.

In the external affairs of nations it frequently happens that when controversy arises between two governments the diplomatic department of each advances extravagant claims as a basis of give-and-take in the final adjustment, and which neither may regard as fundamental to national honor or worth the waste of war. But the people of the respective countries may accept the claims of their respective diplomats so seriously that the heat and passion engendered in the course of subsequent negotiation reach a stage where the foreign office of neither government can recede without stormy domestic commotion and loss of national prestige. In this situation both governments welcome the intervention of a friendly and impartial third party as a means of relaxing the tension and composing the substantial rights of both countries without wounding the sensibilities of either.

When labor and capital employed in the great producing and distributing enterprises of the country get into controversy and the conflict of cross-purposes drifts into that heat, acrimony, and deadlock that have on too many occasions put society on the edge of peril, the pending bill offers a means of relaxing the strain and composing the strife, in the provision of section 8, "That the Secretary of Labor shall have power to act as mediator and to appoint commissioners of conciliation in labor disputes whenever, in his judgment, the interests of industrial peace require it to be done." The bill contemplates no legal coercion. It authorizes no compulsion, save that which friendly and impartial official opinion and counsel formed and given in the light of the facts in each case may carry to the parties to the controversy.

If enacted into law, the value of this provision will depend in a peculiar degree on the care and judgment with which the head of the new department exercises the wide discretion vested in him. To regard every labor dispute as a menace to "industrial peace" and project Federal power indiscriminately into industrial controversies would prove provocative of strife rather than promotive of peace. To indulge such practice would be to cheapen a noble function, and subject the department to the suspicion of patronizing industrial controversy for the employment such controversy would offer in composing the dispute. The real virtue of the power of intervention resides in the fact that such power exists, rather than in resort to it except where the menace is actual and imminent and the prospect of voluntary concession and settlement beyond reasonable hope.

Mr. President, I have touched but a few features of the bill. The withdrawal of several bureaus and divisions from the present Department of Commerce and Labor and their incorporation in the proposed executive department make the new organization one of peculiar strength and commanding importance. The most important consideration, however, at this juncture is the fact that a bill creating a department of labor is about to become law. The event is a vitally significant step in the wide movement to reconcile economic progress with social justice. This significance is accentuated by the large facilities provided for the collection and distribution of accurate statistical and other information relating to the wage earner, his products, and the conditions attending his employment. The clearer and whiter light on these conditions which this function of publicity supplies will in itself mitigate some evils, while the facts collected pave the way for intelligent legislative action for the cure of others.

It is under favorable auspices, Mr. President, that this new agency of public service will enter on its mission among the great executive departments of the Government. Its destiny is linked with the dignity and nobility of useful toil. While the millions of wage earners throughout the country are made the special objects of its care, a noble host of other spirits will join in welcome to its coming. To no special class is confined the resolve that the civilization of our Republic shall not degenerate into industrial and social cannibalism for want of the intelligence and public spirit to comprehend and master its problems.

Mr. SWANSON. Mr. President, I am earnestly in favor of this bill. I am a member of the Committee on Education and Labor which has reported it, and I would do nothing which would retard its passage quickly and promptly. There is, however, a condition in connection with the Bureau of Immigration and Naturalization which is still left ambiguous in the bill. The bill which passed creating a Department of Commerce and Labor provided for a Bureau of Immigration and Naturalization. The same act provided for a separate bureau, and there was a controversy as to whether the Commissioner of Immigration should appoint the Chief of the Bureau of Naturalization. The same act makes them two separate bureaus, and there was a controversy as to whether the Commissioner of Immigration should appoint the Chief of the Bureau of Naturalization. It was referred to the counsel for the department, and he decided, on account of the ambiguity, and to give effect to all parts of the act, that they were separate; and the Secretary of Commerce and Labor appointed the Commissioner of Naturalization.

This bill still leaves that ambiguity. I have offered an amendment, which I hope will not retard the passage of the bill, to get rid of this ambiguity. I hope the chairman of the committee who has charge of the bill will accept the amendment and send it into conference. If it would at all retard the passage of the bill—which is a measure that I earnestly favor—I would not offer it, and would not ask to have it go into conference.

Mr. BORAH. Mr. President, this amendment, as I understand, is designed to make more explicit and certain the law with reference to these two bureaus?

Mr. SWANSON. Yes.

Mr. BORAH. In fact, it would put into the law what now rests largely on construction?

Mr. SWANSON. This amendment would put into law what is now the construction of the department in connection with these two bureaus.

Mr. BORAH. I have no objection, so far as I am concerned, to the amendment going to conference.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 3, line 18, after the word "department," it is proposed to insert:

The Bureau of Immigration and Naturalization is hereby divided into two bureaus, to be known hereafter as the Bureau of Immigration and the Bureau of Naturalization, and the titles Chief, Division of Naturalization, and Assistant Chief shall be Commissioner of Naturalization and Deputy Commissioner of Naturalization. The Commissioner of Naturalization or, in his absence, the Deputy Commissioner of Naturalization shall be the administrative officer in charge of the Bureau of Naturalization and of the administration of the naturalization laws under the immediate direction of the Secretary of Labor, to whom he shall report directly upon all naturalization matters annually and as otherwise required, and the appointments of these two officers shall be made in the same manner as appointments to competitive classified civil-service positions.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

POST OFFICE APPROPRIATION BILL.

Mr. BOURNE. Mr. President, I move that the Senate proceed to the consideration of the Post Office appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 27148) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1914, and for other purposes.

The reading of the bill was resumed, beginning with line 20, page 12.

The next amendment of the Committee on Post Offices and Post Roads was, on page 12, line 25, after the words "in all," to strike out "$40,870,000" and insert "$40,572,000,"' so as to make the clause read:

And to provide for the promotion of 75 per cent of the clerks in first-class post offices from the fifth to the sixth grade and for the promotion of 75 per cent of the clerks in second-class offices from the fourth to the fifth grade; in all, $40,572,000.

Mr. BOURNE. I will ask that the Senate disagree to the committee's amendment there, for the reason that the failure of the Senate to agree to the committee's amendment preceding that necessitates the restoration of the amount that was in the House bill.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Post Offices and Post Roads was, on page 13, after line 7, to strike out:

For compensation to clerks in charge of contract stations, at a rate above $300 each and not to exceed $1,000 each, $430,000.

The amendment was agreed to.

The next amendment was, on page 13, after line 10, to strike out:

For compensation to clerks in charge of contract stations, at a rate not to exceed $300 each, $750,000.

The amendment was agreed to.

The next amendment was, on page 13, after line 12, to insert:

For compensation to clerks in charge of contract stations, $1,010,000.

The amendment was agreed to.

The next amendment was, on page 13, line 16, after the word "vacation," to strike out "$200,000" and insert "$225,000," so as to make the clause read:

For compensation to substitutes for clerks and employees at first and second class post offices on vacation, $225,000.

The amendment was agreed to.

The next amendment was, on page 14, line 14, after the words "post offices," to strike out "$5,000,000" and insert "$4,800,000," so as to make the clause read:

For rent, light, and fuel for first, second, and third class post offices, $4,800,000: *Provided*, That the Postmaster General may, in the disbursement of the appropriation for such purposes, apply a part thereof to the purpose of leasing premises for the use of post offices of the first, second, and third classes at a reasonable annual rental, to be paid quarterly for a term not exceeding 10 years; and that there shall not be allowed for the use of any third-class post office for rent a sum in excess of $500, nor more than $100 for fuel and light, in any one year.

The amendment was agreed to.

The next amendment was, on page 14, line 24, after the words "second class," to strike out "$375,000" and insert "$400,000," so as to make the clause read:

For miscellaneous items necessary and incidental to post offices of the first and second class, $400,000, of which sum $25,000 may be used for the purchase of post-office equipment.

The amendment was agreed to.

The next amendment was, on page 16, line 16, after the words "City Delivery Service," to strike out "$35,360,000" and insert "$35,160,000, of which amount $100,000 shall be immediately available," so as to read:

For pay of letter carriers at offices already established, including substitutes for letter carriers absent without pay, and for the promotion of 75 per cent of the letter carriers in first-class post offices from the fifth to the sixth grade and for the promotion of 75 per cent of the letter carriers in second-class offices from the fourth to the fifth grade, City Delivery Service, $35,160,000, of which amount $100,000 shall be immediately available.

Mr. BOURNE. Mr. President, I ask that the Senate disagree to the last part of the Senate amendment there—"of which amount $100,000 shall be immediately available"—because that will be taken care of in the deficiency bill. As I understand, the House has made provision for that in the deficiency bill.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. The Senator from Oregon moves to amend the committee amendment by striking out, in lines 16 and 17, page 16, the words "of which amount $100,000 shall be immediately available."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. BOURNE. I will ask the Senate also to disagree to the committee amendment that follows, where the words are stricken out in the print.

Mr. BRISTOW. Do I understand, Mr. President, that the Senator desires to recede from that?

Mr. BOURNE. Yes.

Mr. BRISTOW. It seems to me that is very unwise. That is the striking out of lines 18, 19, 20, 21, 22, and 23 on page 16.

Mr. BOURNE. No; what I meant was the striking out of lines 2 to 9, inclusive, on page 17, because of the Senate's disagreement to the previous provision.

Mr. BRISTOW. Oh, yes.

Mr. CURTIS. I understand that corresponds with the vote we had last night on the other amendment.

Mr. BRISTOW. Yes; that is all right.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 16 it is proposed to strike out the proviso in lines 17 to 23, both inclusive, as follows:

Provided, That after June 30, 1913, substitute letter carriers and substitute post-office clerks employed in first and second class post offices shall, when working for a carrier or clerk absent without pay, receive the rate of pay of the carrier or clerk in whose place the substitute is employed.

Mr. JONES. Mr. President, I think that amendment ought to be disagreed to. The provision of the House is that when a substitute letter carrier takes the place of a regular carrier who is absent without pay he shall receive the pay that the regular carrier would have received for that service. It seems to me that is reasonable and fair. When one man does another man's work he ought to receive that man's pay. That is all that is provided by the House provision.

The PRESIDENT pre tempore. The Chair understood the chairman of the committee to ask that that amendment should be disagreed to.

Mr. BOURNE. Mr. President, my attention was diverted. I did not intend to ask to have that amendment disagreed to. I should like to have the action of the Senate committee affirmed. If the Senator will pardon me, the reason the Senate committee recommended striking out the House provision was because frequently in the postal service a substitute will in one day take the place of two or three different men, drawing different salaries. If the House provision stood, it would be difficult, if not impossible, of administration; or at least, according to the statement of the department, it would make the keeping of the accounts very expensive and cumbersome. Upon

the presentation of the department's views the majority of the committee concurred. The First Assistant Postmaster General said that there were frequent instances where a substitute would take the place of two employees—a man, say, in the $900 grade and a man in the $1,300 grade. The enactment of the provision put in by the House would require accounting in the post office itself and also in the auditing department in Washington. The First Assistant Postmaster General said that, as far as the administrative branch of the Government was concerned, he would strongly favor increasing the compensation from 30 cents an hour to 40 cents an hour, rather than to try to administer the House provision if enacted into law.

Mr. JONES. Has the committee made any suggestion along that line, or any attempt to comply with that suggestion of the department?

Mr. BOURNE. They have not. They have left it at 30 cents per hour. It was an alternative, not a recommendation.

Mr. JONES. The department apparently recognized the injustice of requiring these substitutes to do the work of somebody else and take less pay.

Mr. BOURNE. No, Mr. President; I differ with the Senator from Washington in regard to that. It was not a recognition of injustice, but a statement as to the difficulty of administration, and the alternative that in preference to having that difficulty of administration they would prefer or recommend, and thought it would be better from a governmental standpoint, to increase the compensation from 30 cents to 40 cents per hour.

Mr. JONES. Does the Senator think it is fair to the man who does the work to keep his pay down solely because it makes a little difficulty of administration here in the city of Washington?

Mr. BOURNE. I think the first consideration in all legislation is as to the possibility of carrying out the provisions that may be put into law, the justice of the law itself, and the equities from the general standpoint of the Nation.

Mr. JONES. I think about the first consideration should be just and fair payment to the men who do the work.

Mr. BOURNE. Yes; but it must be put into such form that it can be administered.

Mr. JONES. They can certainly do it here. It simply means a little bit more work, possibly; that is all. It certainly can not be contended that they can not keep these accounts. A man one day does the work of a man who gets a certain pay, and the next day does the work, perhaps, of some other man who gets a little different pay. It certainly can not be contended that they can not keep the accounts satisfactorily.

Mr. BOURNE. That is not the contention.

Mr. JONES. It would make a little bit more work. It may be a little more difficult to do it.

Mr. BOURNE. And in all probability there would be far greater expense to the Government in keeping these accounts.

Mr. JONES. That may be true to some extent; but, nevertheless, it does not warrant us in requiring a man to do a certain kind of work and not paying him what he is entitled to for it.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Ohio?

Mr. JONES. Certainly.

Mr. POMERENE. I was going to suggest that records are kept in the several post offices of the time the regular carriers are off duty, and also of the time the substitutes work. That being so, it seems to me it would not add very much to the labors of the post offices to state the number of hours which a substitute has worked; and if he is doing the work of a regular carrier, why should he not be paid for it?

Mr. BOURNE. Replying to the first part of the Senator's statement, if a man does service for two regular employees during the day it requires a dual account, because he has to be paid on two bases. If he does work for three, each in a different grade, it requires a triple account with the regular carrier and with the substitute performing the service, in order to get the basis of compensation to which he is entitled.

Mr. POMERENE. It seems to me that it is only adding a little bit to the work of the postmaster; and if there are any officers that are overpaid it is the postmasters, because usually their work is done by the deputies.

Mr. BOURNE. Mr. President, all those accounts must be audited here in Washington, as well as by the local postmaster. It would require additional employees there and additional work in Washington.

Mr. POMERENE. Can the Senator state what would be the cost of this extra work in the department here in Washington—the work of keeping these extra accounts?

Mr. BOURNE. If I remember correctly, it was estimated by the department that it would cost $100,000 additional to operate under the House provision if it became law.

Mr. JONES. How are these substitutes paid now?

Mr. BOURNE. They are paid on the basis of 30 cents an hour.

Mr. JONES. Reports have to be made to the department here.

Mr. BOURNE. That is true, but the Senator does not get my point. If a man is paid on the basis of 30 cents an hour, it is fixed. If his time is divided up during the day, and he is also paid on a basis of 35 and 40 cents an hour, it makes three different schedules of payment and it requires triple work.

Mr. JONES. What would make the extra expense when that is set down? The report would simply include in it the salary paid to the man whose place was taken. I can not see where that would cause any great additional expense either here or at the local office.

Mr. BOURNE. I will read from the letter of the Postmaster General of January 21, 1913, to the committee. Referring to the section of the bill we have under consideration, the Postmaster General said:

PAY OF LETTER CARRIERS.

The bill as it passed the House contained the following:

"That after June 30, 1913, substitute letter carriers and substitute post-office clerks employed in first and second class post offices shall, when working for a carrier or clerk absent without pay, receive the rate of pay of the carrier or clerk in whose place the substitute is employed."

The department is very strongly opposed to the enactment of this provision, which would nullify the present law authorizing a uniform payment of 30 cents an hour for all kinds of substitute service. Under the proposed clause a substitute might receive three or four different rates of pay for work done on the same day, as he might be employed part of a day in place of a regular clerk or carrier whose salary is $800, then part of the day in place of another whose salary is $1,000, and then part of the day in place of one whose salary is $1,200. The provision is evidently based on the theory that the substitute actually performs the work of the absent employee. While in the case of the carrier this may be true, it is rarely so in the case of the clerk. For instance, if a superintendent of mails is absent from the office his place is filled by the assistant superintendent, the assistant superintendent's place by a foreman, and so on down the line, the substitute actually filling the place of a low-grade man; and under this provision his compensation would be at the rate of pay of the absent superintendent of mails, which might be a salary of $3,000 or more. If a substitute were employed during the absence of an expert distributor at $1,300, the distributor's work would be done by a man next in line for promotion, while the substitute, notwithstanding he was paid at the rate given an expert distributor, would be performing a lower grade of work. Furthermore, the proposed change from the present law would involve much bookeeping and a complicated system of accounting, both in the post offices and in the office of the Auditor for the Post Office Department. If it is the opinion of the committee that the present rate of pay (30 cents an hour) is not commensurate, it would be better to increase it rather than to adopt the system as provided in the bill.

Mr. JONES. The statements in the letter do not bear out the suggestion of the Senator from Oregon, because this section proposes that the substitute shall be paid only the salary of the man whose place he actually takes. If the superintendent is gone somebody in the rank below him takes the place. The substitute may be necessary by reason of the various temporary promotions, I may say. The substitute would not get the superintendent's salary, but he simply gets the salary of the man whose place he takes. So I do not consider that that is a good argument against the proposition.

The proposition that it will cost a little more in the way of keeping the accounts does not appeal to me at all. The substitute carriers and clerks must be practically as well fitted to do the work as the men whose places they take. They must pass the same examination; they must go through the same preparation; they must acquaint themselves with the character of the work that is to be performed in the same way, and hold themselves in readiness at all times for the place whenever it is necessary for them to fill it. The Government guarantees nothing to these men except work, whenever there is a vacancy, at 30 cents an hour.

I have here a statement prepared by the Substitute Letter Carriers' Association showing the compensation that is received by these substitutes, and I desire to call the attention of the Senate to some facts shown by the statement. For instance, the average earnings per month of a substitute carrier in Montgomery, Ala., who had a length of service of five years as a substitute, was $15 a month. It seems to me that the Government ought not to ask that men shall act as substitutes and make the preparation that is necessary to fill the place of the principal at a compensation of only $15 a month.

At Santa Cruz, Cal., $35 a month, with a possible service of four years as a substitute.

At Torrington, Conn., $7 a month, with a possible service as a substitute of four years.

At Meriden, Conn., $8 a month, with a possible service of 4 years and 10 months as a substitute.

And so on through this long list, which I will not take the time of the Senate to call its attention to, but I will ask permission to have it printed in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

Facts about the employment of substitute letter carriers.

	Average earnings per month.	Length of service as substitutes.
Montgomery, Ala	$15.00	5 years.
Santa Cruz, Cal	35.00	4 years.
San Jose, Cal	50.00	2 years 6 months.
Fort Collins, Colo	10.00	2 years.
Denver, Colo	40.00	2 years 10 months.
New Haven, Conn	35.00	5 years 8 months.
Stamford, Conn	27.50	4 years 4 months.
Torrington, Conn	7.00	4 years.
Danbury, Conn	11.00	3 years 9 months.
Meriden, Conn	8.00	4 years 10 months.
Wilmington, Del	31.00	4 years 2 months.
Washington, D. C	50.00	3 years.
Gainesville, Ga	20.00	1 year 9 months.
Kewanee, Ill	2.40	5 years.
Hoopeston, Ill	12.00	5 years.
South Bend, Ind	13.50	3 years 10 months.
Shelbyville, Ind	35.00	4 years 1 month.
Wabash, Ind	17.75	5 years 9 months.
Bluffton, Ind	7.50	4 years.
Auburn, Ind	3.00	5 years.
Boone, Iowa	31.00	5 years 6 months.
McPherson, Kans	3.00	6 years.
Kansas City, Kans	45.00	2 years 3 months.
Lexington, Ky	30.00	3 years.
Covington, Ky	22.00	3 years 7 months.

Mr. JONES. These statements show, to me at least, that these men ought to receive the compensation that the man receives whose place they take. With all the statements of the Post Office Department, I can not see any answer to the proposition that the man who does the work of another ought to receive that man's pay while he does it.

I hope that the Senate will disagree to the amendment of the committee.

The PRESIDENT pro tempore. The question is on the amendment reported by the committee, to strike out lines 17 to 23, inclusive. [Putting the question.] The noes appear to have it.

Mr. BRISTOW. Mr. President, I should like to have a division on the question. This is a very important matter. The department says the provision would be a very great inconvenience in administration and lead to a complication of accounts, not only in local post offices but in the department. It seems to me that the view of the Post Office Department, that has control of the accounts and can not be alleged to have any purpose except the best interests of the service, ought to have some weight with the Senate with regard to a provision of this kind, where it is a matter of administrative detail.

The PRESIDENT pro tempore. The Senator from Kansas demands a division.

Mr. TOWNSEND. Mr. President, some things that have been brought out in this debate have suggested to me that perhaps by disagreeing to the Senate amendment, and leaving the matter just as the House has provided, might work a comparative injustice to regular clerks. For instance, as soon as a substitute carrier or clerk is appointed to a regular position he receives the minimum salary of such clerk or carrier, which we have already fixed at $800 per year. Now, is it right to say that a substitute, at the very beginning of his work as a substitute, shall receive as much as the regular employee, who may have served from three to five years before getting a permanent position? Take another case: The substitute may temporarily perform the work of a $1,200 man, and under the House provision he would be entitled to pay while performing such work at the

rate of $1,200 per year, or at a rate per year of $400 more than he would receive after receiving a permanent appointment.

I ask permission of the Senate that this item may be passed over for the present with the hope that we may possibly decide upon and fix a sum in excess of 30 cents an hour, which would perhaps meet more justly the demands of the situation and not produce any inequality which might arise, and at the same time meet the seemingly valid objection to the House provision by the department.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Michigan that the item be temporarily passed over? The Chair hears none.

The Secretary resumed the reading of the bill at page 16, line 4.

The next amendment was, on page 17, line 2, after the word "hour," to strike out—

Every substitute carrier and substitute post-office clerk who has served as such substitute for a period of one year or more shall, when appointed to a regular position, receive the salary of a second-grade carrier or clerk, $800 per annum, as his initial salary, and all other promotions shall be regulated according to the classification act approved March 2, 1907.

Mr. BOURNE. I ask that the Senate disagree to the committee amendment because of the Senate's disagreement to the committee amendment on page 12, lines 7 to 19, inclusive. This will conform with the action taken by the Senate in a previous part of the bill.

The amendment was rejected.

The next amendment was, on page 17, line 12, after the word "established," to strike out "$2,285,000" and insert "$2,500,000, of which amount not exceeding $300,000 shall be immediately available," so as to make the clause read:

For pay of substitutes for letter carriers absent with pay, and of auxiliary and temporary letter carriers at offices where city delivery is already established, $2,500,000, of which amount not exceeding $300,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, on page 17, line 19, after the word "vehicles," to strike out "$1,530,000" and insert "$1,830,000, of which amount $250,000 shall be immediately available," so as to make the clause read:

For horse-hire allowance, the hiring of drivers, and the rental of vehicles, $1,830,000, of which amount $250,000 shall be immediately available.

Mr. BOURNE. I ask the Senate to disagree to that portion of the committee recommendation reading as follows:

Of which amount $250,000 shall be immediately available—

for the reason that that appropriation is covered, as I am informed, by the House in the deficiency appropriation bill.

The PRESIDENT pro tempore. The question will first be taken on that part of the amendment which proposes to strike out "$1,530,000" and insert "$1,830,000."

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is on agreeing to the second part of the amendment, to insert the words "of which amount $250,000 shall be immediately available."

The amendment was rejected.

The next amendment was, on page 17, line 21, after the word "allowance," to strike out "$450,000" and insert "$500,000," so as to make the clause read:

For car fare and bicycle allowance, $500,000.

The amendment was agreed to.

The next amendment was, on page 18, line 3, after the word "purchase," to insert "and exchange," so as to make the clause read:

For incidental expenses of the City Delivery Service, including freight and drayage on equipment, furniture, and supplies, and erecting, painting, and repairing letter and package boxes and posts, repairing clocks and other equipment, and for the purchase and exchange of time recorders and maps, $50,000.

The amendment was agreed to.

The next amendment was, on page 18, line 10, after the words "free-delivery service," to strike out "$150,000" and insert "$100,000," so as to make the clause read:

For experimental village-delivery service in towns and villages having post offices of the second or third class that are not by law now entitled to free-delivery service, $100,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Second Assistant Postmaster General," on page 18, line 23, after the words "power-boat routes," to strike out "$875,000" and insert "$910,000," so as to make the clause read:

For inland transportation by steamboat or other power-boat routes, $910,000.

The amendment was agreed to.

The next amendment was, on page 19, line 2, after "$962,200," to insert "*Provided*, That the personnel of the membership of the committees and commissions created and provided for in sections 1 and 8 of the act entitled 'An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes,' approved August 24, 1912, shall continue with the same authorities, powers, and provisions for expenses until final report is made to Congress," so as to make the clause read:

For the transmission of mail by pneumatic tubes or other similar devices, $962,200: *Provided*, That the personnel of the membership of the committees and commissions created and provided for in sections 1 and 8 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes," approved August 24, 1912, shall continue with the same authorities, powers, and provisions for expenses until final report is made to Congress.

Mr. TOWNSEND. The senior Senator from Colorado [Mr. GUGGENHEIM] handed to me an amendment. I have not had time to look it over to know whether it is in order now.

The PRESIDENT pro tempore. By agreement the committee amendments are now being considered. If it is an amendment to a committee amendment, it will be in order.

Mr. SMITH of Georgia. With reference to the amendment on page 19, after the word "Congress" in line 10, it has been suggested that perhaps it would be better to add:

Provided, That said report shall be made not later than December 1 next.

I should like to ask if that would not be satisfactory to the chairman of the committee?

Mr. BOURNE. I doubt very much if they would be able to complete all the work by December 1. Take the commission on second-class postage and railway-mail pay. They have been going into an investigation of the various questions regarding railway-mail pay and have not yet taken up second-class postage. I think if they complete the investigation of railway-mail pay during the present year and make a demonstration of that problem they will be doing very well.

Mr. SMITH of Georgia. I should like to suggest to the chairman of the committee that some time should be fixed. I am willing to leave it to his discretion, but I do not think we should pass it without any limitation at all. It has been the subject of some adverse criticism.

Mr. BRISTOW. Let me suggest that this does not carry any additional appropriation at all; it does not incur any additional expense. The appropriations have already been made, and it simply makes them available until the committees are ready to report. So it does not cost any more.

Mr. SMITH of Georgia. I think that explanation will probably be satisfactory to those who felt there should be a limitation upon the time of service.

Mr. BOURNE. The presumption is that the commission will complete their work and submit their report to Congress as soon as they possibly can.

Mr. SMITH of Georgia. I think that is undoubtedly true, but as a matter of legislation I think there ought to be a limitation of time in the legislation itself. It is a matter of general practice.

The amendment was agreed to.

The next amendment was, on page 20, line 15, after the words "For inland transportation by railroad routes," to strike out "$49,000,000" and insert "$51,500,000: *Provided*, That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., other than upon a mileage basis: *And provided further*, That the Postmaster General may, in his discretion, pay within the present law a fair and reasonable price for the special transfer and terminal service at the Union Station at East St. Louis, Ill., and at the Union Station at St. Louis, Mo., including the use, lighting, and heating of the mail building and transfer service at St. Louis, Mo., provided the amount so paid shall not exceed $20,000."

Mr. CULLOM. Mr. President I make the point of order that the proviso is general legislation.

Mr. BOURNE. Mr. President, I think this is clearly a limitation of an appropriation and in no way general legislation. In the last Post Office appropriation bill this provision was enacted after the appropriation was made:

Provided further, That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., other than upon a mileage basis.

That was in the last bill which became a law. The result of a disagreement to the recommendation of the Senate committee would be that the law of 1899, which gave the Postmaster General discretionary power to pay up to $50,000 for the use of the two bridges covered by the East St. Louis Terminal Co., un-

doubtedly, reasoning a priori, would result in the Government paying $50,000 to that company.

There has been a great deal of discussion over this particular feature of the bill. The committee had it under consideration one day for over three hours. Hearings were held last session when this limitation was put in the bill that became a law. The second proviso in the last year's bill reads as follows:

That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., other than upon a mileage basis: *And provided further*, That the Postmaster General may, in his discretion, pay within the present law a fair and reasonable price for the special transfer and terminal service at the Union Station at East St. Louis, Ill., and at the Union Station at St. Louis, Mo., including the use, lighting, and heating of the mail building and transfer service at St. Louis, Mo., provided the amount so paid shall not exceed $35,000.

The effect of a disagreement to the committee's recommendation would be that the Government undoubtedly would have to pay this terminal company $50,000. An agreement to the Senate committee's recommendation would be the placing of a limitation of $20,000.

At the last session Congress placed a limitation of $35,000. So, if the Senate disagrees to the committee recommendation, the result would undoubtedly be that the Government will pay the St. Louis Terminal Co. $50,000. There was a division of opinion in the committee. A majority of the committee were of the opinion——

Mr. SMITH of Georgia. Mr. President, does not the bill as it passed the House limit the payment to $35,000?

Mr. BOURNE. No; the bill as it comes from the House would undoubtedly recognize and restore the conditions existing under the law of 1899, which would give the Postmaster General the discretionary power of paying up to $50,000. As the Postmaster General has paid that limit heretofore, the assumption is that he will continue to pay up to that amount unless some action is taken by Congress.

Mr. BRYAN and Mr. SMITH of Georgia addressed the Chair.

The PRESIDENT pro tempore. The Senator from Georgia.

Mr. SMITH of Georgia. I yield to the Senator from Florida, who was on his feet first.

Mr. BRYAN. Mr. President, when this item was first discussed in the committee I, like many other members of the committee, was of the opinion that the amendment as it appears on page 20 operated to increase the appropriation and to pay to this terminal company $35,000, to which it would not be entitled but for the Senate committee amendment. Inasmuch as it is customary for terminal companies to be owned by corporations distinct from the railroads entering into a terminal station, because the railroad companies owning the terminal company usually form a separate corporation, I would be of the opinion that the pay to the St. Louis Terminal Association of $35,000 was in and of itself a palpable discrimination against every other terminal company in this country.

It was stated by the chairman of the committee that unless we incorporate this provision we will be forced to pay $50,000 under an act passed in 1890, which reads as follows:

That the Postmaster General is hereby authorized, in his discretion, to pay from appropriations for transportation by railroad routes for the special transfer and terminal service between the Union Station at East St. Louis, Ill., and the Union Station at St. Louis, Mo., including the use, lighting, and heating of mail buildings, and the transfer service at St. Louis, at the rate of not exceeding $50,000 per annum, beginning on the 1st day of July, 1899.

The PRESIDENT pro tempore. The Senator from Florida will permit the Chair to say that the question before the Senate is the point of order, on which the Chair is prepared to rule, but the Chair will hear the Senator on the point of order if he desires to discuss it.

Mr. BRYAN. I do not know how the Chair is going to rule, but I think in justice to the committee the reason that induced the committee to make this amendment ought to be stated. It is within the range of possibility that the Senate would not be satisfied with the ruling of the Chair. I will not detain the Senate more than a moment longer, and only to say that if this corporation is entitled to charge $50,000 under this special act of Congress, whereas it would only be entitled to receive between $10,000 and $15,000 upon a mileage basis, then every other terminal association entering into a large city is being discriminated against in every post-office bill we pass.

Mr. SMITH of Georgia. Mr. President, I only wanted to say one word with regard to the point of order. This is exactly the provision that was ruled in order on our last Post Office appropriation bill, and, as I recollect, by the present presiding officer, the only difference being in the amount, $20,000 instead of $35,000.

Mr. TOWNSEND. If the Senator will allow me, I think that the question arose as it arises here to-day. As I remember, last year the House changed existing law by providing for the payment of the amount of the appropriation on a mileage basis and reduced the amount provided in the general law to $35,000.

Mr. SMITH of Georgia. That was the House provision. It was put in just in this language by the Post Office Committee, with the exception that we put in $35,000 instead of $20,000. Not having the accurate figures before us as to how much the cost would be, we wanted to be sure that we named a sufficient amount.

Mr. TOWNSEND. I was not on the committee last year, but my recollection is that the law was changed in the House, and therefore a point of order would not lie against it in the Senate.

Mr. BOURNE. Mr. President, a clause in the House bill after the appropriation for inland transportation by railroad routes provided——

Mr. TOWNSEND. Last year?

Mr. BOURNE. Last year. It is as follows:

Provided, That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., over and above the regular rates for transportation of mail by railroad routes.

That was inserted on the floor of the House and not considered by the committee. When the bill came to the Senate and was referred to the Senate committee, a motion was made to strike out that proviso and to insert the $35,000 limitation. This was done after a series of hearings, at which the representatives of the East St. Louis Terminal Co. had an opportunity of appearing before the committee.

Mr. TOWNSEND. I think, Mr. President, that the Senator from Oregon has substantiated what I have said, namely, that the House last year changed existing law. I submit that if there had been no legislation on this subject in last year's appropriation bill there would now be no contention that this provision now would not be subject to the point of order, because it clearly would be new legislation; in other words, it would be changing the statute of 1899. The House last year made a change in the general law while the bill was pending before that body; it came here; a point of order was made against the provision reported by the Senate committee on the ground that it was new legislation. My understanding is—but Senators who were on the committee perhaps will remember better than I—that the point was overruled on the ground that the House having already inserted a proposition it was competent for the Senate to amend that provision. However, this year the identical item carried in last year's bill was stricken out in the House. The bill comes over here under existing law, namely, the law of 1899. It is now proposed to amend that law, which, I submit, is existing law, for the purposes of considering this question on this bill. That is my understanding of it.

Mr. BRYAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Michigan yield to the Senator from Florida?

Mr. TOWNSEND. I do.

Mr. BRYAN. I want to ask the Senator from Michigan if he does not consider that the Senate has a right on an appropriation bill to limit the purpose for which an appropriation made is to be used?

Mr. TOWNSEND. Of course it has.

Mr. BRYAN. Of course we could not undertake, and are not undertaking in this bill, to repeal the act of 1899 giving to this terminal association the right to be paid $50,000; but the sum total of our action would be that they can not have it out of this appropriation.

Mr. TOWNSEND. In further answer to the Senator from Florida, I will state that I have no doubt that the Senate could legislate in a way that would simply amount to a limitation; but if the law of 1899 is in force, this amendment that is proposed here does more than to limit it. It provides that this compensation shall be made on a mileage basis. The law of 1899 does not provide any such thing as that.

The second provision, limiting the discretion of the Postmaster General to $20,000 instead of $50,000, evidently would not be subject to a point of order; but the first provision, changing the statute so as to make it apply the appropriation to a mileage basis is a change in the existing law.

Mr. SMITH of Georgia. For one, I think the first part of this provision changes existing law.

Mr. TOWNSEND. If the law of 1899 is in force, I think it does.

Mr. SMITH of Georgia. If the first part of this provision changes existing law, then, Mr. President, I desire to ask the Senator if, when we inserted it a year ago, we did not change existing law by that insertion, and if, therefore, his position be true, the law is not now just what it is in this provision?

Mr. TOWNSEND. I contend, Mr. President, that you do not change permanent law by a provision on an appropriation bill. Such a provision only lasts for the current year and affects only that particular appropriation. The House of Representatives departed from the provision in the appropriation bill of last year and went back to the law of 1899, and that is the form in which the bill comes here to-day.

Mr. SMITH of Georgia. Mr. President, I merely want to say one word upon this point in addition to what has been said.

Either this provision is simply a limitation of the use of the present appropriation and, therefore, changes no existing law and is pertinent to the appropriation and legally placed here, or it does change existing law. If it could change an existing law, exactly the same language was used in the last appropriation bill, and the existing law, to which the Senator from Michigan refers, has already been changed. In point of fact, I do not think the legislation a year ago changed the existing law, and I do not think that this provision does. It simply follows existing law, for, as I have said, the same words were in the appropriation bill a year ago. So, Mr. President, we insist beyond any question that this language only limits the use of this present appropriation.

Mr. BRADLEY. Mr. President, I want to make a single suggestion. It has already been stated that when this bill was passed at the last session this amendment had been placed in the bill in the other House. Having come to the Senate, it was therefore held that a point of order could not be made. So far as the law was concerned which was adopted one year ago, or at the last session, it applied only to the fiscal year. It was a change of the existing law, it is true, for one year; but at the end of one year the change ceased and the existing law was revived. The object of this amendment, as I understand, is to change an existing law by an amendment in the Senate. It does not come from the House in that shape.

The PRESIDENT pro tempore. Upon a preliminary examination of the bill, the Chair discovered the language "upon a mileage basis," and, assuming that that was new language, was clearly of opinion that a point of order would lie, but since that time the Chair has examined the act of last year and has discovered the fact that the language is identical with the language in last year's act. That changes the matter very materially. The law of last year is still in existence; and, looking the matter over with a great deal of care, the Chair is impressed with the view that the language not having been changed from the law of last year, and the further fact that this is intended as a limitation of the appropriation, he therefore is constrained to overrule the point of order. The question is upon the amendment.

Mr. ASHURST. Mr. President, are we discussing clause 76 of the bill?

The PRESIDENT pro tempore. The matter under discussion is the amendment on page 20, beginning on line 15.

Mr. ASHURST. Mr. President, I should like to inquire of the Senator in charge of the bill the reason for the enormous increase over last year in the moneys to be paid to the railroads for carrying the mails?

The PRESIDENT pro tempore. The Chair will suggest that that amendment has been agreed to.

Mr. ASHURST. I should like to recur to it, if there be no objection.

The PRESIDENT pro tempore. Will the Senator permit the Chair to put the question on the pending amendment, which is the language following that?

Mr. ASHURST. Certainly.

The amendment was agreed to.

The PRESIDENT pro tempore. Now the Senator may address himself to the other amendment.

Mr. ASHURST. Mr. President, recurring to page 20, paragraph 76, I find to my astonishment that there is an increase from $49,000,000 to $51,500,000 to pay for inland transportation on railroad routes. I have received much literature from the "down-trodden" railroads of the country stating that they are insufficiently paid for the transportation of the mail. I believe, however, that I can demonstrate in a moment to the satisfaction of the Senate that the railroad companies instead of being underpaid for the transportation of the mails are overpaid. These railroad companies while pretending to be underpaid are overpaid for transporting the mails. The table which I hold in my hand gives a comparison of the railroad rates for carrying mail, freight, and express. I request the Secretary to read the table of figures which I send to the desk.

The PRESIDENT pro tempore. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

THE RAILWAY POSTAL GRAFT.

The following table, giving a comparison of the railroad rates for carrying mail, freight, and express, was prepared by Prof. Henry C. Adams, statistican of the United States Postal Commission (generally known as the Wolcott Commission). Some revisions have since been made (1907), but they are too slight to affect the disparity in charges here shown:

New York City to Buffalo, 440 miles:	
1 ton mail	$31.67
1 ton freight	7.80
1 ton express	12.50
100 pounds mail	1.58
100 pounds freight	.39
100 pounds express	.63
New York City to Chicago, 1,000 miles:	
1 ton mail	$71.59
1 ton freight	15.00
1 ton express	25.00
New York City to San Francisco, via New York Central, Lake Shore, Chicago, Burlington and Quincy, Union Pacific, and the Southern Pacific:	
1 ton mail	$265.53
1 ton freight	60.00
1 ton express	135.00
100 pounds mail	15.28
100 pounds freight	3.60
100 pounds express	6.75

The railroad rate for mail, however, is much higher than shown in the foregoing table. The Government is cheated in the weighing of the mails, and is charged exorbitant rent for the use of the mail cars. In 1911 the Government paid an average rental of $3,575.10 for each postal car. The average original cost of a wooden mail car is between $6,500 and $7,000. Taking all this into consideration, the cost of carrying mail is probably eight or nine times the cost of carrying express matter.

Mr. ASHURST. Mr. President, being impressed with the injustice perpetrated by some mail-carrying railroads, I made an investigation. I do not know that I could more succinctly state my conclusions and findings with respect to that investigation than by reading what I said, upon the occasion of my election to the Senate, in my address to both houses of the Legislature of the State of Arizona. I read from that address as follows:

THE GOVERNMENT COULD SAVE MILLIONS BY USING ITS OWN POSTAL CARS.

The United States pays each year to the railroads $4,800,000 for rent of postal cars with which to carry the mails, and the railroads usually furnish wooden cars that "telescope" during wrecks and kill or maim the underpaid and overworked postal clerks. Remember that this $4,800,000 paid to the railroad companies each year as rental for the post-office cars is in addition to the $46,000,000 paid each year to the railroad companies for carrying the mails. Consider for a moment what an enormous sum of money could be saved to the Government if it would build its own cars.

The most expensive car, all steel, costs $12,000 and its average life is 25 years, so that with this $4,800,000 which the Government pays the railroads each year for the rent of cars we could build 400 steel cars annually.

The sum of money, aggregating $46,000,000 annually—

That was the amount when these figures were prepared by me. Now it is proposed to increase the amount to the sum of $51,500,000—

for carrying mail, is reached because railroads charge the United States 4½ cents per pound for carrying mail matter, but the railroads carry the express matter for express companies at three-fourths of a cent per pound. Such robbery of the Government must not be permitted to continue.

Therefore, Mr. President, I am prompted, in view of my knowledge of these facts, to inquire the reason for the increase, as indicated on page 20 of this bill, from $49,000,000 to $51,500,000 for the transportation of the mails, when the pay received by the railroad companies for transporting the mails is about two and one-half times greater than the compensation they receive for transporting express matter; and, in addition, the Government pays for the rent of the postal cars?

Mr. BOURNE. Has the Senator completed his inquiry?

Mr. ASHURST. I have.

Mr. BOURNE. The average increase in postal receipts and postal expenses is about 7 per cent per annum, according to the tables of the last 10 years. That is the normal growth of our postal service. The appropriations for railway mail pay are based upon estimates to comply with existing law. The estimate of the department is much higher than the appropriation recommended by the Senate committee. The House bill proposes to appropriate $49,000,000. Last year Congress appropriated $47,647,000.

Mr. ASHURST. May I interrupt the Senator just long enough to ask a question?

Mr. BOURNE. Certainly.

Mr. ASHURST. Is it not true that the railroad companies receive two or three times more from the Government for carrying the mails than they do from the express companies for carrying express matter?

Mr. BOURNE. In my opinion, most certainly not. In my opinion, and I am simply stating my own personal opinion——

Mr. ASHURST. I have a high regard for the Senator's opinion.

Mr. BOURNE. There exists a gross misapprehension on the question of overpayment to the railroads in the way of railway-mail pay. In my opinion—not yet a conviction, but an opinion—a misapprehension also exists in reference to the desirability of Government ownership and operation of railway post-office cars. Postmaster General Vilas, in 1887, made a statement in his report which, I assume, led the American people to the conviction that it would be cheaper for the Government to own and operate the railway post-office cars, and that they would save inferentially, according to his presentation, a million dollars and a half over the annual appropriations made for the railway post-office car service. Under the last Post Office appropriation bill a joint committee was created to investigate and report to Congress in reference to railway-mail pay and second-class postage. That committee, of which I am a member, has held a number of hearings, and in the testimony before the committee, under oath, a number of railroad representatives have stated that they receive less pay for carrying the mail than they receive for passenger service or express service. The committee has not yet concluded its investigations or formed its conclusions. I am satisfied, however, that the problem can be solved, and that the facts can be demonstrated clearly to the satisfaction of every Member of Congress and to the edification and education of the American people on those points.

Mr. ASHURST. Mr. President, do I understand the Senator to say that some gentlemen appearing before the commission testified that they receive no larger sum of money for carrying the mails than they receive for carrying express matter?

Mr. BOURNE. That they received less.

Mr. ASHURST. For carrying the mail?

Mr. BOURNE. For carrying the mail than they received for passenger service or express service, and, as I have said, they made that statement under oath. That is their testimony.

I will say, for the information of the Senator from Arizona, that I believe the problem will be solved and the facts will be clearly demonstrated. My own opinion is that the public are greatly mistaken in their judgment, based on the report of Postmaster General Vilas, in 1887, and on what is known as Document 105, in which the Postmaster General, in his suggestion of the plan of the department of the substitution of space for weight as the measure of the service rendered, leaves the reader to infer that we are overpaying the railroads $9,000,000.

Mr. ASHURST. Mr. President, I am glad I asked the question, because the Senator has courteously and very clearly stated his opinion. In asking the question I am not in any manner criticizing the committee nor the honorable Senator from Oregon, whose services to the public, in my judgment, are probably not appreciated as much as they should be. I am glad to have him give me this explanation, but if some gentlemen have testified before his committee or before any committee that the railroads do not receive more for carrying the mails than they do for carrying express matter, I am shocked. I will not characterize such testimony further, but I believe it is common knowledge——

Mr. BOURNE. Common opinion, I think.

Mr. ASHURST. Common opinion—I beg the Senator's pardon—common opinion based on fact—that the railroad companies do receive much more money for carrying the mails than they do for carrying express matter.

The reading of the bill was resumed.

The next amendment of the Committee on Post Offices and Post Roads was, on page 21, beginning in line 1, to insert the following proviso:

Provided further, That on account of the increased weight of mails resulting from the establishment of the parcel post the Postmaster General is authorized and directed to weigh the mails on railroad routes, beginning September 1, 1913, for not less than 30 successive working days, and to readjust compensation from the date of the commencement of said weighing at not exceeding the rates provided by law: *Provided further*, That from the commencement of said weighing the transportation of second-class matter in fast freight trains and the manner of handling incident thereto shall be discontinued, and thereafter said mail shall be carried in the regular mail trains, and compensation allowed therefor, the purpose being to reestablish the system in vogue prior to the establishment of the blue-tag system.

Mr. ASHURST. Mr. President, I observe in this amendment a change in the law in respect to weighing the mails. I had hoped that if there was to be a change in the present law as to mail weighing it would be done in some way that would not permit the railroad companies to ascertain in advance the date of the weighing, for the reason that in some instances in the past various railroad companies, being aware of the date upon which the mails were to be weighed, are alleged to have caused the mails at that particular time to be laden far beyond their ordinary volume, to the end that the average weight might be increased. I insist, therefore, that the law should provide for a weighing to take place upon a date and at a time of which the railroad companies have no previous notice. In one of our Western States, as has been suggested by a western Senator, a railroad increased the weight on one of the mail routes to the capacity of a carload in order that the additional weight might be thrown into the scales to increase the general average. I suggest that if there is to be a change in the system of weighing the railroad companies ought not to know in advance the date of such weighing.

Mr. BOURNE. Mr. President, I should like to ask the Senator how that could be done?

Mr. ASHURST. Well, the weighing should be done upon some date or dates known to the department and unknown to the railroad companies. The department can send its officers and its agents to the proper places and there do the weighing upon different days, of which previous notice has not been given to the railroad companies.

Mr. BOURNE. May I interrupt the Senator?

Mr. ASHURST. Certainly.

Mr. BOURNE. Did I correctly understand the Senator to say that of his knowledge there were instances where, during the weighing period, the mails had been packed?

Mr. ASHURST. Not to my personal knowledge.

Mr. BOURNE. I was wondering, if that was the case, whether the Senator had informed the Department of Justice, in order that the individuals who were party to such a conspiracy against the Government might be criminally prosecuted.

Mr. ASHURST. If the Senator from Arizona had known of his own knowledge of any such occurrence or any other criminal occurrence, he would not decline to give the testimony to the proper officer.

The PRESIDENT pro tempore. The question is on agreeing to the amendment. [Putting the question.]

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. The ayes seem to have it. The ayes have it; and the amendment is agreed to.

Mr. BACON. Mr. President, several Senators addressed the Chair. My colleague did so before the Chair put the question.

The PRESIDENT pro tempore. The Chair had not observed that fact.

Mr. SMITH of Georgia. I did not rise, Mr. President.

The PRESIDENT pro tempore. There were not "several Senators," or the Chair would have discovered that fact.

Mr. BACON. I do not wish to be understood as criticizing the Chair. Evidently the Chair did not hear them.

The PRESIDENT pro tempore. The Chair will recognize the Senator.

Mr. BACON. I think my colleague desired to say something on the subject; and if he does not, I myself desire to say something.

Mr. SMITH of Georgia. I desire to ask, Mr. President, that the exact provision we are now voting upon be again stated by the Secretary.

The Secretary again stated the amendment.

Mr. THOMAS. Mr. President, I merely wish to say to the Senator from Oregon that the instance of overweight referred to by the Senator from Arizona [Mr. ASHURST] was a matter which was called to my attention some 14 years ago, and I spoke to the Senator about it this morning for the first time.

Mr. BOURNE. Fourteen years ago?

Mr. THOMAS. Yes. It occurred a long time ago, but in our hurried conversation I did not have the opportunity, or at least I did not avail myself of it, of going into particulars.

While I am on my feet I wish to ask the Senator from Oregon whether the statement that the railway companies receive less for carrying the mails than for carrying express and passengers includes their percentage of the profits of the express business?

Mr. BOURNE. In their method of presentation and statements, I will say yes.

As I say, the joint committee have come to no conclusions whatever. They are studying the problem now. I simply stated my own personal opinion about it—that the problem can be solved and clearly demonstrated, and the American people informed as to the actual facts, which I know the Senator will agree with me in saying is highly desirable.

Mr. THOMAS. The Senator, of course, is well acquainted and thoroughly familiar with all of these details. I know none of them; but for information I should like to inquire further whether the Senator has any knowledge as to the percentage of profits paid to the railroad companies out of the profits of the express companies?

Mr. BOURNE. I can not answer that question, Mr. President. That matter has been under consideration by the Interstate Commerce Commission for a period of over three years. They came to their conclusions in reference to rates for the express companies, and made suggestions, but the recommended rates have not yet gone into effect. The matter is in process of determination. But I should like to say to the Senator, answering the inquiry to the Senator from Arizona in reference to the increase, that the increase made by the committee is some $7,000,000 less than the increase asked by the department. If the department is right in its opinion, there will be a deficit under the railway-mail pay of a number of million dollars next year, and the matter will come up before the Appropriations Committee for a deficiency appropriation.

The Senator will remember that on the 1st of January, fourth-class mail matter was extended by the parcel-post legislation.

Mr. THOMAS. I will say now that I think the country owes a great deal to the distinguished Senator from Oregon for that very efficient legislation.

Mr. BOURNE. The department believes that the appropriation for railway-mail pay should be increased $9,000,000 because of the increased weight the transportation companies will have to carry on account of the increased business in fourth-class mail matter, due to what is known as the parcel-post legislation. I figure that probably there will be a million and a half dollars of increased compensation on account of the increase in weight.

In other words, my estimate as to the increase of fourth-class mail matter resulting from the parcel-post legislation does not agree with the department's estimate. They estimate $9,000,000 and I estimate about a million and a half dollars. We have increased the appropriation here two and a half million dollars over the House provision, $500,000 of which is to provide for the special weighing, which I am sure the Senator from Arizona will agree is just and right and something to which the transportation companies are entitled, in view of the fact that Congress put upon them an increased burden going into operation the 1st of January. Certainly it is the duty of Congress to reach an early determination as to what that burden is, and give reasonable compensation for the increased burden put by Congress upon the transportation companies of the country.

The special weighing is provided for the 1st of September. Under the provision as recommended, if agreed to by Congress, the railroads will receive no compensation whatever from the 1st of January to the 1st of September for the increased amount of fourth-class mail matter. From the 1st of September on, however, they will receive compensation, in accordance with the present laws and methods of adjustment, upon the weight ascertained in the special weighing provided for in the recommendation of the committee.

Mr. SMITH of Georgia. Mr. President, I think it is due to the incoming administration that the estimate of the department of the increased expense which this provision on page 21 will place upon the Post Office Department should be fully presented.

The estimate of the department is that with the appropriation now provided in the bill, in view of this paragraph, if it is adopted, there will be a deficit of $8,018,000. That is made up in this way: First, an estimated increase in compensation, on account of increase in weight of regular mails since last weighing in the contract sections, of $3,861,000.

The mail contracts run over a period of years after each weighing. The price paid contemplates covering the increase of mail matter. It is more at first than it otherwise would be, because with the lapse of time and the growth of the mails it is supposed that more mail matter will be carried by the end of the contract than was carried at the time of the weighing. For us now to reweigh, in the opinion of the department, will cause an increase of $3,861,000 in the price of our existing contracts.

The department also estimates that there will be an increase by reason of the parcel post of $4,011,000, an estimated cost of 35 days' weighing and tabulation of $500,000, and an estimated increase in compensation by reason of the return of "blue-tag" mail to the regular mail trains of $1,485,000, making a total of $9,857,000. The increase provided by the Senate amendment is $1,839,000, leaving, therefore, according to the estimate of the department, a deficit of $8,018,000 if this provision becomes a law.

I have no fixed conviction with reference to the prices which we pay the railroads for carrying the mails. I do not know whether or not they are excessive. I have not had an opportunity to make such an investigation as would justify a conclusion. I have entertained the popular impression that we were paying excessive prices, but impressions, of course, are not reliable. I trust we shall obtain from the commission which has been provided for, and which is in existence, that accurate knowledge which will justify us either in demanding a reduction of the charges or else in going to the public and saying that they are mistaken and that the charges are just. If they are excessive, we ought to reduce them. If they are just, the popular impression that they are excessive should be removed.

I sympathize somewhat with the suggestion of the Senator from Arizona [Mr. ASHURST] that it is not best in this bill to name the time when this weighing is to take place. It seems to me we could very well leave that to the department. For that reason, if we should strike out, in the third line, the words "and directed," and also, in the fourth and fifth lines, "beginning September 1, 1913," and leave it to read:

The Postmaster General is authorized to weigh the mails on railroad routes for not less than 30 successive working days—

We would leave some discretion in the department as to when this weighing should take place, and I think it would improve our amendment.

Mr. BOURNE. I am perfectly willing to accept the suggestion of the Senator.

The PRESIDENT pro tempore. The amendment submitted by the Senator from Georgia to the amendment of the committee will be stated.

Mr. SMITH of Georgia. My amendment is, in line 3, to strike out the two words "and directed," and in lines 4 and 5 to strike out the words "beginning"——

Mr. BOURNE. Oh, I did not understand the Senator to say he wished to strike out the words "and directed."

Mr. SMITH of Georgia. That would leave him authorized to do it.

Mr. BOURNE. I think he should be directed to do it. I think it is the duty of Congress, and I do not think we have any right, or that it is desirable, for us to leave to the head of a department a matter that is purely and admittedly a function of Congress.

Mr. SMITH of Georgia. Then, first, I will offer the amendment to strike out, in lines 4 and 5, the words "beginning September 1, 1913."

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from Georgia.

The SECRETARY. In the committee amendment, on page 21, lines 4 and 5, it is proposed to strike out the words "beginning September 1, 1913."

The amendment to the amendment was agreed to.

Mr. BOURNE. Will not that leave it imperfect? Would it not be necessary to insert some substitute for the language stricken out?

Mr. SMITH of Georgia. No; it would leave it directing the department to weigh the mails and would leave the time when they were to be weighed still to be fixed by the department.

Mr. BOURNE. Should we not say that it shall be done in the fall? In other words, Congress and not the department has put upon the transportation companies this burden in the way of increased weight, due to increased mail matter.

Mr. SMITH of Georgia. How would it do to say "within the next 12 months"?

Mr. BOURNE. I think it should be done in the fall.

The PRESIDENT pro tempore. The question is upon the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Post Offices and Post Roads was, on page 22, line 2, before the word "each," to strike out "$3,000" and insert "$3,500"; in line 3, before the word "each," to strike out "$2,200" and insert "$2,500"; in line 4, before the word "each," to strike out "$2,000" and insert "$2,500"; in line 6, before the word "clerks," to strike out "three hundred and twelve" and insert "thirty-two"; in line 8, before the word "clerks," to strike out "one thousand three hundred and sixty-six" and insert "three hundred and four"; in line 10, before the word "clerks," to strike out "three hundred and two" and insert "one thousand five hundred and twenty-seven"; in line 12, before the word "clerks," to strike out "two thousand nine hundred and thirty-four" and insert "one thousand one hundred and sixty-eight"; in line 14, before the word "clerks," to strike out "two thousand three hundred and eighteen" and insert "four thousand two hundred and one"; in line 20, before the word "hundred," to strike out "six" and insert "eight"; in line 21, before the word "hundred," to strike out "seven" and insert "nine"; in line 22, after the words "in all," to strike out "$24,826,000", and insert "$24,755,850"; and the appointment and assignment of clerks hereunder shall be so made during the fiscal year as not to involve a greater aggregate expenditure than this sum"; on page 23, line 2, after the word "clerks," to insert "and make necessary appointments and promotions," and in line 6, after the word "exceeded," to insert "*Provided further*, That hereafter the Postmaster Gen-

eral may, in his discretion, under such regulations as he may provide, allow any railway postal clerk who is not entitled to annual leave under other provision of law leave of absence with pay for a period not exceeding 30 days, with the understanding that his duties will be performed without expense to the Government during the period for which leave is granted, he to provide a substitute at his own expense," so as to make the clause read:

Railway Mail Service: For 15 division superintendents, at $3,500 each; 4 assistant superintendents, at $2,500 each; 15 assistant division superintendents, at $2,500 each; 112 chief clerks, at not exceeding $2,000 each; 32 clerks, grade 10, at not exceeding $1,800 each; 304 clerks, grade 9, at not exceeding $1,700 each; 1,527 clerks, grade 8, at not exceeding $1,600 each; 1,168 clerks, grade 7, at not exceeding $1,500 each; 4,201 clerks, grade 6, at not exceeding $1,400 each; 5,292 clerks, grade 5, at not exceeding $1,300 each; 3,656 clerks, grade 4, at not exceeding $1,200 each; 405 clerks, grade 3, at not exceeding $1,100 each; 1,895 clerks, grade 2, at not exceeding $1,000 each; 1,950 clerks, grade 1, at not exceeding $900 each; in all, $24,755,850; and the appointment and assignment of clerks hereunder shall be so made during the fiscal year as not to involve a greater aggregate expenditure than this sum; and, to enable the Postmaster General to reclassify the salaries of railway postal clerks and make necessary appointments and promotions, he may exceed the number of clerks in such of the grades as may be necessary: *Provided*, That the number of clerks in the aggregate as herein authorized be not exceeded: *Provided further*, That hereafter the Postmaster General may, in his discretion, under such regulations as he may provide, allow any railway postal clerk who is not entitled to annual leave under other provision of law leave of absence with pay for a period not exceeding 30 days, with the understanding that his duties will be performed without expense to the Government during the period for which leave is granted, he to provide a substitute at his own expense.

The amendment was agreed to.

The next amendment was on page 24, after line 13, to strike out:

For rent, light, fuel, telegraph, miscellaneous and office expenses, schedules of mail trains, telephone service, and badges for railway postal clerks, $80,000, including rental of offices for division headquarters, and chief clerk Railway Mail Service, in Washington, D. C.

The amendment was agreed to.

The next amendment was, on page 24, after line 18, to insert:

For rent, light, fuel, telegraph, miscellaneous and office expenses, schedules of mail trains, telephone service, badges for railway postal clerks, including rental of offices for division headquarters, and chief clerks, Railway Mail Service, in Washington, D. C., and rental of space in railroad stations or elsewhere for terminal railway post offices for distribution of mails when the furnishing of space for such distribution can not under the postal laws and regulations properly be required of railroad companies without additional compensation, and for rental of railway post-office cars placed at railroad stations and used as terminal railway post offices when the cars are needed for such purpose 12 or more consecutive hours, $280,000, of which $50,000 shall be immediately available: *Provided*, That the Postmaster General may hereafter make leases for terminal railway post offices other than in railway post-office cars for terms not exceeding 10 years.

The amendment was agreed to.

The next amendment was, on page 25, line 11, after the word "allowance," to insert "covering actual expenses"; in line 14, after the word "headquarters," to strike out "at a rate to be fixed by the Postmaster General"; in line 15, after the word "exceed," to strike out "$3" and insert "$4"; in the same line, after the words "per day," to insert "$5,108"; and in line 17, after the words "in all," to strike out "$4,531" and insert "$5,808," so as to make the clause read:

For per diem allowance covering actual expenses of four assistant superintendents while actually traveling on official business away from their home, their official domicile, and their headquarters, not to exceed $4 per day, $5,108, and for their necessary official expenses not covered by their per diem allowance, not exceeding $700; in all, $5,808.

The amendment was agreed to.

The next amendment was, on page 25, line 18, after the words "cable cars," to strike out "$800,000" and insert "$847,400," so as to read:

For inland transportation of mail by electric and cable cars, $847,400.

The amendment was agreed to.

The next amendment was, on page 26, line 19, before the word "service," to strike out "seaboard" and insert "seapost"; in the same line before the word "steamships," to strike out "of" and insert "on"; in line 22, after the word "piers," to strike out "and"; in line 24, after the word "for," to strike out "transporting" and insert "transferring"; in the same line, after the word "foreign," to strike out "mails" and insert "mail"; and, on page 27, line 3, before the word "acting," to insert "hereafter," so as to make the clause read:

For transportation of foreign mails, $3,900,000: *Provided*, That the Postmaster General shall be authorized to expend such sums as may be necessary, not exceeding $112,800, to cover the cost to the United States of maintaining sea-post service on steamships conveying the mails, and not exceeding $88,100 for transferring the foreign mail from incoming steamships in New York Bay to the steamship and railway piers, for transferring the foreign mail from incoming steamships in San Francisco Bay to the piers, and for transferring the foreign mail from incoming steamships at Honolulu from quarantine to the piers; also for transferring the mail from steamships performing service under contract for transporting United States mail: *Provided*, That hereafter acting clerks may be employed in place of clerks or substitutes injured while on duty who shall be granted leave of absence with full pay during the period of disability, but not exceeding one year, then at the rate of 50 per cent of the clerk's annual salary for the period of disability exceeding one year but not exceeding 12 months additional, and that the Postmaster General may pay the sum of $2,000, which shall be exempt from payment of debts of the deceased, to the legal representative of any sea-post clerk or substitute sea-post clerk who shall be killed while on duty, or who, being injured while on duty, shall die within one year thereafter as the result of such injury.

The amendment was agreed to.

The next amendment was under the subhead "Office of the Third Assistant Postmaster General," on page 27, line 23, after the word "stamps," to strike out "$800,000" and insert "$822,000," so as to make the clause read:

For manufacture of adhesive postage stamps, special-delivery stamps, books of stamps, and for coiling of stamps, $822,000.

The amendment was agreed to.

The next amendment was, on page 28, line 2, after the word "wrappers," to strike out "$1,500,000" and insert "$1,664,000," so as to make the clause read:

For the manufacture of stamped envelopes and newspaper wrappers, $1,664,000.

The amendment was agreed to.

The next amendment was, on page 28, line 4, before the word "envelopes," to insert "and official," so as to make the clause read:

For pay of agent and assistants to examine and distribute stamped and official envelopes and newspaper wrappers, and expenses of agency at Dayton, Ohio, $22,800.

The amendment was agreed to.

The next amendment was, on page 28, line 6, after the words "postal cards," to strike out "$300,000" and insert "$335,000," so as to make the clause read:

For manufacture of postal cards, $335,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 7, to strike out:

For payment of limited indemnity for the loss of pieces of domestic registered matter, first, third, and fourth classes, $60,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 10, to strike out:

For payment of limited indemnity for the loss of registered articles in the international mails, in accordance with convention stipulations, $20,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 13, to insert:

For payment of limited indemnity for the loss of registered and insured mail, domestic and international, the payment of international indemnity to be made in accordance with convention stipulations, $100,000: *Provided*, That all unexpended balances to the credit of existing appropriations for indemnity for lost registered mail, either domestic or international, irrespective of the fiscal years for which such appropriations were made, together with all moneys in the hands of officers and agents of the Post Office Department, and all moneys which shall hereafter be recovered, collected, or received from any source whatever on account of lost registered and insured mail, either foreign or domestic, shall be deposited in the Treasury of the United States to the credit of the service of the Post Office Department, to constitute a continuous reimbursable appropriation, to be denominated "indemnity for lost registered and insured mail." All appropriations for the payment of indemnity for the loss of registered and insured mail, either foreign or domestic, and all moneys deposited as herein provided, shall be available until expended, without regard to fiscal years, for payment of indemnity for lost registered and insured mail, either foreign or domestic, and for the reimbursement to the owners of moneys collected in excess of the amount of indemnity or insurance provided, and to which they are entitled.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Fourth Assistant Postmaster General," on page 30, line 3, after the words "registry system," to strike out "$4,500" and insert "$6,500," so as to make the clause read:

For blanks, books, and printed matter of urgent or special character, including the preparation, publication, and free distribution by postmasters to the public of a pamphlet containing general postal information, intaglio seals, and other miscellaneous items of immediate necessity for the registry system, $6,500.

The amendment was agreed to.

The next amendment was, on page 30, line 24, before the word "miscellaneous," to insert "of," so as to make the clause read:

For the purchase, exchange, and repair of typewriting machines, envelope-opening machines, computing machines, copying presses, numbering machines, and of miscellaneous articles purchased and furnished directly to the postal service, $80,000.

The amendment was agreed to.

The next amendment was, on page 31, line 5, before the word "furniture," to strike out "and," and, in the same line, after the word "furniture," to insert "and map supplies," so as to make the clause read:

Supplies for the Rural Delivery Service, including collection boxes, furniture, satchels, straps, map supplies, repairing satchels, furniture and map supplies, repairing, erecting, and painting collection boxes in the Rural Delivery Service, $50,000.

The amendment was agreed to.

The next amendment was, on page 31, line 10, before the word "laborers," to strike out "three" and insert "six," and, in line 11, after the word "therewith," to strike out "$120,000" and insert "$135,000," so as to make the clause read:

To defray expenses incident to the shipment of supplies, including hardware, boxing, packing, cartage, freight, and the pay of 1 carpenter and 6 laborers for assignment in connection therewith, $135,000.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. PENROSE. Mr. President, I desire to offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 32, the last page in the bill, after line 6, it is proposed to insert:

That after the passage of this act employees in the postal service who have become incapacitated through superannuation shall be granted an indefinite leave of absence under the following conditions: *Provided*, That an employee in the postal service who has served for a period of 25 years or more can be recommended by the postmaster of the city in which he is employed for indefinite leave of absence to the Postmaster General under the following conditions: An employee who has become incapacitated from performing his duties through superannuation shall appear before a board of examiners appointed by the Postmaster General, who shall serve without compensation with the exception of a physician, who must examine the applicant and make minute inquiry into his physical and mental condition, and make a report of their findings to the Postmaster General. If the application for indefinite leave of absence is recommended by the board of examiners and approved by the Postmaster General, the applicant shall be granted an extended leave of absence, together with an allowance of $600 per annum. This allowance shall be divided pro rata into equal daily installments and shall be payable monthly. If it is found necessary to employ a substitute to fill the place of the employee who has been granted an extended leave of absence, said substitute shall be paid at the rate of $600 per annum: *Provided, however*, That this will in no way interfere with the substitute's promotion provided a vacancy in the regular force occurs and said substitute is in line of promotion by virtue of his standing on the substitute list: *Provided further*, That the Postmaster General can order an employee who is on an extended leave of absence to report for duty at the office in which he was last employed during seasons of the year when the mail is extraordinarily heavy and the services of the employee could be utilized to good advantage: *Provided further*, That in the event of an employee being required to perform duty during such emergency periods he shall not receive any extra compensation for such service other than the allowance granted him while on an extended leave of absence.

Mr. PENROSE. Mr. President, I particularly call the attention of the chairman of the Committee on Post Offices and Post Roads to this amendment. There has been for many years in both branches of Congress considerable discussion relative to the pensioning and retirement of postal employees. The proposition which I have embodied in this amendment is the most conservative of any of the propositions partaking of the character of a pension system. It is, however, not really a pension proposition. It relates entirely to superannuated employees. In my opinion, after a careful investigation, it would not practically cost the Government of the United States any additional expense, while, on the other hand, the gain in efficiency would be immeasurably great.

This amendment, which is known as the indefinite leave-of-absence plan, will, if enacted into law, insure a greater degree of efficiency among the employees in the postal service. It will provide for the retirement of employees who have devoted their whole lives to the postal service and have arrived at an age where they can no longer keep up the pace that is necessary to maintain the service at a high standard.

Employees will not be eligible to the benefits of this provision until they have served for a period of 25 years or more, and they must be recommended for an indefinite leave of absence by the local postmaster to the Postmaster General. The Postmaster General is to judge as to whether the application should receive consideration, and if he approves of it he refers the application to a board of examiners, one of whom shall be a competent physician. The applicant must appear before this board and be examined as to his physical and mental condition, and the report of their findings to the Postmaster General must be made.

It is a well-known fact that there are a number of civil-service employees who are so incapacitated by reason of infirmities that they can no longer render efficient service, but the chiefs of divisions and postmasters, realizing that these employees would be thrown on the charity of the world if they were dismissed from the service, have not the heart or the desire to remove them. In such instances it would not be necessary to employ a substitute to fill the places of these employees, and in cases where no substitute would be assigned the Government would be the gainer financially.

The expense of putting this system into effect would not be great, for the reason that these employees in the postal service are as a rule men who are drawing salaries of $1,100 or $1,200 per annum. The employees who are so incapacitated that they would be granted indefinite leaves of absence under this provision would be allowed $600 per annum, and substitutes assigned to take their places would be paid at the same rate as is now allowed for vacation work.

This amendment only applies to employees who have been in the service since 1889, as none of the employees who have entered the service since that date can come under its provisions until they have served at least 25 years. The report of the Post Office Department for 1889, page 332, shows that on June 30, 1888, there were 5,094 employees in the Railway Mail Service, and page 89 discloses the fact that there were 6,346 letter carriers in the City Delivery Service, and it is estimated that there were about 7,000 clerks in first and second class post offices. Bulletin No. 94, published by the Census Bureau, showing the status of employees in the civil service of the United States, 1907, contains the information, on page 51, that 10.1 per cent of the railway mail clerks have served for a period ranging from 20 to 29 years; that 8.8 per cent of the letter carriers and 5.4 per cent of the post-office clerks have served a like period. Thus it will be seen that but 515 railway mail clerks, 558 letter carriers, and 378 post-office clerks, or a total of 1,451 postal employees, could possibly come under the benefits of this provision.

The Rural Delivery Service was established in 1896, so that the employees of this service will not be entitled to the benefit of this provision for another eight years.

It is further provided in this amendment that the Postmaster General can order these employees to report for duty in the offices in which they were last employed during the seasons of the year when the mail is extraordinarily heavy, and the services of these men can be used to good advantage. In the event of their being requested to perform service, they shall not be granted any extra compensation other than the allowance granted them while on an extended leave of absence. It is a reasonable provision; it can be put into practical effect with very little expenditure of money and it will relieve the service of the deadwood and raise the standard of efficiency among the employees by injecting young and vigorous blood in the places of the worn-out men.

On January 2, 1913, I introduced a bill—S. 7887—to provide for the retirement of all employees in the classified civil service. This bill was introduced after mature deliberation and considerable study. All the big corporations of the country are pensioning their old and faithful employees and the entire expense is borne by the corporations themselves. A very able paper has been written on this question by Andrew W. McKee, which was delivered before the Committee on Reform in the Civil Service, House of Representatives, January 17, 1912. In this paper Mr. McKee takes occasion to draw the attention of the committee to the fact that the following corporations and municipalities have retirement plans for the benefit of their employees:

TEACHERS, FIREMEN, AND POLICE PENSION FUNDS WITHOUT CONTRIBUTION FROM SALARIES.

TEACHERS.

Maryland: Teachers' retirement list. State board of education. Annapolis. Entire State.
Massachusetts: Boston, permanent pension fund.
Nebraska: Omaha.
New Jersey: Entire State.
New York: Retirement fund for the College of the City of New York.
Pennsylvania: Philadelphia, Elkin fund.
Rhode Island: Entire State.
South Carolina: Charleston.

FIREMEN.

California: Oakland and San Francisco.
Connecticut: New Britain and New Haven.
Georgia: Savannah.
Maryland: Baltimore.
Massachusetts: Boston, Cambridge, Holyoke, Lowell, Springfield.
Michigan: Detroit, Grand Rapids, Jackson.
Nebraska: Omaha.
New York: Albany, Buffalo, Elmira, New York.
Ohio: Canton, Columbus, Springfield, Toledo, Youngstown.
Pennsylvania: Pittsburgh.
South Carolina: Charleston.

POLICEMEN.

Connecticut: Hartford, New Britain, Waterbury.
Florida: Jacksonville.
Georgia: Augusta, Savannah.
Louisiana: New Orleans.
Maine: Portland.
Massachusetts: Boston, Cambridge, Fall River, Holyoke, Lowell, Lynn, Somerville, Springfield.
Michigan: Grand Rapids, Jackson, Saginaw.
Minnesota: Duluth.
New Jersey: Bayonne, Hoboken.
New York: Buffalo, Elmira.
Ohio: Akron, Columbus, Springfield, Youngstown.
South Carolina: Charleston.
Retirement under above fund are in the majority, after 20 years' service and over, upon half pay, with disability provision.

COMMERCIAL CORPORATIONS HAVING PENSION FUNDS WITHOUT CONTRIBUTIONS FROM SALARIES OF EMPLOYEES.

American Telephone & Telegraph Co.: Employees, 120,311. Retired at 60 years of age, with 20 or more years of service, continuously, upon

1 per cent of salary during the 10 years preceding retirement. Disability provision for 10 years or more of continuous service.

American Sugar Refining Co.: Employees, 7,500. Retired at 60 to 70 years of age, with 20 or more years of service, upon 1 per cent of salary during the 10 years preceding retirement. One reason for deciding against the type of plan which requires contribution from employees was the high cost of living, which would make any tax on salaries a hardship. Statement of the directors.

Carnegie Foundation: Grants pensions to teachers of universities, colleges, and technical schools, $15,000,00 having been provided. Average retirement allowance, $1,628.41. Maximum allowance, $4,000.

Consolidated Gas Co., New York: Retirement after 35 years service upon 1 per cent of salary during the 5 years preceding retirement.

International Harvester Co.: Employees, 33,000. Retired at 50 years of age for women and 65 years for men, with 20 years or more of service upon 1 per cent of salary during the 10 years preceding retirement.

Mr. George W. Perkins, the supervisory head of the concern, over his own signature, makes the following statement:

"The Harvester Co. does not do this out of pure philanthropy. It had no intentions of passing around a hat full of money that employees might help themselves. It went into it in a purely business spirit, believing that the plan would so knit its vast organization together, would so stimulate individual initiative, would so strengthen and develop the esprit de corps of the organization as to make it possible for the company to increase its business and its earnings, and with the spirit of being willing to share this increased success with its employees. So far the company has every reason to congratulate itself on the result. In all parts of the company's business, at home and abroad, in the office force, in the factories, in the sales department—everywhere—the average interest of the individual in the business is greater than formerly. The employees throughout the organization are vying with one another more and more to improve their respective branches of the business. This means profits for the stockholder; in short, means cooperation that is real, and therefore beneficial to one and all."

National Electric Light Association: Employees, 600,000.

AN INADEQUATE TERM.

By unanimous vote the term "pension," as being inadequate or subject to wrong interpretation, has been eliminated. We recommend as a substitute "service annuity." Our opinion is that the latter is to be paid as a form of compensation for a definite service that can not be rightly included within ordinary wages. It is compensation for continuous service over a period of several years and is to be paid upon carefully prearranged and understood conditions.

That the entire cost of service annuities should be contributed by the company as part of the annual cost of labor.

That this is to be the compensation to which the employee is entitled, in addition to his wages, for rendering continuous and satisfactory service throughout his term of employment.

That any employee having a minimum record of 10 years of continuous and satisfactory service, and who in the opinion of the company has become unfitted for duty, may be retired at any age and given a service annuity; that any such employee may make application for retirement or that the recommendation may be made by his employing officer.

The suggested basis of service annuities is from 1 to 2 per cent of the yearly wages, as may be adopted by the company, for each year of continuous service, based upon the employee's wages during the highest 10 consecutive years of employment.

Provident Loan Society, of New York: The rules are now being formulated, the directors reporting that the minimum pension granted will be 1 per cent of the maximum salary received for each year of service. That pension payments made in any year be charged as of the operating expenses of that year.

Public Service Corporation of New Jersey: Employees, 11,000. Retired age, 60 to 70 years, upon 1 per cent of salary for 10 years preceding retirement.

Standard Oil Co. and Yale University: Pension system under jurisdiction of board of trustees.

United States Steel and Carnegie Pension Fund: Employees, 225,000. Retired age, 60 years for men and 50 years for women, with 20 years or more of service, upon 1 per cent of salary for the 10 years preceding retirement. Disability provision for single men, 35 per cent of present salary; married men, 50 per cent.

RAILROADS.

Railroads having pension systems without contributions from salaries of employees:

Atchison, Topeka & Santa Fe Railway.
Atlantic Coast Line Railroad.
Baltimore & Ohio Railroad.
Bessemer & Lake Erie Railroad.
Brooklyn Rapid Transit Railroad Co.
Buffalo, Rochester & Pittsburgh Railway.
Chicago & North Western Railway.
Chicago, Rock Island & Pacific Railway.
Chicago, St. Paul, Minneapolis & Omaha Railway.
Cleveland, Cincinnati, Chicago & St. Louis Railway.
Cleveland Valley & Terminal Railroad.
Delaware, Lackawanna & Western Railroad.
Illinois Central Railroad.
Lake Shore & Michigan Southern Railway.
Michigan Central Railroad.
Newburg Railway Co.
New York Central & Hudson River Railroad.
New York, New Haven & Hartford Railroad.
New York Railways Co.
Oregon Railroad & Navigation.
Oregon Short Line Railroad.
Pennsylvania Railroad, lines east of Pittsburgh.
Pennsylvania lines, west of Pittsburgh.
Philadelphia & Reading Railway.
Southern Pacific.
Union Pacific Railroad.
Washington (D. C.) Street Railway Co.

The pension allowances granted to the employees of the above-named roads are from 1 to 2 per cent of the average salary for the 10 years preceding retirement.

The permanent disabled employees are retired from 10 years' service and thereafter.

The age of retirement is from 60 to 70 years. Compulsory retirement at age of 70.

There are over 800,000 employees in service upon the roads granting civil or straight pensions, which is more than three times the number of civil-service employees in the Federal Government.

The total number of railroad employees in 1909 was 1,436,275, their average daily salary was $3.24.

The total number in 1910 was 1,699,420, and their average daily salary was $3.29.

These figures effectually disprove the statement made in some quarters that the establishment of a straight pension is a disbarment of an increase of salary. The Pennsylvania Railroad has increased the salaries of their employees during the past 10 years 26 per cent, and they have been the heaviest contributors to straight pension, having paid since 1900, $5,512,529.57."

This very interesting information, if authentic, should satisfy the most skeptical that the system adopted by these corporations must be a good business proposition or it would not have been made part of the policy of these institutions and charged, as it is, to their regular running expenses. In the February, 1912, Postal Record appears a copy of an address delivered before the American Civic League, in Washington, by Mr. Miles M. Dawson, a consulting actuary. In this address Mr. Dawson is quoted as saying:

There are now before Congress several bills to provide for the superannuation of civil-service employees. The bill which has been most favored provides for requiring the employees to contribute out of their salaries to a fund estimated by actuaries to be sufficient to purchase certain annuities upon arriving at certain ages, their contributions to be treated in the meantime as a mere savings account withdrawable if the contributor retires from the service without coming into receipt of the annuity.

In commenting on this plan, Mr. Dawson states that he wrote to Mr. Henry William Manly, the greatest expert in Europe upon the subject of pension laws and an actuary of international standing, an author of the most important technical works upon this topic, asking if he favored the contributory bill. The reason Mr. Dawson wrote Mr. Manly was that Mr. Manly had been quoted in a public document as in favor of it. In replying to this communication Mr. Manly is quoted in the following words:

You state that I have been quoted in favor of a compulsory savings-bank plan.

I have had a very large practice in pension-fund finances, have been consulted by the British Government, municipal corporations, many of the great railway companies and banks, as well as large commercial firms, and have written largely on the subject, but I can not understand how any words of mine could be construed as being favorable to the savings-bank principle. I consider it to be the worst scheme ever proposed.

All through the paper of Mr. Dawson appear convincing arguments in favor of retirement plans that are supported without expense to the employees.

In a communication from Mr. Henry William Manly to Mr. George T. Morgan, of Philadelphia, printed in the April, 1912, Postal Record, page 83, Mr. Manly sums up his conclusions of the whole question of retirement as follows:

1. That the straight-out pension attracts the services of the best men, secures contentment, efficiency, loyalty, and a steady flow of promotion, and is the most economical for the employer.

2. That the next best plan is for the employer and employees to contribute equally to a pension fund, because then efficiency is secured by superannuating the old and inefficient, thus providing for the promotion of the best men and for the introduction of young and vigorous men.

3. That a pension fund to which the employees alone contribute is better than nothing; but the service does not attract the higher-grade man; it breeds discontent and keeps the staff inefficient, and all that can be said for it is that it provides for the superannuation of those men who remain in the service long enough to qualify for it. From a monetary point of view it is more expensive than a service without any pension at all.

4. That the compulsory savings-fund scheme is the worst of all. There is nothing attractive whatever about it. If the savings are to be large enough to provide for a pension at 60, they will be so great that the employer must help by increasing the salaries; but the fact that the savings are the property of the employee is a direct incentive for him to leave the service and withdraw them. Thus all but the most inefficient would leave at the first opportunity, and the result would be that the employer would have to pay most of the savings and have a most inefficient staff. This I know from experience, for I have been consulted by large employers of labor who had savings-fund schemes and who found them to work out most unsatisfactorily.

H. W. MANLY.

All the leading foreign Governments have provided retirement plans for their superannuated employees. If these Governments of older and more ripe experience have found it necessary to enact retirement laws to maintain a high standard of efficiency among their civil-service employees, and with all the other evidence before us of like policies being incorporated by the various municipalities and large corporations in our own country doing likewise, I believe that it is time for us to meet this question squarely in the hope of arriving at a proper and satisfactory solution of the problem.

Mr. President, I hope the Senate will give this proposition the consideration which it deserves. It is a humanitarian proposition, and I hope it will be placed in the bill.

Mr. SMITH of Georgia. Mr. President, I desire to make two points upon this proposed amendment. First, it is general legislation which can not be added to an appropriation bill; and, second, it provides for an increased appropriation, which has not been estimated for by the department or presented by the committee.

Mr. BRYAN. Mr. President, it ought not to be surprising to anyone that an amendment of this kind should be offered. The surprise to me is that men in the civil service of the Government, who are so independent as to believe themselves able to earn their own living without asking any favors of the Government under which they live and which protects them, should ask for a pension. Those who can connect themselves either by blood or marriage with anyone who ever enlisted in any war in the United States is already on the pension roll.

The PRESIDENT pro tempore. The Chair will venture to suggest to the Senator from Florida that the Chair is ready to rule on the point of order.

Mr. BRYAN. The Chair has been so kind as to make that suggestion to me the second time quite recently. In connection with the observation of the Senator from Pennsylvania, I want it to appear just exactly what this amendment of his points us to. It points us to a pensioning of the 400,000 civil-service employees of the Government, at an expense of $40,000,000. It points us to the old-age pension bill now pending in Congress, and that idea is borrowed from the war pension list.

Here is a bill introduced by Mr. WILSON of Pennsylvania, the title of which is "to organize an Army Corps, prescribe qualifications for enlistment, define the duties, and fix the compensation and term of enlistment of privates, and for other purposes." They are to be known as the old-age home guard of the United States Army, and anyone who is 65 years of age is a member of the United States Army in the department of the old-age home guard. There is a peculiar provision in one section of it, reading as follows:

Provided, That persons related as husband and wife shall not both be eligible for enlistment, enrollment, and service therein at the same time, and in case of dispute as to whether husband or wife shall be enlisted and enrolled, as herein provided, the question shall be decided by the Secretary of War, by and with the approval of the President.

In other words, you make the President of the United States the arbiter of family quarrels as to which one of them shall be enlisted in the Home Guard of the United States.

Let us see what it is. Section 6 provides:

That no private or applicant for enlistment as private shall be required to leave his or her home for the purpose of enlistment, enrollment, or service in the Old Age Home Guard of the United States Army, nor shall they be required to assemble, drill, or perform any of the other maneuvers nor be subject to any of the regulations of the United States Army, except as herein provided.

Here are the duties they have to perform:

SEC. 7. That privates in the Old Age Home Guard of the United States Army shall be required to report annually, in writing, to the Secretary of War, on blanks furnished by him for the purpose—

What?—

the condition of military and patriotic sentiment in the community where such private lives; but no private shall be discharged, disciplined, or otherwise punished for failure to make such report.

SEC. 8. That the number of persons enlisted in the Old Age Home Guard of the United States Army shall be in addition to the number of officers and privates now required by law in the United States Army.

Senators may say that is not a bill for which any man of reasonable discretion would be asked or expected to vote. Let us see, Mr. President. There are now on the war-pension rolls 400,000 noncombatants, as compared with 500,000, in round numbers, of those who enlisted. It will not be long before the number of noncombatants will exceed the number who enlisted in the war, and it is already true that less than 25 per cent of those who saw actual serivce in the war are now upon the pension roll. Yet you have more pensioners on it and the amount paid for pensions is larger to-day than has ever been the case heretofore in the history of this Republic.

I heard here last night, in the discussion of the pending appropriation bill, men rise and speak in favor of an increased appropriation for clerks in the postal service. We were told we ought not to be content to pay men only $60 a month, and the Senate adopted a requirement that the minimum pay should be $800 a year. Why was the amount raised to $800? Because of the power of organization demanding the increase.

Why have the pensions for wars mounted up from day to day? Because of the organizations behind them, because whenever a bill is introduced they have men always present to urge them, and because the people whom we are supposed also to represent here are always absent and have to depend upon their Representatives to look out for their interests.

If you can not resist the temptation to give whatever is denominated a war pension increase, will you be able to resist the temptation to give civil pensions? They will have an organization; they have it now. The Senator from Pennsylvania says that there are not so many postal employees and the expense would be small. But let us see. If you put the postal employees on, by what process of reasoning in justice and fairness will you deny to the other civil-service employees a like place upon the pension roll?

Then, Mr. President, this bill which I read——

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Kansas?

Mr. BRYAN. Certainly.

Mr. BRISTOW. Let me inquire of the Senator if the civil-service employees are placed on the pension roll why should not all other citizens be placed on the pension roll under the same circumstances?

Mr. BRYAN. Certainly; they ought to be.

Mr. PENROSE. Mr. President, I should like to ask the Senator from Florida a question, if I may. I am curious to know whether the Senator approves of the pension funds for policemen and firemen in our municipalities, the pensions for teachers in our school systems, and the system of pensions which all the great corporations, the railroads and others, are inaugurating for their employees?

Mr. BRYAN. I will be very glad to answer the Senator if in the meantime the Chair does not again suggest to me that he is ready to rule on the question of order. But I hope the Chair will bear himself with patience for just a few minutes and I will undertake to do that.

Mr. PENROSE. I think a little discussion on this proposition by unanimous consent will be very beneficial. I hope it will be permitted to go on.

The PRESIDENT pro tempore. The discussion, it appears to the Chair, ought to be on the point of order, if discussion is to be had. The rule is explicit that a point of order shall be decided without debate, unless submitted to the Senate.

Mr. BRYAN. Will the Senator from Georgia withhold his point of order? I want really to answer the question asked me by the Senator from Pennsylvania.

Mr. SMITH of Georgia. I dislike to be the cause of preventing any Senator from occupying the floor when he wishes to do so, but we have only about three days longer in which to pass the appropriation bills, and I really think, Mr. President, the point of order ought to be passed on and we ought to go on with the pending bill.

Mr. BRYAN. Mr. President, just a moment before the Chair rules. Inasmuch as there will be another opportunity for me to make the speech I started out to make, I will wait until that time comes.

The PRESIDENT pro tempore. The point of order is sustained. The bill is in Committee of the Whole and open to amendment.

Mr. TOWNSEND. The Senator from Colorado [Mr. GUGGENHEIM] has asked me to present for him an amendment, on page 19, line 10, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 19, after line 10, insert:

The Postmaster General is authorized and directed to procure and submit to Congress at the beginning of the next session, at an expenditure not to exceed $5,000, plans, specifications, and estimate of cost of a pneumatic, electric or other underground tube system of connection, for the transmission of letters, messages, documents, etc., between the Capitol, Office Buildings of the Senate and House of Representatives, the Executive Departments, and other Government establishments in the city of Washington.

Mr. BOURNE. I accept the amendment.

Mr. SMITH of Georgia. Does that require the Postmaster General to report by April 1?

Mr. TOWNSEND. December 1, I think is meant.

Mr. SMITH of Georgia. It says "at the beginning of the next session.

Mr. TOWNSEND. I think evidently the 1st of December is meant.

Mr. SMITH of Georgia. My suggestion is that it ought to be modified so as to read "by December 1."

Mr. SWANSON. Mr. President, as I understand, a commission has been appointed to make this investigation, has it not?

Mr. BOURNE. A commission has been appointed.

Mr. SWANSON. As I understand, a commission is now making an investigation into the matter of pneumatic tubes, is it not?

Mr. BOURNE. That is true; but this is to estimate the cost of a connection between the Senate and the House of Representatives in Washington and——

Mr. SMITH, of Georgia. Mr. President, the commission is not charged in any sense with the duty of an investigation of this character. I will say to the Senator that the resolution under which the commission is conducting its work—I am upon that commission—applies solely to the existing lines of pneumatic tubes in certain cities of the United States; as to the advisability of their purchase by the Government; and the price at which the Government can afford to purchase them.

Mr. SWANSON. As I understand, that commission will ascertain and report upon the efficiency, the saving, and the cost of

the pneumatic-tube system. The question of pneumatic tubes has been before Congress and committees of Congress for 20 years. The companies have always got some designs that they wish the Government to adopt. It seems to me that the commission is already empowered to examine the efficiency. They have the system in New York and in other cities to test its saving, its cost, and its value; and it seems to me, under this proposition, we would have two commissions, engaged very much in the same business, at a double cost. I am willing for the existing commission, which is examining the pneumatic-tube system in New York and elsewhere, to be empowered to do this work.

Mr. BRISTOW. If the Senator will yield a moment, I will say that I think this amendment is clearly subject to a point of order. It has not been estimated for and it has not been recommended by a standing committee. So I make the point of order against it.

Mr. SWANSON. I intended to make the point of order unless the power was conferred upon the existing commission. I have no objection to the present commission making this investigation.

Mr. BRISTOW. I insist upon the point of order.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. TOWNSEND. At the suggestion of the Senator from Colorado [Mr. GUGGENHEIM] I offer an amendment, which I send to the desk.

The PRESIDENT pro tempore. The Senator from Michigan, in behalf of the senior Senator from Colorado [Mr. GUGGENHEIM], offers an amendment, which will be stated.

The SECRETARY. On page 19, after line 10, it is proposed to insert:

And provided further, That the commission authorized to investigate the feasibility and desirability of the Government purchasing and operating the equipment for pneumatic-tube service in the cities in which such service is now installed is hereby directed to include in its report to Congress plans, specifications, and estimate of cost of a pneumatic, electric, or other underground tube system of connection for the transmission of letters, messages, documents, etc., between the Capitol, office buildings of the Senate and House of Representatives, the executive departments, and other Government establishments in the city of Washington.

The PRESIDENT pro tempore. The question is on the amendment.

Mr. BRISTOW. I make the point of order on that amendment.

Mr. LODGE. That amendment, as now drawn, is clearly not subject to a point of order. It carries no appropriation.

The PRESIDENT pro tempore. The amendment carries no appropriation.

Mr. LODGE. And it is not general legislation.

The PRESIDENT pro tempore. It simply defines the duties of a commission. The Chair overrules the point of order.

Mr. BRISTOW. Mr. President, we have a commission that is making this investigation, and I do not see why it is necessary for us to go into the details of construction. This commission should be left with the authority it has to make the investigation and report as it sees proper, it seems to me.

The PRESIDENT pro tempore. The Chair overrules the point of order.

Mr. SMITH of Georgia. I desire to say for the commission that we have no funds to make this investigation with reference to the city of Washington. It would require engineers to study the cost. We will do the best we can if Congress passes the legislation, but I want to put Congress on notice beforehand that we are not engineers and that we would not have the time to do the work even though we were.

Mr. POINDEXTER. Mr. President, I offer the amendment which I send to the desk.

Mr. BRISTOW. What becomes of the other amendment, Mr. President?

The PRESIDENT pro tempore. The point of order made on the amendment is overruled.

Mr. BRISTOW. But what, then, becomes of the amendment?

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was rejected.

The PRESIDENT pro tempore. The amendment offered by the Senator from Washington [Mr. POINDEXTER] will be stated.

The SECRETARY. It is proposed to amend by striking out, on lines 24 and 25, on page 16, and on lines 1 and 2, on page 17, the words, "That substitute carriers and clerks when assigned to perform the work of regular employees absent on vacations, or when performing auxiliary or temporary work, shall be paid at the rate of 30 cents an hour," and insert in lieu thereof the following:

Provided, That after June 30, 1913, substitute letter carriers and substitute post-office clerks employed in first and second class post offices shall, when working for a carrier or clerk absent without pay, or when assigned to perform the work of regular employees absent on vacations, or when performing auxiliary or temporary work, be paid at the rate of 35 cents an hour.

Mr. SMITH of Georgia. Mr. President, I make the point of order that that amendment involves increases in expenditures and that it has not been estimated for by the department or reported by a committee.

Mr. POINDEXTER. I do not think that objection, Mr. President, is supported by the record. The only substantial change it is proposed to make in the bill is as to the rate of pay, from 30 cents an hour to 35 cents an hour.

Mr. SMITH of Georgia. That is an increase, and no increases can be made from the floor of the Senate, unless estimated for by the department.

Mr. POINDEXTER. Mr. President, the amendment does not propose an increase, but rather a decrease in the total estimate. The appropriation contained in the bill as it passed the other House provided that these substitute letter carriers should be paid at the same rate as the clerks for whom they were substituted, in the lines from 17 to 23 on page 16 of the bill. Those lines were stricken out by the Senate committee, and I understand that the amendment was passed over very largely upon the objection made by the Post Office Department that it would require a complicated and expensive system of bookkeeping to keep the accounts of the men at the various uncertain rates of pay corresponding to that of the different men for whom they were substituted.

Mr. JONES. I want to suggest to my colleague that the amendment reported by the committee on page 16 has not yet been acted upon, and the chairman of the committee has agreed to put in a substitute for what is proposed to be stricken out, giving these substitute letter carriers 30 and 40 cents an hour, covering the first part stricken out, which has not yet been acted upon.

Mr. POINDEXTER. Thirty and forty cents an hour?

Mr. JONES. Yes; giving them 40 cents an hour. It does not cover the provision which my colleague has also included giving them 30 cents an hour, on lines 24 and 25, that seeming to be a separate provision.

Mr. SMITH of Georgia. Mr. President, I desire to withdraw the point of order. I do not think it is well taken. I think the Senator from Washington [Mr. POINDEXTER] is right about it. I did not know that the legislation was still in its present condition. I thought it was an effort to change from 30 cents, but the House provision takes it entirely out of the view that I had suggested. I am, therefore, confident that the amendment is in order. I would not embarrass the Chair to make a ruling on the point of order, and I withdraw it.

The PRESIDENT pro tempore. That feature of the paragraph was passed over and the Senator from Washington has moved the amendment which has been stated.

Mr. JONES. I merely wanted to state to my colleague that if he would allow the amendment of the committee to be adopted with the substitute offered then he may offer his amendment and change from 30 cents to 35 and 40 cents.

Mr. POINDEXTER. I have no objection as to the order in which it is done.

Mr. JONES. It would accomplish just what my colleague desires.

The PRESIDENT pro tempore. Does the Senator from Washington withdraw his amendment for the present?

Mr. POINDEXTER. I withdraw the amendment for the present.

Mr. BOURNE. I offer the amendment drafted by the Senator from Washington, and move the adoption of it. On page 16, after the amount, I move to insert the following:

Provided, That after June 30, 1913, substitute letter carriers in the City Delivery Service and substitute post-office clerks employed in first and second class post offices shall be paid at the rate of 40 cents an hour when working for a carrier or clerk absent without pay.

In order for that to go in, the Senate should agree to the committee amendment, striking out, beginning with the word "*Provided*," in line 18, and going down to the end of line 23, and substituting this in place thereof.

The PRESIDENT pro tempore. The Senator moves to strike out?

Mr. BOURNE. To strike out and insert.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. In lieu of the words proposed to be stricken out of the House text insert the following:

Provided, That after June 30, 1913, substitute letter carriers in the City Delivery Service and substitute post-office clerks employed in first and second class post offices shall be paid at the rate of 40 cents an hour when working for a carrier or clerk absent without pay.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. POINDEXTER. I now submit the amendment which I have already sent to the desk.

The PRESIDENT pro tempore. The Senator from Washington submits an amendment, which will be stated.

The SECRETARY. On page 16 it is proposed to strike out lines 24 and 25 on that page down to and including the word "hour," in line 2, page 7, and in lieu thereof to insert:

Provided, That after June 30, 1913, substitute letter carriers and substitute post-office clerks employed in first and second class post offices shall, when working for a carrier or clerk absent without pay or when assigned to perform the work of regular employees absent on vacations, or when performing auxiliary or temporary work, be paid at the rate of 35 cents an hour.

Mr. POINDEXTER. Mr. President, in view of the amendment which has just been adopted on the motion of the chairman of the committee as a substitute for the amendment which I have just offered, I move to amend the bill by striking out the figure "30," in line 2, page 17, and substituting "35."

The PRESIDENT pro tempore. The Senator from Washington withdraws his first amendment?

Mr. POINDEXTER. I withdraw the former amendment and offer this one in its place.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 17, line 2, before the words "cents an hour," it is proposed to strike out "30" and insert "35."

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. SMITH of Georgia. I ask that the amendment be again stated.

The Secretary again stated the amendment.

Mr. SMITH of Georgia. That is an increase, I think. I have not the entire text here so that I can examine it, but I think that is an increase not estimated for and not recommended by the committee.

Mr. POINDEXTER. That is estimated for. The bill as it is now framed provides for the service which is estimated for by the department. I should like to say, in explanation of the amendment——

Mr. SMITH of Georgia. The proposition is to increase the rate from 30 to 35 cents. It is, therefore, an increase, not recommended by the committee and not estimated for by the department, is it not?

Mr. POINDEXTER. I do not know, Mr. President, if there is any rule upon which that point of order can be made. Certainly, the Senate has a right to increase the recommendation of the committee and also to increase the amounts estimated by the department.

SEVERAL SENATORS. Oh, no.

Mr. SMITH of Georgia. The rule, Mr. President, as the Presiding Officer well understands, is intended to prevent that very course. Increases to be considered must be offered formally to the committee and be considered there. It is to prevent the individual suggestion of an increase to a bill that the rule has been framed.

Mr. POINDEXTER. Mr. President——

Mr. LODGE. The rule is, if I may be pardoned a moment, that—

no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill, or to add a new item of appropriation * * * unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate of the head of some one of the departments.

Mr. OLIVER. Mr. President, did I understand the Senator from Georgia to make a point of order against the amendment?

The PRESIDENT pro tempore. The Chair did not understand the Senator from Georgia to make a point of order.

Mr. SMITH of Georgia. I made the point of order on the proposed amendment.

Mr. OLIVER. I make the point of order, and I am constrained to do so because of the way in which time is going by. I understand the point of order is not debatable.

The PRESIDENT pro tempore. It is not debatable; and the Chair will rule that the point of order is well taken.

Mr. BOURNE. On behalf of the committee I offer the amendment, which I send to the desk.

The PRESIDENT pro tempore. The Senator from Oregon offers an amendment, which will be stated.

The SECRETARY. On page 32, line 3, after the word "substations," it is proposed to insert:

Provided, That the appropriation of $500,000 made in the Post Office appropriation act approved August 24, 1912, for the improvement of highways, is hereby continued as to any unexpended balance thereof, subject to the conditions of the original appropriation.

Mr. BOURNE. I offer that amendment at the suggestion of the Postmaster General, who thinks there might be some question in reference to the appropriation of $500,000 for experimentation in road building, which was made in the last Post Office appropriation bill; and, as he has been in correspondence with the Secretary of Agriculture and with a number of governors of the States, if any question should arise in reference to the availability of that appropriation, it might create decided embarrassment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PUBLIC BUILDINGS BILL.

Mr. SUTHERLAND. I move that the Senate proceed to the consideration of House bill 28766, the public buildings bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28766) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings, and for other purposes, which had been reported from the Committee on Public Buildings and Grounds with amendments.

Mr. SUTHERLAND. I ask that the formal reading of the bill be dispensed with, and that it be read for amendment, the committee amendments to be first considered.

The PRESIDENT pro tempore. The Senator from Utah asks unanimous consent that the formal reading of the bill be dispensed with, and that it be read for amendment, the committee amendments to be first considered. Is there objection? The Chair hears none.

Mr. KENYON. Mr. President, I rose to ask that the bill be read.

Mr. WARREN. The bill will have to be read now.

The PRESIDENT pro tempore. The Secretary will read the bill.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Public Buildings and Grounds was, on page 2, after line 14, to insert:

United States post office at Santa Barbara, Cal., $20,000.

The amendment was agreed to.

The next amendment was, on page 2, line 18, after the word "Colorado," to strike out "$10,000" and insert "$25,000," so as to make the clause read:

United States post office at La Junta, Colo., $25,000.

The amendment was agreed to.

The next amendment was, on page 3, after line 2, to insert:

United States post office at Dublin, Ga., $8,000.

The amendment was agreed to.

The next amendment was, on page 3, line 4, after the name "Georgia," to strike out "$6,250" and insert "$30,000," so as to make the clause read:

United States post office at Elberton, Ga., $30,000.

The amendment was agreed to.

The next amendment was, on page 3, after line 7, to insert:

United States post office at Cedartown, Ga., $5,000.

The amendment was agreed to.

The next amendment was, on page 3, after line 10, to insert:

United States post office, courthouse, and customhouse at Honolulu, Hawaii, $450,000: *Provided*, That so much of this sum as may be necessary shall be used for the enlargement of the present site.

The amendment was agreed to.

The next amendment was, on page 3, after line 17, to insert:

United States post office at New Albany, Ind., $38,000.

The amendment was agreed to.

Mr. SUTHERLAND. Mr. President, at that point I desire to offer an amendment which was omitted by the committee.

The PRESIDING OFFICER (Mr. LODGE in the chair). The amendment will be stated.

The SECRETARY. On page 3, after line 19, it is proposed to insert:

United States post office and courthouse at Salina, Kans., $10,000.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 4, line 1, after the word "Massa-

chusetts," to strike out "$15,000" and insert "$18,000," so as to make the clause read:

United States post office at Milford, Mass., $18,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 8, to insert:

United States post office at Moorhead, Minn., $15,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 10, to insert:

United States post office at Miles City, Mont., $75,000.

The amendment was agreed to.

The next amendment was, on page 5, after line 3, to insert:

United States post office and courthouse at Lincoln, Nebr., $175,000.

The amendment was agreed to.

The next amendment was, on page 5, after line 7, to insert:

That the limit of cost for the extension, alteration, and improvement of the public building in the city of Concord, N. H., contained in an act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1911, and for other purposes, approved June 25, 1910, be, and hereby is, increased from $32,000 to $50,000.

The amendment was agreed to.

The next amendment was, on page 5, after line 17, to insert:

United States post office at Plainfield, N. J., $50,000.

The amendment was agreed to.

The next amendment was, on page 6, line 20, after "$15,000," to insert "*Provided*, That not to exceed $4,000 of said amount may be used, in the discretion of the Secretary of the Treasury, for the acquisition of additional land adjoining the present site," so as to make the clause read:

United States post office at Tarboro, N. C., $15,000: *Provided*, That not to exceed $4,000 of said amount may be used, in the discretion of the Secretary of the Treasury, for the acquisition of additional land adjoining the present site.

The amendment was agreed to.

The next amendment was, on page 7, line 3, after the word "Ohio," to strike out "$45,000" and insert "$100,000," so as to make the clause read.

United States post office at Piqua, Ohio, $100,000.

The amendment was agreed to.

The next amendment was, on page 7, line 5, after the word "Ohio," to strike out "$30,000" and insert "$45,000," so as to make the clause read:

United States post office at Alliance, Ohio, $45,000.

The amendment was agreed to.

The next amendment was, on page 7, after line 8, to insert:

For the enlargement of the site for a post-office building at Ashland, Ohio, $10,000.

The amendment was agreed to.

The next amendment was, on page 7, after line 10, to insert:

For the extension and enlargement of the United States post office and courthouse at Oklahoma City, Okla., or for an additional building, $250,000.

The amendment was agreed to.

The next amendment was, on page 7, line 15, after the word "Oklahoma," to strike out "$114,750" and insert "$215,000," so as to make the clause read:

United States post office and courthouse at Tulsa, Okla., $215,000.

The amendment was agreed to.

The next amendment was, on page 7, after line 15, to insert:

United States post office at Albany, Oreg., $10,000, and the act of Congress approved May 30, 1908, is hereby amended so as to authorize the Secretary of the Treasury to construct said building in such a way as to provide suitable accommodations for the Federal bureaus.

The amendment was agreed to.

The next amendment was, on page 7, after line 21, to insert:

United States post office at The Dalles, Oreg., $24,000.

The amendment was agreed to.

The next amendment was, at the top of page 8, to insert:

United States post office at Corry, Pa., $35,000.

The amendment was agreed to.

The next amendment was, on page 8, after line 4, to insert:

United States post office, courthouse, and customhouse at San Juan, P. R., $32,000.

The amendment was agreed to.

The next amendment was, on page 8, after line 6, to insert:

United States post office at Narragansett Pier, R. I., $30,000.

The amendment was agreed to.

The next amendment was, on page 9, line 3, after the word "reconstruction," to strike out "for a" and insert "to adapt it for use as a United States," so as to make the clause read:

For remodeling and reconstruction, to adapt it for use as a United States courthouse, the building now used for appraisers' stores, $50,000.

The amendment was agreed to.

The next amendment was, on page 9, line 10, before the words "post office," to insert "United States"; and in the same line, after the word "building," to insert "and work incident thereto," so as to make the clause read:

For rearranging and constructing offices in the third story of the United States post office and customhouse building, and work incident thereto, $15,000. The act of Congress approved August 24, 1912, authorizing an expenditure of $8,000 for rented quarters and moving expenses, is hereby repealed.

The amendment was agreed to.

The next amendment was, on page 9, after line 15, to insert:

United States post office at Hillsboro, Tex., $10,000.

The amendment was agreed to.

The next amendment was, on page 9, after line 16, to insert:

For the acquisition, by purchase, condemnation, or otherwise, of additional ground adjoining the post office and courthouse at Sherman, Tex., $5,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 10, after line 2, to insert:

United States post office and customhouse at Everett, Wash., $50,000.

The amendment was agreed to.

The next amendment was, on page 10, after line 8, to insert:

That the provisions of the acts of Congress of May 27, 1908, and August 22, 1911, fixing the limit of cost for the new building for the Bureau of Engraving and Printing in Washington, D. C., be, and the same are hereby, amended so as to fix the limit of cost for said new building, including vaults, at $2,880,000, and any unexpended balance of the appropriations for said vaults remaining after their construction is hereby made available for the purpose of said building, but said limit of cost of $2,880,000 shall not be exceeded.

Mr. SMITH of Georgia. Mr. President, I should be glad to have the chairman of the committee explain to us what has already been appropriated for this building, and what increase is carried by this bill.

Mr. SUTHERLAND. Mr. President, the original authorization of this building was for $2,600,000, so that the increase is $280,000. The building is in process of construction, and the increase is absolutely necessary in order that it may be completed in accordance with the bids which are now before the department. The items that will be covered by the $280,000 include the interior finish, for which there is a proposal amounting to $481,344; mechanical equipment, for which there is a proposal amounting to $295,295; elevators, for which there is a proposal for $84,844; additional work, for which no proposals are on hand, estimated at $14,000; and contingencies, $40,000. That makes a total of $915,483. The balance available of the amount originally authorized is $636,319.25, leaving a deficit of $279,163.75. The committee has put in the round figures, $280,000.

Mr. SMITH of Georgia. Did the original act provide that the building should be constructed for the amount appropriated?

Mr. SUTHERLAND. No amount is appropriated at all. Congress passes a bill, as we are now undertaking to pass this bill, authorizing the construction of the building, and fixes a limit of cost. It very often happens that by the time we get around to let contracts for the construction of the building, for various reasons it costs more than was originally estimated. The items that we have thus far read in this bill are all items of that character. The price of labor increases, the price of material increases, contingencies arise that are not foreseen, and therefore it is necessary, in order that the buildings may be completed and may be made available for use, that these increases should be made, or the building abandoned.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, in section 2, page 10, line 22, after the word "rebuilding," to insert "reconstruction," so as to make the clause read:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the enlargement, extension, remodeling, rebuilding, reconstruction, or improvement of the following-named buildings within the respective limits of cost hereby fixed.

The amendment was agreed to.

The next amendment was, on page 11, line 2, after the word "California," to strike out "$75,000" and insert "$115,000," so as to make the clause read:

United States post office and customhouse at Oakland, Cal., $115,000: *Provided*, That this amount, or so much thereof as may be necessary, shall be used for the acquisition of additional land for the enlargement of the present site.

The amendment was agreed to.

The next amendment was, on page 11, line 7, after the word "Illinois," to strike out "$125,000" and insert "$240,000," so as to make the clause read:

United States post office, courthouse, and other governmental offices at East St. Louis, Ill., $240,000.

The amendment was agreed to.

The next amendment was, on page 11, after line 10, to strike out:

United States post office at New Albany, Ind., $38,000.

The amendment was agreed to.

The next amendment was, on page 11, after line 20, to insert:

United States post office at Hagerstown, Md., $30,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 4, to insert:

United States post office at Moberly, Mo., $35,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 5, to insert:

United States post office at Missoula, Mont., $125,000.

Mr. SUTHERLAND. In line 6, page 12, after the word "post office," I move to insert the words:

Courthouse, and other governmental offices.

I send the amendment to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 12, line 6, in the committee amendment, after the word "post office," it is proposed to insert a comma and the words:

Courthouse, and other governmental offices.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 12, after line 7, to strike out:

United States post office and courthouse at Lincoln, Nebr., $175,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 15, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed, in his discretion, to acquire, by purchase, condemnation, or otherwise, the remainder of the block in which the post office in the borough of Brooklyn, city of New York, State of New York, is located, at a cost not exceeding $350,000, and any unexpended balance of the appropriation for this enlargement of said site may be used, in the discretion of the Secretary of the Treasury, for the alteration or remodeling and repair of the buildings upon such newly acquired property to adapt such structures, or any of them, for temporary use for the purposes of the Government pending the completion of an extension of the present Federal building.

The PRESIDING OFFICER. The Chair will ask the chairman of the committee if the word "adopt" in line 25 is not a misprint for "adapt"?

Mr. SUTHERLAND. Yes; that should be corrected.

The SECRETARY. It is proposed to strike out the word "adopt" on line 25, page 12, and insert the word "adapt."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 13, after line 6, to strike out:

For the enlargement of the site for a post-office building at Ashland, Ohio, $10,000.

The amendment was agreed to.

The next amendment was, on page 13, after line 8, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and empowered to enlarge the site of the public building belonging to the United States in the city of Newport, R. I., by the acquisition, by purchase, condemnation, or otherwise, of adjoining property within a limit of cost not to exceed $100,000, and upon the present site so enlarged the Secretary is authorized and directed to cause to be erected a suitable new building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, complete, for the use and accommodation of the United States post office, customhouse, United States engineer office, Navy pay office, constructing quartermaster's office, Weather Bureau, Civil Service Commission, and other Government offices, within the limit of cost, including the building and addition to site hereby fixed, of $400,000.

Mr. SMITH of Georgia. Mr. President, I should be glad to have the chairman of the committee explain the size of that appropriation, the size of the place, and the amount of mail handled by it.

Mr. WETMORE. Mr. President, it is proposed by the pending amendment to enlarge the present Federal building site at Newport, R. I., at a cost not exceeding $100,000, and erect on the enlarged site a new building at a limit of cost for building and enlarged site of $400,000. The estimate of the Treasury Department was $450,000. If there are any other questions the Senator would like to ask, I shall be pleased to answer them.

Mr. SMITH of Georgia. How is it that the appropriation seems so much larger than the usual appropriation for a building in a city of 30,000 inhabitants?

Mr. WETMORE. It is less than the amount estimated. The Treasury Department estimated $450,000, and this is $50,000 under the estimate.

Mr. SMITH of Georgia. Of course the estimate would depend upon the character of the finish of the building. My objection to it is that as buildings are erected throughout the country, I do not think a $400,000 investment is usually made for a city of 30,000 population.

Mr. WETMORE. If the Senator will observe the different branches of the Government that are to occupy offices in this building he will see there is an unusually large number—the post office, the customhouse, the Navy pay office, the United States engineer office, the constructing quartermaster's office, the Civil Service Commission, the Weather Bureau, and the Department of Justice.

Mr. SMITH of Georgia. Mr. President, those additional features of service are found in a great many cities. The objection I have is that there ought to be some uniformity in these appropriations in proportion to population and postal receipts. My objection to the present appropriation is that it is so much larger than is usually made for cities of that size or of that amount of postal receipts.

I do not think there is any necessity to make the building more ornate because it is at Newport. Of course I appreciate the fact that there is a very charming class of people going there during the summer; but I can not understand why, for that reason or for any other reason, we should make an exception and appropriate more in proportion at one place than we do at another.

Mr. SUTHERLAND. Mr. President, if the Senator from Rhode Island will yield to me, the amount which should be spent for a Government building in a given place can not always be determined by ascertaining the population. For example, in a town of five or six thousand people, where only a post office is needed, a comparatively small building will suffice, but if a Federal court is held in that town a larger building is necessary. If, in addition to that, it is a port of entry, and a customhouse is maintained there, a still larger building must be provided.

In the case of Newport there is not only a post office which would be found in any town of this size but there is a branch of the Department of Justice and there is a branch of the customs service. This is an exceedingly important point. There is a very large harbor there. In addition to that, the Civil Service Commission must be taken care of. The Agricultural Department must be taken care of there. It has employees at that point. The War Department maintains a station at that point, and so does the Navy Department. When we come to consider that all these officials of the Government are to be housed, it becomes necessary to appropriate a larger sum of money than a mere post office would require.

Mr. SMITH of Georgia. Will the Senator tell us what floor space is occupied by these Government officials now? Is it the floor space or the character of the building that is being erected that causes the difference?

Mr. WETMORE. I think the present building has about 20,000 square feet of space on all floors, and the requirements are for about twice that amount. The building, of course, would be a substantial structure; but as to being an ornate structure, I should be the last person in the world to urge anything of that sort, because I do not believe in overdecoration or overornamentation.

Mr. SUTHERLAND. It is estimated by the department that it will require a two-story-and-basement building, covering 15,000 square feet of ground area, and it is upon that that the estimate is made. Of course, it is to be a building of fireproof construction. The Government ought to construct no other kind of buildings, in my judgment. I can tell the Senator no more about it than appears in the report of the Supervising Architect, who is the expert employed to look into these matters and report upon them.

Mr. WETMORE. The present site, purchased in 1828, comprises 9,038 square feet. The building, with the additions made at different times since 1820, covers the entire site, except a small entrance way in one corner, with an adjoining building on the south, practically touching the Government building. There is no reserved space for fire protection, and neither the Government building nor any of the adjoining buildings are fireproof, being principally of frame construction. The Government building is placed directly on the corner of two streets—one of them narrow—with only a four or five foot sidewalk, which is blocked a part of the time by wagons delivering and taking away mail and carrying merchandise to and from the bonded warehouse.

Owing to great increase of business the present building is overcrowded and the Government is renting quarters. Recently as much as $1,450 a year has been paid for outside offices, exclusive of rent of post-office stations.

In the proposed new building the following branches of the Federal service will require accommodation: Post office, cus-

toms service, Navy pay office, War Department (headquarters Newport engineer district and constructing quartermaster), Civil Service Commission, Weather Bureau, and the Department of Justice.

The postal receipts in 20 years have increased as follows:

1892	$33,997.59
1902	58,107.75
1912	90,801.66

The post office has 59 employees, with additional carriers and clerks during the summer months.

The gross receipts of the Newport customhouse have increased from $2,372.61 in 1892 to $46,559.22 in 1912.

The gross revenue of the post office and customhouse, therefore, for 1912 was $137,360.88.

The permanent population of Newport in 1910 was 27,149. In 1913 it is about 30,000, and is increased during the summer months to about 35,000. In addition, Newport Harbor is now the headquarters for half the year of the North Atlantic Fleet, with from 10,000 to 12,000 men at maximum. Newport is the headquarters of the Narragansett Bay Naval Station, including the naval training station, with about 2,500 apprentice seamen, the Naval War College, naval torpedo station, employing 800 men, naval hospital, and the Narragansett naval coal depot. It is also the Army headquarters of the Narragansett coast-defense district, comprising Fort Adams, with a garrison of over 500 men, Fort Getty, Fort Greble, Fort Mansfield, and Fort Wetherill. The heavy official mail of the Government stations at Newport requires additional work and facilities, but for which Newport gets no credit in its statement of gross receipts.

The PRESIDING OFFICER. Without objection, the amendment will be agreed to.

Mr. SMITH of Georgia. I would rather the Chair would not put the question in that way. I wish to announce my objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 13, after line 23, to insert:

United States post office and courthouse at Chattanooga, Tenn., $55,000.

The amendment was agreed to.

The next amendment was, on page 14, after line 2, to insert:

For the completion of the tower and installation of a clock therein in the post office and courthouse at Danville, Va., $2,500.

The amendment was agreed to.

The next amendment was, on page 14, after line 5, to insert:

United States post office at Martinsburg, W. Va., $20,000.

The amendment was agreed to.

The next amendment was, on page 14, after line 7, to insert:

United States post office at Huntington, W. Va., $225,000.

Mr. KENYON. I should like to inquire of the chairman of the committee as to what necessity there is requiring an appropriation so large for Huntington, W. Va. I understand that Huntington has a population of 30,000 and an appropriation of $225,000 for a public building seems rather extravagant.

Mr. SUTHERLAND. The original building erected at Huntington some years ago cost $150,000. The town of Huntington has grown very rapidly since that time. It has become a very large business center.

I have in my hand a card which shows the old public building which is altogether inadequate. The Senator will see back of it a modern 12 or 14 story business house. As I recall it, the proposed building will accommodate not only the post office but a number of other governmental offices, including the court. I have not at hand at this moment the memorandum to which I wanted to refer.

Mr. KENYON. Does the Senator know the population of Huntington?

Mr. SUTHERLAND. It is about 30,000, as the Senator stated.

Mr. KENYON. Has it recently increased?

Mr. SUTHERLAND. I am mistaken. As reported by the last census the population was 40,000 and information we have is that it has increased very greatly since that time. The remarkable growth will be shown by a comparison of the population in 1902 with that in 1912. The population in 1902 was only 11,923 so that it has more than trebled in population during that period.

The matter was considered by the committee and it was believed that all things considered it was necessary to make this increase in the building.

I have here a statement from the Representative in Congress from that district, Mr. HUGHES. In the course of his letter he says:

The workroom of this post office is so congested that it is almost impossible to handle the business. In addition to this the court room—

I thought there was a court room—

In addition to this the court room is not more than one-third the size that is really required, and, in addition to that, it is located on a street where the noise is such that at times court has to suspend until after the heavy wagons pass by the building.

The amendment was agreed to.

The Secretary continued the reading of the bill and read to line 18, on page 15, the last clause read being as follows:

United States post office and courthouse at Jasper, Ala., $100,000.

Mr. O'GORMAN. I should like to inquire of the chairman of the committee what were the postal receipts in the town of Jasper last year?

Mr. SUTHERLAND. The town of Jasper, Ala., is not a large town.

Mr. O'GORMAN. What is the population?

Mr. SUTHERLAND. It is less than 3,000.

Mr. O'GORMAN. What are the postal receipts?

Mr. SUTHERLAND. My best recollection is that the postal receipts are over $8,000—nearly $9,000. It is a very busy town. I call attention to the fact that not only is there a post office at Jasper but the Federal court is held there. It is necessary not only to have a building for post-office purposes but for the Federal court. This is a House item. It is not a Senate committee item.

Mr. O'GORMAN. I understand that. What is the present rental paid by the Government for post-office facilities in that town?

Mr. SUTHERLAND. I am not able to tell the Senator. That is not found in the memorandum which I have from the Treasury Department.

Mr. O'GORMAN. This is simply typical of a great many provisions in the bill. Here is a town with a population of less than 3,000, with an annual postal business of about $8,000, where the probable rent now being paid by the Government is less than a thousand dollars a year, perhaps not more than $500 or $600, and it is proposed to erect a public building at an expense of $100,000.

I understand that for many years it has been the policy of the Government to erect no public buildings for post-office purposes where the annual postal receipts were less than $10,000, that being the minimum condition which would warrant an expenditure by the Government for the erection of a Federal building. Why that rule, observed for so many years, has been disregarded at this time I do not know, but I do know that in the pending bill there are provisions for 92 or 96 public buildings which would not be erected if the rule to which I refer were respected. If we are to expend $100,000 for a building in a town with less than 3,000 population, there is no limit to the waste and extravagance which will mark our public expenditures.

I should like to know very much from the chairman of the committee that recommends the bill the exact amount of rent that is now being paid by the Federal Government for post-office purposes in that town.

Mr. SUTHERLAND. The bill carries several hundred items. The chairman of the committee is unable to state to the Senator what rent is paid for this building, as the chairman has already stated. The fact is that it is a town of less than 3,000 people and the receipts of the post-office are extraordinarily large for a town of that size.

Mr. O'GORMAN. Yet you confess that the receipts do not exceed $8,000 a year.

Mr. SUTHERLAND. In addition to that there is a Federal court held there, for which quarters must be supplied. The Federal Government can not confiscate property down there and hold its court in them. It must provide quarters for the court. The amount to be expended for a public building in a town of this size is not to be determined by the post-office receipts alone nor by its population alone.

Mr. O'GORMAN. Can it not be determined fairly well by ascertaining what you could rent suitable quarters for?

Mr. SUTHERLAND. I do not think that always ought to be the test. We are providing here not for appropriations but for authorizations. In the natural course it will be four or five years before these buildings can be put up. In the meantime these towns are growing, and unless we can make the authorizations a sufficient time in advance we are lagging far behind what is necessary.

I think, in addition to all that, it is a little bit important to have the Federal Government in a town like this where it is holding its courts represented by a building, with the flag flying at the top of it, and to have the physical presence of the Federal Government in that way before the eyes of the people. I think that consideration is of some consequence.

Mr. O'GORMAN. Can you not have the American flag flying over a building that the Federal Government rents? I notice one item with respect to the State of Alabama proposed by the Senate committee for a building in the town of Greenville. The amount appropriated for that is $71,000. There is a population of 12,000. The rental paid at the present time, presumably for suitable accommodations, is but $480 a year. Capitalize that, and the extreme cost of building should not exceed $20,000. Yet this bill recommends an expenditure of $71,000; $75,000 was asked. It is estimated that $71,000 will be required.

Mr. WARREN. Will the Senator allow me?

Mr. O'GORMAN. Yes, sir.

Mr. WARREN. I do not know what town the Senator is alluding to, but these rentals are the poorest standards in the world to judge by, because oftentimes the town is, I may say, taken by the ears and the merchants and office people bid against one another in order to have the post office housed in their particular merchandise or office building.

I have in mind a piece of property which was to be rented at $1,800 a year for a business purpose. A pool was made up, and the owner rented it to the Government for $4 a year, neighbors in the town making up the difference to the owner. That rental would not show the population or business of that post office.

Mr. O'GORMAN. If there be such anxiety among owners of real estate to secure the United States Government as a tenant, why should not the Government take advantage of that keen rivalry and get cheap rents, rather than expend hundreds of thousands of dollars for buildings which are not required.

Mr. WARREN. If the Senator thinks that the Government should go into towns and undertake to make trouble and set every man's hands against another, he has a different view of the duties of the Government, or even its privileges, than I have.

Mr. O'GORMAN. The Senator from Wyoming knows that the Senator from New York has made no such suggestion. I know of no place where the Government has caused trouble by renting a building for public purposes.

Mr. WARREN. The Senator may not know of these disturbances that I speak of in smaller towns. They do occur and have occurred. I have always deprecated the practice, and the Senator would do the same, I think, if he lived in any one of those towns.

The Senator said he thought the Government ought to take advantage of these things. I think legitimate advantages should be taken by the Government, but I do not believe it is a good practice to undertake, as I said before, to sell to some grocer or dry-goods man the influence of the post office and take it out in low rent.

Mr. O'GORMAN. I should like to ask the Senator from Wyoming, who has had large experience on the Committee on Appropriations and the Committee on Public Buildings, why there has been an abandonment of the old rule which was recognized for at least 10 years, that the Government would erect no building for the use of a post office unless the postal receipts were at least $10,000 a year?

Mr. WARREN. I know of no such rule. It must have been prior to my time.

Mr. O'GORMAN. I am assured that it is the rule which has been applied. There are 92 items in this bill which would not be favorably considered if that rule were enforced now.

Mr. WARREN. I say again, in my 21 years' service, I know of no such rule, except I know that sometimes in committee, and I think this was the practice in the House committee, the proposition was made to confine, as far as possible, the buildings to those that covered towns of $10,000 postal receipts, but the House did not strictly follow it. The Senate has not followed it entirely, because in some one town the growth may be complete or it may be even receding, while in another town the surroundings are such as to show that the population must increase and double or triple or quadruple in one, two, or three years.

Mr. O'GORMAN. Mr. President, I think we ought to take the sense of the Senate on the proposition with respect to this particular item.

Mr. WARREN. What is the item, please?

Mr. O'GORMAN. The item providing for $100,000 to be spent in a building in the city of Jasper, which has a population of less than 3,000 and total postal receipts for last year amounting to $8,508.

The PRESIDING OFFICER. The Senator from New York moves to strike out lines 17 and 18, page 15.

Mr. BANKHEAD. Mr. President, with reference to the item selected by the Senator from New York, I desire to say that the town of Jasper is situated in the very center of the richest coal field in Alabama. A few years ago there was not a brick building in the town. Recently three trunk railroads have passed Jasper. The population has doubled two or three times in the last four or five years.

The county of Walker, in which Jasper is situated, has recently completed a courthouse at a cost of $175,000. They have magnificent hotels and department stores, and it is one of the most rapidly growing towns that I know of anywhere in the country. The post-office rentals are very nominal, perhaps because the business men of the town wanted the post office located at a convenient point for the patrons of the post office. Therefore they made a contract, or arrangement, or a pool, as had been suggested, by which perhaps $30 a month is paid by the Government for the office.

In addition to the post office a Federal court is held there.

The estimate of the department for this building was $135,000. It was the estimate of the Treasury Department that that amount was necessary to construct a post office and courthouse at this rapidly growing town. Neither my colleague nor myself asked the committee to increase it; we were willing to accept that amount.

Again, I think the Senator from New York referred to an item in this bill for Greenville, Ala., and designated it as a Senate amendment. I think he is mistaken about that. I think that item came over from the House in the bill.

Mr. O'GORMAN. I have the record here showing the Senate amendment.

Mr. BANKHEAD. I know that I did not go before the Committee on Public Buildings and Grounds and ask for an increase for anything or for any additional building, and I do not think my colleague made any request for this one. That is all I care to say about the public building contained in this item for Jasper and the post office and courthouse to be provided. The estimate of the department was that $135,000 was necessary to do it. The House appropriated $100,000, and I hope the Senate will stand by the action of the House.

Mr. BRISTOW. Mr. President, I understand the Senator from New York [Mr. O'GORMAN] has moved to strike out lines 17 and 18, on page 15.

Mr. O'GORMAN. Yes.

Mr. BRISTOW. I desire to say that I can not get the consent of my mind to vote for a $100,000 building in a town that has not even a free-delivery postal service, and with a population of less than a thousand people.

Mr. O'GORMAN. Mr. President, I only select this as an illustration of what is becoming a crying abuse and evil, which the Senate ought to correct. I should be glad to see every town and city in Alabama have a splendid edifice if it were possible for the Government to afford similar structures for every small town and village throughout the country.

The Senator tells us that at the present time the Government is paying $30 a month—$360 a year—for the post office in that town. That sum capitalized would represent a structure worth about $7,000. It is now proposed that, instead of spending $360 a year for rent, we expend at once $100,000 for a structure which, at 5 per cent, would represent the minimum cost of $5,000 a year. If the Senate is prepared to use public funds in that indiscriminate manner, the Senate, of course, can take the responsibility; I can not.

I understand that my attitude may imperil provisions in this bill which, I think, are vitally necessary to the State of New York at this time. But this consideration will not deter me from doing what I conceive to be my duty. I hope at some time that the experience of this body will evolve some other method of legislation, rather than these omnibus bills, which contain some concededly meritorious propositions, but, at the same time, many measures which can not be defended.

Mr. SWANSON. Mr. President, as a member of the Committee on Public Buildings and Grounds, I desire to say that the committee made it a rule to report no appropriation for a building in excess of the estimates made by the Treasury Department. To expect this committee to visit the different localities, to ascertain the value of the land, and the land needed in every individual case for the purposes of the Government and the building needed would be to expect an utter impossibility. I wish to say for the committee that the rule was established that the committee would report an appropriation for no building in excess of the amount recommended by the Treasury Department after an investigation. That is the machinery which Congress has seen proper to establish for the purpose of ascertaining the cost of the land, the cost of the building, and what the Government will need. The Secretary of the Treasury writes to the Post Office Department, to the Department of Justice, to the Agricultural Department, to the customs department to ascertain the amount of space needed, if a building is recommended for construction, and what will be needed for

some time in the future. Then they figure the cubic feet of space required, and figure what that space will cost on an average from estimates which have been made in the past. If anyone can suggest to the committee any other or better way to ascertain what can be done, I should like to know it.

Mr. O'GORMAN. Mr. President, I simply wish to ask the Senator from Virginia a question.

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I do.

Mr. O'GORMAN. The Senator from Virginia asks if there is any other way that I know by which this information may be obtained. I will try to answer that by the inquiry: If you get what is needed for $360 a year, what is the necessity of taking $100,000 of public money to put up a building?

Mr. SWANSON. Mr. President, it will be four years before that building can be constructed. If you are going to construct a building there at all, you had as well construct one which is necessary for Government purposes.

This bill carries millions of dollars. Why? Because when public buildings were heretofore constructed they were not constructed with a view to their being satisfactory for more than 25 or 30 years. In the very bill which the Senator from New York is looking over there are provisions for additional buildings, for pulling down old buildings, and putting up new ones. I think the wise policy is if you are going to erect a building at any place to erect one which will answer its purpose certainly for 25 or 50 years. It is absolute loss and folly to construct a building and in 5 or 10 years have to pull it down. By so doing you lose what you have put in it.

Take the small buildings which are complained of by different Senators. We have inaugurated a system of parcels post. There is scarcely a post office in the United States to-day without the parcels post. Nearly all those post offices are crowded, and they will be more crowded in five years from now. In five years from now there is not one of those buildings which it will not be impossible to occupy. The Government will be compelled to construct new buildings on account of the great increase of the parcels post.

I repeat, the committee has recommended no appropriation except on an estimate made by the Treasury Department. I wish to say for the committee, and, speaking for it, I, as a member of the committee, and the other members refused to vote to report any appropriation unless the Treasury Department would estimate for it. Some Senators came and represented to the committee that the appropriation provided for a building was not adequate; that conditions had changed; that rural free delivery routes had been established; that more space was needed, and so forth. If I recollect correctly, every such Senator was told, "Unless you can get from the Treasury Department, by its method of investigation, an estimate of what is needed we can not recommend the appropriation." The committee has refused to increase such appropriations even at the request of Senators.

The Senator from New York has a provision, if I mistake not, to buy land for a court in New York, is it not?

Mr. O'GORMAN. It is.

Mr. SWANSON. For a court, though they have already got a good court, a far better court, which far exceeds anything Jasper has got. Here is an appropriation of $3,000,000. Why? Because it is needed, because the court is congested, and to get land now, because the land will become more valuable in the future. It seems to me that for a town like Jasper, Ala., that is growing by leaps and bounds, with a courthouse and a post office and other buildings, the appropriation is not excessive when the Treasury Department has estimated that $31,000 would be required for the future. Instead of being extravagant the committee has been economical. If you want to erect a post office and courthouse building there, I do not think it is wise to put it off. You can put one there for $10,000; but two years from now you will want to tear it down and to put up one to cost $20,000. You can then put up one for $20,000, but two years from that time you will be wanting to tear that down and put up another, and 40 or 50 years from now they will want more. There has been an absolute waste of public money by putting up small, inconsiderable buildings, which have been torn down and others put up in their stead.

The only question to decide is, whether you want a building there; and that is for the Senate to decide. If they want a building there, you had better put up one which will last for 25 years, rather than a small building that will hardly answer for present purposes, and then be eliminated by putting a new structure there.

The committee has had that difficulty to contend with; and if there is any criticism of these expenses and of the amount which is proposed to be given for the construction of buildings, it lies with the Treasury Department, which has made the estimates for the purpose. I think the economical way is to let every building stand on its own merits. I think these omnibus bills, whether claims bills, whether river and harbor bills, whether public building bills, or whether pension bills, increase expenditures. I think if you want to have economy in these matters and Congress had the time, it would be better to let every measure stand on its own individual merits. This bill has been prepared along the lines I have indicated, and the estimates of the Treasury Department have not been exceeded, so far as I know, in a single instance.

Mr. O'GORMAN. Mr. President, some reference has been made to a provision in this bill making an appropriation for a site for a new Federal building in the city of New York. Three million dollars was the amount fixed by the subcommittee. A bill for this purpose was introduced by me upward of a year ago. Everyone seemed to recognize the necessity of a new building in New York. The Department of Justice, the Federal judges, and all the public officials recognized its urgent need; and $3,000,000 was allowed for a site. In New York the postal receipts exceed $25,000,000 a year—not $8,000 a year.

Mr. SWANSON. If the Senator will permit me, that item is not for a post office, is it?

Mr. O'GORMAN. It is for the purpose of doing away with the present post office and erecting a separate courthouse building and a separate post office, the immediate provision for the post office being deferred until the new court building is constructed.

Mr. SWANSON. Mr. President, that shows the unwisdom of the policy advocated by the Senator from New York. When the original post office and courthouse in New York was constructed, if they had made it large enough to answer the purposes at that time and to allow for future growth and expansion, we would not have to go to the expense of possibly twenty-five or fifty million dollars, before we get through, to provide proper Federal facilities in the city of New York.

Mr. O'GORMAN. I have to observe, Mr. President, that if a town of 3,000 people justifies a public expenditure of $100,000 for a Federal building, the city of New York, with its more than 5,000,000 people, would be entitled to several hundred million dollars of public money for public buildings.

Of the $25,000,000 of postal receipts in the post office in the city of New York annually, $20,000,000 is clear profit to the Government, making it possible to extend our postal system throughout different parts of this country at a minimum of loss to the Government because of the $20,000,000 profit annually derived from the operation of the New York office. Moreover, the United States courts in New York City contribute to the National Treasury annually upward of $5,000,000, the proceeds of fines and other proceedings in those courts. But there is nothing in common between the provision for New York and the one which I have ventured to criticize; but I have to observe that if one town of 3,000 people is entitled to a public building costing $100,000, then every other town throughout the country of the same size is entitled to the same treatment, and it would not be long before the National Treasury would be bankrupt if this system were tolerated.

Mr. BANKHEAD. Mr. President, the Senator from New York keeps on insisting that this town has a population of 3,000. We have a thousand children in our public schools in Jasper and two magnificent school buildings. The population is more than 6,000. Jasper has more than doubled in population since the census of 1900, and within the next five years it will double in population if it keeps on growing as it has done in the past.

Mr. SUTHERLAND. Mr. President, the amendment offered by the Senator from New York is not in order now, because the Senate has agreed to take up the bill and first consider committee amendments.

The PRESIDING OFFICER. Under the unanimous-consent agreement the amendment of the Senator from New York will not be in order until after the committee amendments have been acted upon.

Mr. O'GORMAN. Very well.

Mr. SMITH of Arizona. Mr. President, I did not catch the ruling of the Chair. Did the Chair rule that committee amendments must first be passed on, and then, at the end, when they have been disposed of, that we may have the right to amend the committee amendments?

The PRESIDING OFFICER. The Senate agreed by unanimous consent that the committee amendments should be first considered.

Mr. SMITH of Arizona. Then we can amend them afterwards?

The PRESIDING OFFICER. Of course the committee amendments can be amended.

Mr. BACON. As they are taken up.

The PRESIDING OFFICER. As they are taken up.

Mr. SMITH of Arizona. That is what I meant.

Mr. BACON. The inquiry of the Senator from Arizona was whether they could be subsequently taken up. As I understand the ruling of the Chair, when a committee amendment is presented it is open then to further amendment?

The PRESIDING OFFICER. Certainly; but individual amendments are not in order until the committee amendments have been disposed of.

Mr. SMITH of Georgia. I understood that the agreement was that the bill should be read and that it could be amended paragraph by paragraph as we reached them. I think that is the mode upon which we have been proceeding.

The PRESIDING OFFICER. The present occupant of the chair was not in the chair when the agreement was made; but he is informed that the agreement was the usual one, to the effect that committee amendments were to be first considered.

Mr. GALLINGER. Mr. President, I chanced to be in the chair at the time, and the agreement was that the committee amendments should first be considered. There was no objection when the request was put by the Chair.

Mr. O'GORMAN. What becomes of my motion, Mr. President, to strike out?

The PRESIDING OFFICER. It will have to wait until the committee amendments are disposed of.

Mr. O'GORMAN. Very well.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, in section 3, page 15, after line 20, to insert:

United States post office at Globe, Ariz., $100,000.

Mr. KENYON. Mr. President, I wish we might have some information as to that. I understand that Globe is a town of about 7,000 people. Is court held there also?

Mr. SUTHERLAND. No; but there is a customhouse at Globe, Ariz.

Mr. KENYON. I will ask the Senator if he can inform me as to the population of Globe?

Mr. SUTHERLAND. I can not give the Senator the exact figures. The population is less than 8,000—between 7,000 and 8,000. I said there was a customhouse at Globe, Ariz. I beg the Senator's pardon. I was looking at the time at the previous item. There is no customhouse at Globe. I was mistaken. There is, however, a branch office of the Civil Service Commission there.

Mr. KENYON. Do they need a building?

Mr. SUTHERLAND. No; they do not need a building, but they need some room.

Mr. KENYON. Objection was made to the item of $400,000 for Newport, which is a city of 30,000 people, while this is a city of but 7,000 people, and it is proposed to appropriate $100,000 for it.

Mr. SUTHERLAND. The postal receipts are $18,718, according to the last statement. The Treasury Department estimates that the necessary building will cost $100,000 for a one-story and basement building covering 6,000 square feet of ground. The committee have no other way of determining what the necessities of the towns are except from the report of the experts of the Treasury Department.

Mr. O'GORMAN. Mr. President, may I ask the Senator from Utah, the chairman of the committee, whether this provision for a public building at Globe, Ariz., for which $100,000 is to be appropriated, is intended to cover the purchase of a site alone?

Mr. SMITH of Arizona. Mr. President, if the Senator will permit me, as I understand, the site has already been purchased at Globe. There are from 7,500 to 8,500 or 9,000 people there. It is a great mining district, supplying a great country. Some of the largest mines in the territory are in that city.

Mr. THOMAS. The Senator means in that State.

Mr. SMITH of Arizona. I will assure the Senator that it does not fall within any of the objections I have heard him making, for the town is very much in need of it. Arizona has had the misfortune of having received no appropriations whatever for 30, 40, or 50 years, and these that may seem large because you are unused to them, I can assure the Senator are of sufficient necessity.

Mr. SUTHERLAND. Mr. President, the last report which we have from the Treasury Department with reference to Globe is that the postal receipts for 1912 were $21,142.75. The figures I gave before were $18,718, applying to a previous year. The same report shows that 10 years prior to that time the postal receipts were $5,549.84, showing that the postal receipts had quadrupled in that period of time.

There is one thing that ought to be said with reference to practically all of these western towns. They are the centers of large areas of country. The people about them are engaged in the cattle business, the sheep business, the mining business, and so on. They are very unlike some of the towns in the Eastern States, where they are very numerous, each town not being the center of a large population. They are growing more rapidly than the eastern towns; and of course all of those elements are taken into consideration by the Treasury Department, as well as by the committee, in passing upon these amounts.

Mr. DU PONT. Mr. President, I wanted simply to call the attention of the Senator from New York to a single point. It seems to me that it is fallacious to base the necessities of a postal building upon the size of the population, because frequently smaller towns are the centers of a network of rural deliveries from the surrounding country, which bring a much enlarged amount of business to such towns and make it necessary for them to have much larger facilities than the population would seem to indicate. This is particularly true, and becoming more and more true every day, because of the parcel post, which brings an increasing amount of packages of every description, which require room and space to handle them. An estimate, therefore, of the size of a post-office building based solely on population would seem to be misleading.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 16, line 1, after the word "California," to strike out "$100,000" and insert "$135,000," so as to make the clause read:

United States post office at Bakersfield, Cal., $135,000.

The amendment was agreed to.

The next amendment was, on page 16, line 5, after the word "Colorado," to strike out "$55,000" and insert "$60,000," so as to make the clause read:

United States post office at Fort Morgan, Colo., $60,000.

The amendment was agreed to.

The next amendment was, on page 16, after line 6, to insert:

United States post office at Naugatuck, Conn., $100,000.

The amendment was agreed to.

The next amendment was, on page 16, after line 10, to insert:

United States post office at Seymour, Conn., $60,000.

The amendment was agreed to.

The next amendment was, on page 16, after line 14, to insert:

United States post office at Bartow, Fla., $60,000.

The amendment was agreed to.

The next amendment was, on page 16, after line 15, to insert:

United States post office at De Land, Fla., $60,000.

The amendment was agreed to.

The next amendment was, on page 17, line 14, after the word "Kentucky," to strike out "$80,000" and insert "$100,000," so as to make the clause read:

United States post office at Ashland, Ky., $100,000.

The amendment was agreed to.

The next amendment was, on page 17, after line 15, to insert:

United States post office at Lancaster, Ky., $55,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 5, to insert:

United States post office, land office, and Weather Bureau building at Alliance, Nebr., $75,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 8, to insert:

United States post office at Falls City, Nebr., $65,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 10, to insert:

United States post office at Wahoo, Nebr., $60,000.

The amendment was agreed to.

The next amendment was, on page 20, line 20, after the words "New York," to strike out "$450,000" and insert "$550,000," so as to make the clause read:

United States post office at Syracuse, N. Y., $550,000.

The amendment was agreed to.

The next amendment was, on page 20, line 17, after the words "North Carolina," to strike out "$55,000" and insert "$65,000," so as to make the clause read:

United States post office at Shelby, N. C., $65,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 20, to insert:

United States post office at Jamestown, N. Dak., $75,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 22, to insert:

United States post office at Valley City, N. Dak., $75,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 24, to insert:

United States post office at Ashland, Ohio, $100,000.

The amendment was agreed to.

The next amendment was, at the top of page 21, to insert:

United States post office at Sandusky, Ohio, $150,000.

The amendment was agreed to.

The reading of the bill was continued down to the following item on page 21, line 8:

United States post office at Roseburg, Oreg., $100,000.

Mr. CHAMBERLAIN. Mr. President, I rise to a parliamentary inquiry. I suppose the Senate is now considering only the amendments of the committee?

The PRESIDING OFFICER. That is all.

Mr. CHAMBERLAIN. I desire to offer an amendment to that item later.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 21, after line 10, to insert:

United States post office at Ridgway, Pa., $80,000.

The amendment was agreed to.

The next amendment was, on page 21, line 23, after the words "South Carolina," to strike out "$225,000" and insert "$265,000," so as to make the clause read:

United States post office at Columbia, S. C., $265,000.

The amendment was agreed to.

The next amendment was, on page 22, line 3, after the words "South Dakota," to strike out "$60,000" and insert "$65,000," so as to make the clause read:

United States post office at Redfield, S. Dak., $65,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 4, to insert:

United States post office at Madison, S. Dak., $65,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 12, to insert:

United States post office at Martin, Tenn., $50,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 15, to insert:

United States post office at Memphis, Tenn., $160,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 17, to insert:

United States post office at Bay City, Tex., $60,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 18, to insert:

United States post office at Stamford, Tex., $50,000.

The amendment was agreed to.

The next amendment was, on page 22, line 25, after the word "Yoakum," to insert "Texas," so as to make the clause read:

United States post office at Yoakum, Tex., $65,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 4, to insert:

United States post office at Richfield, Utah, $55,000.

Mr. SMITH of Georgia. Mr. President, I should like to ask the size of that place and the amount of the postal receipts.

Mr. SUTHERLAND. It is a place of 3,600 people. The postal receipts are $5,316.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 23, after line 5, to insert:

United States post office at Warrenton, Va., $50,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 8, to insert:

United States post office at Pulaski, Va., $50,000.

The amendment was agreed to.

The next amendment was, on page 23, after line 11, to insert:

United States post office at Waynesboro, Va., $52,500, $2,500 of which may be used, in the discretion of the Secretary of the Treasury, for the acquisition, by purchase, condemnation, or otherwise, of a site, in addition to the sum heretofore authorized for that purpose.

The amendment was agreed to.

The next amendment was, on page 23, after line 18, to insert:

United States post office at Wenatchee, Wash., $85,000.

The amendment was agreed to.

The next amendment was, at the top of page 24, to insert:

United States post office and land office at Vancouver, Wash., $140,000.

The amendment was agreed to.

The next amendment was, on page 24, after line 15, to insert:

United States post office at Basin, Wyo., $50,000.

Mr. SMITH of Georgia. Mr. President, I desire to make the same inquiry about this place, as to the size of the place and the size of the postal receipts.

Mr. WARREN. Mr. President, the present inhabitants who get mail at Basin number something over 2,000, and the post-office receipts are about $6,000. I will say to the Senator that the office is located not far from one of the large Government irrigation systems that cost several million dollars and near several strong, large corporate and individual irrigation projects; oil and natural gas have lately been developed in this valley, and it is a place that is rapidly increasing in population and business and will increase still more rapidly.

Mr. SMITH of Georgia. I find, by reference to the report of the Treasury Department, that the population of Basin is given as 763 people, and the postal receipts as $5,700.

Mr. WARREN. Mr. President, of course, if the Senator wishes to strike out that item, I shall make no objection; but I wish to say this, though it is rather a pitiful thing to have to state:

When the selection was made for the taking of the last United States census in my State, a man who had taken the census there 20 years ago, when a young man, and had taken it most admirably, was an applicant and was appointed. Just at the time when the census was entering upon its busiest season an illness attacked this superintendent and within a short time he was hopelessly insane and confined in an asylum. His assistant, who was appointed to take the census in the northern part of the State, either resigned or was discharged. The consequence of all of this was that the census in some of those places in northern Wyoming and elsewhere was utterly and entirely incomplete. For the sake of avoiding comment and harrowing up painful memories, the delegation from that State has raised no issue with the Census Office. But when a town or city has had enumerated as its inhabitants only a fraction of the number of votes duly registered and voted, we, of course, know that there has been an error.

If the Senator wishes to stand upon old and erroneous figures rather than upon my statement, I have nothing further to say. But the town itself is one of the most growing towns, one of the most promising towns, in the entire West. Long before we shall get to the point where this building will be actually built it will be too small for that town, although I shall not now ask to have the amount in the bill increased.

Another thing, the entire amount provided in this bill for the whole State of Wyoming is only $167,500. If the Senator from Georgia and the Senate think that is too much, wipe it out.

Mr. SMITH of Georgia. Mr. President, I only had the record before me; and I felt that at least, seeing the statement that there were only some 700 and odd people there, something else ought to be in the RECORD before quietly permitting it to pass.

Mr. WARREN. The Senator is right about that, and I am only sorry I had to make this painful explanation; but that is the true status of the case.

Mr. SUTHERLAND. Mr. President, the report of the Treasury Department shows that over 2,000 people are served from the post office, which indicates that there is a ranching population, or mining population, or something of that kind, close by.

Mr. O'GORMAN. Mr. President, may I ask the Senator from Utah a question? Is it a fact that at the present time the post-office rental is but $374 per annum?

Mr. WARREN. If the Senator in charge of the bill will allow me to answer that, the town of Cody and the town of Basin are both, in the bill before us, enumerated for $50,000 each. In one the rental is between fifteen and sixteen hundred dollars per annum, and in the other it is about $300. That, as I indicated in my earlier remarks, is because of the bidding of one against the other, on account of the location of the post office in the town.

The amendment was agreed to.

The next amendment was, on page 24, after line 16, to insert:

United States post office and other Government offices at Cody, Wyo., $50,000.

The amendment was agreed to.

The next amendment was, in section 4, page 24, line 20, after the words "directed to," to strike out "acquire" and insert "contract for the acquisition," and in line 21, after the word "purchase," to strike out "condemnation," so as to read:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the acquisition, by purchase or otherwise, a site and to contract for the erection and completion thereon of a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, complete, for the use and accommodation of the United States post office and other governmental offices in each of the cities enumerated in this section, within its respective limit of cost, including site, hereby fixed.

The amendment was agreed to.

The next amendment was, on page 25, line 4, after "$65,000," to insert "to be erected at such point as shall be equally convenient, so far as possible, to the cities of Decatur and New Decatur," so as to read:

United States post office at Decatur, Ala., $65,000, to be erected at such point as shall be equally convenient, so far as possible, to the cities of Decatur and New Decatur.

The amendment was agreed to.

The next amendment was, on page 25, line 11, after the words "post office," to strike out "United States courts" and insert "courthouse," so as to read:

United States post office, courthouse, and jail at Cordova, Alaska, $100,000.

The amendment was agreed to.

The next amendment was, on page 25, after line 12, to insert:

United States customhouse at Nogales, Ariz., $110,000.

Mr. SMITH of Arizona. Is it in order now to offer an amendment to the amendment of the committee?

The PRESIDING OFFICER. An amendment to the amendment may be offered.

Mr. SMITH of Arizona. I move to strike out, in line 14, "$110,000" and to insert in lieu thereof "$175,000." I ask the Secretary to read from the desk a letter received from the Treasury Department in regard to this item.

The PRESIDING OFFICER. Without objection, the letter will be read by the Secretary.

The Secretary read as follows:

FEBRUARY 20, 1913.

Hon. GEORGE SUTHERLAND,
Chairman Committee on Public Buildings and Grounds,
United States Senate.

SIR: At the request of the Hon. MARK A. SMITH, I have the honor to refer to report of this department, dated May 10, 1912, on Senate bill 6565. This report was for a two-story building of 5,000 square feet ground area, to cost $110,000, the cost of site being estimated at $10,000, for the accommodation of Federal officials in the city of Nogales, Ariz.

Since this report was submitted additional information has been received indicating that more space will be required by the customs service, and that accommodations are needed for the Civil Service Commission and for the Department of Agriculture.

In order to provide for the needs of the public service it is now estimated that a three-story building of 5,000 square feet ground area will be required, and the cost of such a building of fireproof construction is estimated at $175,000 if faced with stone. If the building is faced with brick the sum of $165,000 will be sufficient.

Respectfully,

R. O. BAILEY, *Acting Secretary.*

Mr. SMITH of Arizona. Mr. President, I will not detain the Senate further than to say that this is one of the important ports of entry in the Southwest. I do not think I misstate the fact when I say that the collections from that port are something over $300,000 annually that are turned into the Treasury. On the American side of the line our customs quarters are a disgrace to a civilized country. On the Mexican side of the line they have a building worthy of any civilized people. It is a common criticism by anyone who goes through that port, which is on a railroad that is destined, as soon as a short block is closed to Guadalajara, to open a line of transportation by rail directly from the City of Mexico along the western coast of Mexico and the United States, through the towns of Nogales and Tucson, in Arizona, through Los Angeles and San Francisco, to Portland, Oreg. Nogales is destined to be a port that will, in my judgment, within a few years after the unfortunate conditions now existing in Mexico have been somewhat modified, collect more than a million dollars a year in customs duties.

It would be ridiculous to erect a $110,000 building there. We ought to have not only the customhouse, but in addition to what the Treasury Department has said, we should have some place for the detention of the many people who are arrested there, who come across the line against our laws. They are now taken long distances, at great expense, and tried and sent back to the place where arrested, when there should be a provision on the very border where these matters could be attended to and these immigrants heard and admitted or rejected, as the case may be, at more convenience and less expense to the United States.

Besides, in the examination of our customs imports there, when our people come in from Mexico their baggage is exposed to the weather out on the platform of a railroad depot or shoved into dirty and overcrowded and disgraceful quarters.

I hope the Senate will at least let the amount go in the bill as recommended in the letter just read from the desk. I think it is not more than half the amount which will be required within the next 10 years for the accommodation of that port. I hope there will be no objection to the amendment. There should not be, for sooner or later—and I think before the present appropriation becomes available—the necessities of the situation there will more than justify twice what I am now contending for.

Mr. SUTHERLAND. Mr. President, the Senate committee gave very careful attention to this matter and it was the unanimous opinion that an appropriation of $110,000 would be sufficient. It provides only for a customhouse. It does not include the post office; it does not include anything else.

I recognize what the Senator from Arizona says, that Nogales is an important place, and that the Mexican Government has upon the other side of the line a building which may have cost more money than this one will cost; but it was the judgment of the committee that, all things considered, $110,000 would be sufficient for a customhouse building.

I hope the amendment suggested by the Senator from Arizona to the amendment of the committee will not be agreed to.

Mr. SMITH of Arizona. Mr. President, the committee was of that opinion before they got the statement I had read at the desk. I had no doubt that the further investigation of the department and its report as read would have some weight with the committee, because if it was only a customhouse building it is still not enough money. It may be possible that they can put the post office in it, but I hardly think so. But it is not enough money for the customhouse alone. Besides, the customhouse may be in a position in that growing town where it might not be convenient to the line of the railroad traffic and to the importers and travelers. The proper location of the customhouse might be very inconvenient to the patrons of the post office. That is possible. On the contrary, it may be very convenient. I think the present appropriation would serve for the next six or seven years for both purposes, but ultimately one building at that price—$110,000—can not possibly accommodate both post office and customhouse.

I hope the chairman of the committee will not insist on cutting the item down any smaller than the Treasury Department last reported. In my judgment it would be simply throwing that much money away in building a customhouse so insignificant that it will bring on the United States of America the ridicule of the world. Men from every part of the world passing across that line will see that it is in marked contrast with the building erected by the southern Republic within a few hundred yards of it. My national as well as State pride impels me to plead with the Congress to protect both State and Nation from the just contempt of the balance of the world.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arizona to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 25, after line 16, to insert:

United States post office at Prescott, Ark., $50,000.

The amendment was agreed to.

The next amendment was, on page 26, line 3, after the words "post office," to insert "and other Government offices," and in line 4, before the word "California," to strike out "Willows" and insert "Willow," so as to read:

United States post office and other Government offices at Willow, Cal., $75,000.

The amendment was agreed to.

The next amendment was, on page 26, line 5, after the words "post office," to insert "land office, and other Government offices," so as to read:

United States post office, land office, and other Government offices at Glenwood Springs, Colo., $100,000.

The amendment was agreed to.

The next amendment was, on page 26, after line 10, to insert:

United States post office and customhouse at Apalachicola, Fla., $75,000.

The amendment was agreed to.

The next amendment was, on page 27, after line 4, to insert:

United States post office at Geneseo, Ill., $60,000.

The amendment was agreed to.

The next amendment was, on page 27, after line 10, to insert:

United States post office at Mount Carmel, Ill., $75,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 10, to insert:

United States post office at Girard, Kans., $75,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 11, to insert:

United States branch post office at North Topeka, Kans., $71,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 19, to insert:

United States post office and customhouse at Fort Fairfield, Me., $80,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 23, to insert:

United States post office at Cambridge, Md., $90,000.

The amendment was agreed to.

The next amendment was, on page 29, line 1, after the word "Maryland," to strike out "$80,000" and insert "$90,000," so as to read:

United States post office at Salisbury, Md., $90,000.

The amendment was agreed to.

The next amendment was, on page 29, line 8, after the word "donated," to strike out "$90,000" and insert "$175,000," and in line 11, after the word "section," to strike out "twenty-six" and insert "thirty-four," so as to read:

United States post office at Malden, Mass., on a site to be donated, $175,000: *Provided*, That the construction of said building shall not be begun until the site for same has been donated and title thereto accepted by the Secretary of the Treasury, as provided in section 34 of this act.

The amendment was agreed to.

The next amendment was, on page 29, after line 14, to insert:

United States post office at Winchester, Mass., $75,000.

The amendment was agreed to.

The next amendment was, on page 29, after line 20, to insert:

United States post office at Hastings, Mich., $81,000.

The amendment was agreed to.

The next amendment was, on page 29, after line 21, to insert:

United States post office at Midland, Mich., $70,000.

The amendment was agreed to.

The next amendment was, on page 30, after line 10, to insert:

United States post office at Harrisonville, Mo., $52,500.

The amendment was agreed to.

The next amendment was, on page 30, after line 21, to insert:

United States post office at Fallon, Nev., $60,000.

Mr. KENYON. I wish that we may have some information on this appropriation. I understood that Fallon, Nev., had a population of 740. I may be in error.

Mr. SUTHERLAND. According to the last census it had a population of 2,500. The Senator probably is in error there. I visited the town a year or two ago. It is in the center of a very large irrigating project which is being settled upon. It is a new town and has had a wonderful development.

Mr. KENYON. What are the postal receipts?

Mr. SUTHERLAND. The postal receipts in the last report we had were $5,970. They may be more now. That is not the last report.

The amendment was agreed to.

The next amendment was, on page 30, after line 22, to insert:

United States post office at Winnemucca, Nev., $65,000.

The amendment was agreed to.

The next amendment was, at the top of page 31, to insert:

United States post office at Franklin, N. H., $90,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 6, to insert:

United States post office at Raton, N. Mex., $75,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 7, to insert:

United States post office and courthouse at Santa Fe, N. Mex., $295,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 22, to insert:

United States post office at Chapel Hill, N. C., $65,000.

The amendment was agreed to.

The next amendment was, on page 32, after line 10, to insert:

United States post office at Altus, Okla., $82,500.

The amendment was agreed to.

The next amendment was, on page 32, after line 13, to insert:

United States post office and other Government offices at Shawnee, Okla., $145,000.

The amendment was agreed to.

The next amendment was, on page 32, after line 18, to insert:

United States post office at Phoenixville, Pa., $80,000.

The amendment was agreed to.

The next amendment was, on page 32, after line 22, to insert:

United States post office and other Government offices at State College, Pa., $75,000.

The amendment was agreed to.

The next amendment was, on page 34, after line 6, to insert:

United States post office at Clinton, S. C., $60,000.

The amendment was agreed to.

The next amendment was, on page 34, after line 12, to insert:

United States post office and land office at Chamberlain, S. Dak., $60,000.

The amendment was agreed to.

The next amendment was, on page 34, after line 20, to insert:

United States post office at Denton, Tex., $75,000.

The amendment was agreed to.

The next amendment was, on page 34, after line 23, to insert:

United States post office at Gilmer, Tex., $55,000.

The amendment was agreed to.

The PRESIDING OFFICER. The Chair will suggest to the chairman of the committee that, on page 34, line 21 should be placed below lines 22 and 23. The clerks can be authorized to change the order of those lines.

Mr. SUTHERLAND. Let the lines be transposed so as to bring the item for Denton, Tex., and the item for Gilmer, Tex., together.

The PRESIDING OFFICER. That will bring the Tennessee items together. That change will be made.

The next amendment was, on page 35, after line 2, to insert:

United States post office at Honey Grove, Tex., $50,000.

The amendment was agreed to.

The next amendment was, on page 35, after line 4, to insert:

United States post office at Orange, Tex., $60,000.

The amendment was agreed to.

The next amendment was, on page 35, after line 9, to insert:

United States post office at Eureka, Utah, $60,000.

The amendment was agreed to.

The next amendment was, on page 35, after line 10, to insert:

United States post office at Vernal, Utah, $50,000.

Mr. SUTHERLAND. After the word "office," I move to insert "and other Government offices."

Mr. KENYON. I wish to ask the Senator what are the postal receipts of this town?

Mr. SUTHERLAND. The postal receipts were $5,548 and a population is served of about 7,000. The town is in the center of a valley and there is a farming population with farm lands all about it. They get their mail at that office. I can look up the exact population in the incorporated town.

Mr. KENYON. I understand the population is 836.

Mr. SUTHERLAND. I should say that there is a population of at least 2,000. Besides that there is a land office at Vernal and some other offices.

The PRESIDING OFFICER. The amendment proposed by the Senator from Utah to the amendment will be stated.

The SECRETARY. After the words "post office" insert "and other Government offices."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 35, after line 11, to insert:

United States post office and other Government offices at Spanish Fork, Utah, $50,000.

The amendment was agreed to.

The next amendment was, on page 35, after line 15, to strike out:

United States post office at Waynesboro, Va., $52,500, $2,500 of which may be used, in the discretion of the Secretary of the Treasury, for the acquisition, by purchase, condemnation, or otherwise, of a site, in addition to the sum heretofore authorized for that purpose.

The amendment was agreed to.

The next amendment was, on page 36, line 4, after the word "Virginia," to strike out "$50,000" and insert "$55,000," so as to make the clause read:

United States post office at Front Royal, Va., $55,000.

The amendment was agreed to.

The next amendment was, on page 36, line 6, after the word "Virginia," to strike out "$55,000" and insert "$62,000," so as to make the clause read:

United States post office at Leesburg, Va., $62,000.

The amendment was agreed to.

The next amendment was, on page 36, after line 15, to insert:

United States post office at Rhinelander, Wis., $91,000.

The amendment was agreed to.

The next amendment was, on page 36, after line 17, to insert:

United States post office at Ripon, Wis., $75,000.

The amendment was agreed to.

The next amendment was, in section [illegible], page 36, line 22, after the words "directed to," to strike out "acquire" and insert "contract for the acquisition," so as to make the clause read:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the acquisition, by purchase, condemnation, or otherwise, a suitable site for the United States post office and other governmental offices in each of the cities enumerated in this section within its respective limit of cost hereby fixed.

Mr. SUTHERLAND. On page 36, line 23, after the word "otherwise," I move to insert the word "of."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 36, line 23, after the word "otherwise," in the amendment of the committee, it is proposed to insert the word "of," so as to read:

SEC. 5. That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the acquisition, by purchase, condemnation, or otherwise, of a suitable site for the United States post office and other governmental offices in each of the cities enumerated in this section within its respective limit of cost hereby fixed.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 37, after line 12, to insert:

United States post office at Prescott, Ariz., $5,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 13, to insert:

United States post office at Conway, Ark., $5,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 17, to insert:

United States post office at Forrest City, Ark., $5,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 22, to insert:

United States post office at Canyon City, Colo., $15,000.

The amendment was agreed to.

The next amendment was, at the top of page 38, to insert:

United States post office at Monte Vista, Colo., $10,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 2, to insert:

United States post office and courthouse at Montrose, Colo., $15,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 4, to insert:

United States post office and land office at Sterling, Colo., $15,000.

The amendment was agreed to.

Mr. ASHURST. Mr. President, adverting to the item making an appropriation for a post-office site at Prescott, Ariz., if it be in order, I should like to propose an amendment increasing the amount.

The PRESIDING OFFICER. It will be necessary to reconsider the vote by which that amendment was adopted. Without objection, the vote by which the amendment on page 37, line 13, was adopted is reconsidered, and the amendment is before the Senate and is open to amendment.

Mr. ASHURST. I move that the sum of $5,000 in that amendment be stricken out and that $7,500 be inserted in lieu thereof.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 37, line 13, after the name "Arizona," it is proposed to amend the committee amendment by striking out "$5,000" and inserting "$7,500," so as to read:

United States post office at Prescott, Ariz., $7,500.

Mr. SUTHERLAND. Mr. President, the committee gave consideration to that item. Prescott has a population of about 5,000, as I remember.

Mr. ASHURST. Something over 5,000, I will say to the Senator from Utah.

Mr. SUTHERLAND. It has a population of about 5,000, and it was thought by the committee, after investigating the subject, that $5,000 would be ample to buy a site for a public building there, and I think it will be. Therefore, I must resist the adoption of the amendment to the amendment.

Mr. ASHURST. Mr. President, I desire to say that the committee gave careful consideration not only to this item, but to every other item in this bill; to my knowledge the committee sat several days and held many hearings. I respectfully insist that the appropriation for the purchase of a site in the city of Prescott be increased from $5,000 to $7,500.

The population of Prescott, as shown by the census of 1910, numbered 5,092 persons, and the census returns respecting Prescott for 1910 are notoriously and admittedly deficient. That the city of Prescott has a population of over 6,000 persons can not successfully be contradicted. Moreover, a large number of persons who do not live within the corporate limits of the city receive their mail in Prescott. The postal receipts for the year 1901 were $12,097, while the postal receipts for the year 1911 amounted to $21,793. I do not believe an appropriate and suitable site for a Federal building could be purchased in Prescott for $5,000, but I feel reasonably certain that a suitable site could be procured for the sum of $7,500.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Arizona [Mr. ASHURST] to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 38, after line 7, to insert:

United States post office at De Funiak Springs, Fla., $6,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 11, to insert:

United States post office at Kissimmee, Fla., $6,000.

The amendment was agreed to.

The next amendment was, on page 38, line 14, after the word "Georgia," to strike out "$5,000" and insert "$7,500," so as to make the clause read:

United States post office at Toccoa, Ga., $7,500.

The amendment was agreed to.

The next amendment was, on page 38, line 18, after the word "Georgia," to strike out "$5,000" and insert "$7,500," so as to make the clause read:

United States post office at Sandersville, Ga., $7,500.

The amendment was agreed to.

The next amendment was, on page 38, after line 19, to insert:

United States post office at Forsyth, Ga., $7,500.

The amendment was agreed to.

The next amendment was, on page 38, after line 20, to insert:

United States post office at Thomson, Ga., $7,500.

The amendment was agreed to.

The next amendment was, on page 38, after line 21, to insert:

United States post office at Waynesboro, Ga., $6,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 23, to insert:

United States post office at Monroe, Ga., $6,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 24, to insert:

United States post office at Madison, Ga., $7,500.

The amendment was agreed to.

The next amendment was, at the top of page 39, to insert:

United States post office at Eatonton, Ga., $6,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 1, to insert:

United States post office at Nampa, Idaho, $10,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 2, to insert:

United States post office at Caldwell, Idaho, $10,000.

The amendment was agreed to.

The next amendment was, on page 39, line 5, before the word "Illinois," to strike out "Hillsboro" and insert "Carlinville," so as to make the clause read:

United States post office at Carlinville, Ill., $10,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 6, to insert:

United States post office at Highland, Ill., $7,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 7, to strike out:

United States post office at Geneseo, Ill., $10,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 8, to insert:

United States post office at Carrollton, Ill., $10,000.

The amendment was agreed to.

The next amendment was, on page 39, line 12, before the word "Illinois," to strike out "Spring Valley" and insert "Springvalley," so as to make the clause read:

United States post office at Springvalley, Ill., $10,000.

The amendment was agreed to.

The next amendment was, on page 40, after line 7, to insert:

United States post office at Albia, Iowa, $5,000.

The amendment was agreed to.

The next amendment was, on page 40, after line 14, to insert:

United States post office at Barbourville, Ky., $5,000.

Mr. SMITH of Georgia. Mr. President, we have dropped down here to postal receipts of $4,000. I merely want to bring the attention of the Senate, before they agree to this amendment, to the fact that the postal receipts of this town are less than $4,000 per annum, and the population is about 1,600.

Mr. TOWNSEND. To what amendment is the Senator referring?

Mr. SMITH of Georgia. I am referring to Barbourville, Ky., a new item which has been added. The postal receipts there are only $4,000 a year.

Mr. BRADLEY. Mr. President, Barbourville is situated in eastern Kentucky. That section of our State has been improving in the last three years by leaps and bounds. There are many valuable coal mines and also oil interests around that place. In the last decade its population more than doubled. Since the census was taken it has increased about 400; and the population is now about 2,000. It is a growing, live town. It has two colleges, a number of banks, and is an exceedingly prosperous community. There are other towns in Kentucky of less population than this that to-day have public buildings.

This is a section of the State that has received but little attention, and it is now demanding the attention of the whole people. I do hope that my good and great friend from Georgia [Mr. SMITH] will withdraw his objection to this little pittance of $5,000 to purchase a site for a building at this place. I appeal to his generosity. I know he is generous.

Mr. SMITH of Georgia. Mr. President, there is no point of order that can be made on the amendment. I wish merely to say that I was surprised that such small receipts were deemed sufficient for the erection of a public building, and so I called attention to it. It is for the Senate to determine.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 40, line 23, after the word "Kentucky," to strike out "$5,000" and insert "$7,500," so as to make the clause read:

United States post office at Paintsville, Ky., $7,500.

Mr. SMITH of Georgia. Mr. President, I really do not think the Senator from Kentucky ought to ask for this increase. This is a town with about 700 inhabitants, and only has $2,000 postal receipts.

Mr. BRADLEY. What town is that?

Mr. SMITH of Georgia. Paintsville.

Mr. BRADLEY. How many people does the Senator say reside there?

Mr. SMITH of Georgia. Perhaps I have overestimated. It has 900 inhabitants and the postal receipts, I find, are $3,700. Surely $500 is enough to buy a site in that town—or $5,000. I said "$500," and I ought to stand by my statement, but the House proposed $5,000. The proposition, however, is to increase the appropriation for a site for a public building in that little town to $7,500. Surely the Senator will not urge that, but will be satisfied with what the House has given.

Mr. BRADLEY. Mr. President, I appealed to the Senator's generosity a moment ago without avail, and now he appeals to mine. [Laughter.] The fact is, the Senator from Georgia does not understand the condition of affairs. I tried to explain awhile ago about eastern Kentucky. For this town the department's estimate for a building site was $8,000, and the committee allowed $7,500, which is $500 less than the department's estimate. The post-office receipts——

Mr. OLIVER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Pennsylvania?

Mr. BRADLEY. Certainly.

Mr. OLIVER. I should like to ask the Senator from Kentucky whether this town is on the Green River? [Laughter.]

Mr. BRADLEY. No, sir; it is not. I am satisfied if it were that no objection would be made to the increase by any Senator on this floor. [Laughter.]

Mr. President, the post-office receipts in this town, as shown by the latest estimate of the department, are $5,000.

Now, let me tell the Senate some things about this town. In the first place, the present population of this town is 2,000. It has expended $100,000 for concrete pavement; its banks have over a million dollars of deposits, and it has several manufactories. These improvements have lately taken place. Within sight of this town, less than a mile away, is the town of Van Lear, which is growing up close to Paintsville. It has grown within three years to have 2,500 population. On the other side and less than a mile from Paintsville is another town which has sprung up within the last three years with 2,000 population. This country is——

Mr. SMITH of Georgia. Will the Senator tell me how far on each side are these two other towns?

Mr. BRADLEY. I have said that one of them was within less than a mile and the other is in sight. [Laughter.]

Mr. SMITH of Georgia. How far can you see?

Mr. BRADLEY. I suppose if the Senator from Georgia were interested, as he usually is, when speaking in the Senate, you could hear him speak without any difficulty from one town to the other. [Laughter.]

Mr. President, this portion of Kentucky, as I understand, has not a single public building in it. There is not a public building in that congressional district, and yet the growth of population and wealth in that district is absolutely marvelous. Property is increasing in value every day. Living there is a great money king, as well as a Democrat, a friend of the Senator from Georgia, known as John C. C. Mayo. Only a short time ago they built a church there costing $75,000. They believe in worshiping the Lord in that section. They have put up there, as I have said, a number of manufactories, and the growth of that town is one of the marvels of eastern Kentucky. I insist that if we do not buy a site now, or provide for one, by the time we pass another public-buildings bill it will take a great deal more money to buy it and the Government will lose by the delay. That whole section is filled with valuable coal, the development of which accounts for its prosperity. I again appeal to the generosity of my friend from Georgia and will give him another opportunity to redeem himself before this body.

Mr. PAYNTER. Mr. President, my colleague [Mr. BRADLEY] has so well stated the claims of Paintsville to this appropriation that there is nothing I could add to what he has already said. Such an effort—

> To gild refined gold, to paint the lily,
> To throw a perfume on the violet,
> To smooth the ice, or add another hue
> Unto the rainbow, or with taper light
> To seek the beauteous eye of heaven to garnish,
> Is wasteful and ridiculous excess.

It is true, as stated by him, that there has been a great growth and development in the valley of the Big Sandy River. In addition to the church which he has mentioned, there has been a large school established at Paintsville; it promises to be a city of very great importance in the near future. There is no part of Kentucky where there has been such development as there has been in eastern Kentucky. There are great coal fields lying not far from there, and there is one railroad running to the town on the Kentucky side of the Big Sandy River and another one on the West Virginia side of the river. So, as I have said, it promises to be a city of very great importance, and I trust the Senate will stand by the action of the committee in fixing the amount at $7,500.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 41, line 1, after the words "post office," to insert "and courthouse," and, in line 2, after the word "Kentucky," to strike out "$5,000" and insert "$7,500," so as to make the clause read:

United States post office and courthouse at Pikeville, Ky., $7,500.

The amendment was agreed to.

The next amendment was, on page 41, after line 7, to insert:

United States post office at Falmouth, Ky., $5,000.

The amendment was agreed to.

The next amendment was, on page 41, after line 11, to insert:

United States post office at Morgan City, La., $6,000.

The amendment was agreed to.

The next amendment was, on page 41, after line 13, to strike out:

United States post office at Cambridge, Md., $10,000.

The amendment was agreed to.

The next amendment was, on page 41, after line 15, to insert:

United States post office and customhouse at Provincetown, Mass., $8,000.

The amendment was agreed to.

The next amendment was, on page 41, line 18, after the word "Massachusetts," to strike out "$15,000" and insert "$25,000," so as to make the clause read:

United States post office at South Framingham, Mass., $25,000.

The amendment was agreed to.

The next amendment was, on page 41, after line 21, to insert:

United States post office at Caruthersville, Mo., $7,500.

The amendment was agreed to.

The next amendment was, at the top of page 42, to insert:

United States post office at Farmington, Mo., $7,500.

The amendment was agreed to.

The next amendment was, on page 42, after line 11, to insert:

United States post office at Somersworth, N. H., $5,000.

Mr. GALLINGER. Mr. President, Somersworth, N. H., is a city of 8,000 population, with postal receipts of $10,000. My information is that $5,000 will not buy a proper site, and I trust the Senator in charge of the bill will agree to an amendment to the amendment making the amount $7,500.

Mr. SUTHERLAND. I will not object to such an amendment, so far as I am concerned.

Mr. GALLINGER. I move that amendment to the amendment.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 42, line 5, in the amendment of the committee it is proposed to strike out "$5,000" and insert "$7,500."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 42, line 17, after the name "New York," to strike out "$15,000" and insert "$25,000," so as to make the clause read:

United States post office at Oneida, N. Y., $25,000.

The amendment was agreed to.

The next amendment was, at the top of page 43, to insert:

United States post office at Mount Airy, N. C., $10,000.

The amendment was agreed to.

The next amendment was, on page 43, after line 4, to insert:

United States post office at Wadesboro, N. C., $10,000.

The amendment was agreed to.

The next amendment was, on page 43, after line 6, to insert:

United States post office at Rockingham, N. C., $10,000.

The amendment was agreed to.

The next amendment was, on page 43, line 9, after the words "post office and" to strike out "customhouse" and insert "courthouse," so as to make the clause read:

United States post office and courthouse at Fargo, N. Dak., $25,000.

The amendment was agreed to.

The next amendment was, on page 43, after line 14, to insert:

United States post office at Delphos, Ohio, $7,000.

The amendment was agreed to.

The next amendment was, on page 44, line 3, after the words "South Carolina," to strike out "$5,000" and insert "$10,000," so as to make the clause read:

United States post office at Dillon, S. C., $10,000.

The amendment was agreed to.

The next amendment was, on page 44, after line 4, to insert:

United States post office at Milbank, S. Dak., $7,500.

The amendment was agreed to.

The next amendment was, on page 44, after line 6, to insert:

United States post office at Vermilion, S. Dak., $7,500.

The amendment was agreed to.

The next amendment was, on page 44, after line 10, to insert:

United States post office at Elizabethton, Tenn., $2,500.

The amendment was agreed to.

The next amendment was, on page 44, after line 16, to strike out:

For the acquisition, by purchase, condemnation, or otherwise, of additional ground adjoining the post office and courthouse at Sherman, Tex., $5,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 44, after line 20, to strike out:

United States post office at Gilmer, Tex., $5,000.

The amendment was agreed to.

The next amendment was, on page 44, line 22, after the word "Texas," to strike out "$5,000" and insert "$6,000," so as to make the clause read:

United States post office at Crockett, Tex., $6,000.

The amendment was agreed to.

The next amendment was, on page 44, after line 23, to insert:

United States post office at Memphis, Tex., $7,500.

The amendment was agreed to.

The next amendment was, on page 44, after line 24, to insert:

United States post office at Sweetwater, Tex., $7,500.

The amendment was agreed to.

The next amendment was, at the top of page 45, to insert:

United States post office at Seguin, Tex., $10,000.

The amendment was agreed to.

The next amendment was, on page 45, after line 2, to strike out:

United States post office at Orange, Tex., $10,000.

The amendment was agreed to.

The next amendment was, on page 45, after line 16, to insert:

United States post office at Cape Charles, Va., $7,500.

The amendment was agreed to.

The next amendment was, on page 45, after line 18, to insert:

United States post office at Buena Vista, Va., $5,000.

The amendment was agreed to.

The next amendment was, on page 45, after line 20, to insert:

United States post office at Woodstock, Va., $5,000.

The amendment was agreed to.

The next amendment was, on page 45, after line 22, to insert:

United States post office at Manassas, Va., $5,000.

The amendment was agreed to.

The next amendment was, at the top of page 46, to insert:

United States post office at Pasco, Wash., $10,000.

The amendment was agreed to.

The next amendment was, on page 46, after line 8, to insert as a new section the following:

SEC. 6. That the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the construction of a suitable building for a post office only upon the site heretofore acquired, bounded by Seventh, Eighth, Hoyt, and Glisan Streets, in the city of Portland, Oreg., at a total limit of cost for said building, complete, including mechanical equipment, heating, ventilating, vacuum-cleaning and air-washing systems, machinery, mechanical appliances and devices for handling mail, intercommunicating telephones and clock systems, and such other labor-saving devices and appliances as may be deemed necessary, at a total limit of cost, exclusive of site, of $1,000,000.

That the Secretary of the Treasury be, and he is hereby, further authorized and empowered, in his discretion, to secure the plans, specifications, and estimates for said building and the local supervision of its construction by competition among not less than five architects, and to make payment for the services of the architect whose plan may be selected out of the appropriation for said building, any statute to the contrary notwithstanding.

Mr. SMITH of Georgia. Mr. President, it seems to me the chairman of the committee ought to explain to us the necessity for that appropriation.

Mr. BOURNE. Mr. President, if the chairman of the committee will permit me to do so, I shall be very glad to explain that.

In 1875 the Government bought a post-office site in Portland, for which they paid $15,000, and erected a Federal building there. The postal receipts then were $24,000 a year. For the fiscal year 1912 the postal receipts were over $1,100,000. The present cash value of the site for which the Government paid $15,000 in 1875 is, conservatively, a million dollars. That building is a Federal court building and also a post-office building.

About three years ago the Senate passed a bill providing half a million dollars for the purchase of a site and a million dollars for the construction of a post-office building. The House provided $500,000, in the last public buildings bill, for the purchase of the site. The site was acquired for $340,000. The Government now pays, I think, some $25,000 per annum for rental of buildings that are necessary because of the increase in the postal service and the inability to handle the postal business at the present Portland post office.

I think this is a pretty good illustration of my viewpoint as to the desirability of the Government making liberal appropriations for the construction of its public buildings.

Mr. SMITH of Georgia. I understand, then, that the present public building in Portland is the one that was erected when it was really just a village?

Mr. BOURNE. The present public building in Portland is on the same site that they had when Portland was, you may say, a village, in 1875, when the postal receipts were only $24,000 per annum.

Mr. SMITH of Georgia. In any event, it was comparatively a very little city?

Mr. BOURNE. Yes. According to the last census the city of Portland had 207,000 people, and I think it now has 250,000. The present postal receipts, I know, are $1,100,000.

Mr. SMITH of Georgia. And this is really necessary to meet the present demands of the city?

Mr. BOURNE. Absolutely necessary.

Mr. CHAMBERLAIN. Mr. President, in addition to what my colleague has said I desire to say that the present site is quite a long distance from the depot, and because of the increased population and increased business of the post office they have found it convenient and best to purchase a site near the depot, where the mail can be handled at very much less cost to the Government.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 47, line 4, to change the number of the section from "6" to "7"; in line 5, after the words "directed to," to strike out "acquire" and insert "contract for the acquisition"; in line 13, after the words "building and,"

to strike out "addition to site" and insert "additional ground"; in line 16, after the word "may," to insert "in his discretion"; and, in line 18, after the word "sale," to strike out "in the discretion of the Secretary of the Treasury," so as to make the section read:

SEC. 7. That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the acquisition, by purchase, condemnation, or otherwise, a site, or additional ground adjoining the site already acquired, and to contract for the erection and completion thereon of a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, complete, for the use and accommodation of the United States post office, courts, and other governmental offices at Birmingham, Ala. The cost of said building and additional ground, or new site, and building shall not exceed $1,000,000: *Provided*, That if the Secretary of the Treasury should decide to acquire a new site he may, in his discretion, sell the site already acquired at an upset price of not less than $200,000, at public or private sale, at such time and upon such terms as he may deem to be to the best interests of the United States and deposit the proceeds in the Treasury as a miscellaneous receipt.

The amendment was agreed to.

The next amendment was, on page 47, after line 22, to insert as a new section the following:

SEC. 8. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a suitable building and approaches in the borough of Manhattan, city, county, and State of New York, for the use and accommodation of the United States courts of the southern district of New York and the second circuit, the cost of said site not to exceed the sum of $3,000,000: *Provided*, That the site proposed to be selected shall first be approved by the Attorney General of the United States.

The amendment was agreed to.

The next amendment was, on page 48, line 8, to change the number of the section from "7" to "9"; in line 10, before the words "post office," to insert "United States"; in the same line, after the words "post office," to insert "courthouse"; and in line 21, after the word "site," to strike out "before the completion of the new Federal building," so as to make the section read:

SEC. 9. That the limit of cost for the acquisition of a site and the erection thereon of a suitable building for the accommodation of the United States post office, courthouse, and other governmental offices at New Haven, Conn., as provided by the act of Congress approved June 25, 1910, is hereby increased by the sum of $400,000, or so much thereof as may be realized from the sale of the old post-office and customhouse building and site thereof in the said city of New Haven, as provided in said act of June 25, 1910; and said act of June 25, 1910, is hereby amended so that the Secretary of the Treasury is authorized, in his discretion, to sell said old post-office and customhouse building and site on such terms as the Secretary of the Treasury may deem to be to the best interest of the United States, subject to the provision and agreement that possession of same shall not be delivered until said new building is ready for occupancy.

The amendment was agreed to.

The next amendment was, on page 49, line 3, to change the number of the section from "8" to "10."

The amendment was agreed to.

The next amendment was, on page 49, line 14, before the words "and estimates," to strike out "designs" and insert "plans, specifications," so as to make the clause read:

That the plans, specifications, and estimates for said building shall be approved by a board consisting of the Secretary of the Treasury, the Secretary of the Interior, and the Superintendent of the Capitol Building and Grounds.

The amendment was agreed to.

The next amendment was, on page 49, line 19, after the words "sum of," to strike out "$500,000" and insert "$596,000"; in line 23, after the word "employment," to insert "at customary rates of compensation"; on page 50, line 2, after the words "preparation of," to strike out "such" and insert "the necessary"; in line 3, before the word "specifications," to strike out "and," and in the same line, after the word "specifications," to insert "estimates," so as to make the clause read:

That for the purpose of beginning the construction of said building the sum of $596,000 is hereby authorized, and the unexpended balance of the appropriation for the acquisition of said square 143 is hereby made available as a part of said authorization for the employment, at customary rates of compensation without regard to civil-service laws, rules, or regulations, of technical and engineering services in the Office of the Supervising Architect, exclusively to aid in the preparation of the necessary plans, specifications, estimates, and toward the commencement of the construction of said building.

The amendment was agreed to.

The next amendment was, on page 50, line 15, after the word "exceeding," to strike out "$2,500,000" and insert "$2,596,000," so as to make the clause read:

That the foregoing authorization for the employment of technical and engineering services shall be in addition to and independent of the authorizations and appropriations for personal services for the Office of the Supervising Architect otherwise made: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said building at the sum hereby named, but the building hereby authorized shall be constructed or so planned as to cost, complete, including fireproof vaults, heating and ventilating apparatus, elevators, lighting fixtures, and approaches, but exclusive of site, not exceeding $2,596,000.

The amendment was agreed to.

The next amendment was, on page 50, after line 19, to insert as a new section the following:

SEC. 11. That a building is hereby authorized to be erected in the District of Columbia to be known as the George Washington Memorial Building.

The control and administration of said building, when erected, shall be in the Board of Regents of the Smithsonian Institution.

The George Washington Memorial Association is authorized to erect said building in accordance with plans to be procured by said association and to be approved by the Commission of Fine Arts, said building to be fireproof, faced with granite, and to cost not less than $2,000,000; it shall have an auditorium that will seat not less than 6,000 people, and such other smaller halls, reception rooms, office rooms, etc., as may be deemed necessary to carry out the purposes for which the building is erected. And the said George Washington Memorial Association shall in addition provide a permanent endowment fund of not less than $500,000, to be administered by the Board of Regents of the Smithsonian Institution, the income from which shall, as far as necessary, be used for the maintenance of the said building.

Permission is granted the George Washington Memorial Association to erect said building in the north end of the reservation known as Armory Square, bounded by Sixth and Seventh Streets west and B Street north and B Street south. The south front of said building is to be on a line with the south front of the new National Museum Building, in the north end of the Smithsonian Park; and the said land is hereby set apart for that purpose: *Provided*, That the actual construction of said building shall not be undertaken until the sum of $1,000,000 shall have been subscribed and paid into the treasury of the George Washington Memorial Association: *And provided further*, That the erection of said George Washington Memorial Building be begun within a period of two years from and after the passage of this act, and this section shall be null and void should the George Washington Memorial Association fail to comply with the provisions thereof which are conditions precedent to the authorization herein granted.

Said building may, among other purposes, be used for inaugural receptions and special public meetings authorized by Congress.

Congress may alter, amend, add to, or repeal any of the provisions of this section.

Mr. SMITH of Georgia. Mr. President, we have already gone on record as spending more money, I believe, than any Congress that has ever been in session. I do not think there is any necessity for this appropriation at this time.

Mr. SUTHERLAND. Mr. President, I fear the Senator has not read the section carefully. It does not involve any expenditure at all upon the part of the Government. It simply gives a site for the construction of this building, and, in consideration of giving the site, it requires that a building shall be erected at the cost of this association, to cost not less than $2,000,000, and that they shall furnish in addition to that an endowment fund of $500,000 to guarantee the expense of operating the building and carrying it on. It is to be under the control of the Government, however, and can be used by the Government. It does not involve the expenditure of a single dollar on the part of the Government of the United States.

Mr. SMITH of Georgia. It was almost impossible for me to keep up with the provision as it was being read. I have nothing further to say, in view of the statement of the Senator from Utah.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 52, after line 12, to insert as a new section the following:

SEC. 12. That the Secretary of War be, and he is hereby, authorized and directed to enter into contracts for all necessary plans and for the construction of an armory building for the National Guard of the District of Columbia, in accordance with the plans for such armory submitted by the commission appointed by the act of Congress approved May 30, 1908, or such modified plans as may be approved by the Secretary of War and the said commission at a limit of cost not to exceed $1,750,000, one-half of which shall be borne by the District of Columbia.

That the northern portion of the Government reservation bounded by B Street north, B Street south, Twelfth Street west, and Fourteenth Street west, in the District of Columbia, comprising that portion of said reservation north of the line established for the south front of the new National Museum Building, be, and is hereby, selected and dedicated as a site for the said armory for the National Guard of the District of Columbia, after the removal of the temporary buildings now on said site, which removal is hereby authorized.

That the construction of said armory building shall be under the direction of the officer in charge of public buildings and grounds in the District of Columbia, and all money expended shall be upon vouchers approved by him. All plans for said armory building shall be approved by the Secretary of War and the commission authorized by the act of Congress approved May 30, 1908 (35 Stat. L., p. 540).

Mr. SMITH of Georgia. Mr. President, I think we have now reached some of the amendments that should be vigorously resisted. There is no more occasion to have this great armory here than there is in any other city of the United States; and there is no more occasion to take the money out of the National Treasury to build this armory than there is to build an armory in every other city of the size of this for the use of the National Guard. This really is to be an auditorium, in large part. We begin by contributing the land which belongs to the public, and we then propose to go on and put up a building to cost $1,750,000.

The National Government now pays about $600,000 a year rent in the city of Washington for buildings that ought to be constructed for $4,000,000. We have ample land. We could

construct a model 400-room office building here for $750,000, fireproof, of steel construction, concrete, brick, marble, and granite trimmings. These need not be extravagant buildings. I should be glad to see the Department of Justice and the Department of State each have a building of the same style as the present buildings. But the balance of the office space here can be amply provided for by the ordinary model office building. A 400-room office building, amply ornamental, can be erected upon the perfectly fireproof plan to which I have referred for $750,000.

The PRESIDENT pro tempore. The Senator from Georgia will please suspend. Under the previous order of the Senate, the Senate will stand in recess until the hour of 8 o'clock.

Thereupon (at 6 o'clock p. m.) the Senate took a recess until 8 o'clock p. m.

EVENING SESSION.

The Senate reassembled at 8 o'clock p. m., on the expiration of the recess.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. CURTIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 1.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, and 6, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$20,000"; and the Senate agree to the same.

CHARLES CURTIS,
GEORGE T. OLIVER,
THOMAS S. MARTIN,
Managers on the part of the Senate.

H. D. FLOOD,
JOHN N. GARNER,
WILLIAM B. MCKINLEY,
Managers on the part of the House.

The report was agreed to.

PETITIONS AND MEMORIALS.

Mr. JONES presented telegrams in the nature of petitions from the city council, the Sailors' Union, the executive board of the State Federation of Labor, the Alaska Fishermen's Union, the Labor Council, the Marine Cooks and Stewards' Association, and of W. G. Potts, all of the city of Seattle, in the State of Washington, praying for the passage of the so-called seamen's bill, which were ordered to lie on the table.

He also presented a telegram, in the nature of a petition, from sundry wholesale grocers of the State of Washington, praying for the enactment of legislation to correct the misbranding of foods, drugs, and other products, etc., which was referred to the Committee on Manufactures.

Mr. LODGE presented a memorial of sundry citizens of Salem, Mass., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

SEAMEN IN THE MERCHANT MARINE.

Mr. BURTON. From the Committee on Commerce I report back favorably with an amendment in the way of a substitute the bill (H. R. 23673) to abolish the involuntary servitude imposed upon seamen in the merchant marine of the United States while in foreign ports and the involuntary servitude imposed upon the seamen of the merchant marine of foreign countries while in ports of the United States, to prevent unskilled manning of American vessels, to encourage the training of boys in the American merchant marine, for the further protection of life at sea, and to amend the laws relative to seamen, and I submit a report (No. 1321) thereon.

I desire to give notice that on Friday morning, after the close of the routine morning business, I shall ask the consideration of the bill

The PRESIDENT pro tempore. The bill will be placed on the calendar.

REPORTS OF COMMITTEES.

Mr. CRAWFORD, from the Committee on Commerce, to which was referred the bill (H. R. 23676) to regulate the officering and manning of vessels subject to the inspection laws of the United States, reported it with amendments, and submitted a report (No. 1322) thereon.

Mr. PAYNTER, from the Committee on Claims, to which was referred the bill (S. 228) for the relief of John H. Howlett, reported it with an amendment, and submitted a report (No. 1323) thereon.

AMENDMENT TO NAVAL APPROPRIATION BILL.

Mr. JONES submitted an amendment proposing to appropriate $4,480,000 for eight submarine torpedo boats, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs, and ordered to be printed.

PUBLIC BUILDINGS BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28766) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes.

The PRESIDENT pro tempore. The pending question is on the amendment of the Committee on Public Buildings and Grounds to insert as section 12 on page 52, line 13, to line 16 on page 53.

Mr. SMITH of Georgia. Mr. President, I suggest the lack of a quorum.

The PRESIDENT pro tempore. The Senator from Georgia suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Chamberlain	Jones	Smith, Ga.
Bankhead	Clapp	Martin, Va.	Smith, Md.
Borah	Clark, Wyo.	Martine, N. J.	Smoot
Bourne	Crawford	Nelson	Stone
Bradley	Culberson	O'Gorman	Sutherland
Brady	Cummins	Owen	Swanson
Brandegee	Curtis	Page	Thomas
Briggs	Dillingham	Perkins	Townsend
Bristow	Fletcher	Sheppard	Warren
Burnham	Gallinger	Shively	Wetmore
Burton	Johnston, Ala.	Smith, Ariz.	

Mr. SMITH of Georgia. The senior Senator from Georgia [Mr. BACON] is still suffering with a severe cold, and while he comes out in the day, he is advised that he ought not to come out at night.

The PRESIDENT pro tempore. Forty-three Senators have answered to their names. There is not a quorum present. The names of the absentees will be called.

The Secretary called the names of absent Senators and Mr. CATRON, Mr. KENYON, Mr. POINDEXTER, and Mr. SMITH of South Carolina answered to their names when called.

Mr. KERN entered the Chamber and answered to his name.

The PRESIDENT pro tempore. Forty-eight Senators have answered to their names. A quorum of the Senate is present. The question is on the amendment of the committee, commencing at line 13, on page 52. The Senator from Georgia will proceed.

Mr. SMITH of Georgia. Mr. President, at the time the Senate took a recess I was calling attention to the fact that this amendment provides for an appropriation of $1,750,000 to build an armory in the District. I had already called attention to the fact that the National Government does not build armories throughout the country, but in the different States armories, as a rule, are built by the personal friends of the members of the National Guard. It is true that this provision requires that one-half of the cost shall be paid from the revenues of the District of Columbia, but the National Government furnishes the land on which it is to be erected.

This appropriation, together with others in the bill, make in all over $10,000,000 to be spent in the District. I think I might well make the point that this appropriation is not an appropriation which should fall within the work of the Committee on Public Buildings and Grounds. I may later bring that point of order to the attention of the Chair.

The next appropriation is of $400,000 to help erect a building to be used by the American Red Cross in the District.

There is a provision in these amendments which, when it is reached, I shall especially object to because it is limited to the commemoration of the services and sacrifices of the loyal women of the United States during the Civil War. I believe that the spirit of national love and universal friendship which pervades

our entire land would justify the commemoration of the sacrifices and character of all the women of the country.

The next one of these appropriations is for an amphitheater to cost $850,000, together with $50,000 additional to build at Arlington both a chapel and an amphitheater.

Mr. WARREN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Wyoming?

Mr. SMITH of Georgia. Certainly.

Mr. WARREN. On the subject the Senator passed a moment ago, I suppose he notices that probably the name was given because the appropriation is made in connection with the amount of money which has been raised by that association. The amount we appropriate will only be expended when the association shall have expended or raised about the same amount.

Mr. SMITH of Georgia. Yes.

Mr. WARREN. The Red Cross, as the Senator knows, is about as universal as anything can be, not only for this country, but for all countries. I think we passed the bill in the Senate as a separate measure.

Mr. ROOT. Yes; we have passed it.

Mr. WARREN. The Senate has given its assent to it.

Mr. ROOT. The Senate passed it.

Mr. SMITH of Georgia. I will discuss the peculiar language of that amendment later on when it is taken up by itself. I am now calling the Senate's attention to the quantity of appropriations upon the line of local investment which this bill carries.

The next is an appropriation of $2,300,000 for park purposes in the District.

The next is an appropriation of $5,000,000 to build a bridge across the Potomac.

So, Mr. President, we start with $1,750,000, one-half of which is to come from the National Treasury. We then have $400,000——

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. SMITH of Georgia. Yes.

Mr. BORAH. I want to ask the Senator upon what page this $5,000,000 appropriation for this bridge appears?

Mr. SMITH of Georgia. On page 68.

We then have $750,000—$800,000, rather, for there is $50,000 in addition to that—we then have $2,300,000, and we then have $5,000,000, making about $10,000,000 which this bill carries of funds belonging to the National Government to be spent practically in the District.

Mr. President, we are paying now about $600,000 a year rent for Government buildings necessary to the accommodation of the departmental work of the District. I believe we could for $4,000,000 or $5,000,000 erect modern office buildings which would accommodate almost the whole of this part of the departmental service.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. SUTHERLAND. The Senator from Georgia speaks of our paying about $600,000 a year rent. I take it the Senator thinks that it would be better for the Government to own the buildings than to rent them.

Mr. SMITH of Georgia. I was just proceeding to give my views on that subject.

Mr. SUTHERLAND. Well, I was going to ask the Senator whether he knew we were now paying a pretty large sum of money for the rent of quarters for the National Guard?

Mr. SMITH of Georgia. Yes; I will come to that; I will discuss that in a moment. We are paying $600,000 a year for a class of buildings which could be erected for $4,000,000. We are paying 3 per cent on $20,000,000, and we have the ground. What I am objecting to is the expenditure of this large sum of money for things not now necessary, while we neglect those that are necessary, which, if we would attend to, would make so large a saving.

Now, with reference to what we are paying for the National Guard, I will say we are renting part of our own property for $8,000 a year for the National Guard when we lease out that property and four times as much more for $7,500. The Government is still the owner of the property, as I understand. I refer to the old market place which, as I understand, is leased out by the Government for $7,500 a year, while we rent a part of it for $8,000, renting it back for an armory. It is the utter lack of business treatment of the money belonging to the people of this District of which I complain.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. SMITH of Georgia. I do.

Mr. BORAH. Do I understand the Senator from Georgia to say that we rent out a certain property for $7,500 and then rent back part of the same property for $8,000?

Mr. SMITH of Georgia. That is what I mean; that is what I understand is the case. I submit to correction by those Senators who have been here longer than I have been, if I am mistaken. I myself have not investigated it in detail, but I have seen the fact published that we lease out——

Mr. SMOOT. Mr. President——

Mr. SMITH of Georgia. One moment; let me finish, please—that we lease out the market place just across the little park from Pennsylvania Avenue for $7,500 a year and then rent back for an armory a small part of it, paying $8,000; though, perhaps, more properly speaking, that rental is by the District instead of by the Government, but the Government pays half.

Mr. SMOOT and Mr. ASHURST addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Georgia first yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. SMOOT. I have been informed that the Government and the District did not pay for the building, but the company owning the lease put up the building and, in turn, rented a portion of the building to the Government and the District for the armory; or, in other words, all the interest that the Government and the District have in the property is the interest in the land. I was going to ask the Senator if he knows that to be the case.

Mr. SMITH of Georgia. I understand that that is true, and I wish to add that the cost of the building is trivial. That $8,000 a year would pay the interest on the cost of the building. I am calling attention to this fact to emphasize my proposition of the neglect of business management.

Mr. ASHURST. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Arizona?

Mr. SMITH of Georgia. I do.

Mr. ASHURST. Mr. President, it seems to me that the most effective and practical way to stop paying high and exorbitant rents would be to construct proper buildings, and it might be illuminating at this time if, with the consent of the Senator from Georgia, I should incorporate into the RECORD a statement of the amount of rent that the Government pays, for what purpose the property is used, and the condition of the buildings.

Mr. SMITH of Georgia. I yield to the Senator.

Mr. ASHURST. I ask that this statement be read at the desk.

Mr. BRISTOW. I should like to have it read.

Mr. ASHURST. I have asked to have it read.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

Mr. ROOT. I should like to ask what it is that is asked to be read.

The PRESIDENT pro tempore. It is a clipping from a newspaper, but the Chair is unable to determine the character of the clipping.

Mr. ROOT. Can we not be informed from what newspaper it is taken and who vouches for the figures which are given?

Mr. ASHURST. I said that it might be illuminating if the Senate knew the exact amount of rent paid by the Government in this District. I desire, if possible, to obviate the necessity of the Government paying these exorbitant sums for rent. The question is asked from what paper the clipping is taken. It is from a paper which is not popular in this Chamber, from a paper that very few Senators read, designated at times The Appeal to Reason. The accuracy, however, of these particular items is reasonably certain.

Mr. WARREN. Mr. President, that is what I wanted to know, whether the Senator from Arizona had checked the information up with the department as to the figures, so as to be certain they are correct.

Mr. ASHURST. I do not wish to be discourteous. I will say that the Senator from Arizona is not in the habit——

Mr. WARREN. It is entirely immaterial what paper it is, if the statements have been checked up.

Mr. ASHURST. The Senator from Arizona is not in the habit of asking the Senate to incorporate into the RECORD figures and data that he believes to be incorrect.

Mr. WARREN. There is no insinuation that the Senator from Arizona would do that. The only thing is that newspapers sometimes make incorrect reports, and I wanted to know if the Senator had verified this. That is all I wanted to ask

before the clipping was read, so as not to seem to cast any aspersion upon the item itself.

Mr. ASHURST. Mr. President, during the short time I have had the honor to be a Member of this body I have found that if you wish accurate information with respect to many matters of a public nature you are obliged to consult the newspapers. I ask that the clipping be read at the desk. It is very short.

The PRESIDENT pro tempore. Is there objection to the extract being read? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

The following amounts were paid by the United States Government for rent of privately owned buildings in Washington during the fiscal year ended June 30, 1912:

State Department	$11,480.00
Treasury Department	52,000.00
War Department	15,220.00
Navy Department	40,326.24
Interior Department	59,100.00
Post Office Department	48,455.00
Department of Agriculture	85,329.00
Department of Commerce and Labor	87,521.24
Department of Justice	31,580.40
Quartermaster's Department of the Army	45,377.10
Commerce Court	11,772.00
Court of Customs Appeals	7,000.00
Interstate Commerce Commission	41,000.00
Public Printer	5,693.76
District of Columbia	44,360.00
Total	586,274.74

The majority of the buildings for which this rental is paid are old, rickety, and insanitary, and are ill adapted for the performance of public business. The rentals paid are notoriously excessive and out of all proportion to rents paid by private parties for similar quarters.

Mr. SMITH of Georgia. I ask that the Secretary read the total once more. My attention was diverted for the moment.

Mr. WARREN. It is very near the amount the Senator gave.

The PRESIDENT pro tempore. The Secretary will read as requested.

The SECRETARY read as follows:

Total, $586,274.74.

Mr. SMITH of Georgia. Mr. President, 12 months ago I took the pains to check up the figures, and those just read are practically what I found the rentals then to be. As I have said, the total rental is approximately $600,000.

Now, what I am seeking to urge upon the Senate is simply this: Can we excuse ourselves for expending public money for things in this District that are not necessary while we neglect to construct buildings that are necessary and while we continue to pay exorbitant rents for buildings that are necessary on account of our neglect to erect suitable buildings for ourselves?

I shall not repeat the stories I have heard about what has been made in the construction of buildings after contracts with the Government have first been entered into in the District. They may not be true. However, what I do insist upon is that, owning the land, we can house ourselves cheaper than private citizens can house the Government, and that the Government, not being compelled to purchase land on which to build, can certainly erect buildings to house its various services for less than any private individual can afford to buy land and erect buildings and rent them to the Government. The private owners have their taxes to pay, and we pay ours most liberally under the half-and-half policy. What I wish to do is to urge that all these items, amounting to $10,000,000, even if Senators feel that the projects are worthy, be suspended, be left to wait until we have first done that which is necessary—erected buildings for our departmental work to meet the requirements of the department work, and stop this $600,000 a year rent. It may be true that $8,000 a year is paid for the armory. That would not be the interest on $1,750,000.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. SUTHERLAND. The so-called armory is only one of the places which is rented for the use of the District Guard. There are seven others. There are eight places altogether in the District which are rented, and the rent now paid is about $17,000 a year.

Mr. SMITH of Georgia. How many guards are there in the District?

Mr. SUTHERLAND. Recruited to their full strength, there would be 4,000. There are now possibly a little over 2,000. There should be three regiments and some detached organizations, which I do not just now recall.

Mr. WARREN. A brigade, is it not?

Mr. SUTHERLAND. Yes; it is a brigade. There should be 4,000. If the Senator could have taken the trip about the city that I took some little time ago and visited these various quarters, I think he would have had a somewhat different idea as to the necessity of providing quarters for these men. The various places in which they are housed are insanitary; they are utterly discreditable to any Government to ask men to inhabit. For example, upon one of the streets just beyond the War Department they have rented half of a room in a building which has been constructed of the cheapest material and covered with corrugated iron. Through the center of a not very large room to begin with there has been a partition extended, making a narrow hall on each side, one side occupied as a bicycle repair shop and the other occupied by a company or more of the militia of the District.

There are not sufficient accommodations in that room for the men to hang their clothing. Space that would ordinarily be given to one man is given over to two or three men. There is no room to put their overcoats away, and they are compelled, when they have finished using their overcoats, to store them in dry-goods boxes, to lie there until they are needed the next time, perhaps being put away in a damp condition to mildew and to be destroyed. They have no place to drill, but are compelled to go out into the streets and while they are engaged in drilling dodge automobiles. In another place we have a fire trap back of the market in which we have stored over $200,000 worth of Government supplies that may at any time be destroyed by fire.

It does seem to me that if there is anything in the way of a building that is necessary in this District, it is a building for the National Guard. It is not like the ordinary guard. It is not a District Guard, as the Senator intimates, but it is an organization——

Mr. SMITH of Georgia. It is like the National Guard in every State.

Mr. SUTHERLAND. Not at all.

Mr. SMITH of Georgia. There is not any other system to organize upon.

Mr. SUTHERLAND. Not at all, Mr. President. It is an organization created by the laws of the United States, and of that organization the President of the United States is the Commander in Chief. They are subject to the call of the Federal Government; they are not District troops. It is as much our duty to take care of them as it is to take care of any part of the Regular Army of the United States.

Mr. SMITH of Georgia. Is there a special statute distinguishing the District Guard from the guard of other States?

Mr. SUTHERLAND. There is a special statute; and the Senator will find it in the Twenty-fifth Statutes at Large, page 772, amended in Thirty-fifth Statutes at Large, page 629. The guard of the District is created by Federal statute, and it does materially from the State militia——

Mr. SMITH of Georgia. There is no mere State militia.

Mr. SUTHERLAND. It differs in the respect to which I have called attention, namely, that it is under the command of the President of the United States as Commander in Chief. It is the absolute duty of the National Government to take care of these troops. They are not like the State troops at all.

Mr. SMITH of Georgia. Mr. President, there is no militia that I know of in the United States now. They are all members of the National Guard. The Dick bill reorganized the entire old militia of the whole country into the National Guard; they are all subject to duty; and the National Guard of this District, I think, stand practically upon the same footing, except that, this not being a State but the District of Columbia, they respond at once to the President, instead of first to the governor of a State, but their plan or organization, I think, as a part of the National Guard is practically the same, beyond that fact.

Mr. SUTHERLAND. The Senator says "that is all," as though that were nothing. That is all, but it is everything. It makes the difference between the mere State troops and the forces under the control of the Federal Government.

Mr. SMITH of Georgia. There are no State troops. They are not mere State troops in any of the States.

Mr. SUTHERLAND. Oh, yes, they are. They are State militia, provided for by State law.

Mr. ROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield ot the Senator from New York?

Mr. SMITH of Georgia. I do.

Mr. ROOT. I think the Senator from Georgia is speaking on this subject without full consideration. His colleague has very definite ideas about it, upon which he has been insisting for many years in the Senate.

The Dick bill provided that the organizations in the States which were State troops, ordinarily known as the National

Guard of this, that, and the other State, which took advantage of certain specified appropriations of Congress should be the Organized Militia of the United States. They are still State troops. When they are acting under laws of Congress they are militia. The District National Guard, so called, is nothing else than militia. It is national militia and nothing else. The National Guards of the States have a double aspect. They are State troops, subject to the control of the governors of the States for State purposes, rendering State services; and when they are acting under the laws of Congress, then they are also militia.

Mr. SMITH of Georgia. Mr. President, I am reasonably familiar with the Dick bill. I think I am entirely familiar with the relation which the National Guard bears both to the State and to the Nation. I said there were no mere State troops, and I repeat it. They are not mere State troops. My language was that they were not merely State troops any longer; that the Dick bill changed their status; that they are now the National Guard; and while in times of peace when the Nation does not require them they respond to the command of the governor of the State, they are part of the National Guard of the country, subject in times of war to immediate service, and required to enlist for a definite length of service, but subject under their enlistment, whether they desire to do so or not, to national service in case of war.

Mr. ROOT. That is a State designation. "The National Guard" is the name of State organizations exclusively. The national designation is "militia."

Mr. SMITH of Georgia. Yet, as I remember, all the communications from the War Department now come to them recognizing the term "National Guard."

Mr. ROOT. It is of no consequence whether the communications go to them under that name or under the other. The National Guard is a State organization. It has impressed upon it, as a part of the militia, or as the Organized Militia, certain national characteristics. But let me suggest this to the Senator: This bill is not making any other provision, nor any further or better provision, for the militia organization in the District of Columbia than that which the States are making for their own guard. At all events, in my own State we are spending fully as great amounts of money for the erection of armories for the National Guard as it is proposed to spend here in the District for this armory; and it is so, I know, in many other States.

Mr. SUTHERLAND. Will the Senator permit me, in line with what the Senator from New York has just suggested, to call the attention of the Senator from Georgia to the fact that the Seventh Regiment, a single regiment in New York, has an armory which cost $1,938,268.50?

Mr. SMITH of Georgia. Will the Senator also tell me who paid for it?

Mr. SUTHERLAND. The State.

Mr. SMITH of Georgia. Is the Senator sure? Was that by State appropriation?

Mr. ROOT. It was. An armory board was created, under the laws of the State, to purchase the sites and to put up the buildings for these armories.

Mr. SMITH of Georgia. Is the Senator from Utah sure that that entire fund was paid out of the State treasury?

Mr. ROOT. Mr. President, I will not say that a portion of it was not paid out of the city treasury; but it was paid entirely out of the funds of the State of New York, out of the State treasury or the city treasury.

Mr. SUTHERLAND. It was paid out of public moneys.

Mr. ROOT. Not moneys of the United States; moneys of the State.

Mr. SMITH of Georgia. I know it was not moneys of the United States, but I was under the impression that it was partly contributed by men connected with the National Guard themselves.

Mr. ROOT. No; it was paid from the public moneys.

Mr. SUTHERLAND. Let me further call the attention of the Senator to the fact that the Eighth Regiment has an armory which cost seven hundred and twenty-one thousand and some odd dollars; I will leave out the odd figures. The Ninth Regiment has an armory which cost $809,000. The Twelfth Regiment has an armory which cost $586,000. The Twenty-second Regiment has an armory which cost $1,689,000. The Sixty-ninth Regiment has an armory which cost $1,539,000. The Seventy-first Regiment has an armory which cost $1,608,000. There are a number of others. I have not the complete list. Those are all single regiments.

Mr. ROOT. The Twenty-second Regiment has one, too.

Mr. SUTHERLAND. I mentioned the Twenty-second Regiment—$1,689,000. Those, as I say, are for single regiments. We propose to build an armory for an entire brigade, three regiments—when recruited to the full force, that would make 4,000 men—at a cost of $1,750,000.

Mr. SMITH of Georgia. But they are not recruited to the full force. There are only 2,000 of them now.

Mr. SUTHERLAND. One of the great reasons why they are not recruited to the full force is because of the miserable, inadequate quarters that they are compelled to go into. Everybody understands that the construction of an armory of itself is an incitement to young men to join the National Guards of the States. They have a pleasant place to go. They have something to be proud of.

There is nothing to be proud of in the District of Columbia, with lofts above grocery stores, with this poor, miserable makeshift to which I have called attention, with a bicycle-repair shop upon one side, with no place to store their clothing. There is no feeling of pride about it. The colonel of one of the regiments, who came before our committee, and who has given this matter great study and investigation, said to us that he had not the slightest doubt that if this armory were built the brigade would be promptly recruited to its full strength.

Mr. SMITH of Georgia. As I said, Mr. President, there is not any brigade here. According to the Senator's own statement, there are 2,000 men. It does appear that the State of New York, from the treasury of that State, has with great liberality provided for the National Guard. But take the situation in Maryland: I am informed that the splendid armory there was built, not by the State, but largely by private subscription. We have where I live a large armory, together with an auditorium, which seats 10,000 people. Not a dollar of the cost of that armory came from the State. The relation of the members of the National Guard here, as I said before, differs from the relation of the members of the National Guard in other parts of the country to the National Government only in this respect: There being no governor here, the President is the Commander in Chief in times of peace, while in other States the governor is the commander in chief in times of peace. But in every State of the Union every member of the National Guard, just as in the District of Columbia, in times of war, is bound by his enlistment, and stands for the service of the Nation.

If we were to go to war to-day with a foreign country every member of the National Guard in every State of the Union would already be an enlisted soldier—not a member of the militia of the State, to volunteer or not as he saw fit, but he would be bound by his obligation to go to war. The relation which they bear to the Government all over the United States in case of war is practically the same. In time of peace they respond here to the President, while in the States they respond to the governor.

There may be some of these men who ought to be better quartered, and they easily could be. It would not take $1,750,000 to build an armory even for a brigade. The plans of this building involve a great deal more than an armory. They involve, as I understand—I wish to be corrected by the Senator from Utah if I am mistaken—a charming auditorium.

Mr. SUTHERLAND. I do not know of any such arrangement. There is provision for a large drill hall, which may be used for an auditorium as well. For example, if we had the armory building in operation now, perhaps Mr. Wilson, the incoming President, would not have objected to an inaugural ball, because it might have been held there. But we have no place now for a function of that character unless we turn the Pension Office upside down.

Mr. ROOT. The George Washington Memorial Building is to have an auditorium.

Mr. SUTHERLAND. It will provide for that, too; but there is no separate auditorium, at any rate.

Mr. WILLIAMS. The clause just before that provides for an inauguration hall.

Mr. SMITH of Georgia. As I understand, the inaugural ceremonies are provided for in the clause in the bill just before this. The inauguration ceremonies are fully provided for in that clause.

Mr. SUTHERLAND. That can be used when it is built; but I was answering the suggestion of the Senator that there was an auditorium. He had stated it as though there were a drill hall and also an auditorium. That is not so. There is a large drill hall, which may be used upon occasion for a drill hall or which may not be; but it is primarily a drill hall.

Mr. SMITH of Georgia. Even, Mr. President, in providing for brigades of actual soldiers, we do not build in this lavish style. It is unnecessary; it is not an incident of a soldier's life. The appropriation of $1,750,000 for building an auditorium or drill hall, if that name is preferable, is not an incident of the service of the National Guard at all. It goes far beyond it; it

means more. It is intended for more than to care for the National Guard.

The next provision to which I refer is $750,000 for an auditorium out at Arlington, to be used once or twice a year. I would be glad to see one there, but there is no necessity for it now.

There is the appropriation of $5,000,000, to build a bridge across the Potomac. I would be glad to see it built some time, but I can not conceive the propriety of spending the public money for such a purpose now, while we still pay $600,000 a year rent in the District for quarters that we actually need for the use of Government employees. It seems that we pay $17,000 for the quarters of the National Guard, and we are to quit that cheap rent for an investment of $1,750,000, while we continue the payment of nearly $600,000 rent for quarters that could be built at far less than a 3 per cent basis.

Mr. CUMMINS. Mr. President, like the Senator from Georgia, I was at one time commander in chief of the army and navy of one of the States of the Union. I am interested therefore in the National Guard, and I want a little information in regard to this particular appropriation from the chairman of the committee.

I do not make the same objection to it that has been suggested by the Senator from Georgia. My own observation is that if we would preserve the National Guard and make it as efficient as it ought to be, the country—either the State or the Nation—must supply the armory in which it is to make itself efficient.

But what bothers me is this: Does the Senator from Utah believe that there will ever be a regimental drill or a brigade drill in this armory? There never was an armory built large enough for a regiment to drill in or for a brigade to drill in. These armories are built for company drills, and the regimental drills are, as far as I have ever observed them, held as they ought to be in the open air, at the appropriate season of the year.

Now, just imagine if there were three regiments of the National Guard in the District of Columbia. Are there three or four?

Mr. SUTHERLAND. There are three regiments. There is a brigade.

Mr. CUMMINS. A brigade may be three or four or more regiments.

Mr. SUTHERLAND. There are three regiments and the other organizations.

Mr. CUMMINS. A brigade simply means in the National Guard that it has taken advantage of the law which enables it to have a brigade formation.

Mr. SUTHERLAND. I think there are 4,000 troops.

Mr. CUMMINS. Very well. If there are three regiments there will be 36 companies. Thirty-six companies will be recruited from men all over the District of Columbia, scattered from the northernmost to the southernmost limits and from the eastern to the western border.

Now, do you expect that all those men, in order to drill under their company commander, will come at a stated period once a week or once in two weeks into a central building located in the heart of the city of Washington? I do not believe it will serve any useful purpose if we confine the work of the National Guard—the drill, the preparation—to a central point like that. I can understand how it might be true in the city of New York, where a regiment might be gathered in three or four blocks of that very crowded population, but that is not true of the District of Columbia.

Mr. SUTHERLAND. I think they do come from all over the city.

Mr. CUMMINS. On the contrary——

Mr. SUTHERLAND. It is the only hall which they have.

Mr. CUMMINS. The Senator from Utah has just stated that there are many places all over the city in which these companies gather and drill.

Mr. SUTHERLAND. But they do, all of them, come to this central hall to drill as well.

Mr. CUMMINS. I can not imagine that.

Mr. SUTHERLAND. Because it is the only place that is under cover. They drill a part of the time, in the case I have illustrated, in the space beyond the War Department. They drill in the street at times.

Mr. CUMMINS. Very well; they might drill in the street, but if you believe that three regiments or four regiments of the National Guard can be made efficient by company drill carried on in a single room in the city of Washington, you are bound to disappointment. It never has been done, and it never will be done so long as human nature remains as it is.

It is difficult enough to get these men together for drill, as we have known in the history of the National Guard, because from year to year we have been endeavoring to create additional inducements for men to drill regularly in order that they might become soldiers and understand the discipline and the learning of war. But they will not do it, according to my observation, if they are compelled to come from these far-distant points to a central place for that purpose.

If I were organizing a system for the District of Columbia, if I were trying to do something for the National Guard, instead of having a regimental armory, so called, I would have many company armories, because it is the company after all that makes the National Guard what it is. The regimental drill is largely ornamental and the brigade drill is still more ornamental.

Mr. ROOT. Mr. President, I want to take issue with the Senator. He is stating the reverse of the fact.

Mr. CUMMINS. The Senator from New York can have his own opinion about it. I have stated mine.

Mr. ROOT. The regimental drill is more important than the company drill, and the brigade drill is more important than the regimental drill.

Mr. CUMMINS. I think not. Whatever may be the view of the Senator from New York my judgment is otherwise, and whatever he may have had to do with the Regular Army, I have had more to do with the National Guard, probably, than he.

Mr. SMITH of Georgia. Is it not true that brigade drill never takes place under cover?

Mr. CUMMINS. I never heard of a brigade drill taking place under cover. I never saw a regimental drill taking place under cover. It may be that there are buildings large enough for a complete regimental drill, but I never saw one. I have seen the National Guard of a good many States, and their regimental drills are held in encampments at certain seasons of the year, where the companies come together for that purpose; and if they have brigade formation they are also held at certain seasons of the year.

But I care nothing about that. I return to the original proposition, that in order to make a soldier he must be drilled by his company commander and the art of war is taught him by his company drill. I do not say that the regimental drill is not valuable. On the contrary, I assume that in time of war it would be very necessary; but, so far as the preparation made by the National Guard is concerned, the great important thing is the alertness and the completeness of the work in the company and under the captain of the company. I know that, because in most of the States of the Union they have no regimental drill save once or twice a year, and that for probably one week, whereas they have company drill every week or every two weeks.

Therefore, submitting my opinion with all deference to those of wider experience, I think that when we come to take care of the National Guard in the District of Columbia we will do well to care for them as companies.

I do not mean to say that we should have an armory for every company—that would be impracticable—but we ought to have armories so scattered over the District of Columbia that the members of a few companies may seek it easily and conveniently, alternating upon nights assigned for the drill. If we are to provide for regimental drills, they must be in open spaces in the District of Columbia. I would rather buy a parade ground in the District of Columbia for these maneuvers than attempt to cover them under a monumental structure of this character.

I am not objecting to the expenditure of money. I am simply objecting to the manner in which it is proposed to be expended in this bill. I know what many people believe about it—that we will rear a great monumental building, something like the Senate Office Building, or at least commanding like the new Post Office Building. Sooner or later we will have to draw the line between the monumental building, which is intended to convey the dignity and the greatness of the country, and the utilitarian structure, which is built purely upon business lines. I think an armory, especially in a city like Washington and in the District of Columbia, ought to take on the latter form rather than the former.

I would not object at all to the expenditure of money at the proper time. It may be that in view of the immense sums that are to be appropriated by this bill we are not ready for it, but when the time comes, if there is not public spirit enough here to build these armories individually, and I doubt whether there is, I think the welfare of the Government requires that we shall take care of the National Guard, and I will be very glad to do it.

We have in my State four regiments of the National Guard. It is not a large force, but it holds a very creditable place in the National Guard of the Union. Some of its members have won high honor, not only in national competition but in international competition as well. I suppose that we have 30 armories over the State, and I will venture to say that the 30 armories have not cost more than $750,000; and not one penny was ever contributed by the State to either of them, although the State makes an allowance to every company in the way of rent for the armory property. We have endeavored to bring that guard to its present excellence by providing for company drill, and I am not willing to do more than that in the District of Columbia.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. SMITH of Georgia. Mr. President, I move to lay section 12——

Mr. SUTHERLAND rose.

Mr. SMITH of Georgia. I rose to move to lay the amendment on the table, but I will not do it, in view of the chairman of the committee rising.

Mr. SUTHERLAND. Mr. President, I have only a word or two to add to what I have already said upon this subject. The question is of no more concern to me than it is to anyone else, but I have taken the trouble to go through the city and examine the various quarters in which these men are housed. I undertook a moment ago to state the condition of some of them. I wish to read very briefly from what Col. Harvey said about some of the others. After describing some of them, the chairman asked the character of the buildings in which all these supplies are stored.

The CHAIRMAN. The character of buildings in which all of these supplies are stored, how does that compare with the Y. M. C. A. Building, for example?

Col. HARVEY. The Y. M. C. A. Building, in which the National Guard Company is quartered, is not a part of what is known as the Y. M. C. A. Building; it is a temporary shed. It was an old bicycle barn.

The CHAIRMAN. A wooden shed?

Col. HARVEY. It is a wooden shed, covered with corrugated iron.

The CHAIRMAN. And contains a good many inflammable materials?

Col. HARVEY. There are a good many inflammable materials all about it.

The CHAIRMAN. Is there some oil about there?

Col. HARVEY. I do not know about that. There is a livery stable next door, and they had a fire there not more than a year or so ago and considerable property was destroyed there.

Our main armory is over what is known as the Center Market, and there, in order to get storage accommodations, which the building did not afford in its original shape, they built up on iron girders a framework, which they filled in with wooden partitions covered with galvanized iron, and in that temporary sort of a building we have a considerable amount of property stored.

Then we have an old residence on Missouri Avenue, between Four-and-a-half and Sixth Streets, one of a row of very old houses in a run-down and unsightly neighborhood, in which we have quartermaster's stores deposited.

Our field battery is in two old houses, and we have a shed over one portion of them so as to afford gun room; and we have another storage room which is no more secure in one of the small, old buildings on B Street, between Sixth and Seventh Streets. The stores are at the mercy of fire at any time.

That was the premises of which I spoke when I said that they stored upward of $200,000 worth of Government supplies in that old building.

He goes on and speaks of the condition. First, speaking of the State of New York, he says:

New York State, I will say here, has 59 armories owned by the State or county and maintains practically an entire division. She has something over 16,000 troops—and when I say "troops" in reference to New York guardsmen I think it is a correct statement. There soldiers are held up to a good standard of discipline, and it is possible to keep them to that standard.

They have spent in the State of New York for armories an aggregate, as I recall the figures, of over $10,000,000, with their 16,000 troops.

Then he goes on and states that some of the men have to double up.

Some of the men have to double up and put the equipments of the two men in one locker. The standard locker adopted by the Army is 6 feet high, 24 inches wide, and 18 inches deep. The lockers which we have—80 per cent of them—are not half that size. We can not put all of a man's equipment in them. Take, for instance, our equipment of overcoats. We have not any place to put a man's overcoat to keep it except in packing boxes. We have stored in our main armory stack upon stack of big chests containing the overcoats. If a company is ordered out in winter, a man has to go to the armory superintendent, draw his box of overcoats, give a receipt for it, take it out, and issue it to the men. You can see how absolutely impossible it is to make a quick movement with that kind of accommodations.

There is much more to the same purpose, showing the utterly inadequate makeshift with which these men are compelled to put up.

I can only say in reply to what the Senator from Iowa [Mr. CUMMINS] has suggested, that the committee heard this question at very great length and with a great deal of patience. Col. Harvey appeared on behalf of the militia and other officers of the militia. In addition to that, Brig. Gen. Robert K. Evans, who is chief of the division of military affairs of the entire country, who has given this matter very great thought, came before us. All these officers, thoroughly familiar with the situation, agreed that this was a proper way to deal with the question.

Now, I am not a military expert, and I must take the judgment of these men who have familiarity with it, and I do take it in preference to my own.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Iowa?

Mr. SUTHERLAND. Certainly.

Mr. CUMMINS. Can the Senator from Utah tell me how many men are expected to drill in the proposed armory at one time?

Mr. SUTHERLAND. I do not know, Mr. President, how many men.

Mr. CUMMINS. More than one company?

Mr. SUTHERLAND. Yes; I should say so. The Senator spoke about a brigade drill. Of course nobody pretends that an entire brigade is going to drill in this hall. I made no such suggestion.

Mr. CUMMINS. Does anybody pretend that a whole regiment will drill in it?

Mr. SUTHERLAND. No; not a whole regiment.

Mr. CUMMINS. Or any two companies at the same time?

Mr. SUTHERLAND. I see no reason why two companies should not drill—perhaps more than two companies; I do not know. That is a detail which was not brought to our attention. We did hear these military men, who have made a study of this question for years and have been familiar with these plans. They are familiar with the fact that the building is to be constructed at a central place; they know where the men are coming from, and all of them agree that this is the proper way to put up this building.

Mr. CLAPP. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SUTHERLAND. I do.

Mr. CLAPP. Can the Senator tell us how large this proposed building will be?

Mr. SUTHERLAND. The building will have a drill hall 243 by 350 feet in area. That is not as large as several of the drill halls in the armories in New York. I have the figures here if the Senator cares to have them. I will not take up the time to quote them.

Mr. CLAPP. I should think that a battalion could be drilled in a hall of that size.

Mr. SUTHERLAND. Two hundred and forty-three by 350 feet?

Mr. CLAPP. Yes.

Mr. SUTHERLAND. Well——

Mr. CLAPP. Personally I think this item ought to be on another bill. It seems to me the item should be in the District of Columbia appropriation bill; but aside from that I would be in favor of putting up the building.

Mr. SUTHERLAND. These officers speak of the necessity of having an armory constructed in such a way and with such material that it could be defended against attack if it were necessary. Of course, we may think that there will never be an occasion, yet there may be. Armories are built in that way. Col. Harvey spoke of the necessity of having it constructed in such a way that if attacks were made it could be successfully defended. We can not go out here and simply erect a barn, some frame structure. In addition to that, it is to be located in a central point, surrounded by all these beautiful buildings, and it ought to be a building in keeping with others in the city of Washington.

The PRESIDENT pro tempore. The question is on the amendment of the committee.

Mr. BRISTOW. Mr. President, I wish to make an inquiry. I am not a military expert, so I am not interested in the military part of this proposition; but I have been very much impressed with the statement made by the Senator from Georgia [Mr. SMITH] in regard to the expense that we have here for the rent of buildings.

You may appropriate a million dollars for a building, and if it is built of steel, as is usual in the construction of our public buildings, there is a very heavy expense for small accommodation.

I will venture the suggestion that the Southern Building down here will hold as much of a working force as $10,000,000 worth of Government buildings would, as they are constructed. We are using these new office buildings very largely. I think the

Government probably is the largest tenant of most of them. Why would it not be practicable to buy one of them and save some of the rent we are paying instead of waiting for years to have one built, and then have a building that will not accommodate many people in proportion to its expense.

The criticism on that will be, Oh, it is not in keeping. Well, I am in sympathy with the suggestion of the Senator from Iowa [Mr. CUMMINS] that there is not any use of these great monumental buildings like the Capitol and Senate Office Building for ordinary workshops and office buildings. You could take two office buildings in this city, the Southern Building and the Woodward Building, across from it, and buy them for less than $5,000,000 and probably save half the rent that we are paying. I want to inquire of some of the more experienced Senators here, if that would not be a much more proper proposition than those that are contained in the bill, so far as usefulness to the Government is concerned?

Mr. SUTHERLAND. The Senator does not think that we can buy an armory building?

Mr. BRISTOW. Oh, no; I am not in on this military business. I am not impressed with it much myself. I would not think of spending $750,000 for land that we already own for a parade ground. I would rather parade out here on sunny days in the park somewhere.

Mr. SUTHERLAND. The Senator knows the experience we have had with the Geological Survey building. That is a building constructed by private parties. Everything we have there is in danger of being destroyed at any time by fire. Some one has just told me that they had a fire there, I think it was last night. They are not fireproof buildings.

Mr. BRISTOW. But, then, is not the Southern Building fireproof? Have they not fireproof office buildings here that could be obtained?

Mr. SUTHERLAND. It seems to me the Government of the United States can build these structures quite as cheaply as it can allow somebody else to build them, and then pay for them.

Mr. BRISTOW. That may be true; it ought to be true; but when we make an appropriation for a departmental building and it will be three or four years before it is constructed, while a private company will go to work, authorize a building tomorrow, and in a year from that time it will be occupied. Why can we not do the same thing? Why is it not done, if we can do it?

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Washington?

Mr. BRISTOW. I do.

Mr. POINDEXTER. I would not interrupt the Senator to ask for the reading of a letter but for the fact that the Senator from Utah [Mr. SUTHERLAND] has referred to a fire which occurred this morning. I have a letter here describing that fire and the manner in which it injured very valuable public property. I should like to have it read by the Secretary. I will, however, defer the request until the Senator concludes, if he desires that I shall do so.

Mr. BRISTOW. I am through. I simply wanted to make these suggestions.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The Secretary read as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
Washington, February 26, 1913.

Hon. MILES POINDEXTER,
United States Senate.

MY DEAR SENATOR: The fire at 1320 F Street at 7.15 this morning calls attention to the imminent danger to the public records in the rented quarters of the United States Geological Survey. This fire was only 12 feet from the "annex," an alley building occupied by the engraving division of the survey, and a building itself a fire trap and termed "death trap" by Representative CANTRILL on the basis of an inspection made by a House committee. This small building contains not only the machinery and tools used in this Government work, the value of which is not less than $100,000, but here are stored the engraved copper plates representing the work of 30 years to the number of 8,000. These have a replacement value of $750,000, and would need to be reengraved at this cost to meet the public demands for the periodic reissue of the topographic maps which now sell to the amount of half a million annually.

The greatest loss that would surely result from a fire in the annex, however, would be the destruction of 150 or more manuscript maps in process of engraving. This loss would mean the resurvey of the areas represented, and thus necessitate at once the duplicate expenditure of from $600,000 to $1,000,000.

The fire loss possible in the main survey building at 1330 F Street would total between three and four million dollars in addition to that stated above.

In my opinion these facts present an unanswerable argument for the authorization of the public building proposed for the Geological Survey on a site outside the congested business section of the city.

Very respectfully,

GEO. OTIS SMITH, *Director.*

Mr. WILLIAMS. Mr. President, Maj. L'Enfant and the first President of the United States and his Secretary of State had broad imaginations and long vision. They planned to make Washington an architecturally well-adorned place. They went back, not without reason, to those styles of architecture which had illustrated the public life of the ancient Republics, Athens and Rome, and I hope that the Congress of the United States will never permit any mere utilitarian purpose to destroy the architectural harmony of the city of Washington—a pillared classic, a white columnar architecture, now and then with a Græco-Roman dome. It is perfectly fitting that the greatest Republic of modern times should perpetuate the characteristic architecture of the two greatest Republics of the old times.

I am not very much in favor of splendid government; everybody knows that; I am in favor of simplicity of governmental machinery; but I do believe that the Capital of this Nation can be made full of illustrations of the grandest types of classical architecture that the world has ever seen. It is not quite that yet, although we have in the Capitol, the Congressional Library, the old Treasury building, and in some of the other buildings in the city some very splendid illustrations of it. The day will come when the best specimens of the public architecture of Rome and Athens will sink into absolute insignificance in comparison with that of the Capital of the American Republic. To allow the mere utilitarian consideration of getting the most room possible in a public building to destroy the harmony of it all is unutterably abhorrent to me.

In one case, at any rate, we can see what a blotch has been made. This new post-office building on Pennsylvania Avenue is a sort of cross between a medieval town hall and a modern brewery. Its presence destroys the great picture that Pennsylvania Avenue after a while will present when it is all lined with great, white-pillared, classic buildings, in harmony with one another and in harmony with the original classic architectural plan of the city of Washington, which, in my opinion, ought never to be departed from.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. WILLIAMS. I yield.

Mr. BORAH. In regard to the architectural beauty of our city, I suppose the Senator from Mississippi has in mind the Interior Department, the Land Department, the Post Office Building, and the Pension Office?

Mr. WILLIAMS. Mr. President, I have in my mind the old Post Office Building, the old Interior Department Building, where the old Patent Office was—very creditable specimens of classic architecture—but I have not in my mind the present post-office building. I have just now said that it was a cross between a medieval town hall and a modern brewery building.

Mr. BORAH. I am not familiar with the latter.

Mr. WILLIAMS. Of course, nobody could carry in his mind for any great length of time without having the mental picture of it making him insane either the Pension Bureau or the Census structure down here below the Capitol. I want to avoid all future hybrid repetitions of either one of them.

The PRESIDENT pro tempore. The question is on the amendment.

Mr. SMITH of Georgia. I ask for a division.

The question being put, there were on a division—ayes 31, noes 18.

The PRESIDENT pro tempore. The amendment is agreed to.

Mr. SMITH of Georgia. A quorum has not voted. I make that point, Mr. President.

The PRESIDENT pro tempore. There were 49 votes, and 48 is a quorum. A quorum has voted.

Mr. SMITH of Georgia. Then, I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRIGGS (when his name was called). I have a pair with the senior Senator from West Virginia [Mr. WATSON], and will therefore withhold my vote.

Mr. CHAMBERLAIN (when his name was called). I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I will withhold my vote in his absence.

Mr. CULBERSON (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT], and will therefore withhold my vote.

Mr. NELSON (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. BACON], and therefore withhold my vote.

Mr. SMITH of Michigan. I transfer my pair with the junior Senator from Missouri [Mr. REED] to the Senator from Rhode Island [Mr. LIPPITT], and will vote. I vote "yea."

Mr. SMITH of South Carolina. I have a general pair with the Senator from Delaware [Mr. RICHARDSON], who is not present, and I therefore withhold my vote.

Mr. WARREN (when his name was called). I transfer my pair with the senior Senator from Louisiana [Mr. FOSTER] to the Senator from South Dakota [Mr. GAMBLE] and will vote. I vote "yea."

The roll call was concluded.

Mr. BRIGGS. I transfer my pair with the senior Senator from West Virginia [Mr. WATSON] to the junior Senator from Pennsylvania [Mr. OLIVER] and will vote. I vote "yea."

Mr. CHAMBERLAIN. I transfer the pair I have with the junior Senator from Pennsylvania [Mr. OLIVER] to the senior Senator from West Virginia [Mr. WATSON] and will vote. I vote "yea."

Mr. DILLINGHAM. In the absence of the senior Senator from South Carolina [Mr. TILLMAN], with whom I have a pair, I transfer that pair to the Senator from Wisconsin [Mr. STEPHENSON] and will vote. I vote "yea."

Mr. PERKINS (after voting in the affirmative). I inquire if the junior Senator from North Carolina [Mr. OVERMAN] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. PERKINS. I have a general pair with that Senator, and will therefore withdraw my vote.

Mr. PAYNTER (after having voted in the affirmative). I inquire if the senior Senator from Colorado [Mr. GUGGENHEIM] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. PAYNTER. I have a general pair with the Senator from Colorado. I transfer that pair to the Senator from Mississippi [Mr. PERCY] and will allow my vote to stand.

The result was announced—yeas 35, nays 26, as follows:

YEAS—35.

Bankhead	Clark, Wyo.	Kavanaugh	Smith, Md.
Bourne	Crawford	Lodge	Smith, Mich.
Bradley	Curtis	McLean	Smoot
Brandegee	Dillingham	Martin, Va.	Sutherland
Briggs	Fall	Page	Swanson
Burnham	Fletcher	Paynter	Townsend
Catron	Gallinger	Penrose	Warren
Chamberlain	Jackson	Poindexter	Wetmore
Clapp	Jones	Root	

NAYS—26.

Borah	Hitchcock	O'Gorman	Smith, Ariz.
Brady	Johnson, Me.	Owen	Smith, Ga.
Bristow	Johnston, Ala.	Pittman	Stone
Bryan	Kenyon	Pomerene	Thomas
Clarke, Ark.	Kern	Sheppard	Williams
Cummins	Lea	Shively	
Gore	Myers	Simmons	

NOT VOTING—34.

Ashurst	du Pont	Martine, N. J.	Smith, S. C.
Bacon	Foster	Nelson	Stephenson
Brown	Gamble	Newlands	Thornton
Burton	Gardner	Oliver	Tillman
Chilton	Gronna	Overman	Watson
Crane	Guggenheim	Percy	Webb
Culberson	La Follette	Perkins	Works
Cullom	Lippitt	Reed	
Dixon	McCumber	Richardson	

So the amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 53, after line 16, to insert as a new section the following:

SEC. 13. That the acquisition by the commission hereinafter mentioned of a site and the erection thereon of a memorial building in the District of Columbia to commemorate the services and sacrifices of the loyal women of the United States during the Civil War is hereby authorized. The said building shall be monumental in design and character and shall be used as the permanent headquarters of the American Red Cross, and shall cost, with the site, not less than $700,000, of which sum the United States shall contribute $400,000, which shall not be payable, however, until there shall have been raised by private subscription by the Commandery of the State of New York of the Military Order of the Loyal Legion of the United States an additional sum of $300,000.

The money hereby authorized shall not be paid for any site nor toward the construction of any memorial unless the site and the plan for the proposed building shall have been approved by a commission consisting of the Secretary of War of the United States, a representative of the Commandery of the State of New York of the Military Order of the Loyal Legion of the United States, and a representative of the American Red Cross, which representatives shall be duly designated by said associations, respectively, to act for them. The plans of the said memorial shall likewise be approved by the Commission of Fine Arts. The expenditure for said site and memorial shall be made under the direction of the commission consisting of the Secretary of War and the representatives of the Commandery of the State of New York of the Military Order of the Loyal Legion of the United States and the American Red Cross; and the said memorial shall be constructed under the supervision of an officer of the Corps of Engineers appointed by the Secretary of War, who shall act as the executive disbursing officer of the commission.

The title to the site procured shall be taken by and the building erected thereon shall be the property of the United States, but the American National Red Cross shall at all times be charged with and be responsible for the care, keeping, and maintenance of the said memorial and grounds without expense to the United States, subject to such further direction and control as may be provided by law.

Should the commission hereby created be unable to acquire a suitable site at a price deemed by the commission to be fair, it is authorized to institute condemnation proceedings, in accordance with the provisions of the act of Congress approved August 30, 1890, providing a site for the enlargement of the Government Printing Office (U. S. Stat. L., vol. 26, ch. 837).

Mr. WILLIAMS. Mr. President, I move to strike out, in line 20, page 53, the word "loyal."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the committee amendment, on line 20, page 53, before the word "women," by striking out the word "loyal," so as to make the amendment read:

SEC. 13. That the acquisition by the commission hereinafter mentioned of a site and the erection thereon of a memorial building in the District of Columbia to commemorate the services and sacrifices of the women of the United States during the Civil War is hereby authorized—

And so forth.

Mr. WILLIAMS. Mr. President, $400,000 of this money is contributed from the Treasury of the United States. The total cost is to be $700,000, and I would be perfectly willing that the entire $700,000 should be contributed from the Treasury of the United States; in fact, I think that ought to be done.

Mr. President, Mississippi and Mississippians are as much in the Union to-day as Massachusetts and Massachusetts men and women. The money in the Treasury is paid by the citizens of the entire country—by the citizens of the South as much as by the citizens of the North. It would be a beautiful idea to erect here a beautiful building to commemorate the courage, fortitude, faithfulness, and sacrifices of the women of the United States during the American war between the States. During the four years of that war there was neither in the ante bellum nor in the post bellum sense any United States. There were a couple of congeries or groups of formerly united and subsequently reunited but temporarily disunited States.

It seems to me the time has about come when, in connection with the women at any rate, if not with the men, we might commemorate the courage and loyalty of both sides. It seems to me that it is not contributing half so much to the glory of the Republic to erect a beautiful building in commemoration of the sacrifices and courage of the women of only a part of the United States and leave uncommemorated the sacrifices and services of the women of the other part of the United States. I leave the question to the good sense of the Senate.

Mr. ROOT. Mr. President, if this were an original proposition, I should not hesitate for a moment to agree with the Senator from Mississippi. I do not think I ought to let it go, however, without calling the attention of the Senate to the fact that this amendment is in the terms of a bill which has already passed the Senate. I feel that I ought to call attention to it, because I think I reported that bill, and had charge of it.

The bill came before a committee of which I was a member, and was considered on the basis of the state of facts that $300,000 had been subscribed for a building to commemorate the services of the loyal women of the United States during the Civil War, and that a change might imperil and lose that subscription. That is all. If the Government were to make up that subscription, I should be quite willing.

Mr. SMITH of Georgia. Mr. President, I should like to ask the Senator from New York whether it would not be a great deal better that the Government should make up the whole $700,000, and pay this tribute to all of the women of our entire country, than to put it in such shape that it would possibly estrange or wound the feelings of any of them.

Mr. ROOT. That would be very agreeable to me, if the Government would make it up; but I do not feel like letting this amendment pass sub silentio, so long as it might kill the whole enterprise by destroying the $300,000 subscription.

Mr. SMITH of Georgia. I desire to add a further amendment, changing the $400,000 to $700,000, and then I will vote for the provision.

Mr. WILLIAMS. Mr. President, the Government of the United States is paying $400,000 of this, whether it is paying the total cost or not; and that, it seems to me, would answer the objection that has been raised. But in order that there shall be no objection, I now give notice that if this amendment shall pass I shall move to strike out so much of the provision as makes it conditional upon the Commandery of the Loyal Legion of the State of New York paying $300,000.

Let us try to get together upon a common ground. Let us quit making the United States Government the source of the celebra-

tion of the courage, fortitude, and valor of only one part of the United States. Especially is that the case when it comes to the question of the women who suffered in silence—and in my section of the country who frequently starved—who showed a courage infinitely superior to that of the men, because they had no shoulder-to-shoulder touch; no hurrahing of the men and shouting of the captains to keep them spirited up.

I give notice that if the amendment which I now offer shall pass I shall then move to strike out the $300,000 which the commandery of New York is expected to contribute and to have that sum assumed by the United States.

Mr. ROOT. I suppose the Senator means to increase the appropriation correspondingly?

Mr. WILLIAMS. Of course; to increase the Federal appropriation to $700,000. I will let the Senator from New York draw up the amendment to suit himself, so that that will fix it.

The PRESIDENT pro tempore. The question is upon the amendment submitted by the Senator from Mississippi to the amendment of the committee. [Putting the question.] By the sound the ayes appear to have it.

Mr. BRISTOW. I should like a roll call on that, Mr. President.

The PRESIDENT pro tempore. The Senator from Kansas demands the yeas and nays.

The yeas and nays were ordered.

Mr. CLARKE of Arkansas. I ask that the amendment as finally proposed by the Senator from Mississippi may be again reported to the Senate. I understand it is proposed to strike out the word "loyal," and to strike out and insert in other parts of the section.

Mr. WILLIAMS. I am only offering that now.

The PRESIDENT pro tempore. The proposed amendment to the amendment will be stated.

The SECRETARY. On page 53, line 20, it is proposed to strike out the word "loyal" where it appears before the word "women."

Mr. WILLIAMS. Mr. President, I ask the attention of the Senator from New York. I move to strike out all on line 25, page 53, after the amount "$700,000," and all on lines 1, 2, 3, 4, and 5 on page 54. Does not that accomplish the purpose?

The PRESIDENT pro tempore. The Chair will call the attention of the Senator from Mississippi to the fact that the yeas and nays have been ordered.

Mr. WILLIAMS. Oh, I beg the pardon of the Chair.

Mr. LODGE. The matter is still open to debate, however.

The PRESIDENT pro tempore. It is.

Mr. TOWNSEND. Mr. President, I desire to call the attention of the Senator from Mississippi and the Senator from New York, who are discussing the redrafting of this provision, to the fact that there are other provisions in the bill which would have to be redrafted also, because this whole proposition is to be controlled by a commission, of which the Loyal Legion of New York is to furnish one member.

Mr. ROOT. Mr. President, that need not be interfered with. There is no reason to interfere with that.

Mr. TOWNSEND. I have very serious doubts whether the Loyal Legion might wish to be connected with this matter at all if they were to be denied the privilege of concluding the plan which they originated, namely, of contributing a fund, they having raised the first $300,000 and having proposed the whole plan.

Mr. ROOT. They would not be denied the right of contributing because the Government of the United States contributed $700,000. If they chose to come in with this subscription they could do it.

Mr. TOWNSEND. Does the Senator from New York think they would want to do it?

Mr. ROOT. I do not know, Mr. President.

Mr. LODGE. Mr. President, I should like to suggest that I think these amendments ought all to go together.

Mr. SWANSON. Will the Senator from Massachusetts permit me to make a suggestion?

Mr. LODGE. Certainly.

Mr. SWANSON. If the amendment offered by the Senator from Mississippi [Mr. WILLIAMS] is adopted, as I hope it will be and as it ought to be, the rest of the bill can be very easily amended in accordance with his amendment. It seems to me, when the roll call is taken on his amendment, if it is adopted the bill can be readily fixed to suit the amendment offered by him.

Mr. LODGE. The whole paragraph would have to be redrafted.

Mr. SWANSON. Not necessarily. We could simply take the first section and direct the Secretary of War to construct this building, to be the home of the Red Cross, and let the others contribute. It could be very easily reconstructed after the adoption of the amendment of the Senator from Mississippi.

Mr. CLARKE of Arkansas. Mr. President, one word. The pending amendment contemplates striking out the word "loyal," leaving the balance of the paragraph to stand. That would be somewhat incongruous in view of all the provisions of the section. I agree with the suggestion of the Senator from Massachusetts [Mr. LODGE], that all of the amendments, or the reformed and redrafted section, ought to be submitted as a substitute for the section as it now appears in the bill. We would then know what we were voting upon. We would have a concrete proposition that would be in contrast with the one in the bill, which is a wholly distinct proposition. I am not in favor of either.

Mr. WILLIAMS. Mr. President, I can state, with the permission of the Senator from Massachusetts [Mr. LODGE], who, I believe, has the floor, how the provision would read after making the full amendment. The first proposition was to strike out the word "loyal." The next would be to strike out the word "of," in line 5, page 53, and the next to strike out all of the balance of that clause after the word "contribute," in line 1, page 54, so that section 13 would read as follows:

SEC. 13. That the acquisition by the commission hereinafter mentioned of a site and the erection thereon of a memorial building in the District of Columbia to commemorate the services and sacrifices of the women of the United States during the Civil War is hereby authorized. The said building shall be monumental in design and character and shall be used as the permanent headquarters of the American Red Cross, and shall cost, with the site, not less than $700,000, which sum the United States shall contribute.

Mr. CLARK of Wyoming. Mr. President, I am in thorough sympathy with the proposed amendment of the Senator from Mississippi [Mr. WILLIAMS] as a separate proposition; but it seems to me the adoption of the amendment would defeat the purpose of the committee amendment.

As I understand the committee amendment, it is probably inserted at the suggestion of the organization known as the Loyal Legion, the membership of which is confined to those who fought upon the Union side during the Civil War. That organization proposes to raise, or has raised, $300,000 for a certain definite purpose, to wit, the erection of a memorial building in memory of the loyal women during the war between the States. Now it comes and asks that the Government of the United States shall add to the $300,000 which it has raised for that distinct purpose $400,000 out of the General Treasury.

It seems to me that the proposition of the Senator from Mississippi entirely takes the ground from under the proposition as reported by the committee.

Mr. WILLIAMS. If the Senator will pardon me, the building would still be in commemoration of the services and sacrifices of our mothers and sisters, and we ask for no money.

Mr. CLARK of Wyoming. The Senator must understand the proposition which he presents and the proposition which is presented by the Loyal Legion are two separate and distinct propositions. It occurs to me that way.

Mr. WILLIAMS. I understand that.

Mr. CLARK of Wyoming. While I would be perfectly willing, and, indeed, very much gratified, to vote as an independent proposition for the amendment the Senator from Mississippi presents, I do not think that I ought to take it as a substitute for the proposition which the Loyal Legion present as a separate matter.

Mr. WILLIAMS. Mr. President, if the Senator will pardon me a minute, there is nothing in this to prevent them from using their $300,000 to commemorate what they choose. We are merely including all that they want to commemorate in a broader and more national commemoration.

Mr. CLARK of Wyoming. No; but——

Mr. WILLIAMS. And in order that there may be no cause to complain of the broader purpose, because they are contributing, we do the work ourselves. Certainly, I take it, there will be no complaint on their part. The real object of the building is the occupancy of it, and that will be for the American Red Cross.

Mr. CLARK of Wyoming. Yet the Senator from Mississippi can not escape the conclusion——

Mr. WILLIAMS. And our women are in it as well as everybody else's.

Mr. CLARK of Wyoming. And yet the Senator from Mississippi can not escape the conclusion that if we adopt his amendment we refuse to contribute $400,000 to assist the Loyal Legion in erecting the building which they have proposed to build.

Mr. WILLIAMS. That is true. We amend so as to contribute $400,000 for a commemoration national——

Mr. CLARK of Wyoming. I want to vote $400,000 of the money of the United States to join with the Loyal Legion in making this memorial that they want. Then I want to join the Senator from Mississippi to vote $700,000 for the memorial which he wants.

I am not just now willing to substitute the one for the other, because I think there is merit in the proposition presented by the committee.

Mr. TOWNSEND. Mr. President, I do not believe there is a Senator in the Chamber who has less of sectional feeling than I have. It never occurred to me that a man comes from either the North or the South, so far as any feeling harking back to the past is concerned. I have quite as much respect for the women of the South as I have for the women of the North; but this proposition originated with the members of the Loyal Legion. They present the proposition to us. The bill is drafted and presented with the knowledge that it is a plan which they have proposed. If Senators on that side feel that this is a matter that would cast any reflection upon the women of the South, I would rather defeat the whole proposition——

Mr. WILLIAMS. Does the Senator himself feel——

Mr. TOWNSEND. Let me finish my sentence. I would rather defeat the whole proposition than to treat the Loyal Legion, whose plan this is, in a way that would seem to me to be most discourteous. I hope we have not reached the time when this Government can not propose to honor the men and their mothers and wives and daughters who made the Government possible without having attached to it a proposition to divest it of its patriotic intent. I shall feel obliged, under the circumstances, to vote against the amendment.

Mr. WILLIAMS. Does the Senator think there is anything in my amendment that would keep the Loyal Legion from building anything they wanted to commemorate anything they wanted? The only thing is that while this begins with the Loyal Legion, it ends with us. We say we are willing to do what you want done and more, and we say to the Loyal Legion we are willing not to take a dollar from you, provided you are willing to make the application of money to the commemoration of the women of all the United States, who prayed and suffered during the war between the States. The money that is in the Treasury is put there as much by Mississippi, Louisiana, and South Carolina as it is by Michigan and Massachusetts. We are not now two separate groups of disunited States.

Mr. TOWNSEND. I realize that quite as well as the Senator from Mississippi does.

Mr. WILLIAMS. Then why take the public money to commemorate solely the heroism of the women of one side?

Mr. TOWNSEND. If the Senator from Mississippi is opposed to that, that is another proposition, but to change, revamp, reconstruct this proposition that was brought up is the thing we object to.

Mr. WILLIAMS. But we are the legislative body, not the Loyal Legion.

Mr. TOWNSEND. I realize that.

Mr. STONE. Mr. President, I am not so very overly sensitive about whether we have the word "loyal" in the law or not; I would rather it was not. Therefore, I will vote to strike it out. The word "loyal" as used merely indicates and is intended to indicate in its application here a class of people who fought upon one side of that great civil strife. I do not care much about that. I am opposed to this whole proposition, whether you are going to appropriate the money to commemorate the sacrifices of the loyal women or the women of the United States, the women of the North alone or the women of the North and South together.

Mr. President, on Eighteenth Street, I believe it is, near the Speedway, there is a very beautiful structure erected there by the Daughters of the Revolution, the descendants of the men who fought to establish our independence in the struggle of more than a century ago. If we are to erect a building at public expense to commemorate the devotion and sacrifices of the mothers, wives, and daughters of the soldiers who wore the blue in that stupendous struggle of half a century ago between the States, or if we are going further and erect a memorial building commemorative of the loyalty in a broader sense, the devotion and the sacrifices of the mothers, wives, and daughters of the South and North alike, then why not go on along this line and erect a memorial building to commemorate the sacrifices, the loyalty, and the devotion of the mothers, the wives, and daughters of the soldiers who marched into Mexico and bore our banners across the wastes and won by their swords an empire and gave it to the United States? And we may go on and erect another one in commemoration of the sacrifices of the women in the Spanish-American War.

I think, Mr. President, that buildings of this kind ought to be constructed by contributions made by those patriotically interested, as was done in the construction of the memorial building owned by the Daughters of the American Revolution now standing in this city. I do not believe that the money collected by taxation from the people is well expended in the construction of establishments of this character. It is, I will not say a useless waste, but it is a useless and extravagant expenditure of money, and it ought not to be put in this bill. For one I intend to vote against the proposition.

Mr. SMITH of Georgia. I ask that we pass over this paragraph and go on with the balance of the bill.

The PRESIDENT pro tempore. The yeas and nays have been ordered. The question is on agreeing to the amendment.

Mr. WILLIAMS. What is the request of the Senator from Georgia?

Mr. LODGE. It is not too late to pass the amendment over.

The PRESIDENT pro tempore. The Chair thinks it is.

Mr. BRISTOW. I think we had better settle this question now and not have any more agitation about it.

Mr. WILLIAMS. So do I.

Mr. BRISTOW. It would not do any good to discuss it for weeks and weeks.

The PRESIDENT pro tempore. The Secretary will call the roll on agreeing to the amendment of the Senator from Mississippi to the amendment of the committee.

The Secretary proceeded to call the roll.

Mr. PAYNTER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. GUGGENHEIM]. In his absence, I withhold my vote.

Mr. PERKINS (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. OVERMAN].

Mr. SMITH of Michigan (when his name was called). I again announce my pair with the junior Senator from Missouri [Mr. REED]. I transfer that pair to the Senator from Rhode Island [Mr. LIPPITT] and vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again announce my pair with the Senator from Delaware [Mr. RICHARDSON], and withhold my vote.

Mr. WARREN (when his name was called). I have a general pair with the senior Senator from Louisiana [Mr. FOSTER], who is absent from the Chamber. He would doubtless vote "yea," if he were present, and I would vote "nay." Under the circumstances I withhold my vote.

The roll call was concluded.

Mr. DILLINGHAM. In the absence of the senior Senator from South Carolina [Mr. TILLMAN], with whom I have a general pair, I transfer that pair to the Senator from Wisconsin [Mr. STEPHENSON], and vote. I vote "nay."

Mr. CHAMBERLAIN (after having voted in the affirmative). I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the senior Senator from Nevada [Mr. NEWLANDS], and let my vote stand.

Mr. PERCY. I have a pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the Senator from Maine [Mr. GARDNER], and vote "yea."

Mr. CULBERSON (after having voted in the affirmative). I have a general pair with the Senator from Delaware [Mr. DU PONT]. In his absence I withdraw my vote.

Mr. SIMMONS. I desire to announce that my colleague [Mr. OVERMAN] is absent, and is paired with the Senator from California [Mr. PERKINS]. My colleague is absent on account of his physical condition. If he were present, he would vote "yea."

Mr. SMITH of South Carolina. I transfer my general pair with the Senator from Delaware [Mr. RICHARDSON] to the Senator from Tennessee [Mr. WEBB], and vote. I vote "yea."

Mr. SMITH of Georgia. I desire again to refer to the enforced absence of my colleague [Mr. BACON]. He was very much interested in this matter, and had he been present he would have voted "yea."

Mr. CULBERSON. I transfer my general pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Louisiana [Mr. THORNTON], and vote. I vote "yea."

The result was announced—yeas 40, nays 24, as follows:

YEAS—40.

Ashurst	Fletcher	Martine, N. J.	Shively
Bankhead	Gore	Myers	Simmons

So Mr. WILLIAMS's amendment to the amendment of the committee was agreed to.

Mr. WILLIAMS. In keeping with what I announced, I now move to strike out, on page 53, in line 25, the word "of," after "$700,000," and on page 54, after the word "contribute," to insert a period and strike out the balance of line 1 and all of lines 2, 3, 4, and 5.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

Mr. WILLIAMS. In explanation I will state that it merely strikes out the amount of money to be contributed by the Loyal Legion and makes the entire expense of the total, $700,000, fall upon the Treasury of the United States.

Mr. SMITH of Georgia. Mr. President, it seems to me that the section must be so completely rewritten that we might pass it over now and go on with the balance of the bill.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Georgia?

Mr. BRISTOW. I would rather dispose of it now.

The PRESIDENT pro tempore. Objection is made. The amendment submitted by the Senator from Mississippi to the amendment will be stated.

Mr. STONE. I ask for the yeas and nays on agreeing to it.

Mr. WILLIAMS. Mr. President, one word. Of course this will require later on some other amendments. I have marked them all, and will get the whole thing in accord with this amendment. There is no use passing it over at all.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Mississippi to the amendment of the committee will be stated.

The SECRETARY. On page 53, line 25, strike out the word "of," before the word "which," and on page 54, line 1, strike out, beginning with the numerals "$400,000," the remainder of the paragraph, so that if amended it will read:

> And shall cost, with the site, not less than $700,000, which sum the United States shall contribute.

The PRESIDENT pro tempore. The question is on the amendment to the amendment.

Mr. STONE. Mr. President, I think we ought to have the yeas and nays, and I call for the yeas and nays.

The yeas and nays were ordered.

Mr. STONE. Mr. President, I desire to say a word. It is clear to me that it would be an exceedingly great mistake to establish a precedent of this kind. It would be a wrong expenditure of the public money. Certainly this proposition would not have been in this bill—is not that a fact?—except because the Loyal Legion of New York raised by subscription $300,000 to construct a memorial building commemorative of the sufferings of the women of the Northern States during the war of 1861–1865. Those splendid women of the North have organized their societies, scattered broadcast throughout the States in which they live, and have the beautiful patriotic wish to erect a building commemorative of the devotion of themselves and of their mothers during the period of that great struggle between the States. They had a right to do that. Any movement by them in that direction should command our highest respect. So likewise would the women of the South if they care to do so—and I am not sure that that has not been attempted in some sections of the South—to raise money by subscription to commemorate the suffering, the patriotism, the loyalty of the women of that section.

Mr. President, when we go outside of those individual or concerted efforts to use the public funds of the Nation to construct edifices of this character it does not for one moment appeal to me. There is no more reason why we should take money to construct a building of this kind than that we should construct one, as I have already said, commemorative of the suffering of the women whose lives were identified with other great struggles in which the United States was engaged. I think the whole proposition embraced in this provision should be eliminated. I intend to vote against this kind of an appropriation.

Mr. WILLIAMS. Mr. President, I do not agree with the Senator from Missouri [Mr. STONE]. I do not believe that a people's life is entirely an immaterial thing. I think that it is as noble of a nation to commemorate the heroism and constancy of its dead as it is of a son to erect a monument upon his father's grave, and I do not consider either a waste of money. What constitutes a nation is neither its wealth nor its area; it is its traditions, its ideals. It is the soul politic and not the body politic that makes the nation and constitutes the greatness of a government.

I will be glad to see a monument erected to the heroic women of the North and of the South, and I hope it will be such a beautiful building that it may go down in all history as a commemoration equal in beauty and chastity to that which was erected by the great Mohammedan Sultan to his deceased wife, so that it shall contain at one and the same time a beauty of thought, a beauty of life, and a beauty of architecture. There is nothing in this that will prevent somebody at some time or the National Government at some time erecting a monument to commemorate the heroism of its various other heroes whom the Senator has mentioned.

To say that a nation shall never commemorate in granite and in marble and in noble architecture the heroism of the forefathers of the nation is to say that the nation shall shrivel up and become a mere material thing, without soul and without sentiment and without poetry, that makes soul and sentiment.

Some people say that sentiment is rot, unworthy of governmental notice. It is the only thing in the world that is not rot. That is rot which can decay and go back to the earth. The form of the strongest man, of the most beautiful woman, of the sweetest and healthiest-looking child, stocks and bonds, and the rest of it, but there is just one thing that never dies, and that is an ideal, a sentiment, a noble purpose transplanted from one human breast into another, to go traveling down the ages for all time. It is much better to spend money to commemorate the greatness of the heroes who have made a country than it is to spend money to improve present material welfare. So far as that is concerned, I do not agree with the Senator from Missouri.

Now, then, one more word in explanation of the amendment which I have offered and of the suggestion made by the Senator from Georgia [Mr. SMITH]. The Senator from Georgia says there are other parts of the bill that ought to be amended in order to be in keeping with this. Mr. President, I read just below the following:

> The money hereby authorized shall not be paid for any site nor toward the construction of any memorial unless the site and the plan for the proposed building shall have been approved by a commission consisting of the Secretary of War of the United States, a representative of the Commandery of the State of New York of the Military Order of the Loyal Legion of the United States, and a representative of the American Red Cross.

To show the spirit which actuates me, at any rate, in making the motion that I have made, I want to leave, as a member of that commission, the representative of the Order of the Loyal Legion of the State of New York, and let these plans be submitted to him as well as to the other two commissioners. A Senator upon the other side of the vote a second or two ago—I do not mean upon the other side of the Chamber—said to me that this amendment of mine defeated the purpose of the Loyal Legion of New York. I do not believe it does; I do not think that meanly of them. I do not believe that they will think that their purpose in commemorating the heroism and the sacrifice of their women has been defeated because, at the same time, we are commemorating the heroism and sacrifices of our women, equally noble and equally brave and equally American—remember that. But if it should be so, then I would leave the commissioner there, so that he might fail to approve it, if he chose, and let the thing go by the board. I challenge that test of it. I therefore shall not move to strike out the representative of the Commandery of the Loyal Legion merely to keep the provision in harmony, because I want to illustrate to the Order of the Loyal Legion that it was meant by me, at any rate, and by all of us, when we cast the vote a moment ago, for the purpose of accomplishing their purpose, to leave their representative upon the board, to pass not only upon the plans and the expenditure of the money and all that, but also upon our purpose. I think too highly of them to hesitate one moment in my own thought as to what their conclusion shall be.

Mr. SUTHERLAND. Mr. President, I want to say a word, and a word only, with reference to this matter. I think the discussion we have already had is unfortunate. I think the motion which was carried to strike out the word "loyal" from this bill was unfortunate.

This scheme originated, as I understand, with the Commandery of the Loyal Legion. It is their proposition, not ours. They propose to contribute $300,000 to erect a monument to the loyal women of the Civil War, and the Government was asked to contribute $400,000 to that same purpose. Now, we can either accept their proposition or we can let it alone. It seems to me that it is little less than an affront to the members of this legion to take their proposition and turn it into something entirely different from that which they themselves originally

conceived and desired. I shall therefore vote against this proposition, as I voted against the other proposition. Either we ought to put this amendment through as it is presented and accept this proposition of the Loyal Legion, or we ought to let it alone.

Mr. FALL. Mr. President, I voted against the first amendment offered by the Senator from Mississippi [Mr. WILLIAMS], and I shall vote against the other amendment which he proposes to offer to perfect his original amendment.

Sometimes, Mr. President, in discussing a question of this kind, possibly a Senator may be excused for referring to personal matters. I am a son of the South. My mother was the wife of a Confederate soldier. My wife is a member of the organization known as the Daughters of the Confederacy. If the proposition of the Senator from Mississippi were to erect a monument costing five times the amount proposed to be expended under this amendment to the memory of those women in the South, I would vote most cheerfully for it. If it came as an original proposition to erect a monument of this character under the terms of his proposed amendment, I would most cheerfully vote for it; but that is not the case, sir. This proposition comes from the women of the Loyal Legion, whom I respect, as I know the Senator from Mississippi does, just as I respect the Daughters of the Confederacy in the South. It originated with those loyal women in the North, and they have come here with a concrete proposition embraced in this amendment proposed by the committee, and I think, sir, that it is an injustice to adopt an amendment which absolutely does entirely away with this proposition.

If the Senator from Mississippi chooses to offer here a separate amendment or a provision for an appropriation to erect a monument, as I have said, to the memory of my mother and the other women of the South who underwent the hardships of four years' warfare carried to their own doors, I will vote with him most cheerfully, and I am satisfied that the Members on this side of the Senate will join me in such an effort; but, sir——

Mr. WILLIAMS. Mr. President, will the Senator permit me to ask him a question?

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Mississippi?

Mr. FALL. Certainly.

Mr. WILLIAMS. Will the Senator permit me to ask him two questions in one?

Mr. FALL. Certainly; half a dozen.

Mr. WILLIAMS. In the first place, does the Senator think that it would be nice of me or of anyone to offer a proposition here, out of the money in the Treasury of the United States, which is paid by all the people, to erect a monument simply to the women of one section of the country? And, in the second place, I want to ask the Senator if he does not remember that at the beginning of this Congress, under a recommendation of the Secretary of War and under a unanimous report of the Military Affairs Committee of the Senate, I tried to get a small appropriation to complete a monument commemorative of the services of the Confederate navy as a part of the mapping of the Vicksburg Park, and could not even get the yeas and nays upon it?

Mr. FALL. Mr. President, first, in answer to the second question asked me by the Senator from Mississippi, I have to say that I do not remember such effort upon his part, because, unfortunately, I was not here to assist him in demanding the yeas and nays, nor in giving him my vote for the proposition which he says he submitted.

In the second place, Mr. President, as a son of a Confederate, and I believe as loyal a man as can be found in this Hall now, I think that this is not the proper peace monument to erect between the North and the South, if that is the purpose of the Senator from Mississippi. I think the time has come when we should hear nothing about the war between the North and the South; but I do not think that the time has yet come—and I hope to God that it never will come—when it will be considered treacherous or traitorous to this great United States to wipe from our statute books or to cast out from our vocabulary the word "loyalty."

Mr. President, these loyal women of the North have inaugurated this proposition. It is theirs. The Senator from Mississippi says he does—and I know that he does—respect them. Then, if he is willing to vote away the money of the United States Treasury at all, why not assist them, and if, as he says, he wants to erect a great monument of a similar character to all the women of the United States, I will vote for it; and if he wants to erect a monument to the memory of those women of the Confederacy and of their daughters who now constitute the organization known as the Daughters of the Confederacy, I will vote for it; but, Mr. President, I will never vote to strike out the word "loyal" from this bill, and I will not vote for the proposition advanced by the Senator from Mississippi; and I am just as loyal to the memory of my mother and of my other relatives in the South who are filling graves that were dug for them during the war—I am just as loyal to their memory and to the memory of those good women of the South as is the Senator from Mississippi or any other man from the South or from the North.

Mr. President, this is not, to my judgment, the proper kind of legislation; it is not the proper place to put an amendment of the character sought to be injected into this bill by the Senator from Mississippi; and, if his amendments are adopted, I shall vote against the amendment as amended and I shall vote against the bill on its passage, although it contains appropriations for my State.

Mr. ROOT. Mr. President, I wish to say a single word.

I voted against the proposal to strike out the word "loyal," notwithstanding the fact that as an original proposition I should be quite willing to vote for an appropriation to commemorate all the women of the Civil War, because I fear it would be regarded by the originators of this proposal as a practical rejection of their proposal. The amendment of which the Senator from Mississippi [Mr. WILLIAMS] gave notice, and which he now proposes, is to take upon the United States the burden of paying for the Red Cross building as a memorial to all the women of the Civil War. I regret that the original proposal of the military order of the Loyal Legion was rejected, as it was rejected, by the vote which the Senate has taken. But this other proposition, I think, is one which may well commend itself to us, and I intend to vote for it.

Mr. LODGE. Mr. President, I regret very much that this debate has arisen at all. I think it is always unfortunate to have debates of this character. My objection to this change is, first, that we are treating the offer of the Loyal Legion and the plan which they propose, which we have embodied in a bill and passed, with what seems to me very scant courtesy. Moreover, I do not like the point that was selected to strike the word "loyal" from the bill. If it is stricken from one place, it might as well be stricken from before the word "legion." I am not quite prepared to vote for that. I am not quite prepared yet to accept the proposition that the Government of the United States is never to erect a monument to the memory of the people who fought for the United States. For that reason I can not give my vote to the amendment as amended, or to the bill, if it contains the amendment.

Mr. CUMMINS. Mr. President, it seems to me we are committing, or may commit, a very grave mistake. The Senator from Mississippi knows that I at least have no sectional prejudice. He will remember that I was one of the few Senators who favored, and sincerely favored, the proposal to erect in the military park at Vicksburg a monument to commemorate the courage of the Confederate navy. I have no objection whatever to the erection of monuments to memorialize courage and valor anywhere. I have very great objection, however, to the proposition that is made here.

Let us see just in what position it leaves the Senate of the United States. The Loyal Legion of New York came to Congress and made the proposition that it would contribute $300,000 toward the erection of this structure if Congress would add a contribution of its own. That proposition was embodied in a bill. It was referred to the Committee on the Library. The committee considered it and reported it favorably. It reported it in the exact phrase that is found in this bill. The Senate, upon consideration, passed the bill and accepted the proposition of the Loyal Legion of New York. Our acceptance is now before the House of Representatives in the form of a solemn enactment passed here.

Under those circumstances, for us to emasculate this provision, to repudiate what we have already done, it seems to me is a mockery. It is more than an affront to the Loyal Legion of the United States. It is a mortal insult to every soldier concerned in the proposition made to us.

I am perfectly willing, as I said before, to erect monuments to virtue and valor and courage and suffering and hardship; and I agree with the Senator from Mississippi that it is the highest duty of any Government to perpetuate these honorable, patriotic, unselfish sentiments in marble and in bronze or in any other appropriate way. But in view of the history of this proposition, made as it was, received as it was, and accepted as it was—and I agree it ought not to be in this bill at all; it ought to have remained an independent proposition, but having been embodied in the bill now to take it and mutilate it and destroy it—to me it is incredible that the Senate of the United States can be induced to do any such thing.

Mr. SMITH of Georgia and Mr. WILLIAMS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator yield, and to whom?

Mr. CUMMINS. I yield the floor.

Mr. SMITH of Georgia. I wish to ask the Senator just one question. Then, is not the best thing for us to do to leave the bill in the House and lay on the table section 13 of this bill?

Mr. CUMMINS. As an original proposition, inasmuch as it was made the subject of an independent bill and inasmuch as it has passed the Senate, I do not think it ever should have found its way into a public buildings bill. I agree to that. But, if it is to remain in the bill, I do not want it to be treated in the way in which it will be treated if it is changed in the manner suggested by the Senator from Mississippi.

Mr. SMITH of Georgia. My suggestion to the Senator from Iowa was that the solution of the problem is to lay this section on the table—to strike it out, leave the bill in the House as it is, and go on with the balance of this bill.

Mr. CUMMINS. As far as I am concerned, I voted against the former amendment proposed by the Senator from Mississippi. I shall vote against this amendment, and I shall vote against the section itself.

Mr. WILLIAMS. Mr. President, I do not agree with the Senator from Georgia at all. I think a beautiful thing to do is to erect this building in commemoration of the heroism and the sacrifices of American women during the war between the States.

The Senator from Massachusetts said a moment ago that he hoped the time would never come when we would cease to erect monuments to those who fought for the United States. So do I. But the Senator from Massachusetts must not believe that the North during the Civil War formed the entire United States. We were as much a part of the United States as you. You were fighting on one side and we were fighting upon another. In both the ante bellum and the post bellum significance of the term we were and we now are a part of the United States.

The Senator from Iowa used some rather severe language without intending it. Evidently, from his very expression, he did not intend it. He said that amending this bill was an insult to the Loyal Legion. It neither is nor can it be an insult to any man who proposes to commemorate the sacrifices and the heroism of his wife, mother, or grandmother if I ask that a part of the money that belongs to me and is contributed by me shall be also used at the same time to commemorate the sacrifices and heroism and nobility and constancy of my mother and my grandmother.

I do not believe the commandery of the Loyal Legion will regard this as an insult. I think more highly of them than to believe it, and I do not believe the Senator from Iowa, when he comes to measure his words, will consider it an insult to them.

Mr. CUMMINS. Mr. President, I used my words with great care, and I do not retract or modify any phrase that I used. But I do think the Senator from Mississippi must have misunderstood in a degree what I said.

It would not be an insult to the Loyal Legion, composed of the officers of the Civil War and their eldest sons, I believe, to erect a monument to the women of the whole country or the women of the South. That would not be an insult to any man. But after having taken the proposition or offer of the Loyal Legion, and after having considered it, and after having adopted it in the Senate, then to repudiate it, to change it in the manner in which we have proposed to do here and in the manner in which we have already done in part, would be, in my opinion, most offensive to the men who made the proposition, simply because we have entirely changed our attitude toward it without any apparent reason. We accepted it once, for good reason, I suppose, and now we turn it back upon these men. Why do we turn it back upon them? Why do we forsake the attitude that we assumed a few days ago?

If the Senator from Mississippi can answer that, he may be able to satisfy what I believe will be the aggrieved sentiment of the Loyal Legion of the United States.

Mr. WILLIAMS. Mr. President, I do not know how it happened that the bill was not called to the attention of the Members of the Senate generally when it passed. I suppose it was presented in the usual routine way, without much study, consideration, or thought, and passed, as bills of that sort generally do. I can only speak for myself; I did not know that the bill had passed at all.

We are repudiating nothing here. So far as I am concerned, if I know myself—no man does know himself; but I try to know myself, and come as near it as most men—I have not a feeling in my heart, I have not a thought in my mind, that could wound or hurt anybody who fought or who is descended from anybody who fought in the war between the States upon the other side. Neither an appeal to a quasi patriotism nor any amount of fallacy or sophistry nor any amount of excitement can defeat the statement that all there is in it is this: I am merely insisting that if it is proposed that money contributed by all the people of all the States shall be used to commemorate the heroism, the sacrifice, the love, the devotion, and the constancy of the women who lived during the Civil War, the women of the South shall not be expressly left off the inscription upon the monument.

As far as the amendment that I am now offering is concerned it merely assumes the entire cost of the project and makes the United States Government pay it. I hope it will pass.

Mr. THOMAS. Mr. President, I voted for the amendment of the Senator from Mississippi, but not because of any intended affront to an organization of any class of people in the country. I did it because I believed the item had no place in a bill of this sort, to pay for which the Government of the United States is to contribute the money, either in whole or in part.

I agree also with the sentiments of the Senator from Missouri [Mr. STONE] and shall therefore vote against the amendment that is now the subject of consideration. I cordially concur with the Senator from Iowa [Mr. CUMMINS] in that this is a measure foreign to the purpose of this bill, and has and should have no place in it.

I am convinced from the most interesting discussion we have had up to this time, Mr. President, and from the expressions which have fallen from the lips of Senators here and from the viewpoint of the clear atmosphere and golden sunlight of a State which had its birth since the Rebellion, that the time has not yet come for the building of such a monument as is designed by the amendment of the Senator from Mississippi.

But, Mr. President, there are some other considerations which impel me to vote against this amendment and which bring me to a practical discussion of some of the features of this bill. We have been fighting over the War of the Rebellion this evening to some extent; at least we have gone a good ways back from the present time. What we are concerned in now, however, is how the money of the people, raised by taxation and paid by labor, is to be expended by their chosen servants. The Government of the United States is the richest Government in the world. However, its wealth comes to it through the exercise of its power of taxation, and every dollar in its Treasury is paid to it by the people of the country. We exercise our right of taxation for the purpose of raising revenue to meet the public expenditures, and as these expenditures are provident and economical, so will taxation be minimized and reduced.

I want, therefore, in connection with this question and with the bill itself to say something in behalf of the men and women who pay this money into the Treasury and who are quite as much, if not more, concerned about the manner in which it is to be expended as we are.

Now, this bill is called a public grounds and buildings bill. It is one of the great appropriation bills of Congress and is designed to cover the fiscal period beginning with next July. It had its origin, of course, in the House, and was there passed and sent to this body for consideration. As it came here it made provision for the expenditure of $25,643,800. As it is reported out of committee in this body, the amount has been swelled by the enormous sum of $19,930,000, making a total of $45,573,800. This added sum includes appropriations for the benefit of the District of Columbia, one of which is involved in the pending amendment.

Our committee has added to it in this body, Mr. President, $20,000,000. The bill, if it is to be passed in its present form, appropriates almost $50,000,000, an enormous amount in the aggregate, and composed of items of which the subject of the amendment is one, and by no means the only one, which has no place properly in the measure and should never have been reported by the committee.

We have heard several earnest discussions about the sort of buildings that we ought to erect in the Capital of the United States, some favoring business structures, some monumental structures, and about which sentiment is divided. But this bill is both businesslike in its detail and monumental in its design. It is businesslike in that it comprises an aggregate of items distributed over the entire continent, and representing individual interests of Members desiring to secure appropriations which are necessary to or at least desired by their respective constituencies, and said to be demanded by the volume of the business transacted for the public in the places where the appropriations are to be expended in public buildings.

But in addition thereto, as the Senator from New York has so forcibly declared, items independent of these, 92 in number, are attached to the bill, representing communities and revenues to the Government from those communities, insignificant both in amount and population when contrasted with the large appropriations that are to be made for public buildings to be erected for them.

It is not surprising that with these large amendments providing expenditures for the District we should provoke discussions of this kind, because it is very evident that they could not pass upon their own merits, for which obvious reason they are ingrafted upon the bill to be enacted into law through the aid of combined and kindred items desired by other localities.

Now, this condition of affairs is the outgrowth of similar legislation running over a large period of time. It perhaps had its origin in the combination of a few items, the successes consequent upon the merging together of which have naturally been contagious and the example has grown from a precedent into a custom until to-day we are confronted by this measure, the largest bill of the sort, I think, that was ever submitted to the consideration of the Senate of the United States.

Mr. President, mention has been made of a measure carrying $5,000,000, if I recollect the figures aright, designed for the completion or the building of a bridge connecting the District of Columbia with Arlington Heights. This is a measure which the Senate committee has attached to the bill in connection with that which I am discussing. It has no place here. It belongs properly to the District of Columbia appropriation bill, and to that bill only. Yet it is made a part of this measure because, forsooth, by attaching it to the bill the interests which are represented here in connection with other items of the bill will be sufficiently strong to produce unity of action, meaning success to all of them. Appropriations are thus obtained which, standing upon their own merits, probably would not be enacted.

I made the statement the other day, and if it is incorrect I hope those who are better informed will not hesitate to interrupt me, that the total appropriations already passed by this body, together with those which we still have to consider, amount in the aggregate to eleven hundred and fifty millions of dollars; in other words, one billion one hundred and fifty millions, the largest appropriations ever made by any Congress for a fiscal year.

There are those in this Chamber, perhaps all of them, who are better informed about our sources of revenue, the amounts to be collected from these different sources, and the consequent estimates of the national income. I have not yet heard any discussion, Mr. President, on any of these measures, of the amount of money that the Government can absolutely depend upon to meet and discharge and defray these enormous expenditures. I am therefore without information upon this all-important subject. Surely our lack of accurate information upon this all-important subject should bid us pause; should require the making of reductions in this and all other revenue measures, except where the amount of the appropriation as reported is practically essential to good administration, to the end that a deficiency may not confront the next administration in the first year of its existence.

A Senator said upon this floor two or three years ago that if the Government were conducted in a businesslike manner $300,000,000 a year could easily be saved; in other words, by the application of the ordinary principles of economy as practiced by business men to the national affairs that enormous sum could be annually saved to the people.

In the face of an expenditure like that contemplated by this and other bills, while this sum in itself is insignificant, we must remember, Mr. President, that it is the aggregate of insignificant or comparatively small amounts which constitute the enormous total which these various bills represent. It is perfectly easy to add an item here and an item there, small in their amounts, and to do it without very much concern; but when we consider that the revenues of some of the largest dividend-paying corporations in the country are derived from the people in nickels and dimes which are paid to them for public service, we can form a fair conception of the cumulative character of small sums to combine in an aggregate when received continuously through long periods of time. The national revenues, as I have said, come from the people. They come through taxation, and it is the taxpayers who are the real parties concerned in the appropriations which we make for the monuments which we build, the structures which we rear, and the bridges that we provide for.

I believe in liberal expenditures, Mr. President, and particularly when we have a plethoric Treasury, but we are going too fast and too far in measures of this sort, covering as they do such colossal sums of money.

There is one virtue about this bill, if virtue it may be termed. Like the rains from heaven, its bounty falls upon the just and upon the unjust. Every section of the United States participates more or less in moneys carried by the items in the bill. I am not arrogating to myself any superior virtue or integrity or conscientiousness about this matter, for my State is also a recipient of some of the amounts of money which are covered by the bill. It has that virtue, without which many of the items would find no place here.

When the Senator from Mississippi said that it is not the wealth and the area of a nation but its traditions that are the important things——

Mr. KENYON. Mr. President——

Mr. THOMAS. I want to say that he stated one side of a great truth; no nation can have traditions unless it also has area and possesses wealth.

Mr. KENYON. I was going to ask if the Senator thought it was a virtue that the blessings of this bill fall on all the country?

Mr. THOMAS. Well, it is not an unmixed evil. I am willing to say that. Perhaps I used too strong an expression in calling this feature of the bill a virtue. But it is a characteristic of the bill, without which many of these appropriations could not be enacted into law.

Mr. KENYON. Is not that the very viciousness of a bill of this character?

Mr. THOMAS. It is the reason why bills of this kind are presented and why they are passed practically without amendment.

I regret to say that, as far as my experience goes, there seems to be no healthy public sentiment throughout the country which condemns this practice, largely due to the fact, in all probability, that the desire to obtain the benefits in localities consequent upon these appropriations and their expenditure outweighs all other considerations, just as was said to be the case at one time with the tariff, a local issue based upon local considerations, and every Representative and every Senator spurred to a common end by the appeals, the demands, the requests, and the threats of his constituency founded upon what they deemed to be their peculiar and pressing interest.

Mr. President, I think I have said practically all that I care to say upon this subject. We can build monuments—and we ought to build them—to commemorate great deeds, great events, and great men. I want to see this Capital City the most beautiful city in the world. I fully agree that we should make it an ornament and a feature not only in our national policy but an outward expression of our national life for all time. Parallels have been drawn to-night between the architecture of this city and the monumental characteristics of Grecian and Roman structures. We might carry the parallel a little further and remind Senators that we are imitating those Republics not only in their architectural creations but in the prodigality of their expenditures. The extravagance of those early Republics became so great and so reckless in the end that to-day nothing remains of them except their literature, their traditions, and the ruins of their monumental structures.

I trust the time will never come when the same epitaph will be written to the memory of the American Republic; but, I believe, Mr. President, that the time has come, and that it came long ago, when economy must be the watchword of this Nation. The party to which I belong and which soon comes into control of national affairs has in its platforms ever since 1832 pledged itself to the economical administration of public affairs. If when it goes into power next week it will be confronted by appropriations amounting to more than $1,150,000,000 covering its first fiscal year, imposed upon it by the votes of Democrats and Republicans alike, both of whom are consequently responsible and must be held to be so, then we can not practice what we have preached or perform our great traditional pledge to the public which had very much to do with the result last November.

I do not want to see the new administration or any administration in this country the first or any of the years that mark its course in power to be confronted with a deficiency, for the administration in power, whether it be to blame therefor or not, must always bear the consequences of depressed conditions. It may simply have inherited them from the administration which preceded; they may have resulted from causes over which Governments have no control whatsoever; but the inexorable logic of public opinion always points its finger to the administration in power and holds it responsible for the economic and commercial ills of the time.

I think, therefore, that Senators on this side of the Chamber should pause before voting to place these enormous appropriations upon the statute book, lest perhaps we be overwhelmed in financial embarrassment upon the very threshold of the new administration.

Mr. SMITH of Georgia. Mr. President, I believe the Senate is ready to dispose of this section 13, together with the amendment, and I move to lay both the section and the amendment on the table.

The PRESIDENT pro tempore. The Senator from Georgia moves to lay the amendment on the table.

Mr. SMITH of Georgia. The proposed section.

The PRESIDENT pro tempore. That is the amendment. The question is on agreeing to the motion.

Mr. BRADLEY. Mr. President——

The PRESIDENT pro tempore. The motion is not debatable [Putting the question.] The ayes have it. The motion is agreed to and the amendment is laid on the table.

Mr. OWEN. Mr. President——

The PRESIDENT pro tempore. The Secretary will proceed with the reading of the bill. There are further committee amendments.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 56, in line 6, after the words "sum of," to strike out "$118,750" and insert "$300,000," and in line 10, after the word "exceeding," to strike out "$418,750" and insert "$600,000," so as to make the section read:

SEC. 14. That so much of section 24 of the act of Congress approved May 30, 1908, as provides for the construction of buildings for a customhouse and other governmental offices, except United States courts and post office, and for a building for the United States appraisers' stores at Wilmington, N. C., be, and the same is hereby, amended so as to require that upon the enlarged site of the present customhouse and warehouse in said city the Secretary of the Treasury shall cause to be constructed a suitable and commodious fireproof building for the accommodation of the customs service, the appraisers' stores, the United States courts and court officials, and such other governmental offices, exclusive of the post office, as can be properly and conveniently quartered in said building; and that the limit of cost fixed by said act of May 30, 1908, is hereby extended by the sum of $300,000, and said act is hereby amended so as to fix the limit of cost for said new customhouse, appraisers' stores, and courthouse and enlargement of site thereof at not exceeding $600,000; and that the unexpended balances of the appropriations heretofore made pursuant to said section 24 of the public building act of May 30, 1908, are hereby made available for the construction of the said building for customhouse, appraisers' stores, and courthouse hereinbefore prescribed; and the Secretary of the Treasury is authorized and directed to enter into contracts for the construction of such building for customhouse, appraisers' stores, and courthouse at Wilmington, N. C., within the limit of cost hereinbefore fixed.

The amendment was agreed to.

The Secretary continued the reading of the bill, and read section 17 as follows:

SEC. 17. That for the purpose of beginning the construction under the direction of a commission consisting of the Secretary of War, the Secretary of the Navy, and Superintendent of the United States Capitol Building and Grounds, and Ivory G. Kimball, representing the Grand Army of the Republic, of a memorial amphitheater, including a chapel, at the national cemetery at Arlington, Va., and in accordance with the plans of Carrere & Hastings, architects, of New York City, adopted by the commission heretofore appointed, there is hereby authorized the sum of $250,000: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said building at the sum herein named, but the building herein provided for shall be constructed so as to cost, complete, including heating and ventilating apparatus, and approaches, $750,000.

Mr. POINDEXTER. I move to amend that section by inserting, on page 57, line 23, after the name "Kimball," the words "and Charles W. Newton, representing the United Spanish War Veterans."

Mr. SUTHERLAND. So far as I am able to do so, Mr. President, I will accept that amendment.

The PRESIDENT pro tempore. The Chair would suggest that the word "and," should be stricken out before the name "Ivory G. Kimball."

Mr. POINDEXTER. I accept that amendment.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Washington will be stated as modified.

The SECRETARY. On page 57, line 23, before the name "Ivory G. Kimball," it is proposed to strike out the word "and," and after the name "Ivory G. Kimball," it is proposed to insert "and Charles W. Newton, representing the United Spanish War Veterans."

Mr. CLARK of Wyoming. Mr. President, I inquire should not the amendment come in after the word "Republic," in line 24?

The PRESIDENT pro tempore. It should.

Mr. POINDEXTER. That is correct. I accept the suggestion of the Senator from Wyoming.

The PRESIDENT pro tempore. The amendment as now modified will be stated.

The SECRETARY. On page 57, line 24, after the word "Republic," it is proposed to insert the words "and Charles W. Newton, representing the United Spanish War Veterans."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 58, line 13, after the words "*Provided further*," to strike out "That the said commission may, in its discretion, expend, of the sum hereby authorized, not more than $75,000 for the purpose of constructing a mortuary chapel, in accordance with the plans of Carrere & Hastings referred to in this act, or to locate the same elsewhere in and upon the Arlington estate, in pursuance of any other plan which may be approved by the commission for that purpose," and insert:

That the said commission may, in its discretion, locate said chapel elsewhere upon the Arlington estate, and in that event may expend of the sum hereby authorized not more than $75,000 for the purpose of constructing said chapel.

That said commission is hereby authorized and directed to enter into a contract with Carrere & Hastings, architects, for their full professional services in connection with the construction of the memorial amphitheater, herein authorized, at the usual and customary professional charges for such services.

Mr. STONE. Mr. President, just a word about this entire provision embodied in section 17. I am not expressing any dissent particularly to the amendment reported by the Senate committee, but rather with the entire proposition to appropriate $750,000 to erect this memorial amphitheater at Arlington. Arlington is a national cemetery. We have numerous national cemeteries in the United States, and it may be it would be advisable, one at a time, to put amphitheaters in all of them. To erect such structures is in the nature of an appeal to the patriotism of the people and of the country. The Senator from Colorado [Mr. THOMAS] in his address a few moments ago emphasized the striking fact that already we have in this bill now pending a proposition to appropriate some $45,000,000. I think we might well delay a work of this kind for a while. Seven hundred and fifty thousand dollars expended for the erection of a memorial amphitheater in one of our cemeteries means, as sure as fate, that we are to go on erecting like structures in all the multitude of national cemeteries scattered throughout the country, the great burying grounds where the patriotic dead are interred. If it is the purpose of Congress to enter upon that field of enterprise, which will result in an ultimate expenditure of probably twenty-five or thirty million dollars, why, then, if we do it deliberately, purposely, understandingly, all right. This is but the entering wedge, and I am inclined rather to appeal to Senators to halt, to consider whether we can not abridge the vast expenditures embodied in this bill and reflect most carefully whether we care to start in upon this road, leading, ultimately, to enormous public expenditures.

Mr. President, this memorial structure is proposed to be erected at Arlington, a cemetery adjacent to Washington, on an estate historic in more ways than one, and I am loath to interpose an objection when I am persuaded that it has the support of friends of mine in the Senate and in the House of Representatives, but I can not but question the wisdom of this appropriation. I shall vote against it.

The PRESIDENT pro tempore. Without objection, the amendment will be agreed to.

Mr. STONE. Mr. President, I was addressing myself to a section which was pending before the Senate, as I understood.

The PRESIDENT pro tempore. The Chair had reason to suppose that the Senator had concluded.

Mr. STONE. I had concluded; but I thought at least we might have a vote upon it.

The PRESIDENT pro tempore. The Chair will put it to a vote if the Senator from Missouri so desires. The question is on agreeing to the amendment.

Mr. O'GORMAN. Will the Chair have the amendment stated?

The PRESIDENT pro tempore. The Secretary will state the amendment.

The SECRETARY. On page 58, line 13, after the words "*Provided further*," it is proposed to strike out down to and including the word "purpose," in line 20, and to insert:

That the said commission may, in its discretion, locate said chapel elsewhere upon the Arlington estate, and in that event may expend of the sum hereby authorized not more than $75,000 for the purpose of constructing said chapel.

That said commission is hereby authorized and directed to enter into a contract with Carrere and Hastings, architects, for their full professional services in connection with the construction of the memorial amphitheater, herein authorized, at the usual and customary professional charges for such services.

Mr. SMITH of Georgia. Mr. President, I desire to make a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. SMITH of Georgia. Does the mere fact that an amendment is pending to a portion of this paragraph open the entire paragraph to amendment now? The amendment that I would suggest, if that were true, would be to change the sum and to limit the total expenditure to $100,000.

The PRESIDENT pro tempore. The Chair thinks it would not open up the entire paragraph. The question is upon the amendment which has just been read. [Putting the question.]

Mr. STONE. Is a motion to strike out the paragraph in order at this time? I am inclined to think not; but I would like to strike out the entire paragraph.

Mr. SWANSON. I should like to explain to the Senate that this provision is simply an amendment to enable a chapel to be constructed at Arlington. If the amendment is adopted, the en-

tire provision can be afterwards struck out. There is, however, no chapel at Arlington. They can not bury people there. The committee simply propose to insert an amendment which will provide for a chapel at Arlington. When soldiers come here from a distance, there is no church, no chapel, there. That is all the amendment provides for.

Mr. SMITH of Georgia. All I want is to let the chapel provision stand and to get rid of the remainder of the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 59, line 13, to change the number of the section from "14" to "19," and, in line 16, before the words "Las Vegas," to insert "East"; in line 24, before the word "herein," to strike out "post office" and insert "building"; and, on page 60, line 2, before the words "Las Vegas," to insert "East," so as to make the section read:

SEC. 19. That the Secretary of the Treasury be, and he is hereby, directed to purchase a site, or acquire it by condemnation or otherwise, on land at a convenient point between the incorporated city of East Las Vegas, N. Mex., and the incorporated town of Las Vegas, N. Mex., and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use and accommodation of the post office, courthouse, and other governmental offices, the cost of said site and building, including said vaults, heating and ventilating apparatus, and approaches, not to exceed the sum of $125,000, and the building herein provided for shall be used as a post office and courthouse and for other governmental purposes for both the incorporated city of East Las Vegas and the incorporated town of Las Vegas, notwithstanding the general law requiring the maintenance of a post office in each county seat, and the authorization of $15,000 made for the purchase of a site in the town of Las Vegas is hereby repealed.

The amendment was agreed to.

The next amendment was, on page 60, line 7, to change the number of the section from "15" to "20," and, in line 18, after the word "services," to insert "without regard to civil-service laws, rules, or regulations," so as to make the section read:

SEC. 20. That a commission, consisting of the Secretary of the Interior, the Commissioner of Patents, and the Supervising Architect of the Treasury Department, be, and is hereby, created, which shall cause plans and estimates to be prepared for a building to accommodate the Patent Office of the United States, and report the estimated cost thereof to the Congress, provided that such plans and estimates be prepared under the direction of the Secretary of the Treasury. And for the preparation of such plans and estimates a sum not to exceed $5,000 is hereby authorized to be expended for employment of technical and engineering services without regard to civil-service laws, rules, or regulations in the Office of the Supervising Architect. That the foregoing authorization for the employment of technical and engineering services shall be in addition to and independent of the authorization and appropriations for personal services for the Office of the Supervising Architect otherwise made.

Mr. WILLIAMS. Mr. President, I should like to ask a question of the Senator in charge of the bill. Why is the language "without regard to civil-service laws, rules, or regulations" inserted in line 18?

Mr. SUTHERLAND. Mr. President, it is because this is a particularly large piece of work, and it is necessary to call in other architects. The employees in the Office of the Supervising Architect, who are under the civil-services rules, are not sufficiently expert to do the work, and they have to call in outside architects. It is the usual provision in such cases. It simply happened to be omitted in this particular case from this bill. The Senator will find the same language in other House provisions.

Mr. WILLIAMS. Mr. President, this section organizes a commission—

consisting of the Secretary of the Interior, the Commissioner of Patents, and the Supervising Architect of the Treasury Department, be, and is hereby, created, which shall cause plans and estimates to be prepared for a building to accommodate the Patent Office of the United States, and report the estimated cost thereof to the Congress, provided that such plans and estimates be prepared under the direction of the Secretary of the Treasury. And for the preparation of such plans and estimates a sum not to exceed $5,000 is hereby authorized to be expended for employment of technical and engineering services.

Then it provides that it shall be done "without regard to civil-service laws, rules, or regulations in the Office of the Supervising Architect." It seems to me that that is a confession that the civil-service system has broken down in the Office of the Supervising Architect. If this great bureau of the Supervising Architect of the Treasury has not within it people who are competent to plan a Patent Office for the United States Government, then it seems to me that we had better employ outside architects for everything. It seems to be a confession of failure upon the part of the Supervising Architect's Office, or, if not a confession upon their part, a confession upon the part of the Senate committee.

Mr. SUTHERLAND. Mr. President, such a provision has been found necessary in the erection of every large building. I will undertake to say that there has not been an important building erected in the city of Washington where it has not been found necessary to call in outside architects. The force in the office of the Supervising Architect is not sufficient to do all of the work that is necessary. The Supervising Architect himself would be capable, but he is simply overwhelmed with other work, and whenever we undertake any of these large enterprises it has always been found necessary to call in outside architects. Of course, these outside architects are not in the civil service. The Senator from Texas [Mr. SHEPPARD], whom I see in his seat, has been chairman of the House Committee on Public Buildings and Grounds for many years, and I think he will bear out what I am saying about the matter.

Mr. WILLIAMS. Mr. President, I was perfectly aware of the facts that have just been stated by the Senator from Utah, and that is the reason I asked the question. It seems that, whenever we have any really important architectural work to do, we must go outside of the office of the Supervising Architect. I find it very hard to believe that it is because of a lack of force sufficient to do the work. It seems to me rather that it is because of a lack of genius sufficient to do the work.

Mr. SHEPPARD. Mr. President, to get the best results the Supervising Architect frequently submits the plans to competition among architects from all over the country. If he has to apply civil-service rules before those architects can enter the competition, it would be useless to endeavor to go about it in that way. The reason why it is desired to exempt architects from the civil-service rules, is in order to have competition among the leading architects, both in this country and in other countries.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Buildings and Grounds was, on page 61, line 17, after "$800,000," to insert: "and payment therefor to be made out of the proceeds of the sale of the old site and building hereinafter provided for," so as to read:

SEC. 22. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a suitable building and approaches, for the use and accommodation of the United States post office and other governmental offices in the city of Newark, in the State of New Jersey, the cost of said site not to exceed the sum of $800,000 and payment therefor to be made out of the proceeds of the sale of the old site and building hereinafter provided for.

The amendment was agreed to.

The next amendment was, on page 62, after line 18, to insert as a new section the following:

SEC. 23. That the Secretary of the Treasury be, and he is hereby, authorized and directed to select and acquire by purchase or otherwise a suitable site for a public building in Des Moines, Iowa, for the use of the courts of the United States and such other governmental purposes, except post-office purposes, as may be necessary or convenient, the site to cost not more than $100,000; and he is further authorized and directed to cause to be erected upon said site a suitable building for the aforesaid purposes, the building to cost not more than $250,000. To acquire the site and erect the building there is hereby authorized the sum of $350,000.

When said site has been acquired and the building erected thereon the Secretary of the Treasury shall sell the lots and building thereon now owned by the United States situated at the northeast corner of West Court Avenue and West Fifth Street in the city of Des Moines, Iowa.

The said sale shall be made after notice published in at least three daily Des Moines newspapers once each day for not less than three weeks, upon bids received in pursuance of such notice and upon the terms deemed most advantageous to the United States.

Only that part of the money heretofore appropriated for the repair and modification of said building now in use as may be necessary to render the building fit for use by the district court and by other officers of the Government now using it, shall be expended, and the remainder shall be covered into the Treasury.

The amendment was agreed to.

The next amendment was, on page 63, after line 21, to strike out:

SEC. 18. That the Secretary of the Treasury be, and he is hereby, authorized and directed to prepare designs and estimates for a fireproof national archives building containing not less than 1,500,000 cubic feet of space, suitable for the orderly storage of records, documents, and other papers which have accumulated in the various executive departments and independent establishments, and in the files of the Senate and House of Representatives and offices of the White House, and are not needed for current use.

That the said designs and estimates shall be prepared with a view to the erection of the said building in the city of Washington, D. C., upon a lot of land large enough to contain ultimately a building embracing 4,000,000 cubic feet of space.

That the said designs and estimates shall make provision for a building capable of subsequent extension without impairing its architectural appearance from a capacity of 1,500,000 cubic feet to a capacity of 4,000,000 cubic feet.

That upon the completion of the said designs and estimates the Secretary of the Treasury shall report to the Senate and House of Representatives the minimum cost of such a building and the minimum cost of a suitable site thereof conveniently located in the District of Columbia.

And in lieu thereof to insert:

SEC. 24. That the Secretary of the Treasury be, and he is hereby, authorized and directed to prepare designs and estimates for a fireproof national archives building of modern library-stack type of architecture, containing not less than 3,000,000 cubic feet of space, suitable for the orderly storage of records, documents, and other papers which have accumulated in the various departments, independent establishments, and executive offices and in the files of the Senate and House of Representatives and are not needed for current use.

That the said designs and estimates shall be prepared with a view to the erection of the said building in the city of Washington, D. C., upon a lot of land large enough to contain ultimately a building embracing 8,900,000 cubic feet of space.

That the said designs and estimates shall make provision for a building capable of subsequent extension, without impairing its architectural appearance, from a capacity of 3,000,000 cubic feet to a capacity of 8,900,000 cubic feet.

That before the said designs and estimates are completed inspection shall be made under the direction of the Secretary of the Treasury of the best modern national archive buildings in Europe, and consultation shall be had with the best authorities in Europe on the construction and arrangement of archive buildings.

That the said designs and estimates shall provide for the construction of a building the total cost of which, including heating and ventilating apparatus, elevators, and approaches, complete, shall not exceed the sum of $1,500,000.

That whenever the said designs and estimates have been approved by a commission consisting of the President of the Senate, the Speaker of the House of Representatives, the Secretary of the Treasury, the Secretary of War, and the Secretary of the Interior, then the Secretary of the Treasury shall be, and he is hereby, authorized and directed, in his discretion, to purchase, or cause to be taken for public use, by condemnation or otherwise, as a site for said building, any piece of land of the size defined in this section the purchase of which shall be approved by the said commission.

That for the preparation of said designs and estimates the sum of $5,000, or so much thereof as may be necessary, is hereby authorized to be expended for employment of technical and engineering services in the office of the Supervising Architect.

Mr. WILLIAMS. I think that, as a rule, is very wise, provided it is so arranged that the architectural design will not be interfered with by the addition. I am very much in favor of a building in which to keep the archives of the Government, which shall be, I hope, the only really fireproof building in the world; and it will cost a good deal of money to make it really fireproof.

Mr. SUTHERLAND. The Senator will see on page 65, beginning in line 6, the language:

That the said designs and estimates shall be prepared with a view to the erection of the said building in the city of Washington, D. C., upon a lot of land large enough to contain ultimately a building embracing 8,900,000 cubic feet of space.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator in charge of the bill if the committee carefully considered whether the sum of $1,500,000 would be sufficient for this very important and very permanent purpose? There is contained in the bill an appropriation of a million and three-quarter dollars for an armory in the District of Columbia, and here comes along a proposition to construct a building which is to be thoroughly fireproof and which is to last the Republic 50 or 100 years, and we are appropriating a quarter of a million dollars less money for its erection than was thought necessary to build an armory.

Mr. SUTHERLAND. This is only the first part of the building. This does not authorize the expenditure of a million and five hundred thousand dollars. It simply provides for the making of plans, and authorizes an expenditure of $5,000 for that purpose. The plans are to be for a building to cost $1,500,000 now; but that is only the first part of the building. We may be able to add to it hereafter. That is in the future.

Mr. WILLIAMS. I do not know what portion of the building is to be erected out of the $1,500,000.

Mr. WARREN. Three million cubic feet out of the more than 8,900,000 cubic feet.

Mr. WILLIAMS. According to the language pointed out by the Senator from Utah, it is to be 3,000,000 cubic feet out of a total of 8,900,000 cubic feet.

Mr. SUTHERLAND. Yes.

Mr. WILLIAMS. But I should be very much surprised, indeed, if an archives building worthy of the country, fireproof and containing sufficient room for the purposes of the Republic, could be erected for less than $5,000,000.

Mr. SUTHERLAND. I will say to the Senator that this is a matter the committee very carefully investigated. We had experts before us, men who were well informed with reference to the character of buildings of this kind and the cost in this and in other countries, and the committee made the provision after very careful consideration.

Mr. SMITH of Georgia. I thank the committee for having held down the appropriation. I am sure it is enough.

The amendment was agreed to.

The next amendment was, on page 66, after line 15, to insert as a new section the following:

SEC. 25. That for the purpose of preventing the pollution and obstruction of Rock Creek and of connecting Potomac Park with the Zoological Park and Rock Creek Park, and providing a new location for the United States Botanic Garden, a commission, to be composed of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, is hereby authorized and directed to acquire, by purchase, condemnation, or otherwise, such land and premises as are not now the property of the United States in the District of Columbia shown on the map on file in the office of the engineer commissioner of the District of Columbia, dated May 17, 1911, and lying on both sides of Rock Creek, including such portion of the creek bed as may be in private ownership, between the Zoological Park and Potomac Park, at a total cost not to exceed $2,300,000, which sum is hereby authorized to be expended. That all lands now belonging to the United States or to the District of Columbia lying within the exterior boundaries of the land to be acquired by this act as shown and designated on said map are hereby appropriated to and made a part of the parkway and new Botanic Garden site herein authorized to be acquired. That the commission shall set apart such portion as they may deem adequate of the land herein authorized to be acquired or included within said exterior boundaries for a new location for the United States Botanic Garden, and one-half of the cost of the remaining portion shall be reimbursed to the Treasury of the United States out of the revenues of the District of Columbia in eight equal annual installments, with interest at the rate of 3 per cent per annum upon the deferred payments. That should the commission decide to institute condemnation proceedings in order to secure any or all of the land herein authorized to be acquired, such proceedings shall be in accordance with the provisions of the act of Congress approved August 30, 1890, providing a site for the enlargement of the Government Printing Office. (U. S. Stat. L., vol. 26, chap. 837.)

Mr. O'GORMAN. Mr. President, I make the point of order that this section——

Mr. LODGE. No point of order lies, Mr. President.

The PRESIDENT pro tempore. The Chair understands that.

Mr. O'GORMAN. I withdraw it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. WILLIAMS. I wish to ask a question about the amendment. This is a commission to be composed of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture. Does that mean the three present Secretaries or the incoming Secretaries?

Mr. SUTHERLAND. Undoubtedly it would mean the incoming Secretaries.

Mr. WILLIAMS. I wanted to know, because if the present Secretaries are to form the commission and then go out of office there might be a claim at some time in the future for services rendered.

Mr. SUTHERLAND. No; it belongs to the office; it does not belong to the person. The office would succeed rather than the person in the office.

Mr. WILLIAMS. Very well; but sometimes, you know, when people take a position on a commission and they are described by their official titles, it might be that they would hold over.

Mr. WARREN. That is only when they are named.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 68, after line 3, to insert as a new section the following:

SEC. 26. That the Secretary of War is hereby authorized and directed to cause to be constructed across the Potomac River, from the city of Washington to the Arlington Estate property in the State of Virginia, a memorial bridge, to be located, as nearly as the commission hereinafter constituted may determine to be best, on a line beginning at the intersection of Twenty-third Street with a line drawn from the center of the Capitol through the center of the Washington Monument, and running from this intersection at Twenty-third Street to the center of the Arlington Mansion; the said bridge to be constructed on a location and plan to be approved by a commission composed of the President, the Secretary of War, the Speaker of the House of Representatives, the chairman of the Committee on the Library of the Senate, and the chairman of the Committee on the Library of the House of Representatives, and not to cost more than $5,000,000. And the commission is authorized to expend so much as may be necessary for the purpose in securing and determining on a proper location and plan.

That in the discharge of its duties hereunder said commission is authorized to employ the services of such engineers, sculptors, architects, and others as it shall determine to be necessary, and to avail itself of the services or advice of the Commission of Fine Arts created by the act approved May 17, 1910.

That said commission shall annually submit to Congress an estimate of the amount of money necessary to be expended each year to carry on the work herein authorized.

Mr. O'GORMAN. Mr. President, I do not think that the condition of the Public Treasury and the urgent and legitimate demands now upon it warrant this expense at this time.

Mr. MARTIN of Virginia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Virginia?

Mr. O'GORMAN. Certainly.

Mr. MARTIN of Virginia. There is no money appropriated by the amendment. It is simply an authorization. If the bridge is completed and the money expended in the next five years, it will be much more rapidly done than I contemplate will be the case.

Mr. O'GORMAN. Will not this authorization, if it be passed, be followed by a provision in an appropriation bill for the money contemplated by this expenditure?

Mr. MARTIN of Virginia. There will be possibly a small sum, but most likely none at the present session of Congress. There might be a small appropriation in the deficiency bill, but it would properly belong in the sundry civil bill, and that bill has been reported to the Senate. In any event, not more than $100,000 will be asked for, and hereafter such sums as the commission may each year report to Congress as being required. No one contemplates a material appropriation at this session, and it will be certainly five years, and probably much more than five years, before the amount is expended.

Mr. O'GORMAN. I have already given expression to some views that I have regarding the wasteful tendency in our public expenditures. It is estimated that the total amount of all the

appropriations, embracing those which have been passed and those which will be passed in a day or two, will approximate a sum in excess of $1,200,000,000. The revenue that may be reasonably anticipated will be insufficient to meet that amount. These total expenditures will surpass the total expenditures made by any Congress in all the history of the Government.

It is true we are making remarkable strides in this country. Each year we are adding a million and a half people to our population. The last 12 years of our history have contributed approximately 20 per cent of all the population of the United States at this time.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Utah?

Mr. O'GORMAN. Certainly.

Mr. SUTHERLAND. Do I understand the Senator to say that the bill carries a larger amount than has ever been carried by any bill?

Mr. O'GORMAN. I say that all the appropriation bills, of which this is one, altogether——

Mr. SUTHERLAND. Oh!

Mr. O'GORMAN. I apprehend that no Member of this body will dispute the accuracy of my statement.

Mr. SUTHERLAND. I misunderstood the Senator. I thought he was referring to this bill.

Mr. O'GORMAN. That is what I stated. A few days ago I called attention to some extravagant and, as I think, wasteful provisions of the river and harbor bill, which justified my vote in opposition to the bill at that time. The same tendency is manifested not only in this bill, but in all the bills before us.

Mr. SUTHERLAND. If the Senator from New York will permit me, I will suggest to him that this bill carries approximately now $45,000,000.

Mr. WARREN. Authorizations.

Mr. SUTHERLAND. Authorizations. Of course none of it is appropriated. That represents the accumulation of three years. It is only $15,000,000 a year. It is not an extravagant bill. It is no larger——

Mr. O'GORMAN. I have no doubt there are a good many excellent features in this bill, but, as I said earlier to-day, in my judgment there are certain provisions which are absolutely indefensible. There are certain towns in this country with a population scarcely in excess of 1,000 that have provisions made in this bill for the procuring of sites at a nominal expenditure of from $5,000 to $10,000, which if passed will be followed in the near future by provisions for structures amounting to $50,000, $60,000, and $70,000.

Mr. SUTHERLAND. There never has been a public building bill passed in Congress, I will undertake to say, that has not carried some items that everybody was not quite in favor of. The Senator will recognize the practical impossibility almost of avoiding some items of that character. But I undertake to say to the Senate that those items are very few in number.

Mr. O'GORMAN. Mr. President, I have great sympathy with the chairman of the committee. I want to pay him the tribute which I do in declaring that no member perhaps has ever labored more industriously and conscientiously in the handling of a difficult proposition than has the Senator from Utah. But notwithstanding all the services and the devotion and the attention he gave to this bill, aided as he was by the members of his committee, it is one of the most obnoxious bills that I think could be presented to the Senate.

I shall vote against the bill, whatever change may take place, on its final passage. I am now calling attention to what I conceive to be one of its objectionable features. It may be that at some time this country can afford to expend $5,000,000 for bridging the Potomac River, but we can not do it now. One side of this chamber but recently came into power under a pledge to the people of this country that it would favor as far as possible the most rigid economy in public expenditures. It can not support the provisions of this bill without stultifying itself. It can not justify its conduct in securing the approval of the people of this country and then giving its support to a series of appropriation bills representing a larger figure than was ever before represented in a single session by similar legislation.

Mr. MARTIN of Virginia. Mr. President, I just want to say again to the Senator from New York that there is not one single dollar appropriated by this bill.

Mr. O'GORMAN. I understand the view of the Senator from Virginia. There is no single dollar appropriated by any provision in the bill at the present time. This bill does nothing more than authorize expenditures which in time must be followed by appropriations in another appropriation bill.

At this time, Mr. President, I move that the amendment of the committee be laid upon the table.

Mr. SWANSON. Before the Senator makes that motion——

The PRESIDENT pro tempore. Does the Senator from New York withhold the motion?

Mr. SWANSON. I ask the Senator to withhold the motion for a few moments.

Mr. O'GORMAN. Very well.

The PRESIDENT pro tempore. The Senator from New York withholds the motion.

Mr. SWANSON. Mr. President, I want for a short time to present to the Senate the question of a memorial bridge. Ever since 1887 the Secretary of War and also President McKinley have urged Congress to connect its own property on the Potomac, known as the Potomac Flats, with its Arlington property across the Potomac.

Mr. O'GORMAN. May I ask the Senator when the recommendation was first made?

Mr. SWANSON. In 1887 or 1888.

Mr. O'GORMAN. Why has it never been acted on?

Mr. SWANSON. I will tell the Senator why, if the Senator from New York will content himself for a moment. If I had thought he would make a motion to lay the amendment on the table I would have asked to be recognized, but he made a speech against it and then submitted his motion.

The PRESIDENT pro tempore. The motion is withheld.

Mr. SWANSON. The Government owns the Potomac Flats. It owns 1,200 acres of land known as Arlington. Ever since 1887 the Secretaries of War, following President McKinley, have urged Congress to connect its own property by a bridge across the Potomac. Of all the cities in the world at the Capital of the Nation the Potomac is less bridged than any capital in the world. There is scarcely a bridge across the Potomac where the people can cross from the south that has not on it either a railroad bridge or a street-car bridge that makes it impossible for the ordinary traffic.

There has been an impression that this proposition is entirely in the interest of Virginia. I wish to say that the people of Virginia are not interested in it to the extent that Washington is. The city of Washington has no adequate and proper crossing of the Potomac. In the little city in which I formerly lived, of 19,000 people, there are three bridges that bridge the river that brings the people there. There are two bridges that allow the people to come here and also a bridge permitting street cars to run over. Yet here stands the Capital of this Nation, where practically traffic and travel across the Potomac are excluded.

Now, Mr. President, I want to go further and consider this as a business proposition.

Mr. SMITH of Georgia. I wish to ask the Senator a question there.

The PRESIDENT pro tempore. Does the Senator from Virginia yield to the Senator from Georgia?

Mr. SWANSON. I will be very glad to yield.

Mr. SMITH of Georgia. What did those bridges cost?

Mr. SWANSON. Those three bridges at Danville cost fifty or a hundred thousand dollars. It is just a small river. I guarantee that there is not a capital of a State in the Nation which borders on a river that has not a decent bridge crossing it. Here you find that it is hard to represent Washington in Congress. All appropriations for the District of Columbia are a proper subject for professional economists to assault. I say when a proposition is made to erect a structure like this it is denounced because there are no Senators here and no Members of the House to take care of it. They have no Senators to speak for them and no Representatives in Congress, and on these appropriations we hear the subject of economy preached because the people of the District have no power in Congress. If this was the capital of your State, sir, if it was Albany or if it was New York City, I guarantee that there would be a magnificent bridge.

Mr. O'GORMAN. Mr. President——

The PRESIDENT pro tempore. Will the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I will.

Mr. O'GORMAN. New York City has contributed many bridges costing from $10,000,000 to $45,000,000 and has borne the expense herself.

Mr. SWANSON. This is the Capital of the Nation. New York has spent $20,000,000 with 5,000,000 people to build a bridge, yet this Capital of 95,000,000 people is too poor to have a decent bridge across the Potomac. The trouble is that the Senator from New York considers Washington as a local city. He thinks the people of Virginia, the people of Alexandria County, should build this bridge. Washington is the Capital of this Nation. All the trouble has come from the fact that some people will not recognize that this is the Capital of 95,000,000 people.

If I mistake not, the people of America have pride in Washington. If I mistake not, they desire to see it a beautiful and a grand Capital. If I mistake not, they are proud of Washington. Here is the Senator from New York, who boasts of what New York can do. New York is not as rich as the 95,000,000 people of this country. It is hard to get the Senator from New York to realize that New York is a city constituting part of the country, but here is the Capital of 95,000,000 people.

Mr. O'GORMAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I do.

Mr. O'GORMAN. Does the junior Senator from Virginia think that there would be the same traffic over the Potomac bridge as that which crosses over one of the great arteries of trade in the metropolis of the Nation?

Mr. SWANSON. All I know is that traffic which wants to come and the people who want to come from the South to the Capital of the Nation have no facilities and no ability to do it.

Mr. O'GORMAN. Is there not a bridge every half mile to the west?

Mr. SWANSON. Nearly all the bridges have street cars or railways, and it is nearly impossible for the traffic and the travel to cross properly and conveniently.

Now let us take another proposition. Arlington has 1,200 acres of land. The Potomac Flats are owned by the Government. If it were owned by an individual, if it were owned by a city, they would connect it by a bridge. The Secretary of War says troops could not come from Fort Myer into Washington if any emergency should arise.

You have at Arlington the most princely park in the world in beauty, in size, and in magnificence. There lie buried all the heroes in the war of the South and the North. New York is not as rich as this Government, but if that park were to be entered I will guarantee that New York or any other city in the United States would have a decent and proper approach to it.

There is not a decent approach to the most magnificent and royal park that the world has ever seen, with all its heroes. Yet there is no decent way to get from Washington to it.

Further than that, the Secretary of War has recommended it; President McKinley recommended it—have recommended it as a good investment for the Government. Why? It will make available lands across the Potomac which can be used for public purposes, and will put to use at once more land and make it applicable for public purposes for buildings than the bridge will cost.

The trouble we have had is this: We came here and asked for a small bridge in 1907. That was five years ago. What were we met with? "Oh, no; we want no small bridge; we want a bridge of a magnificent superstructure, a magnificent memorial bridge equal to those crossing the Seine, the Thames, the Danube." We were told that we must wait until we get a magnificent bridge. We now ask for this. We are now told that no such bridge is needed and it is extravagant. Thus between those who desire a magnificent bridge and those who are unwilling to incur the expense of a magnificent superstructure we never get a bridge, and have been delayed for more than 20 years. I do not ask for any $5,000,000. All I ask is that Washington shall be as decently treated as the capital of any city in this Nation, and that this great Government shall give to the people who live south access to the Capital.

If the Senator wants no memorial bridge to commemorate the valor of the North and South, no splendid structure built on the Potomac, put the amount you want there for an ordinary bridge and I will accept it. But we are held off every time. We are told, "Now is not a fortunate time."

This bill has passed the Senate three times without a dissenting vote. It has been debated, it has been discussed, and all we ask is to let the question be settled for once.

You have just consented to an appropriation of $2,300,000 worth of property that can scarcely be available and scarcely be used without this bridge.

Whenever this question comes up the objection is made that the people of Virginia will get something from it; that it is a Virginia scheme; that it is a Virginia effort. I have never seen the propostion made here in which that does not come up. But last year we had a proposition to get the Government of the United States to do what? To build its own road through its own farms into Arlington estate, and the comment went around the Senate that it was a Virginia enterprise.

We have improved the roads on the other side of Arlington. We can not tax Government property in Alexandria County, and all we asked was that the Government should make roads through its own property good and passable.

You talk about economy. We desire to be economical. We believe the incoming President is economical. We believe he will carry out the platform. We believe the present Speaker of the House of Representatives is economical and a good Democrat. We believe the chairmen of the committees that are made commissioners here are. We believe the incoming Secretary of War is. We leave it to them to determine absolutely every cent that shall be expended. We put a limit there, for we thought possibly the Senate would object to a bill without a limit.

I am willing to trust Woodrow Wilson; I am willing to trust the Speaker of the House of Representatives; I am willing to trust the incoming Secretary of War; I am willing to trust the two chairmen of the committees to deal with this matter economically, and we constitute them a commission to determine what kind of a bridge shall be built. If they want to build a bridge costing one million and a half dollars or less, it is all right with us. All we ask is for Congress at this time to settle this matter that has been delayed for more than 20 years. The people of the South who want to come into Washington have some rights. Are we to be held up here eternally?

It seems to me the idea to have there a magnificent memorial superstructure is right—commemorative of the reunion of the North and the South, to thus bridge the Potomac that once was the dividing line that marked the hope and valor of 11 States south of it, that marked the valor and purposes of other States north of it. We ask that what was once a hostile dividing line between hostile camps shall be bridged by a magnificent structure illustrative of a united country, indicative of the fact that the Potomac no longer divides two sections, but that this magnificent superstructure shall be a monument to the fraternal feeling that exists between the North and the South.

This has been delayed 20 years. That it might not be delayed 20 years longer between those who want a cheap bridge and those who want a magnificent superstructure—so as to eliminate that difference we constitute a commission the membership of which can not be impeached; the integrity, ability, and economy of which can not be questioned.

I hope the Senator from New York, when he finds that in this bill the State of New York gets $5,000,000—possibly more than that—will consent that the Capital of this Nation of 95,000,000 people may have a bridge across the Potomac.

Mr. O'GORMAN. Mr. President, I am in substantial accord with the Senator from Virginia respecting his views generally, but in view of the extraordinary disbursements and expenditures provided for by the various appropriation bills now before Congress, as I view the situation it would be very unwise to add to the burdens of the people at this time an expenditure of $5,000,000 for a bridge across the Potomac when there are two bridges at the present time half a mile from here.

Mr. SWANSON. Will the Senator permit me? If you are ever going to build this bridge, if you are not simply trying to make a pretense of economy, why not let it since the amount authorized will be distributed over five years? The conditions of the Treasury are all right. There is ample money in the Treasury for this purpose. Vast sums of money are being deposited in national banks to-day. This money will not be spent for five years. It seems to me if there is any justice, if there is any pride in the city of Washington, if there is any desire to treat the people who live south of the Potomac with the fairness that the people of your State receive, and those who live in other sections than New York, and as the people surrounding any capital in this Nation receive, some conclusion should be reached in connection with this bridge and proceed to its construction. Now, what amount does the Senator think the Government would be able to spend?

Mr. O'GORMAN. I would suppose at this time that the Government could make no expenditure for that purpose.

Mr. SWANSON. Does the Senator think possibly a million dollars could be taken from New York and put on this bridge?

Mr. O'GORMAN. Not at this time. I submit my motion, Mr. President.

The PRESIDENT pro tempore. The Senator from New York moves to lay the amendment on the table.

Mr. HITCHCOCK. Before the Senator presses that——

Mr. LODGE. The motion is not debatable, Mr. President——

Mr. HITCHCOCK. I should like to ask——

The PRESIDENT pro tempore. Does the Senator from New York withdraw his motion for the purpose of hearing the Senator from Nebraska?

Mr. O'GORMAN. I do.

Mr. HITCHCOCK. I should like to ask some one who knows the facts in the case to state the maximum and minimum for which a respectable and decent bridge could be built across the Potomac at this point?

Mr. LODGE. Regular order, Mr. President.

The PRESIDENT pro tempore. The question is on the motion of the Senator from New York to lay the amendment on the table. [Putting the question.] The noes appear to have it.

Mr. SMITH of Georgia. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BRIGGS (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. WATSON]. I transfer that pair to the Senator from Nebraska [Mr. BROWN] and will vote. I vote "nay."

Mr. CHAMBERLAIN (when his name was called). I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

Mr. CLAPP (when his name was called). I have a general pair with the Senator from North Carolina [Mr. SIMMONS]. Observing him to be absent, I transfer that pair to my colleague, the senior Senator from Minnesota [Mr. NELSON], and will vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). I transfer my pair with the senior Senator from South Carolina [Mr. TILLMAN] to the Senator from Wisconsin [Mr. STEPHENSON] and vote. I vote "nay."

Mr. PAYNTER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. GUGGENHEIM], and in his absence I withhold my vote.

Mr. PERCY (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I do not know how he would vote if present, and, in his absence, I withhold my vote.

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. In his absence from the Senate I am permitted to transfer that pair to the junior Senator from Massachusetts [Mr. CRANE] and vote. I vote "nay."

Mr. SMITH of Michigan (when his name was called). I transfer my pair with the junior Senator from Missouri [Mr. REED] to the Senator from Rhode Island [Mr. LIPPITT] and vote. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I have a general pair with the Senator from Delaware [Mr. RICHARDSON]. I transfer that pair to the Senator from Tennessee [Mr. WEBB] and vote. I vote "yea."

Mr. SUTHERLAND (when his name was called). I am paired with the Senator from Arkansas [Mr. CLARKE], and, in his absence, I withhold my vote.

Mr. WARREN (when his name was called). I am paired with the Senator from Louisiana [Mr. FOSTER]. I therefore withhold my vote.

The roll call was concluded.

Mr. CLAPP (after having voted in the negative). Since announcing the transfer of my pair, I have learned that my colleague [Mr. NELSON] is paired with the senior Senator from Georgia [Mr. BACON]. I therefore transfer my pair to the junior Senator from California [Mr. WORKS], and will let my vote stand.

Mr. CHAMBERLAIN. I transfer my pair with the Senator from Pennsylvania [Mr. OLIVER] to the Senator from Maine [Mr. GARDNER] and vote. I vote "nay."

Mr. SUTHERLAND. I will transfer my pair with the Senator from Arkansas [Mr. CLARKE] to the Senator from North Dakota [Mr. MCCUMBER] and vote. I vote "nay."

The result was announced—yeas 24, nays 30, as follows:

YEAS—24.

Bankhead	Curtis	Lea	Shively
Bristow	Fall	O'Gorman	Smith, Ariz.
Bryan	Gore	Owen	Smith, Ga.
Catron	Johnson, Me.	Page	Smith, S. C.
Crawford	Kenyon	Pomerene	Thomas
Cummins	Kern	Sheppard	Townsend

NAYS—30.

Bourne	Dillingham	Newlands	Smoot
Brady	Fletcher	Penrose	Stone
Brandegee	Gallinger	Perkins	Sutherland
Briggs	Jackson	Pittman	Swanson
Burnham	Jones	Poindexter	Wetmore
Chamberlain	Lodge	Root	Williams
Clapp	Martin, Va.	Smith, Md.	
Clark, Wyo.	Martine, N. J.	Smith, Mich.	

NOT VOTING—41.

Ashurst	Dixon	Lippitt	Simmons
Bacon	du Pont	McCumber	Stephenson
Borah	Foster	McLean	Thornton
Bradley	Gamble	Myers	Tillman
Brown	Gardner	Nelson	Warren
Burton	Gronna	Oliver	Watson
Chilton	Guggenheim	Overman	Webb
Clarke, Ark.	Hitchcock	Paynter	Works
Crane	Johnston, Ala.	Percy	
Culberson	Kavanaugh	Reed	
Cullom	La Follette	Richardson	

So the motion of Mr. O'GORMAN to lay the amendment on the table was rejected.

Mr. STONE. Mr. President, I desire to ask whether at this point it would be in order to move to strike out all after the enacting clause of the bill?

The PRESIDENT pro tempore. The Chair thinks it would be in order.

Mr. STONE. I make that motion.

The PRESIDENT pro tempore. The Senator from Missouri moves to strike out all after the enacting clause of the bill.

Mr. SMITH of Georgia. I ask for the yeas and nays on the motion.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BRIGGS (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. WATSON]. I transfer that pair to the senior Senator from Nebraska [Mr. BROWN] and will vote. I vote "nay."

Mr. CHAMBERLAIN (when his name was called). I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the Senator from Maine [Mr. GARDNER] and will vote. I vote "nay."

Mr. CLAPP (when his name was called). I again transfer my pair with the Senator from North Carolina [Mr. SIMMONS] to the junior Senator from California [Mr. WORKS], and will let that announcement stand for any subsequent vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). Again transferring my pair with the Senator from South Carolina [Mr. TILLMAN] to the Senator from Wisconsin [Mr. STEPHENSON], I vote "nay."

Mr. PERCY (when his name was called). In the absence of the senior Senator from North Dakota [Mr. MCCUMBER], with whom I am paired, I withhold my vote.

Mr. PERKINS (when his name was called). I again transfer my pair with the junior Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Massachusetts [Mr. CRANE] and vote "nay."

Mr. SMITH of Michigan (when his name was called). I transfer my pair with the junior Senator from Missouri [Mr. REED] to the junior Senator from Rhode Island [Mr. LIPPITT] and will vote. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again transfer my general pair with the Senator from Delaware [Mr. RICHARDSON] to the Senator from Tennessee [Mr. WEBB] and will vote. I vote "nay."

Mr. SUTHERLAND (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. CLARKE] to the Senator from Colorado [Mr. GUGGENHEIM], which will permit the Senator from Kentucky [Mr. PAYNTER] and myself to vote. I vote "nay."

Mr. WARREN (when his name was called). I again announce my pair with the Senator from Louisiana [Mr. FOSTER].

The roll call was concluded.

Mr. SMITH of South Carolina (after having voted in the negative). I understand the Senator from Tennessee [Mr. WEBB], if he were here, would vote "yea." I therefore transfer my vote to the Senator from Alabama [Mr. JOHNSTON], and will let my vote stand.

The result was announced—yeas 17, nays 40, as follows:

YEAS—17.

Bankhead	Kenyon	Page	Thomas
Bristow	Kern	Sheppard	Williams
Bryan	Lea	Shively	
Cummins	O'Gorman	Smith, Ga.	
Gore	Owen	Stone	

NAYS—40.

Bourne	Crawford	Lodge	Root
Bradley	Curtis	Martin, Va.	Smith, Ariz.
Brady	Dillingham	Martine, N. J.	Smith, Md.
Brandegee	Fall	Newlands	Smith, Mich.
Briggs	Fletcher	Paynter	Smith, S. C.
Burnham	Gallinger	Penrose	Smoot
Catron	Hitchcock	Perkins	Sutherland
Chamberlain	Jackson	Pittman	Swanson
Clapp	Johnson, Me.	Poindexter	Townsend
Clark, Wyo.	Jones	Pomerene	Wetmore

NOT VOTING—38.

Ashurst	Dixon	Lippitt	Simmons
Bacon	du Pont	McCumber	Stephenson
Borah	Foster	McLean	Thornton
Brown	Gamble	Myers	Tillman
Burton	Gardner	Nelson	Warren
Chilton	Gronna	Oliver	Watson
Clarke, Ark.	Guggenheim	Overman	Webb
Crane	Johnston, Ala.	Percy	Works
Culberson	Kavanaugh	Reed	
Cullom	La Follette	Richardson	

So Mr. STONE's motion was not agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

Mr. GORE. I move that the Senate adjourn.

The PRESIDENT pro tempore. The Senator from Oklahoma moves that the Senate adjourn. [Putting the question.] By the sound the noes seem to have it.

Mr. SMITH of Georgia. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I transfer my pair to the Senator from Maine [Mr. GARDNER] and vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). I again transfer my pair from the Senator from South Carolina [Mr. TILLMAN] to the Senator from Wisconsin [Mr. STEPHENSON] and will vote. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I transfer my general pair to the Senator from Alabama [Mr. JOHNSTON] and vote. I vote "nay."

Mr. WARREN (when his name was called). I again announce my pair.

The roll call was concluded.

Mr. SUTHERLAND. I make the same announcement as to the transfer of my pair and vote. I vote "nay."

Mr. SMOOT. I desire to announce a pair between the senior Senator from Illinois [Mr. CULLOM] and the junior Senator from West Virginia [Mr. CHILTON].

The result was announced—yeas 14, nays 45, as follows:

YEAS—14.

Bryan	Kern	Pomerene	Stone
Gore	Lea	Sheppard	Thomas
Hitchcock	O'Gorman	Shively	
Kenyon	Owen	Smith, Ga.	

NAYS—45.

Bankhead	Crawford	Martine, N. J.	Smith, Md.
Bourne	Cummins	Myers	Smith, Mich.
Bradley	Curtis	Newlands	Smith, S. C.
Brady	Dillingham	Page	Smoot
Brandegee	Fall	Paynter	Sutherland
Briggs	Fletcher	Penrose	Swanson
Bristow	Gallinger	Percy	Townsend
Burnham	Jackson	Perkins	Wetmore
Catron	Johnson, Me.	Pittman	Williams
Chamberlain	Jones	Poindexter	
Clapp	Lodge	Root	
Clarke, Wyo.	Martin, Va.	Smith, Ariz.	

NOT VOTING—36.

Ashurst	Cullom	Kavanaugh	Richardson
Bacon	Dixon	La Follette	Simmons
Borah	du Pont	Lippitt	Stephenson
Brown	Foster	McCumber	Thornton
Burton	Gamble	McLean	Tillman
Chilton	Gardner	Nelson	Warren
Clarke, Ark.	Gronna	Oliver	Watson
Crane	Guggenheim	Overman	Webb
Culberson	Johnston, Ala.	Reed	Works

So the Senate refused to adjourn.

The PRESIDENT pro tempore. The question is upon the amendment.

Mr. OWEN. I should like to hear the pending amendment read. I did not understand that there was an amendment pending.

The SECRETARY. The amendment is, on page 68, to insert a new section, to be known as section 26.

Mr. OWEN. Is it in order to offer an amendment at this point?

The PRESIDENT pro tempore. It is in order to offer an amendment to the amendment, but not otherwise.

Mr. OWEN. Let the amendment be read.

The Secretary again read the amendment.

Mr. OWEN. I offer an amendment to the amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to add, at the end of the amendment of the committee, the following:

Provided, That any item in this bill returned to Congress disapproved by the President of the United States at any time within the first 10 days of the next regular session thereof shall be void unless reaffirmed by a majority vote of both Houses.

Mr. WILLIAMS. I make the point of order that the amendment is not germane, and the further point of order that it could not be passed without changing the Constitution of the United States.

The PRESIDENT pro tempore. The Chair will first decide the point of order.

Mr. OWEN. Mr. President, I believe I had the floor in offering the amendment; and I have a right to address the Senate on the amendment without being taken off the floor by motions made by other Members.

The PRESIDENT pro tempore. The point of order can be made at any time.

Mr. WILLIAMS. I think a point of order is always in order.

The PRESIDENT pro tempore. It is not debatable.

Mr. WILLIAMS. The point of order can hardly be nullified.

Mr. THOMAS. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Chair was about to decide that the point of order was not well taken. The Senator from Colorado makes the point of no quorum. The Secretary will call the roll.

Mr. CURTIS and others. That is dilatory.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Crawford	Lodge	Shively
Bankhead	Cummins	Martin, Va.	Smith, Ariz.
Bourne	Curtis	Martine, N. J.	Smith, Md.
Bradley	Dillingham	Myers	Smith, Mich.
Brady	Fall	Newlands	Smith, S. C.
Brandegee	Fletcher	O'Gorman	Smoot
Briggs	Gallinger	Page	Stone
Bristow	Hitchcock	Paynter	Sutherland
Bryan	Jackson	Penrose	Swanson
Burnham	Johnson, Me.	Percy	Thomas
Catron	Jones	Perkins	Townsend
Chamberlain	Kenyon	Pittman	Warren
Clapp	Kern	Root	Wetmore
Clark, Wyo.	Lea	Sheppard	Williams

The PRESIDENT pro tempore. Fifty-six Senators have answered to their names. A quorum of the Senate is present.

Mr. THOMAS. I move that the Senate adjourn, and upon that I call for the yeas and nays.

The yeas and nays were not ordered, and the motion was rejected.

The PRESIDENT pro tempore. The question is on the amendment.

Mr. SMITH of Georgia. Mr. President, I regard this as the most objectionable amendment submitted by the committee. Indeed, I regard it as the most objectionable feature of the entire bill, much of which, I think, is objectionable.

It is scarcely necessary for me to go over what has been mentioned this evening—the condition of the appropriation bills that have been, and are to be, passed by the present Congress. I have listened to the suggestion of the senior Senator from Virginia [Mr. MARTIN], when he sought to explain to us that this was a harmless little measure carrying no appropriation; that there was no appropriation in it; that it simply provided that $5,000,000 could be spent, and made it a part af the law, but left it to some other appropriation bill to actually carry the money.

If it is so harmless, if it is so ineffective, why the necessity of putting it upon this bill? Why not let it wait? Why keep it, in spite of the objection that exists, with this provision before the Senate? When we already have a bill away beyond a normal size, why add this $5,000,000 to it?

We all understand that when you get through a provision of this kind the appropriation follows. It can be put on any bill upon the floor of the Senate. It is constantly knocking at the door, demanding the money, and pressing for the actual cash.

Mr. President, if this provision really passes, I think, if this is to be a memorial bridge, the provision should be amended, and it should be provided that a statue of each of the Senators from Virginia should be placed upon it, one at one end and one at the other.

Mr. SWANSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Virginia?

Mr. SMITH of Georgia. Certainly.

Mr. SWANSON. I would suggest that a statue to the Senator from Georgia be placed on the bridge, as neither of the Senators from Virginia deems himself sufficiently important to be so honored; but I am satisfied that the Senator from Georgia is sufficiently important.

Mr. SMITH of Georgia. I should object very much to having my statue on such a bridge. I should not consider it a compliment. I would far rather have my statue erected in connection with an effort to prevent the bridge from being built.

Mr. President and Senators, we have two very fair bridges across from here, on which we can pass over the Potomac. The Senator from Virginia most eloquently plead for an opportunity for those south of Washington to get into Washington. I belong to the number of those south of Washington, and I have never found any trouble about crossing the Potomac. I have never heard any cry beyond Virginia for better facilities to cross the Potomac. Do not put it as a plea to let the people south of the Potomac get here, because nobody beyond Washington and Virginia ever asked for it. North Carolina has no representatives asking for it; South Carolina has none; Georgia has none; Alabama has none. Do not say it is to let the people south of the Potomac get here. The Senator from Virginia should speak for his own State alone, and say: "Build it, and spend this $5,000,000 of all the people's money, to let the people of Virginia cross the Potomac."

Mr. President, if we had every building that we needed in Washington erected, if we had no special strain on the Treasury, I would not be opposed to a bridge of this character or of some character. But I am unalterably opposed to this bill if this provision goes on. I hope if this provision goes on it that the bill will be killed. I am not sure that it ought not to be killed anyhow. I rather think it ought. It is not hostility to the District of Columbia or the city of Washington on my part.

I sat quietly a few moments ago and saw the splendid appropriation of $2,300,000 made for park purposes and never opened my lips against it. My view of that was this: I believe it desirable that the park back of the White House shall be connected with the park north of the city, and if it is to be done the land ought to be bought at once. It will be more and more difficult as the days roll by to purchase the additional land. Therefore if the two parks are to become one, if this splendid effort to beautify our National Capital is to take place, now is the proper time to make the purchase.

So, Mr. President, moved by some of the lofty patriotism possessed by the Senator from Virginia, feeling at least in part the noble sentiments which he so eloquently presented, I made no obstruction to that measure. There was a reason why, if it is to be done at all, it should be done now.

But, Mr. President, with reference to this bridge, there is absolutely no economy in putting it on the appropriation bill now. Five years hence it could be put upon the appropriation bill with no more expense than would be required now. We own the approaches on either side.

We have had the fact delightfully explained to us by the Senator from Virginia that we own 1,200 acres of land on the other side of the Potomac and it requires an expenditure of only $5,000,000 to turn that land into a farm. I have no doubt it is worth a hundred dollars an acre, and I suppose if this bridge, costing $5,000,000, is built it will still be worth a hundred dollars an acre, and the investment of $5,000,000 would be a splendid business proposition in the interest of the National Government.

Mr. President, what excuse can we give for making a $5,000,000 appropriation for something not now essential? I should perhaps hesitate to say that, for the Senator from Virginia says there is not a bridge across the Potomac that has not a street car track on it, and therefore we must have another. The street car tracks do not prevent us from driving our teams across or crossing with our automobiles. I have crossed both bridges, and I never found the street car tracks in the way.

Mr. THOMAS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Colorado?

Mr. SMITH of Georgia. I do.

Mr. THOMAS. I should like to inquire of the Senator from Georgia whether the street cars do not facilitate access into the city by those like myself, who have no automobiles?

Mr. SMITH of Georgia. Yes; the street car affords splendid facility for access to the city by a large majority of our citizens.

Mr. SUTHERLAND. Will the Senator from Georgia allow me to ask him a question?

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. SUTHERLAND. It is now after 1 o'clock. I should like to ask the Senator from Georgia whether or not it is his intention to prevent a vote upon this amendment.

Mr. SMITH of Georgia. I can not say that it is.

Mr. SUTHERLAND. I mean this evening.

Mr. SMITH of Georgia. I can not say that it is; no. I have not finished making the observations I want to make. I trust the Senator from Utah is not so impressed with the lack of force in what I am saying that he has supposed I did not seriously want what I was saying heard. If so, he has misunderstood my purpose in speaking.

Mr. SUTHERLAND. I asked the question in the utmost good faith.

Mr. SMITH of Georgia. I answered it in that way.

Mr. SUTHERLAND. It is perfectly apparent that some gentlemen on the other side have engaged in some dilatory methods, and I wanted to know, because I do not think it is fair to punish a lot of men by insisting upon remaining in session for an unreasonable length of time. If it is the intention of the Senator from Georgia or others upon that side of the Chamber to prevent a vote during the evening, I would not feel like insisting upon remaining here.

Mr. SMITH of Georgia. I have answered the Senator so far as I am concerned. I have not in any sense made up my mind to seek to prevent a vote upon this amendment this evening.

Mr. SUTHERLAND. That answers my question.

Mr. SMITH of Georgia. Or this morning. Now, I do not mean to say if this amendment goes into the bill that I may not seek to prevent a vote for some time upon the bill itself. I have not made up my mind at all on that. I know I will vote against the bill with this amendment in it. I believe with this amendment in it the bill is doomed.

Mr. O'GORMAN. Mr. President, I move that the Senate adjourn.

The motion was not agreed to.

Mr. SMITH of Georgia. We might as well understand it, gentlemen. If this bill is loaded with $5,000,000 of additional appropriation, I believe it is doomed, and I think it ought to be doomed. I should earnestly plead and pray all others on this side to earnestly plead with the Senate to kill the bill if it has this appropriation of $5,000,000 on it. You have placed in the bill $1,750,000 for an armory in the District. You have put into the bill an appropriation of $2,300,000 for a park in the District.

Mr. CLARK of Wyoming. Will the Senator yield for a question?

Mr. SMITH of Georgia. Yes.

Mr. CLARK of Wyoming. The Senator has announced his intention to perform the righteous work which has appealed to him of voting against the bill if this provision is in the bill. I should like to get the Senator's frame of mind as to what he would do if this item was stricken out of the bill. Would he then vote for it?

Mr. SMITH of Georgia. If this item is stricken out of the bill, if I should vote against it I would vote and certainly occupy no time.

Mr. CLARK of Wyoming. That is a consideration to be taken account of.

Mr. SMITH of Georgia. That is what I informed the Senator. I appreciated the situation, and I appreciate the situation of those who desire the balance of the items in the bill. I meant it to be understood by the Senator from Wyoming just as he understood it—that it would be a thing very much to be appreciated if you wish the bill to pass, because, of course, those who are opposed to this measure can stop it at this time in the session. We understand that perfectly. For that reason we do not feel that you should force on us a measure involving this appropriation of $5,000,000.

Mr. MARTIN of Virginia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Virginia?

Mr. SMITH of Georgia. I do.

Mr. MARTIN of Virginia. I should like to have the Senator explain what he means by forcing on the bill an amendment that a majority of the Senate voted in favor of.

Mr. SMITH of Georgia. They have not voted on it.

Mr. MARTIN of Virginia. The Senate refused to lay the amendment on the table. That was a distinct expression of the Senate by a decisive majority in favor of the amendment. The only force I have seen is the filibuster of the Senator from Georgia.

Mr. SMITH of Georgia. Mr. President, I am sorry the Senator from Virginia speaks in such vehement language. There is no filibuster by the Senator from Georgia; none is going on now. I am appealing to the Senate when they come to vote upon this provision to vote against it. I can not accept the view of the Senator.

Mr. SWANSON. Mr. President——

Mr. SMITH of Georgia. Let me finish what I have to say. The Senator from Virginia proceeded with his eloquent speech, one of the best I have heard at any time on the floor of this body, and he in my opinion carried the Senate by that speech.

Mr. SWANSON. Will the Senator permit me to interrupt him for a minute?

Mr. SMITH of Georgia. Yes.

Mr. SWANSON. Do I understand that the position of the Senator is that if a majority of the Senate think this amendment is just and right and proper legislation, and because he does not concur in it and his judgment is not in accord with this majority, he will prevent the bill from going to conference? Do I understand him as using that threat to the Senate? That is the substance of what the Senator has said. If that is true, speaking for myself as a Senator, and believing that a majority of the Senate should rule, if I did not favor the proposition, before I could be coerced into surrendering the judgment of the Senate to the judgment of an individual Senator I would stay here until the 4th day of March.

Mr. SMITH of Georgia. Mr. President, the vehemence of the Senator from Virginia will not help his cause. I do not yield to him now, because I did not interrupt him and he did not permit us to interrupt him when he had the floor. I desire now to occupy the floor myself.

Mr. SWANSON. If the Senator will permit me, I can not recall that the Senator from Georgia asked an interruption at my hands. I ask any Senator in this body to arise who asked for an interruption and I refused it. I can not recall it. Did the Senator from Georgia ask to interrupt my speech?

Mr. SMITH of Georgia. I did not; but the Senator——

Mr. SWANSON. Name the Senator who did.

Mr. SMITH of Georgia. Let me finish. The Senator from New York [Mr. O'GORMAN] several times sought to attract the attention of the Chair and to interrupt the Senator, and the

Senator went on with his speech and the Senator from New York did not have the opportunity.

Mr. SWANSON. If the Senator will permit me, the Senator from New York is present. He is amply able to present his grievances to the Senate and he is amply able to take care of himself. If the Senator from Virginia has been guilty of any discourtesy to the Senator from New York he does not need the Senator from Georgia to be his champion. Each Senator here is the champion of his own rights and his own grievances. The Senator from New York is here, and if I made discourteous treatment of him I will make proper amends to him.

Mr. SMITH of Georgia. Mr. President, I did not suggest that the Senator's treatment was discourteous, and I do not understand when I say that I wish to proceed with my speech that I in any way act with discourtesy to the Senator from Virginia. If he thinks so, no matter how much I wish to proceed with my speech, I would stop immediately and yield to him.

Mr. SWANSON. My injection in this debate was that the Senator had left an impression that I had refused properly to yield in a courteous way to a Senator who wanted to interrupt me, which I deny.

Mr. SMITH of Georgia. I never for one moment suggested he did; and I do not mean certainly in any discourteous way to fail to yield to him; but if he feels so I regret it. I would be glad to yield and concede to him any moment the floor if I had it, without the slightest hesitation. I did not mean, and I think the Senator ought not to have felt, that I meant that his conduct was discourteous. I had said that his speech was eloquent; that his presentation was powerful; and it is my honest opinion that the speech of the Senator from Virginia defeated the motion to lay this amendment on the table. I believe it was the power and the eloquence with which he presented the case, scarcely answered at all, that carried the Senate off its feet and defeated the motion to lay the amendment on the table, which I believe otherwise would have carried. The Senator has utterly misunderstood me in supposing that I meant anything but compliment to the part he has taken in this matter.

I have not heard a more powerful or persuasive speech made by any Senator upon the floor of the Senate since I came here, and I do not think I have heard one that more likely changed votes than the speech of the Senator from Virginia. The reason why I do not consider that the motion to lay on the table was a final decision of this question by the Senate is because the Senator from Virginia had presented his side with such power, unanswered, that I think the other side was not properly in the minds of Senators.

What I desired to impress upon the Senate was the condition of the appropriation bills, what we have already done for this District, and the feeling of Senators that they must vote against this measure as a whole if this additional appropriation is put on. Senators who desire to vote for the balance of it are justified in feeling that you are loading it down when you are paying $600,000 a year rent because of the lack of public buildings in the District, where you need them and need them now. Are they not justified in feeling you are loading this bill down when you put $5,000,000 on for this bridge, which is in no sense a necessity? I only ask to plead with Senators not to put this burden on the bill, and cite again the fact that we sat by practically without resistance when the appropriation of $2,300,000 was put on for the park.

Mr. WILLIAMS. Mr. President, a few minutes ago when the Senator from Missouri [Mr. STONE] made a motion to strike out everything after the enacting clause of this bill I voted for the motion. I voted for it because there are so many little things in it that did not seem to me to be straight and right and worthy of recognition in a public-building bill.

The provision which the Senator from Georgia [Mr. SMITH] opposes is one of the very few things in this bill that are worthy of consideration. Under the memorial-bridge project there is a great national peace idea reuniting the sections by a symbolism that shall be beautiful and full of meaning at the same time. It is the only high sentiment—the only prose poetry in the bill. If the only opposition to this bill were that provision, I should never have cast the vote which I cast a few moments ago.

Now, I want to say another thing, Mr. President, not so much connected with the public-buildings bill as with the general management of the Senate and concerning its rules. This is the only body in America, as far as I know, with unlimited debate and with power in the hands of a few people to retard, if not totally to put an end to, the tyranny of a majority against a minority. It is a most precious privilege. It ought to be guarded most carefully. But if the rules of the Senate are to be abused and if filibustering is to be resorted to upon ordinary routine business, the rules of the Senate will be brought into contempt and the Senate itself will be compelled to change its rules, and there will be no abiding place in America where a minority, and especially a sectional minority, can protect itself against the brute force of a majority.

It is worse than useless, it is dangerous, to fool with fire except when fire must be conquered; when it must be fooled with. For half a dozen men to hold up a bill simply because they do not agree with the mere expediency of it; when there is no great public principle involved; no constitutional principle; no principle of human right; no principle of protection of the natural rights of man, will lead inevitably to frequent imitations, and, after a while, to an abolition of that which is now a hedge and a buttress, and ought to be left to be used as a buttress only upon great occasions; occasions when it is necessary to take an appeal from the legislative majority to the people themselves so as to give time to the people to think, as was done in the case of the force bill, and as has been done successfully several other times in our history.

As a representative of the minority section of this country, I do not want to see the rules of the Senate changed and therefore do not want to see them abused; I do not want to see them brought into disrepute. I do not want to see the time come when in behalf of public liberty or of sectional rights they might be appealed to and be found wanting; be found abolished by reason of abuse prior to that time.

I have voted to strike out everything in this bill after the enacting clause, and I shall vote against the bill, because, notwithstanding it has this good provision and notwithstanding it has some other excellent provisions there is, as it seems to me, that element of logrolling in it that I do not approve of. But I am not willing to beat it except upon a square vote in the Senate, and I do not think we ought to be kept here indefinitely without facing the merits of the issue by the use of rules—instrumentality—good and safe and right in itself, but whose very existence may be involved by fights of this description. Let us keep the precious right of the rules of the Senate for great occasions when great principles are involved, when great and serious public feeling in some manner affecting a section or a class or a sentiment is involved, when an appeal is sought to be taken from a temporary brutal majority in the legislature to the sober common sense of the people at home or in behalf of a majority outside of this Chamber against a discredited majority in it.

The PRESIDENT pro tempore. The question is upon the amendment to the amendment submitted by the Senator from Oklahoma [Mr. OWEN].

Mr. OWEN. Mr. President, there are many items in this bill which I do not believe are justified, and I think that the whole system upon which we have been hitherto proceeding in dealing with public-building bills has a fundamental error in it. We have no appropriate or adequate safeguard against the estimates involving unnecessary expenditures. It is very easy to call upon the Supervising Architect to make a report as to what would be the cost of a building containing a certain number of square fleet of floor space, and to assert to the Supervising Architect's Office that such and such a town or village needs a building of a certain amount of floor space. In many instances and in most instances no doubt the floor space is more accurately ascertained, but no sufficient check exists on these demands for floor space. In that kind of fashion there comes into the committees these quasi estimates, so that one town after another is provided for with buildings that are not really justified by the public service on a sound, economical public policy. Where a town is perfectly willing to give the rent of a building for a post office in order to get the trade belonging to the post office at some convenient corner of the vicinity, and it often happens that the citizens of a town will make up the rent, and practically give a building to the Government for its use in order to attract to some convenient point in the town the trade which centers around the post office, or the Government may easily rent a convenient and economical building already in the town for such purposes, which serves the purpose excellently well, sufficiently well. Yet by the process we have followed in preparing this bill and bills of like character heretofore, the Government is called on to put up a building that will cost $75,000 or $100,000, and thereafter fix it as a permanent charge upon the Federal Treasury for the care of that building, for maintaining its heating apparatus, for keeping it in repair, for janitor service, and for things of that kind, which make a permanent unnecessary charge upon the Government. In that way I think we have gone into unnecessary expenditures.

It was for that reason that I presented this proposed amendment. I presented it with a serious purpose, to provide a means for putting an end to this kind of thing in these public-building bills, where items are inserted that ought not to go in. I know perfectly well that Members of the Senate, as a rule, are in no better position than I am to ascertain what is the exact

public need with regard to various of these items. I therefore propose this amendment:

Provided, That any item in this bill returned to Congress disapproved by the President of the United States with his objections at any time within the first 10 days of the next regular session thereof shall be void unless reaffirmed by a majority vote of both Houses.

The suggestion was made by the Senator from Mississippi [Mr. WILLIAMS] that the provision is "unconstitutional." I shall only take a brief moment to show that it is not unconstitutional. The general provision of the Constitution with regard to the exercise of the veto power by the President, of course, allows him, whether we will or whether we will not, to return a bill which passes both Houses with his disapproval, or veto, giving his objections, within a certain time. Thereupon that bill is vetoed, and is not the law unless it shall then be passed by a two-thirds vote of both Houses, in which event his veto is overruled; but we have a right to impose a condition in the law itself which becomes a legal condition with regard to any item in the bill when the President shall have approved the act. The constitutional provision provides that—

Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve he shall sign it, but if not he shall return it, with his objections, to that House in which it shall have originated—

And so forth.

But this provision which I offer as an amendment to the proposed act becomes the law with the President's approval; and when he approves it, he makes this bill the law. It becomes the law of the land, and, being the law, it requires him, as a legal executive duty imposed by act of Congress, to do certain things; that is, to scrutinize the items in this bill and further advise Congress. It is clearly within the legislative power of Congress to require him to return any item of this bill, which, upon closer scrutiny, he may think deserves further consideration by Congress. My amendment proposes by act of Congress to make such item void unless it is reaffirmed by a majority vote of both Houses. It is not the same thing as a constitutional veto of the bill itself. It is a conditional provision in the law which becomes the law and justifies the President under a special act in returning to us any item, with his objection, for further legislative consideration. This is a wise public policy. That will cure the vice of a bill like this, which is being passed with many questionable items because of the individual interests of various Members of either House of Congress and the spirit of mutual conciliation, moved by local, but not by the higher national, interests.

That is the difficulty with this kind of a bill. Men do not feel absolutely free to object to a bill, because they have on the inside of the bill various items for their own State which are affected by the bill, and in that way this kind of a bill gets a number of votes it would not get upon its merit. I think the time has come in this Republic when we should not have bills put through that should be tainted in any degree with a suspicion that they are going through for the purpose of serving the special local interest only of Senators or of Members of the House. When I say "special local interests," of course I only mean in a localized sense; that is to say, that a Senator may be unduly influenced by his anxiety to serve some particular town in his own State whose lively citizens put undue political pressure on him.

There are towns in my State affected by this bill which I think are thoroughly justified in asking what has been estimated for them on the ground of their great postal receipts, on the ground of the volume of business, and on the ground of economy from a standpoint of rental charges, and I am prepared to defend any item in the bill for my State which I have offered; but at the same time I myself am interested and influenced in the way I have described, and have a strong inducement to favor this bill in order to favor the towns that I am friendly to and interested in, but I do think that the executive branch of the Government ought to have the right to put the microscope upon these items and, as a matter of law, should be required to return them to Congress, and unless Congress reaffirms them by a majority vote after consideration of the further Executive report, such items ought to go out of the bill. That is the reason why I have offered this amendment. I believe it would really strengthen this bill. I would be willing to support this bill with whatever items are in it with the opportunity in the Executive to review it and further advise Congress as to those items which might prove to be unsound. I am satisfied that there are a large number of items in this bill that ought not to be in it. My proposed amendment would cure that defect, and I would be willing to support the bill with this amendment.

Mr. CLAPP. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Minnesota?

Mr. OWEN. With pleasure.

Mr. CLAPP. Does not the Senator fail to distinguish between a condition over which the Executive would have no control and of the existence of which a proclamation of the President would be proof, and dependent upon which a law might go into effect or not, and the mere leaving it to the will of the Executive? I can readily understand that we might, if we took the time and care, devise a bill prescribing certain conditions upon the happening of which certain results should follow, as in the maximum and minimum provision of the tariff law, but that is prescribing the effect with reference to a condition over which the Executive has no control. He simply makes a proclamation, which we declare is evidence of the existence of a condition. That is one thing, and no doubt within the power of Congress, for it has been tried many a time and has been sustained by the courts.

This is a proposition that prescribes no condition whatever. It does not make the bill depend upon the happening of any condition, but simply leaves it to the President himself to say at the end of a given time whether or not this bill should go into effect or whether before it becomes effective it should come back here and receive the affirmative vote of a majority of both Houses.

It does seem to me, with all due deference to the Senator, whose opinion I certainly hold in high esteem, that the Senator has failed to distinguish between those two cases—one where we prescribe that upon the happening of a condition a certain result shall follow and the other, the Senator's proposition, to leave it simply to the will of the Executive to say whether, outside of the Constitution, a provision of law shall become effective or whether it shall come back here and receive an affirmative vote.

Mr. OWEN. Mr. President, I have answered the constitutional objection by pointing out that when this becomes a law by act of Congress and the approval of the President of the United States it is a statute by the action of the authorized authorities under the Constitution who are charged with the making of the law. It having become the law, then the law requires that items which are found by the Executive to have been injudiciously proposed may be returned and shall be returned to the Congress with further Executive advice, and the Congress then has the right by a majority vote to consider and overrule the objections suggested. No clause or phrase or word in the Constitution is inharmonious with the amendment I propose.

The constitutional veto does not inhibit it. It suggets its wisdom. The constitutions of New York, of Minnesota, of Oklahoma, and of other States provide that the executive shall have the power of veto as to individual items on appropriation bills which the legislative branch can not override except by two-thirds vote of both houses. My proposed amendment merely imposes a condition making possible the return for further legislative consideration items that seem unwise.

Mr. CLAPP. In a great many States, my own State among others, the constitution gives the executive the authority to veto any item in a bill. I think there ought to be in the Federal Constitution such a provision, but the trouble about this proposition is that it simply depends for its operation finally as to whether it shall remain a law or not, without further action of Congress, upon the action of somebody else outside of the legislative body.

Mr. OWEN. The Senator is mistaken. The items objected to are returned to Congress for legislative affirmation, not having been finally affirmed by this act, but only passed by Congress conditionally—that is, conditioned on a future affirmative act by Congress, if the Executive advise Congress that further legislative approval is necessary. I appeal to the constitution of the State of Minnesota as my justification for the policy.

Mr. CLAPP. For what?

Mr. OWEN. For my justification for the policy.

Mr. CLAPP. Nobody doubts the policy.

Mr. OWEN. Very well. The policy being conceded, the only thing remaining is the constitutionality of my proposal.

Mr. CLAPP. The way to meet that is by an amendment to the Constitution.

Mr. OWEN. The Senator can not find anything in the Constitution forbidding it. I defy him to do so. If it is not forbidden by the Constitution, and he can show nothing in the Constitution which is inharmonious with my proposed amendment, he must concede Congress has the right to pass the law under the grant of all the legislative power of the United States to Congress.

Mr. CLAPP. The Senator does not have to find anything in the Constitution to forbid it. Congress can legislate. Legislating is one thing and leaving it to the will of an outsider—I do not care who he is, and it adds nothing to make him the

Executive—is another. Any condition which Congress can impose in a law, upon the happening of which a certain result will follow, may be left to the Executive, may be left to the Interstate Commerce Commission, may be left to anybody that Congress designates, but Congress prescribes the conditions upon which the result and the effect shall follow. This proposal would leave it entirely to the Executive.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Mississippi?

Mr. OWEN. I yield the floor to the Senator from Mississippi. I have already answered the Senator from Minnesota.

Mr. WILLIAMS. Very well. The proviso proposed by the Senator from Oklahoma might be worshiped without violating the commandment against idolatry. It is not the "likeness of anything that is in heaven above or the earth beneath or in the water under the earth." It involves not only one amendment to the Constitution, but it involves three or four. The amendment proposed by the Senator from Oklahoma reads:

Provided, That any item in this bill returned to Congress disapproved by the President of the United States with his objections at any time within the first 10 days of the next regular session thereof shall be void unless reaffirmed by a majority vote of both Houses.

The three particulars in which it differs from the Constitution are these:

The Constitution gives to the President of the United States the right to veto *a bill*. It does not use the word "veto," but it gives him a right to send it back "without his approval," which of course is the same thing as the language used here—"to return it to Congress disapproved."

The first amendment to the Constitution which the Senator is seeking to make by his simple provision upon a special appropriation bill is that the President shall be empowered to veto an *item* in a bill instead of a bill.

The Senator said he could find authority for that in the constitution of Minnesota. I do not know whether he could or not, but I do know that he could have found it in the constitution of the late Confederacy; and it was one of the very few amendments to the United States Constitution which the Confederate constitutional convention adopted which was unsound. The moment the legislative branch of a government surrenders the power to coerce the executive by putting riders upon appropriation bills in times of great emergency, and thereby depriving him of financial support—the minute the legislative branch surrenders the purse string, that moment liberty and popular government are in danger. It is a right which ought to be sparingly used, but which ought never to be surrendered. We have gained all our freedom by this very thing, and Great Britain has gained hers by this ability to coerce the King either to veto or to allow to pass an entire supply bill with all that Parliament chose to put upon it.

That is the first amendment to the Constitution, proposed in an amendment to a special appropriation bill offered by the Senator from Oklahoma, conveniently shirking the constitutional requirement of a two-thirds vote of both Houses.

What is the next one? The Constitution says that the President shall return a bill "within 10 days." The Senator wants him, after having vetoed an item, instead of a bill, to return it "within the first 10 days of the next regular session"—the next regular session.

Then, in the third place, the Constitution provides that if the vote of Congress shall be reaffirmed by a two-thirds vote of both branches, the bill shall become law notwithstanding the veto. The Senator, not satisfied with two changes to the Constitution, makes a third, and says that the item—

Shall be void unless reaffirmed by a majority vote of both Houses.

The Senator read the provision of the Constitution, but he did not emphasize the right places in it:

Every bill—

Bill, not item—

which shall have passed the House of Representatives and the Senate, shall, before *it* become a law, be presented to the President of the United States. If he approve, he shall sign *it*—

The bill—not an item—

but if not he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their Journal.

And so forth.

The Senator neglects that here. By the way, I was mistaken in my count; there is a fourth amendment to the Constitution, so glibly proferred. Under his amendment you need not enter the objections of the President to these items on the Journals at all and proceed to reconsider it.

If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered, and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays—

All this constitutional provision the Senator from Oklahoma, in a light, five-minute speech, repeals. The Constitution further provides:

And the names of the persons voting for and against the bill shall be entered on the Journal of each House, respectively. If any bill—

Not any item—

shall not be returned by the President within 10 days (Sundays excepted)—

Not 10 days after the next regular session, as the Senator's repeal of the Constitution reads—

after it shall have been presented to him, the same shall be a law.

But the truth is that the Senator from Minnesota [Mr. CLAPP] has taken the Senator from Oklahoma [Mr. OWEN] seriously, when the Senator from Oklahoma did not mean to be taken seriously. The truth is, there is hardly a better lawyer in this body than the Senator from Oklahoma, and there is not a man in this body who knows better than the Senator from Oklahoma does that except for mere purposes of delay it is useless to attempt to make four constitutional amendments in one night in the shape of one amendment to a special appropriation bill.

Mr. OWEN. Mr. President——

Mr. WILLIAMS. I yield to the Senator from Oklahoma.

Mr. OWEN. I merely wanted to say to the Senator from Mississippi, for the purpose of the RECORD, that the proposed amendment was offered very soberly, very seriously, and very deliberately, and will be insisted upon on other bills of like character from time to time, until the country realizes the importance of the proposed amendment.

I will answer the Senator on the constitutional aspects of the matter when he shall have concluded.

Mr. WILLIAMS. Very well. If the Senator can answer me he is even a better lawyer than I have thought him to be, even better than I have expressed myself so complimentarily. He has even more ingenuity as a lawyer, as a man who can "split hairs 'twixt the Nor' and Nor'west side," better than I have thought him capable of, and I have thought him capable of almost any measure of ingenuity of that sort. If he can fix it so that the President can disapprove an item in an appropriation bill, and thereby keep it from becoming law, instead of having to disapprove the whole bill, and then if he can go further and override the veto of an item—itself unconstitutional—by an equally unconstitutional majority vote instead of a constitutional two-thirds vote, and then if he can go yet further and give the President 10 days after the next regular session instead of the 10 days that the Constitution gives him after the bill reaches him, then I am willing to vote to put another item upon this public buildings bill—an item to erect a monument to the intellectual ingenuity of the Senator from Oklahoma.

The PRESIDENT pro tempore. The question is on the amendment to the amendment.

Mr. OWEN. Mr. President, the difficulty with the Senator from Mississippi is that he does not seem to be able to discriminate between the requirement of the Constitution relating to the veto and an act of Congress. There is a great difference between the constitutional provision relating to the veto and an act of Congress making a conditional appropriation. I will invite the Senator, when he reads the RECORD to-morrow, to scrutinize carefully his own language and see whether or not he is quite content with it.

This is a proposed provision of law which I offer. When it becomes the law by act of Congress and the approval of the President, the general constitutional provision relating to the veto has nothing to do with it. Therefore the brilliant witticisms of the Senator from Mississippi are quite irrelevant and, I might say, immaterial and void. The difficulty with the Senator from Mississippi is that he does not discriminate between the Constitution providing a rule with regard to the veto and a law of Congress making a conditional appropriation.

Mr. WILLIAMS. Is it a law of Congress making a conditional appropriation, or is it a law of Congress regulating the rules under which the President shall disapprove items in an appropriation bill? The Constitution regulates the manner in which the President shall disapprove legislative acts.

Mr. OWEN. The Constitution gives the President certain broad powers without regard to an act of Congress, but the acts of Congress, being the acts of the lawmaking body, with the approval of the President, prescribe a rule of conduct for the President, which is a legal provision and binding under the Constitution. The Senator from Mississippi can not put his hand upon a single provision in the Constitution which forbids this act of Congress prescribing the conduct of the President.

It is not necessary for me to argue the matter any further. It is so plain as to require no further argument.

The PRESIDENT pro tempore. The question is on the amendment to the amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is on the amendment.

Mr. SWANSON. What amendment is it, Mr. President?

The PRESIDENT pro tempore. It is the amendment relating to the memorial bridge.

Mr. SMITH of Georgia. I desire to offer an amendment, which I hope will solve the difficulties between us. I suggest that we strike out the provision appropriating $5,000,000 for this bridge and insert instead $1,500,000.

Mr. SWANSON. I accept that amendment.

The PRESIDENT pro tempore. The Senator from Georgia offers an amendment to the amendment, which will be stated.

The SECRETARY. On line 20, page 68, it is proposed to strike out "$5,000,000" and insert in lieu thereof "$1,500,000."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. OWEN. Mr. President, I offer an amendment, to come in after line 6, on page 69, which I send to the desk.

The PRESIDENT pro tempore. The Chair will say to the Senator that that amendment is not now in order, the Senate having agreed to act first upon the committee amendments. They are not as yet concluded. The Senator will be recognized after the committee amendments are acted upon.

The reading of the bill was resumed.

The next amendment of the Committee on Public Buildings and Grounds was, on page 69, line 7, to change the number of the section from "19" to "27."

The amendment was agreed to.

The next amendment was, on page 69, line 15, to change the number of section from "20" to "28."

The amendment was agreed to.

The next amendment was, on page 70, line 7, to change the number of the section from "21" to "29."

The amendment was agreed to.

The next amendment was, on page 74, line 20, before the word "free," to insert "in perpetuity," and in line 25, after the word "expense," to insert "In case of failure of the city of Pittsburgh to do any and all things necessary to proper fulfillment of this provision, the reservoir, pipe lines, and so much of the land adjacent thereto on the part of the reservation which is to be transferred to the said city as may be needed for rights of way shall revert to the United States," so as to make the proviso read:

Provided, That before the above-described transfer by the Secretary of War to the city of Pittsburgh shall become effective, and as an express further consideration for said transfer, and for the surrender by the United States of a perpetual water supply now obtained from a reservoir located on the lands so to be transferred, the city of Pittsburgh, through its proper officers, shall covenant and agree, at its own expense, and within a reasonable time, to tap, within that part of the Pittsburgh supply depot and reservation between Butler Street and the Allegheny River retained by the United States, the 42-inch water main belonging to the said city which now crosses the said reservation under a revocable license, and thereafter to furnish, in perpetuity free of charge to the United States, all the water needed for all purposes upon the said reservation, and shall also agree to keep its own water main, pipes, hydrants, and other necessary appurtenances now located or hereafter to be located upon the same in good condition and repair at its own expense. In case of failure of the city of Pittsburgh to do any and all things necessary to proper fulfillment of this provision, the reservoir, pipe lines, and so much of the land adjacent thereto on the part of the reservation which is to be transferred to the said city as may be needed for rights of way shall revert to the United States.

The amendment was agreed to.

The next amendment was, on page 75, line 6, to change the number of the section from "22" to "30," and in line 10, after the word "exceed," to strike out "$35,000" and insert "$40,000," so as to make the section read:

SEC. 30. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, additional ground adjoining the present site of the post office, customhouse, and courthouse at Utica, N. Y., at a cost not to exceed $40,000, and that for the purpose of beginning the enlargement, extension, remodeling, repairing, or improvement upon the present site and the enlarged site herein provided for of said post office, customhouse, and courthouse and other governmental offices in said building, the sum of $180,000 is hereby authorized: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said enlargement, extension, remodeling, repairing, or improvement at the sum hereby named, but the enlargement hereby provided for shall be constructed or planned so as to cost, complete, including fireproof vaults, heating and ventilating apparatus, not exceeding $365,000.

The amendment was agreed to.

The next amendment was, on page 75, line 23, to change the number of the section from "23" to "31."

The amendment was agreed to.

The next amendment was, on page 76, line 18, to change the number of the section from "24" to "32," and in line 20, after the words "sum of," to strike out "$100,000" and insert "$150,000," so as to read:

SEC. 32. That the limit of cost for the construction of an immigration station at Baltimore, Md., is hereby increased by the sum of $150,000 and such further sum as may be realized from the sale of the site heretofore acquired for said immigration station.

The amendment was agreed to.

The next amendment was, in the item of appropriation to limit the cost for the construction of an immigration station at Baltimore, Md., on page 78, line 21, after the word "deed," to insert "and to deposit the proceeds derived from such sale in the Treasury of the United States as a miscellaneous receipt," so as to read:

And the Secretary of the Treasury is further authorized and directed to sell, in such manner and upon such terms as he may deem for the best interests of the United States, the site heretofore acquired for said immigration station in the city of Baltimore, Md.; and to convey the last-mentioned land to such purchaser by the usual quitclaim deed, and to deposit the proceeds derived from such sale in the Treasury of the United States as a miscellaneous receipt.

The amendment was agreed to.

The next amendment was, on page 78, line 24, to change the number of the section from "25" to "33," and on page 79, line 11, after the word "apparatus," to insert "and approaches," so as to make the clause read:

SEC. 33. That for the purpose of beginning the enlargement, extension, remodeling, repairing, rebuilding, or improvement, upon the present site, of the United States post office and courthouse at Kansas City, Mo., so as to provide additional and necessary accommodations for the said post office, United States courts, and other governmental offices in said building, the sum of $150,000 is hereby authorized: *Provided*, That this authorization shall not be construed as fixing the limit of cost of said enlargement, extension, remodeling, repairing, or improvement at the sum hereby named, but the enlargement hereby provided for shall be constructed or planned so as to cost, complete, including fireproof vaults, heating and ventilating apparatus, and approaches, not exceeding $500,000.

The amendment was agreed to.

The next amendment was, on page 79, line 17, to change the number of the section from "26" to "34."

The amendment was agreed to.

The next amendment was, on page 79, after line 21, to insert as a new section the following:

SEC. 35. That the Secretary of the Treasury be, and he is hereby, authorized and empowered to convey, by quitclaim deed, the building formerly used for post-office purposes and now known as the "Old Exchange," in the city of Charleston, S. C., to the Order of Daughters of the American Revolution in and of the State of South Carolina, to be held by it as a historical memorial in trust for such use, care, and occupation thereof by the Rebecca Motte Chapter of said order, resident in the city of Charleston, State aforesaid, as the said chapter shall in its judgment deem to best subserve the preservation of said colonial building and promote the honorable and patriotic purpose for which the grant is requested.

The amendment was agreed to.

The next amendment was, on page 80, line 10, to change the number of the section from "27" to "36," and in the same line, after "36," to strike out:

SEC. 36. That section 30 of the act of Congress approved June 25, 1910 (36 Stat., p. 696), authorizing the enlargement of the site for the new post office, courthouse, and customhouse at Honolulu, Territory of Hawaii, be, and the same is hereby, amended in so far as to provide that, in addition to the limit of cost fixed for such enlargement of site by said act, the unexpended balance of the original appropriation for site shall be available for the acquisition of said additional land, together with the further sum of $75,000, which is hereby authorized to be expended from the amount heretofore authorized for the construction of said building, and the limit of cost for such additional land is hereby increased accordingly.

The amendment was agreed to.

The next amendment was, on page 80, line 24, to change the number of the section from "28" to "37."

The amendment was agreed to.

The next amendment was, on page 81, line 15, to change the number of the section from "29" to "38."

The amendment was agreed to.

The next amendment was, on page 82, line 7, to change the number of the section from "30" to "39."

The amendment was agreed to.

The reading of the bill was concluded.

Mr. OWEN. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the bill the following:

Provided, That any item in this bill returned to Congress disapproved by the President of the United States with his objections, at any time within the first 10 days of the next regular session thereof, shall be void unless reaffirmed by a majority vote of both Houses.

Mr. OWEN. I do not wish to detain the Senate by discussing this matter any further. I have already explained it. The veto of the President of the United States, of course, might be exercised against this whole bill in the way provided by the Constitution; but if he approves this bill it will be a part of the law prescribing his executive duties. It is plainly constitutional.

I ask for the yeas and nays upon this amendment.

The yeas and nays were not ordered.

The amendment was rejected.

Mr. SUTHERLAND. There are one or two amendments I desire to offer. On page 21, after the word "otherwise," I move to insert the word "of."

The amendment was agreed to.

Mr. SUTHERLAND. On page 261, after line 10, I move to insert:

The proceeds of such sale to be held in the Treasury and used, together with such further sum as may hereafter be appropriated, for the purchase of another site for a post-office building in said city of Pittsburg.

The PRESIDENT pro tempore. The Senator will insert a comma after the numerals.

Mr. SUTHERLAND. Yes.

The PRESIDENT pro tempore. Without objection the amendment is agreed to.

Mr. SUTHERLAND. In the section numbered 32 I move to strike out all down to and including the word "follows," on page 77, line 1, and to insert in lieu thereof:

That the limit of cost of the purchase of a site and the erection of an immigration station at Baltimore, Md., heretofore fixed at $130,000, be, and the same is hereby, increased to $280,000, and the Secretary of the Treasury is hereby authorized and directed to enter into contracts for the purchase of a site and the erection of a building or buildings in said city of Baltimore, Md., the cost of such building or buildings and site, including filling in for pier, grading, approaches, sea wall, incidental dredging, etc., but excluding furniture and furnishings, not to exceed the sum of $280,000;

That the piece of ground forming a part of the land acquired by the United States about the year 1836 as an addition to the grounds of Fort McHenry in the State of Maryland, which is described as follows.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

Mr. SMITH of Georgia. Mr. President——

Mr. SUTHERLAND. It does not increase the appropriation.

Mr. SMITH of Georgia. That is what I wanted to ask before the announcement was made.

The amendment was agreed to.

Mr. LODGE. On page 11, after line 22, I move to insert:

That the provision of the act of Congress approved June 30, 1906, fixing the limit of cost for the appraisers' stores building at Boston, Mass., be, and the same is hereby, amended so as to fix the limit of cost at $1,250,000.

Mr. SMITH of Georgia. Is that an increase?

Mr. LODGE. It is. I will explain it to the Senator. I received a notification from the Secretary of the Treasury only on February 20. Otherwise I should have brought it to the attention of the committee. It was after the bill had been reported. The Secretary of the Treasury wrote me—and I will print his letter in the RECORD—that the amount appropriated for this appraisers' stores building was $900,000. The site cost $444,000, and with the balance, $455,000, it is impossible to construct the building.

He says that in accordance with his estimate the building will be constructed as designed, including elevators and mechanical equipment and reserving an adequate amount for unforeseen contingencies, if the limit of cost is increased to $350,000. The Treasury Department advised $550,000, but I have asked for $350,000. I will add that it would bring the whole thing to a standstill. We are now paying $45,000 rent for an appraisers' stores building, and we would have to pay the interest on the land, which will lie idle, for nothing can be done.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Massachusetts.

The amendment was agreed to.

Mr. LODGE. I ask that the letter of the Secretary of the Treasury be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, February 20, 1913.

HON. HENRY CABOT LODGE,
United States Senate, Washington, D. C.

SIR: Referring to the proposed appraisers' stores building at Boston, Mass., I have the honor to advise you that the act of Congress of June 30, 1906, limited the cost of site and building to $900,000, all of which has now been appropriated. The total amount expended on account of site is $444,052.88, leaving a balance of $455,947.12 available for the construction of the building.

Under date of December 22, 1910, this department opened proposals for the construction, except elevators and mechanical equipment, of an eight-story and basement building, of 14,000 square feet ground area, but inasmuch as the lowest bid was $589,000 it was impossible to award a contract.

It is estimated that the building can be constructed as designed, including elevators and mechanical equipment, and reserving an adequate amount for unforeseen contingencies, by an increase in the limit of cost of $350,000. If the limit of cost was increased $550,000 it would be possible to add 2 more stories to the building, making 10 stories in all.

Respectfully, FRANKLIN MACVEAGH, *Secretary.*

Mr. SMITH of Georgia. On page 58, beginning in line 2, I move to insert so that the same will read:

In accordance with the plans to be approved by said commission, the total cost not to exceed the sum of $250,000.

The effect of that amendment would be to make the cost of the auditorium at Arlington $250,000 instead of $750,000.

Mr. SUTHERLAND. A bill appropriating $750,000 for that purpose has passed the Senate and it has passed the House. Both committees have considered it fully. The plans were prepared under an act of Congress by a commission appointed two or three years ago. Their plans have been very carefully drawn, the details and everything. I have them upon my desk. It would necessitate a rearrangement of the whole matter.

It is impossible to construct a building that would be at all adequate and suitable for the sum of money mentioned by the Senator from Georgia. It is absolutely necessary if this building is to be made at all appropriate that the amount inserted by the House, $750,000, should be retained. I therefore hope that the amendment will not prevail.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Georgia.

The amendment was rejected.

Mr. NEWLANDS. I offer an amendment as an additional section.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. It is proposed to add to the bill as an additional section the following:

SEC. —. That a commission composed of two Members of the Senate, to be appointed by the President of the Senate, and two Members of the House of Representatives, to be appointed by the Speaker of the House, shall, with the aid of the Supervising Architect of the Treasury and of the Commission of Arts and of a member of the Engineer Corps of the Army, to be appointed by the President, present to Congress a connected scheme, involving annual appropriations for the construction and completion of public buildings heretofore authorized within a reasonable time, and shall frame a standard or standards by which the size and cost of public buildings shall, as far as practicable, be determined, and shall report as to the adaptability in size, accommodations, and cost of buildings hitherto authorized to the requirements of the communities in which they are to be located, and also whether the existing appropriations should be increased or diminished to meet such requirements, and that the sum of $5,000 is hereby appropriated for the expenses of such inquiry.

Mr. NEWLANDS. I may add, Mr. President, that I understand in some cases there are authorizations for the construction of public buildings as much as 4 or 5 years old, where the construction has not been commenced, and that in many cases the requirements have changed, either diminishing or increasing.

Mr. SUTHERLAND. Mr. President——

Mr. NEWLANDS. I would suggest that this amendment be put upon the bill and be made the basis of a more complete provision by the committee of conference.

Mr. SUTHERLAND. I see no objection to the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Nevada.

The amendment was agreed to.

Mr. BRANDEGEE. I offer the amendment which I send to the desk.

The SECRETARY. On page 26, after line 10, insert the following:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to contract for the erection and completion of a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use and accommodation of the United States post office and other Government offices, on a site already acquired in the town of Middletown, State of Connecticut, the cost of said building, including said vaults, heating and ventilating apparatus, and approaches, complete, not to exceed the sum of $140,000.

Mr. BRANDEGEE. Mr. President, I wish to say very briefly, in explanation of the amendment, that the Representative in Congress from that district in Connecticut had an understanding with the Committee on Public Buildings and Grounds in the House of Representatives that that appropriation should go on for that city. He was a member of the Committee on Military Affairs and was called to the Isthmus of Panama on his official duties. While he was gone the committee, for some reason which I do not know, did not insert the provision in the bill, and when the Representative from the district returned from the Isthmus of Panama the bill had not only been reported from the committee, but passed by the House without this provision in it.

The people in the town concerned—Middletown, which I know very well—immediately got in communication with me about it, and I at once went to the chairman of the Senate committee, hoping to have it inserted by the committee here. But the committee of the Senate had closed the bill and reported it to the Senate, and I was unable to get any relief at all.

I want to say that the city of Middletown is the county seat of Middlesex County. It is one of the oldest cities in the State of Connecticut. It has a population of 30,000. It has 61 manufacturing industries, a steam railroad, two large State institutions. It is the seat of the Wesleyan University and of the Berkley University school. It is an enterprising and growing city. In view of the situation, both in the House and Senate, which I have outlined, I hope the chairman of the committee will see his way not to oppose this amendment, if the Senate desires to put it on the bill.

Mr. SUTHERLAND. Mr President, I dislike very much to oppose any amendment that is suggested, but if the bill is opened to amendment of that character I can assure the Senate that we shall add some two or three million dollars to the bill. I have had a number of Senators suggest to me that they desire

to offer amendments. I feel obliged to object to the amendment so far as I can, and I express the hope that it will not be adopted.

Mr. SHEPPARD. Mr. President, I can state that it was the intention of the committee to embody this proposition in the bill in the House, and it was omitted purely through some inadvertence.

Mr. BRANDEGEE. Mr. President, the Senator who was at the time the chairman of the committee corroborates me in stating it was the intention of the House Committee to put this item on the bill. It clearly is a case where, through inadvertence or some other reason with which I am not acquainted, justice was not done, and these people are deprived of the building which they otherwise would have had. Their Representative in Congress, or somebody else, is held responsible for the mistake. I ask for a vote on the amendment.

The amendment was agreed to.

Mr. POMERENE. On page 43, line 11, I move to strike out "$7,500" and insert in lieu thereof "$10,000."

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 43, line 11, in the item for Napoleon, Ohio, strike out "$7,500," and in lieu insert "$10,000."

The amendment was rejected.

Mr. PENROSE. I offer an amendment to increase the limit of cost. On page 8, after line 4, I move to insert:

United States post office at York, Pa., $15,000.

The amendment was rejected.

Mr. TOWNSEND. On page 24, after line 18, I move to insert:

United States post office at Boyne City, Mich., $65,000.

Mr. President, briefly this is an item for a public building at Boyne City, Mich., which has receipts of something over $10,000. I introduced a bill providing for this building, but somewhat late in the consideration of the public buildings bill by the committee, and yet it was in time if some unfortunate delays had not occurred and for which I was not responsible. The bill was referred to the department under the name of the junior Senator for Pennsylvania as its author, and I could not find it in that department when trying to speed its consideration there. I am sure the committee would have included this item in its report if it had been presented before the report was agreed to, for it is a most worthy case, and, besides, the Government has already appropriated $10,000 for a site in Boyne City, and good business judgment would seem to require the completion of a project already begun. I hope that the Senate's apparent decision to keep out all amendments providing for buildings not included in the committee report will be waived in this instance.

Mr. SMITH of Georgia. Will the Senator state what is the size of the city and the amount of its postal receipts?

Mr. TOWNSEND. Its total receipts are something over $10,000, and its population is something over 6,000. It is a growing city and is clearly entitled to this appropriation.

Mr. SUTHERLAND. Mr. President, of course, there could be suggested here amendments of this character for a good many million dollars in towns where the population and the post-office receipts would warrant the erection of a building. The committee had before it bills and amendments amounting to some $50,000,000. Of course, we could not permit any such amount to go into this bill, and we exercised our best judgment. The sums in the bill allowed to the various States amount to something over $8,000,000. I think we ought not to add anything more to this bill, particularly for the construction of new buildings. I hope that the Senate will vote down the amendment.

Mr. TOWNSEND. Mr. President, I should not have asked for it at this time, certainly, recognizing the duty and responsibility of the committee, if there had not been a site there already. I am urging it now because I feel that there was neglect about it for which I was not entirely responsible, because I felt very certain that the bill would be printed correctly. Had the name been properly printed and the report been here in time there would have been no question about it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. WILLIAMS. Mr. President, I move to amend by striking out "$20,000," in line 20, page 4, and substituting "$30,000" for it. I will briefly give my reasons for it.

Mr. SUTHERLAND. On what page?

Mr. WILLIAMS. On page 4:

United States post office at Laurel, Miss., $20,000.

I want $30,000.

The estimates from the architect's office were $80,000 if a brick and limestone facing building were erected; $90,000 if freestone or Georgia or other marble were used in the erection of the building.

The appropriation already made is $60,000. This bill carries an increase of $20,000, making $80,000. I want it to carry an increase of $30,000, which would make $90,000, and would accord with the estimate if freestone, Georgia, or other marble were used. The receipts of the office are $22,326.33.

The population of the city at the last census was something over 8,000, but I have written information from the postmaster of the city to the effect that the last year's school attendance and post-office patronage figures show 12,000, which is an increase since the estimate was made 18 months ago of nearly 50 per cent. The town of Laurel, unlike some of the other towns that were spoken of to-night, is not "growing by leaps and bounds," but it is growing by leaping plumb over all bounds. The rental for a post office now paid at the place is $405.50 a year. I ask for an increase of $10,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Mississippi.

The amendment was rejected.

Mr. POINDEXTER. On page 74, line 21, after the words "all the water needed for all purposes," I move to insert "of good quality for said purposes."

This is a matter in which I have no personal interest, but it was called to my attention by the War Department. In the provision in this bill for the supply of water from the city of Pittsburgh, from land which the Government has exchanged for land belonging to the city, there is no provision as to the quality of the water, some of which is for drinking purposes. I offer the amendment to cover that defect.

The amendment was agreed to.

Mr. SHEPPARD. On page 45, I move to add, after line 2:

United States post office at Georgetown, Tex., $5,000.

Mr. President, this amendment was intended to be offered by my colleague from Texas [Mr. CULBERSON]. He was compelled to leave the Chamber and asked me to present it for him. He is the ranking Democratic member of the committee, and was under the impression that the item had been embodied in the bill. He discovered after the bill was printed that it had been omitted.

The amendment was agreed to.

Mr. KERN. On page 46, at the end of section 5, I move to insert a colon and the following proviso:

Provided, That no contract authorized by any section of this act for the erection of post-office buildings or for the purchase of sites for such buildings shall be entered into, nor shall any public moneys be expended for such purpose until the receipts of such post office for which any such building or site is intended shall amount to more than $10,000 per annum.

Mr. President, this amendment, in accordance with a rule that has been observed in the House of Representatives for many years, provides that no public building shall be given to any town or city until the postal receipts amount to $10,000. The effect of this amendment will be to eliminate a number of towns and cities from consideration here, that are unworthy of consideration. I hope the amendment will prevail, and I should like to have a yea-and-nay vote on it.

The PRESIDENT pro tempore. The question is on the amendment, on which the Senator from Indiana demands the yeas and nays.

The yeas and nays were ordered.

Mr. FALL. Mr. President, the effect of the amendment, if adopted, would be to exclude from the benefits of this bill public buildings which are intended for post-office purposes primarily, but which would be used by the United States, in at least some portions of the country, for other governmental purposes, such as for public-land offices and for homes for the forestry reserve force.

Mr. SUTHERLAND. And for courthouses.

Mr. FALL. And for courthouses for holding court; and it would absolutely exclude them from the provisions of this bill.

Mr. KERN. This amendment only refers to buildings that are to be used as post offices.

Mr. FALL. Exclusively?

Mr. KERN. Exclusively for post offices.

Mr. FALL. If the Senator will put in the word "exclusively"——

Mr. KERN. I do not think it necessary. It refers to post-office receipts, post-office buildings, and post-office sites. It is not intended to refer to anything else. I am entirely willing to word it to convey that idea.

Mr. POINDEXTER. I should like to have the amendment read.

The PRESIDENT pro tempore. The amendment will be again read.

The Secretary again read the amendment proposed by Mr. KERN.

Mr. SUTHERLAND. I suggest to the Senator from Indiana that he ought to insert the word "exclusively" in his amendment.

Mr. KERN. I am entirely willing to do so and to add to the provision that it is intended to apply only to buildings and sites used exclusively for post-office purposes.

Mr. WARREN. Mr. President, I want to ask the Senator does he wish to include all of the sites where $5,000 might buy a site?

Mr. KERN. Unquestionably.

Mr. WARREN. Which two years hence it might take $10,000 to buy.

Mr. KERN. Whenever we buy the site we are expected to erect a building. The purpose is to stop this raid in so far as it applies to these small towns.

Mr. WARREN. I will say to the Senator that in the growing towns—it takes, of course, all of these matters from four to five years after the site is bought—the faster the town grows the faster the price of land advances. It would make it very expensive in some cases to wait until the time when the land was needed, while it might be very cheaply bought if taken in advance.

Mr. KERN. Then, that is an argument against the proposition.

SEVERAL SENATORS. Question!

The PRESIDENT pro tempore. The amendment as modified will be stated.

The SECRETARY. It is proposed to amend by striking out the period at the end of section 5, on page 46, inserting a colon, and adding the following:

Provided, That no contract authorized by any section of this act for the erection of buildings to be used exclusively as post offices or for the purchase of sites for such buildings shall be entered into, nor shall any public moneys be expended for such purpose, until the receipts of such post office for which any such building or site is intended shall amount to more than $10,000 per annum.

The PRESIDENT pro tempore. The question is on the amendment as modified.

The amendment as modified was agreed to.

Mr. CHAMBERLAIN. I offer an amendment, to come in on page 21, line 8, to increase the appropriation there from $100,000 to $150,000.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Oregon will be stated.

The SECRETARY. On page 21, line 8, it is proposed to strike out "$100,000" and in lieu thereof to insert "$150,000," so as to read:

United States post office at Roseburg, Oreg., $150,000.

Mr. CHAMBERLAIN. Mr. President, in reference to the proposed amendment, I desire to say that at Roseburg they have a land office, and they are compelled to occupy separate buildings from the post office. The weather bureau is there, and a number of the foresters are situated there, and all of them occupy different buildings, at quite a considerable expense. I understand the estimate that was made by the Government for this building exceeded $100,000, but the House kept the amount appropriated down to $100,000. The Government owns the site; and it seems to me it would be a matter of economy to make the appropriation $150,000. The receipts of the office at this time are something over $18,000 per annum. The town has a population of something like 5,000.

Mr. SUTHERLAND. One hundred thousand dollars is a pretty good appropriation for a town of that size, I suggest to the Senator.

Mr. CHAMBERLAIN. If that is to be the criterion of appropriations here, it would apply to many appropriations found in this bill, because there are a great many buildings that have been appropriated for in amounts in excess of $150,000 where the towns do not have as much as $18,000 of postal receipts, and I doubt very much if in many cases they have as much as $10,000. It is a poor rule that will not work both ways. Here a site has been obtained, the Government has made the estimates, and the other House has placed the appropriation in this bill at less than the estimates which were made. We have not asked very much from the committee, and I trust this will be granted.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Oregon.

The amendment was rejected.

Mr. SMITH of Michigan. Mr. President, I have a good case here. I greatly desire a public building for the city of Calumet. It would serve nearly 50,000 people. The post-office receipts are between $30,000 and $40,000 annually. It serves numerous mining towns, including Red Jacket and Laurium, in the vicinity of Calumet. Calumet has no adequate post office. It has recently gone slightly Democratic, and this should invite assistance from the other side of the Chamber who seem so critical of this bill, and that is the worst thing I can say about it. [Laughter.]

Mr. SUTHERLAND. Then it does not need any post office.

Mr. SMITH of Michigan. Yes; I insist we want a public building at Calumet, and we ought to have it. I propose this amendment, and I hope it will be unanimously voted into the bill.

Mr. POMERENE. Does the Senator from Michigan guarantee that Calumet will stay Democratic if it gets this new post office?

Mr. SMITH of Michigan. Well, that will depend upon the attitude of the distinguished Senator from Ohio and his associates. The intelligent people of Calumet are appreciative as well as discriminating, and I would strongly advise my friends upon the other side to rally to their support. Mr. President, I desire the following letter read, showing the importance of this community.

The PRESIDENT pro tempore. The Secretary will read as requested.

The Secretary read as follows:

CALUMET, MICH., *February 21, 1913.*

Hon. WILLIAM ALDEN SMITH,
Washington, D. C.

DEAR SENATOR: Replying to your telegram of the 19th instant, I wish to call your attention to a few of the reasons why Calumet needs a Federal building, viz:

The post-office quarters at Calumet, Mich., are inadequate. No larger, suitable quarters are available.

The present post office serves a population of 25,000.

Incoming and outgoing mails are handled in a single room 24 by 82 feet in dimensions.

Part of this room is used for a lobby.

In the remainder of this small room provision must be found for 11 regular carriers, 1 parcel-post carrier, and 5 clerks. They are so closely crowded that their efficiency is impaired.

The growing parcel-post business is helping to create confusion caused by lack of room.

Twelve mails are received daily. There are nine dispatches of mails, of which four are "R. P. O.'s," made each day.

The Calumet postal receipts are $30,000 annually. The money-order business is approximately $250,000 annually.

From a business standpoint a Federal building in Calumet would be a good investment, for it could be made to serve a much larger population, cutting out part of the expense of several outlying post offices, including Laurium, Osceola, and Kearsarge.

The mines tributary to Calumet produce annually 150,000,000 pounds of copper, valued in the present market at from $22,000,000 to $25,000,000. Expenditures for wages and other local expenses amount to between $12,000,000 and $15,000,000 per year. The mining industries employ from 11,500 to 12,000 men, supporting a population of over 35,000 people.

Only part of the Calumet district is served by the present Calumet post office. With a building of adequate size the entire population of over 35,000 could be well taken care of and easily reached from one central office.

The Calumet territory, 1½ miles east and west by 2½ miles north and south, is one compact community, in the geographical center of which is Red Jacket village, where the Calumet post office is now located. It also includes Calumet and Hecla mining location, Laurium village, Centennial mining location, Centennial Heights, Kearsarge, and Wolverine mining locations, Tamarack mining location, Osceola mining location, Tamarack Junior and Florida location.

The populations of these locations are as follows:

Red Jacket village	4,211
Laurium village	8,537
Calumet Township, including Calumet and Hecla mining location, Centennial, Centennial Heights, Tamarack Junior, Kearsarge, Wolverine, and Florida location (not including Red Jacket and Laurium villages)	20,097
Osceola location	1,200
Tamarack location	1,500

Postmaster Charles J. Wickstrom, of Calumet, says regarding the need of a new Federal building:

"The post-office quarters at Calumet, Mich., have been entirely inadequate for a long time and are becoming more so since the establishment of the parcel post service, which is constantly growing. The department now has the dimensions of the room and all information pertaining to the post office. They were submitted about two years ago.

"We are making 9 dispatches each day, of which there are 4 R. P. O.'s, and we are receiving 12 mails daily. On account of the large territory that has to be covered by carriers, we have 11 carriers, whose efficiency is impaired by crowding, as may be judged by the dimensions of the room in which they work, which are on file.

"Our postal receipts are $30,000 per annum and our money-order business is approximately $250,000 per annum."

Calumet is a permanent community. Its mines, which have been operating for almost half a century, show no signs of exhausting the mineral deposits, and new developments and new mine openings made in recent years insure the community of a glorious future.

The bank deposits within the territory above described on February 4, 1913, were over $7,800,000.

Senator, if it is your desire to have a petition generally signed by the people of the community, arrangements can be made to have it done immediately, and we are certain that it will be very largely signed, as our people are very much interested and are thoroughly wrought up about this matter.

Respectfully,

F. H. SCHUMAKE,
Mayor Red Jacket, Calumet, Mich.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Michigan will be stated.

The SECRETARY. After line 4, on page 30, it is proposed to insert:

United States post office at Calumet, Mich., $200,000.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Michigan.

The amendment was rejected.

Mr. SMITH of Michigan. Mr. President, the Senate, I think, has not entirely lost its sense of proportion and fitness in the perfection of this bill. I now move that we authorize the purchase of a site at Calumet, Mich., for a public building, and ask $25,000 for that purpose. Surely this will not be denied.

Mr. BRISTOW. Make it $10,000.

Mr. SMITH of Michigan. No; I will make it $20,000, Mr. President, if Senators will now come to my support.

The PRESIDENT pro tempore. The Senator from Michigan proposes an amendment, which will be stated.

The SECRETARY. Under the heading of "Sites for post offices," it is proposed to insert:

For post office at Calumet, Mich., $20,000.

The PRESIDENT pro tempore. The question is on the amendment.

The amendment was agreed to.

Mr. STONE. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. On page 12, after line 4, it is proposed to insert:

For one additional mail lift and one combination freight and passenger elevator, and for additions to mail apparatus and other improvements at the new city post office, St. Louis, Mo., to be immediately available, $47,550.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. STONE. Mr. President——

Mr. SUTHERLAND. Mr. President, has the Senator had an estimate for that item?

Mr. STONE. I was about to state that I had when some Senator said that the amendment had been agreed to.

The PRESIDENT pro tempore. The question is upon the amendment.

Mr. STONE. I thought it had been agreed to.

The PRESIDENT pro tempore. The Senator was mistaken.

Mr. STONE. I will agree not to make a speech if it is agreed to.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Missouri.

The amendment was agreed to.

Mr. CLAPP. Mr. President, some time ago my colleague [Mr. NELSON] proposed an amendment to this bill, which he had printed and referred to the committee. He was unable to remain here this evening, and asked me to present it. I realize that the hour is late, but I trust that that will not interfere with the Senate giving the amendment due consideration. I send it to the desk to be read.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. At the proper place in the bill it is proposed to insert:

That the Court of Claims of the United States shall, upon petition and motion duly made by the Secretary of the Interior or the National Automatic Fire Alarm Co., of Washington, D. C., the contractor, under contract with the said Secretary of the Interior duly authorized by Congress, bearing date of December 17, 1903, to install and place in the various buildings of the Government Hospital for the Insane an automatic thermostatic fire-alarm system, the same having been placed therein under said contract by said company, and a temporary receiver duly appointed by said court with the tacit consent of said department to complete the construction thereof, after first having given notice of such motion to the parties in interest, inquire into, hear, and forthwith determine the following issues of law and fact now pending and unsettled between the said parties to said contract in order that said system may at once be put into operation for the protection of said buildings and the inmates therein confined against fire—full jurisdiction being hereby conferred upon said court to carry into effect the provisions herein contained:

First. Whether or not the said contract of December 17, 1903, above referred to, has been performed according to its terms and requirements by the said contractor or by the said receiver, and whether or not, in law and in fact, the work required and done under said contract by said contractor and by said receiver has been or should be accepted by the United States as properly and fully performed; and if not, what further obligation, if any, rests upon the contractor in connection therewith and the cost of discharging the same.

Second. Whether or not the United States under and by virtue of the terms of said contract of December 17, 1903, became and is the absolute owner of said system as installed and placed and of the right to use and operate the said system and the patent rights thereinto entering without further right of compensation to the contractor or to any other person claiming adversely, and also what their respective rights are under said contract and the value thereof to the United States of such as are not now owned by it.

The said Court of Claims shall, after considering and determining the questions submitted, report and certify the findings and opinions to Congress at the earliest practicable date; and shall also certify the amount of court costs incurred solely by reason of the proceedings had hereunder.

That the said Court of Claims is hereby given full power and authority to call upon the Supreme Court of the District of Columbia for such information and papers as it shall deem necessary to carry out the provisions hereof.

Mr. SUTHERLAND. Mr. President, I am very familiar with that proposed amendment. It evidently does not belong on this bill.

Mr. CLAPP. Was it not through inadvertence that it was omitted from the bill?

Mr. SUTHERLAND. No; it does not belong in the bill at all.

Mr. CLAPP. It relates to a claim growing out of the construction of a public building.

Mr. SUTHERLAND. But this is a bill authorizing public buildings, sites, and matters of that kind.

Mr. CLAPP. But before we authorize the construction of new buildings we ought to pay for those we have already erected.

Mr. SUTHERLAND. It is simply providing for a method of settling a dispute between the Government and some individual.

Mr. CLAPP. It grows out of a building.

Mr. SUTHERLAND. Yes; but it does not belong on this bill any more than if it grew out of something else, and I make the point of order against the amendment.

The PRESIDENT pro tempore. On what ground?

Mr. SUTHERLAND. It is not germane and it is a private claim.

The PRESIDENT pro tempore. Neither of those points would lie. This not being a general appropriation bill, the question as to whether an amendment is germane or not does not apply; nor is there any inhibition against a private claim being attached to any bill except a general appropriation bill. Hence, the point of order is overruled. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. OWEN. On page 76, lines 11 and 12, I move to strike out the words:

And no person now in the employ of the Supervising Architect's Office shall be eligible to such employment.

The bill as it is drawn would prevent any architect who might possibly be employed in the Supervising Architect's Office from being eligible to serve in these positions, which are being created for the purpose of designing and standardizing public buildings. I think the provision limits the authority of the Government to employ men who might be entirely fit and who are already in the Government service and familiar with Government buildings.

Mr. SUTHERLAND. Mr. President, this is a House provision for the employment of men at salaries of from $5,000 to $6,000 a year, as I recall, under the Supervising Architect. I think no employees in that office now are paid more than $2,000. Am I correct in that, I will ask the Senator from Texas?

Mr. SHEPPARD. That is probably the maximum.

Mr. SUTHERLAND. The maximum is $2,000.

Mr. SHEPPARD. Something like that; not over $2,500.

Mr. SUTHERLAND. They are men who are evidently not sufficiently expert to be employed in such positions. The Supervising Architect himself agrees that this amendment is proper. These architects have got to be selected from outside of the office, and we simply want to prevent any man who is not qualified to fill that position from being selected. I think it is a very wise provision and that it ought to remain in the bill.

Mr. OWEN. It does not seem right to exclude the possibility of advancement of men who are already in the Federal service.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. SMITH of Georgia. I suggest that when the Senate adjourns to-day it adjourn to meet at 12 o'clock noon to-morrow.

Mr. WARREN. Mr. President, I hope the Senator will not do that. We have two very large and important appropriation bills ready for to-morrow.

Mr. SMITH of Georgia. Very well.

Mr. NEWLANDS. I inquire if the bill is now in the Senate?

The PRESIDENT pro tempore. The bill has not yet been reported to the Senate.

Mr. JONES. Mr. President, I have waited patiently until these various good amendments have been passed upon by the Senate, and I now present one that is most meritorious.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 23, line 24, it is proposed to strike out "$300,000" and insert "$1,250,000," so as to read:

United States post office at Seattle, Wash., $1,250,000.

Mr. JONES. Mr. President, I am satisfied that when the Members of the Senate understand the necessity for this amendment they will adopt it, because they want only provisions of merit, in the interest of the Government, in this bill.

The situation at Seattle is as follows:

We had a population of about 70,000 when provision was made for the public building we now have. It has become wholly inadequate, just as we thought it would at the time it was provided for. We had a population at the time of the census of 1910 of 237,000 instead of the 70,000 people when our building was given. The Government necessities have increased accordingly. Our post-office receipts in 1902 were $233,000. Now they are over $1,000,000. We have a site that was purchased at a cost, I think, of one hundred and sixty-odd thousand dollars. The present post office is away up in the town, far away

from the railway station. The site we have purchased is near the railway station. It is estimated that we will save the Government about $100,000 every year in the transportation of the mails that come into Seattle when we get the post office on the new site near the station. That is because there is a large amount of foreign mail, oriental mail and Alaskan mail, that comes into Seattle that has to be carried from the station up to the present post office, sorted, distributed, and then carried back to the station. This would all be avoided if the post office should be located at the new place. Cars of mail could be run into the new building, prepared for transmission, and sent out, and the cost of taking it uptown and back, as now, would be saved.

Then we need quarters for Government offices now without quarters—for the Bureau of Investigation, the Internal-Revenue Bureau, the Customs Service, the Steamboat-Inspection Service, the Bureau of Mines, the Geological Survey, the Pension Office, the Forest Service, the Weather Bureau, Army departments, and several other offices for which the Government has to rent quarters in private buildings.

It now costs about $100,000 a year to take the foreign and Alaskan mail and the mail for the southern part of the city to the present post office and bring it back. This would all be saved. We are now paying nearly $20,000 a year in rent. By making this appropriation now we will save almost the increase in six or seven years. Refuse it and these extra expenses will continue to increase.

Upon this showing it seems to me we ought to adopt this amendment. Three hundred thousand dollars will not build a suitable building there. It simply means that the $300,000 will lie idle until we get another public buildings bill, when it must be increased. This will be two or three or more years, and this annual expenditure to which I have referred will go on. The department estimates that the cost of the building, simply for post-office purposes, would be $750,000, and that the cost of erecting a suitable building for all the Government offices for which we need quarters would be $1,250,000. I am reading from the department letter.

We already have our site, in which we have invested nearly $200,000. If Congress does not increase this appropriation, it will simply rest until we get another public-buildings bill to increase the appropriation, and meanwhile we will pay out possibly $100,000 a year that we can save by the early construction of this building. So it seems to me it is a matter of economy, and for the benefit of the Government, to make a sufficient appropriation now to erect the building required by the needs of the Government. I hope the amendment will be agreed to.

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Washington.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. SUTHERLAND. Mr. President, I ask that the Secretary be authorized to correct the section numbers.

The PRESIDENT pro tempore. That will be done.

Mr. NEWLANDS. Mr. President, the Senator from Oklahoma [Mr. GORE] suggests that the joint committee of the Senate and House, consisting of two Members of each body, which was to make a certain investigation, should be increased by adding to it the Secretary of the Treasury, the Postmaster General, and the Attorney General, for whose departments most of the buildings will be constructed. I have consulted with the chairman of the committee, and he has no objection to adding those names. I will ask unanimous consent that their names may be added to this provision.

The PRESIDENT pro tempore. The Senator reserves that amendment, then, and moves to amend it as he has stated. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROOT. Mr. President, I move to amend by inserting, after section 12, section 13 in the original form in which it was reported by the committee. That is the provision for the Red Cross building.

I think, Mr. President, that when the Military Order of the Loyal Legion and the Red Cross come with a proposal of this kind, and with half of the money raised themselves to carry out the project, they are entitled to a vote of the Senate upon their proposal. I ask that the Senate give that vote. If the Senator is unwilling to agree to the proposal, well and good; but I think there ought to be a vote.

Mr. CRAWFORD. Mr. President, when this matter was up a while ago I was one of those who voted to strike out the word "loyal." I did not understand the history of the proposed legislation at that time; that is, I did not understand that the initiative had been taken by this legion and its proposal to raise $300,000. To my mind, it was a beautiful conception for the Government to assume the entire obligation and to pay for this building and to turn it over to the noblest possible work that can be engaged in by human beings—that carried on by the Red Cross Society. It seemed to me to be a beautiful conception that it should be dedicated to the women and their sacrifices; and I was glad and enjoyed and was in sympathy with every word said in that respect and voted that way.

But later I learned what I did not fully appreciate then—that the initiative in this matter comes from the Loyal Legion and its proposal to contribute $300,000, and that its initiative has resulted in this proposal. That really puts a different phase upon the situation with reference to this proposal.

I should like to see the provision go in as it once before passed the Senate, I understand. On that account my vote will be different than it was before.

Mr. WILLIAMS. Mr. President, having stepped into the cloakroom for a moment to take a smoke, I was very much surprised when I came out to find that a motion had been made to strike out this entire provision. The Senate had passed upon it; the Senate had amended it; the Senate's amendment had lent it a broader and a more national meaning than that with which it came from the committee, and I felt almost outraged by the idea that the entire provision had been stricken out on a viva voce vote, without an opportunity for me to call for the yeas and nays. I would rather this provision were passed in the shape in which it was originally presented to the Senate than not passed at all.

I do not think it is right; I do not think it is fair; I think it is exceedingly sectional and unfair, just because some organization upon one side or the other has taken the initiative in a matter of this sort, to appropriate the public money collected from the people of the Southern as well as the Northern States to celebrate and commemorate the heroism and the constancy of the women of some of the States of the United States, while expressly leaving out the women of the other States of the United States.

What the Senate did was done upon my motion. What the Senate did was right, and ought to have been done. The fact that somebody "initiated" the original proposition has nothing to do with it. You know as well as I do that if a league of Confederate veterans or a society of Confederate women had come here contributing $300,000 and asking you to appropriate the other $400,000 you would not have done it. You would have refused to do it upon the ground that it was sectional.

I repeat what I said earlier in the evening—that this Union no more belongs to the North than it does to the South. It no more belonged to the North before the war than it did to the South. It no more belonged to the North after the war than it did to the South. So far as the phrase "United States" is concerned, it meant nothing during the four years of war between the States. There were then temporarily a couple of congeries or groups of formerly united and subsequently reunited States, temporarily disunited; and the only advantage that you had of us was that a majority of the States were on your side. The United States is just as much my heritage and my present enjoyment as it is yours.

I shall move to substitute for the amendment proposed by the Senator from New York [Mr. ROOT] the provision as it was adopted by the Senate. If that motion to substitute shall fail, I shall then vote for the amendment offered by the Senator from New York, because I am not willing to put myself in the attitude of not paying due tribute to noble and heroic women anywhere simply because I can not include all the noble and heroic women of the Union. But I do say that if you pass it in that form you are narrow, you are sectional, you are selfish, and you had better quit talking about "bridging the bloody chasm" and "a reunited Nation" and "the whole country being together again." You thereby confess that it is all lip service.

You were no more the "United States" for four years than we were. Neither of us was. We were the disunited States, warring with one another in a most unfortunate war. But I want to make the announcement that if my substitute shall fail I would rather pay tribute to the women of the North during that war than to refuse to pay tribute to any of the noble women at all.

I move, Mr. President, that the provision as it passed the Senate be substituted for the amendment proposed by the Senator from New York.

Mr. BRADLEY. Mr. President, I want to say just one word in explanation of my vote. I voted for the amendment offered by the Senator from Mississippi [Mr. WILLIAMS], not understanding the facts of the case. I am similarly situated with the Senator from South Dakota [Mr. CRAWFORD].

I want to say that I come from a State which, while it remained in the Union, was very much divided in sentiment during the war. No man in this great country of ours respects more the heroism of the women of the South who were friends of the Confederacy than I, and no man will vote more readily

to erect a monument in honor of those women. I think, however, that the matter should not be included in this bill.

This idea of honoring the loyal women of the United States was conceived by the Military Order of the Loyal Legion, of New York. They proposed to give and have given for that purpose $300,000, and they ask the Congress of the United States to give $400,000 for the purpose of completing the memorial. I think it would not be treating them with the proper respect to strike out the word "loyal" in this bill, and to take from them the credit to which they are entitled.

I am one of those who long ago came to the conclusion that the war was over. There is no bitterness in my heart. There never was. I believe we should forget all the asperities and troubles of the past, and that as one people we should hold in grateful remembrance all the glory of that trying period on both sides of the great conflict which made all men free and which preserved every star on the Nation's flag.

I make this explanation, and I want to say to my friend from Mississippi that if he should introduce a bill of the character he described awhile ago I will not be one of those who will vote against his measure, but will support it with my heart and vote, and I shall pray and hope that that bill may be passed.

Let us forget sectionalism. The way to forget it is not by striking from this bill under the circumstances the word "loyal." "Loyal" is not a disreputable word. "Loyal" is an honorable word. To be loyal to your country, to be loyal to the North, to be loyal to the South, to be loyal to your principles, to be loyal to your friendships, is the highest mark of patriotism and the most exalted mark of personal honor.

Mr. President, I gave that vote under a mistake, but I do not want to be misunderstood as to my position. I have tried to make it clear. I shall vote for the amendment proposed by the Senator from New York.

Mr. WILLIAMS. Before the Senator from Kentucky takes his seat I should like to ask him a question. Do you think that the Loyal Legion would feel hurt or could feel hurt——

Mr. BRADLEY. I do not know that they would be hurt, but I do think——

Mr. WILLIAMS. Wait a minute.

Mr. BRADLEY. I do think that they would have the right to be offended.

Mr. WILLIAMS. Do you think they would be hurt or could be hurt in their feelings or would have the right to feel hurt, either one of the three, if the Congress of the American Nation said to them, "Keep your $300,000; devote it to whatever purposes you please; devote it to another monument elsewhere to these very people, if you wish, or to needy Union veterans. We will build a monument, a beautiful memorial structure in keeping with your idea, to the heroic women of the entire United States, not merely a part of the United States. You can keep the money; you can devote it to another monument here or elsewhere. Congress will grant you the site for that, as Congress always does." Do you think they would have any right to feel hurt if we said that to them?

Mr. BRADLEY. Mr. President, I think, under the circumstances, to change this amendment as it was offered would be to say to these men of the Loyal Legion, "It is true that you have conceived this beautiful and patriotic idea, but we propose in the Senate of the United States not to praise you, but to blame you, for what you have done. We scorn your assistance. However honorable may be your motives, we ignore them, we put them behind us, and we propose to erect this monument without any help from you." I think it would be an insult to that organization.

Mr. WILLIAMS. Mr. President, the Senator says that we would say to the Loyal Legion, "It is true you have conceived this idea." I think he might have gone further and said, "It is equally true that we have conceived a much more beautiful idea, a much broader idea, a much more national idea, and a much more American idea. If, as you gentlemen pretend, you love your brethren of the South and the bloody chasm has been bridged; if you mean that; if it is not mere lip service; you will be glad to have the heroism and constancy and devotion of the southern women celebrated with your own, and the more especially because you will have $300,000 left in your treasury to celebrate, according to your own ideas, upon private monuments here and there, anything that you choose, including a special monument to your own special women."

The Senator says he "wants to forget." I do not want to forget, because I have no reason to forget. If I knew personally the man who shot my father upon the battlefield I would feel no personal antagonism against him. He was doing his duty as he understood it; and my father would have shot him if the chances had been different.

But the right way to "forget" differences is not to emphasize differences. This vote, which by a single word cuts off the commemoration of the heroism and devotion and nobility of the women of one-third of the Union, is not the way to "forget" the differences. It is the way to emphasize them.

The gentleman speaks of "insulting" the Loyal Legion. This idea of an insult will be construed by many a good woman in the South as an insult to her, and she will have much more reason to think it and say it than the Senator had to say that it was an insult to the Loyal Legion.

We are either one people or we are not. If we are stepchildren in the American Union, let us know it. If we constituted before the war and after the war a part of the United States, as I firmly believe we did, and if we did constitute during the war a part of the disunited States, as no man with common sense can deny, then you have the power, but you have no right, to use the common Treasury of all the people—contributed by us as well as by you—for the purpose of emphasizing an old, sanguinary, fratricidal strife that ought to be buried in an ocean of forgetfulness.

But I move now, Mr. President, to substitute for the amendment for the motion made by the Senator from New York the provisions of the bill as they passed the Senate amended tonight. I repeat that if that amendment shall fail I shall then vote for the motion of the Senator from New York, for I no more sympathize with narrow sectionalism on this side of the Chamber than on that.

The PRESIDENT pro tempore. The Senator from Mississippi moves to amend the amendment as follows.

Mr. PERCY. Mr. President——

The PRESIDENT pro tempore. Will the Senator from Mississippi allow the amendment to be stated?

Mr. PERCY. Certainly.

The SECRETARY. Amend the first paragraph of section 13 as offered by the Senator from New York, as follows: Instead of the words proposed by the Senator from New York insert:

That the acquisition by the commission hereinafter mentioned of a site and the erection thereon of a memorial building in the District of Columbia to commemorate the services and sacrifices of the women of the United States during the Civil War is hereby authorized. The said building shall be monumental in design and character, and shall be used as the permanent headquarters of the American Red Cross, and shall cost, with the site, no less than $700,000, which sum the United States shall contribute.

Mr. PERCY. Mr. President, without desiring to prolong this discussion at all, I only want to say that I can not agree with the view so forcibly presented by my colleague [Mr. WILLIAMS]. I believe that we either ought to accept or reject the offer of the Loyal Legion just exactly as it was made, and not mutilate it or pervert it from the purpose for which it was made.

Feeling that way, I shall vote against the substitute, and I shall then vote against the motion of the Senator from New York.

Mr. SMITH of Georgia. Mr. President, could we not leave out the words "during the Civil War" and leave it preferably to read "the loyal women of the United States"?

What does this provide for? It provides for the permanent headquarters of one of the greatest organizations in the United States, composed of the women of this country without regard to section—the women south of the Potomac as well as the women north of the Potomac.

Would it be pleasant, I desire to ask Senators on the other side, to make the permanent headquarters of the Red Cross a building erected even by money raised in the States of Virginia and North Carolina and dedicated to the loyal women of the South during the Civil War? Would not that be unpleasant to the members of the Red Cross descended from the loyal daughters of the North during the Civil War?

Is it not an unhappy thought to take the Red Cross and connect it permanently with a building dedicated to the honor of the women of one part of the country? I would not ask the Senators on the other side to vote to put the Red Cross in a building dedicated exclusively to the memory of the women of the South. I do not think it right for them to ask that this association shall be placed in a building dedicated to the memory of the women of the one part of our country, because the association is composed of members descended from the women of all parts of our country.

I do not wish to vote to strike out the word "loyal," because I would regret to be put in the position of not being gratified to pay every tribute to the loyal women of the North. But, I think, the plan of the proposed building unhappy. If it was simply to dedicate something here to the loyal women of the North it would be all right, but to put into that building a great organization that has members from all sections and fasten upon it the stamp of disapproval of the women of a part of the country, I think such action inexcusable.

The PRESIDENT pro tempore. The question is on the amendment to the amendment.

Mr. STONE. Let the question be stated.

The PRESIDENT pro tempore. It will be stated again.

The SECRETARY. In lieu of so much of the amendment offered by the Senator from New York as is contained in the first paragraph of section 13, insert the following as that paragraph:

That the acquisition by the commission hereinafter mentioned of a site and the erection thereon of a memorial building in the District of Columbia to commemorate the services and sacrifices of the loyal women of the United States during the Civil War is hereby authorized. The said building shall be monumental in design and character and shall be used as the permanent headquarters of the American Red Cross, and shall cost, with the site, not less than $700,000, which sum the United States shall contribute.

Mr. WILLIAMS. Upon that substitute I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SMITH of South Carolina. I should like to ask the Senator from Mississippi if his amendment proposes the elimination entirely of the proposed contribution by the Loyal Legion.

Mr. WILLIAMS. Yes.

Mr. SMITH of South Carolina. I want it to go into the RECORD, because this question is so important I want to make the statement that if we are going to accept this gift from the Loyal Legion the word "loyal" should attach to it. If we are not going to accept it, then I think it should be to all the women. I do not believe that the Red Cross should be mixed up in a question that would involve sectional ideas. If it could be divorced from that I might not oppose it, but I must vote against the idea of getting a great universal organization of mercy mixed up in this way.

Mr. WILLIAMS. Will the Senator allow me?

Mr. SMITH of South Carolina. It will only create a feeling in a section on account of the sectional idea. With that explanation of my vote the roll may be called, so far as I am concerned.

Mr. WILLIAMS. The Southern women are members of the Red Cross.

The PRESIDENT pro tempore. The roll will be called on agreeing to the amendment of the Senator from Mississippi [Mr. WILLIAMS] to the amendment.

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER], and I withhold my vote.

Mr. DILLINGHAM (when his name was called). Again I announce the transfer of my pair with the senior Senator from South Carolina [Mr. TILLMAN] to the Senator from Wisconsin [Mr. STEPHENSON] and vote. I vote "nay."

Mr. PERKINS (when his name was called). I transfer my pair with the junior Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Massachusetts [Mr. CRANE], and vote "nay."

Mr. SMITH of Michigan (when his name was called). I make the same announcement as on the last vote, and vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again announce my general pair and a transfer to the Senator from Tennessee [Mr. WEBB] and vote. I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement I have heretofore made in reference to the transfer of my pair, I vote "nay."

Mr. WARREN (when his name was called). I transfer my pair with the Senator from Louisiana [Mr. FOSTER] to the Senator from South Dakota [Mr. GAMBLE], and vote "nay."

The roll call was concluded.

Mr. CHAMBERLAIN. I transfer my general pair to the junior Senator from Maine [Mr. GARDNER] and vote. I vote "yea."

Mr. SMITH of Georgia. I really desired to refrain from voting, but as it may be necessary to make a quorum, I will vote. I vote "yea."

The result was announced—yeas 22, nays 28, as follows:

YEAS—22.

Bankhead	Kern	Poindexter	Smith, S. C.
Bryan	Lea	Sheppard	Stone
Chamberlain	Martin, Va.	Shively	Swanson
Fletcher	Martine, N. J.	Smith, Ariz.	Williams
Gore	Newlands	Smith, Ga.	
Jones	Pittman	Smith, Md.	

NAYS—28.

Bradley	Crawford	O'Gorman	Smith, Mich.
Brady	Cummins	Page	Smoot
Brandegee	Dillingham	Paynter	Sutherland
Bristow	Fall	Penrose	Thomas
Burnham	Gallinger	Percy	Townsend
Clapp	Kenyon	Perkins	Warren
Clark, Wyo.	Lodge	Root	Wetmore

NOT VOTING—45.

Ashurst	Catron	Dixon	Hitchcock
Bacon	Chilton	du Pont	Jackson
Borah	Clarke, Ark.	Foster	Johnson, Me.
Bourne	Crane	Gamble	Johnston, Ala.
Briggs	Culberson	Gardner	Kavanaugh
Brown	Cullom	Gronna	La Follette
Burton	Curtis	Guggenheim	Lippitt
McCumber	Overman	Simmons	Webb
McLean	Owen	Stephenson	Works
Myers	Pomerene	Thornton	
Nelson	Reed	Tillman	
Oliver	Richardson	Watson	

So Mr. WILLIAMS's amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is now on the amendment proposed by the Senator from New York [Mr. ROOT].

Mr. GORE. I only wish to say one word. The Red Cross is an international emblem and is an international organization. It ought not to be sectionalized, and it can not be sectionalized without jeopardizing its future and jeopardizing its efficiency. The Congress of the United States ought not to do anything which might jeopardize the interests of this humane and beneficent organization. The Loyal Legion has a right to commemorate the achievements of its soldiers and of its section, but it has no right to kidnap the Red Cross. We ought not here to-night to do anything which might set a wedge that would split this organization which has dispensed and which will dispense its blessings the world around. I hope that Senators will consent to strike from this amendment the language relating to the Red Cross and let the Loyal Legion, with devotion and patriotism, commemorate the achievements of the Union Army; let them celebrate the preservation of the Union; but let them not and let us not become accomplices in the performance of any deed which might impair an organization which is consecrated to humanity and to the noblest sentiments that actuate the heart of man. I therefore move to strike from this amendment the clause relating to the Red Cross.

Mr. WILLIAMS. Mr. President, I want to add just one word to what the Senator from Oklahoma [Mr. GORE] has said. I do not know what the effect of the adoption of this provision and the attempt to identify the Red Cross with one of the sections of the American Union may or may not be; I do not know what its effect upon southern women will be. I can only state that, if I were a southern woman, I would not remain a member of the Red Cross after it thus became a sectional association. I do not even know whether or not to-morrow, when I feel cooler about this matter than I do to-night, I would repeat that language, but that is the way I feel right now.

It seems to me that this is an unprovoked discrimination between the women of the sections of this country. I should have no objection, of course, to granting a site and voting aid for a monument to be erected by anybody in commemoration of American heroism on either side, although I remember that when I tried it upon the Senate in the name of the other side, I received the votes of the Senator from Iowa, of the Senator from Minnesota, and about three more north of the line, and that when I tried to get the yeas and nays I did not find a sufficient number to give them to me.

I am not complaining; but I do think the rule ought to work both ways, or not at all; and I do think that the motion made by the Senator from Oklahoma ought to be adopted. I see no reason why the Red Cross should be stigmatized—labeled—as a sectional organization. I am, I believe, one of the members of its board of directors, or whatever it may be called, but I do not see why you should take an organization, which is one of grace and mercy and sweetness, and try to make it yours any more than ours. I should feel that I was persona non grata in it. Every good deed that it does upon the battle field it does by the aid of southern women. Southern women are members of it; southern women go with the ambulances and with the nursing corps, and yet you want to put them in the attitude of being shamed and denationalized.

Mr. STONE. Mr. President, I rise to make a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. STONE. It is now half past 3 o'clock, in the "wee sma' hours," and soon the sun will begin to glow in the east. I think we might as well stay on now, and I wish to ask the Chair whether at this point a motion would be in order that, as soon as this bill is concluded, we proceed with unobjected bills on the calendar?

The PRESIDENT pro tempore. At the conclusion of the bill the Chair will recognize the Senator to make that motion.

Mr. STONE. I shall be glad to do so.

The PRESIDENT pro tempore. The Senator from Oklahoma [Mr. GORE] moves to amend the amendment by striking out all reference to the Red Cross.

Mr. GORE. Mr. President, I rise to propound a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. GORE. I remember the Senator from Georgia [Mr. SMITH] moved to table this section, together with the amendment, as I understand, proposed by the Senator from Missis-

sippi [Mr. WILLIAMS], and I should like to know if this entire proposition is not on the table now?

The PRESIDENT pro tempore. It was laid on the table as in Committee of the Whole, but the amendment can be renewed in the Senate.

Mr. GORE. Very well.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Oklahoma [Mr. GORE] to the amendment of the Senator from New York [Mr. ROOT]. [Putting the question.] By the sound the "noes" seem to have it.

Mr. GORE. I ask for the yeas and nays.

The yeas and nays were not ordered.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question recurs on the amendment of the Senator from New York [Mr. ROOT]. [Putting the question.]

Mr. SMITH of Georgia. I ask for the yeas and nays on that.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I transfer my general pair with the Senator from Pennsylvania [Mr. OLIVER] to the junior Senator from Maine [Mr. GARDNER], and will vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). Renewing the announcement of the transfer of my pair made on the last vote, I vote "yea."

Mr. PERCY (when his name was called). I have a pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the junior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "nay."

Mr. PERKINS (when his name was called). I again announce the transfer of my pair with the Senator from North Carolina [Mr. OVERMAN] to the Senator from Massachusetts [Mr. CRANE], and will vote. I vote "yea."

Mr. SMITH of Michigan (when his name was called). I again announce the transfer of my pair and will vote. I vote "yea."

Mr. SMITH of South Carolina (when his name was called). I again announce my pair with the Senator from Delaware [Mr. RICHARDSON] and transfer it to the Senator from Tennessee [Mr. WEBB], and will vote. I vote "nay."

Mr. WARREN (when his name was called). I transfer my pair with the Senator from Louisiana [Mr. FOSTER] to the Senator from South Dakota [Mr. GAMBLE], and will vote. I vote "yea."

The roll call having been concluded, the result was announced—yeas 30, nays 20, as follows:

YEAS—30.

Bradley	Cummins	Page	Smoot
Brady	Dillingham	Paynter	Sutherland
Brandegee	Fall	Penrose	Townsend
Bristow	Gallinger	Perkins	Warren
Burnham	Kenyon	Pittman	Wetmore
Clapp	Lodge	Poindexter	Williams
Clark, Wyo.	Martine, N. J.	Root	
Crawford	Newlands	Smith, Mich.	

NAYS—20.

Bankhead	Jones	Percy	Smith, Md.
Bryan	Kern	Sheppard	Smith, S. C.
Chamberlain	Lea	Shively	Stone
Fletcher	Martin, Va.	Smith, Ariz.	Swanson
Gore	O'Gorman	Smith, Ga.	Thomas

NOT VOTING—45.

Ashurst	Cullom	Johnston, Ala.	Reed
Bacon	Curtis	Kavanaugh	Richardson
Borah	Dixon	La Follette	Simmons
Bourne	du Pont	Lippitt	Stephenson
Briggs	Foster	McCumber	Thornton
Brown	Gamble	McLean	Tillman
Burton	Gardner	Myers	Watson
Catron	Gronna	Nelson	Webb
Chilton	Guggenheim	Oliver	Works
Clarke, Ark.	Hitchcock	Overman	
Crane	Jackson	Owen	
Culberson	Johnson, Me.	Pomerene	

So Mr. ROOT's amendment was agreed to.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

The PRESIDENT pro tempore. The question is, Shall the bill pass?

Mr. SMITH of Georgia. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BRYAN. Mr. President, I desire to say in a word that I voted to strike out all after the enacting clause of the bill when it was supposed that $5,000,000 would be voted for the bridge across the Potomac River and before the amendment offered by the Senator from Indiana [Mr. KERN] was adopted. After the reduction of the amount to be available for that bridge and after the adoption of the amendment offered by the Senator from Indiana, I had determined to vote for this bill. I do not intend to do so now, but will not take up the time of the Senate to explain why, beyond saying that it is simply because section 13 has been added to the bill.

Mr. BRISTOW. I desire to state that I had intended to vote against the bill but because of the amendment offered by the Senator from Indiana [Mr. KERN], which takes from the bill the very objectionable features which it contained, I now expect to vote for it.

Mr. FLETCHER. Mr. President, I desire to say that it had been my purpose all along to vote for this bill, and this is all I have had to say on the subject; but in view of the amendment offered by the Senator from New York [Mr. ROOT], which has been adopted by the Senate, I shall vote against the bill. I think it a most unfortunate thing to have brought a proposition of that kind into a measure of this character at this time, or even to have brought it here at all. It seems to me a great impertinence on the part of any organization in this country to come to the Congress of the United States and ask that the money of all the people of this country shall go to celebrate the fruits and the sacrifices of only a part of the people whom they name and whom they seek to distinguish and to set apart and specify as the only people worthy of commemoration.

I say not only that, but if that organization desire to build monuments or otherwise to commemorate people, let them proceed to do it in their own way and after their own manner; but I say it is not proper that they should come here and ask Congress to vote hundreds of thousands of dollars to help them carry on a work of sectionalism and of discrimination. I consider that the involving of that great philanthropic organization—the Red Cross—in a scheme or plan of that kind is unfair to it, and is a proposition which the Senate ought to reject, and which the Congress of the United States ought not for one moment to countenance.

Therefore I shall vote against the bill.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called.) I transfer my pair to the junior Senator from Maine [Mr. GARDNER], and will vote. I vote "yea."

Mr. DILLINGHAM (when his name was called). I again announce the transfer of my pair with the Senator from South Carolina [Mr. TILLMAN] to the Senator from Wisconsin [Mr. STEPHENSON], and will vote. I vote "yea."

Mr. PERCY (when his name was called). I again transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the senior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "nay."

Mr. PERKINS (when his name was called). Again announcing the transfer of my pair, I will vote. I vote "yea."

Mr. SMITH of Michigan (when his name was called). I again announce the transfer of my pair with the junior Senator from Missouri [Mr. REED] to the junior Senator from Rhode Island [Mr. LIPPITT], and will vote. I vote "yea."

Mr. SMITH of South Carolina (when his name was called). I again announce the transfer of my pair to the junior Senator from Tennessee [Mr. WEBB], and will vote. I vote "nay."

Mr. WARREN (when his name was called). Under the same arrangement of transfer of pairs, I vote "yea."

The roll call having been concluded, the result was announced—yeas 35, nays 15, as follows:

YEAS—35.

Bradley	Cummins	Newlands	Smith, Md.
Brady	Dillingham	Page	Smith, Mich.
Brandegee	Fall	Paynter	Smoot
Bristow	Gallinger	Penrose	Sutherland
Burnham	Jones	Perkins	Swanson
Chamberlain	Lea	Pittman	Townsend
Clapp	Lodge	Poindexter	Warren
Clark, Wyo.	Martin, Va.	Root	Wetmore
Crawford	Martine, N. J.	Smith, Ariz.	

NAYS—15.

Bankhead	Kenyon	Sheppard	Stone
Bryan	Kern	Shively	Thomas
Fletcher	O'Gorman	Smith, Ga.	Williams
Gore	Percy	Smith, S. C.	

NOT VOTING—45.

Ashurst	Cullom	Johnston, Ala.	Reed
Bacon	Curtis	Kavanaugh	Richardson
Borah	Dixon	La Follette	Simmons
Bourne	du Pont	Lippitt	Stephenson
Briggs	Foster	McCumber	Thornton
Brown	Gamble	McLean	Tillman
Burton	Gardner	Myers	Watson
Catron	Gronna	Nelson	Webb
Chilton	Guggenheim	Oliver	Works
Clarke, Ark.	Hitchcock	Overman	
Crane	Jackson	Owen	
Culberson	Johnson, Me.	Pomerene	

So the bill was passed.

Mr. SUTHERLAND. I move that the Senate adjourn.

Mr. O'GORMAN. I move that we meet to-morrow at 12 o'clock instead of 10 o'clock.

Mr. SUTHERLAND. That can not be done.

Mr. WARREN. A motion to amend a motion to adjourn can not be entertained.

The PRESIDENT pro tempore. The question is upon the motion of the Senator from Utah, that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 50 minutes a. m., Thursday, February 27) the Senate adjourned until 10 o'clock a. m., Thursday, February 27, 1913.

NOMINATIONS.

Executive nominations received by the Senate February 26, 1913.

CONSUL GENERAL.

James A. Smith, of Vermont, now consul general at Genoa, to be consul general of the United States of America at Calcutta, India.

PROMOTIONS IN THE ARMY.

JUDGE ADVOCATE GENERAL'S DEPARTMENT.

Lieut. Col. George M. Dunn, judge advocate, to be judge advocate with the rank of colonel, from February 20, 1913, vice Col. Harvey C. Carbaugh, retired from active service February 19, 1913.

Maj. Lewis E. Goodier, judge advocate, to be judge advocate with the rank of lieutenant colonel, from February 20, 1913, vice Lieut. Col. George M. Dunn, promoted.

Capt. Samuel T. Ansell, Infantry, unassigned, acting judge advocate, to be judge advocate, with rank of major from February 20, 1913, vice Maj. Lewis E. Goodier, promoted.

ORDNANCE DEPARTMENT.

Lieut. Col. Edwin B. Babbitt, Ordnance Department, to be colonel from February 20, 1913, vice Col. Charles H. Clark, retired from active service February 19, 1913.

Maj. John W. Joyes, Ordnance Department, to be lieutenant colonel from February 20, 1913, vice Lieut. Col. Edwin B. Babbitt, promoted.

CAVALRY ARM.

First Lieut. Frank T. McNarney, Twelfth Cavalry, to be captain from February 22, 1913, vice Capt. Philip W. Corbusier, Eighth Cavalry, detailed in the Quartermaster Corps on that date.

Second Lieut. George L. Converse, jr., Fourteenth Cavalry, to be first lieutenant from February 22, 1913, vice First Lieut. Frank T. McNarney, Twelfth Cavalry, promoted.

COAST ARTILLERY CORPS.

Cyril Arthur Winton Dawson, of Washington, to be second lieutenant in the Coast Artillery Corps, with rank from January 3, 1913.

PROMOTIONS IN THE NAVY.

Capt. Wythe M. Parks, an additional number in grade, to be a rear admiral in the Navy from the 13th day of February, 1913, with the officer next below him.

Capt. Frank H. Bailey, an additional number in grade, to be a rear admiral in the Navy from the 13th day of February, 1913, with the officer next below him.

Macdonough C. Merriman, a citizen of New York, to be an assistant paymaster in the Navy from the 21st day of February, 1913, to fill a vacancy.

Second Lieut. Joseph C. Fegan to be a first lieutenant in the Marine Corps from the 5th day of February, 1913, to fill a vacancy.

Charles P. Lynch, a citizen of Texas, to be an assistant surgeon in the Navy from the 19th day of February, 1913, to fill a vacancy.

Commander William H. G. Bullard to be a captain in the Navy from the 1st day of July, 1912, to fill a vacancy.

Commander Joseph W. Oman to be a captain in the Navy from the 13th day of February, 1913, to fill a vacancy.

Lieut. Commander Percy N. Olmsted to be a commander in the Navy from the 16th day of January, 1913, to fill a vacancy.

Lieut. Commander John R. Brady to be a commander in the Navy from the 12th day of February, 1913, to fill a vacancy.

Lieut. Bayard T. Bulmer to be a lieutenant commander in the Navy from the 16th day of January, 1913, to fill a vacancy.

Lieut. (Junior Grade) Richard R. Mann to be a lieutenant in the Navy from the 1st day of February, 1913, to fill a vacancy.

Lieut. (Junior Grade) William C. I. Stiles to be a lieutenant in the Navy from the 12th day of February, 1913, to fill a vacancy.

Lieut. (Junior Grade) Aubrey W. Fitch to be a lieutenant in the Navy from the 13th day of February, 1913, to fill a vacancy.

The following-named ensigns to be assistant civil engineers in the Navy from the 21st day of February, 1913, to fill vacancies:

Henry G. Taylor and

Gaylord Church.

Gunners Joseph H. Aigner and Clarence D. Holland to be chief gunners in the Navy from the 31st day of January, 1913, upon the completion of six years' service as gunners.

SURVEYOR OF CUSTOMS.

James H. Bolton, of Iowa, to be surveyor of customs for the port of Sioux City, in the State of Iowa. (Reappointment.)

POSTMASTERS.

ALABAMA.

John S. Johnson to be postmaster at Brantley, Ala. Office became presidential January 1, 1912.

Spencer J. McMorris to be postmaster at Wetumpka, Ala., in place of Spencer J. McMorris. Incumbent's commission expired February 27, 1912.

COLORADO.

George C. Reiley to be postmaster at Ordway, Colo., in place of Milton E. Bashor, resigned.

CONNECTICUT.

S. Augustus Coffey to be postmaster at Plainfield, Conn. Office became presidential October 1, 1912.

FLORIDA.

Samuel J. Giles to be postmaster at Carrabelle, Fla., in place of Samuel J. Giles. Incumbent's commission expired February 9, 1913.

Charles N. Hildreth, jr., to be postmaster at Liveoak, Fla., in place of Charles N. Hildreth, jr. Incumbent's commission expired February 18, 1913.

James A. Zipperer to be postmaster at Madison, Fla., in place of James A. Zipperer. Incumbent's commission expires March 2, 1913.

GEORGIA.

Mary A. Hale to be postmaster at Smithville, Ga. Office became presidential January 1, 1913.

Isaac T. Sellers to be postmaster at Cornelia, Ga., in place of Isaac T. Sellers. Incumbent's commission expired February 20, 1913.

KANSAS.

Edwin J. Bookwalter to be postmaster at Halstead, Kans., in place of Edwin J. Bookwalter. Incumbent's commission expires March 1, 1913.

Gertrude Stevens to be postmaster at Goodland, Kans., in place of Gertrude Stevens. Incumbent's commission expired February 20, 1913.

LOUISIANA.

Valry G. Ledoux to be postmaster at Lake Arthur, La., in place of Robert B. Johnson, resigned.

MARYLAND.

Leslie W. Gaver to be postmaster at Middletown, Md., in place of Leslie W. Gaver. Incumbent's commission expired February 9, 1913.

MASSACHUSETTS.

John W. Baldwin to be postmaster at North Wilbraham, Mass. Office became presidential October 1, 1911.

MICHIGAN.

Charles H. Baird to be postmaster at Holly, Mich., in place of Charles H. Baird. Incumbent's commission expired April 24, 1912.

MISSISSIPPI.

Frank M. Elliott to be postmaster at Okolona, Miss., in place of Irene F. Elliott, deceased.

MISSOURI.

Willard A. Seymour to be postmaster at Sturgeon, Mo., in place of Willard A. Seymour. Incumbent's commission expired February 17, 1913.

MONTANA.

Edward B. Newhall to be postmaster at Big Sandy, Mont. Office became presidential January 1, 1913.

NEBRASKA.

Anna Austin to be postmaster at Deshler, Nebr. Office became presidential January 1, 1913.

NEW YORK.

Albert A. Boynton to be postmaster at Elizabethtown, N. Y., in place of Harry H. Nichols, deceased.

Peter Dahl to be postmaster at Tonawanda, N. Y., in place of Peter Dahl. Incumbent's commission expired February 9, 1913.

John C. Jubin to be postmaster at Lake Placid Club, N. Y., in place of John C. Jubin. Incumbent's commission expired February 9, 1913.

Frantz Murray to be postmaster at Dolgeville, N. Y., in place of Frantz Murray. Incumbent's commission expired January 11, 1913.

James D. Read to be postmaster at Eden, N. Y. Office became presidential January 1, 1913.

Hiro J. Settle to be postmaster at Ballston Spa, N. Y., in place of Hiro J. Settle. Incumbent's commission expired February 18, 1913.

OHIO.

Zora Bennett to be postmaster at Middle Point, Ohio. Office became presidential October 1, 1912.

Emma Jones to be postmaster at Shadyside, Ohio. Office became presidential January 1, 1913.

Theodore Totten to be postmaster at Findlay, Ohio, in place of Theodore Totten. Incumbent's commission expired January 28, 1913.

OKLAHOMA.

Benjamin G. Baker to be postmaster at Chattanooga, Okla., in place of Benjamin G. Baker. Incumbent's commission expired February 20, 1913.

PENNSYLVANIA.

Henry G. Moyer to be postmaster at Perkasie, Pa., in place of Henry G. Moyer. Incumbent's commission expired January 14, 1913.

John W. Zerbe to be postmaster at Shamokin, Pa., in place of John W. Zerbe. Incumbent's commission expires March 1, 1913.

SOUTH CAROLINA.

Allen T. Collins to be postmaster at Conway, S. C., in place of Allen T. Collins. Incumbent's commission expired December 16, 1912.

John L. Dew to be postmaster at Latta, S. C., in place of John L. Dew. Incumbent's commission expired February 21, 1912.

J. E. Folger to be postmaster at Easley, S. C., in place of Alonzo T. Folger, resigned.

SOUTH DAKOTA.

Gregory Smithberger to be postmaster at Bowdle, S. Dak., in place of Hiram A. Mason, resigned.

TEXAS.

Harry H. Cooper to be postmaster at Nacogdoches, Tex., in place of Harry H. Cooper. Incumbent's commission expired December 16, 1912.

Charles F. Darnall to be postmaster at Llano, Tex., in place of Charles F. Darnall. Incumbent's commission expired January 14, 1913.

Frank G. Goodridge to be postmaster at Robstown, Tex. Office became presidential January 1, 1913.

Evye Wright Kennedy to be postmaster at Kirbyville, Tex., in place of Jasper C. Williamson, resigned.

Le Roy P. Loomis to be postmaster at Slaton, Tex. Office became presidential October 1, 1912.

Frederick Loudon to be postmaster at Fredericksburg, Tex., in place of Frederick Loudon. Incumbent's commission expired January 14, 1913.

Charles Real to be postmaster at Kerrville, Tex., in place of Charles Real. Incumbent's commission expired January 27, 1913.

William Reese to be postmaster at Floresville, Tex., in place of William Reese. Incumbent's commission expired February 11, 1913.

Rudolph L. Reuser to be postmaster at Runge, Tex., in place of Rudolph L. Reuser. Incumbent's commission expired April 28, 1912.

VIRGINIA.

James Carter to be postmaster at Chatham, Va., in place of James Carter. Incumbent's commission expired March 2, 1911.

Howard P. Dodge to be postmaster at Manassas, Va., in place of Howard P. Dodge. Incumbent's commission expired January 14, 1913.

John W. Gregg to be postmaster at Purcellville, Va., in place of John W. Gregg. Incumbent's commission expired January 14, 1913.

Harry A. Sager to be postmaster at Herndon, Va., in place of Harry A. Sager. Incumbent's commission expired December 14, 1912.

Bezer Snell to be postmaster at Brookneal, Va., in place of Bezer Snell. Incumbent's commission expired May 20, 1912.

WASHINGTON.

James R. O'Farrell to be postmaster at Orting, Wash., in place of James R. O'Farrell. Incumbent's commission expired February 11, 1913.

WISCONSIN.

Carrie E. MacLaughlin to be postmaster at Benton, Wis. Office became presidential January 1, 1913.

WITHDRAWALS.

Executive nominations withdrawn from the Senate February 26, 1913.

CONSULS GENERAL.

James A. Smith, of Vermont, to be consul general of the United States of America at Marseille, France.

Alphonse Gaulin, of Rhode Island, to be consul general of the United States of America at Calcutta, India.

POSTMASTERS.

MINNESOTA.

William Wichman to be postmaster at Morton, in the State of Minnesota.

MISSOURI.

Arthur W. Schmidt to be postmaster at Clayton, in the State of Missouri.

NEW YORK.

Gerow Van Wyck to be postmaster at Wallkill, in the State of New York.

NORTH CAROLINA.

Walter C. Brinson to be postmaster at Belhaven, in the State of North Carolina.

PENNSYLVANIA.

Harry B. Jacobs to be postmaster at White Haven, in the State of Pennsylvania.

TEXAS.

Henry Krabbenschmidt to be postmaster at Grand Prairie, in the State of Texas.

CONFIRMATION.

Executive nomination confirmed by the Senate February 26, 1913.

Irwin B. Laughlin to be secretary of the embassy at London, England.

INJUNCTION OF SECRECY REMOVED.

The injunction of secrecy was removed from the following:

An agreement signed on February 13, 1913, by the plenipotentiaries of the United States and the French Republic extending for a period of five years from February 27, 1913, the convention of arbitration of February 10, 1908, between the United States and the French Republic.

A convention between the United States and other powers, signed at Paris on January 17, 1913, modifying the International Sanitary Convention of December 3, 1903.

A treaty between the United States and Italy, signed on February 25, 1913, amending article 3 of the treaty of commerce and navigation of February 26, 1871, between the two countries.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 26, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite spirit, Father almighty, maker of the heavens and the earth, we would pour out our hearts in love and gratitude for the faith which binds us to Thee. An inspiration in the struggle for existence, a potent factor in the civilization of the world, a shield against the temptations which assail, it purifies and ennobles, comforts and sustains us in sorrow, lights the dark valley.

Faith is the rainbow's form
Hung on the brow of heaven,
The glory of the passing storm,
The pledge of mercy given.

Increase and strengthen it in all our hearts that we may be true to Thee, to ourselves, and to our fellow men. In the spirit of Him who personified it in life and death. Amen.

The Journal of the proceedings of yesterday was read and approved.

PENSION APPROPRIATION BILL.

Mr. BARTLETT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions for the United States for the fiscal year ending June 30, 1914, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and ask for a conference.

The SPEAKER. The gentleman from Georgia asks unanimous consent to take from the Speaker's table the pension appropriation bill, with a Senate amendment thereto, disagree to the Senate amendment, and ask for a conference. Is there objection?

Mr. RODDENBERY. Mr. Speaker, I object.

Mr. BARTLETT. Mr. Speaker, I move to suspend the rules, take from the Speaker's table the pension appropriation bill, with Senate amendment, disagree to the Senate amendment, and ask for a conference.

The SPEAKER. The gentleman from Georgia moves to suspend the rules, take from the Speaker's table the pension appropriation bill, with a Senate amendment thereto, disagree to the Senate amendment, and ask for a conference. Is a second demanded?

Mr. RODDENBERY. Mr. Speaker, I demand a second; and I also make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Georgia demands a second and makes the point of order that there is no quorum present. Evidently there is not a quorum present.

Mr. GARRETT. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Aiken, S. C.	Doremus	Jackson	Patten, N. Y.
Ames	Draper	Johnson, S. C.	Pickett
Ansberry	Ferris	Konig	Porter
Barchfeld	Focht	Kopp	Post
Bartholdt	Fornes	Korbly	Prince
Berger	Fowler	Lafean	Prouty
Bradley	Gardner, N. J.	La Follette	Pujo
Broussard	George	Langham	Reyburn
Brown	Gill	Lewis	Rothermel
Burleson	Glass	Lindsay	Rucker, Colo.
Carlin	Godwin, N. C.	Littleton	Sabath
Carter	Green, Iowa	Lobeck	Saunders
Conry	Greene, Mass.	McDermott	Smith, J. M. C.
Copley	Gudger	McGuire, Okla.	Stack
Covington	Guernsey	McKinney	Stanley
Cox	Hamilton, W. Va.	McMorran	Sterling
Cravens	Harris	Mays	Sweet
Crumpacker	Harrison, N. Y.	Merritt	Tuttle
Cullop	Heald	Moore, Tex.	Vare
Curry	Henry, Conn.	Morgan, Okla.	Vreeland
Danforth	Higgins	Mott	Warburton
Davenport	Hill	Needham	Watkins
Davidson	Howland	O'Shaunessy	Wilder
De Forest	Hughes, Ga.	Palmer	Wilson, Ill.
Dickson, Miss.	Humphrey, Wash.	Parran	Wilson, N. Y.

The SPEAKER. On this roll call 279 gentlemen have responded to their names, a quorum.

Mr. HAY. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors. The gentleman from Georgia [Mr. RODDENBERY] demanded a second.

Mr. BARTLETT. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on suspending the rules——

Mr. RODDENBERY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. RODDENBERY. I rise to be recognized to use the 20 minutes which is accorded under the rule.

The SPEAKER. The gentleman is recognized for 20 minutes, and the gentleman from Georgia [Mr. BARTLETT] is recognized for 20 minutes.

Mr. BARTLETT. Mr. Speaker, the motion is to suspend the rules and disagree to the Senate amendment to the pension appropriation bill and ask for a conference. I reserve the balance of my time.

Mr. RODDENBERY. I ask the Chair to kindly advise me when five minutes of my time has been used. Mr. Speaker, the proposition here involved is to suspend the ordinary rules under which this bill would be referred to the Committee on Pensions, there considered, again reported to the House, and there considered according to the rule. If this motion to suspend the rules be adopted that carries this bill to conference at once upon instructions of nonconcurrence. Six days and less remain before the Sixty-second Congress passes into history and the Sixty-third Congress will have begun. The Sixty-second Congress is a Congress with a Democratic House, a Republican President, and a Republican Senate. The Sixty-third Congress will have a Democratic House, a Democratic Senate, and a Democratic President. We have already, from a Democratic House, sent to a Republican Senate divers and sundry bills fastening charges of millions of dollars upon the American people. The Indian appropriation bill comes back from a repudiated Republican Senate with $5,000,000 more added to it, and it is proposed to suspend the rules and pass the bill. The pension bill now comes back, the public buildings bill will come back, I apprehend, in a day or two with $20,000,000 added by a repudiated Republican Senate for this House to pass under suspension of the rules. The river and harbor bill now pends in the Committee on Rivers and Harbors, returned from a repudiated Republican Senate with $7,000,000 added for the people of this country to pay. To pass these bills now means coercion of a Democratic House by a Senate which the people have repudiated; we put it in their power to rob the people on their deathbed. I respect party leadership; I am devoted to the successs of my party; but I say to you that when party leadership or that when party instrumentality departs from its honorable pledge to the country I will follow that leadership no longer, and I take my place by striving in a small minority to direct the feet of my party for the good of the country rather than follow the party leadership or party organization to a betrayal of a trusting people and a violation of my party's sacred promises to them. [Applause.]

The SPEAKER. Five minutes of the gentleman's time has expired.

Mr. RODDENBERY. Mr. Speaker, I ask that I shall proceed for five minutes more just here and ask to be notified. I read from the New York Herald of this morning:

AND $180,000,000 FOR PENSIONS.

"She stirs, she moves, she seems to feel
The thrill of life along her keel."

Another Democratic battleship of the "pork" fleet was launched yesterday when the pension bill rushed from the ways in the Senate.

This fine new ship is $180,000,000 in length, $180,000,000 in breadth, and of $180,000,000 draft. She is the finest craft that has yet been set afloat on the seas of Democratic economy. She will not be torpedoed by any enemy in the White House and will serve her country well.

The proportions of this great ship puts all vessels of her class in the background.

In 1900 the total for pensions was $140,877,316; in 1905, the high-water mark of Republican extravagance, it reached $161,710,367; and this year it is but $153,590,456.

But $180,000,000! Whew!

Gentlemen, I say to you that there is no party leader in the face of whose power, if it involves betrayal of my party or my country, to whom I will truckle here or anywhere. [Applause.] There is no party leader in the face of whose edict I will fawn or falter in living up to the pledges of my party or the obligations that an honorable man should hold sacred in public as well as private station. [Applause.] Free men have no fears. I know the penalty of the rebuke that will be inflicted. I will stand the fearful personal destruction that may be visited upon me by the dreadnought of masterful party leadership, supported by a masterful party majority. I am now ready to receive it. I thank God I never saw the day when power rested in one or power rested in many could cause me to falter or fear to perform my duty to my party or to my country as I saw it. [Applause.] Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The gentleman from Georgia [Mr. RODDENBERY] has used eight minutes. The gentleman from Georgia [Mr. BARTLETT] is recognized.

Mr. BARTLETT. Mr. Speaker, I have no war to make with my colleague and no criticism here upon the position which he takes that satisfies his own conscience or convictions of duty.

This is a simple matter, Mr. Speaker. The pension appropriation bill passed this House on the 14th day of this month. As a member of the Committee on Appropriations and chairman of the subcommittee, I was directed to report that bill to the House. It carries for the next fiscal year, after the estimates which have been submitted by the Pension Bureau had been reduced, $180,000,000. The gentleman from Georgia [Mr. RODDENBERY], my colleague, is not more opposed to a wrong pension system than I am or always have been. I may not have been as loud and vociferous in my denunciation of what I consider to be wrong upon that subject as he has been. He is entitled to all the credit and reputation that he has made upon that subject. I do not propose to detract anything from him on that account. This is a simple proposition—whether the House by the objection of one man can be locked down the balance of this session and the first Democratic Congress that has assembled for the last 16 years shall pass into history with the distinction of not being able to pass the necessary supply bills to carry on the Government. That is the question which is presented to this Congress. As far as I am concerned, now and at all times I have taken responsibility in any shape that it has presented itself. I declare that that is my duty as a Member of this House. My duty as a member of the great party to which my colleague and I both now and have always belonged is to pursue every legitimate method, so that when in the ides of March we shall declare this Congress adjourned sine die we shall not find upon its records and journals these great supply bills undisposed of. Therefore I have made this motion as a duty to the House, as a duty to the country, and I have no apology to make for it.

The amendment is one which I do not think ought to be agreed to, and the usual course, when some objection is made, not for the purpose of preventing this amendment from being passed on by the House or adopted, is to ask for a conference; and I hope the House will aid me and the representatives of the Appropriations Committee in this particular instance to send this bill to conference that we may do that which is to be done in an orderly, decent way, and pass this great supply bill which the necessities of the Government under existing law has made necessary to be passed.

I yield to the gentleman from Massachusetts [Mr. GARDNER].

The SPEAKER. How much time?

Mr. GARDNER of Massachusetts. Three minutes.

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER] is recognized for three minutes.

Mr. GARDNER of Massachusetts. Mr. Speaker, I was one of those who voted with the gentleman from Georgia [Mr. RODDENBERY] against the passage of the Sherwood pension bill, and I come from a district which is full of old Union soldiers, which

is not the case with the gentleman from Georgia [Mr. RODDENBERY]. And, although I come from a district which is filled with old soldiers, I should not vote for the Sherwood bill if it were before the House to-day. But this is not a question of an extension of our pension laws. The question before us is whether a majority of this House is going to show itself incapable of passing an appropriation providing for the payment of soldiers' pensions, whether the appropriation relates to the pensions ordained by the Sherwood bill or the pensions ordained by former pension bills. Even if the pending bill only affected the appropriation to pay the pensions ordained by the bill against which I voted, nevertheless I should now vote to send this bill to conference. Mr. Speaker, perhaps it may not have been wise to pass the Sherwood bill. Nevertheless the veterans became entitled to those increased pensions the moment that Congress passed the law granting them. The issue had been settled and it at once passed beyond the field of discussion. Since that day many an old soldier has ceased work in his old age. Others have readjusted their living expenses, perhaps they have even readjusted their whole lives, expecting that this Nation is going to pay them what it has voted to pay.

Mr. BARTLETT. May I interrupt the gentleman?

Mr. GARDNER of Massachusetts. Yes.

Mr. BARTLETT. The amendment the gentleman from Georgia [Mr. RODDENBERY] is, supposedly by his motion, not in favor of, is an amendment to pay out money to somebody else, and not to a soldier.

Mr. GARDNER of Massachusetts. That is true. Now, Mr. Speaker, I have merely said these words in order to aid if I can in carrying the motion to send this bill to conference. I felt that I could properly advocate this step in view of the fact that I voted against the passage of the Sherwood pension bill.

The SPEAKER. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Speaker, I reserve the balance of my time.

Mr. RODDENBERY. Mr. Speaker, I accord to my friend from Georgia [Mr. BARTLETT] and to my friend from Massachusetts [Mr. GARDNER] absolute candor, and I have no criticism for them. And to the membership of this House it is my pleasure to concede in the highest sense the belief that they are acting in obedience to their conception of public duty. But a day or so ago, when I undertook to state my views in respect to adopting special rules, there was an impatience of speech on the part of the floor leader of this House, as if to sweep me aside with one stroke, when I had no opportunity to reply. Accordingly, I arose a moment ago to put him on notice, face to face, that I fear not to antagonize him, nor will I hesitate to maintain here, as everywhere, not only my self-respect but my rights on the floor of this House. [Applause.]

I shall stand here unawed and undeterred by any living man, with the flag of my party in one hand and my party platform in the other, and battle for both, that the Democratic Party may serve the country and not betray either the people or our solemn compact with them.

I now yield 10 minutes to the gentleman from Texas [Mr. DIES].

The SPEAKER. The gentleman from Texas [Mr. DIES] is recognized for 10 minutes.

Mr. DIES. Mr. Speaker, for several days I have been amused at the gentleman from Illinois [Mr. MANN], the minority leader, who has chuckled to himself and congratulated the Republican Party that this side of the House is becoming extravagant, although "a small minority" of us, as he dubbed us, were economists. The gentleman need take no consolation from that state of affairs. If this country is looking two years from now for a party that is extravagant, it will have no occasion to turn us out of office, and if it is looking for economists, Mr. Speaker, it will always have more sense than to return the Republican Party to power. [Applause on the Democratic side.]

This pension measure, as I understand it, carries about $185,000,000, to which should be added the $15,000,000 carried in the deficiency appropriation bill. The gentleman from Pennsylvania [Mr. MOORE] on yesterday informed us that tax payments were not paid by the country at large, but were principally paid by the citizens of Philadelphia. [Laughter.] Aside from being amused at the novelty of it, I was carried back to the dusty times of Rip Van Winkle, and I could see old Rip rising up, with his rusty musket falling to pieces under the decaying hand of time; and when the gentleman got through with his speech about Philadelphia, its wonderful population, its tremendous extent, and the fact that it was paying practically all the expenses of the Government, and told us with what deviltry the balance of the country was behaving itself, I felt like asking him, in all meekness, whether Philadelphia would permit the balance of the Union to depart in peace. [Laughter.]

This thought I want to give to my colleagues in all seriousness, and I do not lay to myself any especial wisdom. I do not in sincerity believe that my wisdom averages with the wisdom of the Members of this House, but let me say this to you, my Democratic friends, and to those on the other side of the House: The whole country has run mad with extravagance. Republicans are as extravagant as Democrats, and the fact of it is that it is at home accounted bad statesmanship to cheesepare, as they say, and that gives you license to practice extravagance here.

The $200,000,000 for pensions, the $50,000,000 for public buildings, the $1,200,000,000 that will be appropriated by this Congress, comes, mind you, from the blankets that wrap the shivering limbs of the people; it comes from the food they eat and the clothes they wear, not in proportion to the wealth they own but in proportion to consumption.

The States have given Congress the right to levy and collect an income tax. I want you to gather this: Since the day that Grover Cleveland said we had a balance on our hands to dispose of, the wealthy men of this Nation, the Republican Party of this country, have been devising ways to spend more money in order to bolster up the protective system. Look out for this income tax. It will not be 10 years until the very men who are standing here laughing at economy will be praying for the mountains to fall on them.

I will tell you why. If you ever saw anything expand and grow in this country and wax, like a giant, fat in a few years, it is going to be the uses to which the people of this country will put the income tax. The protective system, with which you wring these millions from the people of this country, is to-day trembling in the balance, and instead of despising honest efforts on the part of honest Democrats to carry out their platform pledges and economize in the expenditure of the public money, you had better get busy and help us in defense of your protective system. For if the people of this country despair of Congress collecting this tax and spending this money fairly and economically, they will tax the incomes of the rich men of this country and make them pay for all this folly. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Texas yield to the gentleman from Pennsylvania?

Mr. DIES. Certainly.

Mr. MOORE of Pennsylvania. Would the gentleman advocate in the forthcoming tariff bill the destruction of the protective system and the complete substitution of an income tax as a means of raising revenue for the Government?

Mr. DIES. Oh, no. The Democratic Party is going to reduce the tariff gradually. [Laughter on the Republican side.] We understand that this puissant city from which the gentleman comes, with all of its boasted strength and grandeur, could not stand on its own legs without the protective tariff prop, and we are not going to let the infant die for want of pap.

Mr. MOORE of Pennsylvania. The gentleman will leave just a little protection in the forthcoming tariff bills, will he not?

Mr. DIES. I do not suppose your great city of Philadelphia needs it, but I dare say when we get enough money to run this Government there will incidentally follow enough protection for every legitimate industry of this country. But gentlemen who represent infant industries, instead of encouraging all manner of extravagance in this country, had better help us practice economy, else the income tax will come and the graduated inheritance tax will come, and you will not have this twelve hundred million dollars to bolster up the protective system.

The gentleman from Illinois [Mr. MANN] thinks there is cause for congratulation in the fact that all Democrats are not in unity upon these appropriation bills. The Republican Party has been so accustomed to having every member jump over the bars like sheep and all of them answer to their names in monotonous, dull, menageric animal fashion, that when they see three or four Democrats of independent minds who beg to differ with their fellows they think the Democratic Party is going to the bow-wows. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Speaker, just a word. I did not conceive that a motion of this sort would cause a debate and a discussion upon a subject so foreign to the question before the House. I have nothing to say now with reference to the matter of extravagance or economy so far as the question now before the House is concerned. The record that I have made in 18 years, in the votes that I have cast, and the suggestions I have made in debate is an ample answer to any insinuation from any side that I have been engaged or am now engaged in any effort to be extravagant or to vote for extravagant appropriations. [Applause.] The gentlemen who oppose this motion now may be found in the record to have voted for measures like the public roads bill and big public building bills, carrying millions of dollars, when such measures were popular at home; then they had no conception of economy when those measures were under

consideration. [Applause.] On past occasions, when some of my constituency and many in other parts of my State have urged me to vote for measures that would place upon the people of this Government immense burdens, I have taken my political life in my hands and have resisted their importunities and voted against those measures, because I could not approve them; and if gentlemen think that their insinuations of extravagance will injure me they are mistaken, for the record I have made here in this House is an ample armament against such attacks, and their arrows will fall harmless and be in vain.

Mr. Speaker, I did not vote for the pension bill passed at last session, which increased the amount of the annual expenditures for pensions $20,000,000 and caused a deficiency of $15,000,000 for this year. I have said heretofore what I desired to say upon that subject. My people understand my position, the House understands it, and the country understands it. It is not necessary for me to reiterate every day and upon every bill that comes before the House what my position is upon this subject.

It has been the same since I entered this House that it is to-day. I do not agree with the policy of the pension system that this bill has to provide for, but I must submit to the will of the majority of Congress—the will of the majority of my own Democratic colleagues—and I will not engage in the useless performance of gnawing a file simply in order to have headlines in the first column of the first page of the daily newspapers stating what my position is upon this subject. I have served in this House 18 years, and I have never sought to add to or make my reputation by what was published in the headlines in the first column of the first page.

Mr. Speaker, I call for a vote and ask that this motion prevail. [Applause.]

The SPEAKER. The question is on the motion to suspend the rules, take from the Speaker's table the pension appropriation bill, disagree to the Senate amendments, and ask for a conference.

The question was taken; and (two-thirds voting in the affirmative) the rules were suspended, the bill taken from the Speaker's table, the Senate amendments disagreed to, and a conference asked with the Senate; and the Speaker announced as conferees on the part of the House Mr. BARTLETT, Mr. BORLAND, and Mr. GOOD.

THE LATE SENATOR MONEY.

Mr. SISSON. Mr. Speaker, I ask unanimous consent to extend remarks in the RECORD by publishing a sermon delivered by Dr. Leavell, in Carrollton, Miss., at the funeral of the late Senator Money.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

THE NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812, the naval appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. ALEXANDER in the chair.

The Clerk read as follows:

INCREASE OF THE NAVY.

That for the purpose of further increasing the Naval Establishment of the United States the President is hereby authorized to have constructed two first-class battleships, each carrying as heavy armor and as powerful armament as any vessel of its class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed $7,425,000 each.

Mr. PADGETT. Mr. Chairman, I desire to submit a request that we agree upon a time for debate on the increase of the Navy. I desire to ask if it would be agreeable to have two hours of debate.

Mr. FOSS. How would the gentleman suggest that the time be controlled?

Mr. PADGETT. That it be divided equally between those in favor of the increase and those opposed to the increase. As the gentleman from Illinois represents the two-ship proposition and personally I stand for one, and the gentleman from Texas [Mr. GREGG], I think, stands for none, I suggest that it be divided into three parts, each one to control 40 minutes.

Mr. MANN. What does the gentleman propose to cover by his proposition—to cut off all debate on the 10 items?

Mr. PADGETT. No; it is in the nature of general debate.

Mr. FOSS. This debate, as I understand it, will be on the first paragraph.

Mr. GREGG of Texas. Mr. Speaker, I understand that two hours will be for general debate, and then if amendments are offered there would be the five-minute debate.

Mr. MANN. I do not see that it is possible to have two hours debate before you read the 10 items in the bill. It seems to me that those two hours would be wasted to begin with.

Mr. UNDERWOOD. Mr. Chairman, it seems to me that the whole proposition of the increase of the Navy is included in these 10 paragraphs. It is open to discussion on the same general principle, and of course any amendments during this time will be pending. It may be more agreeable to the gentleman in charge of the bill to arrange the time so that there may be more latitude than under the five-minute debate, but it is clear that we have had ample general debate on the bill before we started in. The five-minute debate can not be limited in this way. It seems to me that it ought to proceed along the regular order, and if agreement can be made whereby gentlemen will have more latitude to make speeches than they would otherwise, I would like to see the gentleman's suggestion agreed to, and the gentleman from Tennessee on the one side and the gentleman from Illinois on the other side control the time.

Mr. GREGG of Texas. Is the proposition of the gentleman from Alabama to limit the discussion on these 10 items to two hours and have no five-minute debate?

Mr. UNDERWOOD. I would suggest that we read through the 10 paragraphs, allow amendments to be offered without debate, and when you have read the paragraphs covering the increase of the Navy, then allow the two hours general debate to go on and let the gentleman from Tennessee distribute the time to those opposed to the increase, and the gentleman from Illinois distribute the time to those in favor of the increase.

Mr. MANN. If the gentleman from Alabama will yield.

Mr. UNDERWOOD. I will yield to the gentleman.

Mr. MANN. There is a proposition in reference to the battleships, there is a proposition in relation to torpedo boats and torpedo destroyers, all of which I judge are contested. To have two hours' general debate on the battleship proposition would, it seems to me, be useless.

Mr. UNDERWOOD. I will say to the gentleman from Illinois that I suppose on the increase or decrease of the Navy there is not a man on this floor that has not made up his mind how he is going to vote.

Mr. MANN. I have not made up my mind how I will vote on the torpedo boats and the destroyers.

Mr. UNDERWOOD. The regular order would be to take this up under the five-minute rule.

Mr. MACON. Mr. Chairman, I demand the regular order.

The CHAIRMAN. The gentleman from Arkansas demands the regular order.

Mr. MADDEN. Mr. Chairman, I shall object to anyone doling out time.

The CHAIRMAN. The gentleman from Alabama [Mr. HOBSON] offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, on page 54, line 21, by striking out the word "two" and inserting in lieu thereof the word "four."

Mr. HOBSON. Mr. Chairman, I have come to the conclusion that a committee of the House and each Member of the House, on this question at least, and not infrequently in general, ought to lay before the House its and his conclusion as to what is wise for the Government. Heretofore the Committee on Naval Affairs has been recommending substantially what it thought we could get through, not what was the consensus of conviction of the committee that we ought to have. I am convinced that practice has had a bad effect in having Congress believe that a two-battleship program is a large program. Two battleships a year will not make up for depreciation, which at 10 per cent per year would be more than the tonnage of two *Dreadnoughts*. I want to ask the gentlemen who differ with me as to the number of battleships, or the number of craft, to be kind enough, for the edification of myself, as well as the edification of the other Members, to give us a statement of the grounds upon which they make their recommendations. I venture this broad proposition, that those who are opposing the proper development and increase of the Navy have, as their basis of recommendation, substantially an adjustment of expenditures with rivers and harbors, public buildings, pensions, and similar matters with the idea of simply coming to a compromise.

I want to submit the proposition that the great question of national defense is commensurate with the whole question of the Nation's internal affairs; indeed, that it should take precedence over all internal matters; that you can not carry forward in a systematic, orderly way your internal affairs for any length of time unless you have made wise and adequate provision for protection from without. The proposition I am going to lay down is based upon that general plan.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. In just a moment. I assume that those who are opposed to my amendment do not maintain that their country's defense can be provided by recourse to any international organization—that is, to any international parliament, or any international judicial system, or to any international

executive who may have power to enforce our rights or protect us in our liberties and our vital interests when they are endangered from without. I assume that no Member will maintain that we can let our national defense rest upon arbitration, since arbitration treaties specifically exclude from the domain of arbitration questions of vital interest and national honor, the questions over which nations fight; nor do I believe that any Member of this House will seriously maintain that America ought to allow its national defense to rest simply upon the balance of power of other nations, a plan that Turkey and China and other nations have followed to their great undoing. Therefore I believe we can all start with this proposition: America must provide herself for her own defense. The agencies available are the Army and the Navy. There is no other means. If you have water surrounding your shores, you can utilize naval power more and military power less. The advantage fundamentally in naval power is that it employs ships, or property, and does not involve military activities of the people. It is estimated that one battleship with 1,000 men is equivalent to an army corps of 50,000 men. Military activity amongst the masses of the people of any nation is undesirable. It takes men away from productive pursuits, interfering with the best economic development. The military conditions undermine the democratic relations that ought to prevail between the country's citizens for the best development of free institutions. America is so fortunately located that we can by utilizing property and not men provide an absolute security, a perfect security, on the sea.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent to proceed for a brief time.

Mr. PADGETT. Mr. Chairman, I must object to all extensions at this time. I move that all debate upon this amendment do now close. [Cries of "Vote!"]

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee that all debate upon the amendment now close.

The question was taken, and the motion was agreed to.

Mr. TRIBBLE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend the amendment by striking out the word "four," at the end thereof, and substituting therefor the word "one."

The CHAIRMAN. The question is on the amendment to the amendment.

Mr. MANN. Mr. Chairman, I take it that this is open to debate. Having closed debate on the Hobson amendment, is debate closed on the amendment to the amendment?

The CHAIRMAN. The Chair thinks not.

Mr. HOBSON. Mr. Chairman, I would like to be heard upon it.

The CHAIRMAN. The gentleman who proposed the amendment is entitled to the floor, if he wants it.

Mr. TRIBBLE. Mr. Chairman, it is not my purpose to consume the time of the House in the discussion of the one-battleship amendment which I offer. We have had discussion now for several days on this appropriation bill, and my position is well known to the membership. The expense of this bill, as everyone knows, at the present time is $127,000,000, without considering battleships. Last year we appropriated for one battleship. This bill carries the second-year appropriation for the construction of that battleship. About one-half of the amount necessary to construct a battleship is carried in the bill the year of the authorization, and the succeeding appropriation carries the balance necessary to complete the ship. Mr. Chairman, if it increases this appropriation from $123,000,000, with one battleship in 1912, to $150,000,000 the present year, carrying only one-half the necessary amount to build two battleships, and providing for the first year's appropriation, and the next year to provide for the other half to complete these two, where will the appropriation stop next year. Suppose you vote two this year and next year two, then you have the one-half carried over for next year's appropriation and the first year's appropriation on the next bill. Mr. Chairman, we should consider next year's appropriation when we authorize battleships. If we show no better economy in building two battleships and keeping up the expenses of the Navy than we have in building one, the present year, I hesitate to forecast what amount the bill for the year 1914 will carry. I have stubbornly contended for economy in the operating expense of the Navy. In view of the truth that this bill carries $127,000,000 expense and will not be reduced, I appeal to the Members of this House to support this one-battleship amendment; for, sir, if we can not build battleships any cheaper than we are now constructing them, one is all we can afford to authorize in this bill. [Applause.]

Mr. PADGETT. Mr. Chairman, I want to ask now if we can not reach an agreement for debate. I would like to see if we can not reach an agreement for closing debate upon this amendment?

Mr. MACON. Mr. Chairman, will the gentleman yield to me?

Mr. PADGETT. Yes, sir.

Mr. MACON. Mr. Chairman, I want to say that, in my judgment, if we were to talk here until the hot place that we have heard of so often is frozen over we would not change a single vote on this battleship proposition. Every man in the House knows right now whether or not he is going to vote for four, three, two, one, or no battleship, and therefore I want to serve notice on the House now that it can not afford to consume a single extra moment of its valuable time in the closing hours of this session in the further discussion of this threadbare question. I object to the consideration of extra time for debate.

Mr. HOBSON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HOBSON. Is a substitute for an amendment to the amendment in order? I desire to offer now a substitute for the amendment as amended.

The CHAIRMAN. The Clerk will report the substitute.

The Clerk read as follows:

Substitute for the amendment to the amendment the following: "On page 54, line 21, strike out the word 'two' and insert the word 'three.'"

Mr. HOBSON. Mr. Chairman, as I was stating when my remarks were cut short, we are in a unique position——

Mr. TRIBBLE. Mr. Chairman, a point of order. I desire to know if the gentleman who has offered an amendment can now offer a substitute?

Mr. HOBSON. Mr. Chairman, I do not desire to be interrupted. I was saying that if we desire we can safeguard our country against any enemies by simply utilizing ships that will stand between our shores and the great standing armies of the world. Now, if we have undisputed control of the sea, we need not have a great standing army, and yet no military nation on the earth could utilize her standing army in a war with us. Therefore, we would have our best guaranty of peace. Furthermore, if we have control of the sea and for any reason war does come, then we have an opportunity to end the war quickly by a test of naval power, and we would never be compelled to call out a great standing army and have a long expensive war of endurance that would tend to bring militarism upon us. Therefore, resolved to its conclusion, it is a wise policy for this Nation to at least in the very minimum have an equilibrium on the Atlantic with any nation in Europe that maintains permanently a great standing army, and to have on the Pacific a fleet at least equal to that of any nation of Asia that keeps permanently a great standing army. And I want to say with regard to the reference of the gentleman from Georgia [Mr. TRIBBLE]—I will stake my professional reputation on this proposition—that if we properly reorganize the Navy from top to bottom we can maintain a navy equal to the navy of Germany; we can maintain a navy that would embrace three battleships and four battleships a year, and, in proportion, auxiliaries; we can maintain a navy half as strong again as the present Navy that would be fully half again as efficient as the present Navy on the present cost. I would undertake, if given a free hand, to have such a navy to never exceed in cost $150,000,000 a year and include a naval program as large as called for in my amendment.

But it is not such a question. We must have the ships if we are to have security. It is far from me to undertake to point out that any nation would likely enter into war with us, but it is a fact that the completion of the Panama Canal and the development of this hemisphere is going to be a practical question for all the nations of the world.

We have laid down a proposition that the colonial system adopted by the old world shall not be applied in this hemisphere. That proposition will be accepted by the world, and the world's peace will be secure if we have an approximation toward control of the sea in the Atlantic; and if we do not have the control of the sea, if we fall below equilibrium of naval strength with continental nations of Europe, then the colonial systems of Europe will be applied to this hemisphere, and that would entail a long, costly, and bloody war that would tend to make us military. And I lay down the further proposition that, occupying Pearl Harbor, the most strategic point in the world, occupying Panama, the next most strategic point in the world, both over seas from us, occupying the Philippines, that we must protect whether we set them free or not, having Alaska, a great treasure house, that in the Pacific Ocean, where two great races are meeting, where a centralized expanding monarchy is coming in contact with a decentralized Republic, we can only hope to solve the problems there and maintain our national defense with an equilibrium of power on that ocean. Such an equilibrium would tend to make the open-door policy effective and give us peace at home and contribute greatly to the peace of the world. This means a fleet in the

Pacific parallel with that of Japan. The two oceans being so far away we must have equilibrium in both at the same time.

Now, then, I wish to call the attention of the Members to the report of the Bureau of Naval Intelligence, which I have printed in my speech of last Saturday, which appeared in yesterday's RECORD, showing what will be the standing of the naval powers in the years to come, provided that America has only two battleships. We go to the fourth place by 1916. My amendment would not be more than necessary to keep us in third position.

The CHAIRMAN. The time of the gentleman from Alabama [Mr. HOBSON] has expired.

Mr. BATHRICK. Mr. Chairman, in the five minutes allotted me I desire to announce my advocacy of the one-battleship program. I believe it is absolutely true that no man can give a better reason for two, three, or four battleships than he can for no battleships. The trouble with the whole proposition is that there has not been given a good reason for a large extension or a small extension or no extension at all of our battleship program. Now, that is the condition of mind of the Members of this House to-day, I believe, succinctly stated.

Mr. HOBSON. Will the gentleman yield for a brief question?

Mr. BATHRICK. In just a second.

There is only one reason that should appeal to the sensible mind, that stands between the large-battleship program and the no-battleship program, and that is the one thing that appeals to the mind of every man in his private business and should affect him in the consideration of public business, namely, caution. We employ caution in our private business. We buy locks for the doors of our houses. We pay sums far in excess of the cost of battleships with which to supply policemen and constables and sheriffs and justices of the peace and judges in our country and in our city governments. Why do we do that? We do it for protection, for caution. And if we are to throw aside all caution in the matter of protection for our national interests and protection of our shores with battleships we might just as reasonably assume that we do not need the services of policemen for patrolling our streets. It is true that when we retire at night and lock the door we do it merely from a sense of caution—because there have been burglars. No man can say that there will be burglars, which failure of human prophecy would be as good a reason not to lock the door as it is not to maintain a navy. No man can say there will be war; but we know there have been wars, and we know there may be in the future, and therefore we should, in the exercise of our duty as representatives of the people, use ordinary caution in consideration of this matter.

A great deal has been said about the enormous cost to the people. We have considered this bill item by item, and we have stricken out, in my opinion, some things that were needed for the ordinary efficiency of the Navy, to keep just what we have and not expend another cent to get more. I do not want to be too cheap, and yet, at the same time, I would like to have the people of my district believe and the people of the country believe that I belong to the ranks of the real, true, genuine economists. But I do not believe it is economy to close the doors, pull down the shutters, and go out of business. It is not economy for us to do less than ought to be done. It is economy for us to do what ought to be done, and no more, and do it for less than any other party that has been in power if we can. In the construction of the one-battleship program, who pays? Why, the people of this country are buying of tobacco, beer, cigars, whisky, and other things that are strictly luxuries or arrant follies, over $30 per capita per year. They are paying internal revenue of about $3.50 per capita per year. What are you going to say when you go back home and tell your constituents that you refused to supply a battleship that cost each of them 7 cents this year? What are you going to say to the man who spends $20 for whisky, beer, and tobacco when he asks you why you refused to spend the few cents that might prevent his sons being drafted to go forth and risk their lives to repel invaders?

When 1,000 men on a good battleship represent the force of 50,000 on land and might keep an enemy from our shores, what will you say to the mother whose son may be called upon to give his life because of an irrational and cheap economy?

Government costs money. While you know I have fought to keep down this bill and am against a large extension program, I will not object to expenditures that seem demanded by ordinary business judgment.

Why, you can not go home and tell your people that they should not expend a reasonable sum per year for the exercise of caution and the protection of their country and to keep the old flag flying where hundreds of thousands of lives were freely given to plant it. You can not make them think that.

But what about our people who do not use these luxuries? They are not really ground down to the earth by reason of overtaxation for internal revenue, because they do not use the things that pay internal revenue. When you come to find out who pays these taxes you find that the man who is poor very often pays much of it because of his extravagant habits. We will arrange it in the next Congress by the income tax and reduction of the tariff so that his other taxes will be lighter and he will pay much less on his necessities.

Mr. Speaker, I am for caution, for one battleship. I would rather 1,000 men risk their lives at sea, if necessary, than 50,000 on shore.

Mr. HENSLEY. Mr. Chairman, throughout the pendency of this bill I have tried to be consistent. I have endeavored not to raise a point of order excepting in such cases where I was absolutely certain that it was in the interest of the people and that the point was well taken. I believe that we, as Members of this great body, should act carefully, deliberately as well as patriotically, exercising every bit of wisdom that we can bring to bear upon all propositions, and I want to say here and now—and I would like to have the attention of the House while I say it—that I do not believe, under the present situation of things, as things now exist, that there is a set of business men anywhere that would stand for two battleships much less for three or four, as the gentleman from Alabama [Mr. HOBSON] suggests. Then why should we not deal as carefully, as judiciously with the money of the people as we would with our own private funds?

I stand for an adequate Navy. I would not be worthy the confidence of anybody if I did not stand for a Navy that is sufficient to meet all the needs of this great Government of ours. But I insist here and now that we do not at this time need two additional battleships in order to make the Navy adequate and sufficient.

But the gentleman from Alabama declares that we ought to be able to show why we do not need them. I have heard this fallacious argument made several times in connection with this debate. My God, my friends, has it come to that, that we are thrown on the defensive, have to assert and make proof as to why we do not need the many things enumerated in this bill, aggregating millions of money, instead of the other fellows, the proponents, showing why we do need them? I insist that when you ask for an appropriation, when you ask us to go into the Treasury and take the people's money, you should be required to assign some just and valid reason for so doing, instead of trying to throw the burden on those who insist it ought not to be done. [Applause.]

Now, then, I know that I ought not to presume to discuss this question with the gentleman from Alabama [Mr. HOBSON], because I am in the category with my friend from Mississippi [Mr. WITHERSPOON]. Perhaps, in the judgment of the gentleman from Alabama, I have not sprouted my pin feathers.

But I want to say here and now that if constancy and devotion to every public duty is calculated to sprout pin feathers, I am constrained to believe that even though my friend from Mississippi is serving his first term he has had greater opportunity to develop his pin feathers than has the gentleman from Alabama, although the gentleman from Alabama has been on the pay roll for six years, because I see him on the floor of this House only when the things in which he is particularly interested are up for consideration. [Applause.]

Now, he says that we need these battleships which are increasing the amount of our appropriations by leaps and bounds and yet he tells us that as soon as we adopt his plan of council of national defense all will be well. Now, I want to call your attention to something else. There is a magazine which circulates throughout this country called, I believe, the Navy, or the Navy League. It is a monthly periodical. I want to call your attention to whom the officers of this magazine were in 1912—the officers of the Navy League of the United States. We find that the president of the league is Gen. Horace Porter; the treasurer of this league is J. P. Morgan, jr., 26 Wall Street, New York City; the counsel is Herbert L. Satterlee, who I am informed is a son-in-law of J. Pierpont Morgan, sr. This morning you no doubt all received a circular letter from this league, indorsing the plan of the gentleman from Alabama for a council of national defense.

That is the proposition. [Applause.] They not only set out the platform adopted by the Democratic national convention at Baltimore and what it says on that subject, but they cite the planks contained in all the party platforms and urge that Democrats as well as Republicans live up to these platform pledges. I desire to remind these gentlemen that these statements contained in the party platforms do not mean any particular plan of national defense. It does not require any great amount of wisdom to understand and appreciate just why the Morgans and their crowd favor a big navy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. I ask unanimous consent to extend my remarks in the RECORD.

Mr. HOBSON. Reserving the right to object, I want to ask the gentleman if he intends to insert in the RECORD any further matter of a personal nature? I have no objection to what he said on the floor.

Mr. HENSLEY. I will not pursue the course that was pursued by the gentleman in the last session, of inserting in the RECORD, under unanimous consent, words that I did not use on the floor. No; I shall not.

Mr. HOBSON. Then I do not object, Mr. Chairman.

Mr. SAUNDERS. Mr. Chairman, I move to strike out the last two words.

Mr. MANN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois.

Mr. MANN. What last two words can be stricken out? There is an amendment pending which consists of only one word. Now, can you not reach an agreement as to how long debate shall run on the paragraph?

Mr. SAUNDERS. I think that is exceedingly desirable. The question of one or more battleships is now before the committee. So far as I am concerned, I am entirely disposed to agree upon a moderate time for debate, and have the precise hour set at which we shall vote. This has been my attitude all the time.

Mr. PADGETT. I renew my request.

Mr. MACON. Mr. Chairman, reserving the right to object, I desire to state that this subject of battleships that Members are now discussing has been discussed in the committee room, upon the floor of this House, in the cloakroom, in restaurants, in the hotels and cafés of this city, upon the streets, and, in my judgment, everywhere else except on the housetops and in the gutters; and the only reason the question has not been discussed on the housetops and in the gutters is because none of our membership have risen as high as the housetops or fallen as low as the gutters. For that reason, and knowing how valuable time is in this House in the closing hours of the session, I say most emphatically that all the powers within the House can not get me to yield my position or my rights under the five-minute rule that the committee is operating under at this time.

Mr. SAUNDERS. I should like to ask the gentleman a question.

Mr. EDWARDS. I demand the regular order.

Mr. SAUNDERS. I should like to ask the gentleman from Arkansas if he has not changed his position in reference to battleships?

Mr. MACON. No, sir.

Mr. SAUNDERS. I have before me a speech which the gentleman made two years ago.

Mr. MACON. I have not changed my position upon the question during this Congress.

Mr. SAUNDERS. The gentleman confines his answer to the life of the present Congress.

Mr. MACON. Yes. That is the Congress that is legislating upon the subject, is it not?

Mr. SAUNDERS. If the gentleman from Arkansas can change his mind with respect to this matter, other gentlemen upon a proper presentation of the case on its merits may be induced to do the same. Formerly the gentleman favored one ship, now he favors two. Possibly at the conclusion of reasonable debate Members now favoring two ships may be satisfied that after all we do not need more than one battleship a year at this time.

Mr. Chairman, I wish to move an amendment in the nature of a substitute.

Mr. MACON. Mr. Chairman, I call the attention of the Chair to the fact that all debate on this amendment has expired.

The CHAIRMAN. All debate on this amendment has expired.

Mr. HOBSON. I make the point of order that all debate on this amendment has closed.

The CHAIRMAN. The gentleman is correct.

Mr. PADGETT. I ask unanimous consent that I may address the House for one minute. I wish to submit a request for unanimous consent, and I hope that my friend and colleague on the committee will consent to it, that we limit the debate on this paragraph and all amendments to one hour.

Mr. MACON. With the greatest possible deference to the gentleman from Tennessee, I want to submit this question to him: Does he believe that an hour's debate will change any vote in the House on this question?

Mr. PADGETT. There is more in a debate than changing votes in the House. We have a right to let the discussion go to the country.

Mr. MACON. I realize that there is more in debate than the simple proposition of changing votes. Some Members want to talk to the galleries and some of them want to talk to their constituents at home through the medium of the CONGRESSIONAL RECORD. I think we ought to take a vote here on the question before the House without regard to the galleries and without regard to the messages that we want to send home to our constituents. I therefore object to the extension of time for debate.

Mr. MURRAY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURRAY. Failing the unanimous-consent agreement that the gentleman from Tennessee suggests, is it not in order to move to close debate on the paragraph and all amendments in one hour?

The CHAIRMAN. It is.

Mr. MURRAY. Mr. Chairman, in the confusion I did not catch the reply of the Chair.

Mr. UNDERWOOD. Mr. Chairman, I ask the Chair to state the question before the vote takes place.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Virginia.

Mr. SAUNDERS. Mr. Chairman, it is impossible to hear what is going on.

The CHAIRMAN. The Chair has no doubt that all members of the committee are anxious to get along with the consideration of this bill. The Chair asks their cooperation, and gentlemen can not give it in any better way than by refraining from conversation and keeping their seats. [Applause.]

Mr. SAUNDERS. Mr. Chairman, have I the floor?

The CHAIRMAN. The gentleman has the floor.

Mr. EDWARDS. The amendment has not been read, Mr. Chairman.

Mr. SAUNDERS. My amendment was to strike out the last two words of the substitute.

The CHAIRMAN. There is but one word in the substitute.

Mr. SAUNDERS. I came in just a moment ago, and do not know the exact parliamentary status. I desire to amend the substitute, and would like to have it reported.

The Clerk read as follows:

As a substitute for the amendment to the amendment insert the word "three" in lieu of the word "four."

Mr. SAUNDERS. Mr. Chairman, I desire to amend the substitute. I am compelled to take this course, Mr. Chairman, by reason of the tactics that have been pursued in order to hinder me from addressing the House at this time.

Mr. MADDEN. Mr. Chairman, a paliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MADDEN. How many substitutes and amendments to substitutes can be pending at the same time?

The CHAIRMAN. An amendment, an amendment to the amendment, and a substitute for the amendment to the amendment. The amendment moved by the gentleman from Virginia is the text of the bill now.

Mr. MADDEN. I make a point of order that it is not in order.

Mr. RODDENBERY. Mr. Chairman, would it not be in order for the gentleman from Virginia to move to amend by making it "no battleships"?

Mr. SAUNDERS. I move an amendment to the substitute, as follows: I move to strike out the word "three" and insert the word "no." Mr. Chairman, this bill, and more particularly the battleship feature thereof, has been discussed from the practical standpoint, from the patriotic standpoint, from the business standpoint, and in largest measure from the sensational standpoint.

Mr. GARDNER of Massachusetts. Mr. Chairman, a point of order. The amendment has not been reported from the desk.

Mr. SAUNDERS. That is true, but I have stated what it is.

Mr. GARDNER of Massachusetts. But I do not know what it is, and I have a right to know.

Mr. SAUNDERS. Of course if the gentleman insists, he can have the amendment reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the substitute by inserting in place of the word "three" the word "no."

Mr. SAUNDERS. Mr. Chairman, it is chiefly from the sensation mongers that the cry comes for additional battleships. I was astonished when I came into the House to-day to find the gentleman from Arkansas [Mr. MACON] vehemently insisting upon an immediate vote. He was unwilling to wait a minute. He asserts that the mind of no one Member will be, or can be changed by debate. I know of no better illustration of change than the gentleman from Arkansas.

Mr. MACON. Will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. MACON. I do not think the gentleman wants to misrepresent me. I said the minds of Members could not be changed by argument on the floor now.

Mr. SAUNDERS. Why does the gentleman confine his statement to this particular time? A few years ago there was no more vehement opponent of two battleships than the gentleman from Arkansas. He has afforded no reason for this change of front. In his speech against two battleships during the session

of 1908 he averred that the demand for two battleships proceeded from jingoism pure and simple, and that he was not to be driven from voting for one ship by the suggested danger of impending war.

Mr. MACON. Has the gentleman heard me say that I was in favor of two battleships?

Mr. SAUNDERS. No, but I understand that is the gentleman's attitude.

Mr. MACON. Then why discuss me or my position on the subject?

Mr. SAUNDERS. Because I understand that is the gentleman's attitude. As I say, when our friend from Arkansas is so clamorously anxious to prevent any fair discussion of the battleship feature of this bill, my mind reverts at once to his attitude of a session or two ago. He was an economist, and little-navy man at that time, and I was in full accord with him. I thought he was right then, and I know that I am right now. In view of that attitude, and of his change of mind, it is hard to understand his present stand, or to see why he insists upon shutting off the light of full and free discussion. If the two-battleship proposition stands on the solid ground of reason, if it is buttressed by weighty argument, why fear attack, why avoid the challenge to high debate?

The gentlemen who place their votes for two battleships on the grounds of patriotic necessity, and vital self-defense, apparently lack the courage of their convictions. We are told that the Members of this House who are mere Congressmen, and not authorities on naval construction, should hearken to the voice of the experts, and from that illuminating source, ascertain our patriotic duty, and secure the definition of a proper and adequate Navy. Having hearkened, presumably we ought to heed. The one expert on this floor, the one man who speaks with the voice of authority, is the gentleman from Alabama [Mr. HOBSON]. When he is asked for a definition of an adequate Navy, for an exposition of a proper building program for the United States, he tells us that it should be not less than six battleships a year. He tells us further that each battleship should be accompanied with four destroyers, so that a program of six battleships a year carries with it a necessary sequel of 24 destroyers—that is, the entire program means the annual construction of 30 ships. If this be true, if the dangers that he parades before our excited imaginations, are real, and not the airy fabric of a dream, then two battleships a year as reported in the naval bill, is not an adequate Navy. It is a pitiful, wretched, inadequate Navy, far short of the necessities of the situation, and inviting, rather than capable of repelling attack. Surely these gentlemen who have worked themselves into so fine a frenzy over impending dangers that in their view threaten the very life of our Republic, are woefully lacking in patriotism, if they are content to vote for two ships a year, when the voice of the expert, and proper regard for the protection of our homes and firesides, alike tell them that they should insist upon six! Six battleships then, and not two should be the patriotic program. Go forward gentlemen, valiant aggregation that you are of jingoes and Don Quixotes, and attack the windmills of your fevered imaginations, we at least are content with a Navy that is sufficient for the purposes of defense, and not large enough to tempt this country to commit lawless aggression.

Mr. Chairman, I can not afford an adequate discussion of so large a subject in a few minutes, but I desire to call the attention of the House to one or two fallacies that have been injected into this debate by the advocates of the jingo policy. One is the assertion that this country speaks with more authority in the world of to-day, than heretofore. I deny this. Another fallacy is that the Monroe doctrine requires a great Navy for its maintenance. I deny this too. When did the United States speak with greater authority than in the establishment of that doctrine? And yet at that time we lacked both a Navy and an Army sufficient to make our position effective in the Western Hemisphere, if our assertion had been challenged by the Holy Alliance which then dominated Europe. Where were your battleships, where was your naval or military strength adequate to maintain the principle which we so firmly announced in the natal days of our Republic? Where was the brute and compelling force sufficient to meet and crush the forces of united opposition if our challenge had been accepted? The gentleman from Alabama has been born out of season. The lesson which he now urges us to accept should have been pressed upon Monroe and his Cabinet. But somehow, and in some fashion, without an armed establishment the Government of that day carried its point, and both announced, and maintained a doctrine, that was almost insulting in its challenge to the powers of the world.

Mr. Chairman, this is not a question of a great navy, but of a greater navy. This country has a great Navy, a far greater Navy than the man in the street is aware of, when he listens to the ranters who would have him believe that sane and moderate men are unwise and unpatriotic, merely because they are unwilling to waste the substance of the country in a wild riot of naval construction. In this connection it is not amiss to say that the enlisted men and officers in our Navy number 65,614. Our fighting ships of all sorts, number 277. Comprised in this mighty aggregate, which a few months ago was pronounced magnificent by President Taft, are 11 armored cruisers, 28 torpedo boats, 38 battleships, 33 of which are ready for action, 63 submarines, 47 of which are complete and in service, and other auxiliaries. The guns large, and small on these vessels, may almost be said to be numberless. Compared with the guns of every other nation in the world, save England, and the jingoes always exclude England from their calculations, the guns on our ships in weight, and carrying power are distinctly superior to all others. Comparing the gun power of our Navy with that of Japan, I mean particularly in respect of the 12, 13, and 14 inch guns, the preponderance is largely in our favor. Comparing our gun power with the naval gun power of France, or Germany, the difference is strikingly in our favor, though not so great as in the case of Japan. And yet in the fevered imaginations of some well-meaning, if hysterical people, we are in imminent danger all the while from nations on the other side of the world, nations that would be compelled to cross the heaving oceans that separate us, and without naval bases, or coaling stations, challenge us to protracted war in our domestic waters. Does it never occur to these people that if Germany has to build ships for home defense she can not afford to risk them in a war with this country, and incur the dangers of torpedoes, mines, and submarines, not to speak of our fighting ships, in an effort to blockade our coasts? War to-day to a greater extent than ever before in the history of the world, is a matter of matching purses. What nation, or combination of nations can match purses with this country? The bank assets of the United States are $17,000,000,000. The bank assets of the rest of the world, roughly speaking amount to no more than this sum. A combination of nations might for the time being drive us from the high seas, and cause us to withdraw within our coast lines. Such a combination might for the time being capture our outlying possessions, but these are not vital to our stability, greatness, or capacity to make war, or to sustain ourselves. Nor would the capture of these possessions add anything in a material way to the power of the captors. Destroy, or materially interrupt the trading power of this country, and such an interruption would be the most dreadful blow that could be struck to Germany, Great Britain, or Japan. Persistence in hostile relations with this country, coupled as it would be with the inability to strike us at any vital point, would bring these countries to the verge of bankruptcy within a comparatively short period. So great would be the disorder in the world's affairs ensuing upon such a conflict, that the nations engaged in its conduct would be unable to finance their operations for a limited period, much less to the extent necessary to bring this country to terms.

The foreign countries know these things as well as we know them ourselves, and we must credit them with a little common sense. They may not be afraid to fight, but the matter in issue must be worth the struggle. Conceivably in the view of the men who play the war games, landing parties from other countries might descend upon our coasts, but there is always the question of return to be considered. War must be waged under modern conditions. Cities are no longer sacked, and countries invaded for booty and slaves. The age of the viking, of the pirate, of the robber nations, has passed. In the destruction of the material resources, and of the purchasing power of another nation, the country that accomplishes such a result, aims a blow at herself. Hence even in the contingencies of war, our coast cities would not be destroyed, nor private property given over to fire and sword. To hold any portion of continental United States is beyond the power of any combination of nations on the globe. Great Britain retired baffled from the War of 1775. At that time she was the giant, and we the pigmy. Now we are the giant, and any nation, or aggregation of nations invading this country would be the pigmy. This is not the language of boasting, but mindful of our population, of our resources, of our present wealth, of the virility of our people, and the intensity of our patriotism, it is the language of sober common sense.

But if our Navy is mighty and awe compelling from the standpoint of ships and gun power, it is even more impressive from the viewpoint of expenditure. Few people who prate lightly of the need of a greater navy, are aware of the vast sums that we are spending, and have spent within the last decade upon our naval establishment, sums out of all proportion to the necessities of the situation, and imperatively needed in other directions of useful expenditure. The inspiration of

much of the clamor for a greater Navy comes from interested quarters, from the concerns that find profits in the work of construction, and in the contracts for material. It is not patriotism, but the dollar, that maintains a large proportion of the naval propaganda. Like the daughters of the horse leech these people are never satisfied. But it is well for the men who pay the piper, to count the cost of our participation in this vicious circle of never-ending, always-increasing expenditure which inevitably attaches to a policy which makes the program of other nations collectively, and individually, the measure of our own.

Within the past 10 years we have spent on our naval program $452,666,114 more than France has spent. We have spent $410,455,321 more than Germany has spent. We have spent a billion dollars more than Japan has spent. The greatest expenditure that Germany has made in any one year is $110,000,000, which is $29,000,000 less than we spent in 1911. The greatest expenditure ever made by France in any one year was $89,000,000, which was $50,000,000 less than we spent in the same year. The greatest amount that Japan ever spent in any one year was $46,000,000, which is $90,000,000 less than our highest annual expenditure.

These figures are startling, bewildering, and passing the ordinary understanding. Yet we are told that the expenditure of these gigantic sums has been practically useless, that our coasts are defenseless, and our Navy inadequate, insufficient and lagging far in the rear.

A large navy is sometimes likened to an insurance policy, but when the premiums become too high, the assured prefers to carry his own risk. So with an army, or navy. It is perfectly apparent so far at least as we are concerned that it is a race of folly that we are running when we build ships, merely because other nations in their ambition, or madness choose to impoverish their people in the pursuit of this insensate policy. The people of the older world groaning as they are under the burdens of military expenditure, find at least a haven in this country. They flock in millions to this land of free institutions, and greater opportunity. But when in time, and that time is not distant unless our policies are changed, this country will groan under the burden of an overweening naval establishment, no avenue of escape is open, no fair land of promise beckons, for our toilers and taxpayers. It is the history of the world that military establishments never go backward. But at least if we can not retrace our steps, we need not go forward. At least we can halt, and if satisfied that our Navy is adequate and sufficient for the purposes of defense, address ourselves to the task of maintaining that Navy in the highest state of efficiency. One battleship a year does not mean that naval construction will be limited to one ship a year. Many incidental ships form the tail, so to say, of the battleship kite. The gentleman from Alabama [Mr. HOBSON] says in substance that it is folly to build a battleship, unless at the same time provision is made for four accompanying destroyers.

This is why our efforts for moderation and economy should be directed toward reduction in battleships, rather than in other vessels. Strike out a collier, or destroyer, or submarine, and you save the cost of that vessel. Strike out a battleship, and a whole sequel of other construction falls with it. Mr. WITHERSPOON of the Naval Committee emphasizes this distinction in his very able speech:

> Whenever you add one more battleship to the Navy, that necessitates more men. It necessitates more coal; it necessitates more powder; it necessitates more guns; it necessitates more clothing and more food. The fact is that it increases every expense of the department. The cost of a battleship is not the $16,000,000, we have to pay to construct it. No man knows what it does cost, because it increases the expense in every bureau and department of the Navy. A battleship causes all the expenses of the Navy to rise, just as the revolutions of the moon causes the tides to rise, but unlike the moon, it never causes them to ebb. [Applause.]

It is begging the question for the advocates of two battleships a year to insist that a vote for two ships, is a vote for national defense, and national honor. If national defense and national honor require six ships a year, as insisted by the gentleman from Alabama, then a vote for two ships is not a vote for adequate national defense. Such a vote is far short of our duty. If six ships are required, we should be ashamed to vote for two. But if the construction of one battleship a year is sufficient to render our Navy adequate to defend this country against the attack of any nation on earth, then a vote for two battleships a year is a vote for vicious folly, and criminal extravagance. Mr. Chairman some of us at least have become alarmed at the vaulting proportions of our naval expenditures. Unless we succeed in some measure in amending this bill, it will carry over $146,000,000. This will be $23,666,825.78, more than the amount carried in our last bill. And yet there is not a cloud on our horizon to justify this increase. At this rate, the naval bill will carry over $250,000,000, within the next few years. These figures are appalling, menacing, portentous.

Convinced that some organized effort must be made to stay this un-American tendency toward militarism, the moderate-navy men in this House have affiliated themselves in a movement to make a concentrated attack upon the vicious features of this bill. Looking to that end they have held various conferences. I have had the honor to preside over these conferences, and to be associated with the conduct of the fight on this floor. Our meetings have afforded merriment in some quarters. We have been styled economists, and little-navy men. These appellations have not been intended to be complimentary. Quite the reverse. Presumably as little-navy men, we are unable to comprehend the calls of honor, patriotism, and national defense which are claimed to be the impelling forces in the movement for a greater navy. To be an economist, in the view of some, is to be a little fellow who can not rise to the height of this argument, and who is so far behind the vanguard of the navy procession that he insists upon some decent regard for the pledges of the Democratic platform relating to economy and efficiency in the departments of our Government.

Extravagance is extravagance, without regard to the branch of government in which it occurs. Our forefathers fondly conceived that this was an isolated country, in which we could develop without regard to the jealousies, and policies of continental Europe. The greater-navy advocates have ascertained that this is a mistake, that so far from being an isolated country, this is the most exposed country in the world, calling for a great Army, and a greater Navy to defend its vast stretches of coast line. So far from being able to develop apart from the entanglements of Europe, it is insisted that we are drawn into the swirl of its policies, willingly, or unwillingly, and must order our own naval program according to the individual and collective programs of the Governments of the old world. The gentleman from Alabama [Mr. HOBSON], who is for peace and battleships, is literally for peace at any price. His theory of construction is a very simple one. Ship for ship, and gun for gun, he would set the pace for the other countries of the world, until from very inability to build further, they would cry, "Hold, enough." A cessation of dreadnought building would then ensue throughout the world, and universal peace would reign, but it would be the peace of exhaustion.

Once enter upon this insane competition, once divert the energies of the world in this direction, with every available resource strained to afford the means to maintain such a program, and the march of development in a hundred directions of utility would be stayed for generations to come. Its blighting effect upon civilization would be greater than that of the Thirty Years' War on Germany. A nation that builds an aggressive navy begins to dream of wars, and rumors of wars, to plan conquests, and adopt the attitude of the man with the chip on his shoulder. Conceivably the great nations of the world, or some combination of them may unite in war against us. In that view our Navy is not adequate to carry the war into their waters, that is it would not be adequate in such a contingency for offensive war, but even in that event it would be fully adequate for defensive war. It is amply "sufficient to provide for any contingencies within the limit of probabilities."

The CHAIRMAN. The time of the gentleman has expired.

Mr. SAUNDERS. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. HOBSON. I object. My own request for an extension was ruthlessly objected to.

Mr. MANN. But the gentleman from Alabama had 1 hour and 40 minutes in general debate.

Mr. SAUNDERS. I have not consumed 15 minutes of the time of this House during the entire debate on this bill.

Mr. HOBSON. Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SAUNDERS. Mr. Chairman, I have no disposition to trespass upon the time of this body, and however feebly or inadequately I may be debating the pending proposition, I can at least say that I am discussing the matter in hand, and not cumbering the RECORD with foreign, or irrelevant subjects.

Reverting to the assertion that we will not be heard to speak with authority in the civilized world, unless we are prepared to make our contentions effective with bristling bayonets, or terrifying battleships, I wish to ask what force did the United States possess as compared with that of Great Britain, when President Cleveland required that country to submit the Venezuelan controversy to aribtration? At that time the fleet of the United States was immeasurably inferior to that of England.

The disparity was even greater than that which existed at the time of the War of 1812. Yet once again, even as in the case of the institution of the Monroe doctrine, the moral strength of our position, as well as the latent might of this Republic, ready if necessary to be called into play, were more effective than the menace of the mailed fist. Great Britain could not afford to take issue with us, and gracefully yielded.

There is still another historical incident to which I will refer.

Mr. SHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. SHERWOOD. Mr. Chairman, I would like to give the gentleman what the Navy of 1823 was, when the Monroe doctrine was proclaimed.

Mr. SAUNDERS. I will be very glad to have the figures.

Mr. SHERWOOD. At that time we had only 10,000 soldiers in the Regular Army, including Infantry, Artillery, and riflemen, and our population was less than 10,000,000. So far as the Navy is concerned, we had 7 wooden battleships, 9 small frigates, 2 corvettes—low sloops with one tier of guns—5 sloops, 2 brigs, and 5 small schooners; 30 war craft all told. The appropriation for the Navy for that year was $929,513. We defied the whole world at that time under the Monroe doctrine. I have the list of midshipmen here also. We had all told in the Navy at that time 512.

Mr. SAUNDERS. Mr. Chairman, I thank the gentleman for this timely contribution of weighty facts. It is a complete refutation of the claim that the Monroe doctrine must be abandoned unless we build two battleships a year. One more illustration. Just after the Civil War passions ran high. Public sentiment in this country was inflamed toward Great Britain in consequence of the losses to our commerce due to the ravages of the *Alabama*, and the United States firmly believed that she had been greatly wronged by the attitude of the authorities of that country. We were ready for war, and not afraid to fight, but we had no Navy adequate to meet the navy of Great Britain on the high seas. Yet without the exercise of compulsive force, we compelled Great Britain to submit the *Alabama* claims to arbitration, and secured an ample award.

Mr. HOBSON. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. No, I can not yield for lack of time.

Mr. HOBSON. At that time we had control of the sea.

Mr. SAUNDERS. I deny that proposition.

Mr. Chairman, I desire to call attention to some further facts in connection with this frenzy for more battleships. A few years ago the people who demanded two battleships a year were characterized by my friend from Arkansas [Mr. MACON] as jingoes. He said then that he had no apprehension of danger from the wars that were so freely predicted by the advocates of naval expansion. He declined to approve the policy of a mighty Navy, presented by the enthusiasts of that day with so much heat and vehemence, and with such direful pictures of woes to come, unless it was adopted. Firmly assured of his position he was not moved by the hysterical appeals of the frenzied jingoes. I wish that I could quote him at length on this line, but space and time forbid.

Mr. MACON. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Certainly.

Mr. MACON. I may have said what the gentleman says I did. I reckon I did—I am sure I did—but I was not as well advised upon the necessity for an adequate Navy as I am now; and, furthermore, my party had not declared by its platform for an adequate Navy. I was left to judge from the information that I had before me at that time. Information was what I acted upon then and it is what I am acting upon now. With the information that I have now, I see the necessity for an adequate Navy, and I propose to act in accordance therewith.

I have not said upon the floor that I was in favor of any kind of a Navy, but I can now say that I am in favor of an adequate Navy, if it will please the gentleman to know it.

Mr. SAUNDERS. Mr. Chairman, after the gentleman came into possession of these illuminating facts which have caused so complete a reversal of his attitude, he ought to have taken part in this debate, and furnished us with a portion at least of this information which has caused so complete and startling a reversal of attitude in his case. I agreed with the gentleman at the time, and would like to be with him now. Apparently nothing seemed more unlikely than that the gentleman would ever become a jingo, and an advocate of two battleships a year.

Mr. MACON. I will answer the gentleman in one sentence, if he will allow me.

Mr. SAUNDERS. I can not yield now; at least 5 minutes of my 10 minutes have been taken up by questions.

Mr. MACON. I did not object to the gentleman's 10 minutes.

The CHAIRMAN. Does the gentleman yield?

Mr. SAUNDERS. Certainly, I yield to my colleague.

Mr. MACON. I want to say at the time that I made the declaration that the gentleman accuses me of having made I was not a member of the Committee on Naval Affairs; but for the past four years I have been, and I have tried my level best to learn the needs of the country in regard to the Navy, based upon such information as I have been able to obtain, and I am now convinced that we ought to keep our Navy up to its present standard. I believe we will have to authorize two battleships this year in order to do it.

Mr. SAUNDERS. Then my friend does not do his duty when he fails to give us those facts, and furnish us that information which have caused so complete a reversal of attitude on his part. I am as open to conviction as the gentleman from Arkansas, and I wish to say that once it becomes a question of patriotism, of vital defense, of preservation of national honor, I would vote, not for 2 battleships, but for 20 battleships a year. We are eagerly, hungrily, anxiously desirous of coming into acquaintance with those pregnant facts which have so wrought upon the mind of my friend who was for one battleship, or less, during six or eight years of service in this body, that in the result they have effected his conversion, and lined him up with the once despised jingoes. Is it asking too much to ask for these facts?

Mr. MACON. Does the gentleman want me to answer that question?

Mr. SAUNDERS. I would be delighted to have the answer.

Mr. MACON. Let me answer by saying that the reason I have not done so is because I did not think that what I might say upon the subject would change any more votes than the gentleman's remarks will change. The minds of Members are fully made up on the battleship subject, and all of the talk that the gentleman from Virginia and myself could put in from now until adjournment would not change the vote of a single Member. It is therefore a waste of time to continue the discussion further.

Mr. SAUNDERS. But, Mr. Chairman, the gentleman's change of attitude is so conspicuous that I think that a word from him would have been most seasonable, and the reasons that have effected that remarkable revolution of attitude in his case, might have been potent to bring over every one-battleship man in this House to the side of two battleships. [Applause.] Now, Mr. Chairman, I do not desire to weary the House in connection with this matter, but in conclusion I will call the attention of my colleagues to some common-sense reflections upon the matter in hand. If it is believed that England, France, Germany, Russia, and the other European countries, are impelled to build great navies by reason of the fact that their relations of contiguity with each other, are supposed to constitute a menacing situation; if it is believed that the naval program of one of these nations, must set the pace for the program of the others, such considerations do not apply to our case.

If there is present danger to the nations of Europe growing out of their contiguity, if each must be prepared to resist probable aggressions on the part of the others, is it not evident to all, to my friend from Arkansas, and to the rest of us, that not one of those nations can afford the hazard of war with the United States? Granting that they would emerge victor from such a war, they would return to the shores of Europe so crippled and battered that they would be unable to maintain themselves against the real and menacing dangers at home. If Germany must maintain a great navy to protect herself against England, or France, or Russia, or some alliance of those countries, she can not risk that fleet in a futile war with this country. She might be willing to wound, but she would be afraid to strike. Why should we not realize upon the assets of our situation? Why not capitalize the fact of our happy isolation, and once agreed that we need not prepare for wars that in all reasonable likelihood will never come, endeavor to reduce our expenditures at home? May I suggest one further thought to my colleagues in this body. It is true, as pointed out by the gentleman from Texas, and as first suggested by George Washington that, owing to our fortunate isolation it is impossible for any foreign nation to wage a successful war with us. Where is the vital point at which any nation in conflict with this country can launch a mortal blow? Other nations may harass us, they may annoy us, they may blockade our coasts for a time, but what would be the inevitable outcome? Any nation undertaking such a course would soon retire from a futile contest which, if persisted in, would bring them to bankruptcy, while we would emerge more united, more puissant, and in a more commanding position than ever.

Who will undertake to say that a nation like Japan, tottering under the financial burdens imposed by her war with Russia, with the shadow of that great Empire ever athwart the territory that the armies of the Mikado tore away from her reluctant grasp, will try conclusions with this country, the greatest, the richest, and the most powerful on the globe? The Rus-

sian Bear may be slow, but he is sure. The policies of that Empire are as fixed and irrevocable as the laws of the Medes and Persians. Japan's real danger is in Manchuria, and Korea. We know that such is the case, and full well she knows it, and so long as she must be prepared for possible war in that quarter, Japan has neither the ships, nor the men, nor the money to embark upon a war with the United States, a war that would be as foolish as it would be futile, and leave her in the result prostrate before her ancient enemy, who is even now dreaming of revenge.

The words of the Father of his Country are as weighty to-day, as when first uttered. In his immortal farewell address, he announced principles that may well be restated in this connection, since they have an important bearing upon the meaning to be attached to the word "adequate," in its relation to the Navy. He concludes that address as follows:

Europe has a set of primary interests which to us have none or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

* * * * * * *

Taking care always to keep ourselves by suitable establishments on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

This is a complete answer to the oft-repeated suggestion that in our relation to the world game of politics, we must equip ourselves with a formidable military establishment in order that our rôle may be sustained in honor and safety. We little-navy men, and economists derisively so called, are better patriots than the flamboyant jingoes who come forward with banners flying, and drums beating whenever a naval bill is under consideration, and by their groundless insinuations against the good faith, and purposes of other nations, would hazard the peace of the world to secure an imposing naval program. We applaud the attitude of George Washington, when he counseled his countrymen to maintain themselves in a respectable defensive posture.

These are wise words. Equally wise are the words of our floor leader [Mr. UNDERWOOD], responding to the gentleman from Illinois in this debate:

I say to the gentleman from Illinois [Mr. Foss] that the great bulwark of defense that protects the American people from foreign invasion, that compels respect for the American citizen on foreign soil, are not the guns of the Army, and Navy, but the genius, spirit, courage, and manhood of American citizenship. No great world power, Mr. Chairman, is going to invade our shores, so long as we are just and right in our treatment of other nations. Our own integrity, our own honesty, and our own moral courage protect us against attacks, and if we want to go out into the world, and attack other people unjustly, we are only pirates and national highwaymen. [Applause.] I hope that the proposition to build one battleship will be the proposition adopted by the House. [Applause.]

In this connection a recent declaration of Vice President Marshall may be appropriately cited:

This high sense of honor constitutes the panoply of the American people. Armies and battleships furnish no substitute for it. These are available, but the people never intended that authority should use them as accessories to a burglar's kit.

Already the nations of the world vexed and burdened by the policies which President Taft wished to incorporate and make a part of our own, the policies of the mailed fist, and the big stick, are looking forward with hopeful anticipation to the work of the new administration whose ideals have been so nobly expounded by President Wilson. That great English newspaper, the Nation, presents this thought:

From the new President of the United States, comes a saner and nobler vision of policy than Europe knows. With Bryan in charge of its foreign policy, it is reasonable to expect that America will enthusiastically cooperate with Great Britain in an effort to save Europe from itself.

For this war the little-navy men, and economists are ready to enlist. It is a war for the reduction of armaments, a war against war, and the multiplication of the equipments of war. Amid the tumult, and the shoutings of the captains is heard the still, small voice of peace proclaiming its message to the uttermost parts of the earth, that the nations which live by the sword will perish by the sword.

This Nation may well take to itself the words, be just, and fear not. Secure in our solitary grandeur in the western world, like a mighty eagle in its eyrie, too just to make wanton war, and too great to be lightly assailed, we may well aspire to be the arbiter of nations, and by the inspiration of our example bring to pass the reign of perfect peace. The task is not beyond our strength, and is in harmony with that destiny which has been so felicitously portrayed in this concluding extract:

I can conceive of a national destiny surpassing the glories of the present and the past—a destiny which meets the responsibilities of to-day and measures up to the possibilities of the future. Behold a Republic, resting securely upon the foundation stones quarried by revolutionary patriots from the mountain of eternal truth—a Republic applying in practice and proclaiming to the world the self-evident propositions that all men are created equal; that they are endowed by their Creator with inalienable rights; that governments are instituted among men to secure these rights; and that governments derive their just powers from the consent of the governed. Behold a Republic in which civil and religious liberty stimulate all to earnest endeavor, and in which the law restrains every hand uplifted for a neighbor's injury—a Republic in which every citizen is a sovereign, but in which no one cares or dares to wear a crown.

Behold a Republic whose flag is loved while other flags are only feared. Behold a Republic increasing in population, in wealth, in strength, and influence, solving the problems of civilization and hastening the coming of an universal brotherhood—a Republic which shakes thrones and dissolves aristocracies by its silent example and gives light and inspiration to those who sit in darkness. Behold a Republic gradually but surely becoming the supreme moral factor in the world's progress and the accepted arbiter of the world's disputes—a Republic whose history, like the path of the just, "is as the shining light that shineth more and more unto the perfect day."

* * * * * * *

The vote having been taken, the position of the little Navy advocates was sustained, and the provision for two battleships was stricken from the bill. The Senate first rejected this amendment, but the House insisting, they receded and acquiesced in the reduced program.

The Congress having now provided in two successive sessions for one battleship only, this authorization may be taken as our settled policy for the future.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. PADGETT. I desire again to submit a request for unanimous consent that debate may continue for 45 minutes on this paragraph.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that debate on this paragraph and all amendments thereto be closed in 45 minutes. Is there objection?

Mr. MACON. Mr. Chairman, reserving the right to object, I want to say that I was thrown off my guard awhile ago by the gentleman from Alabama [Mr. HOBSON], when he jumped up and objected so boldly to the gentleman from Virginia [Mr. SAUNDERS] proceeding for 10 minutes, and I lost my opportunity. It was my purpose to prevent anything except five-minute debates on this question under the rules. I meant to do that then. I mean to do it now. I shall object to the extension of time for any and every Member of the House from now on. I do not intend to play favorites.

Mr. BURNETT. Regular order, Mr. Chairman.

Mr. MANN. Mr. Chairman, the gentleman from New York [Mr. CALDER] desires to offer an amendment at the end of this paragraph, which does not relate to the question of battleships.

Mr. PADGETT. I understand that.

Mr. MANN. Will not the gentleman modify his request so that that can be done?

Mr. MACON. I want to either pass the bill or see it defeated. We have had it under consideration for nearly a week, and we ought to dispose of it one way or the other without further delay.

Mr. MOORE of Pennsylvania. A parliamentary inquiry, Mr. Chairman. Was there any agreement which I could not hear that would prevent a Member from offering an amendment to this paragraph?

The CHAIRMAN. Not that the Chair knows of.

Mr. MADDEN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MADDEN. Are not all the amendments to this paragraph pending that are permissible under these rules?

The CHAIRMAN. There are four pending, namely, the original amendment, the amendment to the amendment, the substitute, and an amendment to the substitute, and no others are in order.

Mr. MANN. At this time.

The CHAIRMAN. At this time.

Mr. MANN. And only at this time.

Mr. MOORE of Pennsylvania. Does that mean an amendment can not be offered that does not contain the subject matter in these amendments?

The CHAIRMAN. It means that no other amendment is permissible until these are voted up or down.

Mr. MOORE of Pennsylvania. But after they are voted upon it will be in order?

The CHAIRMAN. The question is on the amendment to the substitute. The gentleman from Alabama [Mr. UNDERWOOD] is recognized.

Mr. UNDERWOOD. Mr. Chairman, most everyone who has spoken on this subject has favored an adequate Navy. The only question of difference is what we think is an adequate Navy. One gentleman may think an adequate Navy is a Navy large enough to control the nations of the world. Another may determine that in his judgment an adequate Navy is one that may protect our shores from foreign invasion. But I think, Mr. Chairman, in voting on this paragraph we should vote with our eyes open and understand where the vote that we cast leads to. The stature of the human frame is built on the bone skeleton; a man's size is built about that bone frame. So it is with this Navy. The number of battleships you build measures the ultimate size of the Navy that you intend to support. You must have colliers, dispatch boats, torpedo boats, men, and armament to correspond with the number of battleships that you build. It is not merely the cost of how much per capita would be added as a charge against the American people to construct one battleship or two battleships, but if you want to have a rounded Navy, a Navy that is prepared for war, you have got to build all along the line to meet your battleship program. The battleship program as constituted to-day, if you take the estimates that come from the Navy Department, means that you must make a charge against the American people of $140,000,000 or $150,000,000 a year. If you go on building battleships to increase your Navy and increase it proportionately, so must the increase of that supply bill eventually come. Now, build your four battleships a year, and what does it lead to and what does it mean? Within 10 years, instead of $150,000,000 of charge to maintain this Navy, it means that you approach the $250,000,000 mark.

Mr. HOBSON. Will the gentleman yield to a question?

Mr. UNDERWOOD. I beg my colleague's pardon, but I can not; I have only five minutes.

I do not say that accurately, of course, because I am not a naval expert, as is my friend from Alabama [Mr. HOBSON], but it is in that neighborhood. I think we can maintain the present Navy with a battleship a year that will take the place of the discarded fleet. I am willing to do that. I want a fair Navy, a reasonable Navy, but I am not willing to increase the charge that is being piled up against the American people any further than it is to-day without there is some change in the political conditions of the world of which I am not advised to-day. Why, my friends, we do not need a Navy to protect our country against invasion. When Admiral Dewey sailed into the harbor of Manila, commanding practically a gunboat fleet, he held the situation, with the cables cut and no coal, by reason of the moral courage of an American citizen. [Applause.]

No great world power, Mr. Chairman, is going to invade our shores.

Mr. WEEKS. Will the gentleman yield?

Mr. UNDERWOOD. I can not yield. No great world power is going to invade our shores as long as we are just and right in our treatment of other nations. [Applause.] Our own integrity, our own honesty, and our own moral courage protect us against attacks, and if we want to go into the battlefields of the world and attack other people unjustly, we are only pirates and national highwaymen. [Applause.] I hope that the proposition for the building of one battleship will be the proposition adopted by this House. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and the Speaker having resumed the chair, a message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries.

GENERAL DEFICIENCY BILL.

Mr. FITZGERALD, chairman of the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 28858) making appropriations to supply deficiencies in appropriations for the fiscal year 1913 and for prior years, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union and, with the accompanying report (No. 1576), ordered to be printed.

Mr. PAYNE. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from New York [Mr. PAYNE] reserves all points of order on the bill. The committee will resume its sitting.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The CHAIRMAN. The question is on agreeing to the amendment to the amendment offered by the gentleman from Georgia [Mr. TRIBBLE].

Mr. BATES. Mr. Chairman——

Mr. MACON. Mr. Chairman, I make the point of order that all debate on this amendment is exhausted.

The CHAIRMAN. The gentleman from Arkansas [Mr. MACON] makes the point of order that all debate on this amendment is exhausted.

Mr. FOSS. Mr. Chairman, there has been no debate on this side of the House. All the time that has been taken up heretofore has been taken up by the other side of the House. I ask unanimous consent that the gentleman from Pennsylvania [Mr. BATES], a member of the Committee on Naval Affairs, be given five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

Mr. MACON. I object. I ask for the regular order.

The CHAIRMAN. The gentleman from Arkansas objects.

Mr. MACON. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. The regular order is demanded.

Mr. MADDEN. Mr. Chairman, I make the point that no debate has been had on this proposition as yet. The House is entitled to hear both sides of the discussion.

Mr. UNDERWOOD. Mr. Chairman, I am very much surprised to hear from the gentleman from Illinois that I did not take any position on the amendment. I was speaking in favor of one battleship, and was against the proposition for no battleship.

Mr. MADDEN. The gentleman did not take any position on the amendment. He was taking a position of patriotism, and, so far as I could ascertain, his speech had no reference to the number of battleships. [Laughter.]

Mr. HOBSON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HOBSON. Is not the order to be the amendment to the substitute first?

The CHAIRMAN. It is not. The order is this: The amendment must be perfected first. The question before the House will be on the amendment to the amendment offered by the gentleman from Alabama [Mr. HOBSON]. In other words, the proposition before the committee is the amendment offered by the gentleman from Georgia [Mr. TRIBBLE], striking out "four battleships" and inserting "one battleship." The question is on agreeing to that amendment.

The question was taken; and on a division (ordered by the Chair) there were—ayes 130, noes 115.

Mr. HOBSON. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. HOBSON and Mr. TRIBBLE.

The committee again divided; and the tellers reported—ayes 131, noes 123.

So the amendment to the amendment was agreed to.

The CHAIRMAN. The question is now on the amendment to the substitute to strike out "three battleships" and substitute "no battleship." The amendment to the substitute provides for no battleship.

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

The committee divided; and there were—ayes 46, noes 115.

So the amendment to the substitute was rejected.

The CHAIRMAN. The question is now on the substitute offered by the gentleman from Alabama [Mr. HOBSON] substituting "three battleships" for "two battleships."

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HOBSON. I ask for a division, Mr. Chairman.

The committee divided; and there were—ayes 25, noes 140.

So the substitute was lost.

Mr. HOBSON. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Alabama.

The Clerk read as follows:

On page 54, at the end of the page, add a new paragraph:

"Two armored cruisers, each carrying as heavy armor and as powerful armament as any vessel of its class, to have the highest practicable speed and greatest desirable radius of action, and to cost not to exceed $20,000,000 each."

Mr. FITZGERALD. Mr. Chairman, I make the point of order that that is not in order as an amendment.

Mr. MANN. I make the point of order that an amendment to the amendment is still before the House to substitute one battleship for two.

Mr. HOBSON. Mr. Chairman, I will withhold my amendment for a moment.

The CHAIRMAN. The Chair, of course, does not know the character of an amendment when it is offered and sent up to the desk.

Mr. MANN. I know; I understand that.

The CHAIRMAN. The question before the House is on the amendment of the gentleman from Georgia [Mr. TRIBBLE] to the amendment of the gentleman from Alabama [Mr. HOBSON] to substitute one battleship for two, as written in the bill.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

Mr. MANN. I ask for tellers.

Mr. HOBSON. I ask for tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] and the gentleman from Alabama [Mr. HOBSON] ask for tellers.

Tellers were ordered, and the Chairman appointed Mr. PADGETT and Mr. HOBSON.

Mr. MARTIN of South Dakota. Mr. Chairman, a parliamentary inquiry.

Mr. HAMLIN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Missouri [Mr. HAMLIN] will state it.

Mr. HAMLIN. What is the proposition we are now to vote upon?

The CHAIRMAN. The question now is on the amendment of the gentleman from Georgia [Mr. TRIBBLE] to strike out two battleships and insert one battleship. The Members will pass between the tellers.

Mr. PADGETT and Mr. HOBSON took their places as tellers.

The committee divided, and the tellers reported—ayes 144, noes 133.

So the amendment was agreed to.

Mr. HOBSON. Mr. Chairman, I offer this amendment.

The CHAIRMAN. Gentlemen must take their seats and not rush up to the desk to ask for recognition.

Mr. MANN. Mr. Chairman, a parliamentary inquiry. How many times can the gentleman from Alabama [Mr. HOBSON] be recognized to offer an amendment?

The CHAIRMAN. The gentleman from Alabama has not been recognized yet.

Mr. CALDER. Mr. Chairman, I desire to offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New York [Mr. CALDER] is recognized. The Chair wishes to say that gentlemen can not expect to rush up to the desk and ask for recognition. They must rise in their seats and be recognized.

Mr. HOBSON. Mr. Chairman, may I——

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. CALDER].

The Clerk read as follows:

At the bottom of page 54 insert the following:

"*Provided*, The money for the battleships herein authorized shall not be available unless said battleship is built in one of the navy yards."

Mr. CALDER. Mr. Chairman——

Mr. TRIBBLE. Mr. Chairman, I make a point of order on that.

Mr. CULLOP. Mr. Chairman, I suggest a modification of the amendment so that it will read "Government navy yards."

Mr. CALDER. There are no private navy yards, Mr. Chairman, but I have no objection to inserting the word "Government."

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The Chair did not understand the statement of the gentleman from New York [Mr. CALDER].

Mr. CALDER. I say, Mr. Chairman, I am perfectly willing to accept the amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana [Mr. CULLOP].

The Clerk read as follows:

Amend by inserting after the word "Navy" the word "Government," so that it will read:

"*Provided*, That the money for a battleship herein authorized shall not be available unless said battleship is built in one of the Government navy yards."

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] offers an amendment to the amendment. The Clerk will report it.

The Clerk read as follows:

Amend the amendment by adding:

"*Provided*, That more than one navy yard shall be fully equipped to build the vessel herein authorized."

Mr. FOSTER. Mr. Chairman, I make the point of order that there is already an amendment pending.

Mr. MOORE of Pennsylvania. This is an amendment to the amendment.

Mr. CULLOP. Mr. Chairman, my amendment was an amendment to the amendment.

The CHAIRMAN. The Chair's understanding was that the suggestion of the gentleman from Indiana [Mr. CULLOP] was accepted by the gentleman from New York [Mr. CALDER].

Mr. CALDER. Yes.

Mr. FOSTER. Mr. Chairman, I suggest that you can not do that.

The CHAIRMAN. If objection is made, it is not admissible. If no objection were made, it could be so ordered.

Mr. CULLOP. Mr. Chairman, I move the adoption of my amendment.

Mr. MANN. No objection was made to it. Objection was made to the gentleman from Pennsylvania [Mr. MOORE] taking the gentleman from New York [Mr. CALDER] off his feet to offer an amendment.

The CHAIRMAN. The Chair understands that the gentleman from Illinois [Mr. FOSTER] objected to it.

Mr. MANN. My colleague did not object to the request.

Mr. MOORE of Pennsylvania. Mr. Chairman, is my amendment ruled out on the ground that it is not germane?

The CHAIRMAN. It was not. The gentleman from New York [Mr. CALDER] has the floor.

Mr. CALDER. Mr. Chairman, there has been a good deal of discussion at this session of Congress as to the advisability of the Government having its own powder plants, its torpedo plants, and its plants for the manufacture of ordnance. It has been stated that at these Government plants we were able to manufacture the Government's powder at less than the price at which we could buy it by contract, and manufacture our own torpedoes and our own ordnance at less than it could be purchased. So, Mr. Chairman, we present to-day a proposition to this House that we can build warships more cheaply at a Government navy yard than they can be built by contract.

Now, Mr. Chairman, considerable has been said about building ships in the past, and at times we have had some difficulty because of the methods of account keeping by the Navy Department. But I am glad to announce to the House that we can actually build warships more cheaply at navy yards than we can build them by private contract.

Only last week bids were asked for by the Navy Department for the building of the battleship *Pennsylvania*, with the result that the Newport News Shipbuilding Co. bid for the building of the *Pennsylvania* $7,275,000, and the New York Navy Yard bid on exactly the same plans, for exactly the same ship, $7,303,000, or $28,000 more than the bid of the Newport News Shipbuilding Co.

Now, gentlemen, this bid by the New York Navy Yard was based on the experience of building three battleships during the past eight years. They made their bid on the *Pennsylvania*, and they are only $28,000 higher than the bid of the Newport News Shipbuilding Co., the lowest bidder. That is but one-third of 1 per cent. And, gentlemen, added to the New York Navy Yard's bid is an item of $860,000 for overhead charges.

I have here a statement from the Navy Department illustrating what these overhead charges are. They include maintenance of power plant, boilers, stacks, piping and machinery, elevators, telephone and telegraph charges, pay of watchmen, pay of clerks, pay of officers, and so forth. Over 50 per cent of these overhead charges, Mr. Chairman, would be permanent charges on the yard if a ship was not built there, and when ships are built there these charges are apportioned so that a part is debited against the ship in course of construction and other parts against other things going on in the yard.

Mr. SHERWOOD. Then it is evident that it is cheaper to the Government to build in a Government navy yard?

Mr. CALDER. It is certainly cheaper.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. CALDER. Yes.

Mr. ANDERSON. I wish to ask the gentleman if there is more than one Government navy yard equipped so that ships of this character could be built there?

Mr. CALDER. There is only one navy yard at present equipped so that it could build ships of this character, but yesterday we appropriated $300,000 to build a crane at the Norfolk Navy Yard, and when that crane is built that yard can build battleships of this character.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. CALDER. Certainly.

Mr. MANN. The only place, as I understand, where they can build this ship now is the navy yard at Brooklyn, in part represented by the gentleman who now has the floor [Mr. CALDER] and in part by my friend at the left [Mr. FITZGERALD], the chairman of the Committee on Appropriations.

Mr. CALDER. I may say to the gentleman from Illinois that as soon as the crane that has been authorized is completed they can build these vessels at the Norfolk Navy Yard, and that crane will undoubtedly be built by the time this ship is to be constructed.

Mr. MANN. Not if the gentleman can prevent it. [Laughter.]

Mr. CALDER. I voted yesterday to build the crane,

Mr. BUCHANAN. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman yield?
Mr. CALDER. Yes.
Mr. BUCHANAN. I want to ask the gentleman if it is not a fact that the work of the Brooklyn Navy Yard is admitted to be superior to contract work?
Mr. CALDER. I am glad the gentleman asked me that question, Mr. Chairman. It undoubtedly is superior. I have had the opportunity of discussing with naval officers the question of the construction of contract-built ships and navy-yard-built ships, and no less an authority than Admiral Bob Evans, who took the *Connecticut* for his flagship in his fleet of battleships that sailed around the world, told me himself that, in his judgment, the *Connecticut*, a navy-yard-built ship, was a better battleship by 25 per cent than any other battleship he ever was on. [Applause.]
Mr. HOLLAND. Has the gentleman got the bid made by the Norfolk Navy Yard for this work?
Mr. CALDER. Yes.
Mr. HOLLAND. Will the gentleman read it, please?
Mr. CALDER. Seven million two hundred and seventy-five thousand dollars. No; I beg the gentleman's pardon, that is not for the Norfolk Navy Yard. I understood that the gentleman meant Newport News.
Mr. FOSTER. Has the gentleman got the bid from the Mare Island Navy Yard?
Mr. CALDER. Yes.
Mr. FOSTER. Will the gentleman read it?
Mr. CALDER. Seven million two hundred and eighty-two thousand dollars.
The CHAIRMAN. The time of the gentleman from New York has expired.
Mr. TOWNER. Mr. Chairman, I ask unanimous consent that the gentleman from New York have five minutes more.
The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?
There was no objection.
Mr. PADGETT. I would like to ask the gentleman if he has the bid from the Norfolk Navy Yard?
Mr. CALDER. I have not. I asked the department for the bids of the navy yards, and they sent me a letter giving the bid of the Brooklyn and the Mare Island yards. The facts are that under the bids made by the navy-yard authorities at Brooklyn we can save an amount of nearly $500,000. We have had great difficulty in the past in getting them to tell us the form of the account keeping, and now that we have it over their own signature we know we can compete with the private yards and bid successfully. Until the building of the *Connecticut* six years ago the Government never had a battleship completed within the time limit, but after the *Connecticut* was built by the Government it compelled the private yards thereafter to build in the contract time.
Mr. MOORE of Pennsylvania. Can the gentleman tell whether the Brooklyn yard has been invited to bid on the fuel colliers about to be constructed?
Mr. CALDER. I do not know.
Mr. MOORE of Pennsylvania. The Brooklyn yard is equipped to build colliers or battleships?
Mr. CALDER. They can build any ship.
Mr. KNOWLAND. I want to say that the Mare Island Navy Yard is thoroughly equipped for building a battleship, and I notice that the bid of that yard is $21,000 less than that of the Brooklyn Navy Yard.
Mr. FITZGERALD. Twenty-one thousand dollars less.
Mr. CALDER. We have built three battleships at the Brooklyn yard, and from our experience and the statement of the Government of indirect charges we can prove that we can build the ships at a great saving to the Government.
Mr. LEE of Pennsylvania. Will the gentleman yield?
Mr. CALDER. Yes.
Mr. LEE of Pennsylvania. Is the gentleman from New York in favor of giving the ship to the lowest bidder on a contract?
Mr. CALDER. I am, depending on their capacity to carry out the undertaking. I want to say frankly to the gentleman that if it can be demonstrated that the Mare Island Navy Yard is equipped to build a battleship and can build it for less than the Brooklyn Navy Yard, I should say that the ship should be given to the Mare Island yard.
Mr. LEE of Pennsylvania. If the Mare Island yard takes the contract, does not the gentleman think they will be able to do the work?
Mr. CALDER. The navy yards do not build by contract. It is the statement of the navy-yard officials. I say frankly that if the Mare Island yard can demonstrate to the satisfaction of the department that they can build cheaper than Brooklyn they ought to get the work.
Mr. LEE of Pennsylvania. There is no question about that.
Mr. CALDER. Not a particle.
Mr. REDFIELD. Mr. Chairman, I think there is no doubt that it can be demonstrated that the Government can build a better vessel for the same money than it gets from a private yard. Before I entered Congress I had the privilege of furnishing under contract certain important parts for four battleships, the *Delaware*, the *North Dakota*, the *Florida*, and the *Utah*.
Now, it is perfectly possible under specifications for battleships to furnish either one of several kinds of apparatus. If I may take the case of the two ships, the *Utah* and the *Florida*, for each of which I furnished, or my company did, the forced-draft apparatus, I point out that such apparatus affects directly the speed of the ship and the steaming economy of the ship in service. In the case of one of these vessels, built at a private yard, the question that the contractor cared for was price, and in the case of the sister ship, built at the Government yard, the Government officer cared chiefly for efficiency. So, as a matter of fact, there are two ships to-day for which my own concern furnished this part of the equipment, one of which ships has an equipment less efficient than the other, because in the Government-built ship the naval constructor in charge insisted on having the more efficient and more economical apparatus and in the other case the private yard insisted on a less expensive and less efficient apparatus, although both would fully meet the specifications.
I want to be quite particular about this. These were blowers for forced-draft apparatus. The Government vessel took the larger equipment, which cost a little more and which gave the ship more power for speed and more steaming economy in operation. The private yard took the apparatus which gives less and involves a little better profit to the contractor; the Government yard took the larger outfit, which worked a little more efficiently and gave the vessel rather more speed.
Mr. COOPER. Will the gentleman yield?
Mr. REDFIELD. Certainly.
Mr. COOPER. I think the gentleman in his reference to these cases has stated the whole argument, and that is in constructing a battleship as between the Government and a private concern the profit is the great consideration with the private concern, whereas in the Government-constructed ship there is no element of profit entering into it, but simply a desire to make the best vessel for the men to go to sea and fight the battles of the country.
Mr. REDFIELD. The practical point in what I have said is that in the Government-built ship in case of an emergency there is a reserve of speed, a reserve of steaming power, that does not so fully exist in the private vessel.
The CHAIRMAN. The time of the gentleman from New York has expired.
Mr. MAHER. Mr. Chairman, one of the most important reasons for this amendment is to continue the present competition between the private shipbuilders and the Government yards, for I believe if it were not for this competition the bids made for the building of battleships would be far in excess of what they are to-day. Another is to supply steady employment to the mechanics employed in the Government yards. There is no employer of labor who would expect the best results from his skilled mechanics, if he were compelled to lay them off three or four months every year.
The battleship *New York* was launched at the New York Navy Yard on October 30, 1912, or about four months ago, and during that short period of time 481 men have been discharged. This reduction in the force is inevitable as the work advances on a battleship under construction, and within the next few weeks it is expected that from 75 to 100 additional men who are now working on the *New York* will be discharged, and these gradual reductions in the force will continue until the vessel is finally completed and ready for commissioning. And what is true of work on the *New York* also applies to the general work of overhauling vessels under repair—that is, under the present system reductions must take place in all trades as the work nears completion. Experience has demonstrated that better results can be obtained in any line of work by retaining a permanent force of skilled mechanics. In the first place when a man knows that his job is secure he is able to work to better advantage. Of course there may be exceptions to this rule, but it is true of the average workman. Contentment is a necessary factor to efficiency, and when a man knows that he has a permanent job he is naturally more contented than when he realizes that he may lose his place any day.
Another advantage of retaining a permanent force at the yards is that you have a complete organization of skilled mechanics in all the various trades that enter into the complicated work of building a modern battleship, thus obviating the necessity of calling in new men and breaking them in on the

work. This necessity of calling in new men in the building of a ship means a great loss to the Government, and it can be safely estimated that this method is equal to at least 10 per cent of the total cost of labor in building the ship. On the other hand, if a permanent force of men were always available, with sufficient work authorized to keep them busy, there would be no necessity for calling in new men, and in addition such a permanent force would naturally become more efficient, as they would gain experience in shipbuilding. When the forces at the yards are disorganized, or discharged, on account of lack of work, they naturally look for employment wherever they may be able to procure same; and these men, when they are discharged after six months or a year's work, go to various points away from the yard, as the shipbuilding industries are scattered throughout the entire country. Some of them, of course, are able to obtain employment in New York or vicinity. When another ship is authorized and work is started at the yard a majority of them have probably secured steady work and they are therefore not overanxious to give their services to the Government again, knowing that they will be laid off in batches as the battleship under construction nears completion. This method of laying off is inevitable under our present system of employing mechanics. Should we be able to keep intact a steady force of men at the yard the men would naturally settle close to their work; in other words, they would make their homes in that locality, and you can readily understand how such a condition would tend to improve their efficiency, as they would then be able to enjoy all the comforts of home life with their families, which, as you are aware, are so essential to the well-being and moral stability of workingmen. In this connection I might state that there were times during the building of the *New York* when it was necessary to advertise in the daily papers for drillers, calkers, and chippers; and the reason for this was simply due to the uncertainty of employment in the yard. In view of these facts, I believe that every Congressman should use his best efforts toward securing the establishment of a permanent force of mechanics at the navy yards and the authorizing of sufficient work on the construction of battleships to keep them employed. With a skilled force of this kind always available the Government would undoubtedly save considerable money and at the same time we would be able to turn out better ships in every way.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask now for the reading of the amendment to the amendment, which I had sent to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Add, at the end of the amendment, the following: "*Provided*, That more than one navy yard shall be fully equipped to build any of the vessels herein authorized."

Mr. FOSTER. Mr. Chairman, on that I reserve the point of order.

Mr. MANN. Mr. Chairman, what point of order would lie against this?

Mr. MOORE of Pennsylvania. Mr. Chairman, I am not one of those who seeks to depopulate the navy yards of the country, nor do I seek to drive out of business the men whose capital is invested in private shipyards. Nor do I want to see thrown out of employment the thousands of skilled mechanics and laborers who are working in the private shipyards. There are two private institutions along the river Delaware, shipyards that give employment each to 5,000 men, which means sustenance to at least 50,000 people. The taking away from private shipyards of the construction of large vessels and the placing of them exclusively in the navy yards of the country would mean that these 50,000 people would have to look elsewhere for their support.

Mr. GOLDFOGLE. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. GOLDFOGLE. If the amendment offered by the gentleman from Pennsylvania should prevail, and the Secretary of the Navy should be of opinion that there are not two navy yards that could turn out a battleship such as is contemplated by the bill, then the purpose of my colleague from New York [Mr. CALDER], namely, that the battleship be built at the Government yards, would be defeated.

Mr. MOORE of Pennsylvania. I am not objecting to that at all. I am not opposing the gentleman's amendment, except that I want to go a little further than he does and say that while I do not want to destroy the private shipyards of the country, because of the employment they give to labor, yet I do not want to see every battleship and every collier that is constructed by the Government built at one navy yard only, to the prejudice of all other navy yards of the United States. Hence, I offer an amendment which proposes that more than one navy yard shall be fully equipped to build a battleship or any vessel that may be contracted for by the Government.

Mr. GOLDFOGLE. Does not the gentleman then concede that if there be not two navy yards fully equipped to build a battleship the amendment of my colleague from New York [Mr. CALDER] that the battleship be built at the navy yard would be futile?

Mr. MOORE of Pennsylvania. The gentleman does not in his amendment state specifically that the only navy yard fully equipped to build a battleship is the navy yard at Brooklyn; but the effect is just the same, because the fact is that that is the only Government yard fully equipped to build a battleship. My point is this, and the purpose of my amendment is not wholly hostile to the amendment offered by the gentleman from New York: I propose that whereas we inveigh against monopoly in private life and insist that no one big concern shall have all of the business, that no one corporation shall absorb the trade of the country; I insist that no one navy yard shall absorb all of the construction work and build all of the battleships of the country, provided we embark on the business of having the Government build battleships.

Mr. SHERLEY. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Certainly.

Mr. SHERLEY. Mr. Chairman, will the gentleman state any reason why there should not be monopoly on the part of the Government when doing its own work—why there should be competition between Government plants?

Mr. MOORE of Pennsylvania. I think, in answer to the gentleman's question, it would be fair to those skilled mechanics and laborers whose livelihood is obtained on the Pacific coast, as well as in the matter of the exigency of war, that the Government should be equipped to build a battleship on the Pacific coast. By the same token, I think that if naval warfare should break out in the West Indies or as a result of our fortification of the Panama Canal, it would be wise policy on the part of the Government to have down there at Pensacola a navy yard fully equipped to build a battleship of any size.

Mr. SHERLEY. Mr. Chairman, I can understand this argument being made in favor of having several yards, though I do not think the argument has ever been a good one, but I can not understand the original argument of the gentleman that the reason of having these yards is for the purpose of competition. Competition with whom? Does the Government compete with itself? The purpose of competition outside is to protect the Government. The purpose of competition inside can only be to favor locality.

Mr. MOORE of Pennsylvania. Very well. The gentleman has stated a question which I can answer fully in an instant. In the instance of a fuel collier about to be constructed the Navy Department had sent out proposals to four or five navy yards along the Atlantic coast——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent to have my time extended in order that I may answer the gentleman's question.

The CHAIRMAN. Is there objection?

Mr. PADGETT. Mr. Chairman, as there are so many gentlemen who desire to speak, I must object.

Mr. MOORE of Pennsylvania. Mr. Chairman, may I ask the gentleman to withhold his objection for a moment. I call the gentleman's attention to the fact that the gentleman from New York had his time extended, and that I have just entered upon this discussion and have yielded to gentlemen to ask questions, and had only half answered the most important question of all.

Mr. FOSTER. Mr. Chairman, I ask that the gentleman have five minutes more, and I hope the gentleman from Tennessee will not object.

Mr. PADGETT. Mr. Chairman, I withdraw my objection, but I shall not consent to any further extensions.

Mr. MOORE of Pennsylvania. Mr. Chairman, answering further the gentleman from Kentucky [Mr. SHERLEY] with regard to competition in the navy yards and whether it would be advantageous to the Government, I say that at the present time the Navy Department is inviting bids from Portsmouth, Charleston, Brooklyn, Philadelphia, and Norfolk for the construction of a fuel collier.

That answers the question completely.

Mr. SHERLEY. If the gentleman will permit, it does not answer it at all.

Mr. MOORE of Pennsylvania. It is to find out at which one of these navy yards vessels can be constructed and——

Mr. SHERLEY. The determination of that fact will not determine the wisdom of having four or five yards.

Mr. MOORE of Pennsylvania. Does not the gentleman see, what it is difficult sometimes to make those see who charge

favoritism or prejudice on the part of a Member who is in favor of his own district, that 50,000 people in the vicinity of Philadelphia are dependent upon the business of shipbuilding?

Mr. SHERLEY. All of which is a reason for the gentleman's speech, but not for the Government's action.

Mr. MOORE of Pennsylvania. Five thousand people depend upon the continuance of the business of the Philadelphia Navy Yard, and does not the gentleman think that if all this construction work is concentrated in one navy yard, either at Brooklyn or Norfolk—and the Norfolk yard is coming to be equipped to build battleships—that this labor to which I refer must give up its employment and go elsewhere?

Mr. SHERLEY. If the gentleman will permit, the whole argument was made with even greater force by the spinners of Flanders in regard to the use of modern machinery in spinning.

Mr. MOORE of Pennsylvania. I yield to the gentleman from Kentucky in his superior knowledge of the textile industry, but I still insist that the Government would be better off in the matter of construction of battleships if it had two places to go for the construction of battleships under its own direction.

Mr. DYER. Does not the gentleman know Mare Island is now equipped for the construction of battleships and that Norfolk will be in a short time?

Mr. MOORE of Pennsylvania. I have listened to gentlemen contending that Mare Island was fully equipped, and, in fact, my friend from California [Mr. KNOWLAND] contends it is equipped and that two colliers were built at the Mare Island Navy Yard. But I do not want to debate the question of the advisability of constructing battleships at Mare Island in its present condition. I want to see Mare Island put in shape, or any other station that the Government may agree upon, to do repair and construction work on the Pacific if the Government wants to enter into the business of building battleships and putting private contractors for battleships out of business. And while I do not blame the gentlemen from New York for doing the best they can for holding all they can at the Brooklyn Navy Yard, I still insist it would be better for the Government as a business proposition, apart from the bread-and-butter side of it, if it would equip more than one navy yard in which to do this kind of work; hence I have offered this amendment to the amendment of the gentleman from New York, and I trust it will pass.

Mr. GOLDFOGLE. Mr. Chairman, whatever may be the purpose or intention of the gentleman from Pennsylvania [Mr. MOORE], whether to bring the construction of the battleship to a private yard in the vicinity of Philadelphia, or elsewhere, or not, the real effect of the adoption of the amendment he has offered would probably go to defeat the proposition to build the ship at the Government yard.

The battleship authorized by this bill ought, in my opinion, to be constructed at a Government yard. We have had ample demonstration of the fact that the Government in its own yard and with its own men can turn out work in a manner, with a skill and efficiency and expedition unexcelled—in fact, unequaled—by private shipbuilding concerns. The *Connecticut* and the *Florida*, the latter ship constructed at the Brooklyn Yard under an amendment I introduced to the naval appropriation bill some years ago, serve as splendid and effective illustrations of that fact. The excellent workmanship, the rapidity within which the work was finished, the efficiency of everything that went to construct these two ships speak in favor of our desire to have the contemplated ship constructed at the navy yard. The large and adequately equipped and costly plant at the Government yard ought not, by sending the work to a private shipyard, be allowed to remain, in a great measure, inactive and go to consequent decay. The immense force of men, who have done such commendable work in every department of the yard's activities, ought not to be cast out of employment and sent many into idleness. Trained to their work and to a fine discipline, they are a valuable working force, to scatter which and replace with new men in hours of necessity would really be a detriment.

We should encourage and promote that competition between our Government and the private shipbuilders as will make for cheapening the cost of building our ships at private yards. This end will be accomplished by providing that the ship now to be authorized be built at the navy yard. It will also, to an extent, prevent combination of shipbuilders to enhance their price and increase their bids beyond reasonable figures.

The distinguished gentleman from Pennsylvania [Mr. MOORE] urges that unless there be more than one Government yard in which the battleship can be built, the building should be turned over to the private yards. Mr. Chairman, we may safely intrust the Secretary of the Navy with the duty of determining at what yard—Brooklyn or elsewhere—the ship should be built. If there be a yard properly provided and sufficiently equipped to handle and do the work other than in Brooklyn, the Secretary of the Navy will have power, if he chooses, to send it there. But it will be useless, and I may add destructive, of the amendment offered by my colleague from New York [Mr. CALDER] to adopt the amendment the gentleman from Pennsylvania proposes. To my mind its true intent is to defeat the purpose I so strongly advocate that we do the building at the Government yard.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. GOLDFOGLE. I will.

Mr. LINTHICUM. How many Government yards are capable of building battleships?

Mr. GOLDFOGLE. I can not with accuracy answer that question. There is one yard, I know, has demonstrated its absolute ability to do the work well and expeditiously and efficiently. The Secretary of the Navy can determine hereafter whether there be another Government yard where the work may be done.

Mr. LINTHICUM. Is not the particular yard to which the gentleman referred located in the gentleman's own State?

Mr. GOLDFOGLE. Yes; the yard that turned out the excellently built *Connecticut* and *Florida* is located in my State; it is at Brooklyn.

Mr. LINTHICUM. Would it not require a great deal of money to put the other yards in a condition to build battleships?

Mr. GOLDFOGLE. Probably; yes. I do not know just how well equipped some of the other yards may be. Let's leave that to the Secretary of the Navy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SAMUEL W. SMITH. I ask that the gentleman's time be extended five minutes.

Mr. PADGETT. Mr. Chairman, I must object.

Mr. GOLDFOGLE. I ask leave to extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none. All debate on this amendment and the amendment to the amendment is exhausted.

Mr. MANN. I ask unanimous consent that the gentleman from New Jersey [Mr. BROWNING] have five minutes.

Mr. BROWNING. Mr. Chairman, I move to strike out the last word.

Mr. MANN. That is an amendment in the third degree.

The CHAIRMAN. That is true, and the gentleman is not in order.

Mr. BROWNING. Mr. Chairman, I ask that I be given five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BROWNING. Mr. Chairman, I hope neither of these amendments will prevail. There seems to be a disposition on the part of the House to place in Government manufacturing establishments the building of battleships, the manufacture of powder, and the manufacture of many articles and commodities used by the Government, thus seeking to exclude private concerns from Government contracts.

I do not believe that the Government should manufacture all of the necessary powder, nor do I believe that the Navy Department should build all our ships. "Uncle Sam" should live and let live. A vast amount of capital is invested in shipbuilding plants in this country; there is one plant in my city which employs between five and six thousand men at all times.

The gentleman from New York [Mr. GOLDFOGLE] spoke of the magnificent construction of the battleship *Florida*, which was built at the Brooklyn Navy Yard. I wish to state that her sister ship, the *Utah*, was built by the New York Shipbuilding Co., at Camden, N. J., and she is just as good a vessel as the *Florida*. And I desire also to state that the *Florida* cost $6,212,000, and her sister ship, the *Utah*, cost $4,030,000. Now, it seems to me, Mr. Chairman, that the vast amount of capital and the great number of people employed in these private concerns, performing such economical and good work, should receive some consideration at the hands of the Government.

Mr. SAMUEL W. SMITH. What will it cost to equip a yard to manufacture a boat like the *Florida* or the *Utah*?

Mr. BROWNING. I can not tell you. There are millions of dollars invested in shipbuilding.

Mr. ROBERTS of Massachusetts. It cost somewhere from $200,000 to $250,000 for slips and traveling cranes. It is not a very expensive thing.

Mr. BROWNING. I thought you meant the amount of money invested in private plants.

Mr. MOORE of Pennsylvania. Would not the $400,000 allowed yesterday to the Norfolk Navy Yard be sufficient to equip a navy yard for building a battleship?

Mr. BROWNING. I think it would.

Mr. MOORE of Pennsylvania. And would not the same amount for the Philadelphia Navy Yard be sufficient to equip it there?

Mr. BROWNING. I think it would.

Admiral Watt says that ships built in private yards are just as good as ships built in Government yards, and I hope these amendments will not prevail.

Mr. Chairman, I hold in my hand an article from the Philadelphia Public Ledger of February 15. I ask unanimous consent that I may have the same printed in the RECORD.

Mr. HOWARD. Mr. Chairman, I would like to ask the gentleman a question, if he will yield?

Mr. BROWNING. Certainly.

Mr. HOWARD. As to the construction of the *Connecticut* and the *Louisiana*, the *Connecticut* being constructed by the Government, and the *Louisiana* by a private shipbuilding concern, has the gentleman any information as to the cost of the repairs on the *Connecticut*, as compared with the cost on the *Louisiana*?

Mr BROWNING. I have not.

Mr. HOWARD. Does not the gentleman know that the cost of repairs on the *Connecticut* has been 30 per cent less than those on the *Louisiana* since the construction of these two ships, which were launched at about the same time?

Mr. BROWNING. I do not know that. We have never had any such information as that before the Naval Committee.

Mr. HOWARD. As a matter of fact, if you will refer to the hearings before the Committee on Naval Affairs, you will find Admiral Evans testified to that fact.

Mr. MOORE of Pennsylvania. Has not the gentleman his figures reversed?

Mr. HOWARD. I have not. I have my own figures, and I know they are correct.

Mr. BROWNING. Some ships may have more repairs than others, but that has nothing to do with the work done at the yards.

Mr. HOWARD. I will go a step further and say that the percentage of repairs on the *Connecticut* was occasioned by the *Connecticut* running aground very shortly after she was constructed.

Mr. BROWNING. That might be. What has that to do with the construction of the two ships?

Mr. HOWARD. The repairs of the ship, as the gentleman from New Jersey well knows——

Mr. BROWNING. If a ship runs aground, would it not need repairs?

Mr. HOWARD. Certainly. But I would allow that in the total repairs of that particular ship.

Mr. BROWNING. Mr. Chairman, I ask unanimous consent to print this article from the Philadelphia Public Ledger as a part of my remarks. It is a very short article.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. BROWNING] has expired. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The following is the article referred to:

UNITED STATES SHIPS COME HIGH—GOVERNMENT SPENDS EXTRA MILLIONS BY OWN CONSTRUCTION.

[Special telegram to the Public Ledger.]

WASHINGTON, *February 15.*

Last year's naval appropriation bill provided, among others, for the building of two fuel ships, to cost, exclusive of armor and armament, not to exceed $1,140,000, and each ship to be constructed at a navy yard, one on the Pacific coast.

One of the ships has been started at the Mare Island Navy Yard, but the other ship, which would normally be built at the New York Navy Yard, as that is the only navy yard on the eastern coast that is fitted out to build ships, has not yet been ordered.

This delay undoubtedly is for the purpose of permitting the New York Navy Yard to build one of the two battleships authorized by this year's naval program. And it is therefore to be presumed that the second final ship will be built on the Pacific coast.

The extra cost of building in navy yards is well set forth by Admiral R. M. Watt, chief of the Bureau of Construction and Repair, in his hearing before the Committee on Naval Affairs a year ago, February 2 and 5, 1912. Admiral Watt stated that the *Nevada* and *Oklahoma*, building, respectively, at Fore River and the New York Shipbuilding Co.'s works, cost for hull and machinery $5,895,000 and $5,926,000, respectively. These ships are of 27,500 tons displacement, or 500 tons larger than the *New York* and *Texas*, and they are built under the eight-hour law, so that the men employed in their construction only work the same number of hours per day as Government employees in a navy yard. These ships were contracted for in 1911 and are identically the same.

The battleships *New York* and *Texas*, which are also both the same, are 500 tons smaller than the *Nevada* and *Oklahoma*. The *Texas* was built by the Newport News Shipbuilding Co. at a contract price of $5,830,000. The *New York*, which is being built at the New York Navy Yard, is estimated to cost $7,293,000 and will probably exceed this amount. The *Texas* was built under the eight-hour law of 1892.

The battleship *Florida* was built at the New York Navy Yard, being completed in the summer of 1911, at the following cost:

Labor	$2, 815, 000
Indirect charges	955, 000
Material	2, 442, 000
Total	6, 212, 000

The sister ship to the *Florida*, the *Utah*, was built at the New York Shipbuilding Co.'s plant at a cost of $4,030,000, so that the Government-built *Florida* cost $2,182,000 more than the contract-built *Utah*.

There is not very much difference in the time required to build a ship by private contract or in a Government yard, but such difference as there is has been uniformly in favor of the private yards, which have built battleships in from three to eight months' less time than required in the Government yards.

It is interesting to note that the labor cost per ton on the *Florida* at the New York Navy Yard is double what it would be at a private yard, even under the eight-hour-law conditions.

In making up the cost of a ship at a navy yard the pay of the mechanics, who receive 28½ days' leave a year, is not included as part of the cost of building a ship, nor is the disability pay which they receive for absence in excess of 15 days as a result of accidents while at work. The salaries of clerks and of draftsmen who work on the plans of the vessel are not charged up to part of her cost. There is no allowance made for insurance; there is no charge for a bond to insure the performance of the contract. The trial trip is run after the ship is in commission and is considered as part of the regular expense and not as a separate item, and many other charges that form a part of the cost in a private yard are entirely overlooked when a ship is built at a Government yard. The reasons for the greater cost at a navy yard are:

1. The very much higher wages for the same class of mechanics.
2. The greater number of high-grade mechanics.
3. The greater number of foremen.
4. The less efficient organization, due to the intermittent character of the shipbuilding work and the lack of incentive of competition.
5. It is also a fact that building at a navy yard results in inferior work, because there is no adequate inspection, while a private contractor's work is supervised by 50 inspectors, who require absolute compliance with the specifications.

The CHAIRMAN. The question is on the amendment to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

Mr. FOSS. Mr. Chairman, I would like five minutes upon this proposition.

The CHAIRMAN. The gentleman from Illinois [Mr. FOSS] asks unanimous consent to address the committee for five minutes on the pending amendment. Is there objection?

There was no objection.

Mr. FOSS. Before gentlemen vote on the proposition for building ships in the navy yards, I think it would be well to pause a moment and look at our experience in the comparative cost between building ships in private yards and building ships in navy yards. I have here a statement of all the ships that have been built in navy yards, with the cost of similar ships built in private yards, and it has been prepared in the Navy Department by the Chief Constructor of the Navy, and it shows that we have spent nearly $8,000,000 more in building ships in Government yards than we would have spent if they had been built by contract in private yards.

Take, for instance, the *Connecticut* and the *Louisiana*. The *Connecticut* was built in the New York Navy Yard and cost $374,000 more than her sister ship, the *Louisiana*, which was built in a private yard. But in the construction of that ship little more than labor and material was charged up against the *Connecticut*. A large percentage of the indirect charges were never added to the *Connecticut*, and I asked the Chief Constructor of the Navy to give me a statement as to what that ship would have cost if the same things had been charged against her that were charged against her sister ship, the *Louisiana*. And here is his letter:

BUREAU OF CONSTRUCTION AND REPAIR, NAVY DEPARTMENT,
Washington, D. C., February 25, 1913.

(Data concerning indirect charges in commercial establishments and navy yards.)

Hon. GEORGE EDMUND FOSS, M. C.,
House of Representatives.

MY DEAR CONGRESSMAN: 1. I forward herewith such data as is available in reply to your various inquiries:

"(1) What items included by commercial concerns are not included in the indirect charges entering into the cost of construction at navy yards of new vessels for the Navy?"

On page 397 of the printed hearings before the Committee on Naval Affairs of the House of Representatives on appropriation bill subjects of 1911 appears a statement of the Paymaster General to the effect that since July 1, 1910, the following items have not entered into the indirect cost under the navy yard system of accounting:

Officers' salaries.
Clerical force, draftsmen, civilian assistants, subinspectors, expert aids, chemists, watchmen, messengers, etc.
Leave, holiday, and disability.
Expenses of receiving, testing, and handling stores.
Depreciation, fire insurance.
Interest on money invested; taxes.
Repairs made to buildings, railways, plant machinery, when such repairs exceed $100.

[NOTE: Under the accounting instructions issued July 1, 1912, repairs made to buildings, machinery, etc., are not included when repairs exceed $25].

Such items entering into commercial indirect charges which are excluded from Navy indirect charges, are unquestionably not less than 25 per cent of the productive labor on which both commercial and Navy indirect charges are figured.

"(2) What is the latest reported cost of the *Florida*, the proportion of indirect, and what would have been the cost of the *Florida* had all items of indirect charge been made in accordance with commercial practice?"

The cost of the *Florida*, under the appropriation, "Increase of the Navy, Construction and Machinery," to November 1, 1912, is as follows:

Labor	$2, 830, 804. 28
Material	2, 400, 255. 45
Indirect	965, 308. 44
Miscellaneous	53, 657. 03
Total	6, 250, 025. 20

From the above it will be noted that the indirect charges figure almost exactly 34 per cent of the direct labor charges.

While it is not practicable to state exactly how much these charges would have been increased had they included all expenditures which would be included in the indirect charge for a commercial establishment, because the method of figuring indirect was modified several times during the construction of this vessel, the chief constructor, on page 371 of the hearings on the appropriation bill subjects, 1912, estimated that such increased indirect charges would be about $500,000.

The cost of the *Utah*, under the contract, including changes therein, was $4,018,815.46.

"(3) What was the percentage of indirect charges on the *Connecticut*, and how much would the cost of the *Connecticut* have been increased under the system of indirect charges holding in commercial establishments?"

As regards the indirect cost of the *Connecticut*, it is impossible to give any exact statement. Under the accounting system in vogue during her construction, certain items now included in indirect cost would have been charged direct. In the construction of the *Connecticut*, however, a separate account was kept of general superintendence, clerical and drafting work, and it appears from page 401 of the 1911 hearing that this amounted to a little over 10 per cent of the direct cost of labor. Unquestionably, with the system of indirect charges holding in commercial establishments, the cost of the *Connecticut* would have been increased by not less than 25 per cent of the direct labor, or at least $625,000.

"(4) What have been the total expenditures for repairs on the *Connecticut* and *Louisiana* to date?"

The total expenditures for repairs on the *Connecticut* and *Louisiana* to November 1, 1912, are as given in the following table:

Fiscal year.	Connecticut.	Louisiana.
1906	$236.97	$5,748.39
1907	54,960.29	105,404.49
1908	140,482.70	66,691.43
1909	198,298.56	126,556.53
1910	197,843.82	205,839.54
1911	70,581.18	53,849.20
1912	57,258.78	80,476.70
1913 (to Nov. 1, 1912)	19,607.02	40,906.14
	739,219.32	685,372.42

The actual cost of the *Connecticut*, as reported to Congress by the Navy Department on April 18, 1908, was $4,562,094. The actual cost of the *Louisiana*, as reported to Congress by the Navy Department on April 18, 1908, including all bureau and navy-yard inspections, changes, and other charges not included in the contract price, in the same manner as said charges were made for the sister vessel, the *Connecticut*, in order to be directly comparable therewith, was $4,188,468.

Faithfully, yours,

P. M. WATT,
Chief Constructor, United States Navy, Chief of Bureau.

Now, if the same method of cost accounting obtained in the navy yard at Brooklyn in the building of the *Connecticut* that obtained in the building of the *Louisiana* in a private shipyard, it would have cost a million dollars, nearly, more than her sister ship, the *Louisiana*.

Now, let us take up another ship which we have been building in the New York Navy Yard, the *Florida*. According to the testimony of the Chief Constructor of the Navy, the *Florida*, which has just been completed in the New York Navy Yard, cost $2,269,000 more than her sister ship of equal tonnage, similar in every respect, built at a private shipyard; and if the same cost-accounting system obtained in the New York Navy Yard which obtains in the private shipbuilding yard at Newport News, where the *Utah* was built, we would have to add to the cost of the *Florida* between four hundred and five hundred thousand dollars more.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield for a question?

Mr. FOSS. No; I can not. I have only five minutes.

Mr. MOORE of Pennsylvania. I want to make a correction. The *Utah* was built in the New York Shipbuilding Co.'s yard, on the Delaware.

Mr. FOSS. Now, this is what the Chief Constructor says in regard to the *Florida* and the *Utah*, and I propose to put it in the RECORD:

MEMORANDUM.

In the development of the new Navy, 15 vessels have been constructed in navy yards, namely:

Second-class battleships *Maine* and *Texas;* 1888–1895, 1889–1895.
Protected cruisers *Cincinnati* and *Raleigh;* 1890–1894, 1889–1894.
First-class battleship *Connecticut;* 1903–1906.
Training ships *Cumberland* and *Intrepid;* 1904–1907, 1904–1907.
Wooden brig *Boxer;* 1904–5.
Tugs *Patapsco* and *Patuxent;* 1907–1909, 1907–1909.
Fleet colliers *Vestal* and *Prometheus;* 1906–1909, 1906–1910.
First-class battleship *Florida;* 1909–1911.
Fleet collier *Jupiter;* 1911–.
First-class battleship *New York;* 1911–.

The last two vessels are now under construction, the collier *Jupiter* at the navy yard, Mare Island, and the battleship *New York* at the navy yard, New York.

In no instance have these vessels been constructed within the limit of cost first set by Congress.

In several instances, sister vessels to those built at navy yards have been built by contract, and a direct comparison between the cost of building by contract and of building in a Government yard is thus obtained.

In the cases of the *Cincinnati* and *Raleigh*, bids were invited from shipbuilders, but as the bids were in excess of the limit of cost construction in a Government yard was undertaken, and a direct comparison of cost of building in Government yards and of building by contract is thus obtained.

In the cases of the *Maine, Texas, Cumberland, Intrepid, Boxer, Vestal* and *Prometheus*, no proposals were obtained from outside shipbuilders and no absolute comparison of cost is available; but a very fair comparison is possible by comparing the cost per ton of the above vessels with the cost per ton of vessels of the same type constructed about the same time by contract.

Further, the cost of preparing the navy yards at New York and Mare Island for shipbuilding purposes has amounted to many hundreds of thousands of dollars. In the hearings of the Secretary of the Navy before the Committee on Naval Affairs on Thursday, January 12, 1911, page 377, is found an official statement that "the total expenditure for preparing the navy yard, New York, for the construction of the *Connecticut* and *Florida*, exceeded $600,000."

While there is no question as to the desirability of having certain of the navy yards equipped with plant and prepared with organization and skilled mechanics necessary to undertake shipbuilding, the cost of vessels built and building in navy yards is not less than $7,000,000 in excess of the cost of building the same vessels by contract, an amount sufficient to provide the hull and machinery for one of the latest type all-big-gun battleships.

Navy-yard built.	Cost about.	More than.
Connecticut	$374,000	Louisiana, a sister vessel built by contract.
Florida	2,269,000	Utah, a sister vessel built by contract.
Jupiter	590,000	Cyclops, a sister vessel built by contract.
New York	1,463,000	Texas, a sister vessel building by contract.
Cincinnati	770,000	Formal proposals received for their construction.
Raleigh	714,000	
Maine	780,000	Limit of cost inside which it is estimated that vessels could have been contracted for.
Texas	449,000	
Vestal	250,000	The average of informal estimates received from three shipbuilding companies. (See p. 339, Secretary of the Navy's hearing, Jan. 12, 1911.)
Prometheus	140,000	
Total	7,799,000	

COMPARISON OF COST OF BUILDING SHIPS IN NAVY YARDS AND BY CONTRACT.

The comparisons below are not of the whole cost, including cost of armor and armament, which are always purchased or supplied by the Government, but the cost for construction of hull and machinery and placing on board the armor and armament. This is the work covered by the contracts for contract-built vessels.

The first case is that of the *Cincinnati* and *Raleigh*. These are protected cruisers authorized as long ago as 1888. The authorizing act fixed a limit of cost of $1,100,000. The department was unable to obtain a bid for private construction within the limit, the lowest bid being $1,225,000, so they were ordered built in navy yards—the *Cincinnati* at New York, the *Raleigh* at Norfolk. The navy yard costs in the end were: For the *Cincinnati*, $1,978,225.52, and for the *Raleigh*, $1,816,187.57, an average cost of $1,897,206.54, or just about 40 per cent above the cost if the vessels had been built by contract. The costs of the vessels were taken from Senate Document No. 175, second session Fifty-sixth Congress, extended to December 31, 1901.

The second case is that of the *Connecticut* and *Louisiana*, battleships of 16,000 tons displacement authorized in 1902 and completed in 1906. The *Connecticut* was built at the New York yard, the *Louisiana* by contract. House Document No. 868, of the Sixtieth Congress, gives the cost of the *Louisiana*, built by contract, as $4,188,468.36, and of the *Connecticut*, built at the New York yard, as $4,562,093.57. The difference is $373,625.21, or the cost of the navy yard ship is but 9 per cent greater than that of the contract-built ship. This is a very great reduction from the 40 per cent of the *Cincinnati* and *Raleigh*.

The *Connecticut* and *Louisiana* were built in competition, both as to time and cost, and stringent orders were issued by the Navy Department that full cost should be ascertained for the *Connecticut*, even to charging to her a proportion of the salaries of all officers at the yard concerned in any way in her construction, a thing never done for later navy yard-built ships.

The third case is that of the *Utah* and *Florida*, battleships of 21,825 tons, authorized in 1908 and completed so recently as 1911.

The *Utah* was built by contract, the *Florida* at the New York yard. Admiral Watt testified before the Naval Committee last year that the cost of the *Utah* was $4,030,000, and of the *Florida* $6,213,000. Admiral Cone, testifying a few weeks ago, gave even a higher figure for the *Florida*, namely, $6,286,143. Taking Admiral Watt's lower figures, the excess cost of the *Florida* is $2,183,000, or 54 per cent in excess of the contract-built ship.

Admiral Watt testified also, very unwillingly, that the cost of the *Florida*, as given by him, did not include certain indirect charges that are properly chargeable to cost of work and must be so charged by contractors. So a really full comparison would show up the navy-yard costs in even a worse light.

As the figures stand, however, they indicate a most woeful falling off in efficiency at the New York Navy Yard from 1906, the date of the *Connecticut*, to 1911, the date of the *Florida*.

These are all the cases of completed ships. Consider now the cases of ships still under construction.

We have the *Texas* and *New York*, 27,000-ton battleships, authorized in 1910 and now building, the *Texas* by contract, the *New York* at the navy yard of that name. The contract price of the *Texas* is $5,830,000. The limit of cost for the *New York*, exclusive of indirect charges, is $6,400,000. There never has been yet a navy-yard-built ship which did not exceed her original limit of cost, and none would ever have been completed in a navy yard had not Congress in each case increased the limit it had set, but without attempting to prophesy evil suppose we assume that the direct cost will be only $6,400,000. From Admiral Cone's figures the indirect costs for the *Florida*, even the reduced indirect costs charged to her, were 18 per cent of the direct, which would make the cost of the *New York* $7,552,000. This is $1,722,000, or 30 per cent, more than the cost of the contract-built ship. Moreover, the *Texas* is being built under the eight-hour law. It happens that the same contractors who built the *Louisiana* in competition with the *Connecticut* are not building the *Texas* in competition with the *New York*. When they were building the *Louisiana* they had no limit to their working hours and worked their men between 9 and 10 hours. They are now allowed to work their men on the *Texas* only 8 hours, the same as the navy yard, and yet the excess of navy-yard costs has increased from 9 per cent to 30 per cent on a very fair estimate. It will probably be even more. Truly there has been exceedingly rapid progress backward in navy-yard efficiency.

One more comparison.

The *Jupiter*, a 19,360-ton collier, is now being built at the navy yard, Mare Island, a yard which built the collier *Prometheus* somewhat more cheaply than the New York Navy Yard built the sister collier *Vestal*.

The limit of cost of the *Jupiter* is $1,200,000 for direct costs only, and the actual total cost, including indirect costs, will undoubtedly be very close to $1,500,000, if it does not exceed that figure.

We have completed, or are now building by contract, a number of these large colliers, sister vessels, or very nearly sister vessels, of the *Jupiter*. The table below gives their names, their displacements, and their contract prices:

Name.	Displacement.	Contract price.
	Tons.	
Cyclops	19,360	$822,500
Jason	19,132	951,000
Neptune	19,531	889,600
Nereus	19,000	990,000
Orion	19,132	951,000
Proteus	19,000	990,000

Some of these colliers are building under the eight-hour law. It is evident that the navy-yard cost of $1,500,000 will be from 50 to 70 per cent greater than the contract cost.

[1] Exclusive of armor, armament, and equipment.
[2] Date of laying keel.
[3] Date of first commission.
[4] Proposal received for construction by contract $1,225,000, or $385 per ton. As this was in excess of limit of cost, construction in a navy yard was decided upon by the department.
[5] Limit of cost increased to $4,600,000 in naval appropriation bill of June 29, 1906.
[6] Limit of cost increased to $6,400,000 in naval appropriation bill of Mar. 4, 1911.
[7] Limit of cost increased to $6,400,000 and indirect charges excluded in naval appropriation bill of Mar. 4, 1911.
[8] Probable date of completion.
[9] Limit of cost decreased to $900,000 in naval appropriation bill of Mar. 3, 1909; subsequently increased to $1,000,000 in naval appropriation bill of June 24, 1910; subsequently increased to $1,200,000 and indirect charges excluded in naval appropriation bill of Mar. 4, 1911.
[10] It is estimated that these vessels could not be obtained by contract at this time for less than $1,100,000.
[11] Limit of cost increased to $1,550,000 in naval appropriation bill of June 29, 1906.
[12] Limit of cost increased to $410,000 in naval appropriation bill of June 29, 1906.
[13] Extension of limit of cost to amount necessary out of appropriation "Steam machinery" authorized in naval appropriation bill of May 13, 1908.

Mr. FOSS. In other words, if the same method of figuring the cost obtained in the New York Navy Yard in the building of the *Florida* which did obtain in the commercial establishment of the New York Shipbuilding concern, we would have to add $500,000 to the $2,269,000 which the *Florida*—the Government navy-yard ship—cost more than the *Utah*.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOSS. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Illinois [Mr. Foss] asks unanimous consent for five minutes more. Is there objection?

Mr. SHERLEY. Mr. Chairman, in justice to this House I wish to say that there are several men who have not been given extra time on the statement of the Chair that no one should speak on an amendment more than five minutes. I therefore object. That rule ought to be carried out.

The CHAIRMAN. The gentleman from Kentucky [Mr. SHERLEY] objects.

Mr. FOSS. Do I understand, Mr. Chairman, that some one objects?

The CHAIRMAN. Yes; the gentleman from Kentucky [Mr. SHERLEY].

Mr. FITZGERALD. Mr. Chairman, this question of the cost of the system of construction of these ships——

The CHAIRMAN. The Chair will call the attention of the gentleman to the fact that all debate on these amendments has been exhausted.

Mr. FITZGERALD. I move to strike out the last word, or I ask unanimous consent to speak for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. FITZGERALD. Mr. Chairman, the gentleman from Illinois [Mr. Foss] has frequently discussed this question of indirect charges. In the act approved July 1, 1902, in which the *Connecticut* and the *Louisiana* were authorized, appears this provision:

> The Secretary of the Navy is hereby instructed to keep an accurate account of the cost of inspection and construction of vessels provided for in this act, whether built in Government yards or by contract, and report thereon to Congress at each session the progress of work and cost thereof, including the inspection of all the material going into the construction of said vessels, and upon the completion thereof to report a full and detailed statement showing the relative cost of inspection and construction in Government yards and by contract.

At the conclusion of the work on these ships it was reported that the *Connecticut*, built in a Government yard, had cost $400,000 in excess of the contract-built ship. The *Connecticut* was the first ship built in a Government yard in over 13 years. The yard at that time was not equipped. One hundred and seventy-five thousand dollars was appropriated for equipment; and yet in spite of that fact, without experience, in a new work, working 8 hours in the Government yard as against 10 hours in the private plant, it made the private plant, for the first time in the history of warship construction in this country, build at such a rate as to build within the limit fixed in the contract to avoid being outdone by the Government plant.

Mr. JONES. Will the gentleman permit just one question?

Mr. FITZGERALD. Yes.

Mr. JONES. I want to ask the gentleman if the New York Navy Yard is now equipped to build this battleship?

Mr. FITZGERALD. It is.

Mr. JONES. The gentleman——

Mr. FITZGERALD. I have only five minutes. I will not yield further.

Mr. JONES. The gentleman knows——

Mr. FITZGERALD. I will not yield. There is something more important than that. Ever since it was demonstrated that the Government could compete with the private yards the Navy Department has been endeavoring to devise some system of cost accounting to show that the cost of building in Government yards exceeds the cost of building by contract. The evidence is that the Government does work at less expense in the manufacture of all kinds of arms, armament, and ammunition than it can be done for by contract. Two years ago, upon information furnished me confidentially by an officer in the Navy Department, I brought a chart into this House and demonstrated that under the new system of cost keeping introduced in the Navy they had charged against the *Florida* about $900,000 of indirect charges for expenses that were incurred in the yards regardless of whether a ship was being constructed there. The ordinary maintenance and upkeep charges of the yard, charges for the repairs of streets and maintenance of buildings and the lighting of the yard, all of which went on, because the yard was maintained as a military reservation and a repair plant, were diverted so as to increase the apparent cost of the ship. I have always contended that the fair rule to observe is this one: A yard or plant is capable of doing certain work. It is doing it. If a ship can be built there without any increase of the ordinary upkeep charges, it is unfair to divert any of the yard charges to the cost of the ship; but every dollar additional to the ordinary maintenance charges that are imposed in the operation of the yard by reason of the building of the ship should be charged to the ship.

There were charged to the *Florida* $1,431,360 indirect charges. My colleague from New York [Mr. CALDER] has read the bids on the *Pennsylvania*, recently opened. The bid of the Newport News Shipbuilding Co. on the *Pennsylvania*, the lowest of all the private plants, is $7,285,000. The bid of the New York yard (a Government yard) is $7,303,000, and that includes over $800,000 of indirect charges. Some of them do not belong in the estimate as to the cost of the ship.

Mr. LINTHICUM. Will the gentleman state what the indirect charges are?

Mr. FITZGERALD. They are as follows:

ACCOUNTS CHARGEABLE AS INDIRECT EXPENSES.

POWER EXPENSE.

Maintenance of power-plant buildings, boilers, flues, stacks, piping, and machinery; distributing system (heat, electric, pneumatic, hydraulic, steam); substation buildings, motors, and accessories; furniture, fixtures, and equipment; underground conduits and pole lines; loose and hand tools.

Attendance on light and power plants, fuel, miscellaneous power-plant expense, oil, grease, and waste; supervision.

GENERAL EXPENSE.

Maintenance of miscellaneous buildings, elevators, furniture, fixtures, and equipment for offices; telephone, telegraph, time clock, fire-alarm, water, and sewer systems; tracks, rolling stock, weighing apparatus, miscellaneous yard appliances, floating property, live stock, vehicles, and testing laboratory equipment. Janitor service, general office expense, drafting, testing and inspecting, hauling borings, turnings, etc.; examination of employees, handling material not chargeable to shops, and general superintendence.

They are distributed in this way: If a ship is being built in the yard and $1,000,000 a year is spent on the ship and $750,000 of repair work is being done in the yard, they distribute the indirect charges in proportion to the expenditure for work, and the charge against the ship would be in the ratio of $1,000,000 to $750,000, while there might not be a single dollar added for those indirect expenses because of the building of the ship. The figures of the department as to the cost of Government construction are unfair, unreliable, and indefensible. I hope the amendment will be adopted.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. JONES. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

Mr. PADGETT. Regular order!

Mr. JONES. One minute.

Mr. PADGETT. Regular order!

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

Mr. POWERS. I should like to have the amendment read.

The CHAIRMAN. The question is on the amendment of the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. Is there any objection to having it read?

The CHAIRMAN. The question is on the amendment of the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. MOORE of Pennsylvania. Division! This is on the vote for two navy yards.

Mr. SHERLEY. That is not in order.

The CHAIRMAN. The gentleman is not in order. The gentleman from Pennsylvania demands a division.

The committee divided; and there were 7 ayes and 65 noes.

So the amendment was lost.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from New York [Mr. CALDER].

Mr. JONES. Mr. Chairman, I move to strike out the last word. I asked the gentleman from New York [Mr. FITZGERALD], when he was addressing the House, if the New York Navy Yard was equipped to build a battleship at this time if permitted to do so. The gentleman replied that it was. My information is to the contrary. The last naval bill provided for the construction of a large collier, and that collier, as I am informed, is now being built at the New York Navy Yard.

Mr. CALDER. If the gentleman will pardon me, I want to state that that is not the fact.

Mr. JONES. Well, the gentleman ought to know. I have stated that my information was obtained from another. It is to the effect that a collier is now under construction at the New York Navy Yard, and that it can not be completed in less

than a year unless the Government expends as much as $200,000 in enlarging the present equipment of the yard. My information was obtained from a gentleman who is unusually well informed in regard to these matters. If it is correct, then the building of this battleship must be delayed for at least a year, for the New York yard can not build two great ships at the same time. It is not equipped to do so.

Mr. MURRAY. Is it not possible to equip some other yard than the Brooklyn Navy Yard under this amendment?

Mr. JONES. I think not. The funds would have to be appropriated by Congress.

Mr. MOORE of Pennsylvania. Has not the committee just voted down a proposition that there shall be any competition at all, and if you build a ship in the navy yard you must build it at the Brooklyn yard?

Mr. JONES. That is true. Now, Mr. Chairman, a good deal has been said about the propriety of building these ships in the navy yards of the United States. I have no quarrel with the gentleman from Kentucky [Mr. SHERLEY] for what he said upon this subject. He was not influenced in what he said, as some other gentlemen have been, by the fact that the New York Navy Yard is located in their city. I object to these gentlemen basing their action upon the ground that it is to the interest of the Government to build our battleships in Government yards when they are only thinking of the interests of their constituents who will be benefited directly and indirectly by the expenditure of millions of dollars in the communities which they represent. I need not name these gentlemen since we have all heard them to-day, but they are no more patriotic than the rest of us. They are actuated by the same motives that actuate the gentleman from Pennsylvania [Mr. MOORE], the gentleman from New Jersey [Mr. BROWNING], and myself. We each have in our districts large private yards and we naturally would like to see these ships built in those yards if they can be built there as cheaply and as well as anywhere else. The reasons which actuate the gentlemen from New York who advocate the building of battleships in the New York Navy Yard are not different from those which actuate Representatives who believe that a part of them should be built in private yards when they can be built as cheaply there. I believe, however, that they can be built much cheaper and better in the private yards. I believe, too, that the mechanics who work in private yards deserve every bit as much consideration at the hands of Congress as those who work in navy yards.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUCHANAN. Mr. Chairman, I move to strike out the last word. I want to say that I do not live in a district where there is a navy yard or where there are any citizens employed in that class of work. I am in favor of this amendment because it gives to the workingman better working conditions, and because the work done is much superior to that done by private contractors for profit.

It is a good proposition for the Government to build its own battleships and manufacture other supplies. It has brought down the price of battleships per ton almost one-half, according to information I have received, since the Government started to construct its own ships. I am in favor of the amendment because it is a benefit to the men who work at this class of work, and it is for the best interests of the people.

Mr. MANN. Mr. Chairman, some gentlemen have indulged in criticism of the gentlemen from New York who are advocating this proposition. I have always believed that it was the duty of a Member from a district to advocate those things which especially relate to his district and which were a benefit to his district, leaving the other Members of the House to judge of the propriety of the proposition. On matters which do not relate particularly to our own district we are supposed to exercise broad statesmanship. I do not think it lies within the mouths of Members here to criticize my distinguished friend from New York [Mr. FITZGERALD], chairman of the Committee on Appropriations, who, from his position, as well as from his point of view, necessarily opposes a great many propositions for building buildings, the construction of river and harbor improvements, and the building of two battleships. The gentleman is properly advocating one battleship, which is all they can build at one time at the Brooklyn Navy Yard, and he is performing the proper function of his office in representing the interest of his constituency in urging one battleship to be built in the Brooklyn Navy Yard. It is for the rest of us to determine whether he can get away with it. I apprehend he will, as usual. [Laughter and applause.]

Mr. PADGETT. Mr. Chairman, I am constrained to move that all debate on this amendment be now closed.

Mr. FOSS. Mr. Chairman, I will ask the gentleman to yield me five minutes.

Mr. PADGETT. I wish I could, but I can not. I must insist upon my motion, Mr. Chairman.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee that all debate on this amendment be now closed.

The question was taken; and on a division (demanded by Mr. Foss) there were—ayes 60, noes 25.

So the motion was agreed to.

The CHAIRMAN. The question now is on the motion offered by the gentleman from New York [Mr. CALDER].

The question was taken; and on a division (demanded by Mr. Foss and Mr. BROWNING) there were—ayes 75, noes 26.

So the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, while I think of it I desire to make some corrections in the text of the paragraph on account of former amendments. I ask that in line 21, page 54, the word "battleships" be made "battleship," and that the word "each," in line 22 and in line 25, be stricken out.

The CHAIRMAN. If there be no objection, the amendments will be agreed to.

There was no objection.

Mr. HOBSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 54, at the end of the page, add the following as a new paragraph:

"One armored cruiser carrying as heavy armor and as powerful armament as any vessel of its class, to have the highest practicable speed and greatest desirable radius of action, and to cost not to exceed $20,000,000."

Mr. HOBSON. Mr. Chairman, this is not only a question dealing with an increase in the Navy, but it is more particularly a question dealing with the tactical composition of the fleet. There are many Members who voted against increasing battleships who would be glad, I believe, to vote for building these battle cruisers.

Mr. BATES. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. Certainly.

Mr. BATES. Mr. Chairman, I would like to ask the gentleman from Alabama if it is contemplated in this amendment to build such a battle cruiser as is recommended by the General Board and the Secretary of the Navy in his annual report.

Mr. HOBSON. It is just such a cruiser, and I want to point out that these cruisers are needed as fast wings for the battle fleet. It is like an army which is founded on its infantry, but which must, nevertheless, in order to make the infantry effective, have cavalry for its wings. Every nation in the world, as it has proceeded to work out the composition of a new fleet, has proceeded to develop this kind of a cruiser in proportion with the battleships. Take the case of England. England builds one battle cruiser to each two to three *Dreadnoughts*. Germany builds one for each three. Japan builds one to each *Dreadnought*, one for one; and Russia, that has the latest thoroughly developed new program, is building at the rate of one to two. The United States has 13 *Dreadnoughts*, if we count the *South Carolina* and the *Michigan*, and 14 with the one authorized to-day. We have not yet a single battle cruiser, and the composition of our fleet, if it had to meet an enemy's fleet of the same size having battle cruisers, would be at a decided disadvantage. These battle cruisers have anywhere from 6 to 7 and even 8 knots superior speed, so that they can go out and cap the battle column and either make the battleship run over the mines that have been dropped or change their course and run them into disadvantageous positions, just like an army could be if one army had cavalry and the other did not.

It is a question of the integrity of the Navy, as well as a reasonable expansion. In connection with expansion, or apparent expansion, let me remind Members who think they are maintaining the American Navy by building one ship, that we have between 7,000 and 8,000 tons of warship displacement which comprise machinery and plants that at any establishment in the world would be subjected to deterioration at the rate of 10 per cent a year, and any wise proprietor would write that much off. Simply writing off the depreciation, what you might call rust, would be more than equivalent to the tonnage of two battleships a year, and, as I pointed out a few moments ago, building two battleships regularly every year by 1916 puts us down to the fourth place and one battleship a year will put us down to the sixth place by 1920. I do not believe Members appreciate these facts. Certainly the people of the country do not wish their Navy to go down to the fourth place, much less the sixth place. Add this battle cruiser to the *Dreadnought*, which is authorized, and it will not really keep up the deterioration, make good the rusting of the existing fleet.

The gentleman from Alabama [Mr. UNDERWOOD] referred to the upkeep of the vessels. If we will have new battleships,

then we can put the old battleships in reserve. We are keeping them——

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HOBSON. I ask for three minutes additional.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama. [After a pause.] The Chair hears none.

Mr. HOBSON. Mr. Chairman, we are keeping many of the old battleships on the battle line, because we have to have tactical units and are lacking in number of newer ships; these older ships are of lower speed than the newer battleships and really retard the new battle fleet and impair its effectiveness; these ships ought to be in the reserve. They are exceedingly expensive to maintain in comparison to their power. By the addition of new ships, two, for instance, this year, it will enable us to put four of our older battleships out of commission and put them in reserve. It is a simple question of efficiency, of the integrity of the existing Navy in making effective the Navy that we now have. Now, to make a specific comparison. Just for illustration, Japan is building four battle cruisers and one *Dreadnought*, indicating that her plan is to have in the future a fleet of greater speed than our fleet by four, five, or six knots. That would enable her, if she has a weapon that can fire at long range, and this indicates that she has a shell that would not be required to penetrate the armor after it strikes, a shell using explosives in large weights, then she could practically stay out where the lighter armor of her ships would be as much a defense against our fire as the heavier armor of our ships against their fire. Then, they would have the additional speed to enable them to take their location at the front and cap our fleet, and we would be placed at a very serious disadvantage.

Mr. BUCHANAN. I would like to ask the gentleman how many cruisers we have?

Mr. HOBSON. Not one of the battle-cruiser type.

Mr. BUCHANAN. How is it the gentleman has not advocated them before, instead of these *Dreadnoughts*?

Mr. HOBSON. I have been advocating them and also the *Dreadnoughts*. The gentleman will remember I tried to get them authorized in the Naval Committee. I have been advocating them and the general board advocates them and every strategic board in the world is advocating them.

Mr. BUCHANAN. I understood the gentleman was trying to get the *Dreadnoughts*.

Mr. HOBSON. I have been trying to get both types.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman, I move that all debate upon this amendment be now closed.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama.

The question was taken; and on a division (demanded by Mr. HOBSON) there were—ayes 22, noes 81.

So the amendment was rejected.

Mr. THAYER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 54, line 21, add the word "cruisers"; line 23, strike out the word "practicable" and insert in lieu thereof the word "attainable"; line 24, strike out the word "desirable" and insert in lieu thereof the word "attainable."

Mr. THAYER. Mr. Chairman, I offer this amendment in the line of the argument so ably advanced by the gentleman from Alabama [Mr. HOBSON] just now and in support of the figures which he has shown to the committee, and which will be found in the report of the chairman of the Naval Committee. To be a little more specific in this matter, England when its present naval program is completed will have 25 *Dreadnoughts* and 11 battleship cruisers; Germany will have 17 *Dreadnoughts* and 7 battleship cruisers; Japan will have 3 *Dreadnoughts* and 4 battleship cruisers, while Russia will have 7 *Dreadnoughts* and 4 battleship cruisers, showing a proportion a little more favorable toward battleship cruisers than Capt. HOBSON stated. Now, I wish to add to the statement he has made in regard to the effectiveness of the battleship cruisers that from what I can learn of them a navy composed of *Dreadnoughts* with its auxiliary fleet would be entirely at the mercy of these battleship cruisers. The range of their guns is as long, their projectiles as effective as ours, and with the kind of ammunition they use they could pierce our heavy armored leviathans and with an explosive shell could sink them before the leviathans would be able to return a single shot in defense. So in order to have an adequate Navy we need to build up these battleship cruisers as rapidly as can be done, and it seems if we are to add to our appropriation extravagances this year some $7,000,000 or $10,000,000, we should do it in a line which tends toward actual economy and efficiency. These ships are cheaper to build in regard to their armor, and they will be necessary if we should have a sea war.

And I believe that this committee, if it is really in favor of an adequate Navy and is not in favor of adding heavily armored ships for the benefit of the Steel Trust and the Armor Trust, should adopt this amendment. We have had during the sessions of this Congress three great investigations, the Steel Trust, the Money Trust, and we are now having, in the Committee on Naval Affairs, Mr. Chairman, the investigation of the Shipping Trust. And they all lead back to the same point. They all show whence this legislation is directed. They all show that the arms of the octopus stretch from Wall Street into the very vitals of the Nation here, and are grasping appropriations which we make, not for the benefit of an efficient Navy, not for the economy of the people, but for the benefit of the Money Trust of the Nation. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. THAYER].

The question was taken, and the amendment was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman——

Mr. PADGETT. Mr. Chairman, I move that all debate upon the paragraph and all amendments thereto be now closed.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee.

The motion was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 54, line 25, after the end of the line, insert:
"*Provided*, The draft of such vessels shall not exceed 35 feet."

Mr. MOORE of Pennsylvania. I ask unanimous consent, Mr. Chairman, to speak for two minutes.

Mr. PADGETT. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Six torpedo-boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed $950,000 each.

Mr. SAMUEL W. SMITH, Mr. WITHERSPOON, and Mr. HOBSON rose.

Mr. HOBSON. Mr. Chairman——

The CHAIRMAN. The gentleman from Alabama [Mr. HOBSON] is recognized.

Mr. HOBSON. I desire to offer an amendment.

The CHAIRMAN. The gentleman from Alabama [Mr. HOBSON] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 55, in line 1, strike out the word "six" and insert in lieu thereof the word "ten."

Mr. HOBSON. Mr. Chairman, the purpose of this amendment, as of the amendment just proposed, is to realize the fighting value of the battleships we now have. With the increase in the range of the modern torpedo to 10,000 yards and beyond, it has become absolutely necessary for battleships to have these destroyers cooperating with them. Every nation in the world has recognized this. The consensus of opinion of the experts of the world is that each battleship ought to have 4 destroyers with it. For instance, take the British Navy, counting 69 battleships, they have 184 destroyers ready. Take France, with 27 battleships, they have 84 destroyers ready; Germany, with 40 battleships, they have 131 destroyers ready; Japan, with 20 battleships, they have 67 destroyers ready; and the United States of America, with 38 battleships, has 56 destroyers, and some of those are getting old.

Mr. SAMUEL W. SMITH. I would like to ask the gentleman what is the highest practical speed of a torpedo-boat destroyer?

Mr. HOBSON. Abroad they are running as high as 35 knots. I think ours would run about 31.

Mr. SAMUEL W. SMITH. What is the speed of a submarine torpedo?

Mr. HOBSON. I think submarines have gotten up to about 11 knots, submerged. They have a higher speed on the surface, but I do not believe they can obtain more than 10 or 11 knots when submerged.

Mr. SHERWOOD. How many destroyers are there? How many do you recommend?

Mr. HOBSON. I am recommending that we go from 6 to 10. The general board recommended 16.

Mr. SHERWOOD. That makes $4,000,000 additional?

Mr. HOBSON. Approximately a little more. I do not care to take up the time and attention of this House further. I do feel, though, that a responsibility rests on me to point out what is so plain that every Member can see it if he would, that we ought to make the Navy we have effective. What is the use of having $150,000,000 in battleships and then have 25 or 30 or 40 per cent of their efficiency in battle lost because we have not provided the relatively inexpensive destroyers?

Mr. POWERS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. Certainly.

Mr. POWERS. How many of these torpedo-boat destroyers have England, France, and Germany?

Mr. HOBSON. I have just quoted it. England has 184; France, 84; Germany, 131; and Japan, 67. It is the practice of all the world——

Mr. POWERS. And we have 42?

Mr. HOBSON. We have 42 built and 14 building, and of those building many are not up to date to be used with the *Dreadnought* class.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. I yield.

Mr. MOORE of Pennsylvania. What is the draft of those vessels?

Mr. HOBSON. I should say about 16 feet; I guess about that.

Mr. MOORE of Pennsylvania. Could any of them pass in time of peace from one navy yard to another on the Atlantic coast by the inland waterways?

Mr. HOBSON. I think not; but I hope the day will speedily come when we can develop that inland-waterway system so that we can pass our torpedo craft through the inland waterways paralleling the coast.

Mr. MANN. Did the torpedo destroyers owned by France, Germany, and England cost as much as a million dollars apiece, or somewhere in that neighborhood?

Mr. HOBSON. Again, I speak from impression and memory merely. I do not think the average has been that much. I do not think our average has been that much heretofore, but I think that those that are being laid down to-day are that much. The trend of evolution is to increase of size of the destroyer and make her available as a scouting cruiser.

Mr. PADGETT. Mr. Chairman, I move that debate on the paragraph and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] moves that debate on the paragraph and all amendments thereto be now closed. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The Clerk will read the amendment offered by the gentleman from Alabama [Mr. HOBSON].

The Clerk read as follows:

On page 55, in line 1, strike out the word "six" and insert in lieu thereof the word "ten."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Alabama.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

The committee divided; and there were—ayes 24, noes 86.

So the amendment was rejected.

Mr. WITHERSPOON. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. WITHERSPOON].

The Clerk read as follows:

On page 55 strike out the paragraph, lines 1, 2, and 3, as follows:
"Six torpedo-boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed $950,000 each."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi [Mr. WITHERSPOON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

The Committee divided, and there were—ayes 25, noes 85.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Four submarine torpedo boats in an amount not exceeding in the aggregate $2,478,936; and the sum of $1,294,912 is hereby appropriated for said purpose.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] moves to strike out the last word.

Mr. SISSON. Mr. Chairman, I want to call the attention of the House briefly to the expenses of our Naval Establishment. In 1896 we spent on the Navy $29,000,000 in round figures. In 1897 we spent on it $30,000,000; in 1898, $33,000,000; in 1899, $56,000,000; in 1900, $48,000,000; in 1901, $65,000,000; in 1902, $78,000,000; in 1903, $78,000,000; in 1904, $81,000,000; in 1905, $97,000,000; in 1906, $100,000,000; in 1907, $102,000,000; in 1908, $98,000,000; in 1909, $122,000,000; in 1910, $136,000,000; in 1911, $131,000,000; and in 1912, $126,000,000.

I wanted to call the attention of the committee especially to this to show how rapidly this item is increasing in expense. I do not believe that a country is made greater, nor do I believe it is made stronger, by unnecessarily increasing the number of shoulder straps or the number of ships on the sea.

I do not believe that a nation is made stronger by increasing the burdens upon labor and increasing the expenditures upon those matters which will become fixed charges upon labor for all time to come. It is estimated that each battleship will cost annually two and one-half million dollars in maintenance: First, in maintenance of the ship on the sea; second, in repairs; third, in the number of additional employees necessary in the entire department of Government; fourth, the support of the battleship by the submarines and the auxiliary vessels that surround it, and the subsistence of the people who are employed. That is also an increased item of expense. Therefore it is estimated that for every new battleship authorized we put an annual expenditure of $2,500,000 as a fixed charge upon the Treasury.

Now, Mr. Chairman, I ask permission to place in the RECORD a statement showing the increased appropriations from 1875 down to and including the present time. I mean by that the expenses of the Government, including other items of expense as well as that of the Navy.

Mr. MANN. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. MANN. Will the gentleman insert in that table the amount carried by this bill as reported to the House?

Mr. SISSON. Yes; I will do that.

The statement referred to is as follows:

Appropriations fiscal years 1875–1912, inclusive.

AGRICULTURE APPROPRIATIONS.

1881	$253,300.00
1882	335,500.00
1883	427,280.00
1884	405,640.00
1885	480,190.00
1886	585,790.00
1887	654,715.00
1888	1,028,750.00
1889	1,716,010.00
1890	1,669,770.00
1891	1,779,100.00
1892	3,028,153.50
1893	3,232,995.50
1894	3,325,500.00
1895	3,229,623.06
1896	3,303,750.00
1897	3,255,532.00
1898	3,182,902.00
1899	3,509,202.00
1900	3,726,022.00
1901	4,023,560.00
1902	4,582,420.00
1903	5,208,960.00
1904	5,978,160.00
1905	5,902,040.00
1906	6,882,690.00
1907	9,930,440.00
1908	9,447,290.00
1909	11,672,106.00
1910	12,995,036.00
1911	13,487,636.00
1912	16,960,016.00

ARMY APPROPRIATIONS.

1875	27,788,500.00
1876	27,935,830.00
1877	27,621,867.90
1878	25,812,500.00
1879	25,593,486.01
1880	26,797,300.00
1881	26,425,800.00
1882	26,687,800.00
1883	27,528,000.00
1884	24,381,250.00
1885	24,454,450.00
1886	24,014,052.50
1887	23,753,057.00
1888	23,724,718.69
1889	24,471,300.00
1890	24,316,315.73
1891	24,206,471.79
1892	24,613,529.19
1893	24,308,499.82
1894	24,225,639.78
1895	23,592,884.68
1896	23,252,608.09
1897	23,278,402.73

Mr. SISSON. These figures stagger the human intellect. This enormous burden of taxation increasing so rapidly is sure to bring disaster unless it is checked.

There has been one principle of the Democratic Party which has been present as an issue in every campaign, and it is the one declaration of the party about which there has never been any difference since the great founder of Democracy first promulgated the great declaration of principles in his first inaugural address. The first inaugural address of Thomas Jefferson is one of the greatest state papers of ancient or modern times. That address was for a number of years the only platform of the Democratic Party, and it will be for all time the heart and soul of Democracy; and when the party shall depart from the principles laid down in that address the Democratic Party shall have perished from the earth.

In that inaugural address, among the other declarations of principles, we find as a cardinal doctrine of Jefferson's governmental policy that the Government should be economically administered, that labor might be lightly burdened. There has never been a campaign, from Jefferson' time down to our own, that the great Democrats of this country have not all advocated this doctrine. I would call the Democrats' especial attention to the declarations of the party for the last fifty-odd years as laid down in the platform for those years.

The Democratic platform of 1856 declares that—

It is the duty of every branch of the Government to enforce and practice the most rigid economy in conducting our public affairs, and that no more revenue ought to be raised than is required to defray the necessary expenses of the Government and for the gradual but certain extinction of the public debt.

The Democratic platform of 1860, in its first resolution, reaffirms all of the principles announced in the platform of 1856.

The Democratic platform of 1864, which was made during the Civil War, is silent on Government expenses.

In the Democratic platform of 1868, in article 6, the party, in specific language, commits itself to—

Economy in the administration of the Government * * * so that the burden of taxation may be lessened.

The Democratic platform of 1872, in article 6, declares that—

We demand a system of Federal taxation which shall not unnecessarily interfere with the industry of the people, and which shall provide the means necessary to pay the expenses of the Government, economically administered.

The Democratic platform of 1876 declares:

We denounce the improvidence which in 11 years of peace has taken from the people in Federal taxes thirteen times the whole amount of the legal-tender notes and squandered four times their sum in useless expense, without accumulating any reserve for their redemption. We denounce the financial imbecility and immorality of the party which, during 11 years of peace, has made no advance toward resumption, no preparation for resumption, but instead has obstructed resumption by wasting our resources and exhausting all our surplus income, and while annually professing to intend a speedy return to specie payments has annually enacted fresh hindrances thereto.

The same platform further declares:

We demand a judicious system of preparation, by public economies, by official retrenchments, and by wise finance, which shall enable the Nation soon to assure the world of its perfect ability and its perfect readiness to meet any of its promises at the call of the creditor entitled to payment.

The same platform further declares:

Reform is necessary in the scale of public expense—Federal, State, and municipal.

The same platform further declares:

We demand a rigorous frugality in every department and from every officer of the Government.

The Democratic platform of 1880 declares, in article 14:

We congratulate the country upon the honesty and thrift of a Democratic Congress which has reduced the public expenditures $40,000,000 a year.

The Democratic platform of 1884 declares that—

sufficient revenue to pay all of the expenses of the Federal Government, economically administered, including pensions, interest and principal of the public debt, can be got under our present system of taxation from the customhouse taxes on fewer imported articles, bearing heaviest on the articles of luxury and bearing lightest on the articles of necessity. We therefore denounce the abuses of the existing tariff, and, subject to the preceding limitations, we demand that Federal taxation shall be exclusively for public purposes, and shall not exceed the needs of the Government, economically administered.

The Democratic platform of 1888 declares:

Every Democratic rule of governmental action is violated when, through unnecessary taxation, a vast sum of money, far beyond the needs of an economical administration, is drawn from the people and the channels of trade and accumulated as a demoralizing surplus in the National Treasury. The money now lying idle in the General Treasury resulting from superfluous taxation amounts to more than one hundred and twenty-five millions, and the surplus collected is reaching the sum of more than sixty millions annually. Debauched by this immense temptation, the remedy of the Republican Party is to meet and exhaust, by extravagant appropriations and expenses, whether constitutional or not, the accumulation of extravagant taxation. The Democratic policy is to enforce frugality in public expense and to abolish unnecessary taxation.

The Democratic platform of 1892 declares:

The representatives of the Democratic Party of the United States, in national convention assembled, do reaffirm their allegiance to the principles of the party as formulated by Jefferson and exemplified by the long and illustrious line of his successors in Democratic leadership, from Madison to Cleveland; we believe the public welfare demands that these principles be applied to the conduct of the Federal Government.

The platform of the same year further declares:

We pledge the Democratic Party, if it be intrusted with power, not only to the defeat of the force bill, but also to relentless opposition to the Republican policy of profligate expenditure, which, in the short space of two years, has squandered an enormous surplus and emptied an overflowing Treasury, after piling new burdens of taxation upon the already overtaxed labor of the country.

The Democratic platform of 1896 declares:

We, the Democrats of the United States in national convention assembled, do reaffirm our allegiance to those great essential principles of justice and liberty upon which our institutions are founded and which the Democratic Party has advocated from Jefferson's time to our own.

The same platform further declares:

We denounce the profligate waste of the money wrung from the people by oppressive taxation and the lavish appropriations of recent Republican Congresses, which have kept taxes high, while the labor that pays them is unemployed and the products of the people's toil are depressed in price till they no longer repay the cost of production. We demand a return to that simplicity and economy which befits a democratic government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

The Democratic platform of 1900 declares:

We denounce the lavish appropriations of recent Republican Congresses, which have kept taxes high and which threaten the perpetuation of the oppressive war levies. We oppose the accumulation of a surplus, to be squandered in such barefaced frauds upon the taxpayers as the shipping subsidy bill, which, under the false pretense of prospering American shipbuilding, would put unearned millions into the pockets of the favorite contributors to the Republican campaign fund. We favor the reduction and the speedy repeal of the war taxes and a return to the time-honored Democratic policy of strict economy in governmental expenditures.

The Democratic platform of 1904 declares:

Large reductions can easily be made in the annual expenditures of the Government without impairing the efficiency of any branch of the public service, and we shall insist upon the strictest economy and frugality compatible with vigorous and efficient civil, military, and naval administration as a right of the people too clear to be denied or withheld.

The Democratic platform of 1908 declares:

The Republican Congress in the session just ended made appropriations amounting to $1,008,000,000, exceeding the total expenditures of the past fiscal year by $90,000,000, and leaving a deficit of more than $60,000,000 for the fiscal year just ended. We denounce the needless waste of the people's money, which has resulted in the appalling increase, as a shameful violation of all prudent considerations of government and as no less than a crime against the millions of working men and women, from whose earnings the great proportion of these colossal sums must be extorted through excessive tariff exactions and other indirect methods. It is not surprising that, in the face of this shocking record, the Republican platform contains no reference to economical administration or promise thereof in the future. We demand that a stop be put to this frightful extravagance, and insist upon the strictest economy in every department, compatible with frugal and efficient administration.

The Democratic platform of 1912 declares:

We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

The conclusion of the platform of 1912, upon which Woodrow Wilson and every Member of this Democratic Congress was elected, declares:

Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign, and we invite the cooperation of all citizens, regardless of party, who believe in maintaining unimpaired the institutions and traditions of our country.

When those of us who are Members of this Democratic House cast up accounts during this Congress we are startled to find how much more money we have spent than any other Congress in the history of the country. How can we, in the face of our party declarations which I have quoted, face the American people without an apology? It is not sufficient to say that the country is growing, and while the political enemies twit us for the betrayal of our party, just to say, as Thomas B. Reed said when the expenses of one Congress of two years leaped to one billion of dollars, that this is a billion-dollar country, because

the expenses since that day have amounted to the stupendous sum of two billion dollars each Congress.

This vast sum of money taken indirectly from the people's toil without their being conscious of having paid it, is even a greater crime than if each citizen knew exactly just how much he was contributing to the support of the Federal Government. We the Democrats in Congress are the guardians of the people's toil and we should see to it that not a single penny is taken from them more than is necessary to pay the expenses of the Government, economically administered. We can not play the Tom Reed racket and save our faces, because our party has always denounced extravagance. The party has changed its position on the tariff, on the money question, on our foreign policy, on the construction of the Constitution, and on many other great questions, but this is the one question upon which Democrats in the past have always agreed. If our party should throw to the winds this great principle of economy there will then not be a political organization in existence in this great country that stands against heavy taxation and wild extravagance.

It is not my purpose to single out this naval bill and make an attack upon it. Under our present system of appropriating money it is entirely impossible for the membership of the House to know exactly what has been done until all of the appropriation bills have come from the various committees and passed the House, and even then we do not know what our financial standing is until these bills have passed the Senate, gone through conference, and been agreed upon by both Houses. But the attention of the whole country has been called to the great extravagance of this Congress, and I, along with other Members, did not realize at what a rapid gait we were going until within the last few weeks. These great supply bills have been born, as it were, back in the recesses of the committee rooms and the country was only startled when they were reported from these committees into the whole House. I am not blaming any one individual committee, nor am I blaming any individual Democrat. My criticism is directed at the present system.

I know of no better bill, however, to use as an illustration of the rapidly increasing extravagances of the Government than this naval bill. As reported from the committee, this bill carries over $148,000,000, and the authorizations in the bill, which will have to be cared for during the fiscal year following, if added to the face of the bill, would make it close to $170,000,000.

The Committee on Appropriations, of which I am a member, has many of the great supply bills under its jurisdiction, and this committee is the one committee that has greatly reduced its bills below that of the past Republican Congresses by many millions. Last year the sundry civil bill was $33,000,000 less than in the last Republican Congress. At that time the Republicans charged us with cheeseparing for election purposes. But after the election, at this session of Congress, we reduced the sundry civil expenses $4,800,000 more than the preceding year, making in round numbers a reduction of $38,000,000 from the Republican bill. If every committee in the House had done as well, the total expenditures of the Federal Government would have been $300,000,000 less than the Republican expenditures, and the efficiency of the Government would not have in any way been impaired.

The military expenses of the Federal Government are growing too rapidly. Our military establishment (including the naval establishment) is the most expensive in the world. By referring to the statement of expenditures in the naval and military establishments of the country you will see a startling increase, which means that this free Republic is rapidly drifting under the control of the military spirit. The history of the past shows that this military spirit has been the cause of the overthrow of liberty in every country.

The influences which sell the steel, and all the supplies of the great armies and navies of the world, out of which vast fortunes are being made, constantly surround the capitals of the world and fill the newspapers and magazines with sensational stories which cause the nations to unnecessarily dread each other and play one nation against the other. Instead of our magazines in the civilized nations of the world standing for "Peace on earth, good will toward men," they are standing for war for selfish reasons. The Steel Trust sells the steel; the Beef Trust sells the beef; the Arms Trust sells the arms; the Powder Trust sells the powder; the Clothing Trust sells the clothing; the Lead Trust sells the lead; and as the number of officers and men increase their political influence through their families and friends increases, and all of these influences and forces clamor for more pay and greater fields of activity. Each nation is striving to outstrip the other in military and naval establishments, in order that each particular nation may be stronger than the other when some war in the future may call them into play.

It would be interesting for some schoolboy to take the columns of figures to which I have called the attention of this House and add up the annual expenditures for our Army, for our Navy, and for our fortifications, and see how many billions of dollars have been wrung from the peaceful toil of the poor for these mighty establishments in the past 50 years. And then, if this same boy would get the expenses of England, France, Germany, Russia, Italy, Japan, China, Spain, and the other great or small nations of the world, and add this stupendous sum to that expended by the United States, he would find how many billions upon billions is expended each year, and how much has been expended in the past 50 years on armies and navies.

This great Republic ought to stand for peace and not for war. If we should be a Nation prepared to defend our labors at home, we should need but little standing army and a reasonably large navy to defend this happy and peaceful policy. On the other hand, if we are to be a nation of conquests and devote all of the people's toil to the establishment of an army and navy large and strong enough to overcome any other nation or nations in the world, then we have turned back the heart, thought, and mind of the people to the terrible age of force and conquests. We do not need these mighty establishments for defense at home. This military spirit would send us out Alexander-like to conquer the world.

The nations of Europe are already beginning to groan under the burden. The German press is in revolt against the heartless exactions of the Emperor for his army and navy. This German press is contending that while the German Government is preparing its mighty navy and army to fight some war that may probably arise in the future it is actually destroying the peace and prosperity of the people at home. The taxation in Germany is enormous, and the strength of that great nation is being sapped to keep up this mighty military establishment to defend the German Crown and the German Government, and this preparation for this defense is doing the German people quite as much harm as would be done if the German Government were destroyed and the people were to pass under the control of some other nation, and certainly the German people would be greatly relieved if they could pass under the control of some more peacefully inclined Government.

The poor millions of Russia are groaning under the burdens of taxation to keep up their mighty military establishment. The English people have exhausted almost every avenue of taxation in order that they may raise money to sustain its mighty army and navy. When will this folly cease? Never, so long as the Members of Congress and the Members of the Senate of the United States continue to clamor for preparations for war and constantly keep the nations of Europe uneasy about the United States' aggressiveness in world policies.

Since the Spanish-American War our Naval Establishment has increased 400 per cent, and the increase of the nations of the world has been at about the same proportion. These nations are beginning to fear the United States, because they have now learned that the United States is as selfish in land grabbing as the other nations of the world have been. And the reason that prompts the United States Government to increase her naval and military establishments is the same reason that prompts other nations to increase theirs.

The United States, having acquired Porto Rica and the Philippines, is preparing to defend these island possessions, one of which is 8,000 miles from our shores. And while it is stated that the Philippine Islands alone cost the Government about forty millions a year more than it would cost the Government if we would turn them loose, this forty millions is a mere bagatelle as compared with the mighty increase in our military and naval expenses, caused directly by our possession of the Philippine Islands.

The Democratic Party is committed to the freedom of the Philippines, and it is our highest solemn duty to carry out this pledge of the party to at once give the Philippines their independence and then at once stop the increase of our naval and military establishments.

The United States Government is doing as Spain did in the sixteenth, seventeenth, and eighteenth centuries. Spain built fortifications practically around the world, massive in their proportions and impregnable, apparently, from all attack. But these fortifications were gradually abandoned, because the burden of keeping them up was so great that the Spanish people could not bear it. We are fortifying Porto Rica, Cuba, Hawaii, Alaska, Philippine Islands, as well as our own coast. These fortifications are increasing in size, and necessitates an increase in men—all of which means an increased burden upon the American people. These fortifications will not add to our national strength, but they will greatly add to our national burden. Every soldier in the Army and every tar on the sea is a burden

on the back of the man who labors and toils in the fields, in the factories, and in the mines.

There are 16,000,000 families in the United States, the average of whose earnings is about $600 annually, and in addition to supporting their families out of this $600 they are compelled to pay their pro rata share for the support of the men in the Army and in the Navy. These Army and Navy officers live in magnificent houses that cost from nine to fifteen thousand dollars each. These houses are furnished and cared for at the expense of the people. These Army officers are furnished with light, heat, and water; and in addition to all of this they get salaries ranging from $3,600 to $5,000 a year. We have on the retired list some 1,800 or 2,000 Army and Naval officers, many of whom are physically able to perform duties in the Army and Navy, whose average salary is $320 more than the salaries of the Army and Navy officers who are actually performing duty, and the number is gradually increasing. These Army and Navy officers, as well as the enlisted men, have lifetime jobs, unless they are cashiered or dischargd for cause, and are cared for by taxing the people of the United States. Every time one of them is injured or hurt or health is impaired he is at once put upon the pension rolls for life, thus adding another burden upon the people.

It is too long a story to record all of the extravagances in the Army and Navy, much less go into the extravagances in the other departments of the Government.

I have put in my remarks the tables of our expenses and have gone somewhat into detail, so that I might justify my position in Congress as a Democrat in fighting extravagances wherever I find them. I have also set out the declarations of our party denouncing these extravagances, and I do this for the purpose of calling the attention of Democrats throughout the country to the condition of affairs in our Government, so that every Democrat in Congress as well as in the ranks may come out against it. Let us stand firm by our party pledges. Let the people know that our party pledges were made in good faith and not to be repudiated.

We have elected a great man as President of the United States. I call upon him as the leader of the party in the United States to hold up the hands of all of us who are trying to practice rigid economy in every department of the Government. The Democratic Party has a glorious opportunity to do the people of the country a great service by relieving them of Republican extravagance and by putting the affairs of the Government on a business basis.

The President of the United States has selected as Secretary of State the greatest Democrat on this earth. He is a man who believes in peace. He believes in the glorious doctrine of brotherhood taught by the Master when He was on earth. Let us follow this great leader in his efforts to bring about peace among the nations of the world. Let this great party, while it is in power, hold up the President's hands and the hands of Mr. Bryan, and all of the other great Cabinet officers that the President has selected, in their efforts to bring about in this world "peace on earth, good will toward men."

Let us by legislation and the practice of rigid economy remove these burdens from the backs of the people before the people rise up and remove the burdens by revolution. Revolution is expensive not only in property but in life, and it is a sad commentary upon the history of the past that the people have rarely been able to make advances and secure their rights except by the bayonet. The fathers of this Republic believed that with the ballot in the hands of the free men that they would be able to control expenditures without recourse to bayonets.

This is the plain duty of the party to-day. Will we live up to it? If we will, the Democratic Party will have a long lease of power. If we do not, we will surely go out of power, as we should.

Mr. AUSTIN. Mr. Chairman, I have followed with great interest the discussion on this bill. All three of the great national parties in their platforms expressed themselves on an American Navy. The Democratic platform adopted at Baltimore used this language:

> The party that proclaimed and has always enforced the Monroe doctrine and was sponsor for the new Navy will continue faithfully to observe the constitutional requirement to provide and maintain an adequate and well-proportioned Navy sufficient to defend American policies, to protect our citizens, and uphold the honor and dignity of the Nation.

The Republican platform stated:

> We believe in the maintenance of an adequate Navy for the national defense, and we condemn the action of the Democratic House of Representatives in refusing to authorize the construction of additional battleships.

The Progessive Party platform proclaimed:

> We favor an international agreement for the limitation of naval forces. Pending such an agreement, and as the best means of preserving peace, we pledge ourselves to maintain for the present the policy of building two battleships a year,

In other words, the representatives of the American people in national conventions assembled declared themselves in favor of an adequate Navy. Who are the best qualified, the best posted of our public officials to determine the question of an adequate Navy from the facts and circumstances and a full and thorough consideration of the question? Is it the able and eloquent gentleman representing a district in Mississippi [Mr. WITHERSPOON] and the active and efficient Member from Georgia [Mr. TRIBBLE], or should we accept the weight of evidence submitted to us by the trained and experienced officials of the Navy Department who have devoted their lives to the Navy?

Mr. WITHERSPOON. Mr. Chairman, will the gentleman yield for a question?

Mr. AUSTIN. If I can get a little more time, I shall be very glad to do it. In determining this question and weighing this evidence and the arguments submitted to us, should we take the opinion and the argument of these gentlemen who are lawyers and politicians or should we accept the statements and the evidence submitted to us by Admiral Dewey and the other faithful and patriotic men connected with the Navy who have served this country long and well in the Navy to determine this question, which should not be determined for political expediency or on political lines, but alone for the honor and glory of the American people and the American Government? [Applause.] Here is the gentleman from Alabama [Mr. HOBSON]. Does anyone question his fidelity to his country or his patriotism to the American people or his knowledge of naval affairs or his loyalty to the Democratic Party?

Mr. Chairman, every department of this Government has increased its appropriations from year to year in practically the same ratio as the Navy Department, as outlined here by the gentleman from Mississippi [Mr. SISSON]. This country has outgrown all other countries and it is natural that the expenses of every department should show an increase. Since the Spanish-American War the condition of the American Nation has materially changed in reference to our armament and our responsibility to the world. We have taken over the Philippine Islands. I believe it is going to be the policy of the incoming administration to turn them adrift, but in doing so you will only require additional ships to maintain their independence in the Pacific and to prevent their seizure by some other power.

We have Porto Rico, Hawaii, and virtually Cuba. Cuba ought to have been made a part of the United States when we first landed there. [Applause.]

Mr. PADGETT. Mr. Chairman, I move to close debate on the paragraph and all amendments thereto in five minutes, and that the gentleman from Tennessee [Mr. AUSTIN] be given that five minutes.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee.

The question was taken, and the motion was agreed to.

Mr. AUSTIN. Mr. Chairman, we ought to have declared Cuba ours when we sacrificed our millions of money and thousands of precious American lives for the freedom of that island from Spain. Since that time we have been forced to take our ships, sailors, and soldiers to maintain and reestablish order in Cuba at the expense of the American taxpayers. That course or policy will be repeated whenever you declare the independence of the Philippine Islands. We have an enormous coast line, and we are the custodian of Haiti, Santo Domingo, Cuba, Hawaii, and by and by of the Philippines, and do we only need one battleship a year for that great responsibility? Your party and my party stands committed to the enforcement of the Monroe doctrine, and can you maintain the enforcement of that doctrine as it affects an entire continent below us with a program of one battleship a year?

We have constructed the Panama Canal, at an expense of $400,000,000. We have no merchant vessels to use it, and yet it must be protected. We ought to have and the American people believe in an adequate Navy, and I repudiate the idea that one battleship a year makes an adequate Navy under the present conditions that confront us and under our great responsibilities. We need not only a fleet, an all-around powerful fleet, in the Atlantic, but we need one also in the Pacific, and the Republican Party stands for it, and the American people will sustain us when they have a chance to pass upon the proposition. If you submit the question to the ballot box, the American people will repudiate the idea that the one battleship program means an adequate Navy for 90,000,000 of Americans.

Mr. CLINE. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. CLINE. I want to ask the gentleman whether there has been a period since 1823 when the Government did not enforce the Monroe doctrine under all circumstances when it was called upon to do so?

Mr. AUSTIN. That is quite true, but Germany and other European countries are sending their people to settle up the Argentine Republic, Brazil, and other South American countries. They are planting their banks and commission houses there, and no man can tell when a serious danger will confront and threaten that very doctrine itself. France and Austria invaded the American Continent and planted their flags and soldiers in Mexico until we succeeded in controlling the sea and drove them back home to their foreign shores.

Mr. Chairman, this is not a political question. It is a patriotic question, and it affects and concerns every American citizen. We are derelict in our duty if we do not stand for an adequate Navy—not an inefficient Navy, but a great Navy commensurate with the duties that confront us as a world power. Let me appeal to my colleagues in the interest of all the people, in the interest not of to-day but of to-morrow.

Let me appeal to you to prepare for war, prepare for any emergency now in the time of peace and prosperity. Let us stand by the American flag, planted upon our battleships—on the best ships that money can purchase—manned by the bravest and best of all sailors.

"Your flag and my flag,
  There it flies to-day
Over your land and my land
  Half a world away;

Blood red, rose red,
  Its stripes forever gleam;
Pure white, soul white,
  Our good forefathers' dream.

Sky blue, true blue,
  The stars that shine aright—
A glorious guidon of the day,
  A shelter through the night.

Your flag and my flag,
  And oh, how much it holds—
Your land and my land
  Safe within its folds.

Your heart and my heart
  Beats quicker at the sight;
Sun kissed and wind tossed
  The red, the blue, the white.

The one flag, the great flag,
  The flag for me and you;
Glorified, all else beside,
  The red, the white, the blue."

[Applause.]

Mr. WITHERSPOON. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The question is on the motion of the gentleman from Mississippi.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

One transport, to cost, exclusive of armor and armament, not to exceed $1,850,000.

Mr. SISSON. Mr. Chairman, on that I reserve the point of order.

Mr. FOSTER. Mr. Chairman, I make the point of order.

Mr. SISSON. Mr. Chairman, I will state to the Chair that my information is that two years ago, when the naval appropriation bill was under consideration, an item of this kind was in the bill, and, on a point of order made by the gentleman from Wisconsin, Mr. Stafford, the gentleman from Illinois, Mr. MANN, being in the chair, the point of order was sustained.

Mr. BUTLER. The gentleman from Illinois [Mr. MANN] was not in the chair. He was away.

Mr. SISSON. The decision, as I understand it, is not in Hinds' Precedents, but my information is that it is in the RECORD. The parliamentary clerk has agreed to look the matter up. The point of order is this: That this is a new authorization of a vessel that is not a necessary part of the Naval Establishment. They could not begin a new line of vessels except by authority. Now, if they should begin on this line of vessels and Congress committed itself to this proposition, in the future they could add to it, but they could not begin a new proposition and a new project in this way, and for that reason I make the point of order in good faith.

Mr. PADGETT. Mr. Chairman, I do not think it subject to a point of order. We have transports now; we have battleships; we have submarines; and according to the gentleman's own statement it is in order to increase them. We have the transports already.

Mr. SISSON. How many transports have you in the Navy?

Mr. PADGETT. Three or four.

Mr. SISSON. Are they transports that have been heretofore authorized for soldiers, and is not that the only transport? Is it not a fact that two or three times you have made an effort to get a transport into the bill, and it has gone out on a point of order?

Mr. PADGETT. I do not recollect it so.

Mr. SISSON. Did it not go out of the bill three years ago, when this very item, or one like it, was in the bill, and went out on a point of order?

Mr. PADGETT. I do not remember anything of the kind.

Mr. SISSON. Does the gentleman say it is not so?

Mr. PADGETT. No; I say I have no recollection of it.

Mr. RAKER. If the gentleman will allow me, I find on page 617 of the hearings that Secretary Meyer said:

Now, we are very weak on transports. We have only two, the *Prairie* and the *Buffalo*, one 20 and the other 22 years old.

Mr. SISSON. Oh, but those are entirely different vessels from this.

Mr. PADGETT. They are transports.

Mr. SISSON. The vessel spoken of in this bill is "one transport, to cost, exclusive of armor and armament, not to exceed $1,850,000." It is an entirely different proposition from the transports referred to by the gentleman.

Mr. PADGETT. They are transports.

Mr. SISSON. The gentleman will not find that this question was ever raised in this House on a point of order but that the point of order was sustained by the Chair, and the items have gone out.

The CHAIRMAN. If the gentleman from Mississippi has any exact information of that fact, the Chair would like to have it.

Mr. SISSON. Mr. Chairman, perhaps I misled the parliamentary clerk by saying that the case occurred two years ago when my information is now that it was three years ago when the matter was up. To have this in order it has got to be a necessary part of the present Naval Establishment; they can not begin a new line of boats without some specific authority of Congress to do so.

Mr. RAKER. I want to say further that the hearings disclose that we purchased these transports during the Spanish-American War.

Mr. SISSON. My information is that they belong to the Army.

Mr. ROBERTS of Massachusetts. They never did.

Mr. RAKER. The Secretary recommends two transports and the committee only put in one. The Secretary further said that it would be a great economy if the Government would construct these transports.

Mr. SISSON. I would like the Chairman to satisfy himself that the item is in order, because if my contention is correct then this is the beginning of a new line of ships in the Navy. If I am correct in my position, this item ought not to go in at all without some specific authority for the construction of this class of vessels in the Navy.

Mr. HOBSON. I want to say that we have two transports now, and they are in commission.

Mr. SISSON. How large are they?

Mr. HOBSON. I should say they were four or five thousand tons.

Mr. SISSON. Constructed on a naval bill for this purpose or transferred from some service?

Mr. HOBSON. They were purchased.

Mr. SISSON. Oh, they were purchased; bought for that purpose.

Mr. PADGETT. That does not make any difference.

Mr. SISSON. That does not authorize further construction. Because Congress authorized the purchase of a boat or certain specified boats, or because it gives the Navy Department the right to buy boats, does not confer upon the Naval Committee of Congress, under the rules, the right in the naval bill to add new construction.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I understand the Chair desires information as to the transports in the Navy.

Mr. SISSON. Mr. Chairman, I want to ask just one question.

The CHAIRMAN. The gentleman from Massachusetts has the floor.

Mr. ROBERTS of Massachusetts. I will yield to the gentleman from Mississippi for a minute.

Mr. SISSON. I will ask the gentleman if it is not true that the two boats spoken of were purchased during the Spanish-American War under the general act authorizing the President to conduct this war and which gave plenary authority to him under that act.

Mr. PADGETT. They were purchased during the Spanish-American War.

Mr. SISSON. And they were purchased under that act authorizing the President to conduct that war.

Mr. PADGETT. That does not make any difference, we own them and they are part of the Navy and we can add to them.

Mr. ROBERTS of Massachusetts. Mr. Chairman, we have five transports in the Navy with a total tonnage of 26,595 tons.

I am quoting now from the official figures giving the different classes of vessels and the number in each class in the Navy, and I want to say just one word in addition. If the Chair desires to know, I am quoting from the Naval Yearbook for 1912, on page 780, and this information I am stating is obtained directly every year from the Navy Department and is official.

Now, the gentleman attempts to draw a distinction between a vessel that this Government constructs and a vessel that it purchases. I want to point out to the gentleman that it makes no difference how we get a vessel if we get her under due authority of law, and in the case of the two transports mentioned, the *Prairie* and the *Buffalo*, it is true that they were purchased during the Spanish-American War, but they were purchased pursuant to law, otherwise we would not have them in the Navy, and we never could have acquired them. There is no question whatever but that the Navy now has transports, and this authorization in this bill is not creating a new line or class of vessels. It is simply adding to a class which we already have.

Mr. HOBSON. Mr. Chairman, I would like to be heard on the point of order. Reference has been made to the *Prairie* and the *Buffalo*. They are in commission, but in addition to those we have two others, the *Yankee* and the *Dixie*, and I will read very briefly a statement of the service that those boats have been rendering. I read from the report of the Secretary of the Navy:

> Since the close of the Spanish War these ships have been constantly engaged in transporting men on foreign stations, expeditionary forces of marines, and Naval Militia. Since 1900 there have been, for instance, no less than 24 expeditionary forces of marines dispatched to various parts of the world. From 1909 to 1911 there were transported in the *Yankee* and *Dixie* a little more than 20,000 men. During 1911 the *Prairie* made seven trips with enlisted men and two with marine regiments. The *Buffalo* made two trips to the Asiatic station—one trip with a marine regiment and one with Naval Militia of California. The need for transports is considered sufficiently urgent to warrant the omission of fuel ships for one year.

Now, Mr. Chairman, we have that type of ship in the Navy just as actually and really as we have the battleship type in the Navy. They are necessary to the performance of the functions of the Navy in the operations of the Marine Corps. The battleships and the cruisers which we have are not adapted to transportation of marines, and yet we are constantly required to transport those marines, and transports are far cheaper than the purchase of transportation from the commercial world, and we can not keep the Marine Corps of the Navy in its integrity without a transport service.

Mr. TRIBBLE. I will ask the gentleman if it is not a fact that the marines belong both to the sea and land, and in case of war receive the first bullets, and are always on the firing line, and are a most important part of our national defense?

Mr. HOBSON. The gentleman is quite correct.

Mr. TRIBBLE. In order to place these marines at Panama, or at any other position, we have to have transports to carry them to the scene of war.

Mr. HOBSON. The gentleman's logic is sound.

Mr. DYER. I would like to have the gentleman state to the committee the character of transports we have——

The CHAIRMAN. The gentleman from Tennessee [Mr. GARRETT] has been recognized.

Mr. GARRETT. Mr. Chairman, I wish to submit just this observation on the point of order: I do not know as to the merits of the question whether there should be a transport constructed, but upon the point of order I submit this to the Chair: That if this is a vessel to be used as a part of the Naval Establishment, then under the long line of rulings that have been made it is not subject to the point of order. If this is to be part of the naval fleet, it need not necessarily be a battleship or a torpedo boat; but if it is to be used in the service of the Navy, then it is a part of the Naval Establishment, and under a long line of rulings it is clearly not subject to the point of order.

Mr. MANN. The rule which would affect this question is:

> That no appropriation shall be in order unless in continuation of appropriations or such public works and objects as are already in progress.

The rulings are many that in the Lighthouse Service, which has lighthouse vessels, an amendment or proposition to build a new lighthouse vessel not previously authorized by law is subject to the point of order. The same is true of the Coast and Geodetic Survey, and the same is true of the Bureau of Fisheries, and the same is true in the War Department.

I have given a good deal of attention to this subject, because I was in the chair for several years when the naval appropriation bill was under consideration. There never has been any ruling of any Chairman holding any naval proposition in order for new work, new vessels, or anything of that kind, except for fighting vessels. Although the general rule was early laid down that the provision for a new vessel in the naval service was not a continuation of a work in progress, by an arbitrary ruling many years ago of a Chairman it was held that it was in order to appropriate for a new warship. But the decisions have been uniform all the time by all the Chairmen ruling upon the subject that that arbitrary exception applied only to fighting vessels.

Hence the Chair, the other day, ruled out an item for a dry dock. Now, a dry dock is just as necessary for the running of the Navy as a transport is, and the Committee on Naval Affairs seem to confuse their legislative jurisdiction with their appropriating jurisdiction. They have the authority to bring into the House a bill providing for a dry dock if it be necessary; they have the authority to bring into the House a bill providing for a transport if that be necessary. But there never has been a ruling yet which authorized an appropriation for any new construction in the Navy, either by way of vessel or dry dock or building, except where it applied to fighting vessels, and then only after the type of vessel was already in the Navy.

For instance, there was ruled out of order a few years ago a provision providing for a new type of torpedo boat or torpedo-boat destroyer, and the ruling was that if there was in the Navy a torpedo boat of a particular type, then it was in order as a continuing work to provide for an additional boat of that type, but without legislation it was not in order to provide in the appropriation bill for a new type of fighting vessel.

Mr. HOBSON. Mr. Chairman——

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

Mr. MANN. I suppose no one can ever make an argument without yielding, and hence I yield.

Mr. HOBSON. I just wanted to ask the gentleman a question. He is very familiar with the operations of the Navy, and when he recognizes——

Mr. MANN. I am more familiar with the operation of the rules than the gentleman is, and he is more familiar with the operations of the Navy than I am.

Mr. HOBSON. I want to thank the gentleman for the latter part of his statement.

Mr. MANN. The first part is equally true.

Mr. HOBSON. And it is no lack of compliment to admit the first.

Now, I want to ask the gentleman when he sees the operation of a fleet, for instance, as on the Central American coast, as we have just recently seen it operating, whether he regards the transports that were in that fleet—the transports that carry the marines who were going to be the landing weapons of the fleet when they reach shore—whether, when the fleet is sent to that coast and the transports are the main part of the fleet's operation, he would not consider those transports fighting ships?

Mr. MANN. I will ask the gentleman, then, whether he considers if we want to send the Army abroad it is not necessary to have ships in which to send them? And will the gentleman contend it is in order on the Army bill to provide transports for the Army? Or will the gentleman say that it is in order to provide a lighthouse tender in order that you may convey supplies to a lighthouse situated in the ocean that you can not get to without a tender?

Mr. HOBSON. No; but I will say to the gentleman——

Mr. MANN. They are equally pertinent questions.

Mr. HOBSON. I will say to the gentleman that the transport is a part of the fighting fleet.

Mr. MANN. It is the duty of the gentleman's committee, having legislative jurisdiction to report a bill providing for a transport not in the appropriation bill, to bring in such a bill.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. MANN. I will.

Mr. ROBERTS of Massachusetts. I thought I heard the gentleman state a moment ago that if we had a type of torpedo boat and some type of boat already in the Navy, then it would be in order to provide for additional boats of that type?

Mr. MANN. I said that particularly as to fighting vessels.

Mr. ROBERTS of Massachusetts. That is the distinction between a fighting vessel and transport or collier?

Mr. MANN. The Chairmen have always drawn that distinction.

Mr. ROBERTS of Massachusetts. I was asking the gentleman if he drew that distinction?

Mr. MANN. I do.

Mr. ROBERTS of Massachusetts. And the fact that there are transports in the Navy would not make in order additional appropriations?

Mr. MANN. I do not think it makes any difference. I am quite willing for the Chair to rule either way. Everybody admits that the original ruling authorizing on an appropriation bill appropriations for building new vessels in the Navy was an abitrary ruling, entirely in conflict with all other decisions made

under that rule. That arbitrary ruling, made years ago, has been followed.

Now, if the Chair desires to extend that, very well. That arbitrary ruling will meet the approval of those who are in favor of making up a monstrous Navy, because it is quite certain that if it had not been for that arbitrary ruling, made more than 20 years ago, at a time when people in the department were endeavoring to start a new Navy, we would not now have such a Navy as we have, and probably there would not be the enormous expense, either here or in other countries, from the endeavor of each to outdo the other in building up a navy.

The CHAIRMAN. The Chair is ready to rule. It has been held in order in the past to provide battleships in the naval appropriation bill, also to provide other classes of fighting ships. The question involved here, however, came up directly in the second session of the Sixty-first Congress, when the naval appropriation bill was under consideration, with the gentleman from Illinois [Mr. MANN] in the chair. The paragraph under consideration was this:

One repair ship, to cost not exceeding $1,000,000.

On that occasion the following colloquy took place:

Mr. TAWNEY. I make the point of order against the paragraph just read.

The CHAIRMAN. The gentleman from Minnesota makes the point of order against the paragraph just read. The Chair will hear the gentleman from Minnesota.

Mr. TAWNEY. There is no authority, Mr. Chairman, for the construction of this repair ship, which is in the nature of a dry dock and subject to the same rule. It is not attached to any navy yard, and it is not proposed that it shall be. It is therefore, under the ruling of the Chair in similar cases, contrary to the rules of the House and not in order.

The Chairman on that occasion [Mr. MANN], in passing on the motion, held as follows:

The CHAIRMAN. In ruling upon an amendment which was offered on the naval appropriation bill two years ago, the present occupant of the chair, who was then in the chair, made this statement:

"While the Chair is not called upon to decide as to whether an appropriation would be in order for a destroyer or torpedo boat known as 'subsurface' or 'semisubmerged' as a work already in progress, the Chair is inclined to think that the rulings in regard to holding appropriations for new vessels in order on naval appropriation bills as a work in progress have gone quite as far as it is possible to carry them."

It is quite within the power of the Committee on Naval Affairs to bring into the House a bill authorizing the construction of any kind of a vessel which the committee favors, and for Congress to provide for such authorization by legislation, but it seems to the Chair that it is legislation where no authorization has been made, and that to say that any kind of a vessel in the Navy, outside of fighting ships, can be provided on the naval appropriation bill without previous authorization of law, simply as a work in progress, is not warranted. The Chair therefore sustains the point of order.

It seems that the only instances where it has been held in order in the past are where an appropriation bill provides for the building of other fighting ships, and on the ground that it is a work in progress, as stated in paragraph 3723 of volume 4 of Hinds' Precedents:

By a broad construction of the rule the principle of which is not generally applied in other matters, an appropriation for a new and not otherwise authorized vessel of the Navy is held to be for continuance of a public work.

But the provision or paragraph passed upon in that case was one in which provision was made for another fighting ship. The Chair is unable to find any ruling that would support the contention that this paragraph is in order. The Chair therefore sustains the point of order. The Clerk will read.

Mr. CLINE. I move to strike out the last word.

The CHAIRMAN. The paragraph has been stricken out. The Clerk will read.

The Clerk read as follows:

One supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. CLINE. Mr. Chairman, I want to address myself to the answer to a question propounded to the gentleman from Tennessee [Mr. AUSTIN] when he was discussing the Monroe doctrine.

Mr. Chairman, one of the most remarkable performances exhibited in this House was again reproduced last Saturday in the general discussion of this bill. During my membership, covering nearly four years, I have witnessed the annual recurrence of the gentleman from Alabama [Mr. HOBSON] with his story of pessimism and prophecy. He opened his last "vision" with this remarkable statement, in referring to the Monroe doctrine:

The next element of our free institutions is the principle of equality of opportunity, which principle is being projected out by us into the competition for the commerce and the markets of the world. We should not forget that every great military nation in the world with a colonial government absolutely denies that principle.

In this connection, referring to the completion of the Panama Canal, he further said:

The completion of the Panama Canal will bring to a head the question of the future development of Central and South America. * * * These lands and these countries are going to be developed, and the question must be settled as to whether they are going to be developed by the system of European colonization and restriction, which embodies the principle of privilege and special advantage of the distant mother country, or whether they are going to be developed under the Monroe doctrine, with the principle of equality of opportunity for all along with the freedom of those people. * * * The principle of equality of opportunity (involved in the Monroe doctrine), the very ends of justice lie at the foundation of the world's future happiness, and in my judgment is the foundation of peace between nations. America embodies it and is committed to it, and no other great military power of the earth admits it.

Let us have an understanding of what was originally declared in the so-called Monroe Doctrine. In December, 1823, President Monroe, in his annual message to Congress, said:

"We owed it to candor and to the amicable relations existing between the United States and those foreign powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonial dependencies of any European power we have not interfered and shall not interfere. But with the governments that have declared their independence we have on great consideration and just principles acknowledged we could not view any interposition for the purpose of oppressing them or controlling in any way their destiny by any European power in any other light than as a manifestation of an unfriendly disposition against the United States. * * * It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness, nor can anyone believe that our southern brethren, if left to themselves, would adopt it of their own accord. It was impossible, therefore, that we should behold such interposition with indifference."

Mr. Chairman, this assault upon the Monroe doctrine in the house of its friends is an astounding proposition. That a great overshadowing policy in our political institutions for almost a century, a policy that has been woven into our political life, should be challenged at this hour, that any question should be raised here as to our purpose and our ability to successfully enforce it, is a most unpatriotic declaration. Though couched in ambiguous language that the statement may be veiled, it is no less reprehensible. Appreciating the fact that I am liable to be charged with unwarranted assumption in even presuming to question the statements, I do not propose, as a representative of a patriotic people subject to the wanton criticisms of foreign powers, at this hour to permit such language to go unchallenged. It became necessary, even to initiate the imaginary necessity of the gentleman from Alabama for his six-battleship proposition, to first impeach at the very onset the integrity and the high purposes of his Government that has declared that the Monroe doctrine is now and ever shall be the fixed policy of this Republic and this Western Hemisphere.

The gentleman in his discussion refuses to give any credence of good faith of our Government in the execution of its treaties and conventions, and contemptuously refers to The Hague tribunal as a "collection of delegates without authority," and that in the face of the fact that the Senate of the United States accredited the representatives of that body as our representatives and accredited the proceedings had in conjunction with 43 other powers with its approval, and if The Hague conference shall at its next meeting organize an international court the Senate of the United States will again ratify its proceedings. Declarations that would discredit us, wipe out and destroy our treaties and conventions, and discount our good faith were necessary, however, for the mere substance of a basis for the vagaries of the gentleman from Alabama. I protest against an attack upon a policy national in its scope and in the perpetuation of which is inlaid the safety and security of our liberty and our institutions. The sovereignty of this Republic is supreme and constant, and the exercise of that sovereignty in enforcing the Monroe doctrine has become an international principle in the comity of nations that no statesman however eminent and no nation however powerful can deprive us of.

Mr. Chairman, neither the statement that the Monroe doctrine remains to be settled on the completion of the Panama Canal, nor that no great military power has never accepted it, is true. I propose to examine briefly, in the light of history, both of these propositions. It is a surprising statement that no great military power admits the Monroe doctrine as a fixed policy of this Republic. In the House of Lords on the 17th day of February, 1903, three days after the Venezuelan blockade was raised, referring to an incident to which I shall return later, the Duke of Devonshire, the Government's leader in the House of Lords, said:

Great Britain accepts the Monroe doctrine unreservedly, but to have abstained from enforcing a claim which she believed to be just and essential to her honor would be to make the Monroe doctrine an object of dislike by every civilized power.

But I go further, Mr. Chairman, and quote from Mr. Balfour, the premier of Great Britain, in a speech in Liverpool on the same day, as follows:

We know that public opinion is naturally sensitive upon what is known as the Monroe doctrine, but the Monroe doctrine has no enemies in this country that I know of. We welcome any increase of influence of the United States of America upon the great Western Hemisphere. We desire no colonization. We desire no alteration in the balance of power. We desire no acquisition of territory. We have not the slightest intention of interfering with the government of any portion of that

continent. The United States of America can perform no greater task in the cause of civilization than by doing its best to see that the international law is observed, and by upholding all that the European powers have recognized as the admitted principles of international comity.

These statements not only show that the Monroe doctrine has no enemies in England; that her people are not only friendly but are in favor of that feature of our foreign policy. I quote from the St. Petersburg press of February 19, 1903:

Throughout the Venezuelan controversy the Russian press was emphatically in favor of the American people. The papers frequently published editorials defending the Monroe doctrine.

In the Reichstag, on March 19, 1903, referring to the Venezuelan difficulty, Chancellor Von Bülow said:

We found ourselves in a dilemma, but nobody can reproach us for acting without sobriety and calmness. We had to take care that our relations with other powers should not be disturbed through this relatively subordinate matter.

These citations are the declarations of three of the most formidable powers in Europe, two of them being statements in a representative capacity.

They constitute a complete refutation of the statement that "no great military country on earth admits the Monroe doctrine."

I am not content with these statements from representative men of those Governments. The attention of the House is called to the conduct of all these powers in connection with their business and political interests on this continent and their ready submission to the mere requests of this Government when the United States thought proper to make the request. At the very inception of the Monroe doctrine, after we had, through negotiations with England, concluded to stand behind the actions of the Spanish-American States in their decision to establish for themselves separate governments, independent of Spain, and turn this hemisphere away from monarchial government, the holy alliance, consisting of Russia, Prussia, Austria, and France, came into existence for the sole purpose of lending aid and support to Spain and to urge her to reassert with their support her sovereignty over the former Spanish-American States.

In this propaganda for the perpetuation of monarchial representation England refused to join, and in due course of time, because of our insistence upon our policy, the holy alliance became ineffective. Beginning as early as 1840 Spain began to open negotiations with Great Britain for the purpose of disposing of the island of Cuba. The American State Department informed Spain that at the time we declared for the doctrine known as the Monroe doctrine, in 1823, it found her in the possession of Cuba and other colonies on this hemisphere. It distinctly affirmed that with her then political relationship it did not propose to interfere, but that this Government would not permit the Spanish Government to transfer the island of Cuba to England or any other foreign power, and as a result of that instruction Cuba remained Spanish territory for more than 50 years, and until this Government, in the interests of humanity and popular liberty, in 1898, intervened and permitted Cuba to establish a separate and independent form of government. [Applause.] In 1863, when we were engaged in a great Civil War among States, England, Spain, and France seized upon the opportunity to concentrate their battle fleet at Vera Cruz, on the coast of Mexico, for the purpose, as they claimed, of enforcing a collection of debts due to the several countries from Mexico. The gentleman from Alabama [Mr. HOBSON] knew that he misinformed the gentleman from Tennessee [Mr. AUSTIN] when he did not tell him the full truth of that matter in answer to my question.

The United States at that time was unable to assert and maintain her rights as defined in the Monroe doctrine until after she had settled her difficulties. In 1866, after the conclusion of the war, Mr. Seward, finding that the English and Spanish Governments had abandoned their purpose and France had established upon Mexican soil a monarchy, with Maximilian as Emperor, notified the French Government of its determination not to permit the continuance of a French monarchy on Mexican soil, and, after proper negotiations, Maximilian was dethroned, the French Government withdrew its troops, and Mexico was permitted to establish a representative government. [Applause.]

For the purpose of establishing beyond question that the Monroe doctrine is not only settled but is accepted by foreign powers as a fixed principle in our political institutions, let me again refer to the Venezuelan controversy of 1903. Germany, Russia, and England undertook to force from Venezuela the payment of large indebtedness to each of these countries. With their combined fleets they blockaded the Venezuelan ports and demanded settlement for their claims. The impression prevailed in this country that the blockade was not so much due to the debts due these several powers as an attack indirectly upon the Monroe doctrine. On the suggestion of the United States, without the controversy between Venezuela and the several Governments even reaching the diplomatic stage, they consented to refer their claims to The Hague tribunal for settlement. They raised the blockade they had established, returned with their navies to their respective countries, and agreed to abide by The Hague conference.

In 1895 the question of the boundary between Venezuela and Great Britain, that had been pending since 1814, again came to the surface for what appeared to be a final determination. The American Government was unwilling that a great and powerful nation should take any advantage in a settlement of disputed territory over a weak and feeble Republic. England had pushed westward on the territory of this Republic with her boundary lines until she had taken from Venezuela more than 30,000 square miles.

For many years Venezuela had begged for an arbitration of its differences with England relative to the international boundary. Each offer that Venezuela made to arbitrate England imposed conditions that Venezuela could not accept. Upon proper representations being made to the United States this Government sent a commission to inquire into the facts. After the report of this commission, President Cleveland suggested the friendly offices of this Government to adjust the difficulties and establish the true boundary line. After some negotiations, full acceptance was made by both parties. [Applause.] I quote here a passage from Mr. Cleveland's message to the Congress of the United States on the 17th of December, 1895. Referring to the Monroe doctrine, he said:

The doctrine upon which we stand is strong and sound, because its enforcement is important to our peace and safety as a Nation and is essential to the integrity of our free institutions and the tranquil maintenance of our distinctive form of government. It was intended to apply to every stage of our national life, and it can not become obsolete while our Republic endures. If the balance of power is justly a cause for jealous anxiety among the Governments of the Old World and a subject for our absolute noninterference, none the less is an observance of the Monroe doctrine of vital concern to our people and their Government.

The mission of this Nation is to teach the world an example "of high minded foreign policy." Let us throw the moral force of that example into every quarter of the world and stand for freedom and popular government. We are the world's teacher of national peace and personal liberty. We do not need great navies to eat out the substance of the people nor foreign allies to enforce a despotism against alien races. I would rather have the protection of the two great oceans of the world bordering on us than either the triple or quasi alliance of the great navies of Europe to guard the peace, happiness, and liberty of the people. [Applause.]

By unanimous consent, Mr. CLINE was given leave to extend his remarks in the RECORD.

Mr. SISSON. Mr. Chairman, I make the point of order on the paragraph. I had reserved the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

The Secretary of the Navy may build any or all of the vessels authorized in this act in such navy yards as he may designate, and shall build any of the vessels herein authorized in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels, have entered into any combination, agreement, or understanding, the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the constructions of any of said vessels.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word.

Mr. FOWLER. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Illinois will state his point of order.

Mr. FOWLER. My point of order is that it is in conflict with the amendment just passed by this House a short time ago limiting the construction of these vessels in a navy yard belonging to the United States.

The CHAIRMAN. That is not a matter for the Chair; that is a matter of legislation.

Mr. FOWLER. I presume that there are some other vessels to be constructed besides battleships, such as torpedo boats and the like, that might come within the provisions of this paragraph, but in so far as it relates to the construction of the battleship provided for in this act, it certainly contravenes the amendment which was passed prior to reaching this paragraph.

Mr. MAHER. Mr. Chairman, I have an amendment to offer that will cover the point made by the gentleman.

Mr. FOWLER. Mr. Chairman, I feel that an amendment might possibly correct this paragraph and would be better than a point of order, but I can not tell whether the amendment would pass or not, and therefore I make the point of order against the paragraph.

The CHAIRMAN. The point of order is overruled. Because one section of the bill is in conflict with an amendment does not make it subject to a point of order.

Mr. MAHER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Strike out lines 11, 12, and 13, on page 55, and insert in lieu thereof the words "the Secretary of the Navy shall build the battleship authorized in this act in such navy yard as he may designate, and shall build any of the other vessels herein authorized."

Mr. MAHER. Mr. Chairman, I offer that amendment to perfect that section, so as to have it in harmony with the Calder amendment.

Mr. BURNETT. Mr. Chairman, a few moments ago the gentleman from Tennessee [Mr. AUSTIN] presumed to set himself up as the exponent of the Baltimore Democratic platform. I am sure that there is no gentleman in Congress who knows less about it or is less competent to define and interpret that platform than the gentleman from Tennessee.

But there is one whose word, it seems to me, should carry a great deal more weight as to its meaning that that of the gentleman from Tennessee, and that is the gentleman who did more perhaps to write that platform than any other living man. That is the gentleman who in a few days, if rumors are correct, is to be the premier of the next Cabinet. Now, Mr. Chairman, as interpreting that platform, I would like to read what Mr. Bryan himself has said of the proposition of a big Navy. [Cries on the Republican side of "Hear!" "Hear!"]

Yes; if you have the ears to hear, hear and be convinced if you have the brains to comprehend. [Laughter.] Mr. Bryan said in his Mohonk conference speech:

I believe that our people ought to try to get agreements with other nations to do the things that are good. But I do not believe this Nation ought to wait for any other nation to agree to do what is right. It ought itself to do what is right. I have faith in what I understand to be the Bible plan of bringing about peace. Suppose we had two men here who differed, honestly differed, as to the method of bringing peace among men. I would suggest this plan of testing the two plans on a small individual scale, that we might then judge as to how it would apply on a large scale. I would say to these two men to put their plans into practice. Let one of them strap revolvers around him and announce that he stood ready to avenge any insult, and he would bring peace by fighting for it. Let the other announce that he did not intend to do injury to anybody; that he would assume that nobody was going to do injury to him; that he was not going to arm himself. Which one would have the fewer scars at the end of 10 years? My friends, if this Nation announced to the world that it would not spend its money getting ready for wars that ought never to come; that it would rather try to prevent the coming of war; that, as it did not intend to go out as a burglar, it would not equip itself with burglary tools; that it had faith in the good intent of other people, and it expected other people to have faith in its good intent, do you think our Nation would suffer for that?

Some one has said here—I believe it was the distinguished president of Columbia University—that whenever there is an appropriation to be made for battleships it is preceded by vociferous expression of a profitable kind of patriotism—the spending of money for battleships. What he said is so. We have a navy league in this country—

The gentleman from Missouri [Mr. HUBLEY] this morning called attention to the officers of the Navy League—treasurer, J. P. Morgan, jr., and counsel, Mr. Satterlee, a son-in-law of J. P. Morgan, sr.—a fine lot to advise Democrats—

they have one in Germany; they have one in Great Britain; and they have one in France. These navy leagues play one nation against the other. Whenever we build a battleship the picture of it is published in the literature of all the other countries, and the building of that battleship is urged as a reason why all the other nations should build at least one more, and possibly two. Then, when they get scared and build we get the picture over here, and we must build another. That is exactly what goes on and what has been going on for years. We are expected to get scared whenever another nation builds a battleship, and then we are to build two and scare them until they build three, and we get scared again and build four.

And if my colleague from Alabama, Capt. HOBSON, could scare them a little more, they would build six.

That is exactly what is going on, and I am satisfied that President Butler put his finger upon the cause. It is this profitable patriotism that finds money in the building of ships and getting ready for war; and then as soon as we get our ships built the very same forces will forget their patriotism, and if they get a chance build ships for other nations to beat our ships. I have sometimes used this illustration: Suppose there was a large lake; and suppose that there were half a dozen landowners, with their lands bordering on this lake, living peaceably together, without trouble or sign of trouble. A man who builds ships goes to one of them and says, "You are very foolish; you are living here with no protection whatever. Don't you know that any of these men around you might build a battleship and come here, and you are absolutely defenseless? Now, let me build a ship for you, and you will get ahead of them." Suppose the man was foolish enough to take the advice. Just as soon as that ship was built the shipbuilder would go to the next neighbor and say, "Why, don't you see that man over there has got a battleship. What has he got that for? Do you suppose he is building it for nothing? Have you any doubt he has designs on you? Where else can he use it except on this lake? You had better get ready. Now I can build you two." And if this man is foolish he would build two. Then what an argument the shipbuilder would have when he got to the third man! "Why, there are two of them against you. They might combine, and you are absolutely defenseless." Now, with that argument he could go all 'round that lake, and after building ships for each one, he could go back to the first one and say, "You are out of date. Look at the improvements since you built. And then you have only one and these other people have four or five or eight apiece. There is nothing for you to do but mortgage your land. Now you are in for it!" Now that is the race of the world, my friends—that is the mad race of the world.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. BURNETT. I would like five minutes more.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to proceed for five minutes.

Mr. BURKE of Pennsylvania. Reserving the right to object, I understand the gentleman is quoting now from Mr. Bryan?

Mr. BURNETT. Yes.

Mr. BURKE of Pennsylvania. The gentleman has stated authoritatively that Mr. Bryan is to be in the next Cabinet.

Mr. BURNETT. I have not. I have said it was rumored that he was to be the premier, but I do state that he was the gentleman, above all others, who had more to do with the writing of the platform that the gentleman from Tennessee tried to interpret than any other man:

My friends, the building of these great battleships, these preparations by Christian nations to fight one another, is a challenge to the Christian civilization of the world; it is infidelity to the doctrine taught by the Founder of the Christian religion. Christ taught no such doctrine; he taught us the power of love, not the power of the sword; and those who have tried to put into practice this doctrine are the ones who have suffered least from the use of force. I believe that this Nation could stand before the world to-day and tell the world that it did not believe in war, that it did not believe that it was the right way to settle disputes, that it had no disputes that it was not willing to submit to the judgment of the world. If this Nation did that, it not only would not be attacked by any other nation on the earth, but it would become the supreme power in the world. I believe that our Nation can take a long step in advance now by announcing doctrines of this kind—announcing that its Navy will not be used for the collection of debt; that, as we do not imprison people for debt in this country, we will not man battleships and kill people because they owe people in this country; that we will apply to international affairs the very doctrines we apply to our national affairs, and, if anyone in the United States wishes to invest money in another country, he must do so according to the laws of that country and be subject to the authority of that country. Then every nation would be open to American investment, for that is the kind of investment they would look for. They have had enough of investments which are preceded by the purchase of a little land to be followed by a battleship that takes the rest of the country. I believe that, if our Nation would announce to the world that it stands ready to enter into a treaty of peace with every other nation, big or little, whenever there is any dispute which is beyond diplomatic settlement, that dispute shall be submitted to an impartial tribunal for investigation and report—if our Nation did that, it would not be a year's time before we would have treaties of peace of that kind with the leading nations and in two years' time with practically all nations. And when this Nation had entered into that kind of treaty of peace with other nations we should find the example such that it would result in treaties being made between other nations, and the day of war would be past.

[Applause.]

Mr. AUSTIN. Mr. Chairman, will the gentleman yield?

Mr. BURNETT. Yes.

Mr. AUSTIN. The Democratic platform at Baltimore declared for an adequate Navy. The gentleman from Alabama voted against building one battleship. Was he in line or out of line with the declaration of his party?

Mr. BURNETT. Absolutely in line. The gentleman has not gone far enough, either, in his desire to misinterpret it, or his misunderstanding of the Democratic principles or platform, when he does not state that it also states that it should be "a well-proportioned Navy"; and is any navy well-proportioned when it is stated authoritatively by members of this committee that we lack 3,000 officers and perhaps 20,000 men of having men enough to man the ships that we have? Would a man who owned a great department store be a good business man if, when he had not clerks enough nor bookkeepers enough to run that store, and could not get them, he would say that he would build another one, even if he had to let it stay out of commission, as some of our ships to-day are out of commission because we can not turn out men enough to officer the ships and can not get recruits enough to man them? I am for an adequate Navy. I am for a well-proportioned Navy. The Navy now is adequate for all our purposes in time of peace, and it is not a well-proportioned Navy because it has not men and officers enough to man the ships. The minority report on this bill is a patriotic paper. The report of the majority shows that we are building ships in a very unbusinesslike manner. Here we are talking about war, when next year we are to celebrate the hundredth anniversary of peace with England, and a century of peace between France and all English-speaking countries will be completed in 1915, and for 150 years there has been no war between England and Germany, and never has been between Germany and America.

Then of whom are we afraid and with whom do we anticipate war? Certainly not with Japan, a bankrupt nation who could not borrow $100,000,000 if the life of the Empire depended on it. These cries of war have been raised by jingo politicians until we have ceased to be frightened by them. Let us talk peace and

internal development a while, and give the disappointed agitators for war a respite from their arduous labors.

Let us talk good roads for the men who never see a battleship. Let us talk vocational education for the boys of the farmer and the laborer, and cease pouring the taxes wrung from the toilers of the land into the coffers of the Steel Trust and the Shipbuilding Trust.

I have been abused for my advocacy of a public buildings bill. I have now thrown out the challenge to the advocates of a big Navy that if you will cease building battleships for the next four years and apply the $30,000,000 that it costs to build two *Dreadnoughts* to the building of good roads I will not for that time advocate a dollar for public buildings, but will advocate that that also go to building or improving post roads.

But so long as the big cities with their navy yards, the Steel Trust with their thin cheap foreign labor, and the jingoes who are constantly predicting war with Japan insist on looting the Treasury for battleships and refusing anything for good roads I shall continue in my humble way to advocate the erection of post offices in the smaller cities. Let the man in the rural district at least see a small part of what he is paying taxes to keep up.

Mr. Chairman, I will here reiterate some things that I said on this floor last year on this subject:

Mr. Speaker, has any Member of the House stopped to think that the cost of one battleship alone would be sufficient to authorize 40 vocational schools under the Page bill, with $7,500 to each school in every State in the Union, which would give to the farmers', the mechanics', and laborers' sons of the country an opportunity for higher and better preparation in the vocations to which they expected to devote themselves? We passed in this House what was known as the Shackleford good-roads bill. It went to the Senate, and the Senate, in its desire to substitute battleships for good roads, struck out the Shackleford proposition and put in the two battleships, costing $30,000,000. Have any of the southern Members considered that it takes 300,000 bales of the farmers' cotton to pay the cost of one battleship, to say nothing of maintaining it after it is built? Has any western Member considered the fact that it takes 15,000,000 bushels of his farmers' wheat to pay for one of these dreadnoughts that is soon to be thrown in the junk pile? Yet we can not have any good roads; we can not have an appropriation for vocational schools. We can only get $17,000,000 for the Department of Agriculture because we must pay to the Ship Trust and the Armor Plate Trust and people around the navy yard the money to build a big battleship. [Applause on the Democratic side.]

This bill carries many million dollars more than the last Republican bill, and yet our party won its fight, in part at least, by the outcry against Republican extravagance and in favor of Democratic economy. The Democratic minority of the Naval Affairs Committee has joined hands with a Republican minority to embarrass Mr. Wilson's administration with a wild extravagance that is indefensible.

I wish to read a few extracts from the minority report on this bill, which report entitles every man who signed it to the love of every Democrat who stands for the people. They are Mr. GREGG of Texas, Mr. WITHERSPOON of Mississippi, Mr. HENSLEY of Missouri, and Mr. BUCHANAN of Illinois. Their names deserve to be embalmed in the hearts of a grateful people.

The undersigned members of the Committee on Naval Affairs beg leave to submit the following report and to express our dissent and objections to the bill reported by the committee.

This bill carries $146,818,364.53. This sum is $23,666,825.78 more than the last appropriation and $9,731,165.48 more than the Congress in the days of its wildest extravagance ever appropriated in one bill. Of this vast sum of $146,818,364.53, $105,587,948.53 is appropriated for the maintenance of the Navy, $22,284,091 for the completion of naval vessels already in process of construction, and $18,946,325 for the first year's work of construction on two battleships, six torpedo destroyers, four submarines, one supply boat, and one transport, which new vessels will cost an aggregate of $46,418,925, and the construction of which will necessitate a larger appropriation next year than this.

In conclusion, we appeal to the Democratic Members of the House to stand by the policy of the party and uphold the wisdom of its caucus in decreeing three separate times that we need no more battleships. We urge them to fulfill the pledges of economy made in every platform of the party since 1832. We call their attention to the fact that the appropriations this year have already exceeded those of last year by $121,000,000, and we urge them to show at least as much regard for the condition of the Treasury, as much regard for economy, and as much sympathy for the toiling masses, who are now groaning under the burdens of taxation and are looking with longing hopes and expectant hearts to the Democratic Party, as the Republican Party showed in nine different years when they had control of the Government.

[Loud applause.]

[Mr. HAMILL addressed the committee. See Appendix.]

Mr. PADGETT. Mr. Chairman, I move that all debate on the paragraph and all amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

Mr. RAKER. Mr. Chairman, I offer the following amendment as a new paragraph to follow line 20, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, by inserting at the end of line 20, on page 55, the following as a new paragraph:

"That the U. S. S. Portsmouth be, and hereby is, transferred to the State of California upon condition that the said State of California, by and through its governor, accept said vessel, U. S. S. Portsmouth, for said State, after having been first duly authorized by the Legislature of said State of California, and upon the further condition that said vessel remain the property of said State, to be preserved and cared for by the said State of California at its own cost and expense, and the said vessel be turned over to the State authorities of California without any expense to the Government."

Mr. MANN. Mr. Chairman, reserving the point of order, I desire to ask the gentleman a question. If this amendment should go into the law, where would the *Portsmouth* be delivered to the officials of the State of California?

Mr. RAKER. Mr. Chairman, it is my intention and idea by this amendment that it would have to be delivered to the authorities of California on the eastern coast where the vessel now is—down, I think, at Newport News. That is the reason I have offered the amendment, so it will be turned over to the State where it is now, without any expense whatever to the Government of the United States.

Mr. MANN. Now, if this amendment goes into the bill in the House, does the gentleman anticipate that it will come back to the House without a Senate amendment providing that the fitting up shall be at the expense of the Government?

Mr. RAKER. I will say to the gentleman this: That the Legislature of the State of California——

Mr. MANN. I do not care about that.

Mr. RAKER. I will answer the gentleman, no; I am opposed to it, and I here state on the floor that I shall appeal to the Senators to leave the amendment as it is, to turn the vessel over to the authorities of the State of California, where the vessel now is, without any cost to the Government of the United States.

Mr. MANN. Mr. Chairman, I sometimes wonder of recent days whether any Member of the House is entitled to take the statement of any other Member of the House in good faith. Only a few years ago we provided for the California Exposition with the distinct understanding that there was to be no Government appropriation, and only last year we passed a resolution for a hygiene congress at Buffalo with not only a distinct understanding but the inclusion in the law itself that there should be no Government appropriation. Then somebody who represents a locality near by is not bound by that statement. But if the House in good faith agrees to the amendment and the gentleman, whose faith I do not question, makes the statement, I will withdraw the point of order.

Mr. PADGETT. I will say to the gentleman that if I remain on the conference committee—and I expect to—it will have rough sledding to get changed.

Mr. MANN. I know; but conferences are trading machines.

Mr. PADGETT. No; there will not be any trading on that.

The CHAIRMAN. The gentleman from Illinois withdraws the point of order, and the question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was agreed to.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the subject of this amendment.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. KNOWLAND. Mr. Chairman, I do not desire to take up the time of the committee, and I would like permission to submit a few remarks upon this question, and I ask that I may do so in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. McCALL. Mr. Chairman, I ask leave to extend my remarks in the RECORD by printing an article by Prof. Eugene Wambaugh, of the law department of Harvard University. It is a short article on the Panama Canal Zone taken from the Boston Evening Transcript.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts? [After a pause.] The Chair hears none.

Mr. SIMS. Mr. Chairman, may I have the same permission?

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Construction and machinery: On account of hulls and outfits of vessels and steam machinery of vessels heretofore and herein authorized, to be available until expended, $21,768,228.

Mr. PADGETT. Mr. Chairman, I offer an amendment. Strike out the figures "$21,768,228" and substitute in lieu thereof "$18,230,728." [Applause.]

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 55, line 24, by striking out "$21,768,228" and inserting in lieu thereof "$18,230,728."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Increase of the Navy; equipment: Toward the completion of equipment outfit of the vessels heretofore and herein authorized, to be available until expended, $490,000.

Mr. PADGETT. Mr. Chairman, I offer an amendment in line 6, page 56, to strike out "$490,000" and insert "$370,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 56, line 6, by striking out "$490,000" and inserting in lieu thereof "$370,000."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Increase of the Navy; armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $15,618,913.

Mr. PADGETT. Mr. Chairman, I move to strike out, in line 10, page 56, "$15,618,913" and substitute "$11,568,309."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 56, line 10, by striking out "$15,618,913" and inserting in lieu thereof "$11,568,309."

The question was taken, and the amendment was agreed to.

Mr. SISSON. Mr. Chairman, I do not care to go into a discussion of this matter at this time, but I intend to do so at some length, but I want to state here that I noticed in some publication, some magazine, which I will not call attention to, and have heard the statement made that this armor plate is costing the Government entirely too much. I know that some 15 or 16 years ago there was a great deal of scandal connected with the armor plate. At some other time I want to go more at length into this matter. I only desire now to call attention to the fact my information is that armor plate can be bought for something like $75 or $100 a ton and the Government is paying now $200 a ton.

Mr. PADGETT. It is paying as high as $420.

Mr. SISSON. That is worse than ever.

Mr. MANN. Mr. Chairman, may I ask the gentleman a question in reference to these items? The gentleman has offered amendments to reduce the construction and machinery $3,500,000 and equipment $120,000 and a little over $4,000,000 on armor and armament. What causes that?

Mr. PADGETT. One battleship went out that carried the other $6,000,000, and one supply ship and one transport. That was the amount included in these appropriations for those three ships.

Mr. MANN. There are no reductions otherwise?

Mr. PADGETT. No reduction otherwise. It is the proportionate part.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The amendment was agreed to.

Mr. CARY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin [Mr. CARY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 56, line 10, add "the Secretary of the Navy is hereby authorized and directed to offer and pay rewards to the person or persons who shall first furnish to the Government information or evidence which shall lead to the detection of violations of the antitrust act of July 2, 1890, in cases where violations have injuriously affected the Navy Department or of cases where the Government has been defrauded in the character, quality, or price of materials furnished and that where as a result of information or evidence so furnished the Government succeeds in recovering money or property as fines, penalties, forfeitures, or otherwise, the rewards shall be 10 per cent of the amounts so recovered."

Mr. PADGETT. Mr. Chairman, I make a point of order on that.

Mr. CARY. Mr. Chairman, I hope the gentleman will withhold it.

Mr. CAMPBELL. Regular order, Mr. Chairman.

The CHAIRMAN. The point of order is sustained.

Mr. CARY. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Wisconsin offers another amendment, which the Clerk will report.

The Clerk read as follows:

On page 56, line 10, add "*Provided*, That the Secretary of the Navy is hereby authorized to procure, by contract, armor of the best quality for any or all vessels above referred to, provided such contract can be made at a price which in his judgment is reasonable and equitable, but in case he is unable to make contracts for armor under the above conditions he is hereby authorized and directed to procure a site for and to erect thereon a factory for the manufacture of armor, and the sum of $4,000,000 is hereby appropriated toward the erection of said factory."

Mr. PADGETT. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The point of order is sustained.

Mr. MURRAY. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN (Mr. SHERLEY in the chair). The gentleman from Massachusetts [Mr. MURRAY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend at the beginning of page 56, by adding the following: "*Provided*, That no part of any sum herein appropriated shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government, who shall make, or cause to be made, with a stop watch or other time-keeping device a time study of the movements between the starting and completion of any job of any such employee; nor shall any part of the appropriation herein made be available to pay any premium or bonus or cash reward to any such employee in addition to his regular wage, except for suggestions resulting in improvement or economy in the operation of any Government plant."

Mr. PADGETT. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. PADGETT. It is legislation. It does not apply to anything in this part of the bill, and, besides, it relates to other matters of the Government that are outside of this present bill.

Mr. MURRAY. If the Chair desires, I would like to be heard.

The CHAIRMAN. The Chair will hear the gentleman from Massachusetts [Mr. MURRAY].

Mr. MURRAY. The purpose of this amendment is to create a new section at the end of those sections placed in the bill on page 56 to restrict expenditure of the various items of appropriations. The Chair will see from even a cursory reading of the amendment that it is a limitation on every item of appropriation in this bill for the definite purpose of controlling these appropriations and the method of expenditure by the Secretary and officers of the various departments of the Navy. I think, Mr. Chairman, that since it is a definite limitation upon the method of expenditure of these appropriations, it comes clearly within the rules which are so familiar to the Chairman and to the Members that I need not definitely refer to them. Because it is a limitation as to how this money shall be expended in the various navy yards I believe it is in order.

Perhaps, Mr. Chairman, it will be well to call the attention of the Chair and the committee to the evil which this amendment seeks to correct.

The CHAIRMAN. The Chair is ready to rule. In the judgment of the Chair the proposed amendment is a limitation upon the expenditure, and therefore in order. Therefore the Chair overrules the point of order.

Mr. MURRAY. Speaking to the merits of this amendment, I am very clear that Members should approve it. There was a committee of three Members of this House appointed in the early days of this Congress, before the first session of this Congress ended, to investigate what is known as the Taylor system of shop management.

That committee was composed, as Members will recall, of the gentleman from Pennsylvania [Mr. WILSON], the distinguished chairman of the Committee on Labor; of the gentleman from New York [Mr. REDFIELD]; and of the gentleman from Connecticut [Mr. TILSON], who was appointed to fill a vacancy after my colleague from Massachusetts [Mr. LAWRENCE] was unable to serve. Those three men, serving as a committee, went to some of the various cities of the country and took the testimony of all who would respond to their invitation for the purpose of making a report to the Committee on Labor and to this House as to the wisdom or lack of wisdom in continuing this Taylor system of shop management.

I can only tell you that their work was well done, and cite as proof of it the fact that there is pending in this House now the bill H. R. 25305, introduced by the gentleman from Iowa [Mr. PEPPER], and reported by the Committee on Labor, to regulate the method of directing the work of Government employees. And my amendment has been based, almost word for word, so far as I could do it and keep within the technical rules of this committee, upon that resolution of investigation, which was reported unanimously by the Committee on Labor. There is a splendid report accompanying that bill. It is Report No. 1001, submitted to accompany the bill H. R. 25305, to which I have referred.

Now, the fact that in every navy yard in the country, in every Government plant in the country, there has grown up under the administration of affairs as recently carried on a method of standing over a man with a stop watch to see how long in minutes and in seconds it takes him to do a definite piece of work; to see how long it takes the most active and alert of his fellow workmen to do that piece of work, and establishing as a standard amount of time which will be permitted to an employee for a definite work the number of minutes and seconds in which the most alert and active workingman can perform that work.

I say that is a wrong system, and I say that, instead of promoting efficiency among the workmen in these various Government plants, it has resulted in the destruction of the spirit of the workingmen. [Applause.]

Mr. CARY. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. CARY].

The Clerk read as follows:

Amend, page 56, by adding to line 10 the following proviso: "*Provided*, That"——

Mr. MANN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. Does this purport to be an amendment to the amendment?

The CHAIRMAN. The Chair was trying to ascertain that by the reading of it. The Chair will ask the gentleman from Wisconsin if that is an amendment to the amendment?

Mr. CARY. It is not.

The CHAIRMAN. Then it is not in order until after the disposition of the amendment offered by the gentleman from Massachusetts [Mr. MURRAY]. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MURRAY. A division, Mr. Chairman.

The committee divided; and there were—ayes 51, noes 72.

So the amendment was rejected.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. CARY].

The Clerk read as follows:

Amend, page 56, by adding to line 10 the following proviso:
"*Provided*, That no contracts for the armor for any vessel authorized by this act shall be made at an average rate exceeding $300 per ton of 2,240 pounds, including royalties, and in no case shall a contract be made for the construction of the hull of any vessel authorized by this act until a contract has been made for the armor of such vessel."

Mr. CARY. Mr. Chairman, I desire to call the attention of the Chair to the fact that this is not new legislation. The Chair will find in the Yearbook of the Navy for 1911, on page 328, that such an act was passed March 3, 1890. I sincerely hope that the chairman of the committee will not make a point of order and that he will not oppose the adoption of the amendment.

Mr. PADGETT. Mr. Chairman, from the testimony of Admiral Twining, Chief of the Bureau of Ordnance, it appears that we are paying for class A armor $420 a ton; for class A turrets, $480; for class B, $470; for class C, $508.

Germany is paying $490. France in private plants is paying $490 to $510 per ton. In Government plants she is paying from $250 to $325 a ton. Italy is paying from $459 to $617. The average is $470.

Russia pays from $320 to $385. England pays from $438 to $535. Japan, in Government plants, pays $400 a ton.

I want to submit this evidence before the vote is taken. I believe that it would be unwise legislation to adopt this amendment. We are paying less than many of these other countries.

Mr. MURDOCK. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MURDOCK. In the confusion it was difficult to hear either the amendment of the gentleman from Wisconsin [Mr. CARY] or the explanation of the gentleman from Tennessee [Mr. PADGETT], but I gathered that the amendment offered by the gentleman from Wisconsin reduces the price we are paying for armor plate about $120 a ton. Is that correct?

Mr. PADGETT. Yes; it limits it to that.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. CARY].

The question being taken, the amendment was rejected.

The Clerk read as follows:

Total increase of the Navy heretofore and herein authorized, to be available until expended, $41,230,416.

Mr. BUCHANAN. Mr. Chairman, I desire to offer the following amendment.

Mr. PADGETT. Mr. Chairman, I desire to offer an amendment, in line 12, page 56, to strike out "$41,230,416" and insert in lieu thereof "$33,462,312."

The amendment was agreed to.

Mr. BUCHANAN. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Provided, That no part of the work herein required shall be awarded to private contractors until the Government establishments which have facilities for doing said work are employed to within reasonable limits of their capacity.

Mr. BUCHANAN. Mr. Chairman, the reason for offering this amendment is that some of our Government establishments have only been running a small part of their time, which has made the work in these departments cost more than it would if they were running full time. They have the so-called overhead charges. They figure the interest on the investment, and so forth. If the Government is permitted to operate these plants their full time, it will be a great saving to the people.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question being taken, on a division (demanded by Mr. BUCHANAN) there were—ayes 27, noes 70.

The Clerk read as follows:

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the States and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

Mr. HOBSON. Mr. Chairman, I move to strike out the paragraph. I desire to refer again to my references to the Monroe doctrine. I would not do this but for the fact that my good friend from Indiana [Mr. CLINE] seemed to question my sincerity in laying down the Monroe doctrine as one reason why I thought we ought to have at least equilibrium in the Atlantic. I do not believe he meant that.

Mr. BUCHANAN. Mr. Chairman, I rise to a point of order—that the gentleman is not speaking to the question.

Mr. HOBSON. The gentleman does not know what I am going to say.

The CHAIRMAN. Will the gentleman hear a suggestion from the Chair?

Mr. HOBSON. Very gladly.

The CHAIRMAN. The rules of the House provide that a Member shall address himself to the proposition before the House.

Mr. HOBSON. I am very glad to do so. This involves the whole bill.

Mr. PADGETT. I ask unanimous consent that the gentleman from Alabama may have five minutes in which to address the committee.

The CHAIRMAN. Is there objection?

Mr. BUCHANAN. I object.

The CHAIRMAN. The gentleman from Illinois objects.

Mr. HOBSON. Mr. Chairman, I do not wish to be interrupted. I insist that the point I am going to make bears on the whole question of the naval policy. The Monroe doctrine——

Mr. BUCHANAN. Mr. Chairman, I insist that the gentleman's remarks are not in order.

Mr. HOBSON. The Monroe doctrine, it may be recalled, was promulgated early at the suggestion——

Mr. BUCHANAN. Mr. Chairman, I raise the point of order that the gentleman is not talking to the question before the committee.

Mr. HOBSON. If the gentleman will give me a chance——

The CHAIRMAN. The Chair thinks that as the debate has taken quite a wide latitude, the gentleman from Alabama may proceed.

Mr. HOBSON. Mr. Chairman, the British Government cooperated with the American Government; in fact, it is said that it suggested to the American Government the promulgation of the Monroe doctrine, and when I refer to the Monroe doctrine I do not have in mind any possible contingency of its violation by the British Government.

But, Mr. Chairman, I do have in mind, and am very serious and earnest about it, that the continental nations of Europe have not accepted the Monroe doctrine. In 1863, as the gentleman pointed out, the French invaded Mexico. Our Government made a protest in the name of the Monroe doctrine, which was utterly ignored until, as the result of the war and its cessation, we had at that time the greatest Navy in the world. We had undisputed control of the seas, and then when we called on France in no uncertain terms to retire, France retired.

Now, coming down to the Venezuelan incident. The gentleman recalls that Germany sent her fleet to the shores of Venezuela. Our Government forthwith assembled her fleet at Guantanamo and sent Admiral Dewey to take command. At that time our fleet, as the result of the interest of the American people, and on account of the Spanish War, was second in the world. It was probably 60 per cent stronger than the German fleet. As compared with Germany, we had undisputed control in the seas. So when we called on Germany to retire and accept the Monroe doctrine, she did so with good grace and in peace.

Now, Mr. Chairman, I will lay it down as a self-evident proposition that we are as far from territory covered by the Monroe doctrine as are the continental nations of Europe; that these

nations are proceeding to develop Africa, Asia, and the islands of the sea by the continental system, and that they will naturally and inevitably tend to develop South America by the same system. With the completion of the Panama Canal South America is going to be developed and will try to be developed by those over the sea, and our policy of the Monroe doctrine, or theirs, will prevail according to which one has control of the sea. If we have control of the sea the Monroe doctrine will never be questioned. We will never have any war on account of it. It will be accepted as a part of the practical politics of the world. If we do not have control of the sea there is historic precedent in the invasion of Mexico to believe that the continental nations will proceed in spite of us, and that will precipitate war.

The question of peace or war is vital to this whole bill, and, Mr. Chairman, I withdraw the pro forma amendment to strike out the paragraph.

The CHAIRMAN. The gentleman from Alabama withdraws his pro forma amendment.

MESSAGE FROM THE SENATE.

The committee rose; and a message from the Senate, by Mr. Curtiss, one of its clerks, announced that the Senate had passed with amendments bill of the House of Representatives (H. R. 26874) making appropriations for the current and contingent expenses for the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 27827. An act to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

NAVAL APPROPRIATION BILL.

The committee resumed the consideration of the naval appropriation bill.

The Clerk read as follows:

That no part of any sum appropriated by this act shall be used for any expense of the Navy Department at Washington, D. C., unless specific authority is given by law for such expenditure.

Mr. HOBSON. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

At the end of the bill add as a new paragraph the following——

Mr. HOBSON. Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with.

Mr. MANN. No; not with my consent. We can not adopt an amendment without it being read.

The CHAIRMAN. The Clerk will continue.

The Clerk read as follows:

At the end of the bill add as a new paragraph the following:
"There is hereby established a council of national defense, consisting of the President"——

Mr. HAY. Mr. Chairman, I make the point of order that the amendment is out of order.

The CHAIRMAN. If it is the bill for the establishment of a council for national defense, it is very clearly subject to a point of order.

Mr. HOBSON. It is that bill, Mr. Chairman, and I asked to dispense with the reading of it.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise——

Mr. SISSON. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. But the Chair has recognized the gentleman from Tennessee.

Mr. SISSON. Mr. Chairman, I desire to offer an amendment.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise and report the bill——

Mr. SISSON. Mr. Chairman, I desire to offer an amendment before the committee rises.

The CHAIRMAN. If the gentleman from Mississippi will wait until the Chair can find out what the motion of the gentleman from Tennessee is he will recognize him.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. SISSON. Mr. Chairman, I want to offer an amendment to the paragraph just read.

The CHAIRMAN. If the gentleman would give the Chair a chance to recognize him he would permit him to offer his amendment.

Mr. SISSON. But I want to be sure of that.

The CHAIRMAN. If the gentleman would be a little more patient we might proceed in order.

Mr. SISSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Strike out the period in line 7, on page 57, and insert:
"*And provided*, That all of the battleships, torpedo-boat destroyers, submarine torpedo boats, transports, supply ships, and all other vessels authorized in the 'Increase of the Navy' in this bill shall not be let to any bidder bidding for the contract to construct such battleship, torpedo-boat destroyer, submarine torpedo boat, transport, supply ship, or other vessel until after the Secretary of the Navy shall have prepared and had filed in his office detailed plans and specifications of such battleship, torpedo-boat destroyer, submarine torpedo boat, transport, supply ship, or other vessel; and copies of such plans and specifications shall be submitted to each bidder under such regulations as the Secretary of the Navy shall prescribe."

Mr. PADGETT. Mr. Chairman, I make the point of order against the amendment. It is not germane at this point in the bill and it is new legislation.

Mr. SISSON. Mr. Chairman, I submit that this is the only place where it is germane, and I submit that it is not new legislation. It is simply a limitation upon the appropriation for the increase of the Navy. It is a limitation for this reason: It simply provides that before the Secretary of the Navy can use any of the money provided for in the increase of the Navy he shall prepare or have prepared and have in his office detailed plans and specifications of the vessels authorized under the increase of the Navy. The gentleman from Tennessee [Mr. PADGETT] will recall that two years ago, I believe it was, I offered this amendment. It was discussed at that time at some length on the floor. My reason for saying it is a limitation is this: That it does not prevent the expenditure of every cent of the money just in the manner that the Secretary of the Navy sees proper and right to expend it, except that the detailed plans and specifications shall be made and on file in his office prior to the time that these contracts are let. In other words, this rule applies with reference to all other work or nearly all of the other work done in all of the departments of the Government, and I see no reason why this should not be the rule in the office of the Secretary of the Navy, involving as these battleships do the expenditure of so many millions of dollars. It was developed in the discussion two years ago that the only thing on file in the Secretary's office was the type of vessel. This does not change that rule except that the plans shall be in detail, so that the bidders when they bid on these plans may know just exactly the kind and character of vessel being bid for, and there is no way in the world by which the Government, the Secretary of the Navy, or Congress can protect the Government unless they do have detailed plans and specifications in the Secretary's office.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. CANNON. Is it possible that bids are taken until the plans and details are prepared?

Mr. SISSON. It is possible, and it is done every day.

Mr. PADGETT. Oh, they have very full detailed specifications covering multitudes of sheets.

Mr. SISSON. The gentleman recollects that two years ago he stated to me that that matter would be gone into by the Navy, and unless the rule is changed, if the gentleman will look at the debate two years ago he will find he himself stated that at the time the contracts were let there was nothing on file but what is known as the general type, and the gentleman from Alabama then argued that it was impossible to have the detailed plans and specifications on file, as you do in reference to other contracts, such as a public building, which was then being discussed by me, and he said that when you let the contract for a battleship you let the contract for a certain type of battleship, and he argued that that was all that was necessary. Then, it was developed by discussion with the distinguished gentleman from Alabama, who knows more about naval construction than all of us combined know or ever will know, that these detailed plans and specifications were prepared as the vessel was undergoing construction, and that all of these detailed plans and specifications were not on file at the time the contract was let. But the gentleman from Illinois [Mr. Foss], then on the committee, made an objection to it, because he said that you could not construct vessels as you did other items, and for that reason, after having two years in which the Naval Committee might investigate and make this change, so that the detailed plans and specifications could be on file before the battleship was let, I have offered this proviso as a limitation upon the expenditure of the money.

The CHAIRMAN. The proposed amendment involves more than a limitation upon an appropriation. Under the existing law the Secretary of the Navy has discretion. The rule is that a proposition to establish affirmative directions for an executive officer constitutes legislation, and it is not in order on a general appropriation bill. It has been so ruled on numerous occasions

(Hinds' Precedents, vol. 4, sec. 3854), and the point of order is sustained.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28812, the naval appropriation bill, and had directed him to report it to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. PADGETT. Mr. Speaker, I move the previous question upon the bill and all amendments to final passage.

Mr. ROBERTS of Massachusetts. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Massachusetts rise?

Mr. ROBERTS of Massachusetts. To demand a separate vote on a paragraph in the bill.

The SPEAKER. We have not come to that yet.

The question was taken, and the previous question was ordered.

The SPEAKER. Is there a separate vote demanded on any amendment?

Mr. FOSS. I demand a separate vote——

Mr. HOBSON. I demand a separate vote on page 54, striking out the two battleships and inserting one, and on that I ask the yeas and nays.

Mr. BROWNING. Mr. Speaker——

The SPEAKER. The gentleman from Massachusetts.

Mr. ROBERTS of Massachusetts. Mr. Speaker, I desire a vote on the same paragraph as that demanded by the gentleman from Alabama.

Mr. BROWNING. Mr. Speaker, I demand a separate vote on the Buchanan amendment, page 15, at the end of line 15, regarding powder.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

Mr. MOORE of Pennsylvania. Mr. Speaker, I demand a separate vote on the amendment forbidding the purchase of foreign-made material.

The SPEAKER. Where is that?

Mr. MOORE of Pennsylvania. It was offered last night.

Mr. PADGETT. Mr. Speaker, that motion did not carry; there is no such amendment.

The question was taken, and the other amendments were agreed to.

The SPEAKER. The Clerk will report the first amendment.

The Clerk read as follows:

Page 15, at the end of line 15, insert the following:

"*Provided further*, That in expenditures of this appropriation or any part thereof for powder no powder shall at any time be purchased unless the powder factory at Indianhead, Md., shall be operated on a basis of not less than its full maximum capacity."

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. BROWNING. Mr. Speaker, a division.

The House divided; and there were—ayes 157, noes 46.

So the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 54, in line 21, strike out the word "two" and insert in lieu thereof the word "one."

Mr. HOBSON. Mr. Speaker on that I ask for the yeas and nays.

The SPEAKER. The gentleman from Alabama asks for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 174, nays 156, answered "present" 5, not voting 46, as follows:

YEAS—174.

Ferris	Johnson, S. C.	Parran	

So the amendment was agreed to.

The Clerk announced the following pairs:

For the session:

Mr. FORNES with Mr. BRADLEY.

Until further notice:

Mr. STANLEY with Mr. MCKINNEY.

Mr. SABATH with Mr. VREELAND.

Mr. MAYS with Mr. J. M. C. SMITH.

Mr. MCDERMOTT with Mr. PORTER.

Mr. LITTLETON with Mr. PROUTY.

Mr. KORBLY with Mr. PARRAN.

Mr. JOHNSON of South Carolina with Mr. NEEDHAM.

Mr. JOHNSON of Kentucky with Mr. LOUD.

Mr. HARRISON of New York with Mr. MCKINLEY.

Mr. HAMILTON of West Virginia with Mr. LAFEAN.

Mr. GEORGE with Mr. JACKSON.

Mr. FINLEY with Mr. HUGHES of West Virginia.

Mr. FERRIS with Mr. HARRIS.

Mr. DICKSON of Mississippi with Mr. FULLER.

Mr. DAVENPORT with Mr. COPLEY.

Mr. CONRY with Mr. DANFORTH.

Mr. BROWN with Mr. AMES.

Mr. ANSBERRY with Mr. BARCHFELD.
Mr. HUGHES of Georgia with Mr. MICHAEL E. DRISCOLL.
For the day:
Mr. HAUGEN with Mr. PICKETT.
For the vote:
Mr. SLAYDEN (in favor of one battleship) with Mr. TAYLOR of Ohio (in favor of two battleships).
Mr. HOWELL (in favor of one battleship) with Mr. WILSON of New York (in favor of two battleships).
The result of the vote was announced as above recorded.
The SPEAKER. The question is on the engrossment and third reading of the bill.
Mr. RODDENBERY. Mr. Speaker, I ask for the reading of the engrossed bill.
The SPEAKER. The gentleman from Georgia [Mr. RODDENBERY] demands the reading of the engrossed bill. The House can not proceed without the engrossed copy, if the gentleman insists upon his request.
Mr. RODDENBERY. I insist upon it.
Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the general deficiency bill.
Mr. PADGETT. Mr. Speaker——
The SPEAKER. For what purpose does the gentleman from Tennessee [Mr. PADGETT] rise?
Mr. PADGETT. I move to suspend the rules and pass the bill as amended.
The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] moves to suspend the rules and pass the bill. Is a second demanded?
Mr. RODDENBERY. I demand a second.
Mr. PADGETT. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.
The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that a second may be considered as ordered. Is there objection? [After a pause.] The Chair hears none.
Mr. PADGETT. I reserve my time, Mr. Speaker.
The SPEAKER. The Clerk will read the bill.
Mr. RODDENBERY. Mr. Speaker, is it now in order for me to exercise the right to the 20 minutes?
The SPEAKER. The gentleman is entitled to 20 minutes and the gentleman from Tennessee [Mr. PADGETT] is entitled to 20 minutes. The Clerk will read the bill.
Mr. RODDENBERY. A parliamentary inquiry. Does the reading of the bill precede the discussion?
Mr. PADGETT. Mr. Speaker, as the bill has been read, I ask unanimous consent to dispense with the further reading of the bill.
The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent to dispense with the further reading of the bill. Is there objection? [After a pause.] The Chair hears none. The gentleman from Tennessee [Mr. PADGETT] is recognized for 20 minutes, and the House will be in order.
Mr. PADGETT. Mr. Speaker, I do not desire to debate the bill, and I shall reserve the remainder of my time.
The SPEAKER. The gentleman reserves his time.
Mr. RODDENBERY. Mr. Speaker, it is not my purpose to consume 20 minutes in discussing the proposition involved in the motion. I shall take a few moments of the time of the House to make what appear to me timely observations. The discussion of this bill has been full, fair, covering several days. The will of the House, being a House controlled by a Democratic majority, has been expressed. I requested the reading of the engrossed bill and demanded a second, so that I might exercise my right to make just a few brief observations without encroaching upon the time that others desired to use in a discussion of the various paragraphs of the bill. In a moment this bill will pass. Where does it go then? It goes to another legislative body. When it gets there who of us expect that that bill in amounts appropriated will be returned to this body substantially or approximately as it appears when the House has acted upon it. I have no disposition to assume the position that another legislative branch is not coordinate and coequal with this. But the will of the American people has been expressed in the late month of November, and by their vote they have fixed the political complexion of the House of Representatives and of the Senate of the United States as well for the Sixty-third Congress now about to convene.

And here is a Democratic House now that will be a Democratic House a week from now by its own voluntary action transmitting legislation to a Republican body that will no longer be a Republican body in less than a week from now, and we are saying that we will put into its hands in the dying days of a Congress the power to vote two battleships or three battleships and no man can prophesy what other burdens for our countrymen to bear knowing that, thus increased, that body will send it back to us.

When it comes back in what situation does it find us? The death-bell notes of this Congress will be sounding and there will be great pressure for the conclusion of the public business. Able Members will rise and say, "The great supply bills must be passed."

Gentlemen, shall we place ourselves voluntarily in a position where, in order to pass the great supply bills, we shall inflict upon the backs of our countrymen $20,000,000 additional taxes when, if we would but pause now and wait for a week, we can submit to a Democratic Congress the proposition of how much burden the people shall bear, how many battleships they shall at the plow and at the anvil beat out by their sweat, and how many soldiers or marines they shall adorn with the vestments of their service? Gentlemen, I desire to submit that it is an unwise public policy, that it is an unwise party policy at this time to transmit to the Senate this legislation under the present circumstances.

Mr. HARDWICK. Mr. Speaker, will the gentleman yield?
The SPEAKER. Does the gentleman yield to his colleague [Mr. HARDWICK]?
Mr. RODDENBERY. I yield.
Mr. HARDWICK. Why would not the same argument that the gentleman is making so eloquently now have applied against the public-buildings bill? [Applause.]
Mr. RODDENBERY. It does not apply except for the technical relation between an appropriation bill and an authorization bill. When this naval bill passes the taxes are laid and the revenues are appropriated. When the public-buildings bill passed only an authorization was made, and it is no charge and becomes no charge upon the Treasury until a Democratic House and a Democratic Senate and a Democratic President say the people shall bear it. [Applause.]

Mr. Speaker, we have seen from the public buildings bill what will happen to us. The Senate's $30,000,000 increase of the public buildings bill, the river and harbor bill, the Indian appropriation bill, and, in my judgment, the size of this bill, not only warrant this House in committing them to a Democratic administration, but indicate that if the people of this country could speak again they would say, "We have elected new Representatives, we have elected new Senators, and before you begin to revise the tariff, which is to lay revenue duties upon us, we would ask that our last-chosen Representatives and Senators shall determine upon the amount of money which is to be expended and which we are to pay by our taxes."

It is rational and it is just. I recognize the views of able men that the supply bills should be passed now. But there is no emergency, there is no reason until July, why this money shall be called for. In fact, with the exception of one bill, no general appropriation bill is sought to be made effective until the 1st of next July.

We have sent and are still sending these bills to a body that will force us to do one of two things: Either to kill them and not let them become laws for want of agreement in conference, which I trust will be done, or else in the last hour of Congress to yield to the conferees from the other end of the Capitol and add many millions of dollars to these appropriations as passed by the House. This course, in my judgment, places around the neck of the incoming Democratic administration a handicap and a weight that will give to the first Democratic President in many years the mightiest struggle to hold his party's head above the water and live up to the promises we have made to the country, and to the great duty we as legislators owe that has ever confronted a President in the history of this Republic.

These are my views. With perfect respect I regard other Members' views as being equally as honest and perhaps wiser than mine. The future months will tell whether or not a demagogue has exploited himself with folly or whether a truthful prophecy has been made.

Mr. Speaker, in so far as I can under the rules, I withdraw the demand for the reading of the engrossed bill. [Applause.]
The SPEAKER. The gentleman is too late now. The question is on suspending the rules and passing the bill as amended.
The question being taken, and (two-thirds voting in the affirmative) the rules were suspended and the bill passed.

REVISION OF THE PATENT LAWS.

Mr. BULKLEY. Mr. Speaker, I ask unanimous consent to file minority views on the bill H. R. 23417, the revision of the patent laws (H. Rept. 1161, pt. 2).

The SPEAKER. The gentleman from Ohio asks unanimous consent to file minority views on the bill H. R. 23417, the patent revision. Is there objection?

There was no objection.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28858) making appropriations to supply deficiencies in appropriations for the fiscal year 1913 and for prior years, and for other purposes; and pending that motion I ask unanimous consent that general debate be limited to 10 minutes, one-half to be controlled by myself and one-half by the gentleman from Illinois [Mr. CANNON].

The SPEAKER. The gentleman from New York moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the general deficiency bill; and pending that he asks unanimous consent that general debate be limited to 10 minutes, one half to be controlled by himself and the other half by the gentleman from Illinois [Mr. CANNON]. Is there objection?

Mr. CANNON. Mr. Speaker, the gentleman from Wyoming [Mr. MONDELL] told me that he desired some time upon this bill. Does the gentleman from Pennsylvania [Mr. OLMSTED] desire time?

Mr. OLMSTED. I desire to use about 20 minutes' time, but I do not care to take it this evening if I can get consent to speak to-morrow at some time.

Mr. CANNON. Suppose the gentleman from New York asks for 20 minutes on a side. I have not had an opportunity to see members of the committee on the Republican side. They have none of them made application to me, except the gentleman from Pennsylvania [Mr. OLMSTED] and the gentleman from Wyoming [Mr. MONDELL].

Mr. FITZGERALD. Mr. Speaker, no time is desired on this side, and there are other appropriation bills to be considered.

Mr. CANNON. Unless there is objection upon the part of some member of the Committee on Appropriations——

Mr. FITZGERALD. Mr. Speaker, at this day in the session it is not usual to occupy time in general debate.

Mr. CANNON. Mr. Speaker, the gentleman need not argue that question. The gentleman from Wyoming [Mr. MONDELL] says he will be satisfied to be recognized under the five-minute rule. I have no applications for time. Does the gentleman from Illinois [Mr. MANN] desire any time?

Mr. MANN. No.

Mr. CANNON. So far as I am concerned, general debate may be closed by unanimous consent now.

Mr. OLMSTED. I had intended to ask for 20 minutes, but I will not object to this request, and will take my chances under the five-minute rule.

Mr. GILLETT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. FOSS. I make the same request.

Mr. SISSON. I want to extend my remarks on the naval bill, and I make the same request.

The SPEAKER. The gentleman from Massachusetts [Mr. GILLETT], the gentleman from Illinois [Mr. FOSS], and the gentleman from Mississippi [Mr. SISSON] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

Mr. KINDRED. Mr. Speaker, inasmuch as one-tenth of all persons die from tuberculosis, and inasmuch as Dr. Friedmann has arrived in this country claiming a wonderful tuberculosis treatment, and inasmuch as the suffering consumptives of this country should be warned against raising their hopes too high, I ask unanimous consent to extend my remarks in the RECORD on this subject.

The SPEAKER. The gentleman from New York [Mr. KINDRED] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CARY. I ask unanimous consent to extend my remarks in the RECORD on the naval bill.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to extend his remarks on the naval bill. Is there objection?

There was no objection.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent to dispense with general debate on the deficiency bill, and that when we go into the committee the bill be read under the five-minute rule for amendment.

Mr. MANN. The gentleman had better ask unanimous consent that the first reading of the bill in the committee be dispensed with.

Mr. FITZGERALD. I have asked that the bill be read under the five-minute rule for amendment.

Mr. MANN. I understood what the gentleman asked; but I think the House ought to understand the nature of the request, and therefore I suggested to the gentleman that he make that request.

Mr. FITZGERALD. I think there will not be any misunderstanding of it after the gentleman's explanation.

The SPEAKER. The gentleman from New York asks unanimous consent that general debate on this bill be dispensed with, and that the first reading of the bill in the committee be dispensed with, and that the bill be read under the five-minute rule for amendment. Is there objection?

There was no objection.

The motion of Mr. FITZGERALD was then agreed to; accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. ADAIR in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the purpose of considering the general deficiency bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 28858) making appropriations to supply deficiencies in appropriations for the fiscal year 1913 and for prior years, and for other purposes.

The CHAIRMAN. General debate and the first reading of the bill has been dispensed with by order of the House, and the Clerk will read the bill for amendment.

The Clerk read as follows:

EXECUTIVE.

The accounting officers of the Treasury are authorized and directed to credit in the accounts of William H. Crook, disbursing clerk, Executive Office, the sum of $505 disallowed by the Auditor for the State and Other Departments in his accounts of disbursements for the quarters ended June 30, 1911, and March 31, 1912, on account of expense incurred in painting the walls and woodwork of the rooms in the Winder Building, occupied by the Commission on Economy and Efficiency.

Mr. MANN. Mr. Chairman, I move to strike out the last word. May I ask the gentleman what became of the Commission on Economy and Efficiency?

Mr. FITZGERALD. It is still at work.

Mr. MANN. How much has been allowed for it during the next fiscal year?

Mr. FITZGERALD. Nothing as yet.

Mr. MANN. I withdraw the pro forma amendment.

The Clerk read as follows:

DEPARTMENT OF STATE.

Claims of American citizens for losses in Samoa in 1899: For the payment of the amounts found by the Secretary of State to be due to American citizens for losses growing out of the joint naval operations of the United States and Great Britain in and about the town of Apia, Samoan Islands, in 1899, the King of Sweden, by an international award, having found the United States and Great Britain to be responsible for such losses, $14,811.42.

Mr. MANN. Mr. Chairman, I reserve a point of order to the paragraph. What special reason is there for the Committee on Appropriations assuming jurisdiction over private claims in this matter, when they were sent to the Committee on Claims?

Mr. FITZGERALD. They came to the Committee on Appropriations through a message of the President, and under the rules of the House claims arising under treaties are reported by the Committee on Appropriations.

Mr. MANN. This is not a claim arising under any treaty.

Mr. FITZGERALD. I looked at the matter carefully, and under the practice of the House the Committee on Appropriations has jurisdiction.

Mr. MANN. Under the practice of the Senate the Committee on Appropriations has jurisdiction of claims arising under treaties. My recollection is that when the President sent his communication to the House on the subject is was referred to the Committee on Claims.

Mr. FITZGERALD. These are in the nature of deficiencies. They are not for the support of the Government.

Mr. MANN. These claims have been pending for a good many years, now. Does the gentleman have the document referred recently in the House?

Mr. FITZGERALD. It is in the document of February 7, 1913. It came in a letter from the Secretary of the Treasury transmitting deficiency items.

Mr. MANN. That is true, but the claims themselves were transmitted to the House recently, and by the House referred to the Committee on Claims.

Mr. FITZGERALD. I think the gentleman is mistaken. The only way they came to the House, as I recall, is in a letter

from the Secretary of the Treasury transmitting the estimates for deficiencies for the current fiscal year.

Mr. MANN. That is the reason the gentleman does not recall it, because it was not referred to his committee. There was a document transmitted by the President to the House on the subject and referred to the Committee on Claims, unless I am very much mistaken. It was quite a lengthy document, setting out what these claims are.

Mr. FITZGERALD. These claims have been duly adjudicated under the treaty. The King of Sweden was appointed arbitrator, and he determined that the various Governments were responsible for the injuries to the property of its own citizens. The claims of the American citizens amounted to sixty-four thousand and some hundred dollars. A representative of the State Department was sent to the Samoan Islands to investigate, and he reported in favor of the payment of $14,000 of these claims. The citizens of other Governments have been paid by their Governments. Under the circumstances, it seems that we should pay the amount ascertained under the decision of the international arbitrator.

Mr. MANN. The international arbitrator only determines how much these countries should pay and how much the other countries should pay. This country was to pay one-half of certain claims and Great Britain one-half.

Mr. FITZGERALD. He held that each Government was responsible for the damages to the property of its own citizens.

Mr. MANN. Is not this the case: It was decided as to the claims of the German citizens that this Government should pay one-half and the Government of Great Britain pay one-half, and each of the countries, Great Britain and the United States, should take care of the claims of its own citizens?

If the committee gave consideration to the claims I shall not insist on the point of order, but if the committee took the estimate of the department upon the subject, without an examination of the document that was transmitted to the House——

Mr. FITZGERALD. Mr. Chairman, if the gentleman will permit, I will say that I examined this document as well as I was able to under the pressure, and all of the testimony submitted to this representative of the State Department is contained in it. Claims submitted by American citizens amounted to over $64,000. The commissioner appointed by the State Department reported favorably on about $14,000. The State Department in view of that report recommended that it be paid.

Mr. MANN. As I recall the case, it is this: The American citizens on the island practically got the Navy to go there and interfere and shell the town. They exposed themselves, the whole operation being at their request and suggestion. Then, when they suffered some loss, they desired the Government of the United States to pay the claims. I can not see any special equity in the claims.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. BARTLETT. The gentleman will recall that a large amount of damages was claimed not only for direct, but for consequent damages growing not only out of the destruction of property by the bombardment and what was taken by the adherents of the two claimants for the throne, but that the claims were made for consequential damages, such as stealing of the property and plunder and everything of that sort. The agreement entered into between this country and Great Britain and Germany was that these claims were to be ascertained and each country was to pay one-half of the claims. That was afterwards abandoned, and the German Government and the British Government have paid their citizens. Everybody connected with it has been paid except the American citizens.

Mr. MANN. That is true, but the fact is that it was because of the activity of the American citizens that the trouble arose. They were the ones who brought the Navy there and who caused the bombardment to be made.

Mr. BARTLETT. They were the ones who brought the king back to have him reenthroned.

Mr. MANN. They were the ones who caused the whole trouble, and, having caused the trouble and suffered some damages by it, they want the United States Government to reimburse them. Of course, we will be liable for what was done to foreign citizens, and, the island being somewhat at that time under the jurisdiction of the three nations, it was decided that the United States should pay, as I recall it, one-half to the German citizens who were damaged, and Great Britain one-half, and that each of the nations, Great Britain and the United States, should take care of their own citizens.

Mr. BARTLETT. Congress has acted in this matter. The payment of the German and English citizens has been made by act of Congress. Twenty-five thousand dollars was offered as a settlement of these claims and that was declined, and then Congress afterwards appropriated one-half of $40,000,

Mr. MANN. We were under obligations, under the treaty, to pay the foreign damages.

Mr. BARTLETT. I do not understand it to be a part either of international law or of good conscience that if the United States, in carrying out its policy, shall injure the property and person of foreigners, and at the same time injure the person and property of its own citizens, it is bound more to pay the foreigner than its own citizen, yet that is what this would amount to.

Mr. MANN. Oh, I can understand very well how if at the instance of some people we bombard a town, the people who ask the bombardment being American citizens, that we are not under any obligation to pay them.

Mr. BARTLETT. I did not say obligation. This may not be a claim that could be enforced as against sovereignty, but good conscience on the part of the Government may require, as we often do, to pay a claim of a citizen.

Mr. MANN. Mr. Chairman, while I do not think the Committee on Appropriations had any jurisdiction of this matter, and while I doubt the propriety of paying all claims, yet at this hour of the night I will withdraw the point of order.

Mr. BARTLETT. I want to say this, we would not have paid it, if we did not think we were bound in conscience and decency to do so.

Mr. MANN. But that was for the Committee on Claims to determine.

The Clerk read as follows:

COLLECTING INTERNAL REVENUE.

To supply a deficiency in the appropriation for salaries and expenses of 40 revenue agents provided for by law, and fees and expenses of gaugers, salaries and expenses of storekeepers and storekeeper-gaugers, $50,000.

Mr. CANNON. Mr. Chairman, I would be glad to have unanimous consent granted to pass the provision on line 21, page 6, for the present, with the privilege of offering an amendment to it later.

Mr. FITZGERALD. We have given everything that they have asked.

Mr. CANNON. I will state to the gentleman what I would be glad to offer at this point, namely, to hereafter pay a salary of a senior surgeon to Dr. Anderson, who is at the head of the Hygienic Laboratory.

Mr. FITZGERALD. I shall be compelled to make the point of order against it.

Mr. CANNON. If the gentleman is compelled to make the point of order against it of course that ends it; but I hoped the gentleman would not make the point of order against the matter, and I would like to ask unanimous consent——

Mr. FITZGERALD. There is a gentleman over there who will.

Mr. CANNON. No; I do not think so.

Mr. FITZGERALD. His committee last year reported a bill increasing the compensation of all the employees of the Public Health and Marine-Hospital Service. The gentleman from Georgia is usually alert and knows what is going on, and I am afraid he would make the point of order if I do not.

Mr. CANNON. I do not believe he would.

Mr. MANN. I will say to my colleague——

Mr. ADAMSON. I took it for granted, Mr. Chairman, the very distinguished chairman of the Committee on Appropriations had finally concluded to refrain from trenching on the territory of other committees, and I confess I have not read the bill which is before the House.

Mr. FITZGERALD. If the gentleman from Illinois offers an amendment increasing the compensation of an officer of the Public Health Service, and the gentleman's committee last year had reported a bill increasing the compensation of all the officers in that service, I thought perhaps he would offer to make the point of order.

Mr. ADAMSON. If in addition to the fatherly care in looking after and legislating on those matters which are within our jurisdiction the gentleman should conclude to go further and compel us to make points of order which we otherwise would not make, he would be a guardian indeed.

Mr. CANNON. I would like to offer this amendment and let the point of order be pending.

Mr. ADAMSON. I would like to hear the amendment read if I am required to raise the point of order.

Mr. CANNON. It is that hereafter the Director of the Hygienic Laboratory shall receive the pay and emoluments of a senior surgeon. Now, then, if the gentleman will reserve the point of order——

Mr. FITZGERALD. I will reserve the point of order.

Mr. CANNON. And it is subject to the point of order.

Mr. ADAMSON. I will reserve it.

Mr. CANNON. The pay of this Director of the Hygienic Laboratory here in Washington is $2,900. This amendment will give him $3,500—the pay of a senior surgeon.

Mr. FITZGERALD. It will also give him longevity pay and allowances.

Mr. CANNON. He is getting the same longevity pay on this. It only amounts to an increase of salary of $600—that is all. Now, I ask unanimous consent that the point of order be reserved to make a statement. The sundry civil bill, which was passed and is pending in the Senate, very largely increases the expenditures for the Public Health Service. The hearings before the House committee on the sundry civil bill covered a day, and I have never heard a more intelligent hearing, not only from Dr. Blue, at the head of this service, but from the Secretary of the Treasury, and from Dr. Anderson, of the Hygienic Bureau; and the increase resulted after a full hearing touching the prevalence of pellagra, trachoma, spotted fever, and infantile paralysis, and the services which were rendered by this Hygienic Laboratory here in Washington, which has been doubled in capacity in the last year or two, and this man, so far as I know and believe, gives exceptional service at the head of this laboratory.

Mr. ADAMSON. If the gentleman will permit, I do not care to have time consumed. He has converted me, and I am perfectly willing to waive what little impropriety there may be in this thing; in fact, I believe the only disorderly thing about it is that there are several others whose salary ought to be raised a little, if the condition of the Treasury would permit, and I am going to withdraw the point or order.

Mr. FITZGERALD. I reserve the point of order.

Mr. CANNON. I hope the gentleman will not make it.

Mr. FITZGERALD. If I do not do what is expected of me in protecting the bill, I have absolutely no excuse to offer other gentlemen who desire to increase salaries.

Mr. CANNON. If the gentleman in charge of the bill will allow me, the services of this man in connection with the operation of that laboratory, of which he is the efficient head, can not be measured by any reasonable amount of money.

Why, we double these appropriations, and there is a great demand for this service. It is not often that I desire an increase of $600, but here is a man who is earning twice the amount which he is getting, and can command twice that amount.

Mr. MANN. Will my colleague yield to a question?

Mr. CANNON. Yes.

Mr. MANN. What my colleague thinks is that the present official ought to have this increase?

Mr. CANNON. Yes; or any official who is competent to be at the head of the Hygienic Laboratory, which has been doubled in its capacity in a very short time and which is making such contributions toward investigations for the public health.

Mr. MANN. What is the position which this man now has? What is his title?

Mr. CANNON. He is the Director of the Hygienic Laboratory.

Mr. MANN. Of course, I do not know about his salary; but when we drew a bill, which subsequently was passed last year, but originally drawn several years ago, Dr. Wyman consulted me. I was then the chairman of the committee. I first proposed to put in the salaries of a few of these men who were in those places. The statement was made to me at the time that these men would get the salaries provided for in the bill as surgeons or senior surgeons. That is the reason I asked.

Mr. CANNON. This is to put the director on the salary of a senior surgeon in this bill, and I think he is worth any senior surgeon and more, too, in the contributions he makes to medical science.

Mr. ADAMSON. I would like to ask the gentleman from Illinois [Mr. MANN] if for some reason at the time we framed that bill this particular officer's salary was omitted. Was it not omitted under some statement made to us?

Mr. MANN. It was omitted because Dr. Wyman said it was not necessary. I thought at the time those men ought to receive a sufficient salary, but I supposed that they would get it as I have stated.

Mr. KINDRED. What would be the salary of the director of the Hygienic Laboratory, then?

Mr. CANNON. Thirty-five hundred dollars. It is now $2,900.

Mr. MANN. It would be a total of $4,500 and allowance for room.

Mr. KINDRED. Will the gentleman allow me to further interrupt to say that I have some personal knowledge of the value to the scientific world of the work that is being done in this laboratory, and I want to confirm and emphasize what the gentleman from Illinois has said relative to the scientific value of this man and his services who now fills the directorship there, because in the outside world, if he should have engaged in some other position where industrial chemistry was concerned, he could get twice the salary. I sincerely hope the gentleman's amendment will prevail.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. As I understand, the present and former chairman of the Committee on Interstate and Foreign Commerce, who collaborated on bills for the pay of this man, intended that this man at the head of this laboratory should get this compensation, and, familiar as I am with his work and equipment, I am willing to let the committee vote on the question.

Mr. MANN. The bill as originally drafted contained a specific provision in reference to the increase of the salary of the directors. There were several of them in these places, and we were then told by Dr. Wyman that it was unnecessary, and that they could get the salaries without putting them in the bills.

Mr. ADAMSON. And that was a mistake.

Mr. FITZGERALD. I wish to say, Mr. Chairman, that Dr. Anderson appeared before the committee in connection with the estimates of the Public Health Service, and I think he made as profound an impression on the committee as to his capabilities and capacity as any man I have listened to in my experience. And the research work of the Public Health Service is really, in my opinion, the most important work of the whole service.

Mr. MANN. That is right.

Mr. FITZGERALD. I shall not insist on the point of order.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] withdraws his point of order, and the Clerk will report the amendment.

Mr. CANNON. After the word "provided."

The Clerk read as follows:

On page 6, after line 21, insert the following:

"*Provided*, That hereafter the director of the Hygienic Laboratory shall receive the pay and emoluments of a senior surgeon."

Mr. MANN. I think that should read "pay and allowances."

Mr. CANNON. Well, "pay and allowances," then. Put that in.

The CHAIRMAN. Without objection, the amendment will be so modified.

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment as modified.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The accounting officers of the Treasury are authorized and directed to regard the service of Joseph Lanzon, late ordnance sergeant, United States Army, as continuous from May 20, 1882, to September 2, 1912, the date of his death.

Mr. MANN. Mr. Chairman, I reserve a point of order on that item.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves a point of order on the item.

Mr. FITZGERALD. This man originally enlisted in the Army in 1882 and died a year or so ago.

Mr. MANN. On September 2, 1912?

Mr. FITZGERALD. Yes. He was discharged on the 31st of May, 1892, after the expiration of his enlistment, and reenlisted on the 1st day of July. If he had reenlisted within 30 days his service, under the law, would have been continuous and he would have been entitled to certain increases of pay; but he died here within a year or so, leaving a widow and five children. They applied, in the settlement of his accounts, for the amount—$220—that would have been due if the continuous service had existed, but in checking up they found that he had not enlisted within a day or two of the time necessary, and they decided that he had been overpaid in the amount of about $570, and that his widow and children were not entitled to this money on that account.

Mr. MANN. This is to relieve an overpayment?

Mr. FITZGERALD. Yes; and to permit the payment of $220.

Mr. MANN. I know; but practically to relieve an overpayment?

Mr. FITZGERALD. Yes. It makes the widow entitled to the payment of $220. The man is dead, and it makes no difference to him.

Mr. MANN. I do not know whether it makes any difference to him or not. The gentleman and I are not informed on that subject. [Laughter.] If it is simply to relieve an overpayment that was made, I have no objection to it.

Mr. BARTLETT. That is all.

Mr. FITZGERALD. The widow gets the $220.

Mr. MANN. Then I withdraw my point of order.

The CHAIRMAN. The gentleman from Illinois withdraws his point of order. The Clerk will read.

The Clerk read as follows:

DISTRICT OF COLUMBIA.

Assessor's office: Leave of absence with pay for an additional period of 60 days may be granted to A. E. Grant, clerk in the assessor's office, District of Columbia.

Mr. MANN. Mr. Chairman, I reserve a point of order on that item.

Mr. FITZGERALD. Mr. Chairman, on Christmas eve a young woman, a clerk in the assessor's office, was brutally assaulted, and——

Mr. MANN. I withdraw the point of order.

The CHAIRMAN. The gentleman from Illinois withdraws the point of order. The Clerk will read.

The Clerk read as follows:

Hereafter all collections or reimbursements on account of charges paid or payable by the District of Columbia for the care and support of the insane of said District at the Government Hospital for the Insane shall be made to the Commissioners of the District of Columbia and covered into the Treasury of the United States to the credit of the revenues of the United States and the revenues of the District of Columbia in equal parts.

Mr. MANN. Mr. Chairman, I reserve a point of order on that paragraph.

Mr. FITZGERALD. The Auditor for the District of Columbia called the attention of the committee to the fact that the commissioners have no authority to make the collections for pay patients, and the superintendent of the insane asylum says that he has none. He states that if the obligation is imposed on the commissioners to collect from those patients that are sent there, and for whom otherwise under the law the District should pay, the authorities can follow them up and collect the money required of the pay patients.

Mr. MANN. Are not their expenses charged to the District?

Mr. FITZGERALD. This is for the pay patients.

Mr. MANN. I know; but whether they go as pay patients or not, are their expenses not charged to this District?

Mr. FITZGERALD. Half and half.

Mr. MANN. On the half-and-half principle?

Mr. FITZGERALD. Yes.

Mr. MANN. Is it half and half where we are making them pay back a lot of money?

Mr. FITZGERALD. Yes.

Mr. MANN. That is the only thing I wanted to know about.

Mr. RODDENBERY. Mr. Chairman, I want to make inquiry on a similar subject in relation to the language in line 18, page 12. The question of the gentleman from Illinois [Mr. MANN] causes me to inquire what particular significance have the words "provided by law"? What particular significance has that language?

Mr. FITZGERALD. The law provides the terms under which these patients shall be committed and the rates charged.

Mr. RODDENBERY. The words "provided by law" relate to the conduct of the institution; this amount only to be paid for purposes and in manner provided by law.

Mr. FITZGERALD. Yes; and the rate must be fixed in the manner provided by law.

Mr. RODDENBERY. It in no way relates to the half-and-half proposition.

Mr. FITZGERALD. Oh, no.

The Clerk read as follows:

Miscellaneous expenses: For payment of such miscellaneous expenses as may be authorized by the Attorney General for the Supreme Court of the District of Columbia and its officers, including the furnishing and collecting of evidence where the United States is or may be a party in interest, including also such expenses as may be authorized by the Attorney General for the Court of Appeals, District of Columbia, $40,000.

Mr. SISSON. I reserve a point of order on the paragraph. This is for the purpose of paying the expenses of the condemnation proceedings for the ground between the Capitol and the Union Station, but I see nothing in the item which indicates that it is for that purpose. I do not know exactly why the amount is carried in this particular language.

Mr. FITZGERALD. Because it is a miscellaneous expense for the Supreme Court of the District of Columbia, authorized to be paid by the Attorney General.

Mr. SISSON. That may be true, but why is it carried in this language?

Mr. FITZGERALD. It is the language of the annual appropriation under which it is to be paid.

Mr. SISSON. I will state to the chairman of the committee that that might be true perhaps if you were going to pay all the expenses, but in this particular item there is nothing that indicates that it is to be paid for that particular purpose.

Mr. FITZGERALD. That is the fact. It is to be paid for that purpose.

Mr. SISSON. I understand that, but it might be used for any other purpose under the terms of this appropriation.

Mr. FITZGERALD. That is not correct.

Mr. SISSON. Is there any law which authorizes the payment of the money in this language?

Mr. FITZGERALD. This is the way in which the appropriations for such purposes are made, and it is out of this particular appropriation that such services are paid. The amount of the appropriation is not sufficient to provide the additional money required. It is necessary to appropriate in the language of the original appropriation.

Mr. SISSON. I should like to ask the chairman of the committee what information he has as to whether this is the last of these fees.

Mr. FITZGERALD. I understand this finishes up the whole proceeding. It pays for the commissioners and expert witnesses, printing abstracts, stenographers, and some other miscellaneous items.

Mr. SISSON. I should like to ask the chairman of the committee this question: Suppose the House does not agree to the Senate amendment to the sundry civil bill providing for the payment of the entire amount at this session of Congress, would there be any additional expense, or would this cover the expense of the condemnation?

Mr. FITZGERALD. This would cover the expense of the condemnation. The only additional expense would be the interest on the amount of the unpaid award until it was paid.

Mr. SISSON. I understand that that would be another matter.

Mr. FITZGERALD. This proceeding is complete. The awards have been confirmed. The only thing left to do is to pay for the property taken and pay the expenses incurred in acquiring it.

Mr. SISSON. Does the chairman of the committee think this $40,000 will cover the entire amount?

Mr. FITZGERALD. My understanding is that it pays all the expenses incident to the proceedings.

Mr. SISSON. I have not looked at it in the last day or two, but my recollection was that the amount was $41,000.

Mr. FITZGERALD. They had $15,000, and they may have an unexpended balance of $1,000 in the appropriation available for that purpose.

Mr. SISSON. Mr. Chairman, I want to say before I conclude that this is the item to which I have been so seriously objecting for several years—not this expense item, but the condemnation of the property between the Capitol and the Union Station.

I do not feel that it would be proper that this appropriation should be made because the expenses were incurred under a statute passed by the House, but I did want the RECORD to show what the appropriation was for. Mr. Chairman, I withdraw the point of order.

Mr. CANNON. Mr. Chairman, I move to strike out the last word, just to make a few observations. This is the best conducted condemnation proceedings, so far as I have any knowledge, and I have knowledge of a great many in the District, that ever was had. As I recollect, in round numbers, the 12 squares cost about $4,300,000.

Mr. SISSON. Will the gentleman yield?

Mr. CANNON. I will.

Mr. SISSON. The gentleman does not mean to state that all the 12 squares were taken?

Mr. CANNON. Well, west of the Arthur Place there was a small block that was not taken. This condemnation has been expeditious and was conducted at the minimum of expense.

We asked the Attorney General to make condemnations and he did so, detailing one of the Assistant Attorney Generals, who receives $5,000 a year for salary. We ascertained what attorneys' fees would be if outside attorneys were employed, and in round numbers $30,000 was the best bid we could get. The Attorney General assigned an Assistant Attorney General, Mr. Strickland by name, to do the work, and that is the only attorney's fee that is involved.

The attorneys' fees for the condemnation of three blocks facing on the White House grounds were between $30,000 and $40,000, and I think nearer $40,000. This Assistant Attorney General, to my knowledge, did not confine himself to this work during office hours, but he worked almost constantly. There were over 400 owners of this real estate.

Mr. SISSON. Will the gentleman yield?

Mr. CANNON. I will yield to the gentleman from Mississippi.

Mr. SISSON. I want to say to the gentleman from Illinois that my statement in reference to the matter was not in criticism in the least of the amount of money expended nor of the condemnation proceedings.

Mr. CANNON. I understand that thoroughly. Now, there is no legal obligation to pay this man who has done this work at a salary of $5,000 in less than a year, where it would have cost the Government, if outside attorneys had been employed, $30,000, and where it did cost the Government nearly $40,000 in the case I have mentioned. Now, in the Lord's chancery we have from time to time for meritorious and efficient services granted officials something by way of extra pay. We granted the Superintendent of the Capitol for his four years' work, outside of his salary—and it was worth many times the amount—$15,000, in recognition of that meritorious service.

I would be glad, having the personal knowledge about the efficiency of this man, to see this committee grant unanimous consent to pay $5,000 to this Assistant Attorney General, who has performed these services. I know it is subject to a point of order.

Mr. FITZGERALD. I shall be compelled to object to that. A year or so ago a provision was enacted that all condemnation proceedings should be placed in the hands of the Assistant Attorney General.

Mr. CANNON. Yes; but that did not prevent, as had been done in former years, the employment of other attorneys.

Mr. FITZGERALD. That may be true; but I can not consent that that be done on this bill. I know that the gentleman is a very efficient man.

Mr MANN. Mr. Chairman, my friend, the gentleman from Mississippi [Mr. SISSON], has been doing very good work in the House, and has endeared himself to me and other Members of the House for efficient service. He has not been in Congress very long. He came in at this end of the Capitol. Although the Capitol faces east, on the south side of the Capitol is the House side and on the north side of the Capitol is the Senate side. It is the Senate side of the Capitol that looks out upon these grounds which have been condemned between the Capitol Building and the Union Station. My distinguished friend from Mississippi in future years will walk out of the Senate Chamber, where he will be an honored Member, into the Marble Room, gaze out on the beautiful grounds which lie between the Capitol Building and the Union Station, and say to himself many times, "Well, after all, I was wrong and Uncle JOE was right." [Laughter and applause.]

The Clerk read as follows:

It is hereby declared to be the settled policy of the United States, after July 1, 1915, to make no appropriation whatever for the relief of sufferers from flood, fire, or other disaster in any State whose legislature shall have been in regular session prior to July 1, 1915: *Provided*, That this provision shall not apply to sufferers from any such disaster, the extent of which may be so widespread as to be beyond the resources of any State in which the same may occur, or shall exceed all reasonable measure of relief authorized by the legislature of any State to be expended to such sufferers by the governor or other competent authority thereof.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. Does the gentleman from New York [Mr. FITZGERALD] really think at this time in the session, even with the large number of Members present, that it is desirable to fix a settled policy of the United States for a date after July 1, 1915?

Mr. CANNON. Mighty good as a buffer.

Mr. MANN. Is that one of those emergency matters which the gentleman thinks ought to be acted on now?

Mr. BARTLETT. The gentleman remembers we put a settled policy in the Indian bill in reference to sectarian schools about 15 years ago.

Mr. MANN. That was after a prolonged fight and a very large attendance. It hardly seems to me, with even the aggregation of brains now assembled here, that we ought to endeavor to fix a settled policy for the United States after July 1, 1915, and I make the point of order.

Mr. CANNON. Before the gentleman makes the point of order, this is as good as a declaration that might serve as a buffer. For instance, the gentleman knows as well as I do when the floods come Members of Congress come and say, "Oh, we must have relief"; and the question is asked, "How about your State?" "Oh, my State legislature is not in session," and so on and so on. Then, without having any individual in mind, my friend knows as well as I do these appropriations for the relief of suffering at times have been abused and at times they have served a good purpose, though the States ought to do this work; but it is perfectly legitimate that they should be anxious to serve their constituencies, both Senators and Members, and it seems to me this might be good as a buffer.

Mr. MANN. Well, if this proposition had been presented to the House this afternoon at half past 4 or 5 o'clock, with the attendance which was then here, I should be perfectly willing to leave it to the House to determine what should be the settled policy of their successors; but I question whether the number who are here now ought to attempt to do that.

Mr. FOSTER. Does not the gentleman think it might possibly be done better now?

Mr. MANN. I make the point of order.

The CHAIRMAN. Does the gentleman from New York desire to be heard upon the point of order? The Chair sustains the point of order.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. ROUSE having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to a conference of the two Houses on the amendments of the Senate to the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914.

The message also announced that the Senate had passed with amendments the bill (H. R. 27148) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1914, and for other purposes, in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed with amendments the bill (H. R. 22913) to create a Department of Labor, in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed concurrent resolution of the following title, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 36.

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 1,500 copies of the proceedings in the Senate of the United States and in the House of Representatives and before the Judiciary Committee thereof, in the matter of the impeachment of Robert W. Archbald, additional circuit judge of the United States from the third judicial circuit, and designated a judge of the Commerce Court, of which 500 shall be for the use of the Senate and 1,000 for the use of the House of Representatives.

GENERAL DEFICIENCY APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Credit in the accounts of Capt. D. L. Stone: The accounting officers of the Treasury are authorized and directed to allow and credit in the accounts of Capt. D. L. Stone, United States Army, the sum of $13,046.33, disallowed against him on the books of the Treasury.

Mr. BOOHER. Mr. Chairman, I would like to ask the chairman of the committee why there should be a lot of these accounts credited with certain sums of money. Why do these officers not keep their books better?

Mr. FITZGERALD. To which particular one does the gentleman refer?

Mr. BOOHER. This is the case of Capt. D. L. Stone.

Mr. FITZGERALD. Mr. Chairman, in this instance the Quartermaster General recommended to the Secretary of War that authority be granted for the construction of field officers' quarters at Fort Sill, and it was his opinion that the limitation fixed by Congress on the cost of quarters did not apply to appropriations for military posts, but only to barracks and quarters, seacoast defenses. There was expended at Fort Sill in excess of the limitation $13,046.33. The comptroller held that the limitation applied to appropriations under both titles, so that the expenditures made by the officer who happened to be in charge of the work there, amounting to $13,000, were disallowed in his accounts, and he is charged with this money. The money was expended in good faith and the work was done. These cases are all different. The committee went through them very carefully and eliminated a large number and allowed those where it seemed that the officer acted in good faith, and there was no justification for holding him personally liable for the money expended.

Mr. BOOHER. Mr. Chairman, the explanation is satisfactory.

The Clerk read as follows:

For ordnance and ordnance stores, Bureau of Ordnance, 1910, $2,070.01.

Mr. BATHRICK. Mr. Chairman, I offer an amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 23, line 20, by striking out "$2,070.01" and inserting "$52,070.01."

Mr. BATHRICK. Mr. Chairman, this amendment is intended to do what many of us think is just simple, plain justice to the men who are employed in the navy yard in Washington. Ever since 1906 these men have attempted to secure a raise of pay. Gentlemen are aware that the method of fixing the amount of pay for the laborers and mechanics in the Washington Navy Yard is decided by what is known as a wage board. This board consists of three officers of the Navy, and beyond them these laborers and mechanics have had no appeal except to the Secretary of the Navy. The matter was brought before the Naval Affairs Committee, and for the last year, at odd times, the subject has been discussed, and the Naval Affairs Committee, after looking into all of the facts in connection therewith, decided that these men were entitled to a raise of pay. But before this was decided upon a special committee, consisting of men from the navy yard, of the workers themselves, and representatives of the department, was appointed by the Secretary, and they went to the various cities and factories where this same character of work is under way in order to investigate the amount of wages paid as compared with the wages paid in Washington, and also to investigate the difference, if there was any, in the cost of living in these cities as compared with the cost of living in Washington. They came back with a vast amount of information, gathered in that impartial manner. It

was placed before the department, and, after investigating it thoroughly, the Secretary of the Navy wrote a letter, from which I will read:

NOTE.—At the request of the Naval Committee of the House of Representatives, the department appointed a board to investigate the question of wages at the navy yard, Washington, D. C. The board has completed its labors and in a voluminous report, a copy of which, accompanied by certain memoranda, has been transmitted to the chairman of the Committee on Naval Affairs of the House of Representatives, has recommended an increase in wages at the Washington Navy Yard, based upon the increased cost of living in Washington as compared with other cities from which data were secured, amounting to approximately 10 per cent and involving an estimated increased expenditure of $120,000 for the remainder of the current fiscal year, $50,000 of which would be chargeable to the appropriation "Ordnance and ordnance stores, 1913," and the remainder, $70,000, to the appropriation "Increase of the Navy, armor, and armament."

While no deficiency has been or seems likely to be incurred under either of said appropriations, the adoption of the board's recommendations would involve either a deficiency or a reduction in the force unless additional funds are provided.

Mr. HAMILL. When was that report made?

Mr. BATHRICK. January 8, 1912. In other words, they can not put into force the granted increase of wages unless this amount of money is included in this deficiency bill until after this fiscal year. The naval bill, which was passed to-day, carries a provision for taking care of the increase for the year 1914, but these men, after seven years of waiting and trying to get the wages that ought to be paid to them, are now obliged to wait until June 30, at the end of this fiscal year, unless my amendment is included in this bill. I think they have waited long enough. In order to bring about the payment of an increase it is necessary to make two amendments, the first of which I have offered, and which is to add $50,000 to this item, and the second of which I will offer after line 24, under the required head of increase of the Navy. Some gentlemen who are economists on the question of the increase of the Navy ought not to get excited, because this does not increase the Navy. It only increases the pay of the highest class of our American mechanics, who build the most intricate parts of our naval vessels.

Mr. FITZGERALD. Mr. Chairman, I hope this amendment will not be adopted. This proposes to increase the amount of $2,000, which is authorized to be credited from one account into another, and to close up the account for 1910 in the appropriation for ordnance and ordnance stores, by $50,000. It can not possibly be paid out for the purpose the gentleman desires to pay it out. It could not be used for the purposes he wishes.

Mr. BATHRICK. If we appropriated this money in this bill, why can it not be paid out?

Mr. FITZGERALD. Because under the language of this provision, to which the gentleman proposes to attach this appropriation, there is no appropriation of this kind made. This provides as follows:

To reimburse "General account of advances," created by the act of June 19, 1878 (20 Stat. L., p. 167), for amounts advanced therefrom and expended on account of the several appropriations named hereunder in excess of the sums appropriated therefor for the fiscal year given, found to be due the "general account" on adjustment by the accounting officers, the accounting officers of the Treasury are authorized and directed to credit by transfer from unexpended balances of appropriations for the Naval Establishment, fiscal years 1912 and 1913, amounts as follows:

And then for the ordnance and ordnance stores for the Bureau of Ordnance for the fiscal year 1910 they asked a transfer and credit to the general account of advances, $2,070.01. The gentleman asked to increase the amount that they may transfer to the credit of that, in order to close out their accounts, to $50,270,01.

Mr. MANN. And that is for the fiscal year ending three years ago.

Mr. FITZGERALD. Exactly.

Mr. HAMILL. Will the gentleman yield?

Mr. FITZGERALD. I will.

Mr. HAMILL. Has the gentleman any criticism to make of the justice of the increase asked by the gentleman from Ohio [Mr. BATHRICK]?

Mr. FITZGERALD. Yes; I have. I object to doing it in this bill in this way. At any rate, the gentleman does not wish to increase this item, because if it were adopted by the committee it would not result in the increase of compensation of a single man. This is simply a bookkeeping matter to enable them to close their accounts.

Mr. BATHRICK. Let me ask the gentleman this question: The department has hitherto claimed they did not have the money. If we appropriate in this bill they will have the money, and is it not in the discretion of the department as to where they will put this money in this instance?

Mr. FITZGERALD. No; not in this instance. This is authority to transfer on the books—to make a book credit from one account to another—the appropriation for the fiscal year 1910, in order to close up their accounts. The increasing of the amount does not accomplish anything. It would simply result in their coming back next year and asking us to authorize them to do it, so that we could finally close up the accounts for that fiscal year.

Mr. HAMILL. Now, what, in the opinion of the gentleman, would be a proper place, or where would be a proper place, to insert this amendment?

Mr. MANN. There is no proper place in the bill.

Mr. FITZGERALD. I doubt if I shall take my time to furnish that information. I do not think the appropriation should be made.

Mr. HAMILL. The gentleman has not made any criticism about the merits of this.

Mr. FITZGERALD. I have not had a chance. I have already stated to the gentleman that I had an objection to it. I first wish to call attention to the fact that this would be inoperative, and I did say to the gentleman from New Jersey that I would state my objections when I had an opportunity, and he should not complain that I have not done it, because he does not give me the opportunity.

Mr. HAMILL. The gentleman yielded the floor of his own accord.

Mr. FITZGERALD. I have not yielded at all. I still have the floor. I have yielded to questions. The gentleman is propounding questions to me, and still making it impossible for me to discuss the merits of the proposition, if I were disposed to do so at this time.

Mr. GARNER. Has the amendment any merit whatever?

Mr. FITZGERALD. This amendment has no merit.

Mr. HAMILL. We are going to give the gentleman the opportunity right now to tell us.

Mr. FITZGERALD. I will take the opportunity at the opportune time. I simply wish to call the attention of the committee to the fact that the gentleman is asking to increase the amount in the bill, inadvertently, I take it, to an amount that he desires.

Mr. BATHRICK. In that case, do you not think it would be subject to a point of order?

Mr. FITZGERALD. It may be, in a different form.

Mr. BATHRICK. The gentleman can make a point of order.

Mr. FITZGERALD. This is not subject to a point of order in this form, or I should have made it. This authorizes credits from one account to another to close up that account. We close up an account three years old. That is all I wish to say about this amendment.

Mr. BUCHANAN. Mr. Chairman, I concur in the remarks of the gentleman from Ohio [Mr. BATHRICK] that this is a just claim, and go further and say that it is a claim that the Government is obligated to pay by right and, it seems to me, if it was not paid, if it were against a private individual, they would have a legal status in the courts. These men have followed the custom of securing an increase of wages. It has been the practice to have wage boards formed. They have asked for this wage board for some time before receiving it. In fact, there were strikes threatened in the navy yard on account of not being given the consideration of receiving their claim for the right of an increase under the rules of that department. That this was brought up is due to the fact that I introduced a bill to secure an increase, which was taken up by the Committee on Naval Affairs, and there was a subcommittee appointed to take it up with the Navy Department. That department took the matter up at the suggestion of the subcommittee, and, as the gentleman from Ohio [Mr. BATHRICK] has told you, it resulted in these men substantiating their claim and showing that they were justified; that under the rule they were not only entitled to an increase of wages at this time but if they had been given a chance to bring the proper evidence before any fair wage board they would have been receiving it a year previous to that.

Now, I say it is not only a matter of justice but it is also a matter of obligation on the part of this Government to fulfill what you might say is a promise. A written promise to pay could not be any stronger than this claim that these navy-yard employees are urging. Not only that, but it has been demonstrated time and time again that you have got among the ablest men in the country in that navy yard. They are producing the best guns and the best materials in the world, and the fact has been established, almost without any denial, that they are among the most efficient workingmen in the country. They have been patient in this matter and have exercised good judgment, and finally they brought the matter to what you might call an arbitration. Their claim is a just claim, and it has been justified. It was justified when this amount of increase was awarded. It is the same as if the Government had promised to pay this claim, and therefore the Government is in honor bound to provide for the payment of this increase.

We have heard much about arbitration in the industrial world. Certainly this is an arbitration that every fair-minded

man stands for throughout the country. A great many people are trying to establish the principle of arbitration in order to avoid strikes and other industrial troubles. It seems to me, if we are trying to encourage that spirit among private employers and employees, we should feel that we are obligated as Members of Congress to carry out what seems to me to be at least an arbitration agreement to which the Government is a party. I think, therefore, there ought to be some way, either in the deficiency appropriation bill or in some other appropriation bill, for these men to secure what rightfully belongs to them.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. BUCHANAN. Yes.

Mr. MANN. Why did you not report this item in the naval appropriation bill?

Mr. BUCHANAN. The item in the naval appropriation bill was for the next fiscal year. In that bill we were not appropriating for this present fiscal year.

Mr. MANN. I know; and that would have been subject to a point of order, but a great many other items included in the naval bill were subject to a point of order and were stricken out. Why was this not put in the naval bill last year?

Mr. BUCHANAN. The increase was not awarded until January, 1913, after the naval appropriation bill had passed.

Mr. MANN. Has the increase been given now?

Mr. BUCHANAN. It was given, I believe, on the 1st of January, and the increase was to take effect at the time it was awarded. The workmen claim that their rent, in view of the former rate, was lower then than it is now.

Mr. MANN. How much higher is this rate than that which they are now receiving?

Mr. BUCHANAN. This gives them about a 10 per cent increase.

Mr. MANN. Are they getting it?

Mr. BUCHANAN. No; the money has not been appropriated to cover it.

Mr. MANN. Have they been awarded that higher rate?

Mr. BUCHANAN. Yes; they have been awarded that higher rate, but there has been no money to pay them.

Mr. MANN. All they have to do is to see to it that an estimate is sent in by the proper officers.

Mr. FITZGERALD. Yes. If the Secretary of the Navy had exercised his power and responsibility and fixed the compensation of these men, the money would have been appropriated.

Mr. MANN. That is all that is needed to be done.

Mr. GREGG of Texas. Mr. Chairman, the wages of the employees in the Washington Navy Yard are fixed by a wage board. When the Naval Committee made the appropriation for the fiscal year ending June 30, 1913, the pay of these men was fixed on the basis of the pay then allowed them by the wage board. Afterwards, about the 1st of January of this year, the wage board increased their wages, and it was binding from that day on. Now, then, from the day the wage board increased the rate up to the 30th of June, 1913, there is no appropriation to pay the men this increased rate, because the bill, in making the appropriation, appropriated only on the basis of the old wage scale. There is now no provision to pay this increase which has been allowed them.

Mr. AUSTIN. Mr. Chairman, the amendment offered by the gentleman from Ohio, then, provides a sufficient amount to meet this increase?

Mr. GREGG of Texas. It is intended to pay that increase. Whenever the wage board passed on the question and gave them this increase, from that date their wages under the law were increased. Now, the Government owes this amount, and it has got to pay it at some time. Why not pay it in this bill?

Mr. MANN. Will the gentleman yield?

Mr. GREGG of Texas. Yes.

Mr. MANN. The Government owes a great deal of money that it does not pay until it is called upon to pay it in the regular course.

Mr. GREGG of Texas. I do not see anything irregular in this.

Mr. MANN. Certainly it is irregular. The deficiency appropriation bill is made up in every case of items that come to Congress from the departments as deficiencies.

Mr. GREGG of Texas. This is a deficiency, and if the deficiency bill does not cover it, how can they get it?

Mr. BUCHANAN. We were of the opinion that it was a deficiency.

Mr. GREGG of Texas. This deficiency item carries the amount of the increase.

Mr. KITCHIN. And the Navy Department have recommended the amount covered by this deficiency.

Mr. GREGG of Texas. Yes.

Mr. MONDELL. Mr. Chairman, if the gentleman will permit me, I will read from page 75 of the hearings on this bill to show that the statement of the gentleman is correct. This is from the statement of Commander Clark:

> The CHAIRMAN. Commander, you have an estimate of $50,000 to provide for an increase of approximately 10 per cent in the schedule of wages for the navy yard, Washington, D. C., during the remainder of the fiscal year 1913.
>
> Commander CLARK. At the request of the Naval Committee the Secretary of the Navy ordered a board to investigate the question of wages at the navy yard, Washington, D. C., and they found the cost of living exceeded the cost of living in the surrounding district, which extended up to Pittsburgh and Philadelphia, by about 11 per cent, and the House committee apparently wanted to increase their pay. We had not estimated for anything of the kind, so we said we would have to have more money. It amounts to $50,000 in one appropriation and $70,000 in the other.

So that evidently there has been an estimate, and there was one before the committee.

Mr. AUSTIN. May I ask the chairman of the Committee on Appropriations if the statement made by the gentleman from Wyoming is correct, namely, that there was an estimate from the Secretary of the Navy covering this amount?

Mr. FITZGERALD. Yes. The situation is this: This board met and decided that there should be an increase of a certain percentage in the compensation of these employees. The estimates were sent. Representatives of these men appeared before the committee. I stated then what I repeat now, that if the Secretary of the Navy believed these men should have their compensation increased it was his duty to increase the compensation, and then ask Congress to appropriate the money to supply the necessary deficiencies in the appropriation. Instead of doing that the department has been endeavoring to place the responsibility on Congress—to make Congress appropriate money for the specific purpose of increasing this pay.

Mr. AUSTIN. Let me say to the gentleman from New York that if the Secretary of the Navy failed to do what was simple justice to these men, let us not shirk the responsibility, but let us meet it and make the proper appropriation.

Mr. FITZGERALD. I might say to the gentleman that I have information about the wages of some other people in my own district. I come from a community where there are four or five thousand men employed in a navy yard. They appeared before this naval wage board. They asked for an increase of compensation, and they submitted overwhelming evidence that they were not receiving the prevailing rate of wages in various lines. My colleague, the gentleman from New York [Mr. CALDER], employs certain mechanics in these lines, and he stated of his own personal knowledge that he was compelled to pay certain compensation, and that these men were receiving less than the prevailing rate of wage which they are entitled to under the law.

The wage board, instead of recommending an increase of compensation, made recommendations to reduce certain rates of compensation for practically every class of mechanics. An appeal was taken. Now, if Congress is to assume this new position, that it will appropriate in advance money to increase compensation, when the entire matter is an administrative one and an administrative officer has the authority and the duty imposed upon him by law of fixing the compensation to be paid under certain conditions, then we absolutely relieve him of this responsibility and throw into Congress this involved, controverted question of what the compensation of mechanics in the various establishments throughout the United States should be.

Mr. BUCHANAN. I would like to ask if it is not a fact that the wage board has awarded an increase of pay?

Mr. FITZGERALD. It has not; and it has no authority to do that.

Mr. BUCHANAN. The Secretary of the Navy has recognized it.

Mr. FITZGERALD. He has not; he has recommended that the wages be raised.

Mr. BUCHANAN. Upon what authority does the gentleman say that the board has not awarded an increase?

Mr. FITZGERALD. On the authority of the information that comes from the Navy Department.

Mr. BATHRICK. But here is a letter from the Secretary saying that he had.

Mr. FITZGERALD. The board had no authority to award an increase; the Secretary fixes the increase. Gentlemen on the Naval Committee ought to have more accurate information about the power of wage boards and the heads of departments than they exhibit on the floor.

If the Secretary of the Navy performed his duty, if he fixed the compensation for these various employees in accordance with the recommendation of the labor board, the matter would have been disposed of and a deficiency would have been created which Congress would have been compelled to meet and appropriate the money for. But he has shirked, he has evaded, and tried to place the responsibility on the Committee on Appropriations for increasing the compensation. That is the fact of

the matter. I decline, either for myself or for the committee, to have the committee assume the duties and obligations of heads of departments, and they know it. I sent word to the Secretary of the Navy, telling him what his powers were under the law, since he seemed to be unfamiliar with them. I notified the representative of these men that, if the Secretary of the Navy was sincere and wished to give them the compensation he believed they were entitled to, all that it was necessary for him to do was to sign the order and they would be given it from the 1st of January.

Mr. BATHRICK. The gentleman from New York states the position. We have taken this matter to the Secretary, and the Secretary has told us that they could not do anything unless we had the assistance of Congress, and they were furnished the money. Look at the shuttlecock that has been made of these men for seven years trying to get an increase from the United States. The officers of the navy yard, having in charge these men, will come before the committee and tell us that they do the highest class of work in the country.

Mr. WILSON of Pennsylvania. Mr. Chairman, as I understand the law and the situation in this case, the law requires that these men shall be paid the prevailing rate of wages for the class of labor in the neighborhood in which the plant is located; and that this board is organized for the purpose of ascertaining and determining what the prevailing rate of wages is. That board has considered the question and during the month of January decided that the prevailing rate of wages was 10 per cent higher than the rate that had been previously paid, and the men engaged in that plant were entitled, as a result of the existing law, to this 10 per cent increase in wages.

Now, the Secretary has taken the ground that he can not pay that increase of wages because the appropriation for the current year is not sufficiently large to pay it. As a result these men, entitled to their wages under the law, by the decision of the board that this is the prevailing rate, are being kept out of the increased wages.

Now, whether the Secretary is at fault in refusing to pay the higher rate of wages after it has been determined by the board, the fact remains that the men are entitled to it, and we can not shirk the responsibility when the facts are brought to our attention. I do not know whether this is the proper place for the amendment, but whatever the proper place is, there the appropriation should be made.

Mr. CALDER. Mr. Chairman, does the gentleman know that in the New York Navy Yard higher grades are established sometimes and pay given to mechanics? For instance, last December we established a higher grade for machinists, and some of the machinists received higher wages from January 1.

Mr. WILSON of Pennsylvania. I know that is the case, but we have sometimes changed the territory from which they take the prevailing rate. They sometimes extend the territory to take in other communities not previously taken in, and they sometimes throw out territory in determining the prevailing rate. The prevailing rate is changing continually.

Mr. CALDER. I would like to know why they can not raise the pay of the navy-yard men in Washington, the same as they do in other yards about the country.

Mr. WILSON of Pennsylvania. I would like to know that also; and the fact is, the board has awarded this increase of pay, or has decided this 10 per cent increase is the prevailing rate, and having decided it is the prevailing rate under the law, they should be paid that rate. The fact that the Secretary has not seen fit to pay them the additional rate is no reason why they should not be paid it. If there is anything more than another that makes the workingman have a contempt for wage contracts it is the fact that employers, public or private, at times themselves violate the wage contracts that are entered into. One of the things that will work for industrial peace in this country is a recognition of the fact that when a contract is once entered into relative to wage rates, that contract is sacred during the period for which it has been entered into. This wage rate becomes in reality a contract between the Government of the United States and those men who are engaged in those plants that they shall be paid the prevailing rate of wages. The board has established what the prevailing rate is, and whether the Secretary is willing to pay that rate or not this Congress should furnish the means to pay that prevailing rate and it should be included in this appropriation bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken; and on a division (demanded by Mr. BATHRICK) there were—ayes 15, noes 20.

So the amendment was rejected.

The Clerk read as follows:

For repairs of barracks, Marine Corps, 1910, $84.

Mr. BATHRICK. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 23, by adding at the end of line 24 the following:
"For increase of pay at the navy yard, District of Columbia, for the fiscal year 1913, $120,000."

Mr. FITZGERALD. Mr. Chairman, I make the point of order that it is new legislation and that it is not germane.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

For repairing dry dock *Dewey*, $6.74. In all, $2,382.41.

Mr. BATHRICK. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

At the end of line 8, page 24, add the following:
"*Provided*, That the increased wages awarded by the wage board be paid to the employees at the Washington (D. C.) Navy Yard from and after the date of the passage of this bill for the fiscal year 1913."

Mr. FITZGERALD. Mr. Chairman, I make the point of order that it is legislation.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

BUREAU OF NAVIGATION.

The Secretary of the Navy is authorized to pay, from the appropriation "Recruiting, Bureau of Navigation, 1912," four vouchers, set forth on page 12 of House Document No. 1365, of the present session, amounting to $136.84, covering advertising placed in the following papers for recruits for the Navy by the naval recruiting officer, naval recruiting station, New Orleans, La., during the month of June, 1912, in advance of authority from the Secretary of the Navy, as required by section 3828, Revised Statutes.

Mr. RODDENBERY. Mr. Chairman, I notice a provision there in line 2, page 25, about certain advertising placed in "the following papers." Where are the following papers?

Mr. FITZGERALD. The papers are enumerated in a document. The words "the following" should be stricken out and the word "news" inserted in their place.

Mr. RODDENBERY. As a matter of fact the four vouchers contain the names of the papers?

Mr. FITZGERALD. Yes. The advertisements were inserted in advance of the authority.

Mr. RODDENBERY. It seems to me that language should come out of the paragraph.

Mr. FITZGERALD. Yes. I offer the amendment to strike out the words "the following" and insert the word "news."

The Clerk read as follows:

Amend, page 25, line 2, by striking out the words "the following" and inserting the word "news."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

The Clerk read as follows:

BUREAU OF SUPPLIES AND ACCOUNTS.

To supply a deficiency in the appropriation "Provisions, Navy," including all objects mentioned under this title of appropriation in the naval appropriation act for the fiscal year 1912, $747,092.56.

Mr. RODDENBERY. Mr. Chairman, I have been unable to obtain the report of the committee, if there is one, accompanying this bill. I sent to the Clerk some time ago.

Mr. FITZGERALD. Here is a copy of the report.

Mr. RODDENBERY. May I inquire of the gentleman about the provision on line 5, page 26? The item seems to be for $747,092.56, including all objects mentioned under this title of appropriation in the naval appropriation act for the fiscal year 1912.

Mr. FITZGERALD. That is due to the increased cost of the rations to supply the Army.

Mr. RODDENBERY. The rations?

Mr. FITZGERALD. Yes. They are paying now, I think, 36 cents.

Mr. RODDENBERY. That is what I desired to develop. The addition in the cost of provisions at this time, as compared with what it was one year or two years ago, necessitates a deficiency of nearly $1,000,000. Is that the idea?

Mr. FITZGERALD. The increased cost from the time the estimates were submitted. The estimates for the current fiscal year were submitted about 18 months ago, and that was one reason. Another reason was the estimates were reduced $200,000 for the current fiscal year upon a report from the Pacific coast that it was believed that by a change of certain methods $200,000 could be paid. That proved to be erroneous, so that the deficiency is really about $1,000,000 instead of $747,000, because $200,000 of it was due to this reduction in the estimates, which should not have been made.

Mr. RODDENBERY. Would it be the opinion that subtracting $200,000 from the $740,000 it would leave about $500,000, which sum represents the increased cost of provision?

Mr. FITZGERALD. Almost entirely.

Mr. RODDENBERY. And it is not an increase due to the amount consumed, but to the price the Government has to pay?

Mr. FITZGERALD. To the price of the different articles going into the rations.

The Clerk read as follows:

PUBLIC WORKS, BUREAU OF YARDS AND DOCKS.

For concrete and granite dry dock, $1,310.99.

Mr. BATHRICK. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 4, page 27, insert: "For payment of the prevailing rate of wages as determined by the wage board in accordance with law at the Washington Navy Yard, District of Columbia, for the fiscal year 1913, $120,000."

Mr. FITZGERALD. Mr. Chairman, I make the point of order it is not germane; it is not offered at the proper place; this is under the head of Public Works, Bureau of Yards and Docks, and the amendment of the gentleman is not germane to that point and it is legislation.

Mr. BATHRICK. Mr. Chairman, I contend this amendment is germane to the work and operation of the Bureau of Yards and Docks. That is the place where the men work, and that is the place where the men are paid; consequently it is germane to insert this item in this paragraph, and as far as being in accordance with the law, we have a law determining how wages shall be made, that is, by a wage board, and the wage board is instructed to pay the prevailing rates, and my amendment asks that the prevailing rates be paid as determined upon by the wage board. I think the gentleman's contention, that it is either not according to law or that it is not germane or that it is new legislation, falls.

Mr. FITZGERALD. The gentleman is clearly in error. This is under the head of Public Works, Bureau of Yards and Docks.

Mr. BATHRICK. Bureau of Yards and Docks; that is right.

Mr. FITZGERALD. The gentleman's amendment provides for an increase of compensation to men employed largely in the Ordnance Department. Under this head of public works there is no provision for the payment of mechanics at all. Certain public works are authorized, and this is a special deficiency in the sums required to complete them. The gentleman is attempting to put in under that heading an item to supply money to increase compensation of men employed in other departments in the Washington Navy Yard. The rule is explicit that these matters must be offered at the proper place in the bill. This is not the proper place.

Mr. BATHRICK. Mr. Chairman, I am convinced, as far as the gentleman's viewpoint is concerned, there will be no proper place in this bill, and I believe this amendment is according to law and that it is only requesting that the department pay the prevailing rate as fixed by the wage board. The board has plenty of warrant in the law to fix the prevailing rate. The board has fixed the rate, and we now ask that the money be appropriated for these payments.

Mr. MANN. Mr. Chairman, I hold in my hand the naval appropriation bill which has just passed the House to-day, reported from the committee of which the distinguished gentleman from Ohio is an honored member, having the same heading that there is in the deficiency appropriation bill, "Public works, Bureau of Yards and Docks, navy yard, Portsmouth, N. H., for fitting room, for storage of crane, garbage crematory," and other items—railway system, remodeling buildings, power plant, improvements, moving boiler shops, and such things as that—all public works, and which have nothing whatever to do with the men which the gentleman desires to increase, coming under the head of pay allowed under the increase of the Navy.

Mr. WILSON of Pennsylvania. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. WILSON of Pennsylvania. Would it be possible to do any work that is provided for in that division the gentleman has cited without the employment of men to do it?

Mr. MANN. I presume not.

Mr. WILSON of Pennsylvania. So that even in that it requires the employment of men in yards?

Mr. MANN. It does not carry any salaries whatever and there is no salary carried under the head of public works and in the Bureau of Yards and Docks, and the gentleman's committee makes up the form and the ruling has always been that you can not introduce in one part of the bill items that relate to another part of the bill, and the Committee on Appropriations has merely followed in this form the distinguished committee of which the distinguished gentleman from Ohio is a distinguished member. [Laughter.] That ought to hold the gentleman for a while.

Mr. BATHRICK. That ought to hold me; I think so. But this is not a joke with the men who are not receiving enough wages, notwithstanding the gentleman's facetious comment.

Now, Mr. Chairman, because the item that carries the appropriation in the naval bill for this increase for the fiscal year 1914 does not appear in exactly the place where the gentleman in order to support his contention would like to see it, it does not prove that the amendment I have offered is not germane to this section. There are many places where it could be put in, if the gentlemen who were opposed to us would be willing it should be there. And I think this is a hair-splitting proposition. I refer to the contention of the gentleman that it is not germane to a part of this bill that has to do with where the men are paid and where they receive the salary for their work.

The CHAIRMAN. The Chair does not think this amendment is germane to the paragraph, and therefore sustains the point of order.

Mr. BUCHANAN. Mr. Chairman, we seem to be operating strictly under the rule. I therefore make a point of order that there is no quorum present.

Mr. MANN. That is all right.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and one Members are present, a quorum. The Clerk will read.

The Clerk read as follows:

DEPARTMENT OF JUSTICE.

Enforcement of antitrust laws: For the enforcement of antitrust laws, on account of fiscal years, as follows:
For the fiscal year 1913, $65,000.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. My understanding is that this is a recommendation for a deficiency appropriation for the remainder of the fiscal year, from the 4th of March to the 30th of June, for the enforcement of the antitrust laws. My recollection is from the hearings that this appropriation provides, up to the present time, for all moneys expended during this fiscal year and all moneys that will be expended under existing prosecutions and existing contracts until the 30th of June.

Mr. BARTLETT. Will the gentleman permit? It is to cover services to be rendered in pending cases. In other words, wherever the fees are either agreed to or are to be paid, this amount is to cover what they owe and what they expect to pay for the services rendered in pending cases.

Mr. CANNON. In pending cases? That is as I understand it. The gentleman can always state it more correctly and tersely than I can myself, and I thank him. There is not one dollar provided by this bill for any additional case or cases?

Mr. BARTLETT. Not now begun——

Mr. CANNON. Any additional prosecutions of this great army, of this terrible army, on land and sea, the octopuses that are swimming about in the sea and flying in the air. Not one cent for expenditure for the commencement of proceedings and the enforcement of the antitrust act?

Mr. COX. They will obey the law under Democratic rule.

Mr. MANN. That is, the suits will obey.

Mr. COX. No; the men themselves and the corporations.

Mr. BARTLETT. All the money for pending suits is provided for.

Mr. CANNON. Precisely, but no new suits can be instituted during the remainder of this fiscal year by the incoming administration, by virtue of this appropriation.

Mr. FITZGERALD. The gentleman is mistaken.

Mr. CANNON. One moment. By virtue of this appropriation——

Mr. FITZGERALD. The gentleman is mistaken in his facts.

Mr. CANNON. If I am, I am ready to be set right.

Mr. FITZGERALD. This carries sufficient money to carry on the fixed force; that is, octopus hunting; and to discharge the obligation of the Government up to the 30th of June to these high-priced Republican special counsels who have rendered various kinds of services, legal, political, and otherwise, and it is expected after the 4th of March the Attorney General will appoint as Assistant Attorneys General lawyers who will be able to do the work, and not necessitate the hiring of special counsel.

Mr. MANN. That is the reason you made the appropriation $300,000 for the next year instead of $230,000 for the current year?

Mr. FITZGERALD. Yes.

Mr. CANNON. Now, if I may be permitted to make my own talk, I will be very glad. [Laughter.]

I say again that there is not a dollar provided for the institution of new suits.

Mr. FITZGERALD. That is a mistake. There is money provided for new suits, but there is no money provided to put on a lot of useless special attorneys. The Democratic administration will discharge all of these men who were on the per-

manent organization and put in real lawyers in place of those former distinguished officials of a former administration.

This bill provides money, for instance, to pay former Secretary Dickinson the balance of a $40,000 fee for services in the steel case. The incoming Democratic administration will appoint good Assistant Attorneys General, who will be able to handle the cases at an annual salary and do the work much more efficiently than did those high-sounding, distinguished gentlemen who got big money and did little work. You did not have any of those efficient Assistant Attorneys General in the former administration, but we may have them after the 1st of July. [Laughter.]

Mr. CANNON. Mr. Chairman, I would be glad, after the gentleman from New York [Mr. FITZGERALD] has stated for the second time what he stated the first time, taking up most of my five minutes, and after the gentleman from Georgia [Mr. BARTLETT] has sandwiched his remarks into the middle of what I tried to say, to have five minutes for myself. [Laughter.]

Mr. FITZGERALD. Well, Mr. Chairman, if the gentleman from Illinois thinks he can subserve any useful purpose thereby, I hope he will have it.

The CHAIRMAN. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. CANNON. Mr. Chairman, the Sherman antitrust act has been enforced with greater vigor under the present administration than it was ever before enforced since its enactment in 1890, and it is efficient work that has been done.

Oh, the gentleman from New York speaks of the "high-priced lawyers." Yes. These octopuses that the gentlemen dream of at night [laughter] can hire high-priced lawyers, and do hire them, and the United States Government has undertaken, in the prosecution of these various combinations, to get counsel that were equal to those that the people prosecuted could get. The district attorneys, you know, are busy in the various districts attending to current business. I recollect very well when the gentleman from Georgia, in 1903, I believe, when this item was being appropriated for on the legislative bill——

Mr. BARTLETT. In 1902——

Mr. CANNON. Yes; in 1902, when the gentleman from Georgia, on the legislative bill, which did not carry those appropriations, if I remember correctly, moved to appropriate and succeeded in appropriating $500,000—or was it a million?

Mr. BARTLETT. Oh, no. I offered an amendment for $250,000, and the gentleman from Iowa, Mr. Smith, at the suggestion of the gentleman from Illinois, who was chairman of the Committee on Appropriations, said: "Oh, make it $500,000."

Mr. CANNON. Precisely; $250,000 was proposed, and it was made $500,000. Now, that was when we had the administration, and these appropriations have been made, the prosecutions have been instituted, convictions have been had, and the law has been and is being construed from day to day; but when you come in there is not one cent in this special appropriation for services in cases to be instituted between now and the 30th day of next June. If you think that is all right, so be it, and all I desire to do is to call attention to what you propose. Possibly you may think—I do not know—that there will be no time to pay any attention to the enforcement of the law while you gentlemen over there are disposing of the pie counter. [Laughter.] That is all right.

The gentleman speaks of "distinguished lawyers." Those lawyers, so far as I know and believe, who have been employed from year to year under these appropriations have been paid well, but they have brought wonderful results. Great heavens, what has this House itself done in paying attorneys' fees? Take your Untermyers, take your Brandeises, and others. What have they done? What results have they brought?

Mr. CAMPBELL. Nothing.

Mr. FITZGERALD. Well, we left but two States in the Republican column, and those are the smallest in the Union. That ought to be enough for the gentleman from Illinois in one year. [Laughter.]

Mr. CANNON. Yes; and now that you have got it, what will you do with it? [Laughter.] This is the beginning. The gentleman says, "Two States in the Republican column." Yes; the Republican Party was divided and you conquered.

Now, I had no thought when I rose of doing anything more than to call attention to what this appropriation fails to do, or fails to enable the incoming administration to do; but no sooner had I tried to state what I desired to in a mild-mannered way than the gentleman from Georgia [Mr. BARTLETT] figuratively flapped his wings and the gentleman from New York [Mr. FITZGERALD] figuratively flapped his wings and proceeded to try to set a back fire.

In conclusion I want to say to you gentlemen on that side that it is up to you to make this appropriation. If you do not want any money for the incoming administration for this purpose for the coming four months you have the right to withhold it. The octopuses may grow in the meantime. God knows. It may be that they will flee unto the mountains and gnaw a file. I hope so, but they did not under your former Democratic administration and will not under this coming administration unless the laws are enforced.

Mr. FITZGERALD. Mr. Chairman, on the 1st of February there had been expended of the $200,000 appropriation but $104,000. According to the statement of the Assistant Attorney General in charge of this work, the $96,000 remaining unexpended was ample to meet all the obligations incurred as a result of the maintenance of a permanent organization which has been effected in the Department of Justice to carry on prosecutions under the Sherman antitrust act. Sixty-five thousand dollars additional is required to pay counsel who have been employed in this administration, especially in certain cases, for services rendered or to be rendered up to June 30 of this year. The committee desired to discharge such obligations, and recommend the amount necessary to do so. They believe that the money available to maintain this permanent organization will be sufficient to carry on the work of the prosecution of offenders under the Sherman antitrust law until the 30th of June, and on that day there will become available an appropriation of $300,000 for this work.

In view of the fact that on the 4th of March a new administration is coming in to take possession, it will necessarily take some time, a few months at least, to effect its own organization and arrange to carry out its own policies. The committee therefore saw no necessity to appropriate any additional money at this time, in view of the lack of information as to just what purpose any additional money could be applied to. I believe gentlemen on that side need not worry very long after the 4th of March as to the lack of effectiveness and efficiency and aggressiveness of the Democratic administration in enforcing the Sherman antitrust law.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For payment of salaries, fees, and expenses of United States marshals and their deputies, including the office expenses of United States marshals in the District of Alaska, to include payment for services rendered in behalf of the United States or otherwise, and including services in Alaska and Oklahoma in collecting evidence for the United States when so specially directed by the Attorney General, $125,000.

Mr. HAMLIN. Mr. Chairman, I move to strike out the last word in order to ask the chairman of the committee a question. On line 1, page 34, I see the words—

For services rendered in behalf of the United States or otherwise.

What is meant by the expression "or otherwise"? What service is that?

Mr. FITZGERALD. Some of the services rendered by marshals are not on behalf of the United States, but are on behalf of parties to litigation.

Mr. HAMLIN. Do you mean to pay the costs that the Government is liable for, for serving subpœnaes, processes, and so forth, for parties to litigation?

Mr. BARTLETT. That sometimes happens, where the defendant is too poor to pay the fees.

Mr. HAMLIN. I am very well aware of that fact, and I wanted to find out if that was what this means.

Mr. BARTLETT. That is all it means.

Mr. FITZGERALD. And when fees are covered in, payments are made out of the appropriation.

Mr. HAMLIN. I suspected that; but I wanted to know about it.

Mr. BARTLETT. That is it.

The Clerk read as follows:

BUREAU OF STANDARDS.

The following additional positions are required in the Bureau of Standards for the period from March 5, 1913, for the balance of the fiscal year 1913, namely: One watchman, at the rate of $720 per annum; one fireman, at the rate of $720 per annum; one assistant engineer, at the rate of $1,500 per annum; two laborers, at the rate of $660 each per annum; in all, $1,372.66, or so much thereof as may be necessary.

Mr. MANN. Mr. Chairman, I move to strike out the last word. On page 41, line 9, it says, "The following additional positions are required in the Bureau of Standards." The gentleman from New York and I are somewhat particular as to the language of bills. Should not that read, "For the following additional positions in the Bureau of Standards"?

Mr. FITZGERALD. The words "are required" should be stricken out.

Mr. MANN. And insert the word "for" at the beginning.

Mr. FITZGERALD. Mr. Chairman, I move to amend by inserting at the beginning of line 9, page 41, the word "for" and striking out the words "are required."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 41, line 9, insert the word "for" at the beginning of the line and strike out the words "are required."

The amendment was agreed to.

The Clerk read as follows:

For allowances to the following contestants and contestees for expenses incurred by them in contested-election cases, as audited and recommended by the Committee on Elections.

Mr. REILLY. Mr. Chairman, I notice in the expenses paid for contestants and contestees in election cases that one is allowed $2,000 and another party $1,200. I would like to ask the chairman of the committee why this difference in amounts?

Mr. FITZGERALD. Under the statute the Committee on Elections has jurisdiction to examine, audit, and report the amount that should be allowed for the expenses for the contestant and contestee within the sum of $2,000. These are the sums certified by the Committees on Elections under the statute.

Mr. BARTLETT. Mr. Chairman, I desire to state that the Committee on Elections, unless some objection is made, usually allows within the $2,000 the claims presented by the contestant and the contestee. These are the exact amounts that appear to be claimed by both the contestant and the contestee. In the one case mentioned by the gentleman from Connecticut the full amount was claimed and allowed, and in the other, I suppose, the contestant claimed but $1,200, and that was the amount that the committee certified to upon the vouchers presented to the committee by the contestant.

Mr. REILLY. Has his committee any knowledge outside of the certification of the Committee on Elections?

Mr. BARTLETT. None whatever; we take the certificate of the Committee on Elections.

Mr. WILLIS. Mr. Chairman, I notice, on page 42, line 15, an item for George E. McLean, $2,000, and on page 43, George R. McLean, $2,000.

Mr. FITZGERALD. That is a duplication, and an amendment will be offered striking one out.

Mr. WILLIS. I am familiar with the one case, but did not know about the other.

Mr. FITZGERALD. It happened in this way: The matter was first certified with one initial by an acting chairman, and later certified with a different initial by the chairman of the committee. The committee thought it was two different persons, but upon further investigation, the matter being discussed, it was found that it was the same man in the same contest.

Mr. WILLIS. My recollection is that George R. McLean is the correct name.

Mr. MANN. Doubtless the gentleman is correct, and these two names are the same person. My observation has been in contested-election cases, and I have served on the committee a long time and have had considerable experience, that both the contestant and the contestee put in claims. I notice that there are just 20 names here that cover 10 contested-election cases. Now, if one goes out it leaves one man short somewhere. We have a claim pending now before the House asking for pay of expenses in a contested-election case from New Mexico that occurred about the time I was born.

Mr. FITZGERALD. In one of the Oklahoma cases the sitting member was allowed $225 and the contestant was allowed nothing; that will account for it.

The Clerk read as follows:

George E. McLean, $2,000.

Mr. FITZGERALD. Mr. Chairman, I move to strike out all of line 15.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 42, line 15, strike out all of the line.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. If the $2,000 allowed to George E. McLean, on line 15, page 42, be stricken out, the total should be corrected.

Mr. FITZGERALD. Mr. Chairman, it is customary to correct the totals at the end of the bill. It saves considerable time. The Clerk is usually given authority to correct the totals.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman stated a moment ago that not more than $2,000 was allowed to any contestant. That is the existing law, as I understand it. Here is an expenditure of public money which, as amended, will amount to $31,815.07. This item might well attract the attention of the economists of the House, as well as those Members of the House who desire to faithfully perform their services as Members. There is no more annoying performance than that of a contest, and sometimes there is mighty small reason for the contest, but the knowledge which the contestant has that it is possible for him or his attorneys to obtain $2,000 in the event of his instituting a contest, practically makes an inducement for those defeated candidates for Congress who desire to annoy the sitting Members to file contests.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MANN. There is one item in this bill in favor of one contestant who has been carried in some form, either for a larger or smaller amount, for the last 10 or 20 years, every 2 years.

Mr. MOORE of Pennsylvania. Yes; and it apparently pays that contestant to bring his contest every session of Congress.

Mr. MANN. It pays him! Why, he lives on what he gets from this allowance.

Mr. MOORE of Pennsylvania. It annoys and harasses the sitting Member so that it makes it impossible for him to properly perform his duty as an official of the Government.

Mr. AUSTIN. Mr. Chairman, will not the gentleman from Pennsylvania give the name of that contestant?

Mr. MOORE of Pennsylvania. Mr. Chairman, I do not care to mention any names just now, but I wish to say this, that my belief is that certain contestants have come to regard this $2,000 not only as a possibility but as a sure thing, and that the $2,000 inducement to bring a contest against a sitting Member is sufficient to harass that Member during the whole of his term. We have here 20 instances of the payment of money to those who instituted contests, and to those who were obliged to defend contests in this House. It is not fair to a man who comes to Congress, elected by the people, having a majority of the votes, that he shall be annoyed from the very beginning of his term by some one who has the time and the opportunity and the financial inducement to follow on his heels either personally or by counsel throughout the whole of his two years' service. I have no doubt if the various committees on contested-election cases were called upon to testify they would say that they have evidence that it appears to them that there are some attorneys as well as some contestants who have gotten it into their heads that the mere filing of a notice to a man who has succeeded in an election is sufficient to either be bought off by the man who holds the seat or to warrant ultimately the payment of a sum not exceeding $2,000 to bring the contest and harass the sitting Member and make out of it what is to be made. A number of contests were brought at the beginning of the Sixty-second Congress that have already been withdrawn, and in some instances the same attorney has appeared more than once. That is to say, he has appeared in more than one case, and it does seem as if the time had come when for their own protection the Members of this House should repeal the law which provides a premium of $2,000 to a man to bring a contest and to put the burden of proof upon the contestant rather than to put the annoyance upon the contestee.

Mr. AUSTIN. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the committee if the statement made by the gentleman from Illinois [Mr. MANN] is correct, that one of these contestants has been coming here for years?

Mr. FITZGERALD. I think one of these individuals has appeared here with persistent regularity.

Mr. AUSTIN. Mr. Chairman, I will ask the gentleman to give me his name, so that I may move to strike it out of the bill.

Mr. FITZGERALD. It is in line 17, page 42.

Mr. AUSTIN. Mr. chairman, I move to strike out line 17, page 42.

The Clerk read as follows:

Amend, page 42, line 17, by striking out all of the line.

Mr. HAMILL. Mr. Chairman, before the House undertakes to strike out this line, let us, in fairness, consider whether it should take the step or not.

I fully agree with the gentleman from Pennsylvania [Mr. MOORE] in his opinion that men who bring contests captiously, who come before the Elections Committees without a valid or probable cause of contest, and whose only purpose is to obtain the allowance given to the contestant, ought to be discouraged in their actions. There is no more disagreeable thing to the Committees on Elections than to have contests referred to them that have no just cause for complaint. It annoys the committee; it is unjust to the House. This man Prioleau is a colored man who has been contesting the seat of one of the Members from South Carolina. The members of the committee were well aware of the fact that a contest had been brought

by Prioleau a number of times. They were fully suspicious that in bringing this contest the contestant may not have been honest, and that his purpose was only to obtain the fees, and because of that this case of Prioleau against Legare received the most careful consideration of the Committee on Elections No. 2, both by the Republican and Democratic members.

They came to the conclusion that there was merit enough in this suit to justify them in giving the amount of $1,000. Now, somebody said here that this man had contested this suit for something like 12 times. I do not care if he has contested it for 50 times. We try each case on its own merits. We are not trying any man on the actions of his life; we are judging a particular state of facts that exist in the case under consideration, and we were satisfied by a unanimous vote—by the vote of every man on the committee, Republicans and Democrats—after a discussion that lasted over an hour, that this man was entitled to this $1,000, and that he ought to receive it. Now, I have no interest in the case; I do not care whether you strike out this $1,000 or whether you retain it. I do know, however, there is no member of this committee who wants to be unjust; who does not believe that if this man had a just cause to bring this contest to this Congress he should receive the money he is honestly entitled to.

Mr. HAMLIN. Will the gentleman yield?

Mr. HAMILL. With pleasure.

Mr. HAMLIN. If the gentleman found merit in the claim why did not he present a claim to cover the full $2,000?

Mr. HAMILL. He presented a claim for about $2,000. The committee then audited the claim. There is no oral testimony; there is no one to give oral testimony, but you take the sworn statements——

Mr. HAMLIN. I understand you took the receipted vouchers.

Mr. HAMILL. Sworn to; and then considered whether the items in them were proper or not.

Mr. HAMLIN. If you passed it clearly on the question of merit, how did you find it was just one-half meritorious? Why did you not allow the full amount if you thought it was a meritorious claim?

Mr. HAMILL. I will explain to the gentleman. It did come to something over $1,000, probably to about $1,100, and in order that the committee might be on the safe side and not vote the public moneys hastily, after due deliberation we thought that $1,000 would be a fair amount.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAMILL. I ask for sufficient time to cover my remarks; they will not last more than a few minutes.

Mr. HAMLIN. I ask that the gentleman may have three minutes more. I took up some of his time.

The CHAIRMAN. Is there objection to the request? [After a pause.] The Chair hears none.

Mr. HAMILL. We figured those things out in a very reasonable way, and we came to the conclusion in the same way as other committees in making up their accounts that this man was entitled to $1,000. Now, as I said to you gentlemen, I do not care whether you adopt this amendment or defeat it. I think the man is entitled to $1,000. I have considered it carefully, and so have all the members of the Committee on Elections No. 2. If you gentlemen who have not considered it and to whom the statement of this case is, perhaps, new desire to strike the appropriation out of the bill you are, so far as I am concerned, at perfect liberty to do so.

Mr. SAMUEL W. SMITH. Did he have any counsel before the committee?

Mr. HAMILL. Yes; he had counsel before the committee.

Mr. MANN. Does the gentleman remember how many votes this man received at the last election?

Mr. HAMILL. I do not remember anything about the case just now, but the papers amply support——

Mr. MANN. Well, the case was directly before the gentleman's committee, and he does not remember anything about it.

Mr. HAMILL. Do not let the gentleman be too hasty. Let me say this to him: That he filed depositions showing he received over a thousand votes.

Mr. MANN. I venture to say the gentleman is mistaken, and that he never received a thousand votes in all the time that he ran for Congress.

Mr. HAMILL. I have not the slightest hesitancy in assuring the gentleman that he is mistaken.

Mr. MANN. I heard the case three or four times.

Mr. SHERLEY. Was the same contest made this time that was made in the Sixty-first, the Sixtieth, the Fifty-ninth, and Fifty-eighth Congresses?

Mr. HAMILL. I do not know what the grounds were in the other contests.

Mr. ANDERSON. The fact of the matter is the ground of the contest was purely constitutional?

Mr. HAMILL. Not purely.

Mr. ANDERSON. Well, almost entirely so.

Mr. HAMILL. Not almost entirely so. That was one of the questions involved in the case

Mr. MANN. I understood the gentleman to say that this man claimed he received over a thousand votes?

Mr. HAMILL. Yes.

Mr. MANN. I will venture to say there is no such evidence in the case.

Mr. MOORE of Pennsylvania. The majority of the elected Member was overwhelming, was it not?

Mr. HAMILL. No. It was overwhelming after we refused to concede votes that the contestant himself claimed he was entitled to.

Mr. MOORE of Pennsylvania. Will the gentleman enlighten the House as to the procedure in election contest cases? I think the majority of the Members have not given it very much thought. Is it not a fact that after an election, within 30 days from the time the returns are certified, the contestant may, by writing a letter to the sitting Member, bring on a contest without any other formality whatever?

Mr. HAMILL. So far as the committee is concerned with the case, here is what happened: The case was referred to the committee by the Speaker of the House——

Mr. MOORE of Pennsylvania. The gentleman does not understand.

Mr. HAMILL. The printed briefs are given to us and——

Mr. MOORE of Pennsylvania. Pardon me, the gentleman does not understand the purport of my question. If I am contesting the gentleman's election, I am obliged to give him notice within 30 days?

Mr. HAMILL. Yes.

Mr. MOORE of Pennsylvania. Within 30 days after his election is certified by whatever authority it is certified. That compels him, the elected Member, to at once respond to me, the contestant, and from that time forward practically to be at my beck and call anywhere in this wide land of ours to take testimony. Is not that a fact?

Mr. HAMILL. That may be a fact.

Mr. MOORE of Pennsylvania. Can not a contestant take a Member off of the floor into another State in order to defend himself in an election case?

Mr. HAMILL. I do not know whether he can or not. I am only interested in showing that this contestant ought to get $1,000.

Mr. AUSTIN. Mr. Chairman, I hold in my hand the New York World Almanac, containing the election returns from that district, and this candidate's vote is given at 75.

Mr. BARTLETT. That was in a presidential election, too.

Mr. AUSTIN. In a presidential election. There is not a stronger Republican on this floor than myself, and it is all folly to talk about a Republican being elected in South Carolina under present conditions in that State. It is an insult to the membership of this House for a man to come here year after year with a contest from South Carolina and impose upon the taxpayers of the United States to pay him from one to two thousand dollars for such alleged contest. Now, let this candidate go into some other industry. [Laughter.]

The member of the Committee on Elections [Mr. HAMILL]—and I have no criticism to make of him—speaks about doing justice. We must do justice by the people who are taxed and whose money is in the Treasury, out of which we are to pay this $1,000. [Applause.]

Mr. HAMILL. Will the gentleman yield for a question?

Mr. AUSTIN. I would just as soon go up to the Treasury Department with a dark lantern and abstract a thousand dollars of the people's money as to vote for this item in this bill, and I will not do it.

Mr. HAMILL. Of course I can not help the gentleman if he wants to vote without evidence. That is something he must decide for himself. We have decided it according to the evidence and according to the procedure before us. That is the great difference between myself and the gentleman from Tennessee.

Mr. AUSTIN. I am speaking about evidence. Every time this man has had a contest in a Republican or Democratic Congress the committee have carefully given him a hearing, listened to his testimony, and have come in here in every instance with a unanimous report against him.

Mr. BARTLETT. And the contest has already been made on the identically same grounds for all the years past.

Mr. AUSTIN. Every Republican member of the committee and every Democratic member of the committee has written in every report "You have no case," and in every instance his contest has been followed by an appropriation to pay him from $1,000 to $2,000 for instituting it; and I venture the assertion that if this money is voted here to-night, although this man re-

ceived in the last election only 85 votes, according to the figures, he will be here with another contest in the next Congress.

Mr. CANNON. Mr. Chairman, I want to call attention to these items. There are 20 of them, for contestants and contestees. Here are 10 contests, and out of that number I believe one man has been unseated.

Mr. FOSTER. Two of them have been unseated.

Mr. COVINGTON. There were 10 contests.

Mr. CANNON. Yes; there were only 10 contests and 2 have been unseated. Then 8 have made contests in which they failed, and I believe that in each contest the committee that investigated the case has recommended this allowance.

Now, I know it is uncomfortable for a man who gets a certificate to have a contest made on him, and yet, after all, contests are at times necessarily and worthily made. Some years ago—I think it was 20 years ago—the expenses of contests were so great that a provision of law was enacted as to contests, limiting the amount that could be paid in each case to $2,000. Frequently the expenses in those days would mount up to ten or fifteen thousand dollars, and I think in one case in Ohio they ran up to $19,000.

Mr. HAMILL. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. CANNON. Yes.

Mr. HAMILL. In one of these cases I know that the contestant and the contestee spent over $5,000 apiece.

Mr CANNON. There is no such provision of law with respect to the Senate. It affects only the House. I am not complaining of the law which provides that the allowance shall not exceed $2,000, and yet if there be real grounds for a contest and a man is trying to establish his right to a seat that he is prevented from occupying on account of fraud, everybody is interested; each citizen is interested in it.

I do not know this man, and, like the gentleman on the committee who has addressed this committee, I do not care, so far as I am concerned, what becomes of this item. But the committee has unanimously recommended this $1,000. If we are to go back and revise, without looking at the record, and say that this man has made many contests and that no man can be elected from South Carolina who is a Republican, I suppose we shall get into trouble. I do not know whether this man is a Republican or not, or whether he has any politics or not—this man who has made the contest. [Laughter.] But I am not willing to turn down the recommendation of this committee, and I may say I have just as much knowledge touching this contest as I have with respect to the other nine contests. So far as I am concerned I am going to vote against this amendment. [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Tennessee [Mr. AUSTIN].

The question was taken, and the chairman announced that the "ayes" seemed to have it.

Mr. CANNON and Mr. HAMILL demanded a division.

The committee divided; and there were—ayes 55, noes 36.

So the amendment was agreed to.

Mr. FITZGERALD. Mr. Chairman, I ask that the remaining items in this group be passed over for the present. It is a question whether some provision has not been made for some of the persons included in these paragraphs. I want to have an opportunity to look into the matter.

Mr. MANN. A provision made when?

Mr. FITZGERALD. In the last general deficiency bill. I ask that they be passed over for the present.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] asks unanimous consent that the items of these paragraphs be passed over for the present. Without objection, it will be so ordered.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

To continue the employment of seven messengers, at $100 per month each, in the post office of the House of Representatives, from March 4 until December 1, inclusive, 1913, $6,230.

Mr. LLOYD. Mr. Chairman, I wish to offer an amendment on page 43, line 16, to strike out the words "March 4" and insert the words "April 1." You will find on examination that existing law provides for payment up to and including March 31.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. LLOYD].

The Clerk read as follows:

Amend, page 43, line 16, by striking out the words "March 4" and inserting the words "April 1."

Mr. MANN. Mr. Chairman, it may be that the committee has knowledge of the necessity of employing these seven post-office messengers during the vacation after the special session. Of course, I do not have. They might be competent to do the work at that time, but they are not competent to do the work well at this time.

There is universal complaint in the House about the post office of the House. I do not know whether it is the lack of numbers of messengers or the lack of something else, but there is a decided lack somewhere in connection with the House post office. I do not know that the gentleman from Missouri [Mr. LLOYD] is to be held responsible for that, though I believe he is the head of the patronage committee. Why should this provision be made beyond the end of the session? What will these messengers do in the summer time?

Mr. FITZGERALD. They will deliver mail, as they have done for the last 16 years.

Mr. MANN. I think they have not delivered mail for the last 16 years.

Mr. BARTLETT. This is the same thing which has been carried heretofore.

Mr. MANN. I do not think you will find this provision in any former appropriation bill.

Mr. FITZGERALD. They have always been carried.

Mr. MANN. They have not always been carried.

Mr. FITZGERALD. They always have during my service.

Mr. MANN. I think they have not always been carried during the gentleman's service in the House. How long they have been carried I do not know. We have had several resolutions concerning these messengers in the House post office. Will the gentleman from Missouri [Mr. LLOYD] say how long since we passed such a resolution?

Mr. LLOYD. Mr. Chairman, just before the close of the last session, providing for the interim.

Mr. MANN. We passed a resolution at this session relating to employees of the post office, I think. There is not the slightest use for these messengers during the recess, when Congress is not in session. They may need one, but they do not need the seven. The fact is that before the House Office Building was constructed we used to have these messengers deliver mail at the residences of Members of Congress.

Mr. BARTLETT. We do now.

Mr. MANN. Some Members may receive their mail at their residences now. I receive a copy of the CONGRESSIONAL RECORD at my house, delivered through the House post office, though generally it comes after the one delivered through the city post office, and it does not come in respectable shape. It does not always come at all through the House post office, but always comes through the city post office. But since the House Office Building was constructed most of the mail is delivered there at some time during the day or week.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. LLOYD].

The amendment was agreed to.

Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent that the Clerk be authorized later to change the totals. They must be computed.

The CHAIRMAN. The gentleman asks unanimous consent that the Clerk be authorized to change the totals. Is there objection?

There was no objection.

Mr. FITZGERALD. I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ADAIR, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 28858) making appropriations to supply deficiencies in appropriations for the fiscal year 1913 and for prior years, and for other purposes, and had come to no resolution thereon.

FLOODS ON THE MISSISSIPPI (H. DOC. NO. 1453).

Mr. COLLIER. Mr. Speaker, I ask unanimous consent to have printed as a public document a report of Maj. J. E. Normoyle, of the Quartermaster's Department, on the work that he had charge of last summer in connection with the floods on the Mississippi and the distribution of the fund for the relief of the flood sufferers.

The SPEAKER. The gentleman from Mississippi asks to have printed as a public document the report of Maj. J. E. Normoyle on the floods on the Mississippi River last year. Is there objection?

There was no objection.

INDIAN APPROPRIATION BILL.

Mr. STEPHENS of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 26874, the Indian appropriation bill, and disagree to the Senate amendments, and ask for a conference.

Mr. MANN. I think the gentleman better ask that it be printed with the Senate amendments.

Mr. STEPHENS of Texas. The Senate has printed the bill.

Mr. MANN. It can be printed by to-morrow, with the Senate amendments numbered.

Mr. STEPHENS of Texas. Then, Mr. Speaker, I will change my request, and ask to have it printed with Senate amendments numbered.

The SPEAKER. Without objection, it will be so ordered.

There was no objection.

LEAVE TO ADDRESS THE HOUSE.

Mr. UNDERWOOD. Mr. Speaker, I desire to ask unanimous consent that the gentleman from Kentucky [Mr. SHERLEY] at a later day, when the Speaker recognizes him, and the public business is in such a condition that he can receive recognition, may have 40 minutes in which to address the House on the subject of a budget.

The SPEAKER. The gentleman asks unanimous consent that at such stage of the proceedings as the Chair can recognize the gentleman from Kentucky, he may have 40 minutes to address the House on the subject of a budget.

Mr. MANN. Reserving the right to object, which I do not intend to do, how will the Speaker determine that? Is the request that the Speaker may recognize him at any time?

The SPEAKER. The request is that when the public business is in such a condition that he may receive recognition the Speaker may recognize him. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I make the same request for the gentleman from Ohio [Mr. LONGWORTH], who is shortly to leave us and who desires a little time when it is convenient.

The SPEAKER. The gentleman from Illinois makes the same request for the gentleman from Ohio [Mr. LONGWORTH]. Is there objection?

There was no objection.

A BUDGET.

The SPEAKER laid before the House a message from the President of the United States, which was read, ordered printed, and referred to the Committee on Appropriations, together with the accompanying documents, for the Committee on Appropriations to determine what should and what should not be printed.

[For message, see Senate proceedings of this day.]

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 27827. An act to amend section 70 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 3947. An act to provide for a bridge across Snake River, in Jackson Hole, Wyo.

GIBBES LYKES.

Mr. LEVER. Mr. Speaker, I move to suspend the rules and pass the bill S. 6176, an act for the relief of Gibbes Lykes.

The Clerk read the bill, as follows:

Be it enacted etc., That the President be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, to appoint Gibbes Lykes, late a second lieutenant of Cavalry in the United States Army, to be a second lieutenant of Cavalry in the United States Army, to take rank at the foot of the list of second lieutenants of Cavalry: *Provided*, That no back pay or allowances shall accrue by reason of the passage of this act.

The SPEAKER. Is a second demanded?

Mr. FOSTER. I demand a second.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds voting in favor thereof) the rules were suspended, and the bill was passed.

TIMBER CUT ON PETACA LAND GRANT.

Mr. McKENZIE. Mr. Speaker, I move to suspend the rules and pass the bill (S. 7385) to relinquish the claim of the United States against the grantees, the legal representatives and assigns, for timber cut on Petaca land grant, which I send to the desk and ask to have read:

The Clerk read the bill, as follows:

Be it enacted, etc., That the United States of America hereby forever relinquish, release, satisfy, and discharge all right, claim, and demand which they have or may have against the original grantees, their heirs and assigns, of the tract of land which is known as the Petaca grant, being private land claim No. 72, situate in the county of Rio Arriba, in the State of New Mexico, for timber and lumber cut and removed therefrom by said grantees, their legal representatives or assigns, prior to December 18, 1899, being the same tract of land which was recommended to be confirmed by Congress to Jose Julian Martinez and others and their legal representatives or assigns by James K. Proudfit, surveyor general of the Territory of New Mexico, on February 20, A. D. 1875, which said tract of land was thereafter officially surveyed and platted in the said surveyor general's office and found to contain 186,977.11 acres, and the whole thereof, as so surveyed, having been held and claimed in good faith as their property from 1836, by said Jose Julian Martinez, his associates and their heirs, legal representatives and assigns, until December 18, 1899, when on an appeal from a decision of the Court of Private Land Claims, which had confirmed said grant in favor of said Jose Julian Martinez and his associates, their heirs and assigns and legal representatives, the Supreme Court of the United States reversed said decision and limited said grant to a less amount of said land, said timber and lumber having been cut and removed therefrom while they so held and claimed said land in good faith, and from the portions thereof adjacent to the Denver & Rio Grande Railroad.

The SPEAKER. Is a second demanded? [After a pause.] No second being demanded, the question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

Mr. MANN. Mr. Speaker, I ask unanimous consent to have the report of the committee printed in the RECORD in connection with the passage of the bill.

The SPEAKER. Is there objection?

There was no objection.

The report is as follows:

TO RELINQUISH CLAIM OF THE UNITED STATES FOR TIMBER CUT ON PETACA LAND GRANT.

Mr. HOWLAND, from the Committee on the Judiciary, submitted the following report to accompany S. 7385:

The Committee on the Judiciary, having had under consideration the bill S. 7385, reports the same back to the House without amendment, with the recommendation that it do pass.

A statement of the facts on which this recommendation is based is contained in a letter from the Attorney General of the United States dated January 28, 1913, addressed to the chairman of the Committee on the Judiciary, and which is printed in full as a part of this report.

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., January 28, 1913.

Hon. HENRY D. CLAYTON,
Chairman Committee on the Judicary,
House of Representatives.

DEAR SIR: I have yours of the 25th instant, handing me copy of bill (S. 7385) to relinquish the claim of the United States against the grantees, their legal representatives and assigns, for timber cut on Petaca land grant.

This bill proposes to relinquish, release, satisfy, and discharge all right, claim, and demand which the United States may have against the original claimants of the Petaca land grant for timber cut and removed therefrom by the claimants, their legal representatives and assigns, prior to December 18, 1899, and I understand your committee desires all the information in the possession of this department relative to the propriety or advisability of the proposed legislation.

I have the honor to advise you that from information furnished by the Interior Department it appears that the Petaca land grant in New Mexico was favorably reported by the surveyor general of the then Territory of New Mexico, and a preliminary survey was made of the grant, showing the same to embrace an area of approximately 187,000 acres. This report of the surveyor general was transmitted to Congress January 21, 1887, by the Secretary of the Interior, who expressed the opinion that the area should be limited to the quantity occupied and cultivated by those who claimed the grant in 1848, and ought not in any event to exceed the limitation of town grants, namely, four square leagues.

The grant was never confirmed by Congress, and when the Court of Private Land Claims was established proceedings were had before that court which resulted in a decree, entered December 1, 1896, whereby the court held that the title to the land claimed, embracing a total of approximately 187,000 acres, was valid and the title thereto confirmed in the claimants. However, an appeal from that decision was taken to the Supreme Court of the United States, where a decision was rendered reversing the action of the Court of Private Land Claims and confirming the grant for a very limited area (United States *v.* Pena, 175 U. S., 500). The timber mentioned in this bill was cut from the area excluded from the grant under the Supreme Court's decision.

As early as 1883, one S. S. Farwell claimed an interest in the grant, and some time later he, with L. Z. Farwell, of Freeport, Ill., and Marcus Z. Farwell, of Denver, Colo., made a contract with one Harry S. Buckman, of Colorado Springs, Colo., authorizing the latter to cut timber on lands within the claimed limits of the grant. Under this contract Buckman cut some 27,000,000 feet of timber. On August 12, 1886, L. Z. Farwell and S. S. Farwell entered into a contract with R. W. Stewart and E. H. McConnell whereby the two latter were permitted to cut timber from the grant at a stumpage price of $2.50 per thousand. Under this contract Stewart and McConnell cut some 33,000,000 feet of timber.

Based on recommendations from the Interior Department, suit has been instituted against Buckman and the Farwells to recover the value of the 27,000,000 feet cut by Buckman at $2 per thousand, and suit is contemplated against Stewart and McConnell and the Farwells to recover some $82,000, the value of the 33,000,000 feet cut by Stewart and McConnell under their contract. The Interior Department regards both trespasses as innocent and for that reason recommended suit for the stumpage value of the timber only.

The timber was cut in both instances more than 20 years ago, and at a time when the Farwells, who claimed to own the grant, and probably everybody else interested in the matter believed the title to be good. So far as this department is advised there is no evidence whatever to show any bad faith, and, while the Government has a legal claim against those who cut the timber, because the lands having been eliminated from the grant by the decision of the Supreme Court, actu-

ally belonged to the United States, it seems exceedingly harsh to attempt to enforce the Government's claim at this late day. Some of the original parties are dead, and the suit must necessarily be brought against their heirs.

In view of the entire situation, I think that Congress should grant the relief proposed by this bill, and I therefore unhesitatingly recommend its passage.

Very respectfully, GEORGE W. WICKERSHAM,
Attorney General.

REGULATING TRAFFIC IN ADULTERATED AND MISBRANDED GOODS.

Mr. COVINGTON. Mr. Speaker, I call up the conference report on the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded and poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Maryland calls up a conference report, and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (NO. 1579).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 1.

That the House recede from its disagreement to the amendment of the Senate numbered 2; and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the matter stricken out and the insertions made by said amendment, insert the following:

"That reasonable variations shall be permitted, and tolerances and exemptions as to small packages and containers shall be established by rules and regulations made in accordance with the provisions of section three of this act."

And the Senate agree to the same.

W. C. ADAMSON,
J. HARRY COVINGTON,
F. C. STEVENS,
Managers on the part of the House.

GEORGE T. OLIVER,
ROBERT M. LA FOLLETTE,
E. D. SMITH,
Managers on the part of the Senate.

STATEMENT OF THE MANAGERS ON THE PART OF THE HOUSE.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on H. R. 22526, an act to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, submit the following statement:

This bill as it passed the House amended section 6 of the pure food and drugs act of 1906 so as to require the weights of the contents of all packages of food products entering into interstate commerce to be plainly stated on the outside of the package. The bill then provided that reasonable variations should be permitted and tolerances established by rules and regulations made in accordance with the provisions of the pure food and drugs act. The rules and regulations would be made under that law by the Secretary of the Treasury, Secretary of Agriculture, and Secretary of Commerce and Labor.

The Senate amended the bill by striking out that proviso and authorizing the Secretary of Agriculture alone to establish rules and regulations where in his judgment exactness in the weight of the contents of the package is impossible, and providing an absolute exemption for all articles in packages selling at retail for 6 cents or less.

The effect of the receding by the Senate from its amendment No. 1 and the insertion in lieu thereof of the proviso as agreed upon by the committee of conference is to restore the bill practically to its original House form.

The effect of the receding by the House to Senate amendment No. 2 is simply to make the bill become effective six months later than provided in the House bill.

W. C. ADAMSON,
J. H. COVINGTON,
F. C. STEVENS,
Managers on the part of the House.

Mr. FOSTER. Mr. Speaker, I desire to ask the gentleman from Maryland if the bill gives the variation as to weight that was provided in the House bill?

Mr. COVINGTON. Mr. Speaker, the conference report restores it to the same form that the bill was originally in when it passed the House, with the exception that there is now inserted after the word "tolerances" a provision that the three Secretaries shall in addition establish reasonable tolerances and exemptions of small packages. It really leaves it in practically the same form that it was when it passed the House.

Mr. MANN. What we intended originally?

Mr. COVINGTON. Yes. It now provides for those reasonable variations which the legitimate manufacturers must make in order to substantially comply with the statute.

Mr. MANN. And is satisfactory to the manufacturers?

Mr. COVINGTON. Yes.

Mr. KAHN. Is the report signed by all of the House conferees?

Mr. COVINGTON. The report is signed by all of the House and Senate conferees.

Mr. RAKER. I understand that the bill in substance, so far as the legal features are concerned, is practically the same as the House bill.

Mr. COVINGTON. That is correct.

Mr. RAKER. And this brings it back in that shape with the exception of the handling by the Secretary of Agriculture?

Mr. COVINGTON. It eliminates that also. This restores it to its original form, and it is handled by three Secretaries, in accordance with the provisions of section 3 of the original pure food and drugs act of 1906.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

ADJOURNMENT.

Mr. SHERLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 12 minutes p. m.) the House adjourned until to-morrow, Thursday, February 27, 1913, at 10.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting, for the consideration of Congress, supplemental estimates of deficiencies in appropriations for the service of the District of Columbia (H. Doc. No. 1433); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, requesting that the sum of $11,000 be included in the general deficiency bill for maintenance of marine hospitals, Public Health Service, for the fiscal year ending June 30, 1913 (H. Doc. No. 1434); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WILSON of Pennsylvania, from the Committee on Labor, to which was referred the bill (H. R. 27281) to regulate the hours of employment and safeguard the health of females employed in the District of Columbia in any mill, factory, manufacturing or mechanical establishment, or workshop, laundry, bakery, printing, clothing, dressmaking, or millinery establishment, mercantile establishment, store, hotel, restaurant, office, or where any goods are sold or distributed, or by any express or transportation company, or in the transmission or distribution of telegraph or telephone messages or merchandise, reported the same without amendment, accompanied by a report (No. 1574), which said bill and report were referred to the House Calendar.

Mr. SHARP, from the Committee on Foreign Affairs, to which was referred the resolution (H. J. Res. 402) extending the operation of the act for the control and regulation of the waters

of Niagara River, for the preservation of Niagara Falls, and for other purposes, reported the same with amendment, accompanied by a report (No. 1577), which said bill and report were referred to the House Calendar.

Mr. DUPRÉ, from the Committee on the Judiciary, to which was referred the bill (S. 3925) providing for an increase of salary of the United States marshal for the district of Nevada, reported the same without amendment, accompanied by a report (No. 1575), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. FITZGERALD: A bill (H. R. 28858) making appropriations to supply deficiencies in appropriations for the fiscal year 1913, and for prior years, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. REILLY: A bill (H. R. 28860) to provide an equipment maintenance allowance for carriers in the Rural Delivery Service; to the Committee on the Post Office and Post Roads.

By Mr. LITTLEPAGE: A bill (H. R. 28861) to amend section 118 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

By Mr. McCOY: Joint resolution (H. J. Res. 404) providing for the appointment of a committee of four Members of Congress, two appointed by the President of the Senate and two by the Speaker of the House of Representatives, for the purpose of inquiring into 1-cent letter postage and other matters relative thereto; to the Committee on the Post Office and Post Roads.

By Mr. CURLEY: Joint resolution (H. J. Res. 405) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

Also, memorial from the Legislature of Massachusetts favoring constitutional amendment to establish uniform hours of labor; to the Committee on the Judiciary.

By Mr. HAWLEY: Memorial from the Legislature of Oregon favoring the passage of H. R. 13500, the Asiatic exclusion act; to the Committee on Immigration and Naturalization.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNS of Tennessee: A bill (H. R. 28859) granting an increase of pension to Nancy E. Robinson; to the Committee on Pensions.

By Mr. JAMES: A bill (H. R. 28862) granting a pension to W. H. Odom; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 28863) granting an increase of pension to Paulina Kerr; to the Committee on Invalid Pensions.

By Mr. HAMILL: Resolution (H. Res. 870) to pay Nathan B. Williams $150 for services to the Committee on Elections No. 2; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request: Petition of the Pokagon Tribe of Pottawattamie Indians of Michigan and Indiana, protesting against the passage of House bill 28453, to facilitate the reclamation of shore lands for the Burnham lake front improvement project; to the Committee on Indian Affairs.

By Mr. ALLEN: Petition of special committee of the United Smoke Committee of the city of Cincinnati, Ohio, relative to the elimination of smoke from river steamboats, and asking an investigation of same; to the Committee on Interstate and Foreign Commerce.

Also, petition of the System Federation of the Harriman lines, favoring the passage of legislation for the strict enforcement of inspecting locomotive boilers and safety appliances for railway equipment; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDERSON: Petition of citizens of Wykoff, Minn., favoring the passage of legislation compelling concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. BYRNS of Tennessee: Papers to accompany bill granting an increase of pension to Nancy E. Robinson; to the Committee on Pensions.

By Mr. CALDER: Petition of the joint session of the board of directors of the Board of Commerce, Commercial Club, Manufacturers and Producers Association, and Traffic Bureau of Knoxville, Tenn., favoring the passage of legislation for the reduction of the tariff on aluminum; to the Committee on Ways and Means.

By Mr. CARY: Petition of the A. J. Hilbern Co. protesting against the passage of legislation for placing any duty on perfumes, etc.; to the Committee on Ways and Means.

By Mr. CURLEY: Petition of the branch of Andrew Jackson of the American Continental League, Boston, Mass., protesting against the passage of the Root bill for the repeal of the free tolls portion of the Panama Canal act; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Harvard Men's Class, Dorchester, Mass., favoring the passage of the Kenyon red-light injunction bill to clean up Washington for the inauguration; to the Committee on the District of Columbia.

By Mr. CURRIER: Petition of school children of Warner and Bradford, N. H., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. DYER: Petition of joint session of the board of directors of the Board of Commerce, Commercial Club, Manufacturers and Producers' Association, and Traffic Bureau of Knoxville, Tenn., favoring the passage of legislation for the reduction of the tariff on aluminum; to the Committee on Ways and Means.

By Mr. FULLER: Petition of the International Association of Machinists, Washington, D. C., favoring an amendment to the naval appropriation bill providing for the building of one of the new battleships in one of the Government navy yards; to the Committee on Naval Affairs.

By Mr. GOOD: Petition of citizens of the fifth district of Iowa protesting against the passage of the Johnston bill (S. 237) for the proper observance of Sunday in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HENRY of Connecticut: Petition of citizens of Hartford, Conn., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. LANGHAM: Petition of the E. R. Brady Post, No. 242, Grand Army of the Republic, favoring the passage of the bill for making pension payments monthly instead of quarterly; to the Committee on Invalid Pensions.

Also, petition of citizens of Pennsylvania favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. RAKER: Petition of the Tuesday Club, of Sacramento, Cal., favoring an increase in the appropriation for the suppression of the white-slave traffic; to the Committee on Appropriations.

Also, petition of the allied boards of trade of Knoxville, Tenn., protesting against the passage of any legislation for the reduction of tariff on aluminum; to the Committee on Ways and Means.

Also, petition of the Italian-Swiss colony, of New York, protesting against the passage of the Jones-Works bill for the regulation of the liquor traffic in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Standard Gas Engine Co., San Francisco, Cal., protesting against the passage of House bill 28579, to provide for the uniform regulation of boats engaged in the towing service; to the Committee on the Merchant Marine and Fisheries.

By Mr. REILLY: Petition of the International Association of Machinists, favoring an amendment to the naval appropriation bill providing for the building of one of the two new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of New England Water Works Association, Boston, Mass., protesting against the passage of any legislation tending to destroy the present national system of forest conservation; to the Committee on Agriculture.

By Mr. SIMS: Petition of citizens of McKenzie, Tenn., favoring the passage of legislation compelling concerns selling goods direct to the consumer by mail to contribute to their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. TUTTLE: Petition of the Newark Hardware & Supply Association, Newark, N. J., favoring the passage of the Weeks bill for a 1-cent letter postage rate; to the Committee on the Post Office and Post Roads.

UNIV. OF MICHIGAN,

DEC 4 1913
